The great Machinery Gallery and the Connecting Gallery are the weak points of the business. At the last hour it has been determined to erect a gallery round the old Panorama-building—this gallery to be devoted to the interesting purposes of a great buffet. This buffet will be reached by a connecting gallery that will run from the Southern Gallery of the Palace. The central space of the Panorama-building will be devoted, according to some authorities, to French furniture exclusively; according to others, to the separate exhibition of the State manufactories of the Sèvres, the Gobelins, &c. The Gobelin authorities are now arranging their tapestries in the north-eastern corner of the main building; but this fact rather strengthens the report that they are to be finally in the old Panorama-building, if we are to judge by past experience. I am informed that Messrs. Yorke and Co., the contractors who erected the Palace, have undertaken to erect the Connecting Gallery between the Machinery Gallery and the main building within one month from the time of signing the contract. This contract was signed, I apprehend, about five days ago. But no person pretends to say that the two exhibitions will be connected on the 1st of May. Again, if they were so connected, the Machinery department would not be worth a visit at this early period. At the present time this enormous gallery presents to the eye of the visitor little else than a chaos. The agricultural implements are still bandaged up in straw; machines are about to be built; the galleries within the gallery are space wholly unoccupied, or were a few days ago. I am certain that this gallery will not be worth a visit before the 1st of June; but it will then be the most original part of the Great Universal Exhibition.

In the vicinity of the Palace the Horticultural Exhibition is progressing vigorously. Hundreds of evergreens lie about, ready to be planted; and workmen are glazing the great hothouses. Before the principal entrance, the ground has been engaged during the last week by laying down solid bitumen pavement; and huge rollers have been solidifying the gravel walk. A little farther off, speculators are busy arranging *comptoirs*, where exhibitors may expose for sale goods similar to those they have in the Palace. One of these establishments advertises 1500 counters to let; another, the International Bazaar, makes known that it has 500 counters to let. I am told that enormous rents are asked for these counters; whether they are obtained is a point which the proprietors cannot at the present moment explain to their entire satisfaction, according to the inquiries I have made.

Already many obvious strangers are to be seen in Paris. I met, yesterday, a Swiss on the Boulevards, dressed in the acknowledged costume of hotels, and familiar to many of your readers only in the realms of Mour Byrne. Many Spaniards and provincial French people have also arrived. The latter are easily pointed out by the Parisinus. They are, indeed, remarkable, in their short waisted, close-cut coats, and their description of trousers and hats, on the male side; and by their wonderful caps, or still more wonderful bonnets (to Parisian ladies), on the female side

In conclusion, I would earnestly advise all visitors who intend to spend an Exhibition week in Paris to postpone their journey till June or July. Everything will not be finally arranged before the end of June. The fault is not altogether with our graceful, hospitable hosts, the French; much of it is with exhibitors, who are even now coolly meeting the contributions they should have been in the Palace for on three weeks ago. There is America—with its hundred exhibitors, and, I believe, its eight Commissioners—still unrepresented, occupying, to make the case more deplorable, space immediately opposite the principal entrances! What can the Imperial Commissioners do to remedy shortcomings like these?

In my next I hope to be able to give your readers a detailed account of the opening ceremony, together with a rapid description of the wonders that will be found in the various buildings which make up the Great Paris Universal Exhibition.

It may interest your readers to hear that the company who protended to the exclusive right of sketching in the building, have been opposed at law by several Paris firms—as Susse and Co.—and have lost their pretentious claim.

BRITISH PORCELAIN FOR THE FRENCH EXHIBITION.—The competition in the Ceramic display will be very powerful; but we are pleased to find that the names of our art-manufacturer will be well sustained in "Imperial Dessert Service," which Messrs. Daniell, of New Bond-street, have prepared for the grand competitive display. This is certainly one of the most magnificent productions in porcelain ever manufactured in any country, and will place Coalbrookdale china high in the Ceramic show, and prove that there is no deficiency of native talent among us, but that, if such a spurted effort as the present means with due encouragement, our porcelain must become, if it is not already, the most perfect of existing pottery. The colour of the service is turquoise blue, of even brilliancy. The plates are painted from the compositions of Watteau, and the exquisite miniature-like panelling and colouring are extremely beautiful. The compotiers are of chaste design, and Mr. Hancock has been very successful in the treatment of the Parian figures by which they are supported. The whole service, although of the most gorgeous description, is, in its gilding and decoration, eminent for chastenes and good taste. The whole is the work of Parisians. On Wednesday, Mr. Daniell had the honour of submitting this magnificent dessert service to the inspection of her Majesty and his Royal Highness Prince Albert.

THE GRAND STATE BANQUET I

GEORGE'S HALL, WINDSOR CASTLE.

THE SILENT MEMBER.—(No. XIV.)

In addition to the time already lost in useless negotiations abroad, more time will necessarily be expended at home in explanations and the business of legislation will be interrupted next week by long speeches in reference to the failure of the business of diplomacy: *ex nihilo nihil fit* will receive ample illustration in a few days, when Lord John Russell, having returned from doing an infinite deal of nothing at Vienna, will have to talk an infinite deal of nothing in the House of Commons, by way of apology for the fruitlessness of his mission.

One would have thought that the consciousness of the very serious hardships to which our officers in the Crimea are exposed would have sobered down the dispositions of those young officers at home whose natural bent would incline them to those acts of frivolity, folly, and something worse, which have already, on more than one occasion, brought John Russell, having returned from doing an infinite deal of nothing at Vienna, will have to talk an infinite deal of nothing in the House of Commons, by way of apology for the fruitlessness of his mission.

One would have thought that the consciousness of the very serious hardships to which our officers in the Crimea are exposed would have sobered down the dispositions of those young officers at home whose natural bent would incline them to those acts of frivolity, folly, and something worse, which have already, on more than one occasion, brought disredit on the military profession. Scarcely, however, had the public ceased to think of the case of Lieutenant Perry, when the subject is unpleasantly revived in one's recollection by the disgusting details of the conduct of two officers in the 30th Regiment, who have amused themselves by pulling a brother officer out of bed, dragging him into a room, and kicking him out again, after smearing his mouth with tallow, in an attempt to execute a threat that they would make him eat a candle. This may be the fun of the fast school of military "gents;" but the humour is of that coarse and extravagant kind which belongs to the tricks played by the Clown and Pantaloon in a pantomime.

The honour and safety of England would stand but a poor chance against an enemy if all our "officers and gentlemen" were of the class represented by the three parties in this disreputable affair—two of whom evinced a large amount of cowardice and blackguardism, while the third was degraded by forced submission to a series of the most debasing indignities. The matter has been dealt with by the Commander-in-Chief in a manner not very consistent with common sense, and in a style not by any means conformable to the rules of common English. He tells the culprits that they "may think themselves so far fortunate in having escaped the inevitable consequence" of their ungentlemanly conduct; but, as that only is "*inevitable*" which cannot be "escaped," the Commander-in-Chief has shown that the command of language is not one of his attributes. It seems that an apology had been made to the insulted officer, with which he was "quite satisfied," and it is natural that he should be, for no one who is liable to such insults as those above described can pretend to be very sensitive on the point of dignity. An individual who has been dragged out of bed and thrashed, while a candle has been smeared about his mouth, will fancy, no doubt, that the stains can be wiped away from his honour as easily as the candle-grease can be rubbed off his countenance. One of the delinquents, after having apologised for his ungentlemanly conduct, was found repeating the offence; and the Commander-in-Chief very properly intimated that "no reliance can be placed on Ensign Neville;" but, with the usual luck of many of those in the public service on whom there is "no reliance," he is allowed to retain his position. It is true that the Commander-in-Chief threatens to recommend to the Queen that the offender's "name shall be erased from the 'Army List,' if he should be again guilty of the offence; but in the meantime his Lordship is satisfied that his opinion of Ensign Neville's conduct "shall be read to all the officers of the dépôt," who will thus learn the encouraging fact that, in spite of the opinion of the Commander-in-Chief as to his "ungentlemanly conduct," and notwithstanding that "no reliance can be placed" on him by the Commander-in-Chief, the Ensign is still thought fit to hold his commission. If this decision of the Commander-in-Chief is intended *pour encourager les autres*, it will doubtless have the effect of encouraging many to hope that they will not lose their rank in the Army, though they may lose at the same time their characters as gentlemen and the confidence of Lord Hardinge.

Perhaps this comparative impunity for the offences of the two officers in the 30th may have inspired the lively vagaries that have just taken place in the 6th Inniskilling Dragoons, where a subaltern has been exposed to all sorts of practical jokes, including the saturation of his wardrobe with water, and the cutting off his horse's tail, by way of a climax to the exuberance of the humour of his comrades.

Second thoughts are said to be best, but it is as well in some cases to reserve the utterance of a first thought, if there is a probability that a second thought, at variance with the first, is about to arise in the mind of the utterer. This caution should especially be observed on the judicial bench, in passing sentences on a prisoner; for it is not very satisfactory to hear the judge in almost the same breath assign to the same offence two different amounts of punishment. An instance of this kind occurred the other day at the Middlesex Sessions, when Mr. Witham sentenced a woman, for assaulting her husband, to four months' hard labour. On hearing the penalty that was thought due to her offence, the prisoner exclaimed to the prosecutor, "I hope you may be paralysed before I come out!" upon which Mr. Witham said, "he should make the sentence six months instead of four"—a change that was evidently the result of a second thought as to the amount of punishment the assault deserved, for the mere expression of a wish, however malignant on the part of the culprit, could not by any law or by any reason have exposed her to two months' imprisonment. It is always better to pass a sentence all at once than to do so by instalments of two months at a time; for if the *crescendo* principle is introduced, and an additional term of imprisonment is launched from the bench after each violent exclamation that is hurled from the dock, the process of pronouncing the penalty of the law might become a mere undignified game of "last word" between the Judge and the prisoner. Mr. Witham generally performs his duty with good sense; and I have no doubt he will, on reflection, agree with the Silent Member as to the propriety of thinking twice before he speaks once from the bench, if his first and second thoughts are likely to be at variance.

The Sunday Beer Act does not gain in popularity by the difficulty of deciding the question, "What is a *bonâ fide* traveller?" I believe the difficulty of settling this question was pointed out when the measure was in progress; but those who were concerned in passing it into law are said to have declined the task of giving a definition, and determined to leave it—where it is the fashion to leave almost every legal difficulty in these days—with the discretion of the magistrate. This, if true, is a gross dereliction of duty; for it is an imperative obligation on the Legislature to provide against doubt whenever it is foreseen, and it is not fair to the public or the magistrates to leave the former to be bound by the interpretations which the latter may put on a confessedly ambiguous provision. The result of this omission on the part of Parliament has been to set up a different law in places a few miles apart; and, while a man who walks to Hampstead-heath is a traveller according to the law of Marylebone, a man who goes twice the distance by boat or railway is not a traveller by the law of Greenwich. The landlord of the Crown and Sceptre will be fined for doing that which the host of Jack Straw's Castle may do with impunity. No blame attaches to either of the worthy magistrates of these two districts, each of whom takes his own conscientious view of a confessedly doubtful point; but it was the duty of the authorities who framed the bill to take care the anomaly should not arise of there being a different law for different localities. The officials to whom this measure was entrusted must have been lamentably stupid if the difficulty was not foreseen; and culpably negligent if, having foreseen the difficulty, on its having been pointed out to them, they failed to provide against it. If they have not the sagacity to detect the ambiguities of their own language, they should submit the measures they have in preparation to those wiser heads than their own by which the laws are administered. Considering the great powers now conferred on the police magistrates—who are entrusted to decide on matters of the utmost importance, without any appeal against their decisions being allowed—it is due to them that their very great responsibility should not be needlessly increased by the ambiguities which official incapacity or negligence will allow to creep into the language of Acts of Parliament.

IMPERIAL PARLIAMENT.

HOUSE OF LORDS.—MONDAY.

The Convention with Sardinia Bill was passed through Committee. Some routine business was disposed of, and their Lordships adjourned.

HOUSE OF COMMONS.—MONDAY.

THE VIENNA CONFERENCE.

In reply to a question from Mr. Bright, as to the present position of the Conferences at Vienna, Lord PALMERSTON said, he could not say at what time he could give a full statement of the occurrences at the Conferences, but he would state the position in which they now stood. It was already known to the House that the English and French Governments had determined, in which determination Austria agreed—that it was requisite that the preponderance of Russia in the Black Sea should cease. The Russian Plenipotentiary had also assented in the abstract to the proposition. On Thursday last, however, when the Plenipotentiaries of England, France, Austria, and Turkey were present, it was proposed, as a mode of accomplishing this principle, that the amount of the Russian naval force in the Black Sea should be limited by treaty, or otherwise that the Black Sea should be considered neutral, in which no vessels of war of any nation should be allowed; confining its waters altogether to ships devoted to commerce. The Russian Plenipotentiary required forty-eight hours' time for consideration, at the end of which time, at another Conference, he absolutely refused either alternative; upon this the Conference adjourned *sine die*, and Lord John Russell and the French Ambassador were to leave Vienna on that day.

Mr. H. WILLOUGHBY asked if Russia had made any counter proposition?

Lord PALMERSTON said that Russia had made no counter proposition.

THE LOAN.

On the bringing up of the report of the Committee of Ways and Means, Mr. GOULBURN said, he would offer no objection to the plan of the Chancellor of the Exchequer, though he did object to that part of the plan which compelled its repayment at the rate of a million a year, as being a delusion. Believing it to be a delusion, he could only look upon the Loan as an addition to the undeniable debt of the country. He thought it would be far better to have raised the money by means of the New Three per Cents, which might be paid off, without the usual twelve months' notice, in 1860. At all events he hoped the right hon. friend would not adhere to the delusive portion of his plan of paying off the Loan at the rate of a million a year after the termination of the war.

Mr. T. BARING was surprised at the objection. Surely it was only right, when borrowing money, to make, if possible, provision for its repayment as soon as the circumstances of the country might admit of it. But not having adopted that prudent course heretofore was no reason for not doing so in the present instance.

Mr. GLADSTONE repeated his objections to the portion of the plan which made repayment obligatory, as Parliament should not be pledged to a course which might prove very inconvenient. He did not believe the Loan could have been accomplished in Terminable Annuities without a great sacrifice of the public interests.

After some observations from Mr. Laing, Mr. John Macgregor, and Mr. James Macgregor,

Mr. T. BARING reminded Mr Gladstone that this proceeding on the part of the Chancellor of the Exchequer found a precedent in his dealings with Treasury Bonds. He approved of the pledge respecting repayment.

Mr. WILKINSON entertained a different opinion of this portion of the plan.

Mr. CARDWELL warned the House not to consider this Loan as temporary in its character.

The CHANCELLOR of the EXCHEQUER, in his reply, said he would adhere to his plan of repayment. He was glad to find his plan approved of by such high authority as the hon. member for Huntingdon (Mr. T. Baring) and other hon. members of that House.

Sir H. WILLIAMS thought the Loan was a fair one; but it was hardly fair to make the bargain in the morning, giving the Annuities in part payment, and taxing those very Annuities in the evening.

The report was ultimately agreed to, and leave was given to bring in bills founded upon the resolutions thus adopted.

THE NEWSPAPER-STAMP.

The House then went into Committee on the Newspaper-Stamp Duties Bill.

Mr. COLLIER, on the second clause being proposed, moved, as an amendment, that, instead of a penny for postage, the charge for transmission be only one halfpenny, and that one halfpenny be charged for each transmission.

Mr. COWAN seconded the amendment.

Lord STANLEY said, the principle ought to be that the revenue should not gain by the stamp on newspapers, while, on the other hand, newspapers had no right to expect to be transmitted at a loss to the Post-office. Having laid this down as the principle, he thought it would not be difficult to arrive at a commutative point. Believing that point to be the penny stamp, he should stand by the resolution as it now stood, until convinced that it was too high a rate of postage. The privilege of retransmission could not be claimed; but as it had grown up under the law, he would for the present agree to its being retained.

The CHANCELLOR of the EXCHEQUER said, the Government was not prepared to risk any further loss of revenue by reducing the stamp to one halfpenny, and he should, therefore, adhere to the resolution as it stood.

Mr. M. MILNES spoke of the advantages of retransmission as of inestimable value to the labouring classes.

Mr. GLADSTONE objected to the principle of subsidising newspapers at the expense of the community at large, by transmitting them and retransmitting them at a loss to the Post-office. He was, therefore, opposed to the amendment, believing it would lead to a heavy loss to the revenue.

Mr. BARROW supported the amendment, believing that one halfpenny would be sufficient to pay the expense.

Mr. M. GIBSON opposed the amendment, which included the whole periodical press, but omitted any publication which was not periodical.

After a few words from Mr PHILIPPS,

The amendment was withdrawn, and the clause was agreed to.

On the fourth clause being proposed, relating to registration and sureties,

Mr. WHITESIDE proposed an amendment, with the view of making registration compulsory, instead of optional, to the option of the parties according as they might be desirous of having postal facilities or other wise.

Some discussion took place, in which Mr. Gladstone, Mr. D. Reid, Mr. M. Gibson, Mr. Drummond, and other hon. members took part; after which,

The CHANCELLOR of the EXCHEQUER said, he would postpone the clause, with the view of limiting the registration and sureties to all newspapers, leaving other periodical publications free from such regulations.

The other clauses, with the exception of the registration and copyright clauses, were then agreed to; after which the House resumed, and the Chairman obtained leave to sit again on Monday next.

THE SEBASTOPOL COMMITTEE.

Mr. ROEBUCK said, the Sebastopol Committee had come to the conclusion unanimously that they could, in their present condition, pursue the inquiry with great advantage without supplying the place of Mr. J. Ball. They were desirous of avoiding divisions in that House of a party character; and he had, therefore, in obedience to the wishes of the Committee, communicated with the noble Lord at the head of the Government, who had expressed his readiness to acquiesce in the wishes of the Committee. He should not, therefore, propose any name to supply that of Mr. Ball.

Mr. BERNAL OSBORNE could not at all agree in the decision come to by the Committee, being still firmly of opinion that there ought to be a naval officer on that Committee to aid in the inquiry into the conduct of the transport service. He should, therefore, move that Captain Gladstone be appointed a member of the Sebastopol Committee.

Mr. LIDDELL looked upon the decision of the Committee as an arrangement between Radicals and the Government. He should vote for the motion of Mr Bentinck, if it went to a division.

After some observations from Mr. Drummond and Mr. Packe,

Lord PALMERSTON said it was a matter of perfect indifference to the Government whether the motion was carried or not; but the Committee was appointed as all other Committees were invariably appointed, and it was only in reference to the opinion of the Committee that he should oppose the motion.

Mr. DISRAELI had always said that there ought to be a naval officer on the Committee, and he should therefore support the nomination of Captain Gladstone for the Committee.

Mr. ROEBUCK denied that the proposal not to supply the place of Mr J. Ball had come from Lord Palmerston. He had nothing to do with it. It came from Sir John Pakington, and the Committee unanimously agreed to it. However, he had no wish to divide the House upon the question.

Lord PALMERSTON said, if the hon. and learned gentleman, who was Chairman of the Committee, would not persist in his objection, he had no wish to give the House the trouble of dividing.

The motion of Mr. Bentinck was then agreed to amidst loud cheering.

HOUSE OF LORDS.—TUESDAY.

THE VIENNA CONFERENCE.

The Earl of MALMESBURY said, that it appeared there was no longer any hope of inducing Russia to accept the terms laid down by the Western Powers, and, as was believed, supported by Austria. As he understood that it was upon the Third Point that the Conferences had broken down, he wished to ask his noble friend (the Earl of Clarendon) whether the Russian Government had agreed to the first two points laid down by the Western Powers? He would also inquire whether it was still contemplated to include Prussia among the Protecting Powers, as had been originally proposed when the Four Points were laid down?

The Earl of CLARENDON said, his noble friend was right in assuming that the several points were discussed in the order in which they came, and that the first and second were virtually accepted by the Russian Plenipotentiaries. With respect to what were the alternatives contained in the Third Point—viz., the limiting by treaty of the Russian naval force in the Black Sea, or the exclusion of all ships of war from those waters—they had been absolutely rejected by the Russian government. In answer to the question of his noble Earl, as to the position of Prussia, he could only say that the position which Prussia had occupied since the 8th of August, and which she continued to occupy, had entirely excluded her from the Conferences, and therefore from all the arrangements which had resulted from them.

The Earl of HARDWICKE was anxious to obtain some information with respect to the intentions of Austria. At this moment she was placed in a position in which she could play the game either of one side or the other, and he perfectly sure of support; and it was but right that the country should be informed upon the second act of this war, should seek all the information that her Majesty's Government might be in a position to give in reference to the part which this great German Power might be expected to play.

The Earl of CLARENDON had no reason to think that Austria would depart from the terms of the Treaty into which she had entered on the 6th of December. He would remind their Lordships that it was only in case of peace not being made upon the bases provided by the Treaty that Austria was to be called upon to concert measures for carrying its stipulation into effect. That time had not arrived: and till then it was not for him to say precisely what course Austria would take.

CAMBRIDGE UNIVERSITY BILL.

The Lord CHANCELLOR moved the committal of the Cambridge University Bill, and described in much detail the scope and working machinery of the measure.

Lord LYNDHURST commented upon various features presented in the bill, and entered into a minute examination respecting its effect on the internal arrangements of the University.

Some further conversation ensued, after which the motion was agreed to, and the bill passed through committee *pro formâ*.

HOUSE OF COMMONS. TUESDAY.

ACT OF UNIFORMITY.

Mr. HEYWOOD moved that the House should resolve itself into Committee to consider such clauses of the Act of Uniformity, passed in 1662, as imposed religious tests, by which the educational advantages offered in the Universities, grammar or free schools, were limited in their application, together with any of the regulations enforced in the national institutions of every kind throughout the country that were calculated to produce a similar result. His object was explained by the hon. member to be the removal of all obstructions to the enjoyment of educational privileges by any class of the community through the operation of religious tests or conditions.

The motion was seconded by Sir E. PERRY.

Lord PALMERSTON admitted the expediency of removing all obsolete regulations. He apprehended, however, that the resolution, if adopted in its present form, would interfere with the measure passed last year respecting Oxford University, and he could not consent to embarrass the operation of that Act without further experience of its working.

Mr. GLADSTONE opposed the motion on similar grounds, observing that it proposed to reopen a question which had occupied Parliament during nearly the entire half of last Session.

Mr. HEYWOOD, on the suggestion from Lord J. MANNERS,

Mr. HEYWOOD consented to modify his resolution, and proposed to move only for a Committee to consider the clauses of the Act of 1662.

This modified proposition was discussed for some time, but ultimately negatived without a division on a point of form.

Mr. A. PELLATT moved for certain returns relating to the appointment of counsel and solicitors to the Charity Commission, the number of information filed, &c.

The ATTORNEY-GENERAL opposed the returns, which, he said, the honourable gentleman would never have made had he not allowed himself to be made a tool of by some discontented solicitor.

After a few words from Mr. Vernon, Mr. Pellatt withdrew his motion, but denied having been induced to make it by a solicitor.

Mr. BALLIE rose to call the attention of the House to the defective Post office communication in the western isles of Scotland, when an hon. Member moved that the House be counted, and forty members not being present, the House adjourned.

HOUSE OF COMMONS.—WEDNESDAY.

COLONIAL CONTINGENT.

Mr. ADDERLEY asked the Secretary of State for the Home Department whether it was true that he had been sent out to the Governors of the North American colonies to raise a force of her Majesty's natural born subjects in those colonies for active service; and whether such force had been designated as a foreign Legion.

Sir G. GREY said, such instructions had been sent to Canada to raise such a force, but as the hon. member had asked the question, he would say that of course it had not, and could not, be designated a Foreign Legion, but what name would be given to it he was unable at the present time to say.

MARRIAGE LAW AMENDMENT BILL.

Mr. HEYWOOD moved the second reading of this bill.

Mr. WALPOLE then rose and moved that the bill be read a second time that day six months. One of the arguments was, that these marriages could not be prevented. He admitted that, on an inquiry, which occupied seven or eight years, it was found that there were no less than 1850 such marriages; but he would ask what law might not and was not evaded? They could not even prevent polygamy. It had been said that these marriages were in the upper classes, but he denied that it was so. The returns had been analysed, and it was found that only 160 of the 1850 had taken place in the upper classes (cheers); in the middle classes, 1400 (hear, hear); and amongst the poorer classes, only 60 (Hear, hear). It was said that this was a poor man's bill. He denied that it was so; it was the very reverse; it was supported by those who ought to be legislating in favour of morality, but by this bill they were doing the reverse. If there were any members of the Government present besides the Attorney-General—whose opinion he knew was opposed to his—if the chief of the Government was present, he would appeal to him to put an end to an agitation on this subject, which had already been settled in the other House, unless the Government was certain that they could carry it into law. Why encourage an agitation which had the effect of lowering the standard of morality when they ought not to be employed in raising it? They were encouraging these marriages by persons who believed that the law would pass, and they would be protected. After some further remarks, the right honourable gentleman concluded by moving that the bill be read a second time that day six months.

The ATTORNEY-GENERAL said, the arguments and reasoning of the right honourable gentleman had wholly failed to convince him that the opinions he had expressed on a former occasion were erroneous. The honourable and learned gentleman then proceeded to contend that such marriages had not been considered by the Hebrew people prohibited by divine law, and that though they were voidable they were not void in the earlier ages of the Christian Church. Divided as Christians were upon the construction of the Levitical law, they had no right dogmatically to force their own interpretation of the Scripture and their opinions on the Levitical law on others. The question was one of religious opinions, and every man ought to be allowed to enjoy his own opinions. The hon and learned Attorney-General then proceeded to show that these marriages were permitted in the Roman Catholic Church, all over the Continent, in Germany, in Denmark, Sweden, and other countries. He would go further—across the Atlantic, all over the United States of America—was it not permitted? (Hear, hear). To those who believed such marriages to be irreligious, the bill was no doubt unnecessary, but to those who thought otherwise the present law was a positive tyranny (cheers) which ought at once to be put an end to as intolerable (Cheers). The right hon. gentleman (Mr. Walpole) had said that if the noble Lord at the head of the Government was present he would ask him to stop the agitation on this subject. Stop this agitation! why you might as well put your foot in the sea, and ask the tide not to flow (Cheers). It was impossible to stop the agitation on a question which involved the interests and happiness of the community, the people were too deeply interested, and their happiness too deeply involved to stop agitation until they were successful; for his part, he gave his most cordial support to the second reading of the bill.

Mr. WIGRAM and Mr. ALDER opposed the motion. Mr. COLLIER and Mr. M. MILNES supported it.

Mr. K. SEYMOUR said, the Attorney-General had appeared that day in a new character: he had appeared as the advocate of those who broke the law of the land and the Church, and who had committed perjury to enable them to do so.

Mr. T. CHAMBERS looked upon the question upon religious grounds, and he was of opinion there ought to be no restriction, and that the Act of Parliament which prohibited these marriages should be removed from the Statute-book. He therefore supported the bill.

Sir W. HEATHCOTE moved the adjournment of the debate until the 9th of May, which was agreed to.

TOWN AND TABLE TALK ON LITERATURE, ART, &c.

THE two quarterly returns from the Row and from Albemarle-street contain ample evidence that little is doing in permanent literature. When we turn to the advertisements of new books in the recent number of the *Edinburgh Review*, we find very little indeed; when we turn to the advertisements in the recent number of the *Quarterly* we find very little more. Yet these are the two fountain-heads from which literary intelligence still continues to rise. If we turn to the columns of the *Athenæum*, or to our own columns, we find the same slender thread of promise. Yet this (but for Sebastopol) would have been the great "term time" of publishers. Our circulating libraries (but for Sebastopol) would have been crowded with liveried footmen anxious to secure the earliest copies of new works by the most eminent hands: now, the herd of readers are compelled to be content with delayed intelligence, an additional insomnia tax, and—no new books.

Yet still, with rapid strides (we are happy to record), the new Reading-room of the British Museum, is fast filling the quadrangle of Sir Robert Smirke's ill-planned edifice. Each day reveals some additional growth towards the completion of a crying necessity. Readers still flock to the Museum as if the reproduction of books was in urgent demand in the Row and Albemarle-street. The room is thronged by readers, intent—if we may judge by their faces—on works of enduring importance; each on

A work to outlast Seth's pillars, brick and stone—
And, Holy Writ excepted, made to yield to none.

And each, as he closes his researches for the day, concludes with an expressed longing for the new Reading-room which Mr. Panizzi is about to give us. But is Mr. Panizzi the parent of the new building? Hear a Correspondent:—

(To the Editor of the ILLUSTRATED LONDON NEWS.)

Liverpool, April 20, 1855.

SIR,—In your impression of the 14th inst., speaking of the additions now making to the British Museum, you say—" Several plans were offered, and at length that at present in progress (the happy suggestion of Mr. Panizzi) was adopted.

By referring to the *Builder*, vol. 3, p. 295, it will be seen that this arrangement was suggested by Professor Hosking; and it is also stated that this idea had occurred to him as soon as the progress of the works had developed the plan.

Some correspondence followed in that journal; and at p. 320 it *is* intimated that the trustees declined considering the proposition.

I trust you will take an early opportunity to give credit for the suggestion to the right person, and oblige your constant reader,

AN ARCHITECT.

Having no other object than truth, we readily give insertion to this letter. But is our Liverpool architect correct in his belief that the merit of the suggestion is due to Professor Hosking rather than to Mr. Panizzi? Are not the plans of the Professor and the Librarian essentially different? What is the case? Sir Robert Smirke devoted (with very little skill as an architect) a huge quadrangle in the British Museum to London cats by night and London sparrows by day. The waste of space was obvious to every eye. It caught, of course, the clever eye of Professor Hosking; and a plan, we are told, was submitted by that gentleman to the trustees of the British Museum for filling up the middle of the quadrangle by a modified copy in stone of the Pantheon in Rome. The Professor thought only of architecture and sculpture, and his plan (though perhaps not for these reasons) was rejected by the trustees. Mr. Hosking's structure was designed to satisfy in stone and brick a totally different object from that designed by Mr. Panizzi in iron and glass. Mr. Hosking contemplated a central hall of communication (grand, no doubt, in its proportions, and ornamental) with the four sides of Smirke's structure; while Mr. Panizzi designed, and is now on the eve of completing, a library filled with a busy and unobtrusive hum of men intent on catering for the daily requirements of the public. Sir Robert Smirke was neglectful; Professor Hosking was suggestive and architectural; Mr. Panizzi is useful and ornamental. We have our own few complaints against Mr. Panizzi, but we are unwilling not to do full honour to a man who deserves so well as Mr. Panizzi does of the British public.

Some of our contemporaries are pressing on public attention the necessity of placing on each exhibited picture the name of its artist and the subject it seeks to embody. "It would certainly," we are told, "be a vast relief to be spared the necessity of continually looking at the catalogue." The suggestion is not likely to be adopted. Conceive a society surrendering nearly one half of its revenue. Who would purchase a black and white catalogue when all that is supposed to be required is told *gratis* in letters of gold upon the frame? Fancy a frame with a long extract from Tennyson, or Turner's "Fallacies of Hope," attached to it, dangling half way down a "Momentary Thought" of Frank Stone, or a "Sympathetic Stag" by Sir Edwin Landseer.

Who is satisfied with his condition in life? Even actors—strange to say—are not satisfied; and a Club especially devoted to do honour to them is said to be wanting in courtesy to the stage. When honour and kindness are sincerely meant, honour and kindness should be as sincerely accepted. When (some thirty years since) the Garrick Club was instituted, for the sole purpose of doing honour to able and honourable men, and to the stage in general, actors of known standing were brought into a Club, then, as now, called the Garrick Club. This Club, from its kitchen to its garret, does nothing but celebrate celebrated, and even bad, actors. It is a sort of Walhalla of English players, eminent and indifferent. Its very crockery and linen bear the impress of homage to the stage. But this is not enough. This homage is insufficient, and actors, it is now thought (by a few), are not treated with sufficient consideration by the Club. They should share its management; they should have a full voice in the committee of election. Nor is the claim thus urged without its due weight; but is it not unduly pressed forward; and, above all, is it likely to serve the object which we sincerely believe its promoters have in view? We have received some letters on this subject, and may hereafter revert to the suggestions they throw out.

PHOTOGRAPHY IN GUILDHALL.—On Thursday week the City authorities kindly granted permission to a gentleman from the Stereoscope Company, 313, Oxford-street, to take views of the grand ceremonial in Guildhall. Two large cameras were busily at work during the day from a stage erected in the gallery opposite the grand entrance, by which means several most striking views were taken of the very interesting proceedings.

INAUGURATION OF THE PARIS UNIVERSAL EXHIBITION.—The Imperial Commission have invited the President and Vice-President of the Board of Trade, the Commissioners for the Exhibition of 1851, the Jurors, the Lord Mayor and Aldermen of London, the Lord Mayor of Dublin, the Lord Provost of Edinburgh, the Chairman and Vice-President of the East Indie Company, the President of the Royal Society, the President of the Institution of Civil Engineers, the Chairman of the Council of the Society of Arts, and the Chairmen and Secretaries of the Local Committees of the Paris Exhibition, to be present at the inauguration of the 1st of May.

THE HOTEL MUNSCH.—In the letter from our Correspondent at Vienna, which appeared in the ILLUSTRATED LONDON NEWS of the 14th inst., the name of the Hotel Munsch—one of the best in Vienna, if not in Europe—was erroneously printed the Hotel Munich. We are anxious to rectify this error—not only that we may be correct, but that we may do justice to the proprietor of an establishment who does so much to make Englishmen comfortable when they visit Vienna; and who thinks no trouble too great that can make their stay agreeable, in that most agreeable of capitals. It was at this hotel that Lord John Russell, and his family, resided for eight weeks, during the famous Conferences which have given Vienna a new notoriety in the annals of diplomacy. His Lordship and suite occupied upwards of thirty rooms in the establishment of M. Munsch; and we have reason to believe expressed himself highly satisfied, in every respect, with the accommodation and the attention which he received.

M. Niewerkerke, the Director-General of the Imperial Museums, has intimated that, from the last May, and during the whole period of the Universal Exhibition, artists will be allowed to make copies in the Louvre every day except Sundays and Mondays, from eight in the morning to one; and that the Galleries will be open to the public every day except Mondays from two to five.

CHESS.

TO CORRESPONDENTS.

E F., Norwood.—Too simple.

H. FENNELL.—You should procure some elementary book on Chess, and learn the openings.

C. C. D.—Apply for the rules of the Brighton Chess-club to J. Turner, Esq., Regency-square, Brighton; or for those of the Reading Club to Mr. W. Hodges, jun., hon. secretary, Reading.

J. J. CWM, Aven.—It is not possible to checkmate with a King and Kt against a King alone.

MATCH BETWEEN M. DE RIVIERE AND MR. SCHULTEN, AT PARIS.—A match of seven games has been arranged between these eminent amateurs, to be played immediately, at the Cercle des Echecs, Paris. We shall probably give the opening games in our next week's Number.

W. C. L., BURNHAM, R. K. of Norwich, and others.—In Enigma No. 948, if Black for his first move take either Pawn with the King, White can mate in three moves.

W. C.—Your Problem No. IV. is not what we call one, and No. V. is defective, for *Black can* move 1. P takes P (ep), and White cannot mate in two moves.

JULIA.—1. We shall be glad to receive all the Solutions very shortly. 2. You have failed in No. 563. The key move is 1. Kt.—B 6th.

R. J., Edinburgh.—If you will be good enough to forward the Solution the Problem shall be examined, and, if it has ever been published, we shall doubtless be able to tell you who was the author, or where it appeared.

SOLUTIONS OF PROBLEM No. 583, by Templar, Caxton, R. P. L., Bookworm, Annette, are correct.

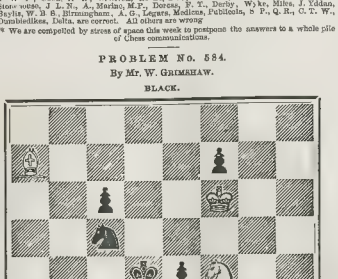
SOLUTIONS OF PROBLEM No. 583, by Derwent, F. R. of Norwich, Peter the Little, T. W. J., Orbo, A. Z., Omicron, D. D., Phiz, W. C. C., J. A. M., Falconham, J., Stone-cutter, J. L. N., A., Marlin, M.P., Dorcas, F. T., Derby, Wyke, Miles, J. Yddan, Baylis, W. A. B., Birmingham, A. G., Legere, Medicus, Publicola, S. P., Q. R., C. T. W., Dumbledikes, Delta, are correct. All others are wrong.

*** We are compelled by stress of space this week to postpone the answers to a whole pile of Chess communications.

PROBLEM No. 584.

By Mr. W. GRIMSHAW.

BLACK.



WHITE.

White to play, and mate in five moves.

CHESS IN THE METROPOLIS.

IN our No. for April 14 we expressed a hope of being able to present some additional specimens of the late Mr. G. Perigal's skill. The following will afford a good notion of his ability in giving odds, on which he prided himself very highly.

Mr. G. PERIGAL gives the Pawn and two moves to a MEMBER of the LONDON CHESS-CLUB.

(Remove B.ac.'s K B Pawn from the board.)

WHITE (Mr. —)	BLACK (Mr. P.)	WHITE (Mr. —)	BLACK (Mr. P.)
1. P to K 4th		16. K takes Kt	P to K 4th
2. P to Q 4th	Q Kt to Q B 3rd	17. K to K 2nd	P takes P
3. K Kt to K B 3rd	P to Q 4th	18. P takes P	K to B 2nd (*b*)
4. P to K 5th	Q B to K Kt 5th	19. P to K B 6th	K R checks
5. K B to Q Kt 5th	P to K 3rd	20. K to Kt 2nd	P takes P
6. Castles	K Kt to K 2nd	21. K R takes P (ch)	K to his 3rd
7. Q B to K Kt 5th	P to K R 3rd	22. Q to K B 3rd (*c*)	K R to his 4th
8. Q B to K 3rd	K Kt to K B 4th	23. Kt to Q B 5th (ch)	B takes Kt
9. Q Kt to Q 2nd	K B to K 2nd	24. K R to Kt 5th	Q takes Q B P (ch)
10. Q Kt to his 3rd	Castles	25. B to K B 3rd	Q R to K B sq
11. K B to K 2nd	Q to K sq	26. K R to K B 5th	Kt takes Q P
12. P to K R 3rd	Q B takes Kt	27. Q to K Kt 3rd	Q R to K B sq
13. K R takes B	K Kt to K B 5th	28. K R to K B 5th	Q to K 5th (ch)
14. K B to K Kt 4th	Q to K Kt 3rd	29. K to B sq	B checks
15. P to K B 4th	K Kt takes Kt P (*a*)	And wins.	

(*a*) Black has dexterously managed to turn the attack against his foe, and contrives to maintain it so successfully, that resistance soon becomes hopeless.

(*b*) Daring, but very clever and ingenious.

(*c*) P to Q B 4th would perhaps have been stronger, though the move of Q to K B 3rd was well conceived, and led to some interesting combinations.

MR. G. PERIGAL gives his Queen's Rook to an AMATEUR.

(Remove Black's Queen's Rook from the Board.)—(King's Gambit declined.)

BLACK (Mr. G. P.)	WHITE (Mr. C.)	BLACK (Mr. G. P.)	WHITE (Mr. C.)
1. P to K 4th	P to K 4th	15. Kt to Q B 3rd	P to Q Kt 3rd
2. P to K B 4th	K B to Q B 4th	16. P to K B 3rd	Q to Q 2nd (*b*)
3. K Kt to K B 3rd	Y to Q 3rd	17. P to K B 5th	P to K Kt 3rd
4. P to Q B 3rd	Q Kt to Q B 3rd	18. P to K Kt 4th	B takes P
5. P to Q 4th	P takes P	19. P takes B	Kt takes Kt P
6. P takes P	K B to Q Kt 5th (ch)	20. Kt to Q 5th	Kt to K B 7th (ch) (*c*)
7. K to B 2nd	K Kt to K B 3rd	21. K to Kt 2nd	Kt takes B
8. K B to Q 3rd	Castles	22. Kt to K B 6th (ch)	K to Kt 2nd
9. K R to K B sq	Q B to K Kt 5th	23. Q to Q B 3rd	Kt to K B 5th (ch)
10. K to Kt sq	Kt takes Q P	24. K to B 5th	Kt to K 7th
11. Q to her K 4th (*a*)	Q B takes K Kt	25. Kt to K 8th (dble ch)	K to R 3rd
12. Q takes K B	Q Kt to Q 5th (ch)	26. K to K Rsq (ch)	K to Kt 4th
13. K to K sq	Kt takes Q B	27. Q mates.	
14. R takes Kt	B to K B 4th		

(*a*) This was a very good counter-move; and, we suspect, quite unforeseen by White when he captured the Pawn.

(*b*) White appreciates the difficulty of extricating his poor B so well, and plays to gain as much concession for it less as the position will afford.

(*c*) The rest is full of spirit; and, on Mr Perigal's side, extremely well played.

CHESS MATCH BETWEEN MANCHESTER AND LIVERPOOL.

A Chess contest of more than ordinary interest has just commenced between the well-known Clubs of Liverpool and Manchester. The match in question is not to be conducted by correspondence, but by personal competition over the Chess-board. For this purpose it has been arranged that the best nine of Manchester shall first pay a visit to Liverpool, and play a rubber of three games each against the picked players of that Club. Next month the Liverpool magnates are to return the compliment by visiting Manchester, and playing there three more games each, against the same antagonists. The Club that scores the majority of games will then be presented by their friendly rivals with an appropriate memento of the contest in the shape of a set of Chess-men. From the acknowledged prowess of the players selected to take part in this tourney, some capital games may be anticipated, and of these we trust we shall have it in our power to chronicle several for the entertainment of our readers in future numbers.

Since writing the above, we have been favoured with particulars of the first meeting, which took place at the Union Hotel, Clayton-square, on Wednesday (last week). The result of the play on this occasion giving—

Manchester	...	...	...	12
Liverpool	...	...	...	6

The return visit will come off at the end of May, and the total score will then decide the match.

CHESS MEETING AT READING.—The annual gathering of Chess players, under the auspices of the Reading and Berkshire Chess-club, was held at the Literary and Scientific Institution on Tuesday, the 10th inst., and was attended by several of the local clergy, many of the most influential residents of the town, and a fair sprinkling of amateurs from London, Oxford, &c. Shortly after the assembling of the members and their guests Chess-playing commenced, and was carried on uninterruptedly till six o'clock. At that hour the majority of the party adjourned to dinner at the George Hotel; where, the chair being filled by Mr. Keating, M.P., and the vice-chair by Admiral Allen, the proceedings terminated, after an agreeable fusillade of speech and anecdotes, about twelve at night.

A NIGHT SCENE BEFORE SEBASTOPOL.—10 P.M. The night is dark and tempestuous; the wind continues to blow strongly from the south-west, and the rain, though less continuous, passes by in heavy fitful showers. No stars are visible. The fire from the batteries continues. Flashes of light from the guns, and the reflected glare in the sky, burst through the darkness at frequent intervals, and appear among the mists and clouds with the sudden effect and vividness of lightning; while the roar of the guns and the roll of the echoes among the mountains not inaptly complete the illusion of an Alpine storm, by their close resemblance to the crash and stunning sound of thunder. The horizontal flight through the air of some of the larger shot and shell, with their peculiar shrill rushing noise, contrasts strangely with the deep booming of the guns, and adds to the confusion of sounds which strike the ear. The report from each piece at the instant of explosion is so modified by the weight of metal, amount of charge, position, and distance, that no two sounds appear alike either in tone or intensity. Sometimes the explosion and discharge are made with such force that even at a considerable distance the concussion of the air strikes the spectator forcibly, and he experiences the sensation of having received a blow on the chest. The noise would be much increased if the wind blew from an opposite direction, even on these open heights: what must be the roar in the streets and buildings of the town below? The shells rise thickly and brightly from the English batteries, and in less number from the French works on the right, but become dimmer as they travel through the misty atmosphere towards the Russian side. The Russians are replying comparatively feebly.—*Letter from the Camp, April 9*

THE ATTITUDE OF PRUSSIA.—I believe I do not misstate the opinions of those who represent Prussia here in saying that they do not believe that Russia will ever consent to the proposed limitation of the number of her power in the Black Sea, and I am pretty certain that they highly approve that refusal. They think that Russia is a match for all Europe. As to Prussia, they affect to believe that, whether the issue be peace or war, she will still be able to maintain herself in the same "high position" she has hitherto maintained, and that if the war continues she will succeed in preserving her neutrality in spite of all Europe. "She is," says a Prussian diplomatist, "like a noble animal of the forest, sitting motionless on its hinder part, with head erect, showing her teeth, and with watchful eye, attacking no one, but ready to spring on the first, whoever he may be, that menaces or irritates her." Such is the portrait drawn of Prussia by those who must be in the secret of her councils.—*Letter from Vienna.*

COUNT BUOL-SCHAUENSTEIN.

CHARLES FERDINAND COUNT BUOL-SCHAUENSTEIN of Riedberg, Strassberg and Ehrenfels, is Imperial Royal Chamberlain and Privy Councillor, Minister for Foreign Affairs and of the Imperial Household, President of the Conference of Ministers, Knight of the Imperial order of the Iron Crown, 1st class; Grand Cross of the Imperial order of Leopold; Grand Cross also of the following, viz.: Of the Baden orders of Fidelity and of the Zæringian Lion; of the Grand Duchy of Hessen order of Lewis; of the Russian orders of the White Eagle, and of the Alexander of Newski order in brilliants; of the Netherlands order of the Lion; of the Parmese order of Lewis, and Senator Grand Cross of the Parmese order of Constantine St. George; Grand Cross of the order of Malta; of the Electorate of Hessen order of the Golden Lion, of the Saxon Ernestine House-order; of the Greek order of the Saviour; of the Wurtemberg order of the Crown; of the Belgian order of Leopold; of the Brazilian order of the Rose, of the Hanoverian order of Henry the Lion; of the Danish order of the Elephant; of the Pontifical order of Pius; of the French order of the Legion of Honour; of the Turkish order of Medjidie, 1st class; Knight of the Prussian orders of the Red Eagle, 1st class, and of the Black Eagle; of the Sicilian order of St. Januarius; and of the Bavarian order of Hubertus.

This eminent statesman was born on the 17th of May, 1797, and is the son of the late Count John Rudolph Buol Schauenstein (I. R. Actual Privy Councillor and Minister of State, formerly Presidial Ambassador at the Diet of the Germanic Confederation) and of the Countess Alexandrina, born Countess Lerchenfeld-Preunberg. In 1833, he married Caroline Franciscus Dorothea, born Princess of Isenburg-Birstein, Lady of the Palace, Lady of the order of the Star-cross, and of the order of Theresa, by whom he has issue two daughters, namely—the Ladies Josephine and Alexandrina.

The present Count Buol-Schauenstein is the descendant of an ancient Grison family, whose ancestor, Ulrich Buol, was a captain in the service of Albert of Austria, at Speyer, in 1298. John Anthony Buol received the Predicate of Strassberg in 1645, for his services in Grison; his son, Paul, acquired the noble castle of Riedberg, and as the possessor of both these states (Strassberg and Riedberg), was raised to the Barony of the Empire in 1690, and in 1693 he espoused the Roman Catholic faith. Charles Rudolph Baron Buol, I. R. Chamberlain, Privy Councillor and Imperial Ambassador at the Court of the Electorate of the Palatinate (the great-grandfather of the present head of the family) was adopted by his uncle the Imperial Field-Marshal Francis Thomas, Count Schauenstein, as his son, in lieu of direct issue; inherited the dignity of the Countship of the Empire, granted to the latter, and thus united the title, estates, name, and armorial bearings of Schauenstein and Ehrenfels, in 1742. After the extinction of this younger branch of the Buol family, the dignity of a Countship of the Empire was transferred to the elder branch (founded by Rudolph Anthony, the grandson of the above mentioned Baron Paul Buol, who acquired the rights of county in the Tyrol, in 1731). The first family mansion of the old Barons of Schauenstein was Ehrenfels, in Grison, which name they originally bore. As far back as the twelfth century two members of this family were Bishops of Chur. In the year 1507 Burkhard of Ehrenfels received the Castle of Schauenstein as a donation, and since that time the male members of the family of Buol have borne either the names of Ehrenfels or of Schauenstein, or both together.

The above data prove that the Counts of Buol-Schauenstein (beginning with the great-grandfather of the present Count) have been employed by the Imperial House of Austria in a diplomatic capacity for upwards of a century.

Count Charles Buol-Schauenstein, his Imperial Royal Apostolical Majesty's present Minister for Foreign Affairs, entered the diplomatic service in his nineteenth year, first as Attaché of the Imperial Embassies at Florence, Hanover, and Cassel; afterwards at Frankfort, where his deceased father was then I. R. Presidial Ambassador. In 1819 he was appointed Secretary of Legation at the Hague; in 1822 he was sent as Secretary of Embassy to Paris; in 1824 he was removed, in like capacity, to London, where he at that time remained four years. In 1828 he was appointed I. R. Ambassador at Berlin; in 1831 he was simultaneously charged with the same post at Darmstadt; and in 1833 he was promoted, with the same rank, to the Royal Court of Stuttgard. On the 13th July, 1844, he was invested with the dignity of an Imperial Privy Councillor; and thereupon afterwards appointed Ambassador to the Court of Turin (at the same time also to the Court of Parma), where he remained until the eventful year 1848. The characteristic resoluteness and firmness of Count Buol as a diplomatist of the modern school here displayed itself in an act of personal pride and independence which is well worthy of record. When Charles-Albert, contrary not only to all the recognised usages of civilised diplomacy and the principles of international law, but in violation also of the most positive assurances of amity, ordered his troops across the Austrian frontiers, to invade Lombardy, even without a previous declaration of war, Count Buol, being without instructions from his Court, hesitated not to act upon his own responsibility on the instant he forthwith demanded his passports and quitted Turin.—an act which doubtless greatly redounds to his honour, and was highly approved of by the Imperial Government. Shortly after this event Count Buol was appointed Imperial Ambassador to the Court of St. Peterburg. In the meantime, however, honoured by the special confidence of his Sovereign, he was sent as second Plenipotentiary of Austria to the German Conferences at Dresden (the then Prime Minister, Prince Felix Schwarzenberg, being the first Plenipotentiary). In 1851 Count Buol was definitively removed from the Court of St. Petersburg to that of St. James, where he remained as Imperial Ambassador until after the death of Prince Felix Schwarzenberg, when, on the 11th of April, 1852, his I. R. Apostolic Majesty appointed him as his Minister for Foreign Affairs, and of the Imperial Household, as also to the Presidency of the Conference of Ministers.

Since the accession of Count Buol to his present high office, he has concluded the following treaties with other Powers, viz.:—Postal treaties with the Pontifical States (10th March, 1852); with Spain (20th April, 1852); with Switzerland (1st August, 1852); with Sardinia (28th September, 1853); and Russia (5th May, 1854); treaties relating to telegraphs with Switzerland (26th April, 1852); with the German States (additional treaty of the 23rd September, 1853); with Sardinia (28th September, 1853); treaties relating to the respective laws of settlement with Bavaria and Saxony (1853); treaties relating to jurisdiction with Saxony (6th Jan., 1854) and with the Germanic Confederation (26th January, 1854); treaty of customs and commerce with Prussia and the German Customs' Union (Zollverein) of 16th March, 1853; treaty of commerce and navigation with Belgium (2nd May, 1854); convention with the Sublime Porte for the military occupation of the Danubian Principalities by Austrian troops (Constantinople, 14 June, 1854); the famous protocol signed at Vienna on Palm Sunday, 1854, by which Austria, conjointly with the Western Powers and Prussia, acknowledged the justice of the war on the part of France, England, and Turkey, against Russia, and declared that in principle perfect unanimity of purpose prevailed among the Four Powers; exchange of notes with England and France, for the precision of the four points of guarantee in the Oriental question, on the 8th August, 1854; offensive and defensive treaty with Prussia of the

20th April, 1854; accession thereto of the Germanic Confederation of the 24th July, 1854; additional article to the above treaty with Prussia (26th November, 1854); accession thereto of the Germanic Confederation of the 9th December, 1854; treaty of alliance with France and Great Britain of the 2nd December, 1854; protocols of the 28th December, 1854, and of the 7th January, 1855.

By the sudden death of Prince Felix Schwarzenberg, in April, 1852, Austria was unhappily deprived of the man who within a few years had saved the empire from the greatest danger in which it had ever been, and to whom the country was indebted for its rapid elevation to new glory. This fearful blow, however, seemed to paralyse the State anew, and the youthful Monarch saw himself unexpectedly deprived of the bold and safe support of that extraordinary man who had gallantly and successfully carried the vessel of State through the greatest difficulties, and in whom his Majesty naturally reposed the most unbounded confidence. The gloomy days of Dresden and of Olmütz had but just been happily overcome when this new calamity occurred, which threatened to render the future destinies of the empire once more uncertain. At this trying moment the entire greatness and significancy of the intellectual life of the deceased Minister was most sensibly felt. His premature death had caused a vacuum in the whole organism of the State, and the loss sustained appeared to be truly irreparable. But Prince Felix Schwarzenberg's incomparable foresight had extended even beyond the grave; for he had himself directed the attention of his Sovereign and of the political world to the statesman whom he believed worthy of being called to the councils of the Emperor, as the inheritor of his ideas. This statesman was none other than Count Buol, and the greatest but also the most deserved compliment that can be paid to him is, that he has hitherto proved himself the truly able successor of the great genius who presided over the Ministry for Foreign Affairs immediately before him. It may, therefore, with perfect truth be said that, under the administration of Prince Felix Schwarzenberg and Count Buol, the policy of Austria has assumed a new and grand character, alike free from traditional prejudices and petty considerations. The above enumeration of the various and important treaties which Count Buol has entered into with foreign States since he has been in his present high office proves to demonstration his undeviating indefatigability in the prosecution of a truly liberal policy. Whilst, as a salutary consequence of the adoption and realisation of the great principle of the unity of the empire, the internal Customs barriers were removed by Baron Bruck, the present enlightened Minister of Finance (at that time Minister of Commêrce), Prince Schwarzenberg and Count Buol abolished the previously existing prohibitive system in respect of the foreign commerce of the country. This new and improved commercial policy has already been fruitful of great and important results; it brought about, within a comparatively short period, an assimilation with the German "Zollverein." Austria, indeed, proposed the abolition, within a given time, of all Customs barriers between the Zollverein and Austria; but Prussia—illiberal, narrow-minded Prussia—declined to enter into the proposed arrangement. As regards the policy of Austria in the Oriental question, an immense deal might be said in commendation of the extraordinary and masterly abilities, the unflinching consistency and never-swerving loyalty which Count Buol has displayed throughout these trying complications. It must not, however, be forgotten that, in this respect, the present Minister for Foreign Affairs in Austria simply reflects the truly enlightened and magnanimous policy of his Sovereign, the youthful and energetic Emperor Francis Joseph I. Without, therefore, entering more fully into this all-absorbing question of the day, suffice it to say that, notwithstanding the incessant intrigues of a certain influential but retrograding party in the State, his Excellency Count Buol has hitherto perfectly succeeded in overcoming all obstacles thrown in his way, and is up to this hour in the full enjoyment of the most unbounded confidence of his youthful and high-gifted Sovereign, whose steadfast support and unquenched approbation never fail to cheer him on in the consistent prosecution, but otherwise thorny and difficult path, of his patriotic exertions in behalf of the true interests and welfare of his country and his nation. The fundamental principles which form, as it were, the groundwork or this herculean task, and have hitherto been faithfully carried out, may be briefly summed up as follows: In matters material, the foreign policy of Austria is based upon comparatively liberal commercial and customs laws, which the more recently-concluded postal, telegraph, navigation, and other treaties with foreign countries exemplify. In matters purely political, Count Buol advocates a close alliance with the Western Powers, but especially with France—to wit, the protocol signed on Palm Sunday, 1854; the exchange of notes (without Prussia) on the 8th August, 1854; the treaty of the 2nd December, 1854; the vast military preparations for a war against Russia, &c.; furthermore, the enormous and indefatigable exertions which have been made, and are still making, to secure the support of Prussia and the Germanic Confederation for the impending conflict; and, lastly, the persevering advance towards the main object in view, viz., the annihilation of Russia's supremacy in the East. These are the main and unmistakable features of the foreign policy of Austria's present Minister for Foreign Affairs.

In conclusion, a few words on Count Buol's external appearance and private character.—He is rather above the middle stature, and has a exceedingly dignified bearing. The noble and frank expression of his manly countenance, and the invariable urbanity of his demeanour bespeak at once the man of intellect. He is a kind husband, and a fond father; a sincere and faithful friend. The placidity, or, better still, the apparent imperturbability, of his general deportment to strangers or inferiors, coupled as it usually is with a very prominent degree of reserve, seldom fails to produce upon them the impression that Count Buol is, withal, a cold and proud statesman. This unfavourable impression, however, gradually wears away upon longer and better acquaintance, when the noble qualities of his superior mind and generous heart shine forth in all their native dignity.

COUNT BUOL-SCHAUENSTEIN, THE AUSTRIAN MINISTER FOR FOREIGN AFFAIRS.

THE FOREIGN OFFICE, AT VIENNA.

WITH respect to the origin of this highly-interesting public building at Vienna, the only reliable data that we have been enabled to obtain are indicated in the following inscription, which we found over the great portico, or principal entrance:—

Pro Gloriam
Maj Sigilli et Rerum cum Exteris. Gerend.
Mariæ Theresiæ Aug Inhonte.
Cura W Principis A. Kaunitz Rittberg
Hoc Aedificium
Fundavit

In Feb. 1742 the Imperial Chancery of State was separated from the Austrian Court Chancery, or Hofkanzlei (at present called the Home-office, or Ministry of the Interior), and was placed under the Presidency of the then Court and State Chancellor, Count Uhlefeld; with whom therefore, the illustrious list of the Ministers of the Imperial House and of Foreign Affairs commences. He was succeeded in this high office by the following statesmen:—Prince Kaunitz, Prince Colloredo, and Count Cobenzl (who held this post conjointly), Baron Thugut, Count Stadion, Prince Metternich, Count Flocquelmont, Baron Wessenberg, Prince Felix Schwarzenberg, Count Buol Schauenstein. Of the appartment in this Office, wherein the Conference has recently been held, we gave an Engraving in our Journal of last week.

We have already briefly referred to the great European Congress which was assembled within the walls of this building in 1814 and 1815. The next important meeting of diplomatists, which took place here in 1819 and 1820, as well as that which followed in 1834, are known under the appellation of the "German Conferences." The former of these deliberated upon the so-called "Carlsbad Resolutions," which were mainly directed against the public press, and led to the introduction of the much-hated censorship upon all literary productions throughout Germany. It was also at these Conferences of 1819 and 1820 that the German Federal Constitution was completed by the signing of the "Vienna final act" thereof. The German Conferences in 1834, it will be remembered, took place shortly after the serious riots that had occurred at Frankfort, where the Constable Guard-house had been attacked, and an assault upon the Federal Palace been effected. The object of these Conferences, therefore, was to deliberate upon new and more stringent laws in respect of the then existing rights of association, and of the ancient privileges of the Universities, which had become exceedingly inconvenient to almost all the Governments in Germany. These conferences also aimed at the introduction of a limitation to the publicity of the debates of the German States, and at the establishment of a Court of Arbitration for all matters of dispute between the several Governments of the Germanic Confederation and their States (representative parliaments). The results of their deliberations were subsequently confirmed by resolutions agreed to at the Federal Diet.

These general historical reminiscences which attach to the Austrian Foreign-office will, together with the above sketch of this interesting public building in Austria, doubtless be deemed particularly acceptable to the readers of the ILLUSTRATED LONDON NEWS at the present moment.

THE FOREIGN-OFFICE, VIENNA.—THE CONFERENCE OF 1855 HELD HERE.

SCIENTIFIC CONVERSAZIONE AT APOTHECARIES' HALL.

PRESENTATION OF THE BOYS OF CHRIST'S HOSPITAL TO THE LORD MAYOR.

SINCE the foundation of this Institution it has been the annual custom to present the Bluecoat Boys to the Lord Mayor and Lady Mayoress on Easter Tuesday. Considerable anxiety was manifested to witness the sight this year, in consequence of its having become generally known that the Duke of Cambridge, the newly-elected President of the Institution, would attend the presentation. A very large number of ladies and gentlemen assembled accordingly in the Egyptian-hall on that day. Precisely at half-past one o'clock his Royal Highness arrived—the band of the City of London Militia, immediately on his alighting from his carriage, playing the National Anthem.

The Lord Mayor, as is usual when the City is honoured with the presence of any member of the Royal family, met his Royal Highness at the entrance under the great portico, and conducted him to the chair of state in the drawing-room, where several members of the Corporation were presented to him. They then formed a procession to the parlour, where a sumptuous déjeûner à la fourchette awaited them; after partaking of which they proceeded to the Egyptian-hall, where the presentation took place. On his Royal Highness making his appearance, the boys gave three hearty cheers. They then sang the National Anthem, and also a psalm of thanksgiving, at the conclusion of which the Lord Mayor expressed the great satisfaction he felt at receiving the boys in that ancient hall. From year to year young men of genius and talent who had been educated in that noble institution were sent forth to seek their fortunes in the wide world, where many of them had attained to high and honourable positions.

The Lord Mayor, accompanied by his Royal Highness and a great number of the visitors, then proceeded to the drawing-room, where the Lady Mayoress presented the Grecians with a five-shilling piece, the monitors with half-a-crown, and the juniors with a shilling. And, on their passing out, a bun and a glass of wine were given to each.

SCIENTIFIC CONVERSAZIONE AT APOTHECARIES' HALL

A *conversazione* of a most agreeable character, and one pre-eminently calculated to promote philosophical research, was given on Wednesday evening, April 11th, by the Master, N. B. Ward, Esq., F.R.S., and Wardens of the Society of Apothecaries, in their Council-chamber, Water-lane, Blackfriars. This society—long and honourably distinguished for the services it has rendered to the cultivation of medical science, by its careful direction of the education of the student, and by its elaborate examinations, which have had for their tendency the elevation of the character, and general attainments of the medical practitioner—gave another proof of its devotion to the advancement of the profession, by collecting together one of the largest assemblages which has ever taken place of men devoted to the cultivation of science. The wonders of the microscope formed the subject of the evening's entertainment; and never, perhaps, in the history of optical science, has the power of that instrument been so variously or so fully displayed, nor

PRESENTATION OF THE CHRIST'S HOSPITAL SCHOLARS TO THE LORD MAYOR, AT THE MANSION-HOUSE.

the philosophical inquirer so fully furnished with means, both as regards objects and instruments, to behold the greatness and wisdom of the Almighty, as displayed in the minutest objects of creation, as on this occasion. The walls of the great hall were decorated with the most superb drawings and diagrams from the collections of Professors Grant, Quekett, Busk, Carpenter, Letheby, and others; not forgetting some exquisite paintings of zoophytes, by Mrs. Mummery, of Dover. Most of these were on a very large scale, and comprehended many of the most minute and obscure forms from the animal and vegetable kingdoms, exhibiting a connected series from the simplest cell formation up to the highest complexities, so called, of vegetable and animal life—confounding all attempt to distinguish where the one ended and the other began. Beneath these drawings the tables were covered with microscopes—upwards of 100 in number—exhibiting many of the natural organisms, whose representations were suspended above them. Among them we may name:—British sponges, exhibited by Mr. Bowerbank. Zoophytes and medusæ, by Drs. Grant and Ansell. Diatomaceæ and desmidiaceæ, by Mr. Jabez Hogg. Vegetable tissues, &c., by Mr. Loddiges and Mr. White. Phenomena of polarised light, by Mr. Woodward; and a new modification of the same, by means of Harapath's polarising crystals, by Mr. John Farge. Foraminifera, by Dr. Carpenter. Tooth and bone structure, by Mr. R. W. Cooke, A.R.A. Mr. Brooke illustrated the value of careful illumination to the microscopic observer—a point so frequently neglected.

Professors Quekett and Rainey, with Dr. Cooke, presided at one end of the hall, especially devoted to their particular department of anatomy and pathology; and the various makers—Messrs. Smith and Beck, Ross, Powell and Lealand, Salmon, and Baker—showed to what perfection emulation had brought their instruments, under the scientific directions of J. J. Lister, Bowerbank, Quekett, Brooke, and others.

We must not omit Mr. Peters' extraordinary specimens of minute writing, which required the aid of the microscope to read them.

On the floor of the hall, surrounded by most beautiful orchidaceous and other plants from Messrs. Loddiges, and Masters, was placed the original vivarium formed by Mr. Ward, and shown by him in Wardian case in the year 1831, and which has proved the fruitful parent of others by Messrs. Gosse, Warington, Mitchell, &c., proving incontestably the mutual relation of animal and vegetable life, and their dependence on each other.

In the reception-room was exhibited a collection of photographs of snow-crystals observed by Mr. Glaisher during the late severe weather, and contributed by that gentleman; also a collection of Mexican antiquities from Mr. Christie, unique in its character, and many other scientific applian-es.

The assembly was presided over by the Master, N. B. Ward, Esq.; and among the distinguished visitors we observed the Lord Chief Baron and his son; Mr. R. Stephenson; Professors Bell and Grant, Revs J. B. Reade and Mr. Binner; Drs. Paris (P.R.C Physicians), Robert Barnes, Hooker, Nisbett, Hassall, Lankester, R. Bennett, Carpenter, Letheby, Ansell, Druitt, Semple, Farre, J. Webster, Hodgkin, Bulling, Todd, Southwood Smith, and Sibson; Messrs. Glaisher, Whitbread, Gassiot, Lyons, Combe, White, R. Heward, Wenham, Grove, Brande, Faraday, Jackson, Redgrave, Pilcher, and many others, amounting to upwards of 600.

Altogether the evening afforded a treat of the highest and purest intellectual gratification; and old Gideon de Laune, apothecary to James I.—whose bust exquisitely carved, graces the hall, and who followed to the grave by thirty-six children and ninety grandchildren—had still greater reason to be proud of his more numerous scientific and learned progeny.

On Thursday a morning lounge of the ladies of the philosophers, with a large concourse of beauty, rank, and fashion, concluded this instructive and agreeable *réunion*.

THE EMPRESS'S DRESSING-CASE.—On Monday week, on the arrival of the Emperor, his Majesty's dressing-case, containing jewels of great value belonging to the Empress, was taken by mistake to Radley's Hotel, where it remained till the Wednesday following. In the meantime the police were actively engaged in making inquiries for the lost property, but ultimately the case was given to the Lord Mayor, who at once telegraphed to Windsor, and received an answer requesting his Lordship to forward it thither immediately, by one of the Mansion-house officers. Marshall, an officer attached to the Mansion-house, was forthwith dispatched to Windsor with the valuable charge at ten p.m., which he delivered safely into the hands of the Emperor's valet, in the presence of Lord Alfred Paget. The valet gave the officer a receipt for the dressing-case, countersigned by his Lordship.

THE EMPEROR'S VISIT TO THE CRIMEA.—While many people are yet doubting of a fact which has never, from the first, been a moment doubtful —the Emperor's fixed intention to go to the Crimea—there appears in the *Constitutionnel* of Monday morning the following very conclusive announcement:—"The *coup equipage* of the Emperor was sent off yesterday to the south by the Lyons Railway, in charge of several *officiers* of the Mess-yard, who, before their departure, were provided with a complete uniform, and an ample cloak. These men, selected from the best upholsterers of the garde-meuble, will have the care of the Emperor's tent and all the accessories of his Majesty's travelling-dress, and it will be their duty to see that the Emperor is properly lodged, wherever he may be." This is the first positive intimation that has appeared in any French paper that the Emperor will leave Paris on the 15th of May (a day already frequently mentioned), if not which is very probable—sooner. I understand that his Majesty, as Generalissimo of the Allied Forces, will have a staff composed of officers of the four armies, English, French, Turkish, and Piedmontese. —*Letter from Paris*.

MR. LAYARD IN LIVERPOOL. On Saturday last (April 21st) a déjeûner was given to Mr. Layard by the owners of the Black Ball line of Australian packets, on board their new clipper, the *Donald McKay*. The tables were laid out in the between decks, which was decorated with the flags of all nations, and accommodated about two hundred and eighty persons, including the American, French, and Turkish Consuls, the Mayors of Birmingham, Salford, and other large towns, and several of the principal Liverpool merchants. The chair was taken by Mr. T. M. Mackay, one of the owners, who, after proposing the healths of the "Queen," the "Emperor of the French," the "Sultan of Turkey," &c., proposed in a very eloquent and appropriate speech that of Mr. Layard. Mr. Layard, who was greeted with the most enthusiastic cheering, said that a deputation from Liverpool did him the honour of waiting upon him, on a recent occasion, and proposed that he should come forward to represent this place. He felt gratified by such an offer, but could not think of deserting his constituency of Aylesbury, notwithstanding the greater honour that might have accrued from representing such a large commercial town as Liverpool. After a few general remarks with reference to the war, he expressed his opinion that, if a peace had been concluded on the terms of the Four Points, the whole of this war would have been most cruel and reprehensible, and the country would have been placed in a much worse position than if the Vienna note had been accepted. Mr. Layard concluded his speech by a peroration, in which he alluded to the decline of the commercial effects of middle ages, as furnishing an example and a warning to Britain. After calling upon the assembly to join with him in exposing all abuses, and in endeavouring to "put the right men in the right places," he concluded by proposing, "The Town and Trade of Liverpool," and sat down amidst overwhelming applause.

THE TELEGRAPH IN THE BLACK SEA.—The steamer *Lycurgus* brought here on Tuesday last a division of ten *employés* from the establishment of the French telegraphic lines, who left for Varna to-day, and is to be employed in the service of the line of electric telegraph that will be in action between Schumla and that city about the 15th of the present month. The line between Schumla and Bucharest will be under the direction of the Turks, and the clerks to be employed on it will arrive there from France by way of Germany. When Varna is united to Bucharest, it will be possible, by an extraordinary exertion, to communicate a despatch from Varna to Paris, and *vice versâ*, *in one hour*. *By the ordinary* service a despatch will take ten or twelve hours for transmission.—*Journal de Constantinople, April* 8.

WAR MEETING AT SHEFFIELD.—A large and unanimous public meeting was held at Sheffield, in the Town-hall, on Monday evening. It was convened by the Mayor in pursuance of a requisition signed by about 200 individuals, twenty-two of whom were members of the Town-council. The object in view was expressed thus in the memorial:—"To consider the propriety of petitioning Parliament on the conduct of the Government relative to the war, and in favour of the restoration of Poland, Italy, and Hungary, as the only effectual barriers against Russian aggressions; and further, that Parliament will adopt such measures as shall secure to the members an accurate knowledge of the transactions of the Government with reference to foreign affairs." The Mayor being unable to attend the meeting, the chair was taken by Mr. Charles Alcock, who strongly condemned the Austrian alliance in which the war had been conducted, and said that the people would never have been so enthusiastic with regard to it if they had not believed that it was to be a war in favour of liberty. The meeting, on the motion of Mr. Broadhead, was unanimously adopted expressive of alarm and distrust respecting the vacillating conduct of Government in the prosecution of the war, and recording an opinion that no possible good could result to England from the present contest until Poland, Italy, Hungary, and other nationalities were called upon to render their assistance, with a view to their being restored to their original independent position as European nations. The Austrian alliance was also denounced as the main source of the disasters of the campaign. The proceedings terminated with the adoption of a petition to Parliament in accordance with the resolutions, and the appointment of a committee to co-operate with the London committee in erecting a testimonial to the patriotic services of the late Lord Dudley Stuart.

THE CONDEMNED CONVICT, BURANELLI.—The execution of Luigi Buranelli will, according to the judgment passed upon him, be carried into effect, in front of Newgate, on Monday morning, the 30th of April. Great efforts continue to be made to obtain a commutation of the extreme sentence on the ground of insanity.

M. Leverrier, director of the Observatory of Paris, is at present at Brussels, the object of his visit being to confer with the director of the Observatory in that city for the determination of the longitudes of Paris and Brussels by electric telegraph.

THE BUDGET.

IN our impression of last week we gave an outline of the Budget, which had been so anxiously looked for, both on account of the present position of affairs, and from the circumstance of the occasion being the "first appearance in that character" of the new Chancellor, Sir G. C. Lewis.

The Chancellor estimates the revenue for the ensuing year at £63,389,000, which would leave a deficit of about £23,000,000 to be provided for; and he proposed, therefore, besides the £16,000,000 raised by the Loan, to obtain, by means of direct and indirect taxation, the further sum of £6,300,000 in the following manner:—From an addition of 3d. per cwt. on sugar he expected to gain £1,200,000; from 1d. per lb. extra on coffee, £150,000; from 3d. per lb. additional on tea, £750,000; and by raising the duty on Scotch spirits from 6s. 3d. to 7s. 10d. per gallon, and on Irish whisky from 4s. to 5s. per gallon, he looks for an increase of £2,389,000. In the department of stamps he proposed to lay an impost of 1d. on every cheque drawn on a bank within fifteen miles, now exempt, which he reckoned will produce about £200,000. He is also to add 2d. in the pound, or one per cent, to the Income-tax, and, lastly, to raise up the remainder of his deficit, he asked leave to issue £3,000,000 Exchequer Bills: the issue, however, not to take place until the payment of the last instalment of the loan of £16,000,000.

The £6,300,000 to accrue from the above sources of taxation, and the £3,000,000 to be raised on Exchequer Bills, together with the loan of £16,000,000, will give him a fair margin over and above the estimated amount required, but not more, he thought, than was desirable, considering the contingencies of the war expenditure.

For the purpose of forming a sinking fund for the gradual extinction of the loan of £16,000,000, he proposed that, within one twelvemonth after the restoration of peace, there should be set aside £1,000,000 each year towards its liquidation.

In his easy to perceive that the Chancellor, in his mode of raising the amount requisite to cover his deficiency on the year's expenditure, has endeavoured to conciliate several opinions. To appease those who clamoured for meeting our wants by means of a terminable annuity he has thrown a small sop; while, in raising a part by taxation, and the bulk by a loan, he has aimed at stifling objections from others. It has been urged, however, that in this age of increased knowledge and scientific attainment we might have hoped for a higher display of the inventive faculty, as applicable to financial arrangements, than formerly; but the numerous difficulties attendant upon any departure from the beaten track may deter any Chancellor from risking his reputation, by a display of startling originality, at the expense of more sober precedent. His plan of the loan had certainly nothing novel in it, for almost identically the same scheme was adopted in 1835. The loan then was £15,000,000; and for every £100 in money each subscriber had £75 Consols, £25 Reduced, and 12s 7d. per annum Long Annuities. The stock so created was as follows:—

Consols ...	...	£11,250,000 at an annual charge of	£340,875
Reduced...	...	3,750,000 "	113,848
Long Annuities...	...	101,875 "	102,639
		£15,101,875	£557,139

The proposition to redeem the Loan by putting aside one million each year for that purpose is to be understood with the reservation, "if circumstances should permit," and is not to be taken as a definite and absolute undertaking to redeem at a fixed period. In 1804 the Government found itself in a dilemma, owing to a similar promise; to extricate itself from which the nation was saddled with a severe loss. At the commencement of the century, in consequence of the stagnation of trade, the scarcity of specie, the high price of provisions, a general spirit of discontent among the people, and the state of our relations with Foreign Powers, it was thought doubtful whether a loan then absolutely necessary could be raised. An appeal was made to the loyalty of the nation, which was not without effect, as eighteen millions were subscribed in a few days. One of the inducements to subscribe for this "Loyalty Loan," as it was called, was the promise that the capital, if claimed, should be repaid within two years after a definitive treaty of peace with France of Amiens of which it was said, "*every man was glad, but no man was proud*" came in 1802; and, accordingly, at the expiration of the two years—namely, in March, 1804—the stockholders of the "Loyalty Loan" demanded the fulfilment of the promise. To comply with the demand, in the state of the national finance, was impossible, and Ministers therefore effected an *arrangement*, by which for every £100 of the Loyalty Three per Cent Loan there should be given £100 Navy Five per Cent Stock; and for the difference between the money value of the latter and £100 sterling the stockholder should receive the amount in Three per Cents. The loss to the nation, as will be readily perceived, was most severe.

The amount assumed to arise from the penny stamp on cheques is variously stated by different parties; all, however, agree that its aggregate will greatly exceed that fixed by the Chancellor; some rate it at £700,000, and a few are sanguine enough to believe that in a few years, if the impost be required so long, it will surpass that sum, per annum. Those upon whom it will fall most heavily are the members of the Stock Exchange, the number of whose cheques during each "account" exceeds that of any other body of the commercial community. Private parties will no doubt restrict the number of their cheques within the limits of what may be absolutely necessary, but the unanimous opposition will, in a little time, give way, and people generally will think no more of the penny cheque stamp than they now do of the penny stamp on a letter, and will use the one as freely as they do the other.

THE SOUND DUES. Official notice of the expiration of the treaty between the United States and Denmark has been sent off from Washington, and is now probably in the hands of the Cabinet of Copenhagen. The result is looked forward to with great curiosity and some anxiety. The first American ship that passes the Sound, of course, refuses to pay the duty, but will be compelled by *force majeure*, and have to pay the amount under protest.

DUTCH SYMPATHY WITH RUSSIA.—Serious representations have been addressed to the Dutch Government by France and England on the subject of the tumultuous demonstrations in consequence of which the Shah being prohibited by Prussia, now takes place by the Netherlands. It is apparently, in consequence of this application of the Allied powers, that the *Staats Courant* finds it necessary to reproduce the notice published in 1854, relative to the transport of articles contraband of war on board merchant vessels.—*Amsterdam Gazette*.

LORD FORTH.—The Earl of Perth has written a letter to the papers upon the subject of the painful statements which were made some days ago respecting his son, Lord Forth, late of the 42nd Highlanders. It was said that Lord Forth showed cowardice both at the Alma and in refusing to obey his Colonel's order to go on duty in the trenches before Sebastopol. Lord Perth states that his son carried the colour at the Alma, and behaved to the satisfaction of his Colonel. Before Sebastopol he says that he did for a time refuse to go with a covering party into the trenches, but assigns exhaustion and want of food as the cause; and that, in consequence of an altercation with his commanding officer, he next day applied for leave to resign his commission—a step which, owing to his ill-health, he had previously contemplated carrying into execution as soon as Sebastopol should be taken. Lord Perth accounts for his delay in noticing the statements against his son by stating that he thought it right to communicate with the Colonel of the 42nd before doing so.

THE LORD MAYOR'S BARONETCY.—On Monday it was announced to the City authorities, that her Majesty had been graciously pleased to confer the dignity of a baronetcy upon the Lord Mayor of London—now Sir Francis Graham Moon. On Tuesday his Lordship, on taking his seat at the Court of Aldermen, said:—"I think it right to communicate to my brethren the honour that Lord Palmerston has done the Corporation by announcing to me the fact that her Majesty has been graciously pleased to create your chief magistrate a Baronet (Hear, hear). I have received no beautiful letter from the seat of war at the head of the Government, that I think it more becoming that that communication should be read before the entire Court of Aldermen and Commoners, than that it should be made public on the present occasion. I have received through the French Ambassador, a present from the Emperor of the French, in the shape of a beautiful snuff-box, studded with diamonds. I mention these two gratifying circumstances for the purpose of showing not only the feeling of regard and esteem which is entertained by her most Gracious Majesty towards the Corporation and citizens of London, but also the lively and grateful remembrance which his august Majesty the Emperor of the French retains of the reception he met with on the occasion of his visit to this great city" (Cheers).

THE IMPERIAL VISIT. The military made use of on this occasion at Dover consisted almost entirely of the Militia quartered in that town, and the neighbourhood. The guard of honour consisted of two companies of the Royal Bucks Militia, under Captain Young, who were brought over from Canterbury for the occasion. The Grenadier company was posted, with the band, close to the landing-steps; and the Light company, on the square space in front of the Warden Hotel, with the band of the North Lincoln. The guard of honour on the pier was formed in single rank, and was joined, on its left, by the Kent Artillery, under Lieutenant-Colonel Cator. The line was then taken up by the North Lincoln, under Colonel Tomline. Two squadrons of the East Kent Mounted Rifles, in their new grey uniforms, were also formed up in the square near the hotel. About forty men of the Royal Artillery fired the passage across from the hotel to the railway station. Two salutes of twenty-one guns each were fired from the two batteries—called the "Drop Redoubt," on the western heights, and the "Shoulder of Mutton" Battery, near the Castle Cliff, both of them mounting 42 pounder guns. The former were fired by the Royal Artillery, and the latter by the Kent Artillery.

EPITOME OF NEWS—FOREIGN AND DOMESTIC.

The Emperor of the French has conferred on his Royal Highness the Duke of Cambridge the Grand Cross of the Legion of Honour.

The King of the Belgians has nominated Valy Pacha Grand Cordon of the Order of Leopold.

The Grand Dukes Nicholas and Michael, brothers of the reigning Czar, are admitted members of the Council of the Empire. The Grand Duke Constantine was a member under the late reign.

The Emperor Napoleon is said to have purchased the domain and château of Arenenberg, near Ermattingen, where his mother, the Queen Hortense, for some time resided.

The Lord Mayor has received the honour of a Baronetcy, as an expression of her Majesty's approval of the manner in which his Lordship acquitted himself in connection with the visit of the Emperor and Empress of the French to the City.

The Duke and Duchess of Saxe-Coburg and family have arrived at Brussels from London.

Prince Alexander of Hesse has been appointed Colonel of a Russian regiment of Lancers, which is to bear his name.

The Princess Hohenlohe (half-sister of our Queen) has arrived in town.

The Count de Montemolin and Don Sebastian have arrived at Naples from Trieste.

Mr. Hudson and the Duc de Grammont, the British and French Ambassadors to the Court of Turin, are now at Genoa, to witness the embarkation of the Piedmontese troops for the Levant.

The Empress of Austria went to church on the 17th inst., for the first time since her confinement. Her Majesty was accompanied by the Emperor and the whole of the Imperial family. At two o'clock in the afternoon, the weather being favourable, the Emperor and Empress drove in open carriages to the Prater.

The *Ballet Public* of Lyons says that her Majesty has postponed her visit to Paris to the end of September, in order to be present at the distribution of Exhibition prizes, which is to take place at the commencement of October.

In return for the splendid tiara, value about 2,000,000 reals, recently presented to the Pope by the Queen of Spain, his Holiness has sent her Majesty the body of St. Felix the Martyr.

An Imperial decree, dated Windsor, 19th inst., appoints Admiral Hamelin Minister of Marine and of the Colonies, in the stead of M. Ducos, deceased.

M. Jules de Saux, Secretary to the French Embassy, received from the Emperor of the French, on Saturday last, as a mark of his Imperial Majesty's high consideration, the distinction of an officer of the Imperial Legion of Honour. Baron Cabrol, Attaché to the Embassy, has also received the cross of a chevalier of the same order.

A letter from Breslau mentions a rumour that the King of Prussia is to have an interview in that town at the end of next month with the Emperor and Empress of Russia.

The great painting, by Winterhalter, representing the Empress of the French surrounded by her ladies of honour, will be finished this week, and will be removed to the Exhibition.

The Minister of Prussia at our Court was absent from the *déjeûner* given by Count Walewski after the Imperial visit to Guildhall last week; but the presence of M. and Mdme. Usedom is supposed to deprive the fact of any significance.

Princess Christina Trivulzio de Belgioioso has applied to the Austrian Government to be allowed to return to Lombardy, and to be reinstated in the possession of her property now under sequestration.

Sir Roderick I. Murchison has consented to be nominated as the successor of the late Sir Henry T. De la Beche.

The 6th Regiment of Cuirassiers, which bears the name of Nicholas I., Emperor of Russia, held a solemn parade at Brandesburg on the 22nd inst., in honour of the memory of the deceased Emperor.

In a fortnight or three weeks the City statue of Sir Robert Peel will be placed on its pedestal at the west end of Cheapside, on the spot now occupied by the obelisk.

Baron Marochetti is engaged on a monument to the Princess Elizabeth, daughter of Charles I., destined for a niche in the church of St. Thomas, at Carisbrooke Castle, Isle of Wight.

M. Meyerbeer, the composer, has been decorated with the Cross of Commander of the Order of Saxe-Coburg-Gotha.

A few days before the departure of the King of Portugal for Italy, a concert took place at the Necessidades Palace, in which his Majesty sang a duet with Madame Castellan, an air from "I Lombardi," and several other *morceaux* with the artistes of the Italian opera. His Majesty's voice is a baritone, and he is said to be an excellent musician.

Castle Menzies and shooting have been let to an Indian Prince for two seasons. His name is Dhuld Sang, and he is a convert to the Christian religion.

Cardinal Opizzoni, the oldest member of the Sacred College, died at Bologna on the 14th. He was born at Milan in 1769, and received the Cardinal's hat in 1816 from the hands of Pius IV.

The Senatus Academicus of Marischal College, Aberdeen, have conferred the degree of LL.D. on Hugh Barclay, Esq., one of the Sheriffs of Perthshire, and on the Rev. James A. Wylie, Edinburgh, author of "The Modern Jubal compared with Ancient Prophecy," &c.

The Princess Mary Bonaparte Valentini has arrived in Paris from Perugia, in the Papal States.

It is positively stated that Madame Jenny Lind will arrive in Paris in the course of next month. Whether she will sing in public or not is yet unknown; but a strenuous effort is in contemplation to obtain her aid for a charitable institution.

A Mrs. Lydia Smith has been appointed assistant-keeper of the lighthouse at Manitou Island, Michigan, at 250 dollars per annum.

For reasons of a domestic nature, Colonel Mure, of Caldwell, the member of Parliament for Renfrewshire, has found it necessary to retire from the representation of that county, by acceptance of the Stewardship of the Chiltern Hundreds.

M. Darius, first bass singer at the theatre of Rouen, who is not less than 102 years old, and who is the oldest professional singer in France, is to sing in a concert which is to be given for the benefit of the unemployed workmen.

Dr. Kreil, director of the Observatory of Vienna, has just invented an instrument by means of which he can discover the intensity and direction of shocks of earthquakes.

The Birmingham Musical Festival is to commence on the 28th of August.

The Palace of Industry and the Palace of the Fine Arts will open at Paris on the 1st of May; the auxiliary gallery, which will contain industrial products of the three first groups, will not be open to the public until June.

Arrangements are in progress to enlarge the existing reformatory school at Saltney, with the view of rendering it sufficient for the purposes of the county of Warwick.

A project is on foot at Brussels to increase the fortifications of Antwerp, by establishing a new fort at the Tête de Gros, near that city. The inhabitants of Antwerp consider the new fort unnecessary, and the Chamber of Commerce has sent an address to the King praying that it may not be executed.

The Russian Government has ordered the distribution of 3000 silver roubles to the poor of St. Petersburg, in order that they may pray for the soul of the late Czar.

M. Billault, Minister of the Interior, has refused to authorise the introduction of bull-fights into Paris during the time of the Exhibition. Such spectacles, he says, are repugnant to French ideas.

The British forces in India amount to 251,940 officers and men, besides which the subsidiary native troops number 31,004. The police corps numbers 35 officers and 24,015 men.

The town of Brussa has again suffered severely from further shocks of earthquake. There were no fewer than 150 shocks. The fire was consuming the ruins of the town.

A singular result of the cheap fares between Glasgow and Edinburgh occurred last week. A firm at the former city received a considerable remittance by the hands of a clerk, whose fare, first class, was considerably less than the commission charged by a banker.

A fifth of the bees in France have been killed by the severity of the winter, and much of the honey was so severely frozen as to be spoiled.

A large number of cavarnis, containing abundance of guano, have been discovered in the island of Sardinia. The samples sent over to Turin to be analysed have proved equal to the best quality of American guano.

The Saxon Government has published a decree prohibiting the exportation of arms, ammunition, and warlike stores of any kind, except to countries forming part of the Germanic Confederation.

NEW BOOKS, &c.

"The most beautiful books are those which you can take in your hand to the fireside."—Dr Johnson.

GRAND STATE BALL AT WINDSOR CASTLE.

No. 740.] TO THE ILLUSTRATED LONDON NEWS, APRIL 28, 1855 [VOL. XXVI.

VISIT TO ENGLAND OF THE EMPEROR AND EMPRESS OF THE FRENCH.

A SHORT week has now elapsed since the Imperial guests whom our gracious Sovereign and her loyal subjects have so much delighted to honour have left the shores of this country, which, during their sojourn, had been the scene of one continued ovation. The visit is now a *fait accompli*—the facts are in our hands, and a public writer can scarcely have a more pleasing office than to combine, in one succinct and comprehensive narrative, the events of a week destined to form a material landmark in the history of the two greatest countries in the world, and fraught, it is fervently to be hoped, with permanent advantage to both. The time, the personages, and the circumstances of this Imperial visit all combine to invest it with extraordinary interest, and make it one of those events of which a single phase must not be let drop; and the object of this article is to give such a collective impression of the whole as may fix at least its larger features on the memories of the numerous readers of the ILLUSTRATED LONDON NEWS. Many and bloody have been the wars between England and France; emulous and straining has been the rivalry between the two countries in arts and arms; but now, at last, the iron glaive has been thrown away, and the open hand of friendship has been freely extended across the Channel—never, it may be hoped, to be withdrawn while the united action of the two nations is necessary for the peace, the civilisation, and the prosperity of the world.

When one reads of the landing of the Sovereign of mighty France in peaceful guise at the historic chief of the Cinque Ports, accompanied by his young and beautiful wife, and surrounded only by the gay costumes of a brilliant Court, the memory instinctively turns to the former periods when the Royal visits from France boded nothing but war and desolation, and in one instance a subjugation to old England. The glowing pages of Thierry have preserved, in a series of brilliant pictures, the descent of William the Norman and his mail-clad barons, the one great battle of the Conquest, and the long train of sorrows which its results brought on the stalwart Anglo-Saxons. We have had French Kings and Empresses who have come in different guise—as prisoners, or refugees, or suppliants; but now we have, for the first time in a period of more than eight hundred years, the visit of a Sovereign who comes, on the pleasing and equal footing of friendship, to see us at home, to accept our hospitality, and to take back with him to France the best impression of the true sources of our material power, the most irrefragable proofs of our friendship towards himself and towards the mighty people who so unmistakeably chose him as their ruler. Every incident of such a visit has a high historical value, and therefore, *ab ovo usque ad mala*, it must be our humble endeavour to preserve them.

On Saturday, the 14th April, 1855, the ordinarily dull little town of Calais gave early indications that something was a-foot calculated to rouse it, for one day at least, from its chronic lethargy. The Place was filled with Imperial fourgons, Imperial liveries flitted to and fro through the narrow streets, and the authorities of the Hôtel Dessin had assumed the grand Court air of persons who had high and honourable duty in hand. The tricolour hung listlessly from the Hôtel de Ville and the Semaphore, and the regiments of the garrison were under arms at an early hour in the morning. The English Admiralty packet *Vivid* came into harbour, with Sir Robert Peel on board, and arrangements were speedily made for the departure of the Imperial naval escort. The light and graceful *Pelican*, who was to bear "Cæsar and his fortunes" to the shores of England was soon fuming away with that brisk, cheerful simmer which betokens that the steam-ship is eager to start upon her voyage. The huge *Austerlitz* was got under way; and shortly afterwards the rapid and beautiful English mail-steamer *Queen* shot out of the harbour, with the Prefect of the Seine and a number of Paris civic notabilities on board. They were Baron Hausseman, the Prefect; M. Delangles, First President of the Imperial Court of Paris; M. Thayer, Senator, and formerly Post master-General; and MM. German, Kibaut, Pilouxe, Duparre, and De Clebsattel (the last-named being the French Director of the Dover and Boulogne Postal Steam-packet Company. Shortly afterwards the *Pelican* was under way, and the Emperor and Empress left Calais after the usual leave-takings with Marshal Baraguay d'Hilliers, commanding the army of the north, and the whole of the military and civil authorities of the Pas de Calais. The Imperial travellers were accompanied by Marshal Vaillant, Minister of War; the Duc de Bassano, Grand Chamberlain to the Empress; the Prince d'Essling, Counts Montebello, Lizay Maisin, and De Las Marinas. To Captain Smithett, the well-known Channel navigator, was given the high honour and trust of piloting so distinguished a freight safely to the shores of England. A squadron of English and French steamers accompanied the Imperial yacht, and the national air of "Partant pour la

(Continued on page 416.)

VISIT OF THE EMPEROR AND EMPRESS OF THE FRENCH TO THE CITY.

ROLLING THE MINIE RIFLE BARRELS.

THE MINIE RIFLE.

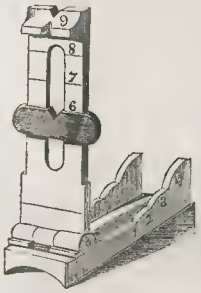
IMPROVEMENTS in guns and locks are so numerous that it has been jestingly said that the Board of Ordnance has a new invention every day offered to them; but the Minié Rifle is in fire-arms undoubtedly the greatest improvement of modern times, after the introduction of the percussion principle in place of the flint and steel.

The use of this Rifle by the British Army during the present war makes it an object of interest as a manufacture. Its peculiarity, as most persons are aware, consists in its having the least possible "windage." By windage is meant the space left between the bullet and the inside of the barrel. The Minié bullet has a chamber at the back, and when the powder explodes it rushes into this chamber, and expands the ball, so that it fits tightly the bore of the barrel as well as the grooves; these grooves are similar to those of any other rifle, but very shallow, in order to prevent any portion of lead remaining in them after the discharge. In this shape the principle cannot be applied to cannon on account of the bullet being of iron.

The Minié Rifle has also a peculiar sight, of which we give an Engraving the actual size. It enables the marksman to aim at very distant objects with great certainty. This "sight" consists of a steel frame, with a sliding piece tempered to fit as a spring. The upright portion being turned on its hinge, the slider rests upon the level marked No. 1, and this gives the range 100 yards; it is shifted to the next upper step for 200 yards, and so on up to 400 yards. From 500 to 1000 yards are marked by the elevation of the upright piece and the adjustment of the slider thereon, as in our Illustration, where the range is set for 600 yards.

The Minié Rifle can be loaded more quickly than any other, because the bullet may move easily down the barrel; and, from the absence of windage, the explosive force of the gunpowder is not in the least wasted: it, therefore, carries the ball much farther, and more truly to its aim.

Great exactness is required in the inside of the barrel; it must be a perfect cylinder, and no accuracy can be too great. In many of the old muskets—now so well known by the familiar name of "Brown Bess"—the gauge of the exterior is quite true, while, in the process of reboring previously to grooving for the Minié bullet, the interior of the barrel has been found to differ in its bore to the extent of one-sixteenth of an inch.



GOVERNMENT MINIE SIGHT.

The same perfect accuracy is required as to the sight, it being evident that an almost imperceptible difference of space would become many yards in the distance traversed by the bullet. Every part of a gun and sight is gauged by the Government officials, and any found inaccurate are returned on the hands of the manufacturers. It is said that a needless accuracy is required in the size of the bayonets, and that in consequence they cannot be supplied with sufficient rapidity.

There is a great division of labour in the gun-trade as carried on in Birmingham; this is true, not only of the men but of the employers, the barrel-making is a separate branch, lock making another, and so on. The gunmaker buys the barrels, locks, &c., and sets them up—that is, puts them together. Several attempts have been made to combine the parts in one factory, but none such has hitherto held its ground.

The process of manufacturing the barrel is in itself extremely simple, although in one particular part of the work there is much difficulty in procuring men competent to its execution—namely, the straightening of the inside of the barrel; and at present there exists no mechanical test by which the correctness of this part of the work can be ascertained. It depends entirely upon the eye.

The iron principally used for the Government rifles is called "Marshall's" iron, and comes from Wednesbury, in Staffordshire. Mr. Marshall possesses some secret (not a patent), by which he is enabled to produce the purest iron, most free from what are technically termed "greys," and this is found to be in all respects equal to the metal composed of twisted fragments.

The iron is procured by the gunmaker in plates about twelve inches long by four inches wide, and three quarters of an inch thick, varying in weight from nine to ten pounds: it is moderately heated, and subjected to the action of a pair of rollers which bend it into a shape called a "mould." It is then placed in the furnace for welding, and is this time brought out nearly in a state of fusion, and passed through rollers which convert it from a bent piece of iron to a barrel. This process is shown in our first Engraving. The workman withdraws the iron from the fire by means of a mandril—a rod of iron with a small shield attached to prevent the heated portion from slipping to his hand; the rollers take this iron between them, and by their movement draw it off the mandril; it is received in a semi-cylindrical shape by a man on the opposite side; it is then again heated, and passed through other rollers of varied shapes, which bring the two edges gradually together until, after the fifth heating, the iron is withdrawn a

SECTION OF WELDING ROLLERS.

complete cylinder: the gradual change of form is shown in the diagram. The process of tapering towards the muzzle of the barrel is performed in a similar manner. From the rollers the barrel goes to a workman, who welds on what is called the "percussion lump." From him it is transferred to the mill for rough boring. This is performed by steel "bitts," properly hardened and tempered, tapering in the first instance from about half to three eighths of an inch, the cutting part being about eighteen inches long. These revolve at the rate of 500 times per minute, and three or four of them are used before the barrel comes into the hands of the fine-borer, who works with a different kind of "bit," not taper, and having only one cutting edge, about fourteen inches long. It is in the processes of fine-boring and straightening that there is a scarcity of skilled labour of the quality required for the Minie Rifle. The outsides of the barrels are then turned in a lathe, and again submitted to the fine-borer. They are then ground, to reduce the percussion lump to the required dimensions, and to remove the turning marks from the outside. The grinding is a very picturesque process, and has been already engraved in our Number for Feb. 1, 1851, Vol. 18. From the grinder they go the filer, who fits the breech, pin, and sight, and they are then ready to be grooved for the Minie bullet. This is accomplished by the machine represented in our second Engraving: the barrel being securely fixed in two vices, a long steel rod, with a cutter (of which we give a drawing) is inserted in the barrel; this is connected with a cog-wheel working in a horizontal rack sliding on a bar, so adjusted as to allow only the requisite turn to the rod in the case of the Government rifles, half a turn in the length of the barrel (three feet three inches). Two men move the machine to and fro rapidly, and, when one groove is completed, a slight change in the wheel shifts the cutter, until the three grooves fit exactly the plug furnished by the Government. A piece of wood called a spale is inserted in the split end of the cutter, to tighten it; and the time occupied in rifling each barrel varies from twenty minutes to half an hour. Machinery has been employed for this process, but we believe the hand is still considered the best, as, on meeting any accidental obstruction, it becomes sensible of it immediately. Last comes the Government "proving"—the least satisfactory process to the gunmaker, as he is obliged to forfeit, away those barrels not approved.

CUTTER.

There is much complaint of great delays in the supply of Minié Rifles, but most persons are not aware that, from the time an order is given out until the guns begin to be completed, an interval of from four to six months must elapse.

For much of the information contained in this article we have to thank

RIFLING MACHINE.

the courtesy of Mr. Clive, of Birmingham, and Mr. Adams, of the firm of Deane, Adams, and Deane

—

[We have received a letter from Mr. Greener, claiming this rifle as his invention, as far back as 1838. in which year he had the plan before the Board of Ordnance, when it was tried by a company of the 60th Rifles, under the command of Major Bridges, Royal Artillery, with the most marked success, and so reported to the Board; but it was rejected on the ground of being a compound ("*compound of two parts*") and thus rendered it unsuitable to her Majesty's service. In the two following years, Mr. Greener states that he used the Rifle much with the same success; and brought it before the public, in a letter written on the 20th December, 1841, and printed in the *Times*, followed by a series of letters on the improvement of military arms at that period. Copies of these letters also appear in the Appendix of Mr. Greener's last work on Gunnery, 1846.—Ed.]

WAR-ROCKETS AND THEIR MANUFACTURE.

When old Berthold Schwartz invented the sooty compound "gunpowder," which has spread such death and desolation over the world—when his military successors racked their ingenuity to devise the best means of confining gunpowder in cannons, and tried so hard to find the best material for cannon-balls—when every imaginable device was employed to diminish the recoil of great guns, and retain them motionless in their places—military engineers little thought that the time might come when all their cherished hopes and aspirations would be turned clean upside down, and the proposition should assume the shape of seeking to add to the recoil as much as possible, of ignoring cannon balls altogether in a certain variety of ordnance, and making the cannon itself a projectile. Yet so it is. The War-rocket, as we shall presently show, is nothing in principle more or less than a gun, the recoil of which is encouraged to the highest practicable extent—a cannon, which, rushing backwards, expends its momentum on the foe.

It is far from improbable that the rocket is the most ancient of all fire-weapons. Conventionally we are in the habit of referring the invention of gunpowder to old Schwartz, sometime about the year 1320; but there are many arguments capable of being adduced in opposition to this opinion.

Some very plausible authorities could be cited, both ancient and modern, favouring the opinion that gunpowder, and some form of military fire-arms (probably rockets) were known to Asiatic nations so early as the days of Alexander the Great; but for a statement of these authorities we have no space here. Suffice it to remark that the Chinese profess to have been acquainted with the use of war-rockets from time immemorial, and war rockets of enormous dimensions had been made by the Burmese long before Sir William Congreve developed the use of these terrible weapons of fire in our own service

But to commence our description of the manufacture and construction of war-rockets, let us once more return to the primary idea of the recoil of a gun. The momentum of a projectile being the equivalent of its weight multiplied into its velocity, the deduction follows that in order to develop the recoil of a gun into a really efficient force, some provision requires to be made for prolonging the time of combustion; that is to say, instead of a charge of quickly-burning gunpowder, a charge of comparatively slowly-burning composition must be used; and this consideration brings us at once to the construction of a rocket. The simplest form of a rocket is that of the ordinary sky-rocket, the nature of which is as follows:—A paper case, being contracted or choked at one extremity into a comparatively narrow orifice, is filled with successive small charges of a composition of sulphur, nitre, and charcoal; each charge being tightly rammed down by means of a wooden or metalic cylinder urged by the blows of a mallet or monkey But the is not all. The rocket composition is not solid; a cylindrical shaft or hole is left in the direction of its long axis for the purpose of affording a large area of simultaneously burning material. The shaft or orifice in question may be either made during the operation of filling by the use of perforated rammers working on a spill, or the rocket may be rammed solid, and bored out subsequently. The latter plan seems to be the best, and it is now adopted in manufacturing the superior descriptions of war rockets. It follows from a consideration of the facts already mentioned that such a case if charged and ignited would not explode on a sudden, as happens with a charged gun, but the charge would occupy some appreciable time in burning, and the recoil first established would grow by successive increments to a powerful projectile force. One thing, however, is evident—the ignited rocket would have no certainty of direction—it would move about with all the uncertainty, and, indeed, something more, of a rudderless ship in a stormy sea. Hence some appendage equivalent in function to a rudder is necessary, and the appendage ordinarily employed is a stick The accompanying diagram affords a general idea of the structure of a rocket, and the manner of attaching it to the stick. The stick is relatively much longer than here represented; in point of fact it is of such a weight and length as to exactly balance the rocket at the point. Such then is the ordinary paper-cased sky-rocket. Although a mere toy, it is nevertheless a weapon of considerable projectile force. Usually it is made to carry a charge of stars or other ornamental devices, which, becoming scattered at the rocket's point of culmination, impart a very graceful effect. It is obvious, however, that any material of equivalent weight to the stars or ornamental fireworks, might be made to take their place. Thus an iron shell properly charged with grain powder, might be attached, and a communication established between it and the rocket composition in such a manner that the shell should burst as soon as the rocket composition might be expended. In a similar manner a dart or arrow might be attached, and this indeed is the expedient had recourse to by our ingenious friends the Chinese, whose war-rockets are of the kind depicted in our accompanying Sketch

Rockets of this description were taken by our troops at the capture of Amoy, and they are now to be seen in many of our public museums

The next step of development the rocket underwent in becoming a European military weapon was a very obvious one. Instead of paper as a material for the case, iron was used, thus imparting to the weapon greater weight, and consequently greater momentum, by which means its perforating energy and shattering force were both vastly increased

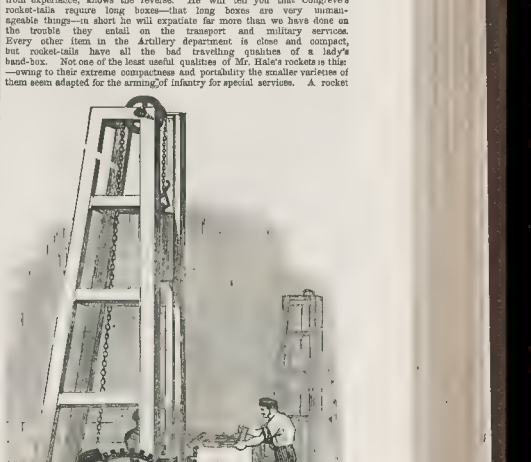
The merit of introducing the iron case is commonly ascribed to our countryman, Sir William Congreve, but this is erroneous. Rockets having iron cases had long been made in India, before the improvements of that gentleman. To Congreve, however, undoubtedly belongs the merit of imparting to rockets the necessary power and precision for their adaptation to the purposes of civilized warfare

The first rockets of Sir William Congreve were so nearly identical in shape with that of the ordinary pyrotechnic sky-rocket, that any illustrative sketch is unnecessary. His largest rockets were of enormous size, weighing no less than three hundred pounds, and being seven or eight feet long. Rockets of this size were intended for bombarding, but they have not been found so efficient as Congreve imagined, and are not employed at this time. The most usual varieties of Congreve-rockets are from ten pounds to thirty-six—the smaller varieties being intended for field purposes, to take the place of field-guns; and the larger varieties for battering and bombarding. Congreve was an enthusiast: he fondly hoped that his war-rocket would hamper common almost, if not entirely, from the field of battle; but practice soon taught him the fallacy of this opinion. His rockets had power and range enough, considerably more than cannon-balls of corresponding weight; but in one particular they were singularly deficient—namely, in accuracy of flight: they would not go straight to their mark, under any conditions of wind and weather, and firing them with effect against or across a wind of only moderate strength, was totally impracticable. Field-rockets were very little employed during the Peninsular War, the Duke of Wellington having been strongly prejudiced against them, and this indeed not without reason. Very soon after Congreve had sufficiently perfected his rockets to admit of their being employed in warfare, some of them were sent to Spain for use by Wellington's army. The Duke naturally desired to have a sample of their powers, so one morning, his army being on one side of a hill, and the enemy at a tempting distance on the other, he thought he might as well try what Congreve's destructives could do. The exhibition was most discreditable to them. Unfortunately their line of intended flight had to cross the wind, a condition which interfered with them to such an extent that, turning their tails to the enemy, they came back hissing and spitting among the legions of the Duke. His Grace entertained a dislike of rockets from that day forward, and never encouraged their employment. However, they did good service against the enemy on the occasion of crossing the Adour, having saved from destruction a brigade of English troops

If the war-rocket was not destined to manifest all its terrors in the Peninsula, a different fate awaited it at Leipsic. The only British soldiers present on that occasion were some of our newly-established rocket brigade. One volley having been discharged against the enemy the extreme of terror pervaded his ranks. Never since the introduction of fire-weapons had such terrible missiles of destruction been seen—of what kind they were, how propelled, how to be avoided, the enemy could not tell. To stand against these fell messengers of death was deemed hopeless, therefore almost without a moment's hesitation the troops against which these rockets were directed laid down their arms. If we mistake not, the war-rockets which did such terrible execution at Leipsic were formed exactly like sky-rockets, with one sole exception they were made with iron cases, instead of paper ones. Their sticks, like those of the ordinary sky-rockets, were lateral; owing to which construction the flight of the missile—always erratic under the most favourable circumstances—was far more devious than it would otherwise have been. Congreve next turned his attention to the proposition of imparting to the flight of the rocket the straightness of that of an arrow, for which purpose it was absolutely necessary that the lateral stick should be removed, and a central one supplied its place. The solution of this problem rendered necessary some extensive modifications in the construction of rockets. These we shall now proceed to explain, prefacing our remarks by a representation of the Congreve-rocket, as it at present exists

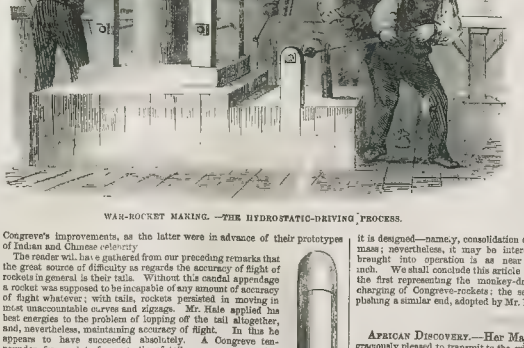
By referring to this diagram, it will be seen that the stick is no longer lateral, but central, occupying the place of the vent, or orifice in the ordinary sky-rocket. It follows, then, that some new provision must be made for the exit of the propulsive flame. Such provision exists in a number of peripheral holes surrounding the central orifice—an arrangement which will be rendered perfectly intelligible by reference to the front view of the stick end of the rocket.

The reader has now fairly before him all the improvements which Sir William Congreve effected for the war-rocket. By his latest modification—namely, the central stick the projectile was rendered more adapted for propulsion out of a tube, and the general accuracy of its flight was much increased. A word, now, concerning the method of firing these rockets When especial accuracy of range is required, they are ignited at one extremity of a tube supported on legs, like a large telescope, and elevated to the necessary angle of altitude; but when extreme accuracy of range is a secondary consideration, and the effect sought to be gained depends on one large flight or salvo of rockets discharged at an object of considerable magnitude—such, for example, as a dense mass of infantry or cavalry —then what artillerists term the ground volley is had recourse to; that is to say, a row of rockets being placed flat on the ground, with their heads pointing in the required direction, and their vents connected by a train of quick-match, one end of the match is ignited by means of a portfire, and the rockets being thus inflamed almost at the same instant of time dash forwards still in a row. For the first hundred or hundred and fifty yards they do not ascend very high from the ground level; after this they usually ascend to the breast height of a man, or even higher, and spread death and desolation in their track. The theoretical advantages of rockets over cannons are numerous and important. For instance, a cannon loses its aim, owing to recoil after every discharge, and, during the height of battle, there is usually so much smoke that the object for taking a correct second aim occurs only at rare intervals. The discharge of a rocket, on the contrary, involves no recoil. The rocket itself is the recoiling mass—from which consideration it follows that a rocket-tube, having been once correctly aimed, should need no further adjustment Again, this same force of recoil is a serious impediment to the use of heavy ordnance on ship-board; mortars especially are open to this objection; but a rocket admits of being fired with perfect safety from a boat or raft only large enough to float it Again, the size of shell and shot is limited by various conditions. It is obviously useless to construct shells and shot of larger dimensions than guns can be cast to throw, or, if cast, admit of being moved wherever required. In practice nothing heavier than a 13-inch mortar can be cast with safety, or moved without extreme difficulty; whereas rockets, requiring no extraneous propulsive force, may be made almost of any size. Proceeding with our enumeration of the theoretical advantages possessed by rockets over ordinary artillery, the non-military reader will easily understand the difficulty which attends the transport of cannon in mountainous regions, whereas rockets admit of being carried with extreme facility. If, then, the flight of rockets were only as correct as the flight of shot and shells, all that Congreve, in his enthusiasm, hoped from their use might be realised, they might supersede guns wholly, or for the most part. Practice, however, has by no means confirmed these hopes; on the contrary, war-rockets now play a very secondary part in military and naval operations. Will they continue to do so? We think not. Under the auspices of Mr. Hale these missiles have received altogether a new phase of development; one which, in all probability will, be found to place them as far in advance of this by making the line of gravity to correspond with the line of flight—the result of a very ingenious application of the rifle principle. The rifling is partly given by the tube from which the rocket is fired, and is partly secured by an ingenious construction of the rocket itself



WAR-ROCKET MAKING.—THE MONKEY-DRIVING PROCESS.

It is not a little amusing to go into Mr Hale's *atelier* and see the enormous amount of destructiveness packed into a diminutive space. You are a votary of the narcotic weed, perhaps, and your eyes, resting on some nice little cigar-boxes as they seem, wonder how on earth cigars could have got into a region where smoking is absolutely forbidden. You are inclined to help yourself, fancying that Mr. Hale, in his benevolence, has provided some choice Havannahs for your special delectation. You approach one of the little boxes, and are about to raise the lid, when the benevolent-looking fabricator of death quietly says, "Have a care, sir, they are ten-pounders, ready packed for a field-day at Shoeburyness! Now this concentration of propulsive energy into little cigar-boxes, may seem a trivial matter in itself, but a military man, from experience, knows the reverse. He will tell you that Congreve's rocket-tails require long boxes—that long boxes are very unmanageable things—in short he will expatiate far more than we have done on the trouble they entail on the transport and military services. Every other item in the Artillery department is close and compact, but rocket-tails have all the bad travelling qualities of a lady's band-box. Not one of the least useful qualities of Mr. Hale's rockets is this: —owing to their extreme compactness and portability the smaller varieties of them seem adapted for the arming of infantry for special services. A rocket of the new construction—in size not much larger than a stout man's middle finger, and in length about equal to the same standard of comparison—has actually been projected two thousand yards, and from a tube almost as portable as a pocket-pistol. Now it is considered highly desirable by military men to devise and bring into operation some form of infantry projectile having a longer range than the Minié rifle. The small rocket adverted to seems to be endowed with this quality. Of course, no one ever assumes that rockets, however portable, will take the place of muskets and rifles; but nevertheless, on certain special occasions they may have their advantages. The new war-rocket was brought under the consideration of the United States military authorities some years since, and, after satisfactory trials, finally adopted.



WAR-ROCKET MAKING.—THE HYDROSTATIC-DRIVING PROCESS.

It was also adopted by the Swiss Government, and is now being prepared in our own arsenals, to supersede, in all probability, the central stick rocket of Congreve.

Amongst other improvements introduced by Mr. Hale, in the manufacture of rockets, not the least interesting is the adoption of hydrostatic pressure in place of ramming by mallets or monkeys. The advantages thus gained are numerous; not only is the operation of filling much more expeditiously performed, but it is also safer, and a much larger amount of composition can be got into a case of given dimensions. When the monkey-driving process of ramming is followed, the rocket charge occasionally ignites, in consequence of the compression of a layer of air against it, an accident which can never occur under the hydrostatic treatment. Moreover, the monkey-driving process gives rise to an inflammable cloud of gunpowder-dust, highly injurious when breathed, and peculiarly subject to ignition; by adopting the new process, not only is this avoided, but rammers of iron or steel can be substituted for those of wood or gun-metal—both of these materials scarcely hard or tough enough for withstanding the violent pressure necessary to give a due amount of consolidation to the impacted charge. Those who are conversant with the vast amount of pressure that admits of being exercised by hydrostatic force need not be told that the process is efficient in effecting the end for which it is designed—name.y, consolidation of the impacted material into a stonelike mass; nevertheless, it may be interesting to state that the exact pressure brought into operation is as near as may be seven tons to the square inch.

We shall conclude this article by appending two illustrative Views—the first representing the monkey-driving process had recourse to for the charging of Congreve-rockets; the second the hydrostatic process for accomplishing a similar end, adopted by Mr. Hale

Congreve's improvements, as the latter were in advance of their prototypes of Indian and Chinese celerity

The reader will have gathered from our preceding remarks that the great source of difficulty as regards the accuracy of flight of rockets in general is their tails. Without this candal appendage a rocket was supposed to be incapable of any amount of accuracy of flight whatever; with tails, rockets persisted in moving in most unaccountable curves and zigzags. Mr. Hale applied his best energies to the problem of lopping off the tail altogether, and, nevertheless, maintaining accuracy of flight. In this he appears to have succeeded absolutely. A Congreve ten-pounder, from point of nose to tip of tail, measures somewhat about ten feet; but the vital, death-dealing, fire-spitting part of the combination will be somewhere about thirteen inches: consequently, Mr. Hale begins by lopping off a broomstick-like appendage of some eight feet nine inches long; and, notwithstanding this extraordinary amputation, the dead-like thing, far from losing any of its powers, is considerably the gainer Tails cost money, too, as our readers may infer; but the amount of gain will be best realised by the statement that, supposing the manufacture of Congreve-rockets to be abandoned at our Woolwich arsenal altogether, and Hale's rockets to be adopted in their stead, the annual saving would amount to no less a sum than thirty thousand pounds But how, it may be asked, is it that Mr. Hale, having removed the tails of rockets altogether, manages to give them accuracy of aim? He accomplishes

HALE'S ROCKET

African Discovery.—Her Majesty the Queen of Spain has been graciously pleased to transmit to the widow of his Excellency the late Governor Beecroft a diploma, dated March 20th, 1854, constituting him a Knight Commander of the Royal Order of Isabella the Catholic, in consideration of his services as Governor of Fernando Po, Annobon, and Cariaco. The diploma was received by Lord Clarendon from her Majesty's Consul at Tenerife, to whom it had been delivered by the Spanish Commissioner in the Canary Islands, with a request that it might be forwarded to the family of Mr. Beecroft as a proof of the esteem in which her Catholic Majesty's Government held his long services. Her Majesty in 1844 granted to Mr. Beecroft the Cross of a Knight of the Royal Order of Isabella. Mr. Beecroft, whose services in Africa are well known, ascended the Niger in 1835, when he made a chart of the river, which contains all that is known of the navigation which has excited so much inquiry, and paved the way for the trade and civilisation of that part of Africa. Mr. Beecroft was requested by Lord Clarendon to take the command of the late Niger Expedition: his lamented death deprived them of his assistance, but his valuable information will, no doubt, be long remembered and acted upon by those who were fortunate enough to receive it

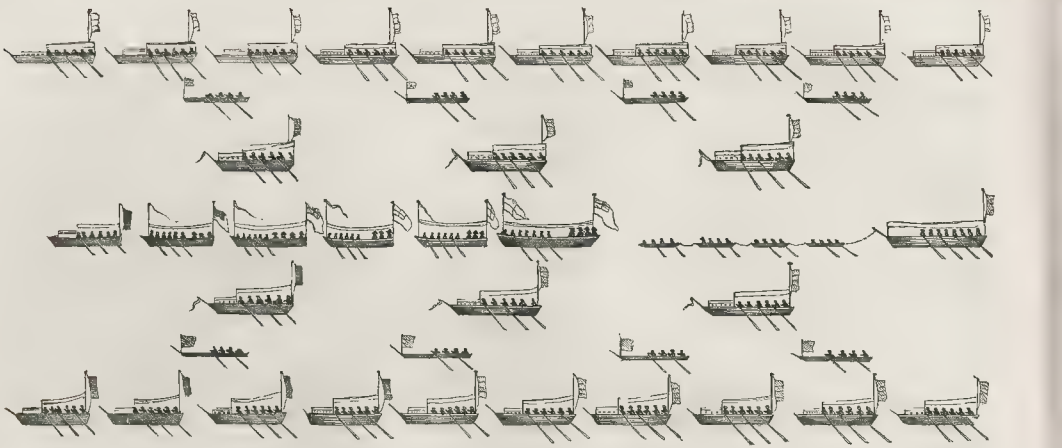
THE CRYSTAL PALACE.—VISIT OF THE EMPEROR AND EMPRESS OF THE FRENCH, AND QUEEN VICTORIA AND PRINCE ALBERT.



PROCESSION OF BOATS TO THE CITY OF NAGASAKI.—FROM A JAPANESE SKETCH.

THE LATE EXPEDITION TO JAPAN.

(From our own Correspondent)

THE account published in the ILLUSTRATED LONDON NEWS, of the 13th January last, accompanied by sketches of the scenery, dwellings, vessels, groups, &c., appears to have had much interest for the public. You will therefore, perhaps, give them the boat procession, exactly as it was drawn by Oto, the Japanese Interpreter; indeed the paper is a tracing from his. You can also give the Imperial Standard, taken by tracing from one of the large Imperial lanterns, which was observed on board the *Winchester* only on one grand special occasion. The officers in charge showed much unwillingness to allow the tracing to be taken. In their opinion it was something sublime and sacred, and it was only when they were well assured that it would always be treated with respect, that they allowed it.

(rank and title)

JAPANESE AUTOGRAPH.

Oto told us that this elegant three-fold device symbolised several things, serving as a kind of "memoria technica." The three large obes represent the three grand religions—Sintoism, Buddhism, and Confucism. The first is the religion of the Kamis—a very important one, for its highly patriotic character, its antiquity, and the number of its votaries. It is, in fact, a kind of hero worship. "The Kamis of the first ages," says M. Frassinet, "were knights errant, who dispensed justice by the vigour of their arms at a time when, as yet, there were neither laws nor magistrates, nor an armed force to make it respected. They crushed the tyrannical power of the giants, the dragons, and the monsters athirst for human blood. Several large towns have derived their names from these lofty deeds. In their temples are preserved the victorious swords of these Hercules, Theseuses, and Quixotes(!) who have preserved the inoffensive inhabitants of their country, delivering them from the cruel attacks of the Japanese Antæus, or Procrustes. By an excess of veneration, these people, like the ancients, imagine that these holy relics are inhabited by the souls of those to whom they formerly belonged." These temples are called Miaa, and put one in mind of the "Fana" of the Romans. Their destination is the same; like them they are always found in the loveliest spots, on the richest soil, near the large towns, surrounded by verdure, beauty, magnificent trees and blooming flowers. You approach by a broad smooth alley between even rows of gigantic cypress-trees. You enter a spacious court, green velvet well spread; several temples may surround this, but the principal one stands in front of you, and sometimes when the mias stands on a slope, you mount by fine granite steps: a large basin, or vase, filled with water for the ablutions, stands near the entrance, and also a large wooden chest for alms. The buildings are strangely constructed by ingenious interlacing and engrafts of well-designed brickwork. When the worshipper arrives, he strikes the large bell three times, to let the gods know he is come, and then burns bits of perfumed wood, vegetable candles, and white paper, the emblem of purity.

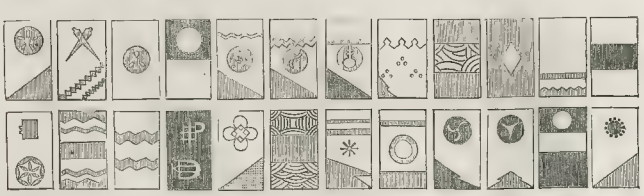
The chief Kami, or Dairi, resides at Miako. He claims to be the lineal descendant of that great Zeumou who consolidated in one nation various erratic hordes, A.D. 660 (which corresponds with the seventeenth year of the Chinese Emperor Hoei-wang). He was the first deified; and after him other heroes, famous for wisdom, courage, or conduct, also received divine honours after death. No doubt our friend at Nagasaki, who was commissioned by the Emperor to treat with our naval Commander-in-Chief, will obtain his apotheosis. I send you his signature, which is read from top to bottom; the last character means "Kami."

We were told that the chief Kami is so highly venerated, that all the others are obliged to visit him once a year, and to pass the tenth month with him. So during this month no other fête is held in the empire: people think all the gods have left their temples for the Mikado's court at Miako.

The Imperial standard of triple lobe symbolises the three annual and three monthly festivals. 1st. The great new year, which lasts a month. 2nd. The feast of spring, which is held on the third day of the third month: it is that of the flowers and (graceful alliance!) the young maidens. 3rd. The feast of the "neighbours," which is generally so decidedly in the "we-won't-go-home-till-morning" style, that one would suppose the Bacchanalian rites of ancient Rome had found their entrance into Japan. The three monthly festivals are the day of the new moon, the day of full moon, and the eve of the new moon.

The Sintoists propose to themselves happiness in this life as the chief good, and have only an obscure idea of the soul's immortality and of rewards and punishments in a future state. Although they do not believe in the transmigration of souls, as most Orientals do, they neither kill nor eat the flesh of useful animals, because they consider it cruelty and ingratitude to do so. Those who concern themselves about a future life believe that the souls of the just go to the thirty-second heaven, i.e., the stage just below the one occupied by the Kamis. The wicked are not consigned to everlasting punishment, but are to be kept galloping about, on foot or on horseback, as long as is necessary for the expiation of their crimes: and their devil is the *fox*—"probably (observes M. Frassinet), because this animal causes great ravages in their country." It would be a curious investigation to trace out at what time, and how, so flourishing a graft of this portion of Japanese Sintoo theology found its way into the noddles of the squirearchy of Leicestershire, and other "gentlemen of England who live at home at ease." The Sinto says great stress on purity, internal and external. Purity of heart consists in following the laws of nature, those of reason, and the orders of the magistrate; external purity demands that nose should be stained with blood, nor eat flesh, and none must touch, or even see, a dead body. If a man cut his finger he must be impure, and excluded from the presence of the gods for seven days. A workman at a temple, if cut, is quickly replaced. It is still worse if it be a temple of the sun; for, in that case, if a workman's blood stain the edifice, it must be pulled down and begun again. They have a gradual scale of defilement—thirty days for having eaten the flesh of a quadruped; only one hour for fowl, or any bird; one day for having slain an animal, being present at an execution, or found near a dying person. The greatest defilement is the death of a relation, which varies according to the degree of proximity.

Oto told us that the Yammabos, or hill priests, are skilled in magic science; they profess to cure sick men by writing on paper the history of their complaint, they then cut this up and roll it into pills, which they administer to the patient with sundry cabalistic evolutions, with unquestionable success. These Yammabos manage the Bind Brotherhood of Seminar, founded by a son of the first Emperor. He was a young man of extraordinary beauty; a Princess of the Imperial family fell desperately in love with him: her passion was warmly responded to, but the bliss of the lovers was of short duration; the young lady—a paragon of loveliness—died at eighteen, and poor Semmnar was so grieved that he wept his eyes out of his head; and, in order to perpetuate the memory of his lost love, he founded, under the Imperial seal, a "Brotherhood of the Blind," which benefited vast numbers. It was at last eclipsed by another, that of the "Feki Blind," which includes most of the great people of Japan. This society owes its origin to the following circumstance: In a civil war between the Gendo and the Feki, Yoritomo and his Gendo gained the day. Kalekigo, one of the most illustrious defenders of the vanquished party, was invited by Yoritomo, who knew his worth, to accept under him whatever post he wished to fill. Kalekigo replied—"I have served a good master, I mean to rest faithful to him. Yet I am under great obligations to you; it is to your clemency that I owe my life: and if it is my misfortune that I am not able to turn my eyes towards you without longing to avenge by your death the woes of my Prince as well as my own. Receive, then, those eyes, which gaze hostilely on you; it is all I can offer you," and he tore out his eyes. Yoritomo, astounded at such magnanimity, loaded him with honours, and the blind General founded the Feki Society for the Blind. These people are taught to maintain themselves by work. They are employed in public festivals, processions, and at marriages. They are dispersed all over the empire; but the General and the principal directors of the society, who exercise great power over the numerous members, live at Miako.



JAPANESE FLAGS.

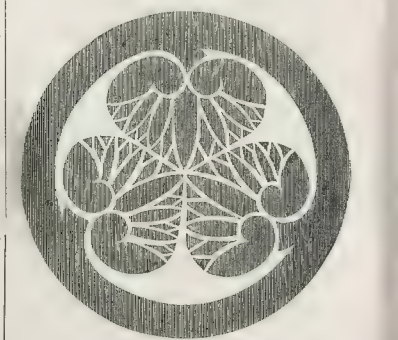
Buddhism touches the Japanese that the souls of men and animals are immortal, of similar material, and differing only in the nature of the bodies they animate. When the soul of man is separated from the body, it receives, at once, its reward in a place of happiness, or its punishment in "*another place.*" The dwelling of the "blest" is called "The Place of Eternal Delights." There are various degrees of bliss, but all so pure that every one is content with his own share. Amida presides here. It is by his mediation, alone, that men can gain admittance. How are men to participate Amida? By virtue, and keeping the "law of Sinka." This is comprised in the "Goka," or "five laws." Short enough they are:—*Se Soo*—Don't kill; *Tsou-to*—Don't steal; *Sivan*—Be chaste; *Mago*—Stick to truth; *Onsiwa*—Abstain from strong drink. Buddhists believe in a purgatory and transmigration. The first statue of Buddha was introduced into Japan A.D. 550.

The law of Confucius, in Japan, differs from that in China. They call it Sioutoo, or the "Path of wise men." A leading principle in it is that the greatest perfection, and chief happiness of men, consists in the calm delight felt by the spirit in a wise and virtuous course of life. Their doctrine may be comprised in five precepts which are expressed by five monosyllables, viz.:—

1. Dsin—To live virtuously
2. Gi—To do justice to all.
3. Re—Be affable and polite
4. Tsi—Propagate and defend the maxims of a good and wise Government.
5. Sin—Have a pure conscience and an honest heart.

They do not believe in transmigration—they admit neither gods, temples, nor worship, and have nothing to do with the rites of the Sintoists nor Buddhists, except what etiquette demands. They do not burn their dead. They keep the body three days; then put it in a coffin, filled with aromatic antiseptic herbs. When all is prepared, they accompany the dead man to his grave on the hill-side, and bury him there in a very simple, quiet manner. Not only do they think suicide allowable, but they even regard it as heroic and meritorious, when it offers the only means of escape from a shameful end, or the disgrace of falling alive into the hands of a victorious enemy. These Sontoists are supposed to secretly favour Christianity; and therefore they are required to place an image, or at least the name of one of the gods usually adored, in the position of honour, with a vessel of flowers and a censer before it, in each dwelling.

In the Procession of Boats may be observed five bearing the British flag. In the first was the band, in the last the Admiral's suite. The Japanese boats took up their stations in the most perfect order, as represented, every one of which was distinguished by some flag. I send a Drawing of a few of these small flags, which are about a yard wide, a yard and a half long, brilliant in red, blue, black, and white. These denote the different guards and departments:—1st. There is the Guard of the Port, the Customs, Commissariat, Police, Messengers, Naval and Military. The Port-guard keep a journal, in which they enter the names of all persons, and even the least articles which enter and leave the isle. The Governor of Nagasaki inspects this journal once a month. Nothing is allowed to pass without an order from him or the Ottons, except the usual daily imports of necessity; and nothing reaches the Dutch, except through three sworn searchers. We laughed at a story about a Dutch captain, who used to wear a large robe of blue silk with silver lace, *en Louis XIV*. Under its ample folds he conveyed, three times a day, such quantities of contraband goods that two sailors could scarcely get him along. All his officers, and others, did the same, until the Governor gave them a hint to change the style of their dress. The good people of Nagasaki, believing that all Dutch captains must be very stout, were completely mystified when they saw them all at once reduced to the ordinary size. The second guard is the "patrol." All night long you hear them mark the hours by striking two pieces of wood together; they have their boats and flags. There are other guards specially charged with the surveillance of strangers; the principal is the Imperial Guard, kept partly by the Governor and partly by the Prince-governors of the two provinces next to Nagasaki. Its circle of inspection extends about three miles round the town. Then there is the Founeban, or "Guard of all vessels," who have charge of the bay and all adjoining waters. It is composed of eighteen soldiers, having at their disposal guard-boats and rowers. When a foreign vessel enters the harbour, two of these boats, commanded by an officer, station themselves on each quarter. They are relieved every two hours while the vessel remains at Nagasaki; when she goes to sea, they accompany her outside. The coast-guard next take charge of her. Their duty is to see that the junks shall only unload at Nagasaki, and, when they have time, their duty is to try their hands at whaling. Lastly, the Toniban, or *fire-seeing guard*, composed of twenty soldiers, who live, with their families, on a hill commanding the Dutch and Chinese factories. They watch the sea with telescopes, and have a staff of light fast boats ready to send to the Governor, if anything unusual is seen.



THE JAPANESE IMPERIAL STANDARD.

One of their highest watch-towers is a most picturesque object when seen from the bay, it is called "the mountain of flowers;" they keep a mass of combustibles there, which the sentinel has orders to light if he sees ten or more sail approaching, or even one Portuguese; or any popular movement in the neighbouring island. All these guards keep up a great degree of emulation among themselves, and they frequently told us, that their business was quite as much to watch each other as to keep their eye on strangers.

On one occasion several officers came up to the writer with a large bundle of the ILLUSTRATED LONDON NEWS, and pronounced, several times, with much energy the name "Wellington," making signs that they wanted to see his portrait. After a brief search, the old Duke's face was found. No, no—it was our big ship they wanted to see; they had heard that we had built the largest man-of-war steamer afloat. When the Number of the ILLUSTRATED LONDON NEWS containing a fine Engraving of that splendid ship was shown to them they were delighted. "The eyes of the ignorant are more learned than their ears;" and to these people, ignorant of our language, that engraving proclaimed our vast power and progress.

THE PARTITION OF POLAND: THE DISMEMBERMENT AND FIRST PARTITION.

THE dismemberment and first partition of Poland, in 1772, and the final partition and total annihilation of the independence of that country, in 1793, by the machinations of the Empress Catherine II., of Russia, assisted by the Courts of Berlin and Vienna, are among the most disgraceful acts in history. England, whose duty was, as one of the leading nations in the world, to maintain inviolate the sacredness of treaties and the rights and liberties of Europe, looked on with indifference. "I will bribe Austria, I will terrify Prussia, soothe France, and flatter England," said the bold Czarina, in a communication to one of her favourites. Her subsequent actions prove that she did not speak idly or in a boastful spirit. From any other Sovereign such an avowal would have excited decision; but, coming from the mouth of so astute and resolute an intriguer as Catherine, they inspire, even at the present day, the admiration and the wonder of politicians. "It was an ingenious contrivance (says M. Spittler, in his "Sketch of the History of the Governments of Europe") formed in a truly Roman style, and completed accordingly. Not only was a numerous and a free nation to be deprived of its liberty and national existence, but all Europe was to be lulled to sleep. The annexations of Louis XIV. were a trifle in comparison to what Catherine performed in Poland and against that country. But what loud and violent cries were raised against the former, and in what soft murmurs did the voice of truth repeat the ancient law of nations, when there ceased to be no longer any law between Russia and Poland!"

Had Great Britain taken up the cause of that outraged country as she has taken up the cause of Turkey, it is possible that the war now raging in the Crimea might never have cursed the world. The great truth, that "the faults of the fathers are visited on the children of the third and fourth generation," is being felt at the present day. But it is useless to dwell upon a point so painful. The noble manner in which the cause of Turkey was taken up by the Allies, and the zeal with which the war has been conducted, show that England and France will not again suffer a bullying despot to destroy, in his lust of dominion, the nationality of an independent people.

In order fully to comprehend in what way Poland was subjected to so gross an outrage as that perpetrated by the Empress Catherine, it will be necessary to take a summary glance at its internal condition. We seek in vain among the extant nations of the world for a Government precisely similar to that of Poland. In the early ages the country was governed by a race of hereditary Kings vested with almost absolute power. These were succeeded by the "Piasts," who are represented to have been elected from among the nobility, with no power to transmit the crown to their children; but who, nevertheless, long preserved it in their family. The nobles perceiving that the old electoral laws were likely before long to be entirely obliterated from the national archives, unless they exercised some check upon the Piasts, formed themselves into powerful confederacies, and kept the country in a state of perpetual turmoil. At last, on the death of Louis, the last of the Piasts, the nobles boldly restored the long-forgotten laws, and raised to the Polish Throne Ladislaus Yagellon, Duke of Lithonia. With every succeeding reign the power of the nobles increased, until at length, at the time of Sigismund, that body drew up a Charter enforcing the ancient law of election, and compelled the King to sign it. The four principal articles of this important Charter are as follows:—

1st. That the Crown should be elective, and that the King should never have it in his power to give it as a successor during his lifetime.

2nd. That general Diets should be assembled every two years.

3rd. That the Polish nobility should have the right of suffrage in the election of a King. And

4th. That if the King should take upon himself to infringe the laws and undervalue the privileges of the nation, the subjects should be absolved from the oath of fidelity.

On the death of Augustus III., Catherine saw that, by a little intrigue, she could easily exalt herself to the important position of Guardian to the vacant Throne and Umpire in the election of the new King. Her first step was to induce the Courts of Vienna and Versailles to refrain from any interference in Polish affairs; and her next to secure the friendship and confidence of England. These important points gained, Prussia was the only Power whose opposition was likely to be troublesome. Frederick was easily persuaded to enter into her views, and concluded with her a treaty which was highly conducive to the success of her projects, and which contained the following secret article:

"It being for the interest of his Majesty the King of Prussia and of her Imperial Majesty the Empress of All the Russias to exert the utmost care and effort to maintain the Republic of Poland in its state of free election, and that it should not be permitted to any one to render the same kingdom hereditary in his family, his Majesty the King of Prussia, and her Imperial Majesty have promised and mutually engaged themselves in the most solemn manner by this secret article, not only to permit no one, whoever he may be, to attempt to divest the Republic of its rights of free election, to render the said kingdom hereditary, or to make himself absolute therein; but also by every possible means and in common council to frustrate such views and designs that have a tendency that way, as soon as they shall be discovered; and even, in case of necessity, to recur to force of arms to defend the Republic from the overthrow of its Constitution and fundamental laws."

So dexterously had Catherine managed these "little plots" that, on the formal declaration of the vacancy of the Polish Throne, all Europe looked towards her as the lawful head of the election; and candidates of whatever rank, whether small Dukes or great Kings, were content to abide by her decision. She felt sure of her position, and arranged the business which had been courteously conceded to her in as bold and independent a manner as if the Crowned Heads of Europe were so many Russian vassals. The cutting answer which she returned to the King of Saxony, who made warm applications for the vacant throne, will serve to illustrate the general tone of superiority which she assumed. "As a friend," wrote the Empress to the sanguine candidate, "I should merely advise you not to expose your interests in an affair which in the end cannot possibly come up to your expectations." Several other applications were made; and for each candidate she was ready with a suitable reply. All at once, and contrary to expectation, her choice lighted upon a young man named Poniatowsky—a person of obscure birth, and with whom she had had a scandalous intrigue. Poland was shocked at the proposal. But, as nothing was more necessary to her schemes of aggrandisement than that the throne should be filled by some minion on whom she could depend, the Empress resolved to support her *protégé* at all risks. She accordingly wrote to Count Kayserling, her Minister at Warsaw, desiring him to exert all his influence in behalf of Poniatowsky. One of her despatches to that officer contains the following significant sentence: "My dear Count, pray remember my candidate. I write this at two o'clock in the morning. Judge whether the affair is indifferent to me."

But, as secret intrigue appeared to Catherine insufficient to ensure the desired success, she contrived to obtain an excuse for bringing physical force to bear upon the question. On the very day, therefore, that the Diet had assembled to discuss the unreasonable pretensions of the Empress, a Russian army entered Warsaw on pretence of preserving tranquillity. Russian agents, disguised as peasants, at the same time mingled with the crowd, ready to support Poniatowsky by their votes. At this extremity the more zealous among the patriots flew to arms. But, alas! for unhappy Poland, the armies of Russia were the masters of the capital. The Diet was thrown into confusion. Count Malakoffsky, Marshal of Poland, in vain endeavoured to clear the room of strangers. Hardly had the last words issued from his lips than sabres were seen to glide from beneath the cloaks of pretended citizens. The instant the orator Mokranoffsky rose to address the people, red coats emerged from dingy vestments, like butterflies out of grubs. Not a soldier had been admitted into the body of the assembly; but now, when the patriots rose to address the civilians, civilians were nowhere to be seen, and the rooms were thronged with soldiers! Mokranoffsky, finding himself surrounded by armed men, and seeing that resistance was useless, bared his breast to his assailants, exclaiming in a voice which even the invaders respected, "If you must have a victim, I stand before you. At least I shall die a free Pole!"

The first sittings of the Diet were thus little better than a succession of brawls. But these unpropitious demonstrations by no means deterred the Czarina from carrying out her intentions. In vain the courtiers by whom she was surrounded represented to her that Poniatowsky was the grandson of a small farmer. "If he were himself a farm-labourer," cried the Empress, "I will have him King; and King he shall be!" In the meantime, fresh armies had been sent to Poland. The whole country was in the power of Russian soldiers. The Ambassador, with a body-guard of some thousands of armed Cossacks, lorded it over Warsaw. Several of the principal nuncios protested against the interference of strangers. Count Branicky assembled the troops, of which, as Crown General, he was Commander; and, in company with Prince Radzivil, prepared to maintain the right of free election by force of arms. Poles and Russians at length met in a pitched battle. But, although the former fought with all the determined bravery of patriots and desperate men, they were signally defeated; and Branicky and Radzivil, together with the beautiful wife and sister of the latter (who, with the true national spirit, had placed themselves in the front of danger in order to encourage the soldiers) were compelled to fly the country.

When peace had been in part restored, the Diet again assembled. On this, as on most important occasions, the meeting was held in an open field, at the distance of about a league from the capital, and was opened by a sermon, of which the text was "Look even out the best and meetest of your master's sons, and set him on his father's throne, and fight for your master's house" (2nd Kings x., 3. The Primate, having mounted the rostrum, demanded in a solemn manner whom they would have for King? A great cry burst from the assembled people; and one word, "PONIATOWSKY," decided the fate of Poland.

On the following day (Sept. 7th, 1765) the new King was formally proclaimed under the name of Stanislaus Augustus. This announcement was received by the people with the most boisterous demonstrations of joy. Never was a King welcomed to his throne with more enthusiasm than this same Poniatowski, who, a few days before, had been declared an enemy of Poland.

It might have been imagined, after the Russian Cabinet and the Polish Diet had come to an understanding, that all cause for Russian interference in Polish affairs would have been removed. This, however, was not the case. Like the Old Man of the Mountains, whose adventures are detailed in the "Arabian Nights," the Empress clung to the neck of the miserable Poniatowsky; who, imagining in his simplicity, that her favours were marks of particular friendship and esteem, was gradually sinking deeper and deeper into the slough of difficulty and danger. One occasion for interference which Catherine eagerly embraced was a long-pending dispute between the religious factions of the state. The Catholics had succeeded, after "a hot war of words," in causing the Dissidents to be expelled from the Diet; whereupon the Protestants applied to Russia for protection. The Empress gave the required aid—first in secret, but afterwards openly; at the same time fanning the displeasure of the disputants in every possible manner.

The Bishop of Cracow, a haughty bigot, loudly protested against these proceedings. The Bishop of Milna, and most of the prelates followed in his steps, and moved for new and stricter measures against the Dissenters. The King, favouring more moderate views, was openly insulted by the fanatical Bishop of Kieff, who in a fit of passion delivered himself of the following undecked and ungentlemanly speech: "I need formerly to pray to God for your prosperity; my prayer now is that he may send you to the Devil." This man had already, on a previous occasion, gone so far as to assert "that the King ought to be hanged; and that there were still some men left who were charitable enough to do the nation that service." What a deplorable state the country must have been in, when a subject could thus insult his sovereign, and escape unpunished! In subsequent sittings of the Diet, the frightful laws against the Dissenters, framed by the Russian power, were ratified. The Dissenters again appealed to the Empress for protection. Whereupon Prince Repnin arrived at Warsaw at the head of a large army, to demand in the name of the Czarina, "not only toleration on behalf of the Dissenters, but a complete equality between them and the Catholics." This demand was met with a furious refusal. The Russians had recourse to arms, and civil war broke out in all its horror. Stanislaus Augustus, fearing that he had incurred the displeasure of his Empress, and desirous of restoring himself to favour, convoked a Diet extraordinary, for the purpose of deliberating on conciliatory measures. But the Bishop of Cracow, the Bishop of Kieff, and others, refused to pay the slightest attention to the orders of the King. On the evening of that day the Palatinquents were privately arrested by the Russian agents, and sent with their adherents to Siberia. Prince Repnin, in extenuation of this outrage on the Liberties of Poland, addressed the Diet in a manifesto which began as follows:—"The troops of her Imperial Majesty, my Sovereign—friends and allies of the Confederated Republic—have arrested the Bishop of Cracow, the Bishop of Kieff, and others, for having failed in the respect that is due to the dignity of her Imperial Majesty, by questioning the purity of her salutary, disinterested, and amicable intentions in favour of the Republic," &c. This explanation satisfied the King, but was not satisfactory to the Diet, who demanded that the Bishops should be immediately set at liberty. The King, interceding for his people with the Prince, had the mortification to be "snubbed" by that functionary. Once having humbled the King, it was no very difficult matter to humble the Diet. The national archives fell into the hands of the Russian diplomatist; who, at the same time that he was reforging the old laws and inventing new ones for the protection of the Dissidents, managed to let slip unseen into the Code certain clauses of a tendency to overthrow the Constitution, and lay it open to the assaults of the Empress. Stanislaus Augustus was now only a King in name: abandoned by Russia, and mistrusted by his own people, his palace had, within a few months, been converted from a court to a prison. Catherine's chief hated Stanislaus, on account of his having once been his rival in the affections of the Empress. He took good care that his resentment should be made known to Prince Repnin, who vented his spite upon the poor King whenever an opportunity presented itself, either in public or in private. The following anecdote, related by Mr. Tooke in his valuable "History of the Reign of Catherine II.," will serve to show to what a degree of subservience the weak Sovereign was reduced:—"One evening," says Mr. Tooke, "when the King was at the theatre, the Russian Ambassador was late before he came. The performers were in the second act, when a bustle being heard in the Ambassador's box, the King sent to inquire what was the matter. Answer was brought that Prince Repnin was come, and was surprised they had not waited for him. The King ordered the curtain to be dropped, and the piece to begin again."

An apparent calm reigned over Europe; Catherine, like a great actress, studying her part in a fearful tragedy, while the rest of the house is wrapped in slumber, meditating amidst the universal silence the most a rocious acts. But the French Minister, the Duke de Choiseul, perceived that there was mischief brewing for Poland, requested the Sultan of Turkey, who had himself received wrongs at the hands of the Empress, to stand forth and defend the rightful cause. His representations had the desired effect. The sultan at once took part with the Poles, and by his noble conduct averted for a time the blow that was to crush at once the freedom and the nationality of a great and independent people. Catherine, it appears, did not regret his interference. Her Polish plots were not quite matured, and a victory over the Ottomans would, she felt, so magnify her authority in Europe, that no power would then venture to question her right to incorporate in her dominions a country already overrun by her armies and governed by her Ministers. In the meantime affairs in Poland were hurrying to the climax. All the promises which the Empress had made to the deluded Poles were ruthlessly cast aside. Fresh armies kept pouring into the country, slaughtering and burning wherever resistance was offered. The State papers, passing through the hands of the Russian Minister, had become polluted with barbarous laws. Clauses enjoining submission to Russia, and threatening severe punishment to such as infringed the Empress's commands, striking as they did at the very root of the great tree of freedom, caused the whole framework of Polish independence to totter to its base. The people revolted. The dying sparks of patriotism blazed up. The confederated patriots drove the Russians from the city of Cracow, and assembled in the fortress of Bar (which afterwards gave name to the Confederation), to concert further measures against the invaders. But disaster followed them to the battle-field. The Russians were victorious in almost every skirmish in which they were engaged.

Catherine now began to negotiate with the crowned heads whom she had chosen to be her partners in the spoil she was about to divide. The King of Prussia had long been privy to her cause, and both potentates looked towards Austria for that support which alone would ensure the success of their schemes. So great a fear had Frederick of arousing the suspicions of some wary diplomatist, that he did not venture even to confer personally with the Empress, but sent his son Prince Henry to speak for him. So conscious, too, was the King of the dishonesty of his conduct, that he did not even dare to let it be known that his son was going to St. Petersburg. He pretended that he was going to Sweden to see his aunt; but had secret orders to return quickly by way of Denmark, in order that the Empress, who had been informed of the manœuvre, might invite him to St. Petersburg. In the private conferences which took place between the Empress and Prince Henry the dismemberment and partition of Poland were resolved on. "Catherine and Frederick," says Mr. Tooke, "were equally desirous of undertaking this dismemberment, but they could not do it without a third ally. If Marie-Therese had been the sole mistress of the Empire, they would not, perhaps, have succeeded in making Austria a sharer in so unjust a spoliation." As far as Joseph II. was concerned there could be no difficulty. The care of treating with him was left to Frederick, and, filled with hopes held out by that Sovereign, Catherine proceeded trustfully on her knightly project.

In the meanwhile the Russian troops had routed the confederates of Bar, massacring many in cold blood and seizing others. The property of several of the richest nobles was confiscated for the benefit of the Russian treasury. Catherine herself was not too proud to accept the library of the patriot Radzivil, although she declared to Europe that her only desire was to watch over the individual interest of every true Pole, and to befriend in every possible manner the distracted nation which she had taken under her protection. The Poles, imagining their King to be secretly in alliance with the Empress, threw off his authority, and chose for leader a nobleman named Pulaufsky. That General's first measure was to obtain possession of the King's person. For this purpose he entered into a league with three other noblemen. The four conspirators, together with forty Dragoons, disguised as peasants, entered Warsaw by different routes for the purpose of carrying out their project. The King, on returning from supper at a relative's house, suddenly found himself surrounded by men in masks. He received violent blows on the head, and having been lifted on a horse was carried in a state of insensibility to a forest at the distance of about a league from Warsaw. Voices of Russian patrols caused the conspirators to take flight; leaving the King, who had recovered his consciousness, to escape his way in the dark. That night the King's hat was found besmeared with blood; and the people rose to avenge his death. But on the following day the King himself was found, and crowds who had before abused and denounced him gave way to the most extravagant demonstrations of joy. This little incident was of a nature to disturb the self-complacency of Catherine, who had been in hopes that the Poles had by this time become disgusted with their King.

At length, in the middle of the year 1772, the Empress saw herself on the point of reaping the fruits of all her intrigues; the treaty of the Neustadt had engaged the courts of Berlin and Vienna to stand by her in her attempt on Poland, and all the rest of Europe were in a state of utter ignorance as to her intentions. Joseph II., on pretence of giving his assistance to the confederates of Bar, marched his armies into Poland. The armies of Russia and Prussia had also respectively advanced upon the northern and southern provinces. Baron Stackelberg, the Russian Minister, thereupon, in the name of the allies, drew up a manifesto to the Polish King and Diet, of which the following is an extract:—

In the midst of that promising state of affairs which was secured by the accession of Stanislaus Augustus to the Polish throne, the spirit of discord seized upon the union. Citizen armed against citizen; and laws, order, peace, safety, justice, police, commerce, and agriculture—all are either gone to ruin or are on the brink of destruction. . . . Her Majesty the Empress of all the Russias, her Majesty the Empress Dowager Queen of Hungary and Bohemia, and his Majesty the Emperor of Prussia, had themselves under the necessity of taking a active part in circumstances so critical, and their said Majesties have determined among themselves, without loss of time, and with one accord, to take the most effectual measures to re-establish tranquility and good order in Poland. . . . As they have respectively very considerable claims on the possessions of the republic, which they cannot permit themselves to expose to the hazard of possible contingences, they have determined among themselves to assert these their lawful claims, which each of them shall be ready to justify. . . . Her Majesty the Empress of all the Russias, her Majesty the Empress Dowager Queen of Hungary and Bohemia, and his Majesty the King of Prussia, having communicated to each other their respective rights and claims, and being mutually convinced of the justice thereof, are determined to secure to themselves a proportionate equivalent by taking immediate and effectual possession of that part of the republic as may serve to fix more natural and sure bounds between her and the three Powers.

This imperinent manifesto was followed by others no less insulting. That of the Court of Vienna, after having informed the republic of the fact of the election of a Governor for that part of Poland occupied by the Austrian troops, exhorted the people to pay implicit obedience to that functionary. The appointment of a day for the taking of the oath of allegiance was referred to; and the people were, in the meanwhile, recommended to behave just the same towards their new Sovereign as if that solemnity had already taken place.

The Court of Berlin, on her part, drew up a manifesto of a similar tendency, but more outrageous. She promised the inhabitants of Russian Poland the free exercise of their religion and laws, and magnanimously offered them the same privileges as those which were accorded to her own subjects. Catherine was pleased to style herself the Great Mother of Russia); desiring in return merely the love of her subjects and their strict obedience to each and all of her injunctions. The people were likewise informed that the solemnity of oath-taking would be held in a month from the date of the manifesto. This precious document winds up with a eulogium on the virtues of the Empress, and an injunction that prayers be offered up in all the churches for herself and the Grand Duke.

The King of Prussia's manifesto was perhaps the most audacious of all. It opened by informing the inhabitants of Prussian Poland "that in the early ages a certain Polish King did unlawfully and violently dispossess the Duke of Pomerania, of a portion of his dominions called Pomerelia, together with a large district in New Marck; that the Dukes of Stettin were the lawful and natural heirs of the Dukes of Duntzic; that the latter line being extinguished so early as the year 1295, their territories fell into the hands of the knights of the Teutonic order, from whom they passed into the hands of the kings of Poland; that the House of Stettin was thereby deprived of its rights, and prevented ever after from recovering them; and finally that the House of Brandenburgh are the heirs and universal successors of the aforesaid Dukes."

But the three Great Marauding Powers not satisfied with having gained possession of the several Polish provinces which fell to their share, desired to gain for so unjust an annexation the compliances of the Polish King and people. For this purpose a Diet extraordinary was convoked at Warsaw by the Allies, which was to acknowledge to the world the justice of the late nefarious proceedings.

The Poles revolted at the thought of performing so horrible a duty. But the armies which ravaged their country drove them to the place of meeting at the point of the bayonet. Rumours were likewise spread about, by way of caution, that unless the Diet obeyed the mandates of the three Sovereigns, their capital would be put to the flames. By means of this and similar threats, the consent of the Diet was at length obtained, and the Polish nation published to the world that avowal (extorted on the rack) which for ever swept away the boundary lines of their most ill-used country. Several of the more noble among the Poles, heartsick at so mournful an occurrence, hastened to the Chamber where the King sat, and demanded, in the name of God, what he had done with the country which had been entrusted to him? The King, in his paroxysm of grief and bewilderment, rose from his seat, and, dashing his hat upon the ground, replied, "Gentlemen, I am weary of hearkening to you. The partition of our unhappy country is a consequence of your ambition, of your dissensions, and of your wrangling. It is to yourselves alone that you ought to attribute your misfortunes. As for me, if no more territory should be allowed to me than could be covered by this hat, I should still, in the eyes of Europe, be your lawful, though most unhappy, king."

By this first partition Poland lost nearly 5,000,000 inhabitants of which Russia acquired 1,600,000, Austria 2,205,000, and Prussia 860,000. The country usurped by Russia had for its limits the river Wolla, from its source to its junction with the Niemen and its junction as far as Rjeseka, where it empties itself into the Dnieper. Austria took possession of the whole of the left bank of the Vistula, from the salt mines to the mouth of Viroitz, the Palatinate of Belteh, and the greater part of Volhynia; and Prussia, of Ebbing, and the whole of that extensive district formerly known by the name of Polish Prussia.

Such is a brief sketch of the spoliation and first partition of Poland. On a future occasion we shall endeavour to present our readers with an account of the final and still more atrocious partition of that now extinct nation, whose strange destiny has excited, and still continues to excite so much controversy in all civilised countries.

VISIT TO ENGLAND OF THE EMPEROR AND EMPRESS OF THE FRENCH

(Continued from page 409.)

Syrie," burst forth from the bands with which each vessel was provided. The sun shone brightly at 10 a.m., when the squadron left Calais, and everything promised a short and successful cruise; but even in twenty miles of Channel navigation, taking place in an early summer day, there are mishaps and obstacles to which Imperial power must succumb. England has, besides her wooden walls, no stancher defenders than her impenetrable fogs, and one of the densest of these atmospheric protectors descended upon the water just as the squadron approached the English shore, as to give a gentle hint of the perils which a hostile invader of her shores must expect to meet with. The squadron was scattered like the fleet of Æneas, but our English Palinurus was at his post, and slowly and with the greatest care brought his precious charge safely into Dover. The voyage was, however, not without its "hair-breadth 'scapes," among which must be reckoned foremost a narrow chance of getting on shore at the North Foreland. However, the Imperial yacht at about one o'clock arrived safely at her destination. On sighting the Admiralty-pier, which was not until the *Pelican* was exceedingly close to the shore, the spectacle that met the eyes of the Emperor and Empress must have been exceedingly gratifying to both. We could not show them the immense military strength which oppressively pervades everything in France; but we could exhibit thousands upon thousands of happy and well-dressed people densely thronging every approach to the pier, and those who had tickets filling the temporary pier gallery which had been erected for their accommodation. We had, however, a very respectable guard ready, consisting of the Royal Bucks Militia, who had been under arms from an early hour in the morning, and looked exceedingly grave and contemplative in their novel but honourable position. Mr. Payne, the Mayor of Dover, was on the platform, attended by his stout burgesses; and, in another quarter, a brilliant group was formed by Prince Albert, Lord Alfred Paget, the French Ambassador, and her Excellency Countess Walewska. The patience of this distinguished party was most severely tried by a waiting period of an hour and a half, during which Madame Walewska presided with true French grace over a sort of miniature Court; her temporary throne being a camp stool, which some obliging cavalier had provided for her accommodation. Prince Albert curiously examined the militia shakos, which are a humanised modification of his own celebrated pattern; and occasionally gave an expressive shrug, that might be translated either into a wish that the visitors had arrived, or that the illustrious waiter upon wind and weather had been thoughtful enough to bring a great-coat to shield his gorgeous uniform from the spray with which an eastern breeze was ceaselessly sprinkling the pier. The "White Cliffs of Albion" looked exceedingly brown and shadowy, indicating pretty clearly that the poet had not made his celebrated apostrophe on a day similar to that chosen for the Imperial visit; the ship guns sounded with a muffled report through the fog; and the dismal fog-bells brought to the lady spectators unpleasant reminiscences of rough passages and seasickness. Time and tide wait, it is said, for no man; but man, however great, must wait for time and tide, so our illustrious Prince Consort had nothing for it but to wait patiently, and reflect approvingly on the eloquent and appropriate address which the Mayor and Corporation had presented to his Royal Highness in the early morning. But

Time and the hour sees out the longest day.

Patience had at length its reward; and the Imperial steamer, *Pelican*, loomed spectrally in the offing. The Imperial eagle spread over the quarter, the Royal and Imperial standards at the mast-heads, and the brilliant uniforms on deck, soon told that she bore the long-expected visitors; and a shout of welcome was raised all along the pier, was taken up in the harbour, and was re-echoed from the cliff, which must soon have set the Emperor's mind at ease as to the character of his reception on English ground. As the vessel neared the shore his Imperial Majesty could easily be distinguished, wearing the uniform of a General of Division, and the grand cordon of the Legion of Honour; and beside him stood the Empress, who was in truth an object of the most intense interest to the thousands, male and female, who lined the shore, impatient to bid her a cordial welcome. Her Majesty was most simply attired in a *chapeau de paille*, a grey *paletôt*, and—rejoice Caledonia—a tartan dress, of a quiet and unobtrusive pattern. We soon saw that the published prints did her Majesty no more than justice—the likeness being most striking, while the grace with which she acknowledged the repeated cheers from the shore completed the pleasing character of the first impression. Behind the Emperor and Empress stood Marshal Vaillant and about a dozen French officers, in brilliant uniforms; and on the paddle-box might be recognised Admiral the Viscomte de Chabannes, whose excellent English speech had made such a favourable impression at the Lord Mayor's Easter dinner. The Viscomte had the honour of commanding the Imperial yacht on this particular occasion, assisted by Captain Smithett, who-e efficient pilotage was rewarded in the sequel by an extraordinary mark of Imperial approbation. The light and graceful vessel was soon alongside the steps, the decorated gangway was run out, the cheering reached its climax, and in another moment Prince Albert might be seen handing the Empress on shore, with the combined dignity and grace of which his Royal Highness is so perfect an example. The Emperor followed alone—etiquette, it is presumed, preventing his Imperial Majesty offering his arm to the Countess Walewska, who was most graciously recognised by the Empress at the landing-place. The *dames d'honneur* followed, then the English and French Court functionaries; the whole party proceeding slowly, amid the most deafening cheers, to the Lo d Ward n Hotel, which had been previously magnificently decorated for this important event. Here a well-dressed crowd besieged the various entrances, but watch and ward was strictly kept, and the illustrious visitors ascended without ob-truction to the splendid apartments which had been prepared for their reception. A select few were admitted to the vestibule, amongst whom might be seen the great humourist, Mr. Thackeray, who, on being recognised peeping modestly through the glass-door, was at once invited to enter. As the Imperial party passed upstairs, the Empress seemed pale, as if from recent indisposition; but the Emperor appeared to be in the best health, and was most courteous and affable to everyone who approached him. Luncheon was obviously the next business; and one had been prepared of which the guests partook with great relish and satisfaction.

While the Royal and Imperial party were thus refreshing themselves above stairs, the ladies and gentlemen of the two Courts were similarly employed below; but the time so occupied was very short, as in a very few minutes it was announced that the Emperor would receive the Corporation address. For this purpose the large coffee-room was again called into requisition, and was soon filled with the Mayor, Town-council, and half-a-dozen other gentlemen, who, for great occasions like this, may be considered as honorary members of all the corporations of the United Kingdom. The Emperor stood on the dais, at the upper end of the room, and beside him stood the Empress, in her tartan dress; but, for the grey paletôt a magnificent visite of black lace had been substituted. A nearer view only confirmed the favourable impression made by her Majesty's appearance on board ship. Her stature is commanding, her figure fine and graceful, and her features quite of an Imperial style of beauty; a slightly pensive expression agreeably softens their marked Roman contour, and her Majesty's demeanour is entirely self-possessed and queenly. The Empress listened with marked attention to the address, recognised at once the complimentary allusions to herself, and exhibited throughout a lively emotion, and an evident appreciation of the solemnity and interest of the occasion. The Emperor also, ordinarily so impassive, was strongly moved, as might be detected by the nervous play of the nostril; and there was a tone of manly sincerity and friendship in his few words of reply which could at once be distinguished from the ordinary expressionless blandness of Royal responses. Every one in the room felt this; and even the august presence in which we all stood did not prevent a frequent and most emphatic "hear" at points in his Majesty's reply. As in the case of Prince Albert's address, the duty of reading the second document

THE IMPERIAL STATE BED AT WINDSOR CASTLE.

THE VISIT TO THE OPERA.

THE INVESTITURE OF THE EMPEROR OF THE FRENCH WITH THE ORDER OF THE GARTER, AT WINDSOR CASTLE.

FOREIGN AND COLONIAL NEWS.

FRANCE

(From our own Correspondent.)

PARIS, Thursday.

The safe return of the Emperor and Empress to Paris is a source of considerable relief to the pessimists, who were resolved to see in the visit to England a crowd of fantastic dangers, proceeding from the most improbable causes. All is now excitement in anticipation of the Queen's arrival, an event looked forward to with great interest and curiosity.

Il faut souffrir pour être beau is an adage Paris is now exemplifying the truth of. An order has gone forth that, to appear beautiful to the eyes of her Majesty and of assembled Europe, Paris is to have her face washed, painted, and otherwise adorned. Accordingly, woe to the passers-by! You sally forth on your own side of the street; your next neighbour's house is being scraped, white-washed, and plastered; and an *ouvrier* or small boy, in a lime-besprinkled blouse, warns you off the *trottoir* with a wave of his lath. You cross the street, and find your opposite neighbour's house is undergoing the same operation; and so on through every street to the place of your destination, where you arrive more or less dotted with paint and plaster, more or less blind with lime and dust, and considerably agitated from the various narrow escapes from being run over in your traversings, and the subsequent course you have been compelled to adopt, of walking in the middle of the street among the carriages. When the evil arrives at your own house, in addition to the service of danger and dirt you undergo in each outgoing and incoming, you know that, when your next quarter's rent comes due, your *propriétaire* will have added something to the already vastly increased sum you pay, to indemnify *him* for the misery *you* have endured.

The fact of the departure of the travelling and campaign furniture of the Emperor seems to put a stop to all doubts on the subject of the proposed expedition to the Crimea. His tent, with all the necessary accessories, has been dispatched under the care of a certain number of the most skilful *tapissiers* attached to the *garde meuble*, by the Lyons Railroad.

Most sincere regret has been felt in Paris by the series of misfortunes that has visited the family of M. Ducos, late Minister of Marine. Seized himself with the frightful malady which within the last two months has here made so many victims, putrid sore throat—coming in his case, in addition to inflammation of the veins—he soon expired; and was, within a few days followed by his twin children of two years old, both attacked by the same disease, which, in most of the instances where it has appeared, has proved fatal, and, being highly contagious, has seldom been content with one victim, in the houses where it finds entrance. The bodies of M. Ducos and of the second child have been embalmed, and are deposited, with that of the first, in the vaults of the Madeleine, there to remain till the funeral ceremony, after which they are to be conveyed to Bordeaux, to be interred in the family cemetery.

Fate seems to be really unsparing for the navy just at present; Admiral Mackau, and Vice-Admirals Cazy and Dupetit-Thouars, having all been visited with painful and alarming illnesses. It has been remarked also of late that apoplexy and madness have acquired a most distressing frequency: a single and fatal case of the former has just occurred in the person of Mdlle. Boudet, daughter of the Councillor of State, at the age of nineteen.

It is reported that the Generals Canrobert and Pélissier are shortly to be named Marshals; and that one of them is, on this occasion, to return to France. At the same time, adds the rumour, General Rolin, Adjutant-General of the Palace, is to receive a command in the Crimea.

The strictest orders have been issued at the Palais d'Industrie and of the Beaux Arts that none but the exhibitors are to be permitted to enter. Various details, however, descriptive of the mysterious splendours collected therein have transpired, especially with respect to the latter temple.

The life-size portrait of the Empress, surrounded by her *dames d'honneur*, by Winterhalter, is not yet quite completed; but is, nevertheless, to take the place kept open for it in the Exhibition. M. Ingres exhibits twenty pictures painted at various periods, M. Gudin as many as sixty, and other well-known painters a proportionate number—many of these having been already exhibited elsewhere. This is all very well for the established reputations, but what space remains for those whose reputations only want the occasion to be established? Great dissatisfaction is, as may be supposed, created by these arrangements, many highly meritorious works have, of necessity, been excluded, in order to carry them out.

The new addition to the Palais des Beaux-Arts, in the Avenue Montaigne, is nearly completed. It is destined to contain the tapestries of Gobelins and Beauvais, the Sèvres china, and a Chinese museum.

We learn, with a satisfaction which we doubt not our readers will join in, that M. Billault, Minister of the Interior, has refused the authorisation for the proposed establishment of bull fights during the period of the Exhibition, on the ground of its being opposed to the feelings and morals of the French nation

On the 30th instant is to be performed, at the church of St. Eustache, a magnificent musical ceremony, in honour of the inauguration of the Palais d'Industrie. This is a grand "Te Deum" by Hector Berlioz, directed by himself, with three choirs, orchestra, and organ, and *nine hundred and fifty* performers. Our English organist, Henry Smart, has come from London expressly to join this solemnity, and will, after the "Te Deum," execute various pieces of Handel, on a new organ by M. Ducroquet. At the end of the ceremony, to a grand march, composed by Berlioz, there will be presented at the altar the colours of the various nations, which will be blessed by the Curé of St. Eustache, and twenty ladies of different countries will collect from the visitors a sum destined to go to the benevolent institutions of the third arrondissement.

The Imperial Society of Horticulture is preparing an unusually magnificent exhibition, in the square of the Champs Elysées, behind the Elysée Napoléon. A Swiss chalet, a rustic cottage, a variety of fountains, aviaries, &c., will be added to the habitual attractions of plants and flowers in this fairy garden; where four greenhouses will contain the rarest and most delicate tropical plants, and nine tents the productions of more temperate climates. A handsome iron gate, in the style of the sixteenth century, will give entrance from the grand avenue of the Champs Elysées.

THE BALTIC FLEET.

On the 22nd inst. the fleet, that had arrived at Kiel on the 19th, was still lying quietly in the harbour, the vessels occupying the same position as they took up on first entering. On the 20th Admirals Dundas and Seymour went ashore to pay their respects to General Von Krogh, the military commander of the place, which attention was returned by the latter two days afterwards. At daybreak of the 21st the *Bulldog* left for Copenhagen, but without taking Admiral Dundas, who, it had been expected by many on board the *Bulldog*, would have gone up to Copenhagen to wait upon the King of Denmark, as Admiral Napier had done. The *Impérieuse* and *Euryalus*, on leaving Kiel lately, steered direct into the Baltic, and were followed afterwards by the smaller craft, *Arrogant*, *Amphion*, *Cossack*, *Sylvia*, &c. A flotilla of sixteen steamers, supposed to be the above advanced squadron, under Admiral Watson, was seen off Stolpmünde, on the Pomeranian coast, on the evening of the 18th instant, 25 miles out at sea. It seems understood that these sixteen vessels, with the vessels already on the blockade as long as the ice abounds in the Bay of Finland; and that, subsequently, they will be reinforced by vessels of the line, and will then have each a distinct beat assigned to them.

Private letters from Courland mention that, at the first news of the re-entrance of the English fleet into the Baltic, all vessels had been withdrawn from the small inland harbours Libau, which is supported solely by its trade as a forwarding port, which must now entirely cease, will suffer more than most other places. The concentration of troops in Courland, Lapland, and Estland continues; the garrisons of Revel, Narwa, and Riga are receiving considerable reinforcements.

THE BOMBARDMENT OF SEBASTOPOL.

In our last publication we were only able to give the telegraphic report that the bombardment had begun. Since then letters have arrived which give a number of interesting details regarding the progress of the operations for the first few days.

On the day previous to the commencement of the bombardment, which was Easter Sunday, the Protestant and Roman Catholic services of the army chaplains in the English Camp were most numerously attended. In the French Camp, also, the duties of religion were attended to in the morning; after which, with both French and English, the usual labours of a besieging force went forward, as on other days. An immense quantity of shot and shell was sent up, with one 13-inch mortar and one 84-pounder, both for the batteries on the right attack.

In the afternoon a message was sent down to the Sailors' Camp to tell off the men to their guns, and have everything in readiness to begin the final attack at daybreak. It was represented that one of the Sailors' Batteries still wanted three or four guns; but, in return to this statement, Lord Raglan replied that it was of no consequence, and that the batteries must all be ready to open next morning. At a late hour the troops detached to guard the trenches were ordered to take their rations cooked with them, to save the necessity of fires which would otherwise be incurred by men carrying them in the daytime. The ambulance-cars were also ordered to wait for wounded in the several ravines; and an order was sent down to Balaclava for 600 stretchers for wounded, which, with 200 extra tents for emergencies, were forwarded per rail.

Throughout the night there was very little firing on either side. Beyond an occasional gun to keep up the appearance of war, and take away the slight sense of security which sometimes exists in the trenches, all was quiet. All in the Allied Camps knew that the bombardment would commence at daybreak, and so all were full of regrets and forebodings over the change in the weather. It had, indeed, changed in a manner sufficiently severe to excite anxiety, if not mistrust, as to the result of the first day's operation. The wind blew a regular gale: the night was at once dark and misty, while the rain fell in such floods as almost to surpass every sound. Towards morning it was, if possible, still more unfavourable; and, in spite of the rain, the wind was sufficiently strong to leave in all but the most hopeful of the belief that would be able to share in the struggle of the day. At four o'clock a.m. all the officers who had leave were on the alert, looking up waterproofs and forgotten mufflers before setting out for Cathcart's-hill, to see our opening fire. At this hour nearly all, except the sentries, were asleep, nor was there anything whatever to denote that out of the most bloody struggles that ever disturbed the world, or defaced the annals of civilisation, was about to commence. A heavy mist hung over the sea, and partly over Sebastopol, while both were obscured, every now and then, by the clouds of rain which were driven before the wind. The north side was almost completely invisible, though the mouth of the harbour was clear, and a heavy sea running in broke in a wild line of breakers over the sunken ships. In Sebastopol itself everything was quiet and clean as usual. Where the head of the harbour could be seen two or three large boats seemed crossing it near the land, but no other signs of activity were visible, either in the water or in the town. It was now five o'clock; none of the clocks in Sebastopol could be heard to strike, as the wind was very strong and blowing up the harbour and across the town. Each moment the weather became thicker and more wet, so that in a few minutes hardly any of the town was visible. The grim line of batteries, however, remained well in view, though they also seemed as quiet as inside the walls. In the Malakoff a few soldiers could occasionally be distinguished in the embrasures, and a small party crossed now and then between it and the Mamelon, but this was all

Suddenly, at a quarter-past five o'clock a.m., a gun was fired from our right attack. In a second afterwards, running up and down the line—from the little mounds and batteries near Inkerman—from the broad commanding positions of Green-hill and Gordon's Batteries—from quiet picturesque ravines, where no one dreamt of guns lurking—high from the rear on steep and lofty ridges, and away down to the left where the French works stretch out—over low marshlands to Kamiesh—from every point of our lines came a hundred streaks of flame and masses of smoke. For a minute after there was silence, and then the great concussion came rumbling on, slowly mastering both wind and rain, and swelling into a roar that seemed to shake both heaven and earth. The shells and bullets of the first discharge made of themselves a perfect uproar, as they fell like an iron hail full upon the enemy's batteries. Some shot were short, and went bounding towards the works, scattering the earth like water. Some were too high, and passed clear over, hissing into the town; but the great mass were well aimed and true, and passed full into the embrasures, clearing all before them. The shells burst everywhere about like crackers, and the stunning explosion of the great mortars made themselves conspicuous over every other sound. The bombs screamed through the air, carrying death and destruction into the Mamelon and Malakoff. After this first tremendous volley each gun worked as it could, and a regular file fire of mortars and heavy guns commenced upon the place. The enemy appeared completely surprised. With the first awful salvo a general confusion was observed in their batteries. For three or four minutes not a gun replied—then the Mamelon fired three or four at once, and the Redan and Malakoff also began a slow irregular cannonade. The Flagstaff Battery was also quiet—not a single shell, but the great mass of the guns in all the Russian works were silent. Gradually, after a lapse of five or ten minutes, their fire extended; but, before half their ordnance was manned, ours had fired a dozen rounds, so that some of the enemy's guns were already dismounted and useless, and part all manning. It was nearly six o'clock before all their works were in full play, and then each battery, pelting against its assailant, fell to business in earnest. Our mortar batteries in the advanced works and in front of the picket house, with the new French batteries towards Inkerman, appeared to concentrate their fire upon the works round the Malakoff Tower and the Mamelon. Some of the French Inkerman works also fired heavily into the harbour and dockyard buildings. The right flank of Gordon's Battery was also directed against the Mamelon. This was on our right. The centre and left face of Gordon's Battery engaged the Redan—assisted by the new 68-pounder battery, on its left, the mortars in the advanced works, and the right fire of the Green hill Mound which engaged the Garden Battery. This was our centre. The centre and left of Green-hill opened on the barrack work, supported by a Sailors' Battery of heavy guns, and one side of the French right attack. The other side of the French works fought closely with some new batteries which the enemy have lately thrown up between and in advance of the Barrack and Flagstaff works. The French centre was close, quite close, to the Flagstaff Battery, and their left engaged the Quarantine and Mud Forts

About six p.m. the weather partially cleared, but the rain still fell in torrents. The advantage of the day's cannonade most decidedly remained with the Allies. The Mamelon was almost entirely silenced, and the Garden Battery quite so. The Malakoff appeared to have suffered much. Even the few stones which remained of its round tower were quite swept away, the earthwork much injured, and many of its guns silenced. The new Russian works north of the Mamelon seemed uninjured, as did also the Allied batteries opposed to them. The Redan seemed injured, though by no means in a way which lessened its resistance. The fire from this tremendous work still continued as hot as it had been in the morning. The French battery opposed to the Barrack was injured, as was also that opposed to the Flagstaff. Neither of these great Russian works appeared much hurt. On the extreme left the French were said to have done much damage to the right of the Flagstaff, and also to have half destroyed the Quarantine and Mud Forts

The fire of the Allied siege guns gradually ceased as night came on. The mortars, however, did not cease firing; all of them were ordered to maintain the bombardment by firing a shell every ten minutes throughout the night.

The bombardment continued without intermission throughout the night, and the enemy were consequently prevented repairing their damages. The practice of our mortars was perfect. Not a second passed without a 13-inch shell being thrown into the Malakoff and Mamelon, and at the close of Monday evening's fire the Malakoff was almost completely silenced; and next morning it replied to our cannonade with only two guns, which were dismounted at eight. For several hours after it did not fire a shot; indeed the Russian fire against the whole of their lines was much slackened. At about four o'clock, however, all the enemy's lines and batteries suddenly sprung into life and vigour. Volleys of from 100 to 150 guns were fired at once from the Redan, the Flagstaff, Barrack, Garden, and Malakoff Batteries; even the Mamelon, which all thought destroyed and untenable, fired five or six guns in rapid succession. Their shot ran in upon our works like hail. On every point along our line balls were to be seen bounding and plunging, and shells bursting like fireworks in the air. Never, perhaps, was such a concentrated and destructive cannonade witnessed since the commencement of the siege. All felt that, if it continued two or three hours, our works would be levelled with the dust; as, though both English and French kept up a terrific fire, the enemy, in spite of our utmost efforts, gave five guns in reply to our one. The rapidity and deafening uproar of the fire brought all who were at leisure to the front; and the oldest and most experienced artillery officers augured very unfavourably of our prospect of taking a fortress which could command such a fierce cannonade. Suddenly, and in the midst of such remarks, the enemy's batteries made a dead pause. For nearly a quarter of an hour not a gun was fired. The Allies kept up their bombardment; the French battered the Flagstaff and works to the left. Our shot ploughed into the Redan and Malakoff, and our 13-inch shells burst in regular succession in the centre of the Mamelon; but not five guns did the Russians give in reply. Nearly twenty minutes passed on their side in this state of unaccountable inactivity, when again suddenly the Redan and Flagstaff broke out in heavy volleys, and maintained them for some time. Our long guns ceased firing a little after seven, the enemy's about eight, and then both Russians and Allies resorted to their mortars. The fire of these latter was maintained all night. Every five minutes one of our 13-inch shells was dropped into the Mamelon; and, from the advanced work, at the same intervals, 10-inch were thrown into the Malakoff. The French directed their bombs into the Flagstaff, and our left attack threw them into the Redan. On the extreme left of all the French rocket battery sent their burning missiles in all directions, except into the town; the orders to spare that being still in full force. The enemy replied with mortars from the rear of Malakoff, the Redan, and Flagstaff works; but we were evidently two to one superior to them in such ordnance. This deficiency they occasionally compensated for by the use of their guns, which, when fired in volleys, were by no means to be treated with.

The advantage of the second day's fire was evidently with the Allies. Whatever was the reason the enemy most certainly did not fight with their usual vigour. We had not destroyed their works—their guns were still good and serviceable, yet still they continued silent under our cannonade during the greater part of the day. The conduct of the enemy was, on the whole, so extraordinary that even the wildest conjectures to account for it gained temporary credit in the English Camp.

According to some the garrison was not sufficient to man all the defences, while others ascribed it to the want of ammunition, which was certainly less probable, as up to the moment of our opening fire the enemy had wasted it in the most reckless manner, and as if their stores of it were inexhaustible.

At daybreak on the 11th the fire was resumed by the Allies and Russians, and for some time with equal vigour on both sides. In spite of the fire of our mortars, the enemy during the past night had managed to repair much of the damage which the Mamelon sustained, and also the works of the Flagstaff Battery opposed to the French. For the first hour of hostilities all the Russian works were fought with vigour and determination; but after that time (about half-past six) the guns round the Malakoff and Mamelon again ceased their cannonade, and from that period, until late in the day, seemed perfectly indifferent to our fire. In the evening, between five and six o'clock, they sent forth a tremendous volley from all parts of their defences. This was done, probably, as a gentle hint that their works were by no means in that state of dilapidation when a general assault would be either easy or safe.

During the whole of the night the fire of our mortars was incessant, and on the morning of the 12th the long guns recommenced with renewed energy; but, in spite of our bombardment, the enemy had evidently been again busy during the night, and part of the Flagstaff and nearly all the Mamelon embrasures were repaired. In the former, apparently, no new guns had been mounted, but in the latter were two. The fire was much the same as during the previous day, viz., a well-sustained cannonade from the Allies throughout, while the enemy replying very slackly, except from the Flagstaff and Redan. Occasionally nearly all their works gave forth tremendous volleys, almost simultaneously; but their spirit, though terrific, never lasted above half an hour, after which two-thirds of their line relapsed into comparative silence. The fighting was principally between the Flagstaff and French batteries, and the Redan and our right and left attacks. The Flagstaff each hour seemed to suffer more and more under the incessant cannonade of the French, and towards evening its fire was considerably slackened. Its fire was not now more than one half of that which it maintained on the morning of the 9th.

The night of the 12th inst. was wild and unfavourable, with continued heavy rain, yet still our bombardment never slackened for a moment. The *Royalist* was moved off Sebastopol at a long range, also assisted in the fire, by casting loose her Lancaster guns, and throwing shells into the works the whole night. She also fired about fifty Congreve rockets into the works opposed to the French

On the morning of the 13th, when our batteries recommenced, the effects of our assault were still more apparent. The fire of the Flagstaff was evidently slack, even more markedly so than on the previous evening. It scarcely replied one gun to the French three. The devastating traces of the shot were also more apparent. Not only were the lower tier of guns quite destroyed, but the upper seemed in a fair way of following them. Two or three of them were already dismounted, and the earth of the parapet so scarred and torn that the best of the ordnance appeared as if it might be cast out between the loose piles of earth. The Barrack work was also suffering much, and nearly one-third of its embrasures were empty.

A new battery which the English had formed in the advanced trench was completed and opened this morning. The tremendous volley with which it commenced took the Russians by surprise. Each day they had been accustomed to see our 10-inch mortars fire from the same part of our works, and doubtless for that very reason never anticipated further molestation. The sudden and continued fire, therefore, of eight enormous guns, in addition to their old friends the mortars, was a complete and unpleasant surprise. At the first discharge one of their guns was dismounted and another injured, and their artillerymen either ran away or concealed themselves, as they were not to be seen. Only one gun was fired in reply, so that for five or ten minutes our battery had nothing to do but blaze away without fear of opposition. After that time the enemy appeared to take heart, and several guns were fired, but it was fully half an hour before they had made anything like a vigorous defence. Then, indeed, the fire they maintained showed that very many of the embrasures which were supposed to be silenced had merely had their guns withdrawn, and these they brought forward and well manned. For about an hour the enemy fought with great determination; but from the first they had no chance of being able to maintain it long. As soon as it was seen that the Malakoff works were determined to engage our advanced battery, one face of Gordon's Battery, mounting ten guns and two mortars, was directed upon it, and the 13-inch mortar battery at the picket-house also threw its missiles into the Round Tower. With these, and with the assistance of the four 10-inch mortars near the advanced work, and several cohorns throwing 32-lb shell, a perfect hail was poured into our old enemy. For a time it was well fought; but our immense shot dismounted the guns or cut up the earthworks, while the shell dropping over burst continually among its defenders.

Towards eight o'clock its fire had slackened considerably, and before nine the enemy for that time gave up the contest as hopeless, and such guns as could still be used were withdrawn from the embrasures, and our batteries left to do their worst upon the earthworks. During this battery fight the Mamelon, as usual, revived from its state of inaction, and, to the astonishment of every one, put forward five guns and fired them continually. The demolition, however, did little good beyond drawing on it, when the Malakoff was quiet, the fire of the mortar battery of the picket-house, and under these tremendous bombs it was soon reduced to its former inaction. Our advanced work then continued to fire at the Malakoff, which never offered any serious resistance for the remainder of the day. Every twenty minutes or so two or three of its guns were run forward and fired, but beyond this it was quiet, and seemed to have no more than twenty or thirty men in it.

The daily casualties have been heaviest among the naval brigade, which, though less than a sixth of the force in the batteries, furnishes rather over one-third of our total loss. The average each day has been about 60 killed and wounded, and about 100 French. The wounded are now in infinitely better taken care of than at the former bombardment. The ambulances remain in shallow ravines behind the batteries, in which the wounded are conveyed to head-quarters, and there placed upon the railway-trucks and sent down easily to Balaclava. The cases of amputation and severe wounds remain there in hospital; the others are immediately embarked on board ship.

Our bombardment continued throughout the whole of Friday night (the 13th) with much effect, and next morning the guns again recommenced. The fire of the enemy was slackening more and more each day. There was a slight sortie on the night of the 13th upon the French, who were sapping up towards the Flagstaff. It was instantly repulsed, with a loss of ten or twelve killed to the Russians.

The telegraphic despatches bring down the news from Sebastopol to the 18th inst., but the accounts are very meagre. The French had carried a series of ambuscades in front of the Central Tower. They had also sprung a mine in front of the Flagstaff Battery, which had given them a new parallel, and was successfully joined to the others. From the 12th to the 14th the loss of the French had only been 300 men.

Prince Gortschakoff, in a despatch dated the 19th, states that the fire of the enemy had not been so strong on the 16th, 17th, and 18th, as it was previously.

As regards the movements of the Russian army little information is given. A considerable force of from 8000 to 10,000 men made their ap-

pearance on the 12th on the heights of the Woronzow-road, opposite Balaclava, and it was expected that they would sooner or later strive to effect a diversion by attacking that place. They will find, however, that the place is not so weak as it was formerly. Omer Pacha has moved down there with 15,000 of the Turkish troops recently arrived at Kamiesch. The Turks, who are fine troops, are the same fellows who gave a good specimen of their courage at Eupatoria. At Kadikoi, the weakest garrisoned portion of our lines near Balaclava, 8000 have been posted behind strong breastworks, which the Turks have still further defended by the addition of 30 pieces of artillery. These ought to secure our position at that point, if it is in the power of earthworks and guns to do it.

DESPATCHES FROM LORD RAGLAN.

War Department, April 24, 1855

Lord Panmure has this day received a despatch and its enclosures, of which the following are copies, addressed to his Lordship by Field Marshal the Lord Raglan, G.C.B. :—

Before Sebastopol, April 10, 1855.

My Lord,—In accordance with the arrangement made between General Canrobert and myself, the batteries of the French and English armies opened upon Sebastopol soon after daylight yesterday morning.

The weather was favourable, a supposition which each man had fallen in the course of the night, and it continued during the day, accompanied by a tempestuous wind, and a heavy mist which obscured everything; and rendered it impossible to ascertain with any degree of accuracy the effect of the fire, which has been continued with little or no interruption from the commencement, and has been superior to that of the enemy, who were evidently taken by surprise, and, except upon the extreme left, did not respond to the attack for nearly half an hour.

The morning has been hazy, and for some time there was a drizzling rain; but it is clearing this afternoon, and there is again a prospect of fine weather.

The country yesterday was covered with water, and the ground was again very deep. The trenches were likewise extremely muddy, and their condition added greatly to the labours of the men employed in the batteries, who consisted chiefly of sailors, artillerymen, and sappers.

They conducted their duties admirably, and I am sorry to say that the two former, particularly the Navy, sustained considerable loss.

I have not yet received the returns of the casualties beyond the 9th inst., which are herewith enclosed; but the death of Lieutenant Twyford, of the Royal Navy,—a most promising officer, and greatly respected by all—has been notified to me; and Captain Lord John Hay—who has taken a most active part in the gallant and distinguished services of the Naval Brigade—was wounded almost at the very moment, I believe by the same shot. I hope the injury he has received is not very serious; but the loss of his assistance, even for a time, is much to be regretted.

The Russians have not shown themselves in any force in front of Balaclava.

The Lord Panmure, &c. I have, &c., RAGLAN.

NOMINAL RETURN OF NON-COMMISSIONED OFFICERS AND PRIVATES KILLED AND WOUNDED, FROM 9TH TO 8TH APRIL, INCLUSIVE

KILLED.—4th Foot: Private Charles Ship. 44th: Private John Blackburn. 97th: George Keefe.

WOUNDED. 4th Foot: Privates Daniel Cockerton, Thomas Golding, William Norman, slightly. 18th: Private Joseph Hales, slightly. 34th: Private George Sheppard, severely. 34th: Privates Patrick M'Namara, severely; Wm. Stevens, slightly. 39th: Private William Morgan, slightly. 48th: Private John Jones, severely. 88th: General William Palmer. 13th Lancers: Corporal Matthew Barnes, severely. 7th Hussars: George Evans, severely. Royal Artillery: Gunner and Driver James Flood and Driver Davis, severely. Royal Sappers and Miners: Lance-Corporal J. Veal, slightly.

J. B. BUCKNALL EYRE COMPT, Adjutant-General

A RETURN OF CASUALTIES IN THE ROYAL NAVAL BRIGADE BY THE 9TH APRIL.

KILLED.—Lieutenant Samuel Twyford, *London*; John Shenvick, sail-maker, *Wasp*, Wilham Miller, A.B. *Queen*; James Good, Ord., *Queen*; John Bradwell, A.B., *Leander*; Daniel Albion, *A.B., Leander*; Joseph Burrows, A.B., *Queen*, Thomas Dadgeon, *A.B., Queen*.

WOUNDED.—Captain Lord John Hay, slightly; Robert Gardner, *A.B., London*, fatally (since dead); William Jones, sailmaker's crew, *Wasp*, slightly; John Fry, Ord., *London*, severely; Samuel Fisher, Ord., *London*, severely; George Ellis, Ord., *Queen*, severely; Charles Stammers, A.B., *Queen*, severely; Charles Gray, Ord., *Leander*, slightly; Edward Hoskins, *Leander*, slightly; Henry Adding, Captain Mast, *London*, slightly.

CONTUSED.—Henry Lenoeck, A.B., *Queen*, severely; James Newby, Ord., *Leander*, severely; Frank Wadham, Ord., *Queen*, slightly.

STEPHEN LUSHINGTON, Captain Commanding Naval Brigade

War Department, April 26, 1855

Lord Panmure has this day received a despatch and its enclosures, of which the following are copies, addressed to his Lordship by Field Marshal the Lord Raglan, G.C.B. :—

Before Sebastopol, April 14, 1855

My Lord,—Since I wrote to your Lordship on the 10th inst., a steady and heavy fire upon the works of the enemy has been maintained from all the batteries.

The fire of the British artillery, chiefly directed against the Garden Batteries, the Barrack Battery, the Redan, the Malakoff Tower, and the Mamelon, has been most effective, and the enemy's works have suffered very considerably, although they have, as usual, made a good use of the night to repair damages, notwithstanding that the vertical fire has been continued throughout the twenty-four hours.

The practice both of the Naval Brigade and the Artillery has been excellent. The casualties have not been very numerous; but the loss has fallen heavily upon the sailors, as your Lordship will see by the accompanying returns; and the Royal Navy has to deplore the death of Lieut Douglas, who had served with great credit and zeal during the whole period of the siege.

Lieutenants Urmston and D'Arth, Royal Navy, and Steele, Royal Marine Artillery—all valuable officers—have been wounded.

The Royal Artillery has also to lament the death of Lieutenant Lace, who was an officer of much promise; and Lieutenants Sinclair and L'Estrange are among the wounded. The former has sustained several severe injuries, but I am happy to add that there is every hope of his recovery. They are both highly meritorious officers.

Captain Carlton, of the Royal Engineers—who had, in the course of the protracted operations before Sebastopol, rendered most important service—has also received a wound, which will, I fear, detain him from duty for a very considerable time.

Our batteries and parapets continue to stand remarkably well, notwithstanding the very unfavourable state of the weather

The enemy's fire has been comparatively slack, but the practice good; and, owing to their having ascertained the ranges of our batteries with great nicety, several guns have been disabled in both the right and left attacks

Towards the Tchernaya nothing important has been observed; but small bodies of men (from 150 to 500) have been seen, with a heavy gun and some cavalry, moving during the night along the heights towards Mackenzie's Farm road, near which it has been placed in position

Although the duties have been unusually severe and arduous both by day and night during the week, they have been carried out with the utmost cheerfulness and zeal, reflecting much credit both on officers and men.

The submarine telegraph has been safely brought to the Monastery from Cape Kelegra, and, as soon as it is established at the former place, the engineers will proceed to convey it from the latter to the immediate neighbourhood of Varna, where I hope it will be in a state to act in a week or ten days from this time

The first division of the 10th Hussars arrived this day at Balaclava.

The Lord Panmure, &c., &c. I have, &c., RAGLAN.

RETURNS OF KILLED AND WOUNDED.

No. 1. Return of Officers who have been Killed from the 9th to the 12th April.—Royal Artillery: Capt. R. Lace.

No. 2. Return of Officers who have been Wounded from the 9th to the 12th April.—Royal Engineers: Capt. J. M. Carlton, slightly. Artillery: Capt. C. Dyer, severely; Lieut. Sinclair, severely; Lieut. L'Estrange, slightly.

No. 3. Return of Non-Commissioned Officers and Privates Killed from the 9th to the 12th April.—Royal Engineers and Drivers Archill, Benjamin, William Hannah, John Wren. 17th: Private Thomas Dunn. 34th: Private William Geddis. 97th: Private Patrick Tanner. Royal Artillery: Colour-Serg. George Fraser, Gunner and Driver Henry Kendall. Royal Sappers and Miners: Corporal A. Murray. 28th Foot: Private Michael Dynan. 30th: Private David Carey. 49th: Private Michael Mahoney. Royal Artillery: Gunners and Drivers James McIntyre and Michael Callaghan, Bombadier Marshall Brown, Gunner Robert Little. Engineers: Private Michael Devitt, Privates George Brown, John Hall, William Evans, James Haynes.

No. 4. Return of Non-commissioned Officers and Privates Wounded from the 9th to the 12th April.—7th Foot: Private Joseph Hales, slightly. 2nd Battalion Rifle Brigade: Private Patrick M'Namara, severely. 34th: Private Samuel Stevenson, severely. 97th: Private William Hodder, severely. Royal Artillery: Gunners and Drivers Archill, Benjamin, William Hannah, John Wren, slightly; Gunner and Driver Thomas Dunn, severely; Gunner and Driver William Geddis, slightly. Royal Sappers and Miners: Corporal A. Murray, slightly; Sapper and Miner Patrick Tanner, severely. Royal Artillery: Colour-Serg. George Fraser, Gunner and Driver Henry Kendall. Royal Sappers and Miners: Corporal A. Murray. 28th Foot: Private Michael Dynan. 30th: Private David Carey. 49th: Private Michael Mahoney. Royal Artillery: Gunners and Drivers James McIntyre and Michael Callaghan, Bombadier Marshall Brown, Gunner Robert Little. Engineers: Private Michael Devitt, Privates George Brown, John Hall, William Evans, James Haynes.

No. 5. Return of Non-commissioned Officers and Privates Wounded from the 9th to the 12th April.—7th Foot: Private Joseph Hales, slightly. 2nd Battalion Rifle Brigade: Private Patrick M'Namara, severely. 34th: Private Samuel Stevenson, severely. 97th: Private William Hodder, severely. Royal Artillery: Gunners and Drivers Archill, Benjamin, William Hannah, John Wren, slightly; Gunner and Driver Thomas Dunn, severely; Gunner and Driver William Geddis, slightly. Royal Sappers and Miners: Corporal A. Murray, slightly; Sapper and Miner Patrick Tanner, severely. Royal Artillery: Colour-Serg. George Fraser, Gunner and Driver Henry Kendall, severely. Royal Sappers and Miners: Corporal A. Murray. 28th Foot: Private Michael Dynan. 30th: Private David Carey. 49th: Private Michael Mahoney. Royal Artillery: Gunners and Drivers James McIntyre and Michael Callaghan, Bombadier Marshall Brown, Gunner Robert Little. Engineers: Private Michael Devitt, Privates George Brown, John Hall, William Evans, James Haynes.

Supplementary Nominal Return of Officers Wounded from the 9th to 12th April.—Royal Artillery: Lieut. Sinclair and P. W. L'Estrange, severely.

Supplementary Nominal Return of Non-commissioned Officers and Privates Killed from the 9th to 12th April.—Royal Artillery: Gunner John Polson.

Supplementary Nominal Return of Non-commissioned Officers and Privates Wounded from the 9th to 12th April.—Royal Artillery: Gunner David Johnston, slightly; Corporal John Myers, slightly; Gunners Adam Smith, Jeremiah Lynch, and Richard Oliver, severely; William Martin, James Brown, William Reed, and James Hornsby, Robert Hale, Michael Burke, and Waldron Newington, slightly.

A Return of Officers, Non-commissioned Officers, Seamen, Royal Marines, and Soldiers, Wounded on the 9th and 10th April.—Killed: Lieutenant Alden; Lieutenant Twyford, *London*; John Shenvick, sail-maker, *Wasp*; Daniel Good, Ord., *Queen*; John Bradwell, A.B., *Leander*; Daniel Albion, A.B., *Leander*; Joseph Burrows, A.B., *Queen*; Thomas Dadgeon, A.B., *Queen*.

Wounded: Captain Lord John Hay, slightly; Robert Gardner, A.B., *London*, fatally (since dead); William Jones, sailmaker's crew, *Wasp*, slightly; John Fry, Ord., *London*, severely; Samuel Fisher, Ord., *London*, severely; George Ellis, Ord., *Queen*, severely; Charles Stammers, A.B., *Queen*, severely; Charles Gray, Ord., *Leander*, slightly; Edward Hoskins, *Leander*, slightly; Henry Adding, Captain Mast, *London*, slightly.

Contused: Henry Lenoeck, A.B., *Queen*, severely; James Newby, Ord., *Leander*, severely; Frank Wadham, Ord., *Queen*, slightly.

Leander, Henry Golding, captain mast, Leader; Captain Lord John Hay, Wasp, slightly. Contused: Henry Lenoeck, A.B., Queen, Jas Newby, Ord., Leander, severely; Frank Wadham, Ord., Queen, slightly.

Killed.—Leander: Charles McLlan, A.B., Leander, William Pawley, A.B., Leander Wounded: Leonard Beckler, A.B., London, mortally (since dead); Robert Wells, A.B., Leander, slightly; James Smedley, gunner's mate, Leander, slightly; Mr Richard Rowe, gunner, Leander, slight; y; William Houltram, Ord., Wasp, slightly; William Pepper, A.B., Wasp, slightly: George Seymour, A.B., Leander, slightly Contusi: Michael Kennedy, Ord., Leander, slightly.

April 14. Killed: Jas. Stacey, ord., London; Stephen Turner, A.B., Wasp; Godfrey Malone, A.B., Wm Lawson, A.B., Leander Wounded: John Davidson, A.B., Nicholas Mullin, ord., mortally since dead, Queen, Roger O Brien, A.B., Queen, dangerously; Francis Dawkins, ord., Leander; Robert, captain forecastle, Leander, Charles Huxtable, A.B., Albion, severely; William Wallace, ord., Leander; Lieutenant Steele, R.M.A. Leander; Peter O Donegue, captain forctop, Leander; Thomas Hargreave, Gunner, R.M.A., Wasp; Lieut. Urmston, Queen; William Pierce, ord., Queen; William Meek, A.B., Leander; Sylvester Burrell, quartermaster, Leander, Wm. Bradley, ord., Queen; George Sherwood, ord., Wasp; Charles Anderson, A.B., Wasp; Charles Martin, A.B., Leander, slightly

15th April Killed: Lieut. W. K. Douglas, Queen, William Sembery, Ord., Queen Wounded, John McLellan, Ord., Queen, dangerously; John Glanville, Ord., Queen; Thomas Corbridge, A.B., Queen; Peter Bracy, A.B., Leander; Thomas Noble, A.B., Leander; and William Hawkins, Queen's cook; Richard Oliver, Ord., Queen Edward Smith, A.B., Queen Ed. Sure, Ord., Queen; Joseph Conway, Ord., Queen; Robert Dye, Ord., London; Hall & Evans, Ord., London; Daniel Hawkins, A.B., Leander; Isaac Brocking, Ord., Queen; William Mowbury, ord., Leander; Lieutenant Steele, R.M.A. [illegible] A.B. Queen slightly contused, Fernando Chatworthy, ord., Queen, Robert Long, ord., Leander, Alexander Ord, London; William Rollings, A.B., Queen, Charles Rose, A.B., Leander; John Lacey, Ord., Queen; Richard Gorsuch, captain forctop, Queen, John White, captain main-top, Queen; Joseph Straley, R.M.A., Wasp, slightly

16th April—Wounded: William White, surgeon's mate, Wasp, severely John Moss, Ord., Queen, William Pepper, A.B., Rodney, William Rollings, Ord., Albion, Henry Rose, A.B., Leander, and Lieutenant D'Arth, London, slightly Contused: James Butler, ord., London, slightly

DESPATCH FROM SIR E LYONS.

Admiralty, April 26.

A despatch, of which the following is a copy, has been received from Rear-Admiral Sir Edmund Lyons, Bart., G.C.B., Commander-in-Chief of her Majesty's ships and vessels in the Mediterranean and Black Sea: —

PROCEEDINGS OF NAVAL BRIGADE.

Royal Albert, off Sebastopol, April 13.

Sir,—My letter of the 10th inst., No 284, will have informed the Lords Commissioners of the Admiralty that the siege batteries before Sebastopol reopened their fire on the 9th instant.

I grieve to say that the casualties have been severe, though not, perhaps, more than might have been expected, considering the number of guns which are manned by seamen. Lists of the casualties on each day are enclosed for the information of their Lordships; and I have to lament the fall of two gallant and promising young officers, Lieutenant Samuel Twyford, of the *London*, and Lieutenant W. H. Douglas, of the *Queen*. Captain Lord John Hay and Lieutenant Urmston, of the *Queen*, have been wounded, though not severely.

The services of the officers and seamen of the Naval Brigade have been invaluable.

I have, &c.,

The Right Hon. Sir E. LYONS, Rear-Admiral and Commander-in-Chief.

To the Secretary of the Admiralty, London.

AMERICA.

The steam-ship *Asia*, which sailed from New York on the 10th instant, arrived at Liverpool on Sunday.

Affairs between the United States and Cuba begin to assume a serious aspect. The *New York Times* announces, upon the authority of its Washington correspondent, that President Pierce is determined to push matters to extremities; and that with this view a fleet has been directed to cruise in the track of American steamers crossing the Gulf, with orders to stop any Spanish vessel which shall dare to repeat upon the high seas the outrages imposed upon the *El Dorado*, the *Daniel Webster*, and the *Illinois*. The *Times* remarks:—"The measure is an extreme one; but we misunderstand the popular heart if it does not thoroughly approve and sustain it. True, Spain is weak and we are strong; but her imbecility gives her no licence for insolence, notwithstanding her conduct of late years has indicated a firm faith in such a right."

The *New York Herald* announces that the sloop of war *Jamestown* had sailed for Havana. The coast of Africa is understood to be her ultimate destination; but it is supposed that she has been ordered to touch at Havana to look after the Spanish cruisers that have recently overhauled our mail steamers.

The American Government have ordered three officers of distinction of the United States army to proceed to Sebastopol, and view the siege operations.

METROPOLITAN NEWS.

Note.—The sign + denotes above the average, and the sign — below the average.

The reading of the barometer increased from 30.14 in. at the beginning of the week to 30.47 in. by the 21st; decreased to 30.43 in. by the afternoon of the same day; increased to 30.49 in. by the 22nd; decreased to 30.10 in. by the 25th; increased to 30.22 in. by the 26th; and decreased to 30.17 in. by the end of the week. The mean for the week, at the height of 82 feet above the level of the sea, was 30.264 inches.

The mean temperature of the week was 45.0°, being 2.7° below the average of thirty-eight years.

The range of temperature during the week was 39.8°, being the difference between the highest and lowest readings of the thermometer on the 24th.

The mean daily range of temperature during the week was 25.8°. The greatest was 40° on the 24th, and the least 12° on the 20th.

The weather throughout the week was fine, but cold, and the sky at times was free from cloud.

Lewisham, April 27, 1855. JAMES GLAISHER.

HEALTH OF LONDON. Within the week ending April 21 the births of 816 boys and of 872 girls were registered within the metropolitan districts. The average number for the six corresponding weeks of the year for the preceding ten years was 744 males and 728 females. The number of deaths registered within the same week was 1087—a number less than the average for the same week by 81

PRESERVATION OF LIFE FROM SHIPWRECK. On Thursday the thirty-first anniversary of the Royal National Life-boat Institution was held at the London Tavern: Admiral the Duke of Northumberland, K.G., President of the Society, in the chair. He was supported by a most respectable and influential company. Mr. Lewis read the annual report, which stated that thirteen additional life-boat stations had been brought into connection with the institution during the past year, besides many life-boats built in the same period by the society, making a total of fifty life-boats under the direction of the society. The total number of lives rescued from shipwreck during the past year through the direct agency of the life-boats of the society was 172; in addition to which the institution has granted rewards amounting to £310 for saving the lives of 223 other wrecked persons by various life-boats and other means, besides many silver medals and other honorary awards. The total number of persons saved from shipwreck since the first establishment of the institution in 1824, through the instrumentality of its life-boats and other means, was 9222. It appeared that the total income of the society during the past year was £6,217; while its expenditure on life-boats, &c., was £5372. Various resolutions were passed urging the necessity for the best exertions to augment the income of the society; and, after a vote of thanks had been passed to the chairman, the proceedings closed

THE THEATRES.

DRURY-LANE.—The artistes from the Théâtre de la Gaîté, in the celebrated piece "Les Cosaques," commenced on Saturday an engagement for six nights, appearing in their original characters. Notwithstanding an extraordinary run of two hundred nights, the piece is simply one of circumstance, and not of dramatic pretension. The Russian occupation of Champagne, in 1814, is the subject; the Cossacks being depicted as the oppressors of the French. An *emeute* in a *café chantant* is the main incident; a barricade is made, and the Muscovites are beaten. This scene, well managed, was loudly applauded. In the second act, a ballet-action was made to it; English soldiers being introduced in aid of the French, and as firing on the Russians. The victory being obtained, the Allied forces fraternised in due form, the band playing "God Save the Queen," "Rule Britannia," and "Partant pour la Syrie." "Les Cosaques" is the production of MM. Alphonse Arnault and Louis Judicis, and was first acted on the 24th of November, 1853. A veteran sergeant, *Durieux*, admirably impersonated by M. Paul Menier, is very amusing, from the disguises assumed, and the constant stiffness which always denotes the wearer. In contrast with this part is that of *Jean Pinet*, a provincial soldier, his companion, which, in the representation of M. Alexandre, is sufficiently comic to be rendered highly exciting. The company includes some names that are celebrated—Mesdames Laubadin and Lemoine, with M. Gouzet. The audience was numerous, and the *troupe* very successful.

NOTES OF THE WEEK.

THE plot thickens with a vengeance—the Vienna Conference is adjourned *sine die*, and the bombardment of Sebastopol still continues, up to the last accounts, without, as yet, any decisive success. Four hundred heavy cannon, more than one hundred mortars—twenty-eight of which are of the largest calibre existing, calculated to throw shells thirteen inches in diameter—hurl ceaselessly, day and night, an iron hail against the forts and towers of the city. One would fancy that a week of this work would make an impression on the rock of Gibraltar; yet the earthen ramparts of Sebastopol have endured it for no less a period, without being seriously damaged. As, however, it appears that the artillery of the Allies is decidedly superior to that of the Russians, it seems clear that only three causes can prevent the ultimate success of the former, at least as far as the south side of the town is concerned. Continual dropping, we are told, will wear away a stone; and when the drops are shot and shell there must be a limit, somewhere, even to the endurance of this stubborn Crimean fortress. The three things that may prevent success are—failure of ammunition; the giving in of the guns themselves from the amount of work laid upon them; and, lastly, though not likely, a successful attack by the enemy on our own position. There is one thing (among many) that I have never been able to understand in our conduct of this great siege, and that is, why we are not now in a position to take Sebastopol to a certainty. I will explain. I suppose it is not to be denied that a cannon shot, fired from a proper distance, must do some mischief to the strongest fortress. A heavy shell does more, with the advantage that the longer the range the greater are its powers of destruction. Now we hear that the Allies possess twenty-eight of the heaviest class of mortar—that which throws a shell weighing nearly 2 cwt. four thousand yards, with an elevation of the same amount. The effect of the mere weight of such a mass of iron descending in a parabola from a height of two miles would, we so hurry itself in a hard-paved road some six or eight yards. Now, suppose that, instead of twenty-eight of these agreeable instruments, we had five hundred of them. I should like to know how many discharges of such a battery the Malakoff Tower (now understood to be the key of the Russian position) would stand! Is it to be believed that in the last six months the manufacturing industry of the country could not have made five hundred such mortars that the shipping industry could not have carried them to the Crimea—or that now the railway could not carry them up from Balaclava to the trenches?

Exercise is necessary to the well-being of quadruped as well as biped nature. Even the artificial existence of your wife's or daughter's pets, Pompey and Fido—darlings principally made up of nose, ears, and eyes—is menaced by dropsy or apoplexy unless they can get an occasional airing. One day having been taken out for a run in the Park, Fido is missing. That decent-looking man in a fustian jacket, beneath whose carpenter's apron the afflicted beauty is gasping, might tell how the loss occurred. You, Paterfamilias, are not perhaps particularly sorry; but, the female part of your family being of a different opinion, you well know that there is not likely to be much peace in the establishment till Fido is recovered or forgotten, as the case may be. You, therefore, knowing that the well-known Mr. Bishop of Bond-street has what the French call a *specialité* for recovering lost dogs, betake yourself to his shop, explain the matter, and within a few days, at the expense of certain coins, Fido, considerably thinner and altogether improved in health by his forced sojourn in the supposed carpenter's garret, is restored to his mistress. This is what you would have done up to last Tuesday, but by that day no any more. On that day the law, speaking by the voice of Mr. Bingham, at Marlborough-street police-court, warned Mr. Bishop in unmistakable language to leave henceforth stolen dogs to their fate. Certainly, when the magistrate told Mr. Bishop that the system of recovering stolen dogs "was a practice fraught with mischief, and tending to encourage the offence which the Legislature has sought to suppress by an Act, in the introduction of which he himself was mainly concerned," he said merely the truth. Theft is increased by every facility allowed to make a profit by it. However, in this case, the magistrate's decision is likely to go hard with the owners of pet dogs; there is little doubt that they will be stolen just as heretofore, but, instead of being recoverable for a moderate amercement, they will be sent out of the country—to France, Holland, or Belgium, where the demand for such articles is brisk.

The Crimean Committee again. This week we have the Duke of Newcastle's evidence, given with a frankness, an absence of anything like fencing with questions, and an oblivion of "red tape," which, were circumstances less grave, would disarm criticism. No man who reads the Duke's very gentlemanlike avowals can doubt that he was, as War Minister, a hardworking, conscientious, intelligent public servant—one, too, by no means wedded to official routine, but desirous to get information from every possible source, and to act upon it to the best of his most small ability. But the "situation" was too much for him—the tools with which he worked were, like the Ordnance pickaxes, of bad materials, and badly put together; the steel, determined man was wanted, one with a brain and nerves of iron, a sort of administrative Martin Luther; and it is no disparagement to the Duke to say he is not such a man. Yet it is only fair to ask who would have more worthily filled the post. At least the Duke of Newcastle had not the post.

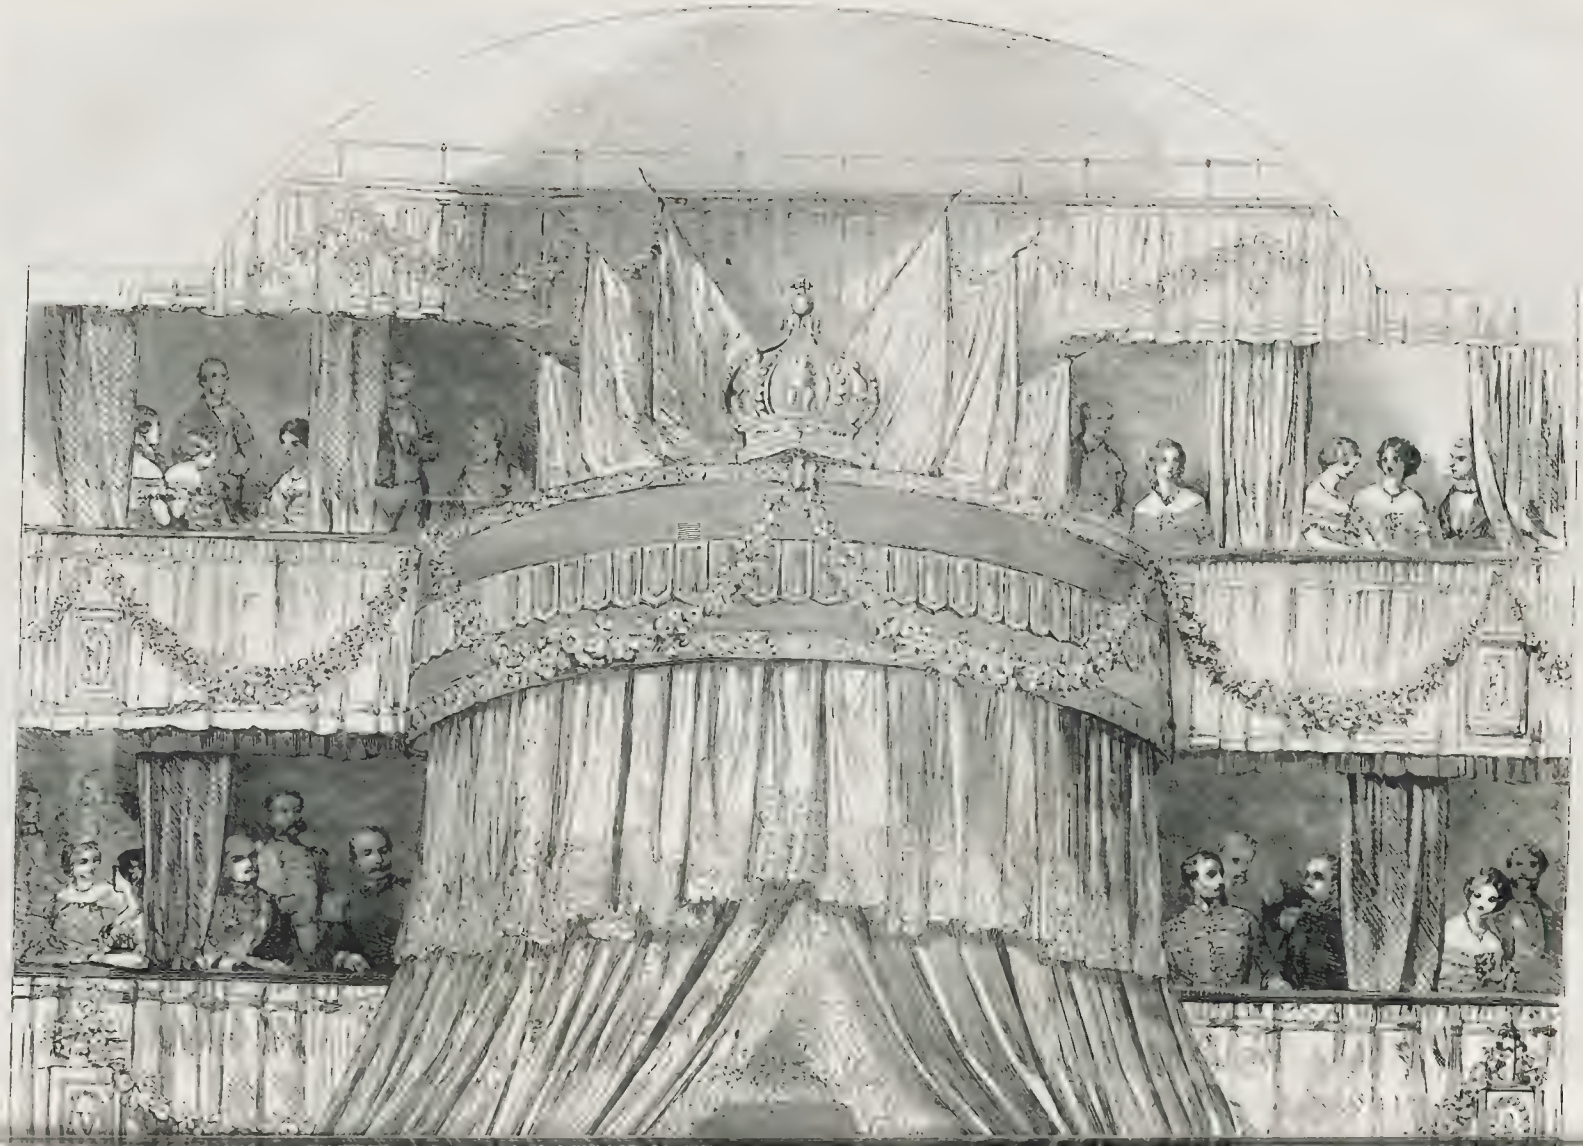
MUSIC.

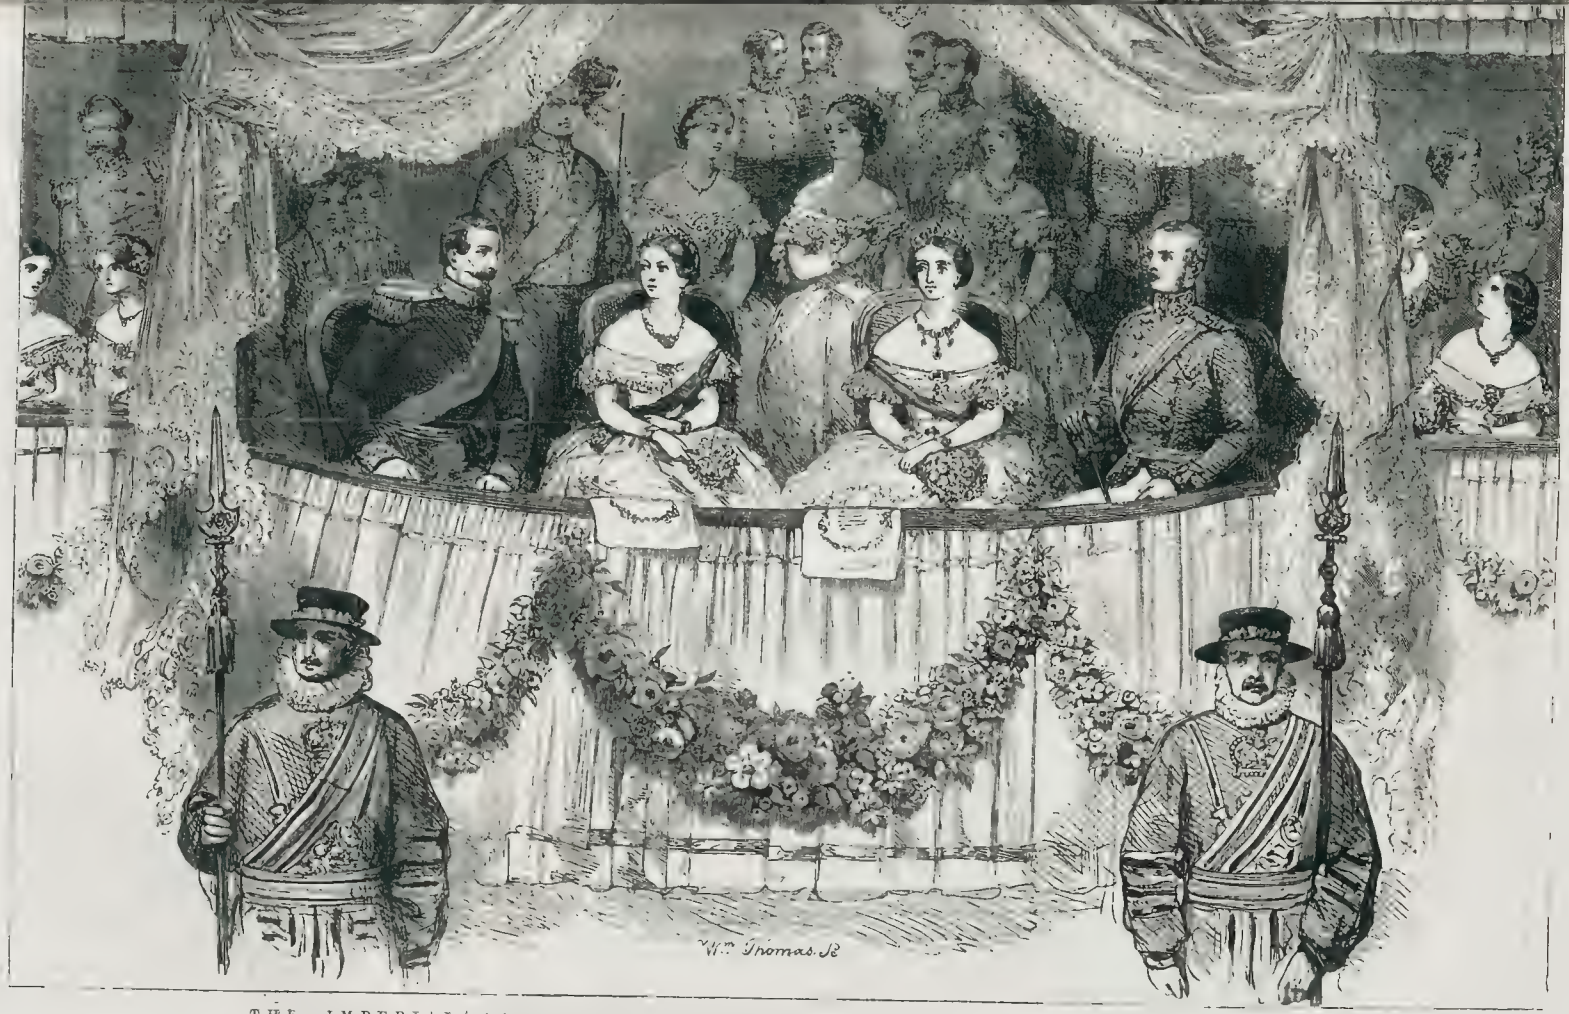
BEETHOVEN'S "Fidelio," which (as we mentioned last week) was performed at the ROYAL ITALIAN OPERA on the occasion of the state visit of the Queen and her Imperial guests, was repeated on Saturday evening with better effect, for then the audience were disposed to attend to it. Mademoiselle Jenny Ney fully supported her high Continental reputation by her performance of the character of *Leonora*. She is not handsome; her person is more large and full than consists with symmetry of form, and her features are not regular. But still she possesses a kind of beauty—after all, the best kind—that which is derived from indications of mind. Her face is pleasing from its expression, and her whole deportment evinces great modesty, joined to intelligence and feeling. Her performance of Beethoven's heroine is not marked by striking points, but its truthful earnestness renders it deeply interesting. In this respect, as in other parts, she reminds us of the celebrated Madame Schroder Devrient, who first performed this character in England. Mdlle. Ney, moreover, is a singer of the highest class. Her voice is of the finest quality, and of an extraordinary compass, ranging from the heights of the soprano to the depths of the contralto. She was well supported by Tamberlik, who, in his old part of *Florestan*, acted and sang admirably. The other principal parts were performed by Mdlle. Marai, Formès, and Tagliafico. The Queen visited the Theatre on Tuesday, to witness the performance of "Il Conte Ory."

THE ROYAL OPERA at Drury-lane goes on extremely well. M. and Mdme. Cassier have already gained a large share of public favour, and draw full houses every night they appear. The company, altogether, is efficient; and the performance of the "Barbiere di Siviglia," at this theatre would be creditable to any opera-house whatever. Madame Gassier's *Rosina* is charming; as a piece of acting, full of gaiety and spirit, besides being an admirable display of vocal talent. M. Gassier is as good a *Figaro* as we have ever seen. Bettini is an excellent *Count Almaviva*; and the part of *Bazilio* seldom has such a representative as Signor Fortini. This opera was first performed on Saturday last, and repeated on Wednesday; both nights to crowded houses, and with very great applause.

THE HAYMARKET. A very fair musical company, of which the principal members are Mr. and Mrs. Sims Reeves and Mr. and Madame Weiss, are now performing English operas; or, to speak more correctly, operas in English, at this theatre. They began on Tuesday night, with "Fra Diavolo," which was very nicely performed, and completely successful. Not only is the company good, but there is an excellent orchestra, with all the means and appliances of a regular musical establishment

THE principal concert of the week has been that of the NEW PHILHARMONIC SOCIETY, at Exeter-hall, on Wednesday evening. According to the newly-adopted practice of the society, it was in aid of the funds of the Hospital for Consumption at Brompton; and, from the appearance of the Hall, we may presume that it has been of considerable benefit to that valuable institution The chief feature of the concert was Beethoven's ninth, or Choral, Symphony, which was carefully and steadily, though somewhat heavily, performed. Master John Barnett, a boy of extraordinary precocity as a pianist, played Mendelsohn's Concerto in G minor with brilliant execution and great taste and intelligence, and was warmly applauded. An airfrom Dr. Wylde's "Paradise Lost," very finely sung by Madame Clara Novello, was loudly encored. In the other parts of the concert there was nothing at all remarkable.





THE IMPERIAL VISIT. THE STALL BOX AT THE ROYAL ITALIAN OPERA.

CALENDAR FOR THE WEEK.

SUNDAY, April 29.—3rd Sunday after Easter.
MONDAY, 30.—Washington inaugurated President of the United States, 1789.
TUESDAY, May 1.—Prince Arthur born, 1850.
WEDNESDAY, 2.—Camden born, 1551.
THURSD., 3.—Inv. of the Cross. Columbus discovered Jamaica, 1495.
FRIDAY, 4.—Seringapatam taken, 1799.
SATURDAY, 5.—Emperor Napoleon I. died, 1821.

HIGH WATER AT LONDON-BRIDGE,

FOR THE WEEK ENDING MAY 5.

Sunday		Monday.		Tuesday.		Wednesday.		Thursday		Friday.		Saturday	
M h m	A h m	M h m	A h m	M h m	A h m	M h m	A h m	M h m	A h m	M h m	A h m	M h m	A h m

ROYAL PRINCESS' THEATRE.—Monday, Wednesday, Friday, and Saturday, Louis XI.; Tuesday, Faust and Marguerite; Thursday, The Corsican Brothers. The Maitre of Toledo or, King, Queen, and Knave, Every Evening.

THEATRE ROYAL HAYMARKET.—Monday and Wednesday Miss CUSHMAN (last two nights) as ROMEO. On Friday she will appear in a New Play. On Tuesday, Thursday, and Saturday, Mr Sims Reeves in the Bohemian Girl, with Mr Weiss, Mr Farquharson, Mr. Manvers, and Mrs. Sims Reeves. The New Haymarket Spring Meeting every evening.

GREAT NATIONAL STANDARD THEATRE, Shoreditch.—The celebrated Miss GLYN as HERMIONE, in the WINTER'S TALE, produced with New and Splendid Scenery, Magnificent Dresses and Appointments. Mr. Henry Marsden, Mr. George Wild, and Miss Fanny Williams, Every Evening.

SACRED HARMONIC SOCIETY, Exeter-hall.—Conductor, Mr. COSTA.—On WEDNESDAY NEXT, 2nd MAY, will be repeated Mendelssohn's LOBGESANG, and Mozart's REQUIEM. Vocalists: Madame Clara Novello, Mrs. Lockey, Mr Sims Reeves, and Herr Formes. The Orchestra, the most extensive available in Exeter-hall, will consist of nearly 700 performers. Tickets, 8s. 5s., and 10s. 6d. each, may be secured by immediate application at the Society's sole office, No. 6 Room, within Exeter-hall.

LOVE, the Greatest DRAMATIC VENTRILOQUIST in Europe REGENT GALLERY, 69, Quadrant. Every Evening at Eight, except Saturday.—Saturday at Three. Monday and Tuesday, THE LONDON SEASON; Wednesday, Thursday, and Friday, LOVE IN ALL SHAPES, &c.

ROYAL MARIONETTE THEATRE, Lowther Arcade.—DIORAMA of the RUSSIAN WAR EVERY EVENING.—The Boys and Band of the Duke of York's School will attend on Monday, at Three, and play National and Patriotic Pieces.—Prices: 2s., 1s., 6d

A PERFORMANCE of ANTHEMS and ORGAN MUSIC will take place at the HANOVER-SQUARE ROOMS, on THURSDAY EVENING, MAY 3, under the direction of Mr GEORGE COOPER (Organist of St. Sepulchre's, Snow-hill, Child's Hospital, Assistant-Organist of St. Paul's Cathedral and her Majesty's Chapels Royal), who will preside at the new and powerful Organ recently erected by Messrs. Gray and Davison. The Gentlemen of her Majesty's Chapels Royal, St. Paul's Cathedral, Westminster Abbey, St. George's Chapel, Windsor, &c., are engaged. Conductor, Mr SUDLOW. To commence at Eight o'Clock. Tickets, 2s.; Reserved Seats, 3s.; may be obtained at all the principal Music Warehouses. Full particulars at S. W. Olivier's, 19, Old Bond-street; and at the Hanover-square Rooms.

MR. ALFRED MELLON respectfully announces that his SECOND GRAND VOCAL and INSTRUMENTAL CONCERT will take place at ST. MARTIN'S HALL, on MONDAY EVENING, MAY 7th, to commence at Eight; on which occasion he has the honour to make his first appearance in England these three years, and perform a new Overture on the Contra-Bass. Vocalists: Miss Lascelles Hall and Mr. Sims Reeves. Pianist, Mr. W. E. Sachs. Leader, Mr. Salmon. The Band will consist of fifty of the finest instrumentalists, and will perform during the evening Mendelssohn's celebrate. Symphony in A Minor; also Overtures by Beethoven, Weber, Auber, &c. Conductor, Mr. Alfred Mellon. Tickets, 10s., 5s. 6d., 3s., and 2s. 6d., to be had of Mr. Mellon, 124, Longford Cottage, Bank, 201 Regent-street, St. Martin's-hall, and the principal Music-shops.

INDIA, CHINA, AUSTRALIA, and CAPE of GOOD HOPE.—W. L. YOUNG will dispatch the following fast-sailing A 1 Clipper SHIPS at the dates named as under

Ships.	Tons.	Commanders.	Destination.	Docks. (To Sail.
Matilda Wattenbach	1300	J. C. Clare ...	Calcutta	... London ... May 7

Sea Queen	1412	W. Rowe ...	Adelaide	... Ditto ... May 10

These Ships have been selected specially for their high-class and fast-sailing qualities, and will be found well worth the attention of Shippers and Passengers. W. O. YOUNG, 34, Cross-street Manchester; 19, Hackfalls, Liverpool; and Sun court, Cornhill, London.

THE IMPERIAL VISIT.

Next Week we shall complete our Illustrations with Views of the Apartments fitted up for their Imperial Majesties at Windsor Castle and Buckingham Palace, including the Emperor's Drawing room, The Empress' Drawing-room. The Emperor's Reception-room, State Bed and Bed-chamber, Buckingham Palace. Toilet Tables. Grand Staircase, Windsor Castle, &c. In this Number, also, will appear Views of the

BOMBARDMENT OF SEBASTOPOL,

and several other Illustrations of the Progress of the War.
Portraits of the Plenipotentiaries at the Congress of Vienna.
Memoir of the Emperor of the French, continued, &c. &c.

*** The Notice of the Exhibition of the New Society of Painters in Water-Colours is unavoidably deferred till next week.

THE ILLUSTRATED LONDON NEWS.

LONDON, SATURDAY, APRIL 28, 1855.

LAST week there were still lingering expectations that the negotiators at Vienna meant to succeed in patching up a peace, but this week all such expectations are extinguished. Russia has positively declined to make the concessions required of her. She refuses to abate in any degree her power in the Black Sea, and persists in maintaining it with a view to further aggression. The negotiators are dispersed, to make known the result to their respective Courts, and the decision of the dispute is again referred exclusively to the sword. Warlike operations, too, are extending as the season advances, with great activity. The blockade of all the Russian ports in the Baltic is renewed, and one prize has already been taken. At Sebastopol the bombardment is carried on with great vigour, but with varying success. The Russians are quite as cunning at defence as the Allies are at attack; and what the latter destroy the former quickly repair; and the trial of skill and strength is continued from day to day without as yet producing any conspicuous advantage to either side. As considerable reinforcements are still going from France, as the Sardinian Contingent is about to arrive, as the Turks are increasing in strength and usefulness, we may look forward—if the plan of operations be wise—to a decisive, a speedy, and favourable result. It is, however, no longer likely that the fall of Sebastopol, should that occur, would secure peace. The late haughty rejection by Russia of the terms offered would probably, under such circumstances, lead to extended demands on her, to which she would not readily accede, and the war would go on. Should Sebastopol not speedily fall, or not fall, this also implies a continuance of the war. A year ago it was generally hoped that one campaign would restore peace, though the resources of Russia were then directed by Nicholas. He is gone, the second campaign is begun, and there is no present prospect that it will bring the war to a conclusion. Already it involves the greatest nations of the globe, threatens to drag all Europe into its gulf, and to be of considerable duration.

The crisis in the affairs of Europe foretold by Napoleon seems to have arrived. Enlightened and philanthropic men did hope that the gradual extension of trade and the progress of civilisation would have diffused throughout Europe the sentiments of a common humanity and a common interest, and have prevented the conflict between Cossack and Soldier, between the Sclavonic and Saxon and Latin races, between the Eastern and Western Christianity, between Barbarism and Civilisation, which he predicted. It has, however, come, and must be fought out, to establish fully the dominion of either.

The hopes of the philanthropists, cherished by a long peace, are now entirely extinguished. The ambition of the Czar on one hand, and the disturbed state of Europe on the other, which has filled the apprehensive minds of statesmen with alarm, and has made them more zealous in providing for the preservation of their own power than in checking his aggressions, have brought on a great crisis in national affairs, about which there is no longer any doubt, and there ought to be no longer the least hesitation. We cannot escape from the conflict, and we must put forth our whole strength, under the guidance of the greatest skill, to conduct it to a successful conclusion. Not only reputation, honour, and national greatness, but freedom and safety, are involved in the issue; for no great nation, with many envious rivals, ever lost the prestige of greatness and preserved its freedom and independence.

Modern wars, frequently undertaken for frivolous dynastic or trade objects, have done much to weaken in the public mind the seriousness and solemnity of the great task now imposed upon the nation. The present war, however, though its origin was trivial—a dispute about the precedence of Churches being the small spark that kindled the conflagration—is a war of races, creeds, and degrees of civilisation, and differs essentially from any war between the equally civilised nations of the West that has prevailed in Europe since the destruction of the Roman empire. Unfortunately, what we have hitherto performed is not a good augury for the future. So complete has been the collapse of our whole military arrangements, that an opinion has been promulgated that we are no longer capable of carrying on war. We must prove this opinion to be unfounded. We cannot yet hope always to avoid war, and the independence of no nation is safe which cannot make it good by its own strength. The mistakes and mismanagement which alone have begotten such an opinion must be corrected, for it would indeed be fatal were the neglect and error of our own rulers to produce the opinion that we can no longer successfully wield the sword. We must now fight, and we must fight well. At present this is the paramount duty of the nation, to which all others should give way. We care not what names the statesmen bear who are at the head of our affairs, nor what their rank, family, or station, but they must be men of capacity, men zealous in the great work, men of great comprehension and strong will. If our present Ministers come not up to these conditions—and certainly they have shown themselves rather compromising and careless than high principled and zealous—we must have others. It will be the duty of the people to watch that the national honour and national safety are not sacrificed to personal feelings or factious objects. The crisis is too eventful, the stake at issue too mighty, to be trifled with, and, unless we discard every notion of frivolity in regard to it, we shall be parties to the national destruction.

The late examinations, particularly that of the Duke of Newcastle, by the Committee, have laid open to the public the sad and disgraceful anarchy which exists in our several departments. No man and no Minister seems to know exactly his duties and his responsibilities. The Secretary-for-War clashes with the General commanding the Forces; the Admiralty or the Ordnance knows nothing of what the other department is doing; the Medical department is subservient to all and to none, and has always to go through so many forms that, before the end of a business is arrived at, the beginning is forgotten. For all this there is no excuse, because over all the Military power the Crown is, by the Constitution, really supreme; and if the Ministers who wield, or ought to wield, all the power, fail to introduce a proper subordination into the several departments, and amongst the several functionaries, they are exclusively to blame. George III. insisted, indeed, on maintaining a control over the Army; but Queen Victoria necessarily cedes that control entirely to her Ministers. The public has learned, therefore, from the Duke of Newcastle's examination, with astonishment, that Generals have been appointed to the Army in the Crimea without the sanction of Ministers. Lord Hardinge has done this, it is said, through inadvertence; but in submitting to it, even for a moment, the Ministers permitted the introduction of two authorities, divided the Royal power, and began or continued the anarchy in the military service it was their duty to prevent. It is now necessary that the Royal power over all the military forces should be concentrated in the hands of one able Minister, who, unthwarted by the Horse Guards, the Ordnance, or the Admiralty, and finding willing subordinates—not jealous rivals—in all the departments, should rule despotically, if necessary, over the Army and the Navy. Such a Minister has not yet been found.

LIEUTENANT-GENERAL WOULFE.—This gallant officer, whose death occurred recently, was employed in the Mahratta campaign, 1803-4-5-6, and was present at the attack and defeat of Sindhea Cavalry in September, 1803, near Bundhapoor; at the capture of Rerhampoor; at the siege of Aseergur; at the battle of Argaum; at the storming of Gourighur; and at the siege of Chandore. He took part also in several minor affairs, and was actively engaged in the first Burmese War. For his services in India he received the war medal and four clasps, as well as the clasps for AVA.

THE RIGHT HON. CHARLES HERBERT died on the 24th inst., in his seventy-seventh year, at St. Julian's, near Sevenoaks. A Portrait of the right hon. gentleman, with a Memoir of his long official life, appeared in No. 368 of the ILLUSTRATED LONDON NEWS.

WILLS AND PERSONALTY.—Florance Thomas Young, Esq., £250,000 personalty; Charles Allen Young, Esq., £120,000; Rev. Henry Say, of Swaffham, £120,000; Lady Astley, widow of Sir Henry Jacob Astley, Bart., £80,000; Thomas D'Oyley, Esq., Serjeant-at-law, £80,000. The wills of Lieut.-Colonel Harry G. Chester, 23rd Fusiliers, at Alma, and of Brevet Lieut.-Colonel John George Champion, 90th Foot, at Scutari, have been proved in London.

THE SARDINIAN CONTINGENT.—We regret to state that an announcement, only too well authenticated, has reached London that the fine screw steam-ship CYCLOPS was burnt to the water's edge soon after leaving Genoa, with the first detachment of the Sardinian Contingent on board. The troops were saved, as well as the crew, with the exception of three sailors.

LATEST INTELLIGENCE.

THE VIENNA CONFERENCES.

The Fourteenth Conference, which was held on Thursday, lasted two hours. The Fourth Point was discussed.

The counter-propositions made by Prince Gortschakoff were rejected by the Western Powers.

M. Drouyn de Lhuys was to take his departure on Friday.

THE BOMBARDMENT OF SEBASTOPOL.

Although the telegraph brings news direct from the Crimea, no accounts have been allowed to appear of later date than the 18th.

The *Moniteur* of yesterday (Friday) does not publish any despatches from Sebastopol: but the *Pays* states that letters received in Paris announce the regular continuation of the siege, under the most favourable auspices, and with a success more and more marked.

THE OVERLAND MAIL.

The steamer *Bombay* arrived at Trieste on Thursday evening, in 124 hours from Alexandria, with advices from Calcutta, March 24, Madras, March 28; Bombay, April 3; Shanghai, March 9; Canton, March 13; Hong-Kong, March 15.

A rupture with Persia is imminent; the Shah openly avows his preference for Russia.

Mr. Murray left Bagdad for Teheran on the 12th of March.

The meeting between Hyder Whou and Mr. Lawrence took place near Peshawur on the 19th of March.

The traffic on the Calcutta Railway exceeds all expectations.

Shanghai and Canton have been evacuated by the rebels.

The Russian frigate *Diana* has been lost in Japan from the effects of an earthquake.

TELEGRAPH FROM THE CAMP BEFORE SEBASTOPOL TO LONDON NOW OPEN THROUGHOUT, AND AT WORK.

It will be remembered that, on Monday last, we stated our belief that, on the 24th instant, the electric communication from Varna to Balaclava, by submarine cable, would be completed.

We can now announce that our anticipations have been verified; and—strange and wonderful as it may seem—Head-quarters, Balaclava, are, as far as possibility of telegraphic communication is concerned, but some few hours distant from the War-office in Whitehall.

This fact, so remarkable in itself as a triumph of science, derives at this moment a peculiar importance from the critical nature of the present operations in the Crimea. A thin wire traversing our stormy Channel, continuous through the vast States of France, Germany, and Turkey, diving beneath the broad Euxine, and climbing again the tall cliffs three thousand miles from home, enables us at this moment to hold almost instant converse with our distant armies.—*Morning Post.*

THE COURT.

The Court has been remarkably quiet since the departure of the Emperor and Empress of the French. The Prince Consort returned to Buckingham Palace from attending their Imperial Majesties' embarkation at five o'clock on Saturday afternoon.

On Sunday the Queen and the Prince, with the Prince of Wales, the Princess Royal, Prince Alfred, the Princess Alice, the Duchess of Kent, the Prince of Leiningen, and the Ladies and Gentlemen of the Court, attended Divine service in the private chapel of Buckingham Palace.

On Monday the Queen and the Prince took a drive in an open landau and four. His Royal Highness rode out on horseback in the morning, accompanied by the Prince of Wales and Prince Alfred. In the evening the Queen and Prince Albert, with the Prince of Wales, Prince Alfred, and the Prince of Leiningen, honoured the Princess's Theatre with their presence.

Her Serene Highness the Princess of Hohenlohe Langenburg, accompanied by Prince Victor and the Princesses Adelaide and Feodore, arrived at Buckingham Palace on Tuesday afternoon on a visit to the Queen. In the evening the Queen and Prince Albert, accompanied by the Princess Adelaide of Hohenlohe Langenburg, honoured the Royal Italian Opera with their presence.

On Wednesday the Queen, accompanied by the Princess Royal and the Princesses Alice, Helena, and Louise, and attended by the Hon. Caroline Cavendish, the Hon. Flora Macdonald, and Lord Charles Fitzroy, went to Gloucester-house, and paid a visit of congratulation to her Royal Highness the Duchess of Gloucester on the auspicious return of her birthday. The Prince Consort and other members of the Royal family also paid visits of congratulation to the Royal Duchess during the day. In the evening the Queen and Prince Albert visited her Royal Highness, accompanied by the Princess Royal, the Princess Alice, the Princess of Hohenlohe Langenburg, and the Princesses Adelaide and Feodore of Hohenlohe, the Prince of Leiningen, and Prince Victor of Hohenlohe.

The galeties of the present season may be expected to commence early in the ensuing month. The Lord Chamberlain announces that her Majesty will hold Drawingrooms on the following days:—Wednesday, 2nd May next; Saturday, 19th May next, to celebrate her Majesty's birthday. Her Majesty will also hold a Levee at St. James's Palace, on Friday, the 11th May next.

The Countess of Desart has succeeded the Viscountess Canning as the Lady in Waiting to the Queen. Lord De Tabley and Mr. R. Ormsby Gore have relieved Lord Rivers and Sir Edward Bowater in their duties as the Lord and Groom in Waiting to her Majesty.

THE DUKE OF CAMBRIDGE. His Majesty the Emperor of the French has conferred on his Royal Highness the Duke of Cambridge the Grand Cordon of the Legion of Honour.

The Earl Granville, who met with an accident by the horse he was driving in a cab stumbling on Constitution-hill, on the 17th inst., has suffered considerably since from the shock, and was prevented from joining his colleagues at the Cabinet Council on Saturday. We are glad to learn that his Lordship is now quite recovered.

Lord and Lady Charles Wellesley, and their youthful family, are at Conholt Park, near Andover, where they have resided since they quitted Brighton. We regret to learn the eyesight of his Lordship is considered irretrievably lost.

Lord and Lady Harry Vane have arrived in town from Naples, after passing the winter months in that capital.

LONDON AND DUBLIN POSTAL COMMUNICATION.—On Thursday a large meeting of Irish Members of Parliament and others interested in the promotion of postal facilities between England and Ireland via Holyhead was held at the King's Arms, New Palace-yard, to discuss the provisions of the bill which stood for second reading on Friday evening, in the House of Commons. Mr. Henry Vance, member for Dublin city, took the chair; Sir Cusack Roney officiating as honorary secretary. The capital to be appropriated under the bill for the construction of steamers (which will be of a speed and capacity such as have not yet been attempted in the water service between the two countries) is limited to £400,000. The promoters confine the traffic to that of mails, passengers, and parcels; and the only ports between which the vessels are to run are Holyhead and Kingstown. Sir Cusack Roney stated that the total time occupied from station to station, between London and Dublin, would be twelve hours certain, at all seasons and under all circumstances, allowing for refreshment, for the conveyance of trains by horses through the town of Holyhead (as Government would not permit the employment of locomotives there), and for the deposit of luggage on board the steamers, which would be of 2000 tons burden, and of the best possible construction in all respects. Numerous suggestions having been canvassed, a resolution was then agreed to expressing upon her Majesty's Government the importance and necessity of improving, as much as possible, the postal and passenger accommodation, as well by land as by sea, between London and Dublin, adding that by the great advances of late years made by mechanical science the intercourse between the two capitals can be greatly accelerated. A vote of thanks having been conveyed to the Chairman, the meeting then separated, on the understanding that the second reading of the bill was to be supported on Friday evening.

THE company of literary gentlemen who lately gave a dramatic representation at the Olympic Theatre, in aid of a brother author, are to appear on Friday, the 11th of May, at the Drury-lane Theatre, by the desire of her Majesty. The piece for presentation is Mr. Planché's "Romantic Idea," to be followed by the pantomime. The proceeds of the evening will be added to the funds of the Wellington College.

NEW ROUTE TO THE CONTINENT. The Eastern Counties Railway Company are making arrangements for a very efficient steam packet service between the ports of Harwich and Antwerp this season, the operations of last year having satisfied them of the capabilities of the station for carrying on a Continental traffic. It is intended to put on two first-class passenger boats, which have been built expressly for the North Sea trade, and to confine the service, for the present, to passenger traffic. Among other advantages attendant upon the route *vid* Harwich are—A short sea passage, a saving of about ten hours, a harbour on each coast, accessible at all times of tide, and railway communication direct to and from the ship's side at Harwich

IMPERIAL PARLIAMENT.

(Continued from page 402.)

HOUSE OF LORDS.—THURSDAY.

ROYAL COMMISSION.

The Royal Assent was given by Commission to the following bills, viz., Convention with Sardinia, Purchasers' Protection against Judgments, Lunacy Regulation Act (1853) Amendment, Commons Enclosure, Dean Forest, &c.

The Royal Commissioners were the Lord Chancellor, the Duke of Argyle, and Lord Monteagle.

The Earl of MALMESBURY, in moving for returns relative to the exportation of horses from this country, suggested that while horses were so imperatively required for the Crimea some check should be placed upon their exportation.

The Militia (Ireland) Bill was read a third time and passed.

HOUSE OF COMMONS.—THURSDAY.

Lord PALMERSTON, in reply to Mr. Layard, said that the telegraph had been completed to Balaclava; but the only intelligence received was that it had been so completed.

Sir C. WOOD, in reply to further questions, said, only two messages had been received. The telegraph was not entirely open to Balaclava; but it was so far open that a message had been received from Sir E. Lyons in twenty-four hours.

Lord PALMERSTON, in reply to Mr. Roebuck, said that the War-office would communicate with Lord RAGLAN, requesting him to send every day a report of the progress of operations against Sebastopol.

The CHANCELLOR of the EXCHEQUER, in reply to Mr. Grogan, said that the stock of spirits in the hands of wholesale dealers would not be assessed to the new duties.

LOAN BILL.

The Loan Bill was read a second time.

The Customs Duties Bill led to some discussion, but was eventually read a second time.

The Spirit Duties (Scotland and Ireland) Bill was read a second time.

TESTAMENTARY JURISDICTION BILL.

The SOLICITOR GENERAL moved the second reading of the Testamentary Jurisdiction Bill.

Mr. MALINS moved, as an amendment, that the bill be read a second time that day six months. He considered that the measure, so far from being an improvement of the present system, was calculated to increase the evils complained of.

Mr. COLLIER supported the bill because it would abolish the Ecclesiastical Courts, which from time immemorial had been condemned.

Sir F. THESIGER opposed the bill.

After much discussion the debate was adjourned.

HOUSE OF LORDS.—FRIDAY.

Lord SHAFTESBURY put a question to the General Commanding-in-Chief with respect to certain irregularities of recent occurrence, which took place at Canterbury, between some young officers of the 30th Regiment. He could not but think that the commanding officers were the parties to blame on these occasions, and it was they who should be held responsible for all such breaches of discipline. He asked the noble Viscount whether he had taken measures to put a stop to such disgraceful practices

Lord HARDINGE regretted very much that habits of practical joking were so prevalent in the Army. He had not overlooked the particular instance to which the noble Earl had called his attention; he had thought it his duty to issue a severe admonition on the matter; and should this not be attended with the desired effect, he should go still further, and recommend her Majesty to exercise her prerogative with respect to the offending and culpable parties.

Lord ARDMOLACH said, were he Commander-in-Chief, he would hold the commanding officers of the several regiments responsible; and, if this resolution were adopted, he would warrant that no such discreditable practices would be carried on as those which had brought disgrace of late on the military profession.

A long and desultory discussion then took place upon the subject of Church Rates, introduced by the Bishop of Oxford.

The Earl of ALBEMARLE moved for a return of the quantity of hemp, flax, and tallow received into this country from Russia and Prussia between the 1st of January and the 27th of April in the years 1854, 1854, and 1855, respectively. The noble Earl inquired whether her Majesty's Government intended, with a view to bring the war with Russia to a speedy conclusion, further to restrict the trade of that country by prohibitory duties, or by any other means?

Lord STANLEY of Alderney said, in respect to the blockade in the Baltic, he could understand by the Sardinian Convention and Treaty with Prussia, that the property in those ports were known chiefly to belong to British subjects, but vigorous efforts had been taken to cripple the trade of Russia.

HOUSE OF COMMONS. FRIDAY.

STATE OF THE NATION.

Mr LAYARD gave notice that, on an early day, he would move the following resolutions:—

That this House views with deep and increasing concern the actual state of the nation

That, whilst at all times the administration of public affairs should be entrusted to those best qualified to discharge the duties imposed upon them, it is the more necessary that it should be so at a moment of great national emergency.

That the manner in which naval and military patronage has ascribed to party and family influences, and to a blind adherence to routine in the appointments to the great offices of the State, and to posts in diplomacy, the Army, and other branches of the public service, is opposed to the best interests of the State; has already given rise to grave misfortunes, threatens to bring discredit upon the national character, and to involve the country in serious disasters

That this House will give its best support to any Ministry which, in the present emergency, shall propose to itself, as its main object, the efficiency of the public service in every branch, and the vigorous prosecution of the war as the only means of securing an honourable and lasting peace.

MR. LAYARD AND ARMY PROMOTION.

Mr. Ewart, Mr. H. Baring, and General Peel commented with great severity upon the speech recently made by Mr. Layard at Liverpool, and upon a letter which he published in the *Times*, charging high authorities in the Army with improper disposal of patronage. The promotions to which Mr. Layard objected were fully explained by General PEEL. With a view to show the inaccuracy of the hon. gentleman's statements, and the injustice of his attacks, he read a correspondence between Lord Hardinge and Mr. Layard, in which the former stated that the assertion was untrue that he had promoted his son at the exposure of Colonel Wilson, and that it was useless to hold any further correspondence with one who made such reckless and unfounded assertions

Mr. LAYARD replied to the charges that were made against him; but the statements of the hon. member were more general than specific. He, however, refused to withdraw any of his statements. The hon. member's speech was received throughout with loud expressions of disapprobation.

Lord PALMERSTON severely condemned the language used by Mr. Layard in his speech at Liverpool.

The Loan Bill and the Customs Duties Bill passed through Committee.

EDUCATION (SCOTLAND) BILL.

The Lord ADVOCATE moved the second reading of the Education (Scotland) Bill.

Mr. BLACKBURN moved that it be read a second time that day six months, on the ground that the measure did not meet the requirements of the Scotch people.

After a long discussion the House divided, when the numbers were—For the second reading, 210; against it, 171, majority in favour of second reading, 39. The Bill was then read a second time.

NATIONAL SPORTS.

The whole of the racing interest of the ensuing week is concentrated on Chester, which has rebuilt its Grand Stand, and will commence its Rooden sports on May morning. The principal event of that day is the Palatine Stakes, for which Challey, Lady Tatton, Captain, Lady Palmerston, and Mosquito will probably be "colored." In the Mostyn Stakes we find the names of two winners—to wit, Sister to Broughton, and Alfred; while the Chesterfield Handicap has thirty subscribers. Wednesday will witness the second anniversary of the Tradesmen's Cup, which has 119 acceptances out of 200 entries. Thomas Parr thinks he has it already in his grasp with the five-year-old Mortimer, 6 st 4 lb.; and Claret, 5 st. 8 lb., is also said to be a certain starter. Joe Miller, 6st. 8 lb., who won it in 1852, and Scythian, 7 st. 5 lb., are also well in; but the same can hardly be said of Nevile, who has, including his York penalty, 7 st. 12 lb. The Dee Stakes is the principal event of Thursday, and, as it includes Corcebus, Marchioness, Blooming Heather, Claret, and Lord Alfred in its entry, some fine may be looked for in the struggle over the Cheshire sward. Those whom his Middleham admirers aver to be nearly a stone better than his stable companion. It is not very probable that Rifleman, whom "the Squire" believes to have an equal superiority over Claret, will run in this race, but will be reserved for the Derby, for which Basham is engaged to ride him, in case Nat is not at liberty. On Friday the Grand Stand Cup and the Cheshire Stakes are the leading items of the card, along with the Triennial Stakes, in which Claret, Lord Alfred, and Lady Palmerston are antagonists. What with four days' racing, and steeplechases at Manchester on Monday, the merrie men of Lancashire will not lack May games. The Northumbrians will also have an afternoon of steeplechasing, at Wark, on Wednesday, which will virtually wind up the 1854-55 season of this fading species of sport. The Tuesday of the entry comprises ten Eatanian Crosses, and Hungerford representing the "crack" seniors. Andover and Virago the four-year-olds, and Fandango and Nettle the three-year-olds. The last-named filly has been lately purchased by Mr. Palmer, the owner of Goldfinder, for two thousand guineas; but she is generally thought to be another Become Mr. Merry's. The struggle between this gentleman's Lord of the Isles and St. Hubert for the Two Thousand Guineas Stakes, last Tuesday, produced an enormous amount of betting.

The list of the entry comprises ten Eatanian Crosses, and Hungerford representing the "crack" seniors. Andover and Virago the four-year-olds, and Fandango and Nettle the three-year-olds. The last-named filly has been lately purchased by Mr. Palmer, the owner of Goldfinder, for two thousand guineas; but she is generally thought to be another Become Mr. Merry's. The struggle between this gentleman's Lord of the Isles and St. Hubert for the Two Thousand Guineas Stakes, last Tuesday, produced an enormous amount of betting.

The struggle between this gentleman's Lord of the Isles and St. Hubert for the Two Thousand Guineas Stakes, last Tuesday, produced an enormous amount of betting.

On Wednesday there will be a very interesting sale of twenty-eight greyhounds, of the Sam, Mocking-bird, Neville, and Figaro blood, at Aldridge's Repository.

NEWMARKET SPRING MEETING.—MONDAY.

Handicap Sweepstakes of 20 sovs. each.—Old Rowley, 1. Folly-o'-the-Day, 2.
Match: 100, h. ft.—Fitzgerald, 1. Aloyone, 2.
Match: 200, h. ft.—Kadir, 1. Physalis, 2.
Handicap Plate of £50.—Falcon, 1. Gossip, 2.

TUESDAY

Coffee-room Stakes.—Pugnator, 1. Merriment, 2.
Handicap Plate of £70.—Cock Pheasant, 1. Dennis, 2.
Two Thousand Guinea Stakes.—Lord of the Isles, 1. St. Hubert, 2
Sweepstakes of 300 sovs. each.—Rose, 1. Pelham, 2.

WEDNESDAY.

Selling Handicap Sweepstakes of 10 sovs.—Priestcraft, 1 Thessaly, 2.
Queen's Plate of 100 guineas.—Black Swan, 1. Testy, 2
Renewal of the Sweepstakes of 50 sovs. each.—Triton, 1 The Poor Player, 2.
Plate of 50 sovs.—Fearless, 1. Vulcan, 2.

THURSDAY.

Sweepstakes of 100 sovs.—De Clare, 1. Paros, 2.
One Thousand Guineas.—Habena, 1. Capuciga, 2.
Sweepstakes of 10 sovs.—Welham, 1. Thessaly, 2.
Handicap.—Hothorpe, 1. Nathan, 2.

FRIDAY

Newmarket Stakes.—De Clare, 1. Polydore, 2.
Handicap Sweepstakes.—Humboldt, 1. Falcon, 2.
Sweepstakes.—Ceres, 1. Fearless, 2.
Sweepstakes.—Habena walked over.

MONETARY TRANSACTIONS OF THE WEEK.

(From our City Correspondent.)

Although it has been officially announced that the Conference at Vienna is virtually at an end, and that Russia positively refuses to agree to the terms proposed by the Western Powers, there has been no material change in the position of the Consol Market. The new Loan of £16,000,000 has, of course, tended to impart weakness to prices; nevertheless, the fall in them during the past forthnight has not been more than about 2 per cent. At present, as the whole of the Loan has been taken up, we see no reason why the quotations should recede much below their present level—unless, indeed, unfortunately news should reach us from the Crimea. There is now an immense amount of capital seeking employment: money out of doors is becoming cheaper; and a strong impression exists in several quarters that the Bank of England will shortly find it necessary, in order to secure a fair amount of discount business, to reduce its minimum rate to four per cent. In Lombard-street money is easily obtained at that rate.

There was some flatness in Consols on Monday, and prices were decidedly lower than towards the close of last week. The Three per Cents Reduced were 87½ to 88⅛; the Three per Cent Consols, 89¼ up to 89⅜; and the New Three per Cents, 89⅝ to 89⅞. Consols for Account varied from 89¼ to 89⅜. The Omnium was ¾ to ⅞ prem. Bank Stock ruled at 210 to 211½. Long Annuities, New, 16⅞ ⅞. India Stock, 230; India Bonds, 15s.; Exchequer Bills, 5s. to 10s. prem.; Exchequer Bonds, 99¾. On the following day Bank Stock was 210. The Three per Cents Reduced marked 87⅞ to 88⅜; the Three per Cent Consols, 88¼ to 89½; the New Three per Cents, 88½ ⅝; New Three per Cents, 88¾ up to 89⅛; New Two-and-a-Half per Cents, 76 to 74; Long Annuities, 1860, 2 15-16; Ditto, 1859, 3⅛. Bank Stock, 210 to 211½; New Long Annuities, 16 3-16; Indian Stock, 230; India Bonds, 12s.; Exchequer Bills, 5s. to 10s. prem.; Exchequer Bonds, 1859, were 99¾. On the following day Bank Stock was 210. The Three per Cents Reduced marked 87⅞ to 88⅜; the Three per Cent Consols, 88¼ to 89½; the New Three per Cents, 88½ ⅝; Long Annuities, 1860, 2 15-16; Ditto, 1859, 3 11-16; New Long Annuities were 16 7-16; and the Omnium was ¾ ⅞ prem., India Bonds, 12s. to 15s.; Exchequer Bills, 5s. to 10s. prem.; South Sea Stock, 117½; Exchequer Bonds, 99¾. On Thursday the Funds were very quiet, and the leading quotations for the Three per Cents, both for Money and Time, were 89⅛ to 89⅜, closing at 89⅛. The Omnium was ¾ to ⅞ prem.; and the New Annuity, 16 3-16 ⅞. Exchequer Bills were 5s. to 10s. prem.; Bank Stock, 210 to 211½.

The imports of bullion have been under £200,000, chiefly from New York. As the foreign exchanges show no margin of profit on shipments, little or no gold has been forwarded to the Continent this week. There have been some sales of bar silver at 60⅞ per ounce, partly for India.

Most Foreign Bonds have continued very inactive. In prices, however, no material change has taken place

The following are the returns of the note circulation of the United Kingdom during the four weeks ending on the 17th ult:—Bank of England, £19,037,991. Private Banks, 3,744,613; Joint-stock Banks, 5,032,267; Scotland, 3,811,879; Ireland, 6,857,871; Total. £36,274,005; showing a decrease of £610,183 in the circulation of notes in England, and a decrease of £359,599 in the United Kingdom, when compared with the previous month. The total decrease in the circulation, compared with the 18th of March, 1854, is £2,433,132. The stock of bullion is £2,089,343 less than last year.

The business doing in the Railway Share Market has been limited. In the general quotations, however, no material change has taken place. The total "calls" for May amount to £797,180. The following are the official closing prices on Thursday:

ORDINARY SHARES AND STOCKS.—Bristol and Exeter, 83; Caledonian, 53; Eastern Countries, 11; East Lancashire, 71; Great Northern B Stock, 123; Great Southern and Western (Ireland), 94; Great Western, 53; Lancashire and Yorkshire, 75; London and Blackwall, 7; London and Brighton, 93, London and North-Western, 97; London and South-Western, 81; Midland, 89; Ditto, Birmingham and Derby, 40; Newport, Abergavenny, and Hereford, 13; Norfolk, 47; North British, 28; North Devon B Guaranteed, 6; North-Eastern—Berwick, 70; Ditto, Extension, 12; Ditto, G.N.E. Purchase, 8; Ditto, Leeds, 128; Ditto, York, 48; North Staffordshire, 12; Oxford, Worcester, and Wolverhampton, 25; South-Eastern, 80; South Wales, 26; Vale of Neath, 16

LINES LEASED AT FIXED RENTALS.—London, Tilbury, and Southend, 11; Wilts and Somerset, 84.

PREFERENCE SHARES.—Great Northern Five per Cents, 115; Ditto, Four-and-a-Half per Cents, 101; Ditto, Five per Cent Scrip, 5; Great Western Irredeemable Four per Cent, 91; Ditto, Birmingham, 108; Ditto, Gloucester, Stock, 73; Ditto, Chester Shares, 19; Midland Four-and-a-Half per Cents, 98; Ditto, Bristol and Birmingham Six per Cents, 134; North British, 100; Stockton and Darlington, 16.

FOREIGN.—East Indian Five per Cent, 25; Ditto, Extension, 12; Grand Trunk of Canada, A issue, 6; Great Luxembourg, 1; Great Western of Canada Shares, 15; Ditto, Hamilton and Toronto, 20; Madrid, Cuidad Real, and Linares, 2; Namur and Liége, 5; Paris and Lyons, 39; Scinde, 1; pm.

There has been a slight improvement in the demand for Mining Shares. Brazilian Imperial have marked 23; Cobiguna, 33; Fortuna, 1; Linares, 7; Santiago de Cuba, 5; Tin Croft, 1; United Mexican, 7.

Friday Evening.

In consequence of a report to the effect that Lord Panmure had resigned office, Consols have been flat, and a decline of one quarter per cent has taken place in prices since the opening of the market. The Three per Cents have marked 89¼ down to 88⅞. The New Three per Cents are 89⅛. Exchequer Bills, 5s. to 10s. prem. Foreign Bonds and Railway Shares are flat.

THE MARKETS.

CORN EXCHANGE (Friday).—The arrivals of English wheat up to our market this week have been very moderate, and the show of samples has been to-day was limited. The amount of business done was to say rather dull, in consequence of the fluctuating prices were from 3s. to 4s. per quarter higher than on Monday, and a good clearance was effected There was a slight improvement in the demand for foreign wheat, the show of which was limited, and the quotations were fully 4s higher. Floating cargoes of grain were steady, at very high prices. There was more doing in barley, and grinding and distilling sorts were the turn dearer Malt changed hands slowly, on former terms. We had a good consumptive demand for oats, at very full prices. Beans, peas, and flour, were held for more money. The top price of English arkwand to 70s per 280lbs.

ARRIVALS.—English: wheat, 1,940 qrs; barley, 1,450; malt, 4990; oats, 600; flour, 1410. Foreign: wheat, 4,330; barley, 720, oats, 30,310; flour, 120 sacks.

English Wheat, Kesex and Kent red, 64s. to 68s.; ditto, white, 71s. to 82s.; Norfolk and Suffolk red, 64s to 68s.; ditto white, 68s. to —s.; rye, 38s. to 40s.; grinding barley, 27s. to 29s.; distilling ditto, 29s. to 30s.; malting, ditto, 30s. to 33s.; Lincoln and Norfolk malt, 68s. to 70s.; brown ditto, 62s. to 64s.; Kingston and Ware, 68s. to 70s.; Chevalier, 70s. to 72s.; Yorkshire and Lincolnshire feed oats, 23s. to 25s.; potato ditto, 27s. to 28s.; Youghal and Cork black, 22s. to 23s.; ditto, white, 23s. to 25s.; Sligo, Limerick, 2s. to 24s.; grey peas, 34s. to 37s.; maple, 37s. to 39s.; white, 36s. to 40s.; beans, 37s. to 42s. per quarter. Flour made from—Essex, 55s. to 57s.; Suffolk, 47s. to 49s.; Stockton and Yorkshire, 45s. to 52s.; per 280 lbs. American, flour, 36s. to 42s. per barrel.

Foreign.—We continue to have a steady demand for nearly all kinds of seeds. Prices rule as follow.

Linseed, English, sowing, 69s. to 70s.; Baltic, crushing, 60s. to 62s.; Mediterranean and Odessa, 55s. to 58s.; hempseed, 45s. to 50s per quarter. Carraway, 38s. to 45s. per cwt. Brown Mustard seed, 12s. to 14s.; white ditto. 8s. to 10s.; Tares, 7s. to 10s. per bushel. English rapeseed, £32 to £35 per last of ten quarters. Linseed cakes, English, £12 to £13 5s.; ditto, foreign, £11 15s. to £12 10s.; rape cakes, £6 10s. to £6 15s. per ton. Canary 19s. to 20s. per quarter. Red clover, English, 60s. to 65s.; white ditto, 65s. to 75s. per cwt.

Bread.—The prices of wh ate bread in the metropolis are from 9½d. to 10d. of household ditto, 8d. to 9d. per 4 lb. loaf

Imperial Weekly Averages.—Wheat, 67s. 1d.; barley, 31s. 3d.; oats, 23s. 10d.; rye, 38s. 6d.; beans, 40s. 9d.; peas, 38s. 3d

The Six Weeks' Averages.—Wheat, 67s. 11d.; barley, 30s. 8d.; oats, 24s. 6d.; rye, 39s. 6d.; beans, 40s. 9d.; peas, 38s. 3d

English Grain, at Mark last week.—Wheat, 68,446; barley, 36,163; oats, 20,187; rye, 117; beans, 681; peas, 70 quarters.

Tea.—The public sales held this week have gone off slowly, and, in some instances, prices have had a downward tendency. In the private market very little is doing, and common sound congou is selling at 9½d. per lb.

Sugar.—Our market has ruled unsteady, owing to the additional duties. West India has changed hands at 2s.; other kinds, 1s. 6d. to 2s. per cwt. above last week's currency. The duties on the latter may be, per cwt., so that prices have slightly given way. Floating cargoes of foreign have moved off freely, at very full prices Refined goods have sold somewhat briskly. Brown lumps, 46s. to 48s. 6d.; and grocery, 47s. to 48s. per cwt. The total clearances to the 21st inst. were 2,345,334 cwts., against 1,868,360 ditto in 1854.

Coffee.—For most descriptions there has been only a limited demand. In prices, however, no material change has taken place.

Rice.—Our market rules flat, yet sales have been concluded on former terms. Mid white Bengal has realised 12s. to 12s. 6d. per cwt.

Tallow.—Our market is rather active, and prices continue to advance. P.Y.C., on the spot, has changed hands at 53s. 6d. to 55s. per cwt.; and 54s. to 57s. 6d. to the end of the year.

Spirits.—The demand for rum has ruled tolerably firm, at 1s. 1d. to 2s. 3d. for proof Leewards, and 1s. 11d. to 2s. for East India. For brandy there is an improved inquiry, and the quotations have an upward tendency. Corn spirits are worth 1s. 6d. proof

Hay and Straw. Meadow hay, £3 12s. to £5 5s.; clover ditto, £3 5s. to £5 5s.; and straw, £1 4s. to £1 16s. per load

Wool.—The usual series of colonial wool sales will commence on the 3rd proximo. Our market is heavy, yet scarcely any change has taken place in the quotations.

Potatoes.—The supplies are moderate, and a fair amount of business is doing, at from 75s. to 140s. per ton.

Coals (Friday).—Carr's Hartley, 19s.; Hasting's Hartley, 18s. 6d.; Holywell, 17s. 6d.; Tanfield Moor, 18s. 6d.; Wylam, 17s.; Eden Main, 18s.; Haswell, 19s.; Lambton, 18s. 9d.; Stewart's, 19s. per ton.

Hops (Friday). There is only a moderate inquiry for most kinds of hops, yet last week's prices are nearly supported. The imports are only in bales from Rotterdam, with Mid and East Kent pockets, £14 to £20; Weald of Kent, £13 10s. to £15 15s.; Sussex, £10 10s. to £12 12s

Smithfield (Friday).—To-day's market was seasonably well supplied with meats, most breeds of which sold slowly, at Monday's currency. The show of sheep was good; yet the mutton trade ruled fairly steady, at very full prices. Lambs were in full average supply, and steady request, at extreme rates—viz., 5s. 6d. to 7s. per 8 lbs. We had a good inquiry for calves, the show of which was on the increase, at full quotations. In pigs very little was doing, on former terms. Milch cows sold slowly, at from £14 to £19 each, including their small calf

Per 8 lbs. by the carcass.—Coarse and inferior beasts, 3s. 4d. to 3s. 6d.; middling ditto, 3s. 8d. to 4s.; prime large ditto, 4s. 2d. to 4s. 4d.; prime small ditto, 4s. 6d. to 4s. 8d.; large oxen, 4s. 6d. to 4s. 8d.; prime Scots, &c., 4s. 10d. to 5s.; coarse and inferior sheep, 3s. 6d. to 3s. 8d.; second quality ditto, 3s. 10d. to 4s. 0d.; prime coarse-woolled sheep, 4s. 2d. to 4s. 4d.; prime Southdown ditto, 4s. 6d. to 4s. 8d.; large coarse calves, 4s. 0d. to 4s. 6d.; prime small ditto, 4s. 8d. to 5s. 0d.; large hogs, 3s. 0d. to 3s. 4d.; neat small porkers, 4s. 0d. to 4s. 4d.; lambs, 5s. 6d. to 7s. 0d. Suckling calves, 18s. to 24s. and quarter old store pigs, 20s. to 32s. each. Total supply in the week, 77,040 beasts, 380 sheep or lambs, 7,960 calves, 260 pigs, 340 Foreign beasts, 120 sheep, 200 calves, 200 pigs.

Newgate and Leadenhall Meat.—The trade ruled steady, at the following quotations:—

Per 8 lbs. by the sinking-offal.—Inferior beef, 3s. 2d. to 3s. 6d.; middling ditto, 3s. 8d. to 4s. 0d.; prime large ditto, 4s. 0d. to 4s. 2d.; ditto small ditto, 4s. 4d. to 4s. 6d.; large pork, 3s. 2d. to 3s. 8d.; prime ditto, 3s. 10d. to 4s. 0d.; veal, 3s. 8d. to 4s. 4d.; middling ditto, 4s. 6d. to 4s. 8d.; prime ditto, 4s. 10d. to 5s. 0d.; small pork, 3s. 10d. to 4s. 4d.; lamb, 5s. 8d. to 6s. 8d.

Ceylon Rifle Regiment: F. B. Staples to be Ensign.

Royal Canadian Rifle Regiment: Lieut. A. P. Kerr to be Lieutenant.

LAND TRANSPORT CORPS: Lieut.-Colonel Commandant Sir T. Troubridge, Bart., to be Deputy-Adjutant-General.

STAFF: Captain J. Bunham to be Assistant-Adjutant of a Depôt Battalion; J. W. Macdonald to be Purveyor to the Forces

HOSPITAL STAFF. Staff-Surgeon of the First Class W. Crainkshank, M.D., to be Deputy Inspector-General of Hospitals; Staff-Surgeon of the Second Class J. Mouat, M.D., to be Staff-Surgeon of the First Class. Assistant-Surgeon M. Combe, M.D., to be Staff-Surgeon of the Second Class. V. M. Hessler, J. Hayes, N. P. Betts, T. Kennedy, N. Norris, J. R. Crawford, J. W. Hinmer, G. Bayly, R. R. Blackett, J. Watts, G. T. Bourke, and D Straughan, to be Acting Assistant-Surgeons.

The undermentioned officers and gentlemen, having been selected for service with the Turkish Contingent Force, to be each promoted to a step of local rank while so employed; Militia Colonels Commandant to be Brevet-Colonels: Lieut.-Col. D. F. Evans to be Brigadier-General; Capt. and Lieut.-Colonel Commandant Captains R. Carey, F. F. Maxwell, C. Hall, C. A. Harriman, and W. Coates and R. M. Westmacott (late Captains), to be Majors Lieuts. H. Hamilton, W. Hamilton, W. Hall, W. Hall, and Ensign J. Hall, to be Captains; and Sir J. Stuart, G. H. A. Robeson, J. W. Nelson, W. Guernsey, and H. St. Leger, to be Lieutenants.

BANKRUPTCIES ANNULLED.

H. GOWERTHWAITE, Manningham, Yorkshire, bobbin turner —S. MEADE, Bristol tavern keeper

BANKRUPTS.

J. APPLETON, Sommerford-grove, Stoke Newington-road, dealer in flour.—D. HARRIS, Sutherland-place, Sutherland-square, bookseller.—W. A. PUTNAM, Strand, glass and china dealer.—D. CUTTER and T. HUNTER, Regent-street, Westminster, tailors.—J. LAMB, S. LEWIS, and W. T. ALLUM, Woodhouse, Kent, cement manufacturers. R. PRITCHARD, Commercial-road, Lambeth, builder.—J. and J. M. MACQUEENS, Halifax, Halifax, Yorkshire, woollen cloth merchants. J. WEBB, Scarborough, Yorkshire, hotel keeper.—J. VAN GEORDEN, Liverpool, Hanseat ctic-place, HENRY WORSLEY and J. HAYES, Ishebuton, cotton manufacturers.—J. T., and W. SAINSON, Manchester, dressers of hosiery.—M. BROWN and R. INGHAM, Rawtenstall, Lancashire, powerloom mixin manufacturers.

SCOTCH SEQUESTRATIONS

A. SHIELDS, Dunfermline, grocer.—J. CORMIE, Glasgow, machine maker J. and J. M DONALD, Glasgow, shoemaker.

FRIDAY, APRIL 27.

OFFICE OF ORDNANCE, APRIL 28.

Royal Artillery.—Lieut. F. Miller to be Second Captain

Medical Department: Assistant-Surgeon H. Rocco, M.D., and J. M. S Fogo, to be Surgeons

ADMIRALTY, APRIL 28.

Royal Marines: Cadets H. Woodruff, T. Brewer, H. L. Bourchier, A. Macintosh, H. T. S. Davis, C. W. Carlyon, W. Stirling, W. W. Allnatt, H. T. M. Cooper, F. P. E. M. St. John to be Second Lieutenants.

BANKRUPTCY ANNULLED.

J. BLOOMENTHAL, Rodney-buildings, New Kent-road, lithographic engraver, printer, and account-book manufacturer

BANKRUPTS

A. P. BIHAW, Devonshire-street, Bishopsgate-street, printer and bookseller. —W. P. LOCKWOOD, Wakefield, Yorkshire, chemist and druggist.—J. HAWKES, Weston-super-Mare, Somersetshire, builder.—J. G. PITTAR, Kennington, Surrey, chemist and patent medicine vendor.—J. ALLEN, Birmingham, builder. T. BROWN, Great Guildford-street, boatbuilder, and wharfinger.—W. ALLEN, Bondage-road, St. John's-road, Hackney, builder —J. BOOTH, Bradford, Yorkshire, stuff manufacturer.—W. LONGMAN and T. HARRISON, Glasgow, grocers. MARGARET BOLTON, Marsden, Lancashire, power-loom cloth manufacturer—H. O. BOX, Dursley, Gloucestershire, woollen draper and tailor.

BIRTHS.

On the 18th inst., at Hamilton-place, the Marchioness of Stafford, of a daughter.
On the 18th inst., at Stoke Hamond, Bucks, the Lady Julia Bowyer, of a daughter
On the 20th inst., at the Vicarage, Hartwood, the wife of the Rev. J. Tracey, of a son.
On the 21st inst., at Little Clemham Rectory, the wife of the Rev. R. H. Gray, of a son.
On the 19th inst., 9, Edward-street, Portman-square, Mrs. Thomas Sheppard, of St. Vincent, West Indies, of a son.
On the 22rd instant, at Guildford, Surrey, the wife of Alexander Shakespear, Esq., Bengal Civil Service, of a son.

MARRIAGES.

On the 19th inst., C. P. Moore, M.D., Galbally, county Limerick, to Elisa Mary, second daughter of the late Adam Acres, Hill-park, Berkeley, Surrey, Esq.

On the 17th inst., at All Saints' Church, Emsimore-place, Knightsbridge, H. E. Wemyss Jay, of Portsmouth, Hants, to Caroline, eldest daughter of the late Rear-Admiral and Lady Susan Erskine Wemyss, to Millicent Anne Mary Kennedy Erskine, youngest daughter of Lady A. Hallyburton and the late Hon. J. K. Erskine.

On the 19th inst., at St Paul's Knightsbridge, L. S. W. D. Darner, Captain South Pauller Cavalry, eldest son of the Hon. Col. D. Darner, to the Hon. Harriet Lydia Mostyn, second daughter of Major-General the Lord Rokeby Also, at the same time, F. Sutton, Captain Royal Horse Guards, third son of the R. Sutton, Bart., to Evelyn Mary Stuart, third daughter of the Hon. G. L. D. Danner.

On the 17th inst., at St. George s Church, Dublin, the Rev. I. Brock, of Queen's College, Oxford, eldest son of the Rev. W. Brock, Rector of Bishop's Waltham, Hants, to Eliza Roberts, eldest daughter of T. C. Butler, Esq., of Rosseville, county Carlow

On the 19th inst., at the Vicarage, Hartwood, by the father of the bride, Mr. Watts, late of the Madras Artillery, second son of the late J. W Watts, Hawkesdale-hall, Cumberland, Esq.; to Catharine Agnes, youngest daughter of the late J. Bird, Esq., Madras Civil Service.

On the 18th inst., at the Congregational Church, Kingsland, by the Rev. Henry Allon, Chatham, Arthur, eldest son of the late Rev. G. J. Palmer, to Sarah, fourth daughter of Mr. Joseph Clarement-square, to Mary Anne, third daughter of George Wagstaff, Esq., of Barkett's-buildings, Holborn, and Douglas-road, Canonbury

Also at the same time and place, Kanes James, eldest son of Kanes James Ford, Esq., of Rosebank, Islington, to Elizabeth Harwood, fourth daughter of George Wagstaff, Esq.

On the 23rd inst., at the British Embassy, Paris, by the Rev. C. B Marriott, M.A., Lieut.-Colonel W. D. F. Patton, 74th Highlanders, eldest son of T. Patton, Esq., of Bishop's Hull, and Stoke Court, Somerset, to Julia, only daughter of Sir H. Elphinstone, Bart., of Ore-place, Sussex.

DEATHS.

On the 13th inst., of consumption, Mr. James Hundson, of the Manor Farm, Little Ilford, leaving a widow and five young children to deplore his loss, aged 34.

On the 22nd inst., at Brighton, the Viscount Lifford, aged 79

On the 5th inst., at Bath, the Lady Louisa Duncombe, daughter of the late Earl of Listowel.

On the 20th inst., at the Rectory, St. Martin Outwich, the Rev. J. J. Ellis, M.A., F.S.A., for thirty-four years Rector of that parish, and Chaplain to the Merchant Taylors' Company, aged 68

On the 21st inst., in Paris, A. Akers, Esq., of Malling Abbey, Magistrate and Deputy-Lieutenant of the county of Kent, aged 56.

On the 12th inst., the Rev. T. U. Gibson, Vicar of Sarton, Westmoreland, aged 36.

On the 24th inst., at Gordon-street, Frank, the infant son of Mr M. Lemon

On the 21st inst., at Southampton, Isabella Caroline, wife of Lieut.-Colonel H. Mound, and sister of the late Lord Langdale.

THE EMPEROR AND EMPRESS OF THE FRENCH AT THE BANQUET IN THE GUILDHALL

DEPARTURE OF THE IMPERIAL VISITORS, IN "THE EMPRESS" STEAMER, FOR BOULOGNE

THE ILLUSTRATED LONDON NEWS

No. 741.—VOL. XXVI.] SATURDAY, MAY 5, 1855. [WITH A SUPPLEMENT, SIXPENCE.

EXTENSION OF THE WAR.

THE rupture of the Conferences at Vienna has not taken the world by surprise. There were a few people in England, as well as elsewhere, who imagined that injustice might have been done to Russia in the course of the struggle; and that the Czar—not this time the man of the "mild eyes," but the man of the "mild heart" and the peaceable character—would accept the favourable conditions offered to him by Great Britain, France, and Austria. Are these persons at length undeceived? Do they not see as clearly as the rest of mankind that there are no means of negotiating with this all-grasping Power? and that the Sword of Victory is the only argument to which it will listen? If they do not, they are blind to facts and deaf to reason, and may be safely left to their delusion, and to the enjoyment, if any, which it can afford them. There is less chance than ever that their minority will ever grow large enough to be troublesome.

There required a last and unmistakable proof that the real object of Russia in fortifying Sebastopol and Kherson, in keeping up a powerful fleet in the Black Sea, and in invading Moldavia and Wallachia, was not religious but political—that the so-called rights of the Greek Christians, of which the late Emperor Nicholas spoke so pathetically, were a cloak for his hypocrisy, and a pretext for his ambition; and that the business to be done was the conquest of Turkey. The proof has been afforded at Vienna. The Czar has positively refused to diminish the number of his ships of war in the Euxine, although he has no legitimate or honest use for them. He has also refused to consider the Black Sea in any other light than as the joint property of himself and Turkey—a *mare clausum* where he and the Sultan may fight if they please, but where no ther nation shall have the right to send even so much as a gunboat. How is it possible for any one to doubt, after this, that Russia wants Constantinople, and is determined to obtain it?

Austria, which long ago adhered to the Western alliance by the pens of her Ambassadors and Ministers of State, will now enter into the struggle with the swords of her Generals. The three Powers have proved, by their diplomatic patience, how unwilling they were to make war, and how desirous they were to give Russia a chance of acceding to honourable terms of pacification. They have now to prove by their military prowess, and by a display of their whole strength and resources, that they are equal to the high duty which they have assumed. We speak of the three Powers advisedly; for it is more than improbable—it is impossible—that Austria will be neutral in such a strife. She will unite herself with France and England, heart and soul, and will bring to the common cause one of the most splendid and best-appointed armies that ever was formed in ancient or modern times. The result of such a struggle may be protracted, but it is certain. If the Emperor of Russia were not impelled by circumstances, occult to Europe, but strong enough to force him to undertake a resistance beyond the measure of his ability, he would even at this last moment seek the means to escape from the increasing perils that surround him. Should his friend in Berlin decide upon coming to his assistance, the result would be the same—inevitable defeat; with this difference to Prussia, that the punishment justly inflicted upon the original offender would fall upon the head of his accessory, and that the next settlement of Europe would leave Prussia a smaller and less dignified kingdom than it found her.

The war will immediately assume new dimensions. It is mischievous to disguise from ourselves its real character. The Allies are not to play at war. It is blood not rose-water that is in question. They have not to act a tragedy with wooden swords, upon a stage, but to perform a tragedy of life and death, with the certainty that all the shame, humiliation, and misery which they may abstain from inflicting upon their foe will be inflicted upon themselves. There must be no more false philanthropy in this business; no morbid sentimentalism, and affectation of an effeminate or emasculated courtesy in sparing this city or that city, or in refraining to inflict all possible hurt and damage upon every port, arsenal, and town of the enemy's territory. The sharper the war the shorter. The more complete the discomfiture of the foe, the greater the chance that the peace, which is the only object that Christian and civilised nations can fight for, will be long and happy. If the British and French fleets had taken vengeance for Sinope; if they had not left of Odessa one stone standing upon another; and if they had visited with a similar destruction every accessible Russian port in the Baltic, as they might have done, it is probable that much of the best and bravest blood of England and France, that has been shed in vain before Sebastopol, would have been spared for nobler uses. Europe ought to know that she has an enemy on whom mercy is thrown away; nay, worse—an enemy who mistakes clemency for fear, and who is encouraged to persist in evil by every act of forbearance exhibited towards him. Alexander II. has hitherto seen the smiling countenance of European diplomacy. The time has come when he must be made familiar with the sterner features of its justice.

Let us hope that Peace, when next she shows her blessed face, will find the nations wiser than they were on the unhappy day when she took her departure from amongst them. The war, if it show to some extent the Civilisation, shows to an extent still greater the Barbarism, of the European system. Whatever may be the individual character of its separate States, Europe, collec-

BEFORE SEBASTOPOL.—THE RIGHT SIEGE TRAIN MOUNTING MORTARS FOR THE 21-GUN BATTERY.—(SEE NEXT PAGE.)

tively, is not civilised. If it were, there could be no such war as that which the guilty ambition of the late, and the no less guilty obstinacy of the present, Czar have forced upon it. In a state of true and religious civilisation LAW is paramount. The individual who robs or murders, or attempts to rob or murder his neighbour, has an opponent in every citizen. There is no man, however lowly, who may not be forced to lend his aid for the restraint or punishment of the malefactor. All the complex machinery of Government, from the humblest constable in the street and janitor in the prison to the Judge upon the Bench and the Sovereign upon the Throne, and through them to the great body politic which pays and upholds them all, are called upon to exercise their functions, either actively or passively, that a wrong may not be done; or, if done, that it may be punished, as an example and a warning for the future. But in the European community there is no such thing as Law, understood in this sense. Every member of it is free to act in the wrong if he pleases, and every other member is free to aid and abet him in it if disposed to do so; and there is no recognised authority that has the power or the right to interfere. Barbarian Russia attacked barbarian Turkey, whom it thought to be sick and dying; and the bulk of the States of barbarian Europe looked on, undecided whether to take the part of the victim against the aggressor, or that of the aggressor against the victim—either to share in the plunder, or to ask the aid of the conqueror at a future day, when a similar outrage against another State might suit their interest or tempt their cupidity. France and England alone vindicated the title of Europe to rank as an aggregation of civilised communities; by standing forward with noble disinterestedness in the cause of right. In such a cause they would not have stood alone, even for a day, if the public law of Europe had been based on just and immutable foundations. Instead of hesitating which side it would join, every State would have declar ed against Russia—for the same reason, and in the same interest, that every juryman in London or Paris declares against the thief or the murderer, or, as every honest man declares, against the malefactor, surprised and taken in the act. Had this been, as it ought to be, the public law of Europe, and had such been the responsibility of each component member of the system, not only Austria and Prussia, and Powers that claim to be great and mighty, but the very smallest States, such as Switzerland, Denmark, and Portugal, and even Hamburg and the Hanse Towns, would have come forward with their armies, great or small, their fleets, if they had any, or their quota of men and money, in support of the Universal League against the wrong-doer. Will the Powers of Europe never be able to organise for their mutual prosperity and happiness a league like this?—a league in virtue of which a war between any two or more of its several members will become impossible, or, if possible, only possible for a moment, to be quashed at the outset by the union of all States and Governments against the guilty belligerents. Until a system that shall accomplish this object shall be established Europe will be but half civilised. The auspicious friendship of Great Britain and France—strong enough in themselves to defy a world in arms—offers the means by which such an alliance may be effected and perpetuated. Such an alliance would be worthy of the high name of "Holy." If, in consequence of the present war, and of the incalculable miseries which it will inevitably inflict both upon the innocent and the guilty, the long-tormented and oppressed nations of Europe shall learn wisdom enough to unite with France and Great Britain with such an object, the next Peace will not only be far longer and more solid than the last; but the Civilisation of Europe will be worthy of its pretensions, and will have nothing to fear from Russian or any other barbarism. If such an alliance be not formed, a state of warfare will be, as heretofore, the normal condition of nations professing to be Christian, and peace will be nothing but accident.

MOUNTING A MORTAR.

THE mortar batteries appear to have been pretty well worked during the bombardment, although a portion of them were almost useless on the first day, owing to the wetness of the ground, the rain—which did the Allies good service in preventing the Russians from crossing the Tchernaya—having injured the beds of the mortars. In the 13-inch mortar battery many of the beds were so warped by the rain that they could not be used on the first day of the bombardment. A few hours of dry weather, however, soon put all to rights, as the Russians in front of them speedily found to their cost.

The mounting a mortar must be a work of some difficulty. The weight of those in the 21-gun battery, No. 1, right siege train, represented in the preceding page, varies from 35 to 39 cwts. each. They are calculated to throw shells upwards of 4000 yards.

SAXE-COBURG-GOTHA.—The Government of Saxe-Coburg-Gotha has just promulgated the law of succession for the duchy. It is to the effect that, in case the reigning Duke should die without leaving direct heirs, the succession shall pass to Prince Albert and his descendants, but that the reigning King of England and the heir presumptive to the throne of England shall be excluded. It is further enacted that if, when the succession shall become vacant, there shall be no descendant qualified to succeed, other than the King and heir presumptive of England, the King and heir shall be bound to cause the duchies to be administered by a governor, until a descendant qualified to succeed shall have attained his majority. The upanage of the heir presumptive to the duchies is fixed from his majority at 18,000 florins (about £1800) a year. According to this arrangement, upon the death of the reigning Duke, who has no child, Prince Alfred would become the heir presumptive, Prince Albert immediately succeeding.

THE GREEKS AT SEBASTOPOL.—The reports of the night sorties of March last made frequent mention of warriors in Greek costume fighting on the Russian side. The leader of these men,—who form a free corps—is Aristides Christoveri, a native of Mesembria, on the Black Sea coast. When a boy he was taken to Odessa, and educated at the commercial school there. When a young man he forsook commercial pursuits to take part in the war of Greek Independence, and from that time served in Greece until 1854. Last summer, when it became plain that the Allies would not allow Greece to be made the basis of clandestine operations against Turkey, Christoveri, with many other Greeks, made for Bessarabia. He was decorated by the late Czar with the order of St. Anne.

THE CHURCH OF ENGLAND AND THE FRENCH EXHIBITION.—The following notice has been issued:—"As a great number of British subjects may be expected to visit Paris during the ensuing summer, and as the places of Divine worship in connection with the Church of England are inadequate to the emergency, the Bishop of London has been desirous that additional means of attending the ordinances of the Church should be afforded to many who might otherwise, in the sight of the French people, spend the Lord's-day in a manner unworthy of their Christian profession. The committee appointed by his Lordship for this purpose have to inform the English visiting Paris between the middle of May and the end of September that the Consul Presbytéral of the Reformed Church of Paris have generously granted the use of their large and handsome Church of the Oratoire, Rue St. Honoré, for Divine service, according to the usage of the Church of England, on the 30th of May and the Sundays following, at two o'clock p.m.—evening prayer, with a sermon. The committee have further to give notice that the Holy Communion will be celebrated every Sunday morning, at eight o'clock, in the Church of the Oratoire, the service to close at half-past nine.

ATTEMPTED ASSASSINATION OF LOUIS NAPOLEON.

The attempt made on the life of the French Emperor last Saturday evening has been the great topic of speculation in that city this week, and for a while the siege of Sebastopol and the Conferences of Vienna were lost sight of in the horror excited by such an act of villany—the contemplation of the consequences to Europe had it taken effect—and the general satisfaction at its failure. It appears that the Emperor, accompanied by two of his household, Colonel Ney and Colonel Valabrèque, in plain clothes, left the palace of the Tuileries about five o'clock on Saturday afternoon, to take his usual ride in the Champs Elysées, and join the Empress, who had preceded him, and was at that moment in the Alley Dauphine, in the Bois de Boulogne. His Majesty on these occasions is never accompanied by an escort, and was only followed by two grooms at some distance. The weather was fine, and the grand avenue of the Champs Elysées, through which he passed at his ordinary slow pace, as well as the side alleys, was thronged with people, who showed the usual courtesy, and saluted him respectfully. As he approached the Barrière de l'Etoile, and when nearly opposite the well-known place of amusement the Château des Fleurs, a man, apparently about thirty-six years old, of dark complexion, and a little under the middle size, advanced forward from the throngs that crowded the pathway on the right, and approached to within five or six paces of the Emperor. He put one hand to his hat as if to salute his Majesty, who was in the act of replying to the compliment, when he drew a pistol from underneath his grey paletot, deliberately presented it at the Emperor, and fired. At the same moment Colonel Ney, who was on the Emperor's right hand, but riding a very little to the rear, advanced his horse, when the assassin, supporting his pistol on his arm, fired a second shot. At the first report the Emperor's horse shied a little, but it was probably that movement which saved the rider, together with the treacherous motion of the assassin's arm, occasioned by the failure of his first attempt. Neither shot took effect. The second ball is said to have grazed the Emperor's hat, or even passed through it, but this is not known with any certainty. The shots were very sharp, and the report loud enough to be heard on the third floor of the houses on the side of the avenue. The assassin was at once seized by two mesons who were working at a house hard by, and who had left the building to have a sight of the Emperor as he passed. He was thrown by them on the ground. A police agent, named Alexander, a native of Corsica, whose duty it is to follow the Emperor when riding or driving without escort, leaped out of the small carriage he occupied, ran to the spot where the assassin was struggling with his captors, and prevented him from drawing another pistol. The police agent took hold of him, and on the other made the most violent attempts to shoot those who detained him, inflicted on him, in self defence, two wounds with a poniard cane The sergeant-de-ville aiding, the police agent succeeded in mastering and disarming him, but it required all their efforts to prevent him from being torn to pieces by the people. He was hurriedly taken off to the Octrol station at the barrier, which was not far distant, and there shel tered from the popular rage until a carriage could be brought, in which he was conveyed under the guidance of the police to the Conciergerie

After the first shot was fired the Emperor bent his head a little, either by an involuntary movement to avoid the bullet or owing to the horse shying. When he saw the assasin in the hands of the people, and his clothes torn, he called out to spare him. The Emperor did not lose his presence of mind for an instant. He gratefully and gracefully replied by frequently taking off his hat and bowing to the thousand acclamations with which he was at once saluted as he still slowly advanced towards the Triumphal Arch. A messenger had been sent on as a gallop to inform the Empress, who was at the Porte Dauphine (Bois de Boulogne), of what had occurred, and to reassure her as to the safety of her husband. In less than half an hour the Empress returned from her drive in an open carriage, with the Emperor riding close by. The sight was touching in the extreme. Her Majesty was deeply affected; her tears flowed in spite of her; she in vain essayed to dry them, and she sobbed convulsively amid her efforts to smile with joy at her husband's escape from the murderer. Evidently she could not subdue her emotion: she leant back in her carriage, and relieved her heart in an uncontrolled burst of tears. Then, indeed, it was that the people who thronged the way gave full vent to the more generous feelings of our nature. The sight of the young and lovely wife unable to restrain the violence of her feelings produced an instantaneous effect; the shouts at once rose from the thousands who beheld her, and hundreds of workmen who were employed on a row of houses constructing near the spot from which the assassin fired had the half-finished walls, the window-sills, or strung to the facades of the folding, and rent the air with their acclamations. Accompanied by these manifestations of popular feeling, the Empress proceeded to the Palace. In a short time the news was spread abroad, and the members of the Imperial Family, the Ambassadors, the Ministers of the Emperor, the high functionaries of State, and the members of the household, besides a considerable number of other persons having no functions under the Government, or in the Palace, hastened to present their congratulations.

The Emperor had previously announced his intention to visit that of the Empress to be present at the Opera Comique on the Boulevards Italiens, nearly opposite the Rue Laffitte. He and the Empress, notwithstanding what had occurred, were punctual to their word. They arrived at the theatre about nine o'clock; but long before that hour an immense crowd had collected on the boulevard, from the Madeleine to the Rue Vivienne, to manifest their sympathy at his escape. It is calculated that there could not have been less than 200,000 people of every condition collected. The reception was most enthusiastic as the Imperial carriages, attended by an escort of Guides, drove up the Rue de la Paix and Boulevard until they stopped at the door of the theatre; and on their Majesties appearing in their box the whole house rose and uttered the warmest acclamations. For a considerable time it was found impossible to commence the piece, and during the performance the audience, as if unable to keep down its feelings, rose three or four times to give vent to them. The Emperor and Empress left the house at half past eleven, and even at that hour the multitude still lined the Boulevards; the shouting was unabated, as before, and followed them until they entered the palace of the Tuileries

The assassin, on his arrival at the Conciergerie, was at once examined by the Prefect of Police, and then by the Minister of Justice. The examination is kept secret, but it appears that his name is, according to his own account, Pianori. He professes himself to be a shoemaker from Rome, where he states he suffered much from the French bombardment of that city, and that since then he has sworn a personal hatred to the Emperor, and was resolved to kill him. He is a man of about twenty-five years of age, somewhat under the middle stature. His hair is dark brown, and he wears a beard and moustachios. He is rather fair, with high cheek bones, and the expression of his face has nothing in it indicative of murderous. He was dressed in snuff-coloured trousers, dark brown coat (under this coat he wore another of light blue, meaning no doubt to strip off the brown in the confusion, and attempt escape); and he had new shoes. He wore an ordinary black hat, in which are the words, "Crystal Palace," printed in English. There were signs of blood on the left shoulder of his coat, which it appears originated from a slight wound inflicted by one of the armed police, although it is stated that the assasin tried to stab himself. The dagger in his possession was an ordinary weapon with a tin sabbard. Two of the pistols were small pocket weapons; but the third was larger, with a wider bore, and capable of carring a couple of slugs. The wretched man would not speak a single word. He appeared perfectly composed, and regarded those around him with the utmost indifference. A considerable sum of English money was found on his person, and various reports are afloat as to his instigators. It is stated that he came over from England, and is an italian exile belonging to some secret society. One thing is quite certain, the act was premeditated, and his not speaking and nothing being found upon his person would indicate a fear to compromise others, and hence those precautions. The police will not reveal what may take place in the prison, as the object should be to ascertain if the unhappy man has any accomplices.

A M. Daneel, an Italian refugee, who was an acquaintance of Pianori, and in the habit of meeting him at the Café de France, near the Palais Royal, is in custody. Daneel protests his innocence, and entire ignorance of Pianori's projects.

The Archbishop of Paris ordered a "Te Deum" in all the churches on Sunday evening.

It was intended at first that the Sunday papers should not notice the attempt, and it was not till ten o'clock on Saturday night, when the popular manifestation was so enthusiastic and so general in favour of the Emperor and Empress, that the official communication was sent round to them. There can be no doubt that in Paris, among people of all classes, there is but one opinion—that of indignation against the murderer, of admiration at the cool courage of the Emperor, and of tender and affectionate sympathy for the Empress.

DESPATCHES FROM LORD RAGLAN.

War Department, May 2, 1855.

Lord Panmure has this day received two despatches and their enclosures, of which the following are copies, addressed to his Lordship by Field-Marshal the Lord Raglan, G.C.B.:—

Before Sebastopol, April 17.

My Lord,—I have the honour to transmit for your Lordship's information a letter from the Inspector-General of Hospitals, expressing his satisfaction in being able to report that the sanitary condition of the army continues gradually to improve, and the mortality from disease to diminish.

The fine of both the French and English armies has been continued upon Sebastopol since I addressed your Lordship on the 14th instant, and, though superior to that of the enemy, it has not produced that permanent effect which might have been anticipated from its constancy, power, and accuracy.

The guns of the Russians have been turned upon some of our advanced works in vast numbers, and in one particular instance the injury sustained by a battery was so great that the unremitting exertions of Captains Henry and Walcot, and the gallantry and determination of the artillerymen under their orders, alone enabled them to keep up the fire and to maintain themselves in it.

In another battery yesterday a shell burst close to the magazine, which in consequence exploded—killing, I am much concerned to say, one man, wounding two most severely, and seven in a less degree.

Both the batteries I have mentioned have been repaired and restored to their original condition.

I enclose the list of casualties that have arisen between the 13th and 15th inst. I have to lament the loss of two young and promising officers, who had only lately joined the army—Lieutenant Preston, of the 88th Regiment, and Lieutenant Mitchell, of the Artillery; and I regret to add that two others have been severely wounded—Captain Green, of the East India Company's Service, who has been employed throughout the siege as an Assistant Engineer, with great credit to himself and every advantage to the service; and Captain Donovan, of the 33rd, who has most zealously served from the commencement of the campaign.

The French blew up several small mines in front of the Bastion du Mât after sunset on Sunday evening, with a view to establish a parallel on the spot. This operation greatly alarmed the enemy, who at once commenced a heavy fire of cannon and musketry in every direction from that part of the town, to which they kept up for a considerable time. It occasioned no harm on our left attack, upon which a part of it was directed, and I hope did little injury to our Allies

Several hundreds of the Russian cavalry and a small body of Cossacks appeared on the low range of heights in front of Balaclava this morning, and remained about an hour, when they retired, the greater portion by the bridge of Tractea. The object of this movement was probably a reconnaissance

The Lord Panmure, &c. I have, &c., RAGLAN.

RETURNS OF KILLED AND WOUNDED

Officers Killed from April 13 to 15 inclusive. 88th Foot: Lieutenant H. B. Preston. Royal Artillery: Lieutenant R. A. Mitchell.

Officers Wounded from April 13 to 15 inclusive.—Royal Engineers: Lieutenant G. Graham, slightly. Royal Artillery: Assistant-Surgeon H. W. Cockerill, slightly. Royal Engineers: Captain and Assistant Engineer H. Green, H. E., I. C. Service, severely. 33rd Foot: Captain E. W. Donovan, severely.

Non-commissioned Officers and Privates Killed from April 13 to 15 inclusive.—50th Foot: Quartermaster-Sergeant Thomas Clifford, Private Thomas McNamara. Royal Artillery: Sergeant Alexander Jamieson. Royal Engineers and Miners: Private Joseph McAsh. 9th Foot: Private Michael Sheady and William Toby. Royal Artillery: Sergeant John Satharland, Private Wolfred Boyd, Gunners James Birch, James Hawley, Henry Mcquithe, and [illegible]ons. 34th Foot: Private Michael Byrne. 97th: Private James Knight. 2nd Battalion 8th Brigade. Corporal Thomas [illegible]mith, Royal Sappers and Miners, Private John Le Shrid[illegible].

Non-commissioned Officers and Privates Wounded from the 13th to 15th April, inclusive. 4th Foot: Private Patrick Connell, slightly. 9th Foot: James Allen, dangerously. 50th: Sergeant Thomas O'Brien, slightly; Private Michael [illegible] slightly; Private. Thomas Barker, severely died. Private John [illegible] slightly 97th: Private William Mclaughlin, slightly. Royal Artillery: Gunner George Warner, [illegible]; Bombardier James Lloyd, severely; Alexander Adams and Alfred Reeves, [illegible]s; William Sinclair and Thomas Tear, severely; William Grant and Thomas Martin, slightly. 4th Foot: Lance-Sergeants John Culligan and [illegible], severely; Privates William Campbell and [illegible] Turner, slightly. Private Edwin Draper, severely. 9th: Privates Martin Hagarty, severely; Joseph Law, dangerously; William Walsh, slightly. 23rd: Private John O'Neill, slightly. 34th: Private Michael Meehan, slightly. 88th: Private Thomas Carter, dangerously; [illegible] Private John Cullinane, severely. 90th, [illegible]. Private [illegible] slightly. [illegible] Private [illegible] and [illegible] Lawless, severely. [illegible] Private [illegible] and [illegible] Thomas, slightly. [illegible] and George Park, severely. Edward [illegible] Thomas [illegible] Matthew Cowdy, dangerously; Gunner James Lobert and James Sharp, slightly. James Swan, severely. Sergeant Sydney Stewart, Sergeant Augus Clarke, and Gunner William Dick, slightly. Royal Sappers and Miners: Private William Small, severely. 7th Foot: Private Richard Bowman, slightly. 14th: Corporal William Ryland, slightly. 33rd: Lance Corporal Denis Long, slightly; Privates William Fowler, slightly, Daniel Larkin, [illegible]. 34th: Private Peter Young, severely. 39th: Private [illegible] Private Alfred Hancock, slightly. 41st: Private John [illegible], severely. 47th: Private James White, slightly [illegible] and William Barnhill severely. 88th: Private [illegible] Private [illegible] Malone, Joseph Harrison, Joseph Bunting [illegible] Mackey, and [illegible] Thomas Hewson, slightly. 90th: Private Joseph [illegible] and [illegible] severely. 97th: Private John Franklin, dangerously. 2nd Battalion 8th Brigade: Private Henry Wright, slightly. Royal Artillery: Corporal Francis Wood, severely; Bombardier [illegible] Davidson and William [illegible].

A Return of Casualties in the Royal Navy, from the 1st to the 8th April, 11 to 15 inclusive:—Killed: Mr. Arthur Nicholls, A.B.; John Hobson, A.B.; [illegible] Hunter, A.B., Leander; John Trine, A.B., Queen; John Woodford, Ord., Wasp; [illegible] Charles Green, Ord., Leander. Wounded: Patrick Flynn, Ord., Leander; [illegible] Edward London; Michael Lanson, Leander, severely; [illegible] Edward Broughton, A.B., Queen, severely; [illegible] George Carter, Ord., Wasp, slightly. Contused: John Linnington, A.B., Leander; William Hayward, coxswain cutter, Rodney; William Hinchley, Ord., Wasp, slightly; John Keenan, A.B., Leander, severely; William Nash, [illegible]. [illegible] Queen; [illegible] A.B., Queen, severely; [illegible] Ord., Leander, severely; [illegible] Edward Smith, Ord., London; William [illegible] Ord., Wasp, slightly; Charles Childs, Ord., Rodney, dangerously; James Woodgate, L.S., Queen; [illegible] A.B., Leander; William Turner, Ord., Leander; Daniel M'Carthy, A.B., Queen; [illegible] Ord., and George Hawden, L.S., Leander, slightly.

War Department, May 4, 1855.

Lord Panmure has this day received a despatch and its enclosures, of which the following are copies, addressed to his Lordship by Field Marshal the Lord Raglan, G.C.B.

Before Sebastopol, April 21

My Lord,—Omer Pacha having considered it expedient to make a reconnaissance in front of Balaclava, with a view to ascertain what force the enemy had on the Tchernaya, he proceeded at daylight on the 19th inst., by the extreme right of Sir Colin Campbell's position, towards Kamara, with about twelve battalions of Turkish infantry; having in the plan on his left a body of French cavalry and a battery of horse artillery, under General Forey, and two squadrons of heavy cavalry and two squadrons of the 10th Hussars (the whole of which they have, I am happy to say, arrived), and half a troop of horse artillery, under Colonel Parlby: these detachments of French and English troops having been placed at his Highness' disposal by General Canrobert and myself.

The enemy showed only a few Cossacks on this side of the river, who remained on a height overlooking Chagounia till driven from it by a few discharges of rockets by the French artillery; and on the other side, behind the village, a small force with four guns only was visible.

Omer Pacha did not think it desirable to move across the river, but, having threw after he had satisfied himself that the enemy were not in strength, and the troops returned to their camp, the infantry covered by the cavalry and artillery The appearance of the Turkish army was very satisfactory.

The rifle-pits, in front of the approach from the advance of our trenches on the extreme right, were attacked and carried by assault the night before last in the most gallant manner, by a detachment of the 77th Regiment under Colonel Egerton, forming part of the additional force sent to reinforce the guard in the trenches in the evening

The resistance of the enemy, although obstinate, was speedily overcome by the impetuosity of our troops; and the pit, which it was desirable to retain, was, without the loss of a moment, entrenched with our approach, and thereby furnished protection to the working party to continue its labours without interruption for a considerable time. At the interval, however, of about three hours the enemy brought a heavy fire of artillery and musketry upon the party in advance of the pit, into which they entered, and which they effectually defended and maintained; but this brilliant achievement was not accomplished without considerable sacrifice of life; and it is most painful to me to have to announce to your Lordship the death of Colonel Egerton, of the 77th, who was unfortunately killed when forming troops for the support of those on the extreme advance, and of that of Captain Lempriere, of the same regiment, who fell in the first affair, in which also Colonel Egerton received a contusion that may incapacitated him for duty for a few minutes; and five officers were wounded, three of them dangerously.

Colonel Egerton was an officer of superior merit, and conducted all his duties, whether in the camp or in the field, in a manner highly to his own honour, and greatly to the advantage of the public; and her Majesty's service could not have sustained a more severe loss, and it is so felt in this army and in the 77th, where he was much beloved, and is deeply lamented.

Captain Lempriere was a very young but most promising officer.

Captain Gray, whose leg has since been amputated, and Lieutenant Baynes, are both most valuable officers of Engineers; as is Captain King, of the same corps, who was wounded two nights before

Brigadier-General Lockyer, who was the General Officer of the trenches in the night attack; Lieut.-Colonel Mundy, of the 33rd, who succeeded in the command of the troops engaged in the operation on the death of Colonel Egerton; and Captain Gwilt, of the 34th, deserve to be most favourably mentioned; and Lieut.-Colonel Tylden, the officer of Engineers in charge of the night attack, distinguished himself [illegible] he has done on many previous occasions—in a remarkable manner. The conduct of the troops was admirable.

I beg to lay before your Lordship the list of casualties which have occurred since the return was made out which I forwarded to you on the 17th

In my despatch of the 22nd day, I informed your Lordship that a magazine had exploded on one of our batteries; but I omitted to state that Captain Dixon, of the Artillery, availed himself of the opportunity to evince the coolest judgment and most determined gallantry, by instantly opening a gun upon the enemy, notwithstanding the confusion which the bursting of the shell had occasioned, the number of men who had suffered from it, and the great damage the battery had sustained.

I have the satisfaction to report to your Lordship the arrival of the 43th and Royal Regiments from Corfu, in her Majesty's ships *Leopard* and *Sidon*.

I have omitted to mention in the body of this letter that two squadrons of Turkish cavalry were also in the plain.

I have, &c.,

The Lord Panmure, &c. RAGLAN.

LIST OF KILLED AND WOUNDED

Nominal Return of Officers who have been Killed from April 16 to 19, inclusive. 77th Foot Col T L. Egerton, Capt A. Lang, note

Nominal Return of Officers who have been Wounded from April 16 to 19, inclusive. 2nd Battalion Rifle Brigade—Lieut-Colonel A. Norcott, severely; Lieut and Adjt R. Lysley, severely; Lieut and Adjt H. Trevor, severely. 77th Foot: Capt H. Gilby, and Lieut and Adjt. T. M. Rose, slightly. Royal Engineers: Capt H. C. Crowe, and Lieut. C. E. S. Haynes, dangerously.

Nominal Return of Corporal promoted Officers and Privates Killed from 16th to 19th April, inclusive. 2nd Foot: Private Thomas Heenigar. Royal Artillery, Gunners Mathew M'Queen and Peter Hanlon. 7th Foot—Private John Brown. 23rd: Private John Swan. 34th: Private Frederick Hall. 44th: Private Thomas Delwell. 68th: Private William Curran. 95th: Private Edward Hall. 2nd Battalion Rifle Brigade: Private Patrick Calvey. 31st Foot: Private John Russell. 33rd: Private Peter Meeke; and Thos Neville. 49th: Lance Corporal Wm Smith and Private Wm Handley. 77th: Private Richard Jones. 88th: Private Thomas Kinsbie, George Park, James Leahy, and Alex Stewart. Royal Sappers and Miners Private Isaac Evans

Nominal Return of Non-Commissioned Officers and Privates Wounded from April 16 to 19 inclusive. 1st Foot: Sergeant John Wallace, slightly. 3rd Private Jas Behan, severely. 30th: Private John Desmond, dangerously (since dead). 33rd: Private Thomas Doyle, severely. 38th: Lance Corporal Michael Quirke, slightly; Private David Hamilton, severely. 41st: Colour-Sergeant John Fitzpatrick, dangerously. 77th: Private Michael Reynolds, slightly. 88th: Private M'Goure, severely. 90th: Privates David Pawis and Philip Adams, severely. 95th: Private James Pearson, slightly. Royal Artillery, Gunners Henry Adams, Wesley Baker, John Loughery, slightly; Acting Bombardier Peter McDonald, severely. Sappers: Hill Evans, severely; William Ford, George Bowden, Alfred Mead, Richard Griffiths, Wm. George Riley, Lancelot Sapiret, Thomas Teddicot, slightly. 2nd: Private William Wallace, severely. 23rd: Private Patrick Whelehan, slightly. 33rd: Private Timothy Downey, severely; James Ryan, slightly. 34th: Corporal Edwin Wilcox, and Private William Mc[illegible], slightly. 41st: Colour-Sergeant [illegible], severely. 77th: Corporal H. Vale Williams, slightly; Private [illegible], severely, and [illegible], slightly. 97th: Private Mark [illegible], slightly. 97th: Private Mark [illegible], slightly. Royal Artillery: Gunners Moore and Patrick Connor, severely; Gunner M'Evoy, severely. Gunners on Miners Privates [illegible] Hobbs, severely; Alexander [illegible], severely. Private Jas Pearson, severely. Sappers: [illegible], severely. 38th: Private Matthew Mayhew, severely. 41st: Private Michael Hanrahan, severely. 77th: Private Michael Reynolds, severely. 88th: Private William Smith, severely. 49th: Private Michael Hartigan, severely. Private William Smith, severely. 49th: Private Michael Hartigan, severely. Private William Smith, severely. 49th: Private Michael Hartigan, severely.

SCENE FROM "THE NEW HAYMARKET SPRING MEETING," AT THE HAYMARKET THEATRE.—"THE LORD MAYOR'S FOOL" INTRODUCING "WESTMINSTER" TO "LONDON."

"THE NEW HAYMARKET SPRING MEETING."

The accompanying Illustration represents the meeting of *London* and *Westminster*, and the interposition of the *Fool*, giving the moral of the scene. The portraits of Mrs. Caroline White, Miss Harriett Gordon, and Mr Buckstone, lend an interest to the picture. The matter of complaint against the City is, that within its walls it fails to encourage the stage, and that people must go as far as Norton Folgate for a theatre. This civic prejudice is old enough to be obsolete, and the rejection of the drama, so that it has to find refuge in extramural establishments is anything but creditable to the intelligence of the authorities. The City of London ought, as a duty, to have a model theatre for the high drama, and might do much good in this way, and find beneficial occupation for funds now wasted. The attention bestowed by the Haymarket manager on the National Standard and its neighbour theatre, speaks much in favour of his liberality. There the drama is at present flourishing in its severer forms, and it is to the metropolitan Orient that we must look for promising indications of a new era. *Westminster*, on the other hand, has an advantage in its various exhibitions, some of which are of a highly original character, and others so unique, that they secure a long run without fear of competition.

"MOTHER GOOSE'S FAIRY TALES."

The scene which we have this week presented has for its subject the contest between Miss Woolgar as *Lively Jack*, and Mr. Paul Bedford as the *Wolf*, in the story of "Red Riding Hood." *Mother Goose* herself, admirably impersonated by Miss Wyndham, forms part of the group, with the heroine so interestingly represented by Miss Mary Keeley. The contest is most perseveringly maintained on the part of Miss Woolgar, who wins the triumph by indomitable and persevering energy. The thorough-going air and spirit which this inimitable actress lends to all such characterisations require the exercise of a peculiar art, melodramatic in its basis, but not to be obtained without prolonged practice. The art demands, indeed, the perfectly experienced actress; yet they are, after all, thankless parts. But Miss Woolgar has, from the beginning, consulted the advantage of the theatre in preference to her own, and has, we believe, as she well deserves, found her private account in it. The public are as much indebted to her for her kindness as for her talent.

SADLER'S WELLS. The courtesy of visiting each other's houses, now adopted by the managers of our theatres, is one that might be accepted as the test of our present civilisation. Mr. Webster and Madame Celeste make their appearance here, while Mr. Phelps is enjoying the honours of a guest on Mr. Creswick's boards. The favourite Adelphi piece introduced to the Islington audience on Monday was well received. The "Green Bushes" is a stock attraction in the Strand, and its merits are such as to command recognition wherever acted. Madame Celeste's *Miami* is an interesting conception, romantically realised, and one which always displays the best points of this artiste's acting. It touches the feelings with extraordinary power; and, aided by the situations which the dramatist has so adroitly contrived, enforces an irresistible appeal on the sympathies. Madame Celeste evidently aimed on this occasion to commend her art to the judgment of an audience now so long accustomed to the highest drama; and her success was complete.

SCENE FROM THE NEW EXTRAVAGANZA OF "MOTHER GOOSE'S FAIRY TALES," AT THE ADELPHI THEATRE.—"LIVELY JACK" RESCUING "LITTLE RED RIDING-HOOD" FROM THE "WOLF."

THE ELECTRIC TELEGRAPH STATION AT KALIAKRA CASTLE, KAVARNA BAY.

THE ELECTRIC TELEGRAPH FROM THE CAMP BEFORE SEBASTOPOL TO LONDON.

THE intelligence recently received of the completion of the submarine line of telegraphic communication across the Black Sea between Varna, on the Bulgarian coast, and Balaclava, the immediate seat of war in the Crimea, has created the liveliest satisfaction amongst all classes in this country; we have, therefore, much pleasure in presenting the above Sketch of the locality on the Bulgarian side, from whence the line commenced, and also a brief statement in connection with this interesting proceeding. It will be remembered that the superintendence of the expedition on behalf of the British Government, was confided, in conjunction with the contractors, to Captain Charles G. Robinson, R.N., who had been already distinguished for his elaborate survey of the west coast of Scotland; and we are happy to learn that his efforts in the present instance have been no less meritorious.

The *Argus* steamer, after a very boisterous passage from England, and various delays in coaling and repairs, left Varna Bay on the 21st March, having made the requisite arrangements with the Pacha at Varna for the safety and protection of the telegraphists and the electric wire, and anchored under Cape Kaliakra, the starting point, in the evening. Captain Robinson, on the part of the Government, and Mr. Liddell, C.E., on that of the contractors, found the Turkish authorities most desirous of affording every assistance; for which purpose they furnished a guard of soldiers to be stationed by the Telegraph-house at Cape Kaliakra. The guard arrived the day after in the *Terrible*, Captain McCleverty, attending on the *Argus*, as well as the *Spitfire*, surveying vessel, Captain Spratt, appointed to pilot her, and proceeding in advance of the *Argus* across the Black Sea, pointing out the best route for laying the cable.

The accompanying Sketch presents one face of an extensive and highly-interesting ruin, standing nearly on the extreme end of the promontory called Cape Kaliakra, or Djelegra. It has, from its commanding position, evidently been a strong fortification, and, it appears, belonged to the Genoese in the 12th or 13th century. The remains of a chapel and wells (now filled up with stones) with the walls of the fortress of great thickness, and built with remarkably strong cement; together with the archway at the entrance, which is approached over a natural narrow neck of rock, not more than forty feet wide, show that it was judiciously constructed; and, as it stands on a rock about 250 feet high, it would appear to have been quite impregnable. The view which we select is sketched from the south; the Telegraph House is being constructed amidst the ruins, on the right—advantage having been taken by the officers of the expedition of the shelter of the old wall for the purpose; and from this the wire rope is buried to the edge of the rock on the western side of the Cape; then the submarine portion commences, leading round the Cape at the distance of about two miles, whence it strikes over towards the Crimea. A curious relic was picked up amongst the ruins in the shape of half a 6-lb. shot, of unique form. Vultures of a large size abound here. No less than thirty-eight were counted in one cluster—one or two were shot. It is added that the point in question is not more than 400 feet in width in any part after once passing through the gateway of the fortress. There are also natural caves (the formation is sandstone), which appear to have answered the original occupants for stabling; more recently sheep have been housed there by the Bulgarians, but the place is now turned to account as quarters for the Turkish guard. Scarcity of water is reported to be the principal drawback to this spot, as there does not seem to be any procurable under one mile and a half; and the ancient wells, which appear well constructed and deep, are supposed to have been supplied from the filtering of the sandstone: this must, however, have been very brackish, or it must have been brought from a distance, and the supply so kept up.

On Saturday, the 7th April, the *Argus* commenced laying down the cable, with *Terrible* and *Spitfire* in company; and the junction took place in the Crimea on the 13th, after some delay *en route*. The event was hailed with the greatest enthusiasm, not only by the Allied armies, but by both officers and men in the sister service, who alike regarded it as a valuable means of accelerating communication with their anxious friends at home; whilst to the respective Governments of France and England the facilities of rapid intercourse thus created cannot fail to be of the most vital importance. It must be felt universally that the success of the operation reflects the highest credit on every officer concerned, and the public will learn with satisfaction that their deserts have been appropriately rewarded.

FINE ARTS.

EXHIBITION OF THE NEW SOCIETY OF PAINTERS IN WATER-COLOURS.

WE have heard but one feeling expressed with regard to the present Exhibition (the twenty-first) of the New Society of Painters in Water-Colours, and that one feeling is more than favourable. "This," says the common voice of sensible criticism, "is one of the very best Exhibitions the Society has given us. It is true that many will miss Miss Setchell; and just as many lament that Mr. Wehnert is not seen on a larger scale, and in more places; but see how strong Mr Haghe is: he was never stronger; see how good the President is; was Mr. Corbould ever happier? with what additional strength Mr. William Bennett has broken forth: McKewan is very good; Mr. Mole—shall we say it?—is still better; Mr. Absolon supports his well-earned reputation; and Mrs. Margetts, as the representative of ten lady members, is indeed a good example of female excellence in the Fine Arts."

It would be difficult to lounge an hour out more agreeably than in this Gallery. How pleasant is it to range from one agreeable landscape to another—from corn-fields to green lanes; from Killarney to a Border Tower; from Belgium, with Mr. Haghe, to Paradise, with Mr. Warren, from the spirit-stirring charge at Balaclava to the bold flight of Young Lochinvar, with the beauty of the Scottish side of the river Tweed!

The most ambitious artist in the Society is Mr. Warren, the President. His great work properly occupies the leading position in the room. He calls it "The First Sunset witnessed by our First Parents" (No. 82), and his picture has this great merit, that it sets one thinking, and, if it does not supply whatever imagination, aided by Milton, can call up, it gives nature in a grand mood, and the spectator passes on with observing, "This is no every-day performance." The flowers in the foreground are perhaps too large for the distant scenery; but a stretch of fancy may fairly be allowed to an artist who seeks to represent a scene so striking and so suggestive as that attempted, and in a great measure fulfilled, by Mr. Warren. We wish we could say as much of the two common-life courting scenes by the same artist. They are vulgar, and (what is almost as bad) carry with them a certain smack of the studio and the lay-figure.

We have seen Mr. Haghe on a larger scale, but never better or more prolific than he is this year. He haunts you most agreeably in every part of the room. What exquisite interiors has he not given us of St. Peter's at Rome (Nos. 63 and 103)! That girl about to kiss the toe or the Saint—is she not lovely! and is she thinking of aught but the holy office she is employed in? Those monks at the Post-office at Albano (No. 79) are deep in expectation of the news they are to obtain, and of solicitude about the letters they are sending. What a fine convivial air is ever uppermost in that exquisite "Convivial Meeting of the Brewers Corporation at Antwerp"! Who would not wish to see, from the same artist, a picture of a convivial meeting of our great London

PAINTED BY E. H. CORBOULD. THE VILLAGE BELLE. FROM THE EXHIBITION OF THE SOCIETY OF PAINTERS IN WATER-COLOURS.

brewers—Barclay and Perkins bob-nobbing with Truman and Buxton; Meux seen, a little overcome with liquor, by the side of Reid; while Whitbread maintains a friendly conversation with his pa.s-ale guests from Romford and Burton-upon-Trent! But, alas! the brewers of London have no such hall as that in which Mr Haghe has placed his Antwerp brewers.

Mr. Haghe's contributions are eight in number—the four we have already referred to, and four small pictures on the two screens. Very gems of water-colour wealth are those four pictures. Which would we like to select for our own collection? No. 316, "The Fair Reckoner;" No. 322, "Comfortable Quarters;" No. 325, "The Report;" or No. 341, "Work First and Play After"? We had at the Private View a lingering liking for No. 322, "Comfortable Quarters," and have confirmed our liking by a second visit.

Mr. Corbould has two large, and, as usual, well-conceived and carefully-executed pictures. One (No. 329) is called "Paul and Silas in Prison at Philippi;" the other (No. 266) is the "Young Lochinvar," to which we have already referred: both exhibit skill in telling a story with great force of colour, and great dexterity of manipulation. Not less excellent is Mr. Corbould's "Milkmaid;" here called "The Village Belle" (No. 7)—a girl borrowed from a ballet, and partly from Goldsmith's "Sweet Auburn," with a face of great beauty, and a quilted petticoat that will delight the heart of Mr. Frank Stone. This very pleasing example of Mr. Corbould's pencil we have engraved in our present Number.

In pure landscape Mr. William Bennett will deservedly find the greatest number of admirers. He has made a great advance this year. Now and then he recalls David Cox, and David in his best mood: but he is often more true to himself and to nature. His "Bird's-eye View of "Killarney" and his "Tower of Belted Will Howard" are worthy additions to the best examples of English Water-Colour Art.

With the illustrations which we are engraving from a very attractive Exhibition we shall resume our criticisms.

PHOTOGRAPHIC INSTITUTION. The Exhibition of the works of the Photographic Institution, 168, New Bond-street, affords gratifying evidence of the advances constantly making in that important and interesting art. Mr. De la Motte, now appointed Professor of Drawing at the King's College, is extremely happy in his architectural views, more particularly those in the series from the various portions of the Crystal Palace and its contents. That of the "Colossi of Abou Simbel," in the Nineveh Court, is a striking production, and remarkable for the successful manner in which the gradations of light and tints have been realised. This, like other triumphs in the photographic art, is chiefly owing to the skilful application of the discoveries in chemical science, by which improvements are every day being made. Mr. Macpherson's architectural views, bas-reliefs, &c., in Rome (contributed, we believe, by the Rev J. L. Petit), are noble representations of noble objects; executed upon a scale somewhat similar to the far-famed views of Piranese. Mr. Cundell is also extremely happy in his views of Gothic monastic ruins in Yorkshire. Bisson has some admirable views, amongst which that of the "Bibliothèque" of the Louvre is striking from minute perfection in sculptured detail. From the same rich field Mr. Bedford brings several objects, most successfully represented. Mr. Llewellyn's landscape and sea pieces are well known, both for the poetic taste displayed in the selection of the views, and for the skilful manner in which all the difficulties of the art have been overcome in their treatment. Four "Instantaneous Pictures," in which the steam and smoke of a steam-vessel, the ripple of waves, and the sharp outline of surf, of breakers amongst rocks, have been hit off to perfection may indeed be pronounced triumphs of execution. In the Portrait department we find several very successful examples of finishing in colours by first-rate miniature painters, on the photographic basis, by which the crudities of the latter are softened down, and a happy medium obtained between the severity of absolute nature-painting and the ideal of educated art. Altogether the Exhibition is one of great merit, and well amply repays inspection by those who are interested in the development of a new and most important art.

BARKER'S PICTURE OF NAPOLEON AT THE BATTLE OF BASSANO.—This fine work happily illustrates a most interesting incident in the life of Napleon, during his first Italian campaign. Riding over the field, after the battle of Bassano, he and his staff come to the body of a soldier, over which his faithful dog stands disconsolate, and moaning piteously. The great General, turning to the officers of his staff, who were engaged in frivolous conversation, exclaimed, "There, gentlemen! that dog teaches us a lesson of humanity." The words, though few, are pregnant with meaning, and show that, in his heart, the destroyer of nations was not so callous as some have represented him to be. This picture was sent to the Aldermen's room at Guildhall on the recent occasion of the visit of the Emperor of the French to the City, and was much admired by him. It is now on view at Messrs. Hering and Remington's, in Regent-street. The engraving from it, by C. Lewis, which is in a forward state of progress, is an admirable specimen of the art: the etching being executed in a bold and masterly manner.

THE WORKS OF THE LATE JOHN MARTIN.—Three of the chefs-d'œuvre of the late John Martin, the eminent sacred and historical painter, are now on view at the Hall of Commerce, Threadneedle-street, previously to being engraved; and the crowds which flock to see them sufficiently attest the estimation in which the talent of this surprising artist is held, and give promise of the influence his works are likely to have upon the public of the coming age. The subjects of these great works are "The Last Judgment," "The Great Day of His Wrath," and "The Plains of Heaven"—sublime mysteries which the artist has treated with a boldness of fancy, a grandeur of invention, and a mastery of resource which none but himself could command. At the touch of his pencil, as of a magician's wand, earth and heaven are rived, resolved as it were into chaos, out of which a magnificent structure of his own creation is reared. The subtle philosophy and deep morality which mark all the grandeur of his marvellous creation are not the least important and gratifying evidences of his genius. The size of each picture is 13 feet by 9 feet. The engravings from them—which are to be in the finest line style—are in a forward state, and will be published by Messrs. Leggatt, Hayward, and Leggatt.

THE ENGLISH AND FRENCH FLEETS IN THE BALTIC, 1854. By OSWALD W. BRIERLY. Day and Son.

The memorable naval expedition to the Baltic in 1854 has found an able historiographer in Mr. Brierly. This gentleman, whose previous nautical sketches are known to, and admired by, all lovers of the profession, had the advantage of being the guest of the Hon. Captain Keppel, on board the *St. Jean d'Acre* during the whole period of the campaign, and had therefore an opportunity of being in the first row whenever any gallant exploit or interesting adventure was coming off. Mr. Brierly is a thorough sailor, as well as a fine artist; he loves the sea; has studied it in all its phases and humours; and transfers every fleeting impression to paper with daguerreotype fidelity. Not less clearly does he delineate the construction of the—and the whole family of shipping; every mast and spar and plank is familiar to him; and under his hand a sketch of a ship is an absolute work of all but moving portraiture.

The present handsome publication consists of fifteen large prints (some of double subjects), executed in tinted lithography by the first artists in the establishment of Messrs. Day and Son, viz., Messrs. T. G. Dutton, R. Carrick, J. Readman, and T. Picken; and fine specimens of lithography we have seldom if ever seen. The subjects are of every variety of character;—now calm, now storm—now the dull and monotonous routine of a fleet, now the exciting scene of a naval bombardment; and, in all, the designer's conceptions have been faithfully realised by the engraver. The "English Fleet Entering the Great Belt" is a crowded piece, but without any appearance of confusion: the identity of the various ships being well indicated. "Fleet Provisioning at Sea" is a very animated scene, performed under the influence of a fresh breeze. Of a somewhat similar character, but still more exciting, is the incident of "Sending on board the Admiral's Ship for Letters," the mail steamer having just arrived. Then we have "A Gale in the Baltic"—the ships heavily riding at anchor, in the midst of a boiling foam, the screw-ships using their cables by steaming a little ahead. "The Meeting of the English and French Ships at Baro Sound" is a striking picture, set forth in a manner which shows considerable knowledge of naval tactics: the fleets being drawn up in single line, whilst the latter are standing in to the Sound. In "The Fleets Scrutinised—the Screw-ships Getting up Steam" we have an exquisite subject, full of breadth, and remarkably well executed. The sketches of the more important events of the campaign are valuable for their historical accuracy, as well as their pictorial merit. The "View of the Combined Attack upon the Forts of Bomarsund, as seen from the Sea," is most spirited; every ship being at its place and at its work, and colours and signals flying in all directions. The final blowing-up of the forts is terribly grand. Not to enumerate others—the sketches of "H.M.S. *Driver* and the *Esmeralda* off Ornestadt" of the "Aland Islands, with Revel, Helsingfors, and Sveaborg in the distance;" "Fort Nottich," at Bomarsund," with the breach made by the English battery, manned by Marines and Blue Jackets from the *Hogue*,—all bear internal evidence of the care and accuracy with which the artist has treated every scene and incident which came under his observation during this exciting summer's cruise. In every respect the present work may be looked upon as one of national interest, equally creditable to the arts and arms of the country.

THE FERNS OF GREAT BRITAIN AND IRELAND. By THOMAS MOORE, F.L.S Edited by JOHN LINDLEY, Ph. D., F.R.S. Nature-Printed by Henry Bradbury. Parts I. and II. Bradbury and Evans

This work is important, not only for the scientific research displayed by the author in an extremely interesting branch of Natural History, but as the first instance of the application of a new and valuable process of imitation and reproduction, called "Nature-Printing." It is known to all that there are several branches of Natural History, and that of Botany especially, in which verbal description is utterly inadequate to identify and ascertain the details of particular objects; and in which drawings themselves, however carefully made, fail to represent the minutiæ of all the parts. If the be true of plants in general, most remarkably is it the case in respect to ferns, the complicated forms and tender organisation of which baffle the most patient and skilful artist; while the variety is so great as to the slightest error in the representation of peculiar distinction of form and arrangement of parts would be fatal to the objects aimed at, that of portraiture and identification. Attempts have long since been made, and with some success, to obtain botanical portraits by printing from plants themselves, which have been previously flattened for the purpose. But this process necessarily admitted but of limited application, and was incomplete in many respects. Nature-Printing is simply an improvement upon this rude experiment, but an improvement to such an extent as to leave little more to be desired. In this process an exact copy in copper is substituted for the fragile plant itself, and from this copies may be multiplied to the same extent as in copperplate engraving. From this mould not only is the form of the object reproduced with perfect exactness, but the textural beauty, the hairs, the veins, and other minutiæ of superficial structure are also given with an accuracy of detail perfectly surprising. The plants being represented in relief, as if painted upon paper, and all the parts in their several appropriate colours, the result is a complete substitute for the original specimen. To the botanical student such a means of study must be invaluable.

The art of Nature-Printing, from which so many and important results may be anticipated, was originally adopted at the Imperial Printing-office at Vienna; its introduction into this country is due to Mr. Henry Bradbury, who has shown a just appreciation of its resources and capabilities in the application of it to the delicate subject of Ferns, the difficulties of which he surmounted in a masterly manner, and with an amount of success which cannot well be surpassed.

The text of the present work is supplied by Mr. Thomas Moore, whose little "Handbook of British Ferns" is generally admitted to be the best book on the subject. The general supervision of the work has been entrusted to Dr. Lindley, an additional guarantee of accuracy and completeness in every respect—literary and artistic.

This work is printed in a large folio size, and when completed will be a valuable standard addition to the scientific library.

THE SPIRIT OF MAY.

O, lagging, backward May,
What aileth thee, that thou dost drag so slowly?
Hath Winter craved thee with a grief unholy;
Like her who, legends say,
Wept for the child,
Whose spirit mild
Strove up the Angel-way?*

O, lovely legend old!
O, tender spirit-child, that could not mount
The heavenly star-way on that sweet account!
Thus still its soft cry rolled:
"Heaven's pathway dims,
These dragging limbs
My tear-wet garments hold."

Winter shall weep no more!
Rise thou, unfettered, from the graves of flowers,
Thy poor world-mother hath spent all her showers:
The time of tears is o'er.
To stay thy feet
Earth's pulses shall beat
No longer, spirit-sore.

Arise, and walk in light!
No mortal chain shall bind thee where thou goest:
Into the very heart of love thou flowest
As with the sunlight.
Life's thorny tree
Grows young in thee,
And blossoms in thy sight.

When Spring and thou must fleet,
Thou shalt be mourned not as now we mourn the dead:
We'll think on thee as on the young leaves shed
Of roses, memory-sweet;
That stayed awhile
To flush and smile
Under our fainting feet.

And, last, on God's blest morrow,
Our souls shall find thee mid those radiant ways
Where Love falls never upon wintry days,
And Age new heart doth borrow;
Where not a sob
Thy peace shall rob,
And not an angel-sorrow!

E. L. HERVEY.

* The beautiful German legend of "The Wet Shroud." A mother weeping inordinately for her lost child, beholds it in a vision, striving vainly to drag its limbs towards that higher heaven where its companions rejoice; its shroud being heavy with her tears.

EDUCATION, SCIENCE, AND ART.—The sum required, according to the fourth part of the Estimates of Civil Services, for the purposes of education, science, and art in the year 1855, amounts to £816,323, being an increase of £92,913 as compared with 1854. Of the sum £381,000 is required for public education in Great Britain; £216,200 for education in Ireland; £79,364 for the Board of Trade (Department of Science and Art); £3858 for the University of London; £7892 for Universities in Scotland; £3266 for the Queen's University in Ireland; £9552 for the Queen's Colleges in Ireland, £2000 for the Belfast theological professors, £56,186 for the British Museum establishment; £47,520 for the Dublin Museum of Science, Art, and Industry; £17,696 for the National Gallery, including purchases of pictures, £500 for the Royal Geographical Society; and £5409 for scientific experiments.

MAILS FOR THE EAST.—GENERAL POST-OFFICE, April 1855. In consequence of the opening of the railway between Lyons and Marseilles, the conveyance through France of the mails for the British forces in Greece, Turkey, and the Black Sea will be so far accelerated as to allow of mails dispatched from London on the mornings of Tuesday and Saturday (by day mail) reaching Marseilles, under ordinary circumstances, in time for the French Mediterranean packets leaving that port every Thursday and Monday. The regular mails for the British forces will continue to be dispatched from this office every Monday and Friday evening, as heretofore; but supplementary mails will be made up on the mornings of Tuesday and Saturday, containing such correspondence as may be posted or received in London in time for the day mail to France. The same regulations will apply to the correspondence for the transport service in Turkey and the Black Sea, forwarded in closed mails via France.—ROWLAND HILL, Secretary.

THE BALANCE OF POWER. We have received from Germany a small, but exceedingly well-executed, toy, representing, in lead, the actual position of that most variable of balances, which so much trouble is taken to keep equal—the balance of power. Whether the deficit in the heart of any number of those antiquated congresses (where Englishmen always have been, and always will be, fooled) to see how perfectly horizontal the beam of the magical balance rests at present, how admirably the weights of the see-saw riders at either end are regulated. It is true, there are three at one end and only one at the other; but then that one is such a stout and burly, such a dogged, savage Muscovite, that, if you look at him well, you no longer wonder why he holds his own, and why, in very scorn of his firm and polished adversaries, he carries only a quiver with arrows, and his knout. Slim fellows, compared to him, are the three on the other side: an *unarmed* Turk, who faces the grim enemy, but looks as if he might had made him sick; a wide-hosed Frenchman, emanuncy the brawny Russian through a telescope; and behind the two, standing, an Englishman swinging the lash for the shoulders of the Turkish beast of burden. There are two observers of the sport: a Prussian soldier, with the "wadbrords" and "Pickelhaube;" and an officer, whom the traditional white dress-coat proclaims to be Austria's representative. The toy, said to be by the well-known manufacturer of leaden soldiers—Dubois, of Hanover—is skilfully executed, and admits, in its minutiæ, of more meanings than we venture to attribute to it. Our German neighbours are growing witty; we guess, the best way to show it would be in taking sides.

The damage caused by the overflowing of the river Theiss, in Hungary, after the melting of the snow, is officially estimated at 12,900,000 florins (32,250,000f.).

On March 18th several shocks of earthquake were experienced in Upper Scinde, and at Muttra, Allgurh, Meerut, and Delhi.

THE SILENT MEMBER.—(No. XV.)

LORD JOHN RUSSELL has come back from Vienna very much the same as he went, and leaving the war question very much as he found it. Colonel Sibthorp has risen in the House of Commons to ask the expense of this fruitless errand, and is snubbed for his impertinent curiosity by our noble Premier. It will be time enough for the public to ask about the expense when the public shall be called on to pay the bill. And as this period is sure to arrive, the public will have an opportunity for inquiry. It is true the Session may then be very near its close, when money is voted away after midnight, by a somnolent few, whose nods may be either the result of acquiescence or sleep; and, of course, at such a time it would be highly inconvenient to protract the business of the country beyond the period at which Parliament usually separates. Lord Palmerston has so far condescended as to intimate that the job has been done as cheaply as circumstances would permit, and we can only hope that the expenses have been framed as nearly as possible in accordance with the principle that a thing is "worth what it will fetch;" for the embassy to Vienna, if estimated by that sound commercial rule, will cost nothing.

All the enemies and some of the friends of Mr. Layard have been complaining of some inaccuracies of detail in attacks he has made on the notoriously bad system of promotion in the Army. The circumstance is certainly to be regretted, because it has given an opportunity to the defenders of "things as they are" to assail with some plausibility the energetic advocate of "things as they ought to be." Considering the very high pretensions which Mr. Layard puts forth, and the confidence which the public are disposed to place in his motives and abilities, it is to be hoped that he will henceforth take none but the surest ground, and not allow his very laudable zeal to outrun his discretion. The credit and character of a man who vigorously exposes the public cause are the property of the public, and the owner of great abilities who is willing to devote those abilities to the general good ought to consider his talents and his reputation as held in trust not for himself only, but for the whole community. I do not mean to say that the real value of Mr. Layard's earnest denunciations of the present system of mal-administration has been impaired by the few errors of detail which have been detected; but party spirit is very fond of availing itself of poetical licence by taking the part for the whole, and pretending to receive any statement as false, because some small portion of some one statement has not been accurate.

Talking of accuracy reminds me of a rather serious complaint that has been made against the abuse of a system which exists of allowing witnesses before a Parliamentary Committee to correct the printed proofs of their own statements. It seems that the evidence taken before the Maynooth Commission has undergone such a thorough process of revision that, in some instances, the result is like that produced on the Irishman's coat, which had been so repeatedly patched that none of the original material was visible. The affair would be more justifiable if the alleged patching of the evidence had been the work of the original owner; but it is said that some of the testimony has travelled as far as Rome, for the purpose of repairs being done to it. The publication given from day to day to the examinations of the witnesses before the Committee on the miscondnct of the war, will happily prevent the success of any culinary experiment that might otherwise have been attempted. We are saved from the chance of having a mass of evidence in a cooked state some few months hence by the punctuality with which the papers furnish a daily supply of the raw material. Had the motion been carried for making the Committee a secret one, the possibility is that the corrigenda and addenda might have almost entirely superseded the original text of some of the most important evidence.

The case of Buranelli was the subject of a question in the House of Commons, and has been the cause of a great deal being said out of doors, to which, in my opinion, no satisfactory answer has been given. It may be urged that the man is hanged, and it is useless to talk about him now; but, if it is too late to save his life, it is never too late to protest against the mistake, as it seems to me, which has been committed. It seems that some medical evidence bearing on the question of the insanity of the accused was kept back at the trial, and Sir George Grey, having been asked in the House of Commons whether such had been the case, replied that all the facts had been brought under the notice of the Judge, who saw no reason for recommending the prisoner to the mercy of the Sovereign. It is strange that the Home Secretary, who is himself a barrister, does not appear to see the difference between the submission of a fact to the Judge and the submission of a fact to the Jury—the Jury who are the only legal judges of every fact that bears on the trial. If there was any fact that might have influenced the mind of the Judge, it might have influenced the mind of the Jury; and of that possibility in his favour the accused was entitled to the benefit. There would seem to have been some neglect which prevented the calling as witnesses for the prisoner some men of high professional reputation in cases of insanity, who have published a statement declaring that they were prepared to prove that Buranelli was not in a state of mind to be accountable for his actions when he perpetrated the act for which his life has been forfeited. It is but fair to add, that a *post mortem* examination is said to have shown that Buranelli's brain was in a healthy state; but the difficulty still remains that evidence might have been put before the Jury which might have altered the prisoner's fate, and, if it was thought desirable to place such evidence before the Judge, it must have been still more desirable that the Jury should have had it brought under their notice. It may be inconvenient to disturb the verdict of a Jury, but this is done continually where property is concerned, and the inconvenience should be more readily overcome in cases where life is in jeopardy. Though it is a merciful doctrine that a man's life may not be put in peril by a second trial for the same offence after his acquittal, there is no sound reason why he should not have a second trial upon some reasonable ground being shown, if he has been found guilty.

The increasing system of continuous lines to divide the magistrates, to annoy the public, and embarrass the landlords of places of refreshment; all of whom, as the season for locomotion advances, are likely to have their respective dilemmas increased, in consequence of the wilful omission of the framers of the new act to define a *bonâ fide* traveller. Mr. Paynter, the magistrate at Wandsworth, has just decided that "pleasure-seekers are not travellers," a dictum from which it might be inferred that travelling for pleasure is impossible. To me it would seem that a traveller is a traveller no matter what his object may be; and if he chooses to travel for pleasure on Sunday he is entitled to be served with refreshment. Of course, if the Legislature shall enact that no man shall have any pleasure on Sunday, and attaches a penalty to the fact of being pleased, the law—absurd and puritanical as it would be might be put in force, but the fact of a man's travelling for pleasure cannot deprive him of the character of a traveller: and, as the act makes no exception, he has a right to his food on Sunday. The penalty of 40s. inflicted by Mr. Paynter was raised, at the request of the defendant, to £3, to admit of an appeal, by which it was rather absurdly said that "this vexed question will be settled."

There is no more chance that the various sessions throughout the country will be agreed upon the view of the law than that the magistrates individually will be of the same opinion. When a point is found to be doubtful, the only remedy is to settle it by an Act of Parliament—which, by the way, might be as doubtful as that it was designed to explain, as has very often happened. The present practice of leaving the Judges to interpret a doubtful law is only an aggravation of the evil; for Judges are found continually to disagree, as in the instance—well known to lawyers—of an interpretation of a clause in the Vagrant Act which is held to mean by the Court of Queen's Bench, and the opposite thing by the Court of Exchequer. We might perhaps adopt with effect the American plan, by which, at certain periods, all the Judges meet to decide on doubtful points, and that is recognised as law which is declared to be so on their authority. This prevents the conflict of the Courts, which is often found so embarrassing to those who resort to them in this country; for, though every man is presumed to be acquainted with the law of the land, it is impossible to make the acquaintance as long as there is a direct opposition between the law of the Queen's Bench and the law of the Exchequer.

IMPERIAL PARLIAMENT.

HOUSE OF LORDS.—MONDAY.

In reply to the Earl of Ellenborough,

Lord FARNHAM observed that there had been an understanding between the Governments of England and Sardinia that the Sardinian Government would send out a force, accompanied with one month's provisions for the maintenance of that army; and there was an arrangement that the Sardinian Army would be furnished with rations by the Commissary-General of the British Army, on the terms that they paid for what they received. He had the satisfaction to inform their Lordships that he had received a communication from Sir John M'Neill, to the effect that he felt convinced, not only from the facts before him, but from experience in these countries, that supplies of meat and grain were to be found there, or were at that moment at the disposal of the Commissary-General, for the maintenance of any number of troops that it might fall to his lot to supply.

The Militia (Ireland) Bill was read a third time and passed.

HOUSE OF COMMONS.—MONDAY.

Mr. WARNER asked whether telegraphic communication had now been established between the Crimea and any part of the Turkish coast and the Principalities, also, what was the date of the last despatch received from the seat of war, and whether a communication had been received from any source whatever relating to the siege of Sebastopol?

Sir C. WOOD had to say, in answer to the hon. member's questions, that the telegraph was, they believed, complete throughout, except across the Danube. He had stated three or four days ago that the line had been already carried from the Crimea to the Turkish coast, and he believed that it was now completed from the English coast to Rustchuk. It was also completed on the other side from Giurgevo forward; but they were not aware whether it had been yet laid across the Danube. The last despatch received from Lord Raglan was dated Sunday; but it conveyed no news. It contained no account whatever of the raising of the siege

THE NEGOTIATIONS AT VIENNA.

Mr. DISRAELI said, as the Noble Lord the Secretary of State for the Colonial Department once more among us, I take the liberty to ask if it is his intention to lay any papers on the table respecting his late mission, or to make any statement with regard to it to the House?

Lord J. RUSSELL, who was received with cheers, said: In answer to the question put to me by the right hon. gentleman, I have to state that I do not think it is for me to decide what papers shall be laid upon the table of the House. However, I believe that her Majesty's Government intend shortly to lay on the table of the House the protocols of the proceedings which have taken place at Vienna. They will convey to the House information of the substance of the negotiations that have taken place. Perhaps I may, however, say a few words more without intending to go into any details as to the negotiations. The first meeting of the Conference took place on the 15th March, and the negotiations with respect to the first two of the Four Points lasted until March 26th. Upon the 28th March the Third Point came under consideration. It was then suggested by the Plenipotentiaries of Austria that the Plenipotentiaries of Russia should themselves make proposals calculated to satisfy the exigencies of the occasion. The Plenipotentiaries of Russia said that they had no instructions to make propositions, but asked for time to refer to their own Government. The consequence was that the Conference was then adjourned, and that no meeting for the transaction of business took place until the answer arrived from St. Petersburg. On the 17th April another Conference took place, when the Plenipotentiaries of Russia informed the Conference that they had received instructions from their Government not to take the initiative in any propositions; but that they were ready to hear and discuss any propositions that might proceed from the other side. The Representatives of the Allied Powers then requested forty-eight hours to consider the form in which they should make their propositions on the Third and Fourth Points. The Plenipotentiaries of France and Great Britain, especially, desired the Representatives of Austria, laid their propositions before that Power. The Russian Plenipotentiaries requested forty-eight hours to frame their answer to these propositions, totally rejecting the Third and Fourth Points. They stated, at the same time, that they had proposals to make on the part of their Government which they considered would be in accordance with the demand that Russia should be united more completely with the maritime and political system of Europe. And that an end should be put to the preponderance of the power of Russia in the Black Sea. The Plenipotentiaries of France, Austria, and Great Britain found the proposals of Russia entirely unacceptable, and refused to consider them in detail. The Plenipotentiary of Austria then said that, although these propositions had been rejected, he trusted that all means of reconciling the belligerent parties by peace were not yet exhausted. To this the Plenipotentiaries of France and England replied that their instructions were exhausted, and that they had no further powers to consider any other propositions. I then considered it my duty, and that duty was one which I could perform my duty, to repair to my own Government and lay before them the whole state of the case with respect to the negotiations at Vienna and the point at which the Conference had been conducted. The French Minister of Foreign Affairs, two or three days later, having requested the orders of the Emperor, came to a similar conclusion, and I believe he also, not very late last night at Paris, where, no doubt, he will duly inform his Government of what took place in the course of the negotiations at Vienna.

Mr. DISRAELI: Before the protocols of the proceedings of the Conference are laid upon the table, which I presume will be done with the earliest dispatch), I wish to ask the noble Lord if he has any objection to give us some preliminary papers—for instance, the despatches of the Allied Governments to their Plenipotentiaries at Vienna—which will give us an authentic description of what the Four Points are.

Lord PALMERSTON: I think the protocols themselves will pretty clearly explain what the Four Points are; but if they do not do so, there can be no objection to lay some papers on the table which will explain them. With regard to papers relating to the long course of the negotiations that preceded the Conference, I think there might be some objection to lay them on the table; but we will take care that the House shall be put in full possession of what the Four Points are.

Mr. DISRAELI: Whether the recent negotiations of any kind had been resumed by the gentlemen left behind at Vienna (A laugh).

Lord PALMERSTON: There has been a Conference held since my noble friend left Vienna, at which some proposals were made by Russia which were not considered by any other parties to be calculated to lead to the termination of the war

In reply to Mr. BASS, Lord J. RUSSELL said that throughout the negotiations the Turkish Plenipotentiaries were of the same mind as those of Great Britain, France, and Austria

THE LOAN BILL.

On bringing up the report on the Loan Bill,

Sir F. KELLY moved the omission of clause 22, which requires the repayment of the sixteen millions at the rate of a million a year, as soon as peace returns

The CHANCELLOR of the EXCHEQUER defended the clause, on the ground that it would secure the actual application of an annual sum of money every year to the reduction of the debt.

Mr. GLADSTONE would support the omission of the clause; though, if peace were restored, he would be among the first to support any plan for the reduction of the debt.

Mr. HENLEY thought the only security for repayment of the debt was to have a surplus revenue, and he would, therefore, vote against the clause

Mr. LABOUCHERE suggested to the Chancellor of the Exchequer, for the sake of unanimity, he should withdraw the clause.

Mr. T. BARING hoped the Chancellor of the Exchequer would do no such thing. He thought the proposition a wise and a statesmanlike one.

Mr. J. L. RICARDO opposed the clause, and hoped the Chancellor would withdraw it.

Mr. WILSON supported the clause, which he contended made the loan substantially a terminable annuity

Mr. DISRAELI considered that a terminable annuity was a very questionable mode of raising money. The House has certainly expressed no preference for such a course, and he hoped, therefore, the Chancellor of the Exchequer would withdraw it

Mr. C. GLYN considered that this clause was the first official attempt for many years to form a *bonâ fide* sinking fund, and providing year by year a surplus out of the taxes from which this million would be paid.

After some observations from Mr. J. MCGREGOR,

Mr. CARDWELL deprecated the idea of the present Parliament pledging the credit of future Parliaments as to the repayment of loans, and he must, therefore, vote against the clause.

Lord PALMERSTON considered the principle under discussion of so much importance that he was determined to take the sense of the House on it.

The House then divided, when the clause was carried by a majority of 210 to 111. The report was then received, and the bill was ordered to be read a third time next day

INCOME-TAX BILL.

The House having gone into Committee on the Income-tax Bill,

Mr. HILDYARD moved an amendment on the first clause, to the effect that 1d. per pound, instead of 2d., should be levied on all incomes between £100 and £150. It could make no appreciable difference to the revenue, and it would prove a very important concession to the class whose interests he advocated

The CHANCELLOR of the EXCHEQUER admitted that the reduction would not be felt on the revenue, but it would cause considerable trouble in the collection of the tax. He would not, however, oppose the amendment.

The other clauses were agreed to, and the bill went through Committee.

NEWSPAPER-STAMP BILL.

The House then went into Committee on the Newspaper-stamp Bill.

The CHANCELLOR of the EXCHEQUER announced the conclusion he had come to with respect to the registration clauses. After giving the matter the best consideration he could, he proposed to allow the existing law on that subject to remain as it was, and to compel all newspapers to comply with the existing regulations, both as regarded registration and security against libel.

By a new clause, the Chancellor limited the privilege of retransmission by the post to a period of fifteen days.

The copyright clauses, brought forward by the Government, gave rise to a lengthened discussion, in which Mr. Whiteside, Mr. Milner Gibson, Lord Lovaine, Lord Stanley, and others, objected to all attempts at copyright as impracticable; while the Chancellor of the Exchequer and Mr. Phinn contended at least the principle of copyright. In the end the Government withdrew the clause, leaving newspaper proprietors to the remedy of the existing law.

Mr. M. MILNES brought forward a clause to allow the privilege of transmission and retransmission through the post to all newspapers embossed with the penny stamp, and of which the printed superficies did not exceed 3200 inches. To this the clause was supported by Mr. Lowe, Mr. Drummond, and others, and was opposed by Lord Stanley, Mr. M. Gibson and the Chancellor of the Exchequer; and, on a division, the clause was rejected by a majority of 260 to 86.

The other clauses went through Committee, and the report was ordered to be received next day.

HOUSE OF LORDS.—TUESDAY.

In reply to Earl Talbot, who expressed his doubts as to the efficacy of the new floating batteries, Lord PANMURE said it was entirely an experiment they were making with reference to the possibility of bringing a naval armament into contact with stone walls

The Earl of HARDWICKE, who had on that day inspected two of these ships, thought they would not answer the purpose for which they were constructed. The deck was nine inches thick, and it was originally intended to have plated it with iron, but he apprehended that with a power of floating so defective they had not ventured to carry out that plan, and he was sure that if a shell were thrown on the deck it would go slap through her. The bulwark that was to protect the officers conducting the operations when approaching the enemy's battery was imperfect, and the men at the wheel were also exposed to the fire, because there was nothing to protect them but a two-inch plank. The men at the guns below were protected by the iron plates, but the officers who were to conduct the operations were exposed to a greater disadvantage than they would be exposed to on board of an ordinary ship.

After a few words from Earl Grey, the Earl of DERBY said, if he were not misinformed, those five gun-boats had cost something like a sum of £300,000, and before they went further it was important that they should possess all the knowledge and information that could be obtained from the professional ability of his noble friend.

In reply to Lord Vivian, respecting cavalry reinforcements to the Crimea, Lord HARDINGE said, he had had a consultation with his Royal Highness the Duke of Cambridge, and he had his Royal Highness's consent that, instead of sending out separate squadrons of each of the regiments serving, it would be better to send out the two regiments, the 1st Dragoon Guards and the 6th Dragoons. The force of cavalry in the East at present consisted of 1300 effective men, and they would be reinforced by about 750 troops, and also by the two regiments coming from India, one of which had already arrived—the amount of which would be about 1600 men rank and file. Thus there would be in the Crimea upwards of 2000 effective cavalry, exclusive of the two regiments he had referred to, if they would be required, and they would be required without doubt. The number of recruits now ready was at least 1000 men, and we had at least 1500 horses between five and six years old.

HOUSE OF COMMONS.—TUESDAY.

In reply to a question from Mr. WARNER, Sir C. WOOD said that the Government had that day received a despatch from Lord Raglan, in which it was stated that the Russian army between Mackenzie's Farm and the Belbec had been reinforced by two divisions.

In reply to a question from Mr. FREWEN, Sir C. WOOD said, the telegraph to the Crimea was not confined to the Government, but it was under its entire control.

In reply to a question from Mr Bright, as to the precise nature of the terms proposed to Russia by the Allies at the Conference, and as to the precise terms that Power offered to accede to, Lord PALMERSTON said that the proposals which he had already said he would lay upon the table contained all the requisite information.

The LOAN Bill was read a third time and passed.

THE MAYNOOTH GRANT.

A great number of petitions were presented against any further grant to Maynooth; after which

Mr. SPOONER rose to move the following resolution:—

That this House do resolve itself into a Committee, for the purpose of considering the acts for the endowment of the College of Maynooth; and that, with a view to the withdrawal of any endowment out of the Consolidated Fund, due regard being had to vested rights or interests.

The hon. gentleman impressed upon the House the great importance of the question, the proper settlement of which involved no less than the integrity of the Crown and the integrity of the empire. It involved the preservation of the Protestant constitution of the country, which was endangered by the habit into which Parliament had fallen of making concessions which could never be made to those whom concessions would conciliate. He regarded the endowment of Maynooth as a great national sin, which, if persevered in, would, he believed, bring down the wrath of the Almighty on the land. He was the more strongly upon the fact that the evidence before the Maynooth Commission had been sent to Rome before it had been laid before her Majesty or the Government; and he could not conceive a more serious violation of the law which had taken place with impunity, by giving ecclesiastical titles to the Roman Catholic prelates, even in the evidence taken by the commission. He would not dwell on alterations had since been made in the evidence, to such an extent as that no faith could be placed in the report at all.

Mr. DUNLOP seconded the motion, feeling, as a Dissenter, that Maynooth was a sort of buttress to the Established Church of Ireland.

Mr. F. URQUHART deprecated the promulgation of such topics at such a time

Mr. SCHOLEFIELD contended that if the Maynooth Grant was to be got rid of there was but one way of doing it with fairness and honesty, and that was by sweeping away all religious endowments in Ireland. He therefore moved, as an amendment, to leave out from the word "considering" to the end of the question, in order to insert the words "all grants or endowments for ecclesiastical purposes, which are charged on the Consolidated Fund or annually voted by Parliament, with a view to their withdrawal, due regard being had to vested rights or interests."

Mr. MURDOUGH opposed the orig nal motion.

Mr. A. SMITH (Hertfordshire) supported the motion

Mr. BLAND did not think the amendment went far enough, and he should, therefore, say "no" both to that and the original motion.

Mr. HORSFALL supported the motion

Mr. HORSMAN contended that this measure was only one link of a chain of policy which had proved eminently beneficial to Ireland and very honourable to England.

Mr. NAPIER supported the motion. Viewed as a matter of State policy, the experiment of 1845 had failed, and there was but one course open to pursue—retrace their steps, admit the failure, and make compensation to the interests which had grown up under the experiment while it was in progress

The debate was then adjourned until the 6th of June.

HOUSE OF COMMONS.—WEDNESDAY.

EDUCATION (NO. 2) BILL.

Sir J. PAKINGTON moved the second reading of this bill. He had occupied so much of the attention of the House when introducing the measure, that he had not intended to speak on moving the second reading; but, on consideration, he thought it better to repeat the chief provisions, in order that every hon. member might understand the principles upon which he asked for his vote upon a question of vast importance. His bill proceeded, as regarded all new schools, upon what was termed the denominational system; and he deprecated any bitter feelings on the part of any class against a bill which sought the solution of difficulties in the way of National Education which have hitherto proved insurmountable.

Mr. HENLEY moved that the bill be read a second time that day six months. So far from believing that this bill would extend education, he believed it would have the contrary effect, for it would endanger the success of the system now in progress, which had been productive of so much benefit, without offering to the public an equivalent which it would be willing to accept.

Mr. R. PHILLIMORE seconded the amendment, as he believed the bill would disentitle the Church of England to be considered the authorised teacher of religion to the country.

Mr. MILES thought the bill introduced by Sir J. Pakington was an essentially religious measure. As the House had three bills before it, he hoped they would all be sent to a Committee up-stairs, so that some amalgamation might take place which might be brought down to the House with every prospect of its passing (Hear, hear).

Mr. DILLWYN could not vote for the bill of the right honourable Baronet, which he thought would have the effect of converting parishes into arenas of polemical strife

Mr. BYNG supported the bill, by which he thought a fair and generous latitude was conceded to all religious denominations.

On the motion of Mr. Adderley the debate was adjourned.

The total number of visitors to the State apartments at Hampton-court Palace during the year 1854 was 203,990, of whom 52,412 went on Sundays. To Kew Gardens the number was 598,164, and of these 169,852 were admitted on Sundays.

NOTES OF THE WEEK.

FROM the day of our birth to that of our death there is not an hour during which all human beings are not standing, so to say, upon a precipice. We say, indeed, that man is encompassed by perils; but if we realise I—if we were constantly to bring before our mental sight a distinct view of those dangers—it is probable that all but the strongest minds would give way and become paralysed under the impression of that vision. To say nothing of the ills to which our bodily machinery is liable, there are the thousand chances which may, turning unkindly, in an hour ruin our fortune. The merchant is at the mercy of a storm, of a war, of a bankruptcy; some cunning inventor may supplant steam locomotion by gas or electricity, and thence ruin to tens of thousands; the landowner may, indeed be safe from all calculable chances as long as he retains his estates, but who shall guarantee him against the carelessness of some defunct attorney who may have left a flaw in his title, which, discovered, would send his acres to other owners? Perhaps the fundholder—as not even the boldest sceptic has yet been found to doubt the security of the Three per Cents—is the safest of all; yet even he, though his principal may be safe beyond all doubt, cannot just at this moment feel at all sure that his interest may not be devoured by the Income-tax. The fact is that, independently of the literal chimney-pot which a gust of wind may at any time blow upon our heads, there is an infinite number of metaphorical chimney-pots to which we are permanently exposed; and certainly the *taille* the most universal in its operation which could fall on our devoted heads was that which we most narrowly escaped last Saturday afternoon. On that day the bullet of an assassin nearly—(indeed, from the closeness of his position when he fired his first shot, and from the coolness with which, nearer still, he repeated his attempt at murder, the escape of his intended victim was almost miraculous)—killed Louis Napoleon. Who can foresee the results had the assassin been successful? Partly from his own great qualities, but even more from fortuitous circumstances, the Emperor of the French is the keystone of the political arch in Western Europe. What would have happened had that stone fallen out? What now depends on the life of one man?

The few words addressed by the Emperor in answer to congratulations on his escape from a deputation of the Council of State have been made the subject of much, I think, unnecessary comment. He is reported to have said that he believed he had a mission to fulfil, and that until that was completed he believed that Providence would protect him. This is said to be blasphemous, even by many whose feelings on such subjects are well worthy of attention; yet, after all, making some allowance for a little overwarmth in improvisation, not inexcusable under the circumstances, and for a certain theatrical tone which seems inevitable in French speechmaking, what does it amount to? Merely to a belief—not, I think, otherwise than humble—that the protection of Providence overshadowed those who, placed in a high position, lay out thought, and energy, and life, in the advancement and improvement of those in the social scale beneath them. Is Louis Napoleon such a man? Would he, but a week past, have been saluted by the enthusiastic cheers of the English people had they not thought him so? And you may take my word for it, they are not bad judges, those same English people.

An electric telegraph is now in operation for the entire distance—except one break at the passage of the Danube—between the Camp in the Crimea and London. When the news of its completion first arrived, everybody was saying—"Now, at last, we shall no longer be kept upon the tenter-hooks of anxiety; all that happens, be it good or evil, we shall know at once, and how much must there be to tell during each day's progress of a siege in which the best blood of England is engaged?" The result, from some unexplained cause, has been just the reverse: never have we received so little intelligence from the seat of war as during the last week. What we have had is of a mixed complexion, and may be interpreted as satisfactory or the contrary. At the West-end Clubs opinions are almost unanimous against the success of our army; there it is said that our guns have been reduced, by constant firing, to a most inefficient condition; that there is much dissatisfaction in the Allied forces, especially among the French; that the Russians are mustering on the Belbec in enormous force, and that it is doubtful if we shall be able to hold our own lines against an attack which may be daily expected. In the City and among commercial men generally the feeling is more hopeful. It is considered that though we have not taken Sebastopol, we have destroyed many of the enemy's outworks, and closed in far more nearly upon the body of the place; and that, upon the arrival of the large reinforcements, which may be expected immediately, the Generals will be strong enough to attack at the same time the Russian army in the plain, and to recommence the bombardment of the city. The news from Vienna is certainly more satisfactory than it was. A congress does well attempt to barter an European position as an Austrian Minister, but yet it seems as if the Government of the Emperor Francis would run true at last.

There is one topic even more absorbing than the war—the east wind. It really seems as if, this year, we never should get rid of the English sirocco. Almost without intermission we shivered under it during seven weeks of February and March, and now April passes away under its catarrh-exciting influence. Farmers are beginning to look gloomy, for what can grow with a drying wind and hot sun baking the soil all day and the thermometer below freezing point at night? Grass there is none, and the corn-fields are beginning to look yellow and unhealthy. Luckily the root of the wheat plant, plunging its fibres deep into the soil, is long in being injured by dry weather; a few soaking showers, followed by warm nights, would soon repair the mischief that as yet has been done. It is very much to be desired that another week may not pass away without a change of weather.

Some weeks ago I stated that the tour made by Mdme. Grisi and Signor Mario in the United States during last autumn and winter had not been very successful, and that the American directors of the expedition had not thought it expedient to complete the engagement. I thought at the time certainly that I had good grounds for this assertion; but I am bound to confess, judging from letters of Mdme. Grisi and Mr. Hackett, that I must have been led into a mistake. After this confession, I hope my old acquaintance Hackett will not remain very angry with me.

THE MORNING-LAND.

[See the Illustration engraved upon the ensuing page, from a print entitled "Ein Morgen in Lazenburg."]

THERE is a land, by minstrels sung—
An Orient clime of love and light,
Where smiles the sun, for ever young,
And beauty robes the night;
And still each German brother-band
Names that soft clime the "Morning-Land."

But, smile the sun where'er he list,
A morn of brighter promise lies
Where royal souls keep royal tryst
Beneath life's opening skies:
Where Faith and Love walk hand in hand,
Oh there is Hope's true "Morning-Land!"

The promise of a brightening noon,
The dawning of a nobler day,
When hearts shall beat to glory's tune,
And Austria proudly say—
"By Freedom's breath the earliest fanned,
Be mine the patriot's Morning-Land!"

Oh, foremost in the ranks of those
Who nobly strive, thy banner wave!
Bind, with the lily and the rose,
One garland for the brave;
And, first to lead where heroes band,
Austria, be thine the "Morning-Land!"

E. L. HENNEY.

THE EMPEROR AND EMPRESS OF AUSTRIA; OR, A MORNING AT THE PALACE OF LAXENBURG, NEAR VIENNA.

(SEE PRECEDING PAGE.)

THE VIENNA CONFERENCE.—(SEE NEXT PAGE.)

BARON BRUNNOW. M. DE TITOFF. M. VON HAMMER, TURKISH INTERPRETER. PRINCE GORTSCHAKOFF. ALI EFFENDI. EARL OF WESTMORELAND. RIZA BEY. LORD JOHN RUSSELL. BARON FIRCKS-HEYSTER. COUNT BOUR. DROUYN DE LHUYS.

THE VIENNA CONFERENCES.

(From our own Correspondent.)

VIENNA, April 28th.

PREVIOUS to the departure of Lord John Russell from this city, which took place on Monday evening, the 23rd instant, there was a thirteenth Conference held on the same day, which, it would appear, simply had for its object the affixing of the signatures of all the Plenipotentiaries of the Powers to the protocol of the twelfth Conference, which is to be kept open as the basis for future negotiations. It was generally understood at the time that this thirteenth Conference was to be looked upon merely as a supplement to the twelfth Conference, and that after this the Conferences were to remain adjourned for some time, as, in the language of Lord Palmerston, "the Russians had declined to accept the terms upon which Great Britain, France, Austria, and Turkey had proposed to settle the Third Point of guarantee, without making any acceptable counter propositions." The world was thus led to suppose that the pending peace negotiations had been brought to a close for a time; and that now ulterior measures would be adopted with all promptitude and energy for the immediate carrying out of the fifth article of the 2nd December, 1854. But the world was mistaken in this respect. The Austrian Government forthwith caused a semi-official article to be concocted by a well-known pen at the Foreign-office, and to be inserted in the Austrian Correspondence, to the effect that the Conferences were by no means closed, and would be continued uninterruptedly, notwithstanding the departure of Lord John Russell and M. Drouyn de Lhuys. This officially-inspired writer furthermore announced that these eminent statesmen would make a verbal report to their respective Sovereigns of the progress which had been made in the negotiations thus far, and that, considering the influential position of her Britannic Majesty's Minister for the Colonies in the Government of his country, and the unbounded confidence which the Emperor Napoleon reposes in his Minister for Foreign Affairs, it was hoped that their verbal reports would have the effect of rather (*sic*) furthering the future course of the negotiations in the Conference. The plain meaning of all this is, the Conferences have arrived at that knotty point, namely, point No. 3, which it is most difficult to cut in twain by diplomatic arts, unless they be supported by some decided success on the field of battle at or near Sebastopol. In the meantime the Governments of Great Britain and France will have time to reconsider whether the minimum of their demands and the maximum of Russia's proffered concessions are capable of reconcilement or not. This was the state of things up to Thursday morning, when it became known that Prince Gortschakoff had requested Count Buol to assemble another Conference, which also took place in the afternoon of the same day. This was the thirteenth Conference. From a secretress of the semi-official article above alluded to in respect of the fact that the Conferences "will be continued uninterruptedly." M. Drouyn de Lhuys left us this morning. He returns to Paris direct. Lord John Russell will probably arrive at London on the same day that M. Drouyn de Lhuys reaches Paris. And what then? Is there any chance of France and England seeing fit to reduce their demands for the sake of patching up a peace which would leave Russia still mistress of the Black Sea? Surely not. Taking this negative for granted, it may be safely opined that the Vienna Conferences will now remain adjourned for some time, at least until new and more acceptable propositions be received from Russia, or, until events have taken a more decisive character in the Crimea.

By the latest advices received from thence by submarine telegraph to Varna, viâ Rustchuk and Bucharest, dated the 25th instant, we learn that the general position of affairs remained unaltered. The bombardment continued, but the grand assault was postponed until further reinforcements shall have arrived. It appears, moreover, that the position taken up by the Russians on the east side of the Kiel-Schluchi or ravine, and out of which the French have not yet been able effectually to dislodge them, is highly important to the Allies. And, indeed, if we may judge from the general accounts received here from the scene of war in the Crimea, there appears to be every probability of this sanguinary contest being prolonged for a considerable time to come. Under these warlike auspices our eyes are turned again and again to Austria.

The columns of most of your contemporaries are daily filled with the most absurd reports from hence, about Austria's "continued neutrality," Austria's "wanting to back out" of her engagements of the 2nd December of last year, and such like absurdities. Other and more sensible writers, whose political judgment is not warped by ineffable self-sufficiency and paltry suspicions, do not hesitate to declare frankly and unreservedly, that Austria anxiously desires to fulfil the high expectations which not only the Governments and the people of England and France, but also the people of Germany at large, have formed of her; but these gentlemen are nevertheless of opinion that the financial condition of Austria is such that bankruptcy stares her in the face, whether she remain neutral, or participate actively in the war and that, labouring as she is under these fiscal disadvantages, little good is to be expected of her. The same writers, however, speak also of her splendidly-equipped army, consisting of upwards of 600,000 fighting men, who are confessedly brave, well-organised, disciplined, and provided with an abundance of every imaginable and requisite matériel. But is it to be supposed that this unexampled fine army is to remain inactive and with arms a-kimbo all the summer. And why? Because the Austrian exchequer is supposed to be at low-water mark. Nonsense. Those who entertain this preposterous opinion can have no adequate idea of the immense fiscal and other resources of this country. It is true Austria has great and undeniable difficulties of a financial character to contend with. But, if it comes to the push, these resources are more than equal to those. Other difficulties there are, however, of a still graver character, which may render it inexpedient, in the estimation of the Emperor Francis Joseph and his Ministers to pause yet awhile, before extreme measures against Russia be resorted to, and a declaration of war hurled against that monster of political iniquities. I allude to the more than equivocal position of Prussia and the Germanic Confederation. It is obvious that prudence requires that Austria should first come to a clear understanding with these States; and, if I am rightly informed, this is to be done forthwith. The present unsatisfactory result of the Conference will speedily be laid before the assembled Diet of the Confederation at Frankfort, and thereupon Austria will base her demand for the unequivocal and immediate support of the Federal Army, in order to enable her, with perfect assurance, to carry into execution the Fifth Article of the December treaty, in the event of Russia's persisting to decline the acceptance of those just and honourable terms of peace which the Powers represented at the Conferences have proposed to her, with every consistent regard to the general interests of Europe, and to the necessity of maintaining the balance of power in this part of the world. If this demand be refused—and it will doubtless be wise to be prepared for the event—then will probably come to light the military convention which, we are informed, has already been signed between Austria and France, and in virtue of which a free passage of a French army through Germany will be demanded of the Bund by both these Powers. Should this demand be also refused—and this hypothesis is perhaps not less probable than the preceding—then will probably long-dreaded "split" in Germany, which will bring to the test the political sentiments of the German nations. And then it will be seen if their philo-Russian Governments in Germany are in the majority or in the minority. But, be the issue thereof what it may, woe to the lesser States. Their doom will be sealed from that fatal hour, and much "weeping and gnashing of teeth" will inevitably fall to their lot

In thus taking what seems to me the most natural view of things to come, I do not mean that a "crisis in Germany" must necessarily precede a declaration of war on the part of Austria against Russia; for, how can we reasonably expect Austria to take the field against the great northern Colossus until it be clearly ascertained whether the whole of the extensive line of the Prusso-Polish frontier harbours an equivocal neutral, an absolute enemy, or an absolute ally? In either of the two former cases, it would be foolhardy on the part of Austria to attack Russia on her Polish frontiers, without being prepared, also, for all the eventualities that may be expected to take place on the Prusso-Polish frontier. If, then, Prussia and Germany entire, or in part, leave Austria in the lurch, she cannot possibly venture to assume the offensive against Russia, either on this point or in Bessarabia, without the support of an army of at least 100,000 allies—that is, Frenchmen. How such an army is to cut its way through Germany, if Germany oppose it, is another and very grave question. But, in an extreme case, it is thought that Austria may safely rely on the alliance and co-operation of Bavaria, Baden (Wurtemberg?), Hanover, and several other minor States. The days of shilly-shallying are now happily fast drawing to a close; and, whether the Vienna Conferences continue uninterruptedly or not, the future attitude of Austria, as well as that of Prussia and of Germany at large, will soon become clear to all the world. Those States in Central Europe who still indulge in *dolce far niente* hopes of neutrality must necessarily, and ere long, be roused from their self-imposed delusions.

Notwithstanding the foregoing considerations, we must not, however, forget that all hopes of peace are not yet at an end. Austria has hitherto done all she could to convince Russia of her determination to compel her —in case of need, even by force of arms—to accept just and reasonable terms of peace; witness her extensive armaments, her powerful army drawn up in battle array on the extreme northern and north-eastern frontiers of the empire, her entire attitude from the beginning of the existing complications to the present hour, her occupation of the Principalities, her friendship with Prussia, Germany, Turkey, and the Western Powers. And yet, owing it may be to a peculiar concatenation of influences, Russia, we are told, still doubts the sincerity of these threats, these menaces. Russian diplomatists are, for the most part, possessed of cultivated minds, and greatly appreciate Shakspearian literature. Thus it is that they have become acquainted with the character of *Bottom* the weaver, who was anxious to play the "lion," promising "to roar that it would do any man's heart good to hear him," and, when *Quince* the carpenter suggested that "An you should do it too terribly," &c., *Bottom* promised not to fright the ladies, lest they be all hanged, saying, "But I will aggravate my voice so that I will roar you as gently as any sucking dove; I will roar you an 'twere any nightingale." Now, these astute Russians lay the flattering unction to their unsophisticated souls (in which hapless delusion a certain small but *élite* portion of the Austrian aristocracy, who are mailed in Russian sympathies and bedizened with Russian decorations, may possibly confirm them), that the menaces and threats of the Austrian Foreign-office may be as accommodating to circumstances as the roaring of *Bottom* in his assumed character of the lion.

And since all things are possible under the face of the sun, it may chance that Russia, and the philo-Russian Governments in Germany, participate in this preposterous delusion. At all events, if it really exist, you will agree with me in thinking that it should be dispelled, and dispelled it shortly will be. The measures which the Vienna Cabinet is forth with about to take, as explained above, will surely convince Russia, beyond the shadow of a doubt, that when Austria "roars" it is in downright good earnest, and this conviction it is that may yet bring about what most sober-minded, hard matter-of-fact men may be little inclined to believe in—namely, a speedy, satisfactory, and lasting peace.

We hear that General Baron de Hess, accompanied by Generals Crenneville and Letzing, the British and French Military Commissioners, will leave Vienna for his head-quarters, in Galicia, on the second of next month It is also stated that the commanders of the various army corps are already ordered to meet the Commander-in-Chief at Lemberg on the 8th proximo; whereupon the latter, accompanied by the British and French Commissioners, will undertake a tour of inspection.

It is also understood that the Vienna garrison, amounting to about 30,000 men, will shortly be removed to the north to join the army on the frontiers, in which case the said garrison of this place will be replaced by other troops, probably coming from the south. The general health of the Austrian army in Galicia is said to be daily improving, but typhus and other fevers are reported to have raged among the troops, especially amongst the cavalry, to a fearful extent. We hear also that a new levy is about to be raised, but of how many men it is to consist is not yet known. "Veritatis simplex oratio est."

NAVAL AND MILITARY INTELLIGENCE.

THE 80th Regiment is ordered to be held in readiness to embark from Fort George in three divisions for Edinburgh, to proceed thence by railway to Portsmouth. It is expected that the first division will leave on the 7th, and that the whole regiment will have left by the 15th of May.

IN consequence of the numerous attacks that have been made with the bayonet by militiamen when excited by drink, and which, in some instances, have resulted seriously, it has been notified that for the future no person belonging to militia regiments, with the exception of non-commissioned officers, will be permitted to carry or wear side arms (bayonets) when off duty; but the waist or side belt, as the case may be, will be allowed to be worn as heretofore.

DR. M'PHERSON, Inspector-General of the Turkish contingent, has visited Edinburgh to distribute a portion of the very extensive patronage vested in him to the school of medicine there. It is stated on the part of Government, to take into immediate service surgeons, assistant-surgeons, and dressers, on the pay respectively of 25s., 15s., and 10s. 6d. a day. Several students have gone out.

RANK OF INDIAN OFFICERS.—The following notice from the War-office appears in Tuesday's *Gazette*:—"In order to remove any doubt which may exist as to the rank and precedence of the officers of the Honourable East India Company's service, when serving with officers of her Majesty's regular army, according to the dates of their commissions, in all parts of her Majesty's dominions or elsewhere."

A DETACHMENT of the Royal Marine Artillery, under the command of Captain [illegible], consisting of First Lieutenant F. H. Sherard Hewett and Lieutenant [illegible], 2 sergeants, 2 corporals, and [illegible] artificers, were embarked on the [illegible] last, on board the [illegible] screw steamer *Lord Raglan*, for passage to the eastward, to join the new mortar-vessels about being dispatched, under charge of Captain Willcox, of the *Odin*, to the Black Sea fleet off Sebastopol. Each mortar-vessel will have six of these valuable and experienced marine artillerymen.

THE monthly returns of deserters from the Army and embodied Militia, made up to Saturday last, exhibit a marked increase in the number of defaulters to those of the preceding month the deserters from the regular forces being 379, and those from the Militia 395; making a total of 774. Of these, 44 are from the Household troops, 14 from the Royal Artillery and Sappers and Miners, 42 from Cavalry Regiments, 5 from the Land Transport Corps, and 21 from the Royal Marines; while the remaining 211 are from Infantry Regiments of the Line, and include seven deserters to the enemy from the army before Sebastopol. Of the 395 deserters from the Militia, no fewer than 260 have been convicted as absentees from the City of London Militia since the corps was embodied on the 20th of February. There is a short decrease in the number of deserters, strangers, and men discharged with disgrace from her Majesty's ships and vessels during the past month, the total being [illegible] deserters, 48; strangers, 4; and men discharged with disgrace, 9 (from the *Hastings*, and from the *Rhadamanthus*). Rewards varying in amount from £1 to £5, are offered for the apprehension of any of the above deserters

THE following circular, signed by the Adjutant-General, has been issued from the Horse Guards, respecting the enlistment of recruits: "In conformity with the order in Council, authorising the enlistment of recruits between the ages of 24 and 35 years, for the limited term of two years, and for any further term not exceeding one year, the General Commanding-in-Chief, with the concurrence of the Secretary of War, desires it to be notified that all recruits so enlisting will be allowed the same bounty as at present granted to men enlisting for a longer period."

THE General Screw Company's screw steam-ship *Indiana*, No. 147, left Southampton for Woolwich on Tuesday morning, for the purpose of embarking horses for conveyance to the Crimea. She is fitted to accommodate 256, and will also berth a large number of troops. The capacity of her decks renders her admirably suited for the purposes of the horse transport service.

IT is expected that the City of London Militia will proceed to Woolwich early next week. The regiment is still far below its number, although within the last fortnight a large number of recruits have been attested.

IT is intended to distribute, as far as may be practicable, the regiments of Militia on the home service in the following manner, viz., English and Welsh regiments in Scotland, Ireland, and the Channel Islands; Irish regiments in England, Wales, Scotland, and the Channel Islands; and Scotch regiments in England, Wales, Ireland, and the Channel Islands. The several regiments will be relieved periodically, in order to perfect the men in garrison duties of every description. Ten regiments of Irish Militia will be concentrated at Aldershott-heath, on the formation of the Camp.

The demand for seamen for outward-bound vessels from Greenock to the St. Lawrence has been so great that it could not be supplied by the Clyde ports, and about 100 seamen have been obtained from Liverpool to man some of the ships.

A detachment of condemned soldiers have arrived in Algeria, where they are to be employed in making roads, forming forts, draining marshes and other works of public utility.

MUSIC.

DEATH OF SIR HENRY BISHOP.

It is with great pain that we have to announce this melancholy event, which took place on Monday evening last; and it is with still greater pain that we must add that it occurred under very lamentable circumstances—the great musician, of whom his country may so justly be proud, having been reduced to a state of poverty almost amounting to destitution. Several days previously an announcement had appeared in the newspapers intimating that his friends were about to set on foot a subscription for his relief. It stated that they "feel a painful but unavoidable necessity for announcing that this estimable composer is at this moment labouring under pecuniary embarrassment; they feel deeper regret in stating that he is suffering from acute bodily infirmity, without the slightest means for meeting his own immediate necessities, or for making any provision for his two youngest children, a son and a daughter." It was at the same time announced that, in consequence of Sir Henry Bishop's increasing illness, it had been necessary to discontinue the afternoon concerts at the Hanover-square Rooms; but that a concert on an extended scale was to take place at Covent-garden Theatre on the 16th of this month, the proceeds to be applied for his benefit and that of his two youngest children. Notwithstanding the deplorable state of his health, a fatal termination of his malady, we believe, was not immediately apprehended; but he rapidly grew worse, till at length he sank under his sufferings—a sad close of so long and brilliant a career!

Sir H. Bishop must have reached at least the age of 69. He was a native of London, and at an early age was placed under the musical tuition of Bianchi, a celebrated dramatic composer of that day. Bishop himself became known as a composer so early as the year 1806, by a ballet called "Tamerlan et Bajazet," produced at the Italian Opera-house. His first English opera, "The Circassian Bride," was produced at Drury lane, in February, 1809; but on the night after its first performance the theatre was burnt to the ground, and Bishop's score perished in the flames. From a few fragments of it still extant, particularly the fine duet "I'll love thee," it must have been a work of great merit. "The Maniac," produced the following year at the Lyceum, has always been regarded as one of his best works. In 1810 he was engaged as composer and director of the music at Covent-garden; and then began that long and brilliant series of operas which he produced for that theatre, in regard of uninterrupted succession down to the year 1824, when his connection with it terminated. That series, commencing with "The Knight of Snowdon," and ending with "Native Land," includes no less than *fifty-eight* pieces. Many of them were too hastily written; some were pantomimes, spectacles, and trifling *morceaux de circonstance*; but a great number were works of sterling merit, which were received, not only in the metropolis, but throughout the whole kingdom, with enthusiasm, and obtained for their author the well deserved title of "the English Mozart." Bishop's last dramatic work of magnitude was "Aladdin," which was produced at Drury lane, under unfavourable circumstances. In 1826 Weber's "Oberon" was brought out at Covent-garden; and, to increase the public interest, the famous German musician appeared, as a lion, to direct the performances. The managers of this rival theatre, wishing for something to counterbalance the attraction at the other house, prevailed on Bishop to write an opera for them. He imprudently complied, and produced "Aladdin"—a work on which he exerted all his powers; as might have been expected, its great and numerous beauties were overlooked, and it entirely failed of success.

This was the termination of Bishop's splendid career as a composer for the stage. But he did not sink into inaction. He continued to write many detached songs, duets, glees, and other vocal pieces for the concert-room and the clamber, which obtained general popularity, and contributed to preserve among us that wholesome relish for sound English melody which is too much impaired by the constantly increasing importation of works of the foreign schools. The later volumes of Moore's Irish Melodies were also committed to his care; and his masterly arrangements were found immeasurably superior to those of his predecessor, Sir John Stevenson. Among other works of his latter days we may mention his contributions to the pages of this Journal, including not only original compositions of great beauty, but graceful and elegant symphonies and accompaniments to our finest national melodies.

Of late years Bishop's works have not met with the attention due to them from the British public. The prevailing rage for foreign novelties has led to an unjust neglect of our native artists; but we venture to predict that this neglect will be but temporary, and that at no distant day the name of our illustrious countryman will receive due honour, and his beautiful compositions their old popularity.

(A Portrait of Sir Henry Bishop, with a copious Memoir, appeared in the ILLUSTRATED LONDON NEWS, No 532.)

THE THEATRES.

SURREY.—Shakspeare has travelled with Mr. Phelps to this transpontine theatre, and on Monday that gentleman enacted on its boards *Othello*, to the *Iago* of Mr. Creswick. A similar experiment was made last year, and its success induced its repetition on the present occasion. Apart from the immeasurable good which this event is likely to bestow on the Surrey audience, by elevating their taste through the medium of artistic acting to the perception of the highest tragic poetry, it is seldom now-a-days than we can have the opportunity of witnessing two leading actors in the same drama. The result was a harmony of effect in the interaction of passion between the Moor and his Ancient that was not only satisfactory to the mind, but strongly exciting. *Othello*, unless potently tempted by a competent *Iago*, is defrauded of motive and purpose, and needs the justification with which the poet intended he should be plentifully supplied. Mr. Creswick's *Iago* is an exceedingly intelligent example of judicious acting. He discards altogether the ostent of villany with which it was the custom to invest the part, and substitutes for it a general plausibility of behaviour that accounts for his deceiving so many into a common opinion of his honesty. Mr. Phelps played *Othello* in his finest manner. By frequent repetition, Mr. Phelps has enabled himself to weigh every syllable, and so to distribute the cadences of every sentence as to insure the best reading of every speech, and accord to the intended sentiment its appropriate expression. In like manner, his points are fairly selected from the general text, and the actor is never guilty of the error of making them to suit his own purpose without reference to the poet's design. It is this conscientious regard to his author's judgment which has procured for Mr. Phelps the enviable title of a Shakperian actor, and planted the high reputation which he enjoys on a sure and steady basis. The house was full; the applause was deservedly frequent; and the usual ovation was accorded to the two artists, who had so successfully supported the burthen of the action.

FANCY SALE FOR THE TRINITY ST. PANCRAS SCHOOLS, TO BE HELD AT THE SCHOOLS, MAY 10TH AND 11TH.—With cordial sympathy we direct the attention of our readers to the exertions of the committee in behalf of the Trinity St. Pancras Schools, the opening of which, on July 9th, 1848, was noticed in our paper. Those schools were founded in order to supply the pressing wants, in point of education and moral and religious training, of an unusually large proportion of the young who were otherwise liable to grow up in ignorance and vice. The schools, which at first were built in shells, were appropriated for the additional purpose of a temporary church; and a room used for an infant school, which had been commenced on the May preceding, was also used for a Sunday school. Many and great doubtless they would otherwise have been, although the committee have been cheered under their heavy burden of responsibility by many donations, given in a spirit of Christian kindness; and, among others who came forward with seasonable aid, "a Friend" kindly offered to pay £10 upon the 1st of May, 1853, if ninety-nine others did the same, to make an effectual payment, and the idea was happily carried out. The rapid increase in the population of this locality has had consequent necessity for education in a poor neighbourhood, demands a growing expense greatly exceeding the annual subscriptions. Thus the debt commencing with the opening of the schools, and increased by the outlay required for repairs and material, weighs heavily upon the management, and renders the responsibility of carrying on the undertaking a work of anxious solicitude, and it is earnestly to be hoped that many well-wishers to a cause of so essential an interest may come forward with such aids as may serve to support and promote the sale undertaken as a measure calculated to relieve the stress by which the operations of the committee are burdened.

It is expected that before the end of the summer the electric communication between Marseilles and Algeria will be complete.

PARIS FASHIONS FOR MAY.

Longchamps and the fine weather have realised our predictions, and we are, accordingly, in a better position for advising our fair readers as to the choice of summer dresses. Flounces are not so much in favour as hitherto, and dresses can be worn with plain skirts, the patterns being placed cross-wise, and lessening towards the waist. They are cut out and placed upon a plain ground for flounces; or they are left altogether upon the ground, and thus form a plain skirt. Almost all the grounds are *à petits quadrilles*, very delicate, and the patterns are of coloured watered bands, and garlands of flowers of soft and very varied shades. Basques seem to be coming up again. The dresses have a disposition that forms the first flounce, and falls over upon the plain skirt. One of the newest robes is the *Robe Neapolitaine*, of all shades. The ground is of taffetas, with a pattern woven in colour, and forming a

PARIS FASHIONS FOR MAY.

draught-board; the pattern diminishing towards the top of the skirt. The corsage has three trimmings for the sleeves in smaller *quadrilles*, as well as the front of the corsage and the border of the basque. Other robes are of *vert céladon* upon *vert pré*, *bleu Louise* upon *bleu plus foncé*, &c. They are generally worn with flounces; and in almost all the patterns of the lower part there is black, to contrast with these light colours; or the pattern is *une Grecque*, or *à quadrille*. But when they are garlands of flowers, or sprinkled bouquets, no other shades than those of the flowers are employed. Robes trimmed with garlands are called *Corbeilles de Flore*. Almost all the flounces are trimmed with a fringe. Black taffetas mantles are trimmed with deep Chantilly lace, falling over half the length of the skirt, and crossing in front. This kind is more *recherché*, and is in greater favour than the paletôts with sleeves, which fit closer to the figure.

The most *distingué* bonnets are white. Those of *paille de riz*, with alternated bands of white blonde, will be most worn. They are ornamented with tufts of straw-coloured feathers, shaded rose to-wards the end. Many white feathers are also worn, with black. Bonnets are as small as ever; but, to make up for it, the curtain falls very far behind the neck. It is proposed to have boots to match the shades of walking dresses; but the innovation is not a happy one. We recommend black or gold-coloured English leather.

We were unable last month to describe the toilette worn by the Empress at Longchamps, but we now supply that deficiency. It was composed of a pearl-grey taffetas robe, ornamented up to the centre of the skirt, with *ricrens* woven in silk of the same shade; upon the front width the embroidery was continued up to the point of the corsage. The corsage was flat, *montant à pointe*, and without basques. It was closed by small delicate pearl buttons, and worked upon the breast with *ricrens*, like the smaller ones. Similar embroidery ornamented the flounces of the sleeves. The collar and the sleeves (called *à l'Impératrice*, and described by us last February) were in *point à l'aiguille*. A magnificent shawl of Indian gauze, with a white ground, embroidered in relief with flowers and fruit, woven with threads of gold and silver. The bonnet was of *paille de-ris*, and bands of blonde; tufts of *muguets des bois* were placed on each side.

THE ILLUSTRATIONS.

Paletot à pointe, trimmed with Chantilly lace, and *quadrilles de velours* above the flounces, and the same for the sleeves. *Robe corbeille de Flore*, upon a Pekin or *gros des Indes* ground, with garlands of flowers on every flounce, and the ground striped.

Mantle of black taffetas, trimmed with a fringe, and above with a border of silk *chenille*. Robe of *vert céladon*, with a band at every flounce in lighter green *chiné de blanc*.

Collar of *point à l'aiguille* of a new form; one is also worn with skirts, and of which the two points cross in front upon the breast, and are attached by a pin. Robe of taffetas *vert Empereur*, with sleeves of two flounces, trimmed with a *ruche* at each extremity.

THE END OF THE SEASON.

One last fond look, James, ere you put
  My bit of pink away
Its claret skirts to me recall
  How many a glorious day?
The run we had from Gander's-green,
  Away to Bradley-gorse,
Two hours and twenty minutes, James,
  That pumped both man and horse.
The day we met at Grassvale-end
  (I'd mounted Mr. Beck),
We went away, heads up, sterns down,
  And killed without a check:
And then the day I rode Kildare
  (Of Irish blood the best),
And took that double post and rails,
  Which pounded all the rest.
That stain upon the shoulder, James,
  Was honourably won,
I put old Trubnoy at a gate
  After a three hours' run.
The gallant fellow never paused;
  I felt I'd gone too far—
Crash! crack! and over James we went,
  And broke the topmost bar.
That was the day I was brought home
  By yokels on a gate;
And as you know, James, to your cost,
  Three weeks I lay in state.
But oh! the wild ecstatic joy
  That played through every vein,
When to the meet at Langley-green
  I cantered off again!
The hand-press and the kindly words
  That hailed me when we met—
Never till doctors give my Whoop!
  Shall I that meet forget

When last I wore my bit of pink,
  H. M. S. H. had met
To hunt the Emperor of the French;—
  (I judged so by the set
Of horse and foot that to Salt-hill
  Had flocked the sport to see.)
"If this is hunting," I exclaimed,
  "Good day; 'twont do for me."

The daisies pied (as poets sing)
  In grass lands now are found;
The pale primroses, yellow-eyed,
  In hedgerows do abound.
The bursting buds on every bough
  Proclaim the birth of May.
Woe's me! the Hunting Season's o'er!
  James, take my pink away.

L.

Easter Sunday at Jerusalem.—The usual fighting among the Latin and Greek pilgrims took place at Jerusalem on Easter Sunday, and Turkish soldiers had to be stationed within the Holy Sepulchre to preserve order. The Duke and Duchess de Brabant and several travellers who were at Jerusalem received the extraordinary privilege of visiting the Mosque of Omar, the site of the Temple, which the Mussulmans hold to be so sacred that until this occasion all Christians were most rigorously excluded from it. The Pasha of Jerusalem, to protect the visitors from annoyance, had all the guards of the Temple and the Mahometan devotees who reside there put under arrest during the time of their visit. One fanatic, however, escaped from custody and signified his disapprobation of the sacrilege by loud shrieks. The mosque is a most gorgeous edifice, built in the octagon form, covered with coloured tiles, and the dome bears marks of having been gilt. In the centre is a large rock, which is railed in, and considered very holy, and underneath there is a chamber where they show the tombs of Soloman, Elias, and Abraham. The number of Christians who went in was very large; they were all very orderly, and seemed much impressed with the holiness of the ground on which they stood.—*Letter from Constantinople.*

THE IMPERIAL APARTMENTS AT BUCKINGHAM PALACE.

As *souvenirs* of the visit of their Imperial Majesties the Emperor and Empress of the French, we engrave the accompanying Views of two of the principal apartments prepared for the reception of the Imperial guests, at Buckingham Palace. Hereafter we shall also illustrate "the Imperial Apartments" in Windsor Castle.

THE EMPRESS' DRAWING-ROOM

is an apartment in the new front of the Palace, facing the Mall, and situated immediately over the centre archway, leading to the quadrangle. This room is nearly square in its proportions, the ceiling is coved and treated in the polychromatic style. The walls opposite the windows are hung with tapestry about a century old; the ends of the room, on each side the fireplace, are panelled with a neat tint; the looking-glasses are richly framed, and extend from the mantelpiece to the cornice. In each corner of the room is placed a lofty porcelain pagoda, brought from the Pavilion at Brighton, as were also many of the other ornaments in the room, and the chandelier. The furniture is of white and gold, with crimson damask covers.

THE EMPEROR'S, OR YELLOW, DRAWING-ROOM

is at the Pimlico angle of the new range of buildings forming the front of Buckingham Palace. It is an elegant apartment, though somewhat incongruous in its style—partly arranged in its decoration to suit the furniture and ornaments which in most instances had once decorated the Pavilion at Brighton. It derives its name of "Yellow Drawing-room" from the walls being hung with amber-coloured satin damask. The curtains are also of the same colour. The chairs, couches, &c., are white and gold, covered in the same way. The carpet is a deep blue ground, with a yellow and white floral pattern. Two large pagodas fill up the piers between the windows, and two large candelabra occupy the corners. The chimney-piece is of white marble, ornamented with or-moulu and bronze. The niches in the jambs have each a figure of a Mandarin within them, giving the chimney piece a very quaint appearance. Some exquisite buhl and other tables complete the fittings of this apartment.

BURLINGTON-HOUSE, PICCADILLY.

Few of the modern historical houses of London have become so celebrated in artistic record as the mansion built for and named from Boyle, Lord Burlington, and greatly embellished and enlarged by his son, Lord Burlington, the architect. It occupies a large space of the ground between Bond-street and Sackville street, on the north side of Piccadilly. The property was purchased last year by Government for £140,000. The house is not well adapted for the purposes to which it was intended to appropriate it, and will, in all probability, be taken down. Meanwhile the premises have been temporarily lent for the Exhibition of Drawings, &c., in aid of the Royal Patriotic Fund, which circumstance, together with the fame of the mansion, hitherto shut out from public view by a lofty wall, will, doubtless, prove very attractive. Hence the present is a fit opportunity for introducing to our readers the architectural beauty of this classic pile, and a few of the celebrities which people its history.

The mansion was originally built for Lord Burlington, by Sir John Denham, then Surveyor to the Crown. Horace Walpole has given currency to the story that Lord Burlington, "when asked why he built his house so far out of town, replied, because he was determined to have no building beyond him." A similar anecdote, however, is told of Peterborough house, Millbank, Northumberland-house, and of other houses on the verge of the spreading town; and it could not have been said with truth of Burlington-house, because Clarendon-house and Berkeley-house were being built to the west of it at the very same time. Walpole's pleasant gossip, although often corrected, was revived a few months since by a contemporary, and made the grand tour of the newspapers as matter-of-fact. The three houses just named are thus mentioned by Pepys:—

20th Feb., 1664-5.—Next that (Lord Clarendon's) is my Lord Berkeley beginning another on one side, and Sir J. Denham on the other

28th Sept., 1668.—Thence to my Lord Burlington's house, the first time I ever was there, it being the house built by Sir John Denham, next to Clarendon-house.

The site was previously occupied by a farmstead. The house built by Denham was plain and well-proportioned, without any architectural display. A print by Kip shows this house in the year 1700, with its quaint gardens, and beyond them *the country*, now covered by Regent-street and Portland place; the courtyard is enclosed by a wall of moderate height, in front of which are planted large trees; and the carriage entrance is through two plain piers. Lord Burlington, the architect, added a new Portland stone front to the mansion; and a grand colonnade, borrowed from a palace by Palladio, at Vicenza. In the centre of the wall was built, in place of Denham's plain gateway, an archway of triumphal design; and there are two semicircular side entrances. Horace Walpole was in Italy when these embellishments were completed, and he thus tells their impression upon him after his return: "As we have few samples of architecture more antique and imposing than that colonnade, I cannot help mentioning the effect it had upon myself. I had not only never seen it, but had never heard of it, at least with any attention, when, soon after my return from Italy, I was invited to a ball at Burlington house. As I passed under the gate by night, it could not strike me. At daybreak, looking out of the window to see the sun rise, I was surprised with the vision of the colonnade that fronted me. It seemed one of those edifices in fairy tales that are raised by genii in a night-time."

The Doric colonnade and gateway are attributed to Colin Campbell, an architect of some skill, employed by Lord Burlington, who, when the designs were made, was but twenty-three years of age: still they were claimed for his Lordship, though he is not known to have urged his own right. Later in life he designed many architectural works which render the eulogy of Pope in his fourth "Moral Essay"—the Epistle on the Use of Riches—which he had addressed to the Earl of Burlington, by no means exaggerated:—

> You, too, proceed! make falling arts your care;
> Erect new wonders, and the old repair;
> Jones and Palladio to themselves restore,
> And be whate'er Vitruvius was before.

In Burlington-house the Earl delighted to assemble the leading artists and men of taste of his time; poets and philosophers—the learned, the witty, and the wise. Kent, the architect and landscape-gardener, had apartments in the mansion, where he remained until his death, in 1748. Here Handel resided with the Earl for three years; and here Pope, Arbuthnot, and Gay, often met. The latter poet, in his "Trivia," after

BURLINGTON HOUSE.

THE COLONNADE, BURLINGTON-HOUSE.

amenting the disappearance of the famed structures and stately piles of the Strand, thus refers to the Piccadilly mansion :

> Yet Burlington's fair palace still remains,
> Beauty within, without proportion reigns.
> Beneath his eye declining art revives,
> The wall with animated pictures lives
> Here Handel strikes the strings—the melting strain
> Transports the soul, and thrills through every vein
> There oft I enter (but with cleaner shoes),
> For Burlington's beloved by every Muse.

Sir William Chambers has described the mansion as "one of the finest pieces of architecture in Europe," "behind an old brick wall in Piccadilly." Pennant, however, considers that "the interior, built on the models of Palladio, and adapted more to the climate of Lombardy, and to the banks of the Adige or the Brenta, than to the Thames, is gloomy and destitute of gaiety and cheerfulness."

Lord Burlington died in 1753, when the title became extinct, and Burlington-house passed to the Duke of Devonshire. Several alterations

THE ENTRANCE GATEWAY, BURLINGTON-HOUSE.

were made in the interior, chiefly under the direction of Samuel Ware The Duke of Portland, Prime Minister to George III., died in this mansion, in 1809, a few days after he had resigned the seals of office. In the western wing were temporarily deposited the Elgin Marbles, before they were removed to the British Museum. In 1814 White's Club gave here to the Allied Sovereigns, then in England, a grand ball, which cost £9489. Among the guests was Alexander, Emperor of Russia.

In 1815 Burlington-house was purchased of the Duke of Devonshire by his uncle, Lord George Cavendish, who repaired all those parts of the building erected by Lord Burlington; and, by raising the Venetian windows o. the south front (*See the Illustration*), completed the Earl's design for this façade. Lord George Cavendish converted the riding-house and stables on the east side of the court yard into a dwelling, as an appendage to the mansion, and built other stables behind the screen wall. His Lordship also rebuilt the mansion, except the front elevation and some rooms connected with it, maintaining throughout the alterations the decorative character of the preceding edifice. The same nobleman likewise restored the terrace and terrace-steps in the garden, and converted a narrow slip of ground on the west side of the house and garden into the "Burlington Arcade," built by Ware, in 1819: from the rental of which the Cavendish family are said to derive but £4000 a year, though the actual produce (from sub-leases) is stated to amount to £8640. On the east side of the gardens is the high range of buildings called "The Albany;" but all its windows are shut out from view of the gardens.

The state apartments of Burlington-house are on the first-floor. Proceeding eastward from the great staircase, they form a suite of six rooms, richly ornamented and gilt. The ceiling of the saloon was painted by Sir James Thornhill. The great staircase was painted for the Earl of Burlington by Marco Ricci and his uncle Sebastian; the same artists painted the ceilings of the state dining-room, and the south-east ante-room to the great drawing-room. Altogether, Burlington-house merited much of the praise applied to it in 1826—that it was "the only town residence really fit for a British nobleman;" but since that period some noble additions have been made to the mansions of the metropolis. The edifice and grounds are said to occupy about eight acres. The south front of the house, which we have engraved, is 180 feet in extent, and the height of it is 48 feet. A ground-plan is given in Britton's "Public Buildings of London."

The entrance archway has considerable pretensions to grandeur. Its characteristics are thus summed up in the "Curiosities of London," lately published:—

The archway has a lofty pediment, flanked by the supporters of the Burlington arms, and supported by four rusticated columns, coupled. It is commemorated by Hogarth in a *caricatura* print (1731), inscribed "The Man of Taste, containing a View of Burlington Gate:" on the summit is Kent (served by Lord Burlington as a labourer), flourishing his palette and pencils over Michael Angelo and Raphael; lower down is Pope whitewashing the front, and bespattering the Duke of Chandos in the street. Ralph refers to the front as "the most expensive wall in England; the height wonderfully proportioned to the length, and the decorations both simple and magnificent. the grand entrance is elegant and beautiful; and, by covering the house entirely from the eye, gives pleasure and surprise, at the opening of the whole front with the area before it at once." Any passenger who has seen the mansion through the great gateway from the footpath may appreciate the above effect.

BRANDY.—Dr. URE and Dr. LETHEBY Have analysed our EAU DE VIE, and found it genuine Cognac, "a spirit of undoubted purity, peculiarly free from acidity, perfectly wholesome, and decidedly preferable to direct importations from the Cognac." In bottle, imperial gallon, 14s. per dozen; 8s. per dozen bottles included. HENRY BRETT and Co., Old Pretoria Distillery, Holborn.

DR. ARNOTT'S SMOKE-CONSUMING FIRE-GRATE is manufactured by F. EDWARDS, SON, and CO., 43, Poland-street, Oxford-street, where one may be seen in daily use. The advantages of this Grate are that a fire being perfectly economical, no chimney-sweeping being required, and a current of air not being felt in the room, they effect in the cost of fuel. Prospectuses, with Testimonials, sent on application.

DARING ATTEMPT to FORCE OPEN one of CHUBB'S FIRE and THIEF-PROOF SAFES. "Waldram's Hill, Wolverhampton, "March 24, 1855. "Gentlemen,—Last night some thieves broke into our office, and made a violent attack upon our iron safe, which is one of your fire and thief-proof manufacture, and contained a large sum of money, and other valuables. From the disfigured condition of the safe, and the appearance of several very strong housebreaking instruments which they had broken in their attempts, and left behind them, it is evident that the thieves spared no efforts in their endeavours to force it open; but we have much satisfaction in informing you that, owing to the great strength of your safe, their object was entirely defeated. "We are, gentlemen, your obedient servants, "MESSRS. WILLIAMS and JONES. "To Messrs. Chubb and Son, 57, St. Paul's Churchyard, London."

CHUBB'S LOCKS, with all the newest improvements. Complete Illustrated Lists, with sizes and prices, will be sent on application to Chubb and Son, 57, St. Paul's Churchyard, London; 28, Lord-street, Liverpool; 16, Market-street, Manchester; and Horsely-fields, Wolverhampton.

TO INVALIDS.—COOPER'S DISPENSING ESTABLISHMENT, 35, Oxford street, London. The preparation of Prescriptions a careful, an entirely distinct, from the retail trade; a principle adopted by Cooper, which has given to his establishment that high character it possesses in the country as a dispensary, and which can only be maintained by the same means. Cooper's Medicine Chests, Cooper's Baths, Cooper's Pamphlets, Cooper's Catalogue of Medicine Chests, Cooper's Pamphlet on Baths, forwarded by post

Mahogany Medicine Chests for travelling, containing six Cut-glass stoppered Bottles, 14s., Oak Chest containing eleven stoppered Bottles, 25s., with every variety for families, clergy, and travellers, at equally moderate prices

Cooper's Bath for bathing the eye, as self-acting, and so simple that it may be used by a child To all who suffer from weak eyes, produced by reading, writing, or close application to minute work, it is highly recommended Price 20s., carriage paid Improved Lavement Apparatus for administering the remedy in the most effectual manner for diseases of the intestines, thereby preventing inflammation of the bowels, price 20s. Every other variety at prices from 10s upwards

W Thos T Cooper, Pharmaceutical Chemist 35 Oxford street, London.

UNIVERSAL LIFE ASSURANCE SOCIETY, 1, King William-street, City, London. Established 1834. Empowered by Special Act of Parliament 4 William IV. cap. 64. Sir HENRY WILLOCK, K.L.S., Chairman; JOHN STEWART, Esq., Deputy Chairman. The successful operation of the Society have enabled the Directors for the last twelve years to reduce the premiums on policies entitled to participate in profits on an average more than forty-five per cent, and during the last four years a reduction of forty-five per cent has been declared. Weekly Board-day, Thursday, one o'clock. MICHAEL SALAH JOSEPH, Secretary.

THE HONOURABLE ARTILLERY COMPANY of VOLUNTEERS, mounted, armed, and clothed as Artillerymen in England, is OPEN for the ADMISSION of GENTLEMEN who are willing to give a portion of their time to Military Services

The Corps is empowered by Royal Patent and Warrants from her present Most Gracious Majesty, and her Majesty's Royal predecessors, to train persons in the use of arms, and to the practice of military evolutions and exercises

The Corps possesses a Parade-ground of several acres, a Rifle-gallery 150 feet long, an Armoury-house, Arms, and every facility for efficient military training

The Officers are selected from the Corps, and hold her Majesty's Commissions.

Gentlemen under twenty one years of age are admitted as Cadets, but must produce the consent of their parents or guardians

Members have to provide themselves with the Uniform of the Corps.

The expenses of the Band, Arms, Ammunition, &c., are defrayed out of the funds of the Company.

Gentlemen desirous of joining, can obtain any further information on application, by letter, to Mr. William H. White, Secretary, 18, Artillery-place, Finsbury.

THE CRIPPLE'S HOME, in connection with FEMALE REFUGE and INFANT NURSERY, HILL-STREET, DORSET-SQUARE

Under the patronage of the Earl and Countess of Shaftesbury, &c. Subscriptions are earnestly requested for this valuable Institution, £300 are immediately required for carrying on its operations. This is the only Institution in the Kingdom for receiving and providing Cripples with a Dwelling-house. Here they are being instructed in the easy-bound trades. It is entirely hoped that a generous British public will not permit this Institution to be CLOSED from WANT OF FUNDS, or that these poor Cripples shall continue as street beggars, exposed to every description of danger and temptation.

Dr. Routh, 52, Montagu-square; Miss Broughton, 33, Dorset-square; Mr. Dent, Exeter-hall, will thankfully receive subscriptions.

NELSON MARINE ACCIDENT ASSURANCE COMPANY; for assuring, at small cost and with cash trouble, Emigrants, Passengers, Mariners, and others, from the loss of Life and from Personal Injury by Shipwreck or other Accidents at Sea; and also the Baggage of Passengers. Capital £100,000 in 10,000 shares of £10 each. Deposit £1 per share. The Directors will not proceed to business until £50,000 is actually subscribed The habitation of Shareholders will be effectually limited by a clause in the policies

DIRECTORS.

The Hon James Byng
Richard Hanbury Gosling, Esq.

Chairman—George Frederick Young, Esq., Bushey heath, Herts.
William Henry Dickson, Esq., Clapham-common
Robert Lamont, Esq., Liverpool.
John Napier, Esq., Glasgow
Augustus B. Norell, Esq., Woodhouse, Dulwich
Peter Paterson, Esq., Regent's park
David Thom, Esq., Leeds
William Henry Wells, Esq., Chepstow-villa Hampstead
Adalphus W. Young, Esq., Putney Vale

BANKERS.

Messrs. Henderson, Esq., Liverpool and London Insurance Company.
Edwin Fox, Esq., of sanderson, fry, Fox, and Co's, Great St. Helen's
Robert Malcolm Kerr, Esq. 1 Elm-court, Temple
W Bevan, Esq., 6, Old Jewry, London.

Bankers—London Joint Stock Bank
Secretary—John Richard, Esq.

Applications for Shares may be addressed to any of the Directors; or to the Secretary of the Company, at the Office of the Solicitor, 6, Old Jewry, London (where prospectuses and every information may be obtained); or to S. J. Thomson, Esq., Secretary at Liverpool, 3, Cook-street, Exchange

ARTISTS' BENEVOLENT FUND for the RELIEF of DISTRESSED ARTISTS and their FAMILIES

The Annual Meeting for the Quarter 1857

The ANNUAL GRAND DINNER will take place in FREEMASONS' HALL, on SATURDAY, 19th MAY, 1855, the Right Hon. LORD BROUGHAM and VAUX, D.C.L., F.R.S., &c., in the Chair.

The Marquis of Breadalbane, M.P.
Lord Robert Grosvenor, M.P.

SEVEN PER CENT BONUS.—The CONSTITUTIVE LAND SOCIETY. Notice is hereby given that Mr. [illegible] for the PAYMENT of the CLAIMANT [illegible] Contributing Shares, and on Subscription [illegible] progress, of a Plot [illegible] and water, will commence [illegible] last Ed on and after [illegible] for the half-year [illegible] and after [illegible] Chair [illegible] Executive Committee of the Constitutive Land Society for the [illegible] of business ending May 31, 1854. By order of the Board, [illegible] Secretary.

Offices, 33, Norfolk-street, Strand, London

THE CONSERVATIVE LAND SOCIETY. Persons who may be desirous of investing Capital and Savings with complete security, and freedom from personal liability, may use the Society as a Bank of Deposit, or Savings Bank, and the taking of Shares (one pound in value) to the same extent at any time without risk on eligible estates, in various counties, so as to secure the freehold franchise and first-rate ground-rents. A completed share, which at once entered on the register of members, to those places of land, costs £52 6s. 8d., including [illegible] £1 1s. 8d., if taken, and all charges. An unconditional [illegible] sale at advance, so as to be entitled to 5 per cent. interest, payable half-yearly, on the completed shares, at 5s. 6d. Monthly [illegible] Shares, also a in progress are 8s. per month, with 1s. quarterly to cover working expenses, and 3s. 6d. entrance fee per share Prospectuses and forms for the [illegible] to be forwarded, free of expense, on one [illegible] to the Secretary, at the Central Offices, No. 33, Norfolk-street, Strand, London, or to the Agents for members in the chief towns of the United Kingdom All letters and remittances to be post paid into the Society can be withdrawn, under the rules, at ten days' notice.

SPRING GROVE.—Nine miles from Hyde-park-corner, and close to a Railway Station on the Windsor line

THIS ESTATE, comprising an area of nearly 300 acres, finely wooded, has been recently laid out for Villas and commodious and handsome Detached Residences, of various degrees of accommodation, exclusively adapted for private occupation, with Lawns, Gardens, and Pleasure Grounds of the most picturesque and varied as required. The whole stands on a fine gravelly soil and is of great elevation (above 300 feet), and is one of the few on which the purchaser can secure the most perfect drainage for all the houses. Each house is well supplied with gas, and water for general purposes, brought from the river above Hampton Court, and wholly independent of the Water Companies.

A Church (around which will be several acres of enclosed pleasure grounds, for the use of residents) is now in course of erection on the new district of Spring Grove, which, when completed and consecrated, will be placed at the disposal of an eligible Incumbent and Minister.

Places of Worship, for persons of other denominations, are to be found in the immediate neighbourhood.

The Rent of Villas, from £50 to £250 per annum, and Houses will be erected upon any approved plan to suit the wishes and requirements of families of respectability

The South Western Railway, which passes through a portion of the Estate, and has a Station within a few minutes walk of every part of it, admits of hourly communication with Town, and is conveniently connected with the other principal lines of railway. It leads to all parts of London; and residents have the benefit of a large reduction in the price of [illegible]

Persons desiring of purchasing Residences on this Estate, will receive also a valuable [illegible] arrangements are made, and will be strictly enforced, to effectually prevent the depreciation of any of the property, by the erection, in any part of it, of any public or other building or works which might be objectionable to the inhabitants

Further particulars may be had on application, either personally or by letter, post paid, at the Office on the Estate (near the Isleworth Station), or of Messrs. Davies, Son, Campbell, and Co., No. 17, Warwick-street, Regent-street, London.

HER MAJESTY'S BUCK-HOUNDS AT SALT-HILL.—"THE LAST DAY OF THE SEASON."—DRAWN BY JOHN LEECH.—(SEE PAGE 435.)

THE RIGHT HON.

SIR GEORGE CORNEWALL LEWIS,

CHANCELLOR OF THE EXCHEQUER.

SIR G. C. LEWIS belongs to a family who have adopted politics as a profession; but to a family who, at the same time, have worked for the prizes. We find that his father, the once well-known Thomas Frankland Lewis, was in office, like his son, but that his life was a career of wonderful public labour. He procured his Baronetcy from Sir R. Peel, and he was of a family (of Radnorshire) already sufficiently respectable to have obtained county position without that honour. He was member, successively, for Beaumaris, Adams, and Radnorshire, and was always busy, in and out of the House of Commons. He was a "commissioner" of everything and of all sorts of inquiries, for twenty years. He was Secretary to the Treasury in 1827; was afterwards Vice-President of the Board of Trade, was then Treasurer to the Navy—a lucrative office now abolished; and from 1834 till 1839 he was the unpopular Chairman of the Poor-law Commission. We find that his son, now his successor in the Baronetcy, followed precisely the same career; and, with greater parts, has reached higher official honours. He was born in 1806, a date indicating the very gradual growth of his success—even his marriage into that family which has been pronounced "the handsomest family in Europe" not taking place till 1844. Sir George's University triumphs, however, were early. In 1828 he had taken, at Christchurch, a first class in classics, and a second class in mathematics, and, generally, had become known as a distinguished young man. In 1831 he was called to the bar: it is so useful a thing, if the distinguished young man does not turn out a distinguished old man, to be (that favourite aversion of Mr. Henry Drummond) "a seven-years' barrister." In 1835 his political employments commenced. At that period the age of commissions was setting in with that severity which by degrees has ever since been extirpating the "local self-government" that is so favourable to the preservation of abuses. He began with a Commission of Inquiry into the Relief of the Poor in Ireland; and, soon after, or contemporaneously, he was a Commissioner of the famous Whig Inquiry into the Church of Ireland. The results of these investigations are recorded in historic blue Books, which were references in the party politics of the day; but they are more useful as well as, for Irish political students, more permanently conveyed in a book which the young Commissioner then published, and which served not only to display his peculiar ability in philosophical analysis of politics, but to obtain for him an excellent character, even in Ireland, as a Liberal.

THE RIGHT HON. THE CHANCELLOR OF THE EXCHEQUER, SIR GEORGE CORNEWALL LEWIS, BART., M.P.
FROM A DAGUERREOTYPE BY KILBURN.

In 1839 the young Mr. Lewis was appointed a member of that Poor-law Board (not quite the same as that now administering the Poor-law) over which his father so ably presided; and as the appointment was not political, we find that he was not disturbed in his seat by the crash of his patrons, the Whigs, in 1841, for he sat there till 1847, through Sir Robert Peel's great fiscal-revolutionary era. And during this time Mr. Lewis, probably not overworked, but sustaining his administrative fame, found opportunities for that literary leisure which an Oxford first-class man, however his manhood be employed, invariably sighs for; and the result was some review articles, and a book or two, which served—though none of them were of a very popular character—to spread the desirable impression that the humble Commissioner was capable of far greater things.

Shortly before the fall of Lord John Russell, in 1850, Mr. Lewis became Joint Secretary to the Treasury, the post now so ably filled by Mr. James Wilson, and in that office—though he did not remain long enough there to redeem Whig finance from its then reputation for "muddle"—he no doubt acquired that familiarity with Treasury business which enabled him to take his present Chancellorship without any of the apprehensions of the novice in State finance.

At the general election of 1851 he lost his seat for Herefordshire. The Tory families had then the facilities for electoral "arrangements;" the Derbyites got in their three men; for, though one of the three was a Whig, he was willing to say what Mr. Lewis would not say—that he had a "general confidence in Lord Derby, and Mr. Lewis, in the very prime of his life, was relegated to political philosophy. But it was not to be for long. Various eminent men were left out at that general election, like Mr. Cardwell and Mr. Horsman; but able men happen in our days to be scarce; and they all, picked up by alert constituencies, reappeared in their places. Mr. Lewis was the last. He contested various places between 1847 and 1853, as seats became vacant, but without success, and he had to wait till 1854 to achieve at the same time the Baronetcy and the seat his father's death vacated. He sits then now for the Radnor district.

As Chancellor of the Exchequer, Sir G. C. Lewis must, so far, be considered as successful. That the first Budget of Sir G. C. Lewis is a good one, and the Budget of a sound statesman, we must infer from the fact that it is passing with a speed which is miraculous, considering that it imposes new taxes. Besides this, the Newspaper-stamp Bill—now under discussion in Parliament—will give Sir G. C. Lewis a position of popularity.

Of the literary works of this accomplished gentleman it is not necessary here to speak. His position in the literary world is illustrated in the circumstance that he was for some time editor of the *Edinburgh Review*—which is one of the Great Proconsulates created by the Messrs Longman in the Republic of Letters. Of the five or six works produced by Sir G. C. Lewis, the majority are purely philosophical, addressed to a very limited class. His last, "An Enquiry into the Credibility of early Roman History," a book at all events most memorable as evidencing that a busy Parliament can compete, in classical learning, with the inmost of the scholarly German professors, in such a book as one can only expect to find in a library looking out on an Oxford quadrangle, and as one does not read when there. But one of his works—we believe his first—entitled "On the Use and Abuse of Political Terms," is of a character which, were it in an available form, would recommend it to all classes: it is admirably original, profound, and yet practical as applicable to ordinary political conversation; and political students should not overlook it. This book was published (in 1832) by Fellowes, Ludgate street. The later books of the right hon. gentleman are published by the house of Parker and Son.

THE GUN-WHARF AT PORTSMOUTH.

THE scene illustrated in the accompanying Engraving may be characterised as one of our great reserves for the efficient progress of the war. The Wharf is a large area of ground, partly in Portsea, and partly in Portsmouth; for it fronts the Harbour opposite the junction of those towns. Here are the Ordnance Department of the Navy the guns and other weapons offensive and defensive employed on shipboard. That the supply of guns for the Navy is an important matter may be made clear by the following enumeration of guns for a first-rate:—On the lower deck, four guns, each 68-pounders—that is, capable of throwing a ball weighing 68 lbs.—and twenty-eight 32-pounders; on the middle deck, four 68 and thirty 32 pounders; on the main-deck, thirty-four 32-pounders; but lighter guns on the quarter-deck sixteen 32-pounder carronades; on the forecastle, four 32-pounder carronades: making 120 in all.

The number of the cannon and cannon-balls on the Gun-Wharf is truly astonishing. Range after range meets the eye, every gun being placed in exact parallelism with the rest. These guns comprise, not only new ones for ships yet to be built, but the guns belonging to ships now laid up in ordinary. In the latter case, each ship's guns are ranged by themselves, with the name of the ship painted on the first gun of each parcel. Some of these guns are of such vast size and thickness as to weigh sixty hundredweight each. We acknowledge with much pleasure the courtesy of Mr. Steward, the head of the above Department, in permitting our Artist to sketch this interesting scene.

THE GUN-WHARF, AT PORTSMOUTH.

FOREIGN AND COLONIAL NEWS.

FRANCE.

(From our own Correspondent.)

PARIS, Thursday.

THE announcement of the Emperor's final decision to abandon the Crimean expedition is generally hailed with satisfaction here. The measure was never a popular one—the dangerous possibilities to which his person, and, in consequence, the nation, was exposed kept up a constant feeling of uneasiness—an uneasiness which the knowledge of his activity and courage even increased; these qualities rendering it beyond a doubt that no regard for his personal safety would prevent him exposing himself wherever an occasion that seemed to render his presence desirable should present itself. It is said that the persuasions of M. de Persigny have been chiefly instrumental in influencing the Emperor's decision, but an intimate knowledge of Louis Napoleon's character, which is one peculiarly averse to accepting private counsel, induces us to put little faith in this statement, and to believe that his own view of the question, infinitely more than the representations of those about him, has led to his present determination.

The excitement caused by the late attempt on the Emperor's life has by no means subsided, and every fresh detail on the subject is eagerly listened to. A friend of ours, who was walking with an acquaintance, was so close to the intended assassin at the moment he fired as to be able to note the whole details of the event. The face of the Emperor, he states, expressed not the slightest alarm, but extreme astonishment; this expression, however, quickly subsided, and his countenance resumed its usual calm, as he continued his route, amid cries of "Vive l'Empereur!" The friend who accompanied our informant was one of the first to rush on the assassin, and strike him with his cane. Had not the authorities interposed, the man would probably have met a summary punishment from the hands of the crowd. When, at the arrival of the Emperor in the Bois de Boulogne, whither he proceeded to join the Empress, her Majesty learned the danger from which he had escaped, she burst into tears, which it was some time before she found the possibility of controlling. At the theatre the reception given to the Imperial pair was most rapturous; and during the whole of their presence in the house the Boulevard was crowded with thousands of persons waiting to hail their entrance and departure.

It is reported that the Emperor purposes making an excursion to Lyons, to visit the Camp de Sathonay.

Extreme disappointment and inconvenience have resulted, more especially to the foreign exhibitors, from the delay of the opening of the Palais de l'Industrie. There seems but little likelihood at the period now named for its taking place, the 15th instant, it will be in readiness for the ceremony Hardly any of the cases of merchandise are yet beginning to be unpacked, and a part of the flooring of the build ng which had to be taken up is not yet relaid. The English section is much further advanced than any other in the whole Exhibition. The space allotted to Belgian produce is, owing to its extent and importance, extremely considerable; it is said that this country will figure among the principal exhibitors; in the article of linen it is especially remarkable

In a few days the Cercle de l'Exposition, established in the Hôtel d'Osmond, Rue basse du Remparts, opposite the Boulevard entrance of the Rue de la Paix, is about to be opened, with every provision for the luxury and comfort of its guests. Among the names of its founders are the well known ones of Méry (the poet and *litterateur*), Dantan (the sculptor), Adam (the composer), Léon Gozlan, Henri Hertz, Vicomte de Ruolz, Comte Avigdor, &c. The Viscomte de Lespine is President of the Club. In addition to some of the finest *salons* in Paris, the Hôtel d'Osmond possesses a beautiful garden, where visitors can dine in the open air The terms of subscription will be 200 francs for the season, and 60 francs a month. Persons can even subscribe for a fortnight at a proportionate rate

We are this week rich in literary news for the edification of our readers. A certain number of the members of the Académie have united in the intention of carrying out a *Revue*, to treat of their religious, political, and philosophical views. For this purpose they have selected the *Correspondent*, a monthly journal already existing during the last twelve years, having been founded in 1843 by the Abbé de Cazalès and the Comte de Montalembert. It is now to be principally conducted by the latter, with the aid of MM. de Falloux, de Salvandy, de Vatimesnil, Berryer, and Albert de Broglie. The establishment of another *Revue*, belonging to the Government department, has been contemplated, with the view of counterbalancing the influence of the literary and philosophic publications of the day. With this work were associated the names of Prosper Mérimée, Théophile Gautier, Sainte-Beuve, De Cormenin, Méry, Troplong (President of the Senate), A. de la Guérronière, Granier de Cassagnac, and Louis Veuillot. The plan has, for the moment, been abandoned, but not forgotten, and will, it is highly probable, be later again taken into consideration. M. de Lamartine announces that, on the completion of his fourth volume of his "History of Turkey," he intends taking a year of total repose, and attending only to the cultivation of his property in Burgundy. The health of the illustrious poet and historian, who for some time has been in the habit of devoting fourteen hours a day to his literary labours, renders this retreat indispensable. It is calculated that since the year 1846 M. de Lamartine has published, in the form of books and of articles of various periodicals, as many as forty-seven new volumes, besides a new edition of his former works; the whole producing a sum of about thirteen hundred thousand francs (£52,000). A work of Victor Hugo, "Contemplations," is just completed, and will shortly appear. M. Proudhon has produced a book entitled "Considérations sur l'Exploitation des Chemins de Fer." The volume, which has produced considerable sensation in the capitalist and financial class, tends to the suppression of companies, and the placing of all the new lines in the hands of Government. Finally, M. Enfantin, of St. Simonian reputation, has put the finishing touch to what is said to be a most remarkable brochure on the Isthmus of Suez. In his voyage in Egypt M. Enfantin carefully studied the question on the spot, and appears even to have discovered the traces of the canal of the Red Sea, cut by the Ptolomies, and filled up by the Kalif Almanzer.

We are happy to learn that Rossini is convalescent from his alarming illness; and, by the advice of his physicians, who desire amusement and change of air, he proposes leaving Florence and coming to Paris. By a singular caprice the illustrious *maestro* refuses to adopt steam in any form to shorten his voyage, and insists upon performing the whole route *en vetturino*—a process which, independently of the discomfort, will occupy nearly a month.

PUBLIC MEETING IN THE CITY TO-DAY.—A great public demonstration is to take place in the City to-day, at a public meeting to be held at the London Tavern, on the subject of administrative reform, free from party opposition. A circular has been widely distributed amongst the merchants, bankers, and traders, in which reference is made to the danger and disgrace to which our national name and national position has been subjected by our inefficient and irresponsible system of administration, and the reckless management of every department of the State. It is thought that the majority of the committee will be found to agree in the views put forward in this circular for the time, all party and personal considerations being readily sacrificed to ensure themselves in London.

EXECUTION OF LUIGI BURASELLI.—The execution of this unfortunate man for the murder of Mr. J. Lambert, in Foley-place, took place on Monday morning in front of Newgate; and as usual the terrible scene was witnessed by the usual crowd of persons, including a majority of the greatest ruffians of the metropolis. [illegible] of Bermondsey, and assisted him up the ladder. [illegible] kept [illegible] from the Bible, [illegible] addition to the consolations of his spiritual adviser. At the foot of the steps leading to the scaffold he appeared somewhat to falter, and Father Gallagher assisted him to ascend. He was then pinioned under the beam, and surveyed the crowd with a calm and composed aspect, and very shortly afterwards the melancholy preparations were completed, and the drop fell.

THE WAR IN THE CRIMEA.

ALTHOUGH there is every reason to believe that Government must have received intelligence from the Camp up to the latest period, nothing is allowed to transpire on the subject; and therefore it is inferred that nothing decisive has been accomplished. Our latest news from Sebastopol is still received viâ St. Petersburg and Berlin. For the following meagre items we are indebted to that channel:—

BERLIN, Thursday, May 3.

A despatch dated St. Petersburg, May 2, has been received here.

Under date of Sebastopol, evening of the 28th of April, it has the following:—

"The fire of the enemy is moderate.

"Their approaches progress slowly.

"We have erected, at 100 yards from Bastion No. 4, a row of rifle-pits, which have served to form a continuous trench of communication."

In addition to this we have letters from the Camp, which bring down the history of the bombardment to the 21st of April, at which time the firing had very much diminished, owing probably to the want of shot and shells, the consumption of these articles having been on a very large scale. Some idea of the nature of our bombardment may be formed from the fact that during the first six days of it the English trenches alone fired away between 16,000 and 17,000 32 and 68 pounder shot and shell, 7800 13-inch shell, and 4500 10-inch shell; making in all about 2200 tons of shot and 500 tons of powder already expended. The English trenches mount 154 guns and mortars, the French 238 ditto; so that between English and French there were used during the week's bombardment about 6000 tons of shot and shell, and some 1500 or 1600 tons of powder. At this rate no one could be surprised at the falling off in the firing. The difficulty of forwarding shot and shell to the Camp appears to be still an obstacle to our keeping up the bombardment long enough without intermission. The railway has been of great service, but it stops short of the distance required. On the 18th the *Prince* arrived at Balaclava in great haste with shot and shell, but when it came into harbour the captain was told that all his labour was useless, as the accumulation of shot and shell at the Kadikoi terminus was greater than the men could carry away.

The *Moniteur* of Thursday publishes a despatch from General Canrobert, dated 16th April, giving an account of the operations of the 13th and 14th, to take possession of the ground upon which the engineers were to make their approaches towards the central bastion. The engineers were enabled to complete their levels. A new parallel was formed. The loss incurred was 40 killed and 117 wounded. The operation to form a new trench at half distance between the third parallel and the salient of the Flagstaff Bastion succeeded very well; on the side of the Malakoff Tower the superiority of the French artillery was also maintained, but without silencing that of the enemy, except in two works of counter-approach on the side of Careening Bay. The garrison has suffered considerable losses, and the artillerymen of the Russian Navy have suffered especially. The Central and Flagstaff Bastions are seriously damaged. General Bizot, Commander of the Engineers, has died of wounds he received in the trenches.

By the *Ninois* steamer, which arrived at Marseilles on Tuesday, we learn that on the 21st the Russians had abandoned the Careening Batteries, and that the Flagstaff and Southern Forts and the Malakoff Tower were reduced to silence On the 19th the Russians attempted several sorties, all of which were repulsed. On the 20th Omer Pacha, Lord Raglan, and the French General Morris, made a strong reconnaissance with 12,000 men in the direction of Baidar; but the Russians did not venture to meet them. On the 21st Iskender Bey made a reconnaissance with no better result The belief seems to be that the Russians wish to draw the Allies out so far as to enable General Liprandi to attack them under favourable circumstances. Others affirm that Liprandi's army is much smaller than has been reported. If the report of a Polish deserter may be relied on, the Russians were so much afraid of his being outnumbered by the Allies, in an attack which they were told was to take place on Easter Sunday, that every available man was sent out of Sebastopol to his aid; and when we opened fire on the following morning they had only 8000 men in the place. If this be true, it accounts for their silence and for their surprise. For two days they were working night and main to get their men back from Liprandi's army to the town again, where, it is said, they have now 28,000 men. The deserter says, "the place is a perfect hell."

The *Invalide Russe* gives the following particulars of the Russian loss at Sebastopol, from the 9th to the 14th of April:—Killed, 11 officers and 387 subalterns and soldiers; wounded 55 officers and 2672 subalterns and soldiers. Between 3000 and 4000 killed and wounded in six days was a very severe loss; and Prince Gortschakoff's report on the 19th conveys the impression that the casualties were not much less numerous up to that date

The first detachment of Piedmontese troops arrived at Constantinople on the 21st. The French Camp at Masiak was occupied by 20,000 men, and it is expected that their numbers will be increased to 80,000.

The following letter from a private Correspondent speaks encouragingly regarding the siege

(From our own Artist.)

CAMP NEAR SEBASTOPOL, April 20.

I enclose two Sketches of Sebastopol—one from the left, *Maison d'Observation*, or *Maison Blanche*, as it is sometimes called. At the end of the house, just above the garden wall, may be seen the Telegraph. I also send a View of the Town, from our right near the Victoria redoubt, a little to the left of Inkerman. To the extreme left is represented an explosion of a powder-magazine, which unfortunately occurred when I was making my sketch: two men were killed, and nine or ten wounded. Six thousand Turks, the Chasseurs d'Afrique, and our cavalry, went out yesterday on a reconnaissance; but, I believe, nothing important resulted from it. The firing has slackened very much for the last week; but, I am happy to say, we are pushing on the advanced batteries very vigorously. These works, both French and English, will be armed with much heavier guns; and in about a week or ten days we shall begin again in earnest. Last night we attacked two rifle-pits in our advance. We took them; but the second, which was seventy yards in advance, and quite under the Redan was obliged to be abandoned. We, however, retained the first, but with, I am sorry to say, the loss of several officers, and about 100 men killed and wounded—Colonel Egerton, of the 77th, killed; Captain Owen so severely wounded that he had to have his leg amputated. The weather is again most beautiful.

(Next week we shall engrave our Artist's two Sketches.

AMERICA

The Mail steam-ship *Baltic*, which left New York on the 18th ult., arrived at Liverpool on Sunday.

A good deal of excitement prevailed throughout the Union, owing to the relations of the United States with Spain, with regard to Cuba. Commodore Macaulay was about to leave Philadelphia, with the home squadron for Cuba, in order to check the boarding of American vessels by Spanish cruisers. The French Legation is reported to have informed the Administration at Washington that, should hostilities commence between Spain and the United States, France would promptly succour the former. Important advices are reported by the Government at Washington, but their contents had not transpired.

Of the six persons arrested in Philadelphia, charged with recruiting for the British service, two have been discharged, two held to bail in 1000 dollars to answer, and two remain to be disposed of by the United States Commissioner.

A resolution emendatory of the Constitution, allowing negroes the right of suffrage, has been adopted by the Legislature at Albany, by a majority of nearly two to one.

INDIA AND CHINA.

The most important piece of intelligence that has reached Bombay from the North-West Frontier lately is the meeting of Sirdar Ghoolam Hyder Khan, the son and successor of Dost Mahomed, with Mr. Lawrence, the Chief Commissioner of the Punjaub. Mr. Lawrence reached Peshawur on the 11th of March, and waited there some days for the Sirdar This unexpected delay in the arrival of the Afghan Chief gave rise to various rumours at Peshawur, but it was at last currently reported that he had been stopped in the pass by the Khyberees, plundered of the presents he was bringing for Mr Lawrence, and sent back to Jellalabad, the mountaineers declaring that they would not permit the Dost to enter into a treaty with the Feringhee Sahibs. However, all fears, so far at least as regarded the compulsory return of the Embassy to Afghanistan, were set at rest by the appearance on the 17th of March of Hyder Khan and his retinue at Hurree Singh's outpost, a spot just within our boundary, and close to Jumrood, a town near the eastern end of the Khyber. On the morning of the 19th his interview with Mr. Lawrence took place The result of the conference is not yet known, but every confidence is placed in the sincerity of the Dost, and no doubt is entertained of a favourable result.

Meanwhile the Peshawur frontier continues in a very disturbed state. Operations have been undertaken against the Russee Khel in revenge for their murderous attack on Lieutenant Hamilton's workmen at Buddebeer. A force has been assembled at Peshawur from which great things are expected. It has been placed under the command of Colonel Craigie, and consists of four mountain train guns, with a company of Artillery, the 20th Native Infantry, four companies of the 4th and three of the 9th, and one squadron of the 16th Irregular Cavalry.

In Cashmere the disagreements between Gholab Singh and his nephew, Juwahir Singh, are reported to have led to several passages of arms between the parties. Juwahir Singh is at Lahore, for the purpose, it is supposed, of consulting the British authorities

The steam-frigate *Ajdaha*, from Bushire, had arrived, after conveying thither from Suez Mr. Murray, the new Ambassador to Persia. The news she brings is important. It is probable that amicable relations will not much longer be maintained between the British and the Court of Teheran. The Shah makes no secret of his preference for an alliance with Russia, which offers him protection, indemnity, and aggrandisement; and which, moreover, has a considerable force upon his frontier.

Affairs at Canton look more settled: at least for the time the rebels have been driven away from the city. The blockade has been put a stop to; and, by a combined movement of the imperial soldiers and the people, Canton and the forts in its neighbourhood have been freed from the insurgents. On the 6th of March the rebels at Blenheim Reach were taken by surprise, fled precipitately in boats down the river, and for the most part escaped. The Imperialists having been so well pleased to regain possession of the forts. The other strongholds of the insurgents also fell into the hands of the Imperialists, who are reported to have effected their object by buying up the ringleaders. The Imperialists have made a shocking use of their triumph. The place of execution has been a vast carnage-field, where hundreds have daily been put to death, in the hope of striking terror into the minds of the population

At Shanghai, also, the Imperialists have succeeded in recapturing the city, followed by frightful atrocities in revenge for opposing the Imperial rule. Beyond the mere fact of the capture of the city, little more is known with certainty; but all accounts agree in representing the foul atrocities committed by the Mandarins. Nearly 500 prisoners have been put to death, and some were tortured in the most frightful manner before being put out of the way. Some of the rebel chiefs succeeded in escaping, but the greater number of the ringleaders fell into the hands of the Imperialists.

OBITUARY OF EMINENT PERSONS.

JAMES, THIRD VISCOUNT LIFFORD

THIS nobleman died at Brighton on the 22nd ult., aged seventy-one. He was the eldest son of James, second Viscount Lifford, and grandson of Lord Chancellor James Hewitt, on whom the Barony and Viscounty of Lifford were successively conferred. Lord Lifford was born 29th August, 1783, and completed his education at Christ Church, Oxford, where he graduated B.A. in 1804. He was author of a work "Ireland and the Irish Church." His Lordship married, 16th April, 1806, Mary Ann, eighth daughter of Cornwallis, first Viscount Hawarden; and leaves two sons and three daughters—viz., James, now fourth Viscount Lifford; John-James, A.m.-Anne, married in 1841 to Sir Edwin Pearson; Sarah, and Anne-Georgiana.

SIR HENRY PYNN.

Lieutenant-Colonel in the British army, Major-General in the Portuguese service, and Knight Commander of several foreign orders, died in London on the 4th ult. During the late war he served in Sicily; and throughout the Peninsular campaigns under Sir Lowry Cole—first as Deputy Quartermaster in H.M. 52nd Regiment, and subsequently in command of the 18th Portuguese Regiment of Infantry, at the head of which he was severely wounded in the Battle of the Pyrenees. For his distinguished services he was rewarded with the Command Medal and two clasps, and the War Medal and five clasps

WILLS AND PERSONALTY. The Right Hon. Sir Thomas Frankland Lewis, Bart., D.C., late M.P. for Radnor, £14,000 personalty. The Ven Archdeacon Hare, £10,000. The Rev. R. Phelps, Vicar of Yeovil, £30,000 George Snedden, Esq., East Cowes, and Bedford-square, £180,000. Robert Lemon, Esq., of Carclew, in Cornwall and Egypt, merchant, personalty in England £45,000; and has left legacies to the Peace Society, Peace Congress, British and Foreign Bible Society, and to several institutions at Falmouth and Penryn.

CHURCH, UNIVERSITIES, &c.

PREFERMENTS AND APPOINTMENTS.—*Preferd.*: The Rev. C. Awdry to Cublington *Rectories*: The Rev. E. B. Hawkshaw to Weston-under-Penyard; Rev. W. Hulme to Brampton Abbotts; Rev. J. B. Stuart to Coreley, near Tenbury; Rev. J. Garland to Mordiford; Rev T. Hutchinson to Ditchling, near Hurstperpoint, Sussex; Rev. H. Taylor to Rampton, near Cambridge; Rev. G. A. Quicke to Ashbrittle, Somersetshire; Rev. J. N. Simpkinson to Brington, Northamptonshire, Rev. J. March to Ibberton, Dorset: Rev. J. W Bird to Polsham, Norfolk. *Perpetual Curacies*: The Hon. and Rev. G. Herbert to Clare, near Ludlow; Rev. R. B. Matthews to Shalford, Surrey. *Incumbencies*: The Rev. W. B. Bennett to Postbury, near Crediton; Rev. R F. B. Ebrington to Lower Brixham; Rev. G. W. Bridges to Beachley, Gloucestershire; Rev. C. Moberley to Beeston, Yorkshire. The Rev. H. V. Russell to be domestic Chaplain to her Grace the Dudness Dowager of Cleveland. The Rev. H. Williams to be Head Master of the Tunbridge Wells School.

TESTIMONIAL. The Rev. Irwin Lloyd, M.A., resident officiating minister of St Peter's Church, De Beauvoir Town, West Hackney, has been presented by the members of his Bible-class with a costly timepiece, as a small token of gratitude for his great kindness and unwearied attention. This is the seventh testimonial that has been presented to him within five years and a half.

ST. MARY'S HOSPITAL.—On Wednesday evening the annual festival of this institution was held at the London Tavern. The Earl of Cardigan was announced to act as chairman; but, in consequence of his indisposition, the chair was taken by Viscount Ebrington, M.P., who was supported by about 170 gentlemen, principally, if not altogether, from the locality in which the hospital is situated. In proposing the toast of the evening the chairman pointed out the necessity for the charities of London keeping pace with the rapidly-increasing population, which he showed they had by no means done; and, with reference to the locality in which St. Mary's Hospital was situated, he dwelt on the absolute duty of supplying so indispensable a requirement of that large and still extending district. With reference to its usefulness, he stated that since its establishment in 1851 no less than 27,000 patients had been relieved; and in each year the number to whom its benefits were applied was augmented. Unfortunately the means of the hospital, which was wholly dependent on voluntary subscriptions, were quite inadequate to its support. At the present moment a sum of £2000 was required to free it from debt, while the annual expenditure being £6000, the promised annual subscriptions which could be depended on was only £2500. Under these circumstances he most urgently pressed on its supporters renewed efforts in its behalf. The list of subscriptions amounted to about £1400.

HARMONIC UNION.—Handel's "Acis and Galatea" is to be performed at the Hanover-square Rooms next Wednesday, when W. Sterndale Bennett's overture "Naiade" and Beethoven's magnificent sinfonia in A will also be included in the programme. The additional accompaniments by Mozart to "Acis and Galatea" render it much more interesting than when introduced by the society for the first time in England last season, will again be played. Madame Rudersdorff, Mr. Miranda, Herr Reichardt, and Mr. Weiss, are announced as principal vocalists; Herr Molique and Mr. Blagrove filling their accustomed posts of conductor and leader.

SURREY ARCHÆOLOGICAL SOCIETY.—The annual meeting of the members of this society was held on Friday (last week), at the Town hall, Chertsey—Colonel C. R. Challoner, Vice-President, in the chair. The hall was decorated with various specimens of archæological interest. Mr. G. B. Webb (the honorary secretary) read the names of various ladies and gentlemen who were candidates for membership, and who were accordingly admitted. The chairman then briefly addressed the meeting. Mr. William Foonck read an interesting paper on "Chertsey Abbey." The Rev C. Bonteil read an elaborate paper upon some "Tiles recently discovered on the site of Chertsey Abbey." Mr. G. R. Corner, F.S.A., read a paper upon "An Anglo-Saxon grant of land made by Alfred the Great to Chertsey Abbey." Thanks were then voted to the gentlemen who had read the above papers. A vote of thanks was also passed to the owners of the mansions which had been visited by the society, viz., Cowley-house, the residence of Cowley, the poet. The site of the abbey was also visited by a numerous circle, who offered their conjectures as to the date of some stone coffins which had been exposed by excavation. At five o'clock a party of about 300 sat down to a collation at the Crown Inn, Chertsey

IMPERIAL PARLIAMENT.

(*Continued from page* 431.)

HOUSE OF LORDS.—THURSDAY.

On the motion for the second reading of the Loan Bill, Lord RAVENSWORTH contended that the loan would have been unnecessary if the commercial blockade of Russia had been more strictly carried out.

The bill was ultimately read a second time.

THE VIENNA CONFERENCES

The Earl of CLARENDON made a statement relative to the result of the Conferences at Vienna, similar to that made by Lord Palmerston and Lord John Russell on a former evening in the House of Commons, and said that the protocols would shortly be laid upon the table. Those protocols would contain not only all the propositions which had been considered by the Conference, but also the arguments by which they had been enforced. As to the course to be now pursued by Austria, he hoped their Lordships would perusal him to remain silent, as the Conferences had only been suspended not broken off and Austria had expressed a belief that all means of arriving at a pacific solution of the matters in dispute had not yet been exhausted. Indeed, Count Buol had submitted some terms from the Russian Minister which would have to be considered; for, however faint might be the chance of peace, Rought not, in his opinion, to be disregarded

The Earl of DERBY expressed his regret at this intimation; fearing, as he did fear, that Russia was only amusing the Allies so as to induce them to prosecute the war with less vigour.

The Marquis of LANSDOWNE assured the noble Lord that the war should be conducted with as much vigour as if there were no negotiations whatsoever pending.

HOUSE OF COMMONS.—THURSDAY.

BLOCKADE OF WHITE SEA PORTS.

Mr COLLIER asked the First Lord of the Admiralty whether instructions had been issued to blockade the ports of the White Sea; and, if so, when the blockade would be established?

Sir C. WOOD said, the vessels were ready, and would approach the ports they were intended to blockade as soon as possible.

DESPATCHES FROM THE CRIMEA.

Mr. WHITESIDE asked the First Lord of the Admiralty whether, since the laying down of the telegraph, any despatch had been received by the Government from the Crimea by telegraph which had not been communicated to the public?

Sir C. WOOD said it was necessary that the Government should exercise a discretion as to what intelligence should be communicated to the public. It was necessary that the Government should have the power of reserving such intelligence as they might deem it desirable to withhold; at the same time all information would be communicated which it was not thought necessary to confine exclusively to the Government. The substance of every telegraphic message that had been received had been communicated to the public.

Mr. ROEBUCK hoped the Government would send a telegraphic message to Lord Raglan, asking for some information (Laughter).

Mr. PEASE in reply to Mr. Stanley, said, Sergeant Brodie was placed under arrest for preventing a duel, but for behaving disrespectfully to one of the officers of the regiment. He was at the time engaged in preventing a duel, and that, of course, was considered a palliation; and he was discharged without any further notice being taken of his conduct. No reprimand had been sent to Sergeant Brodie from the War-office.

In reply to a question, Lord PALMERSTON said, the arrangement was that the Sardinian contingent should take their own Commissariat, and they had prepared vessels for that purpose. One of those vessels (the *Cressus*) had unfortunately been burnt before it left the port, and that perhaps would render them dependent, to some extent, upon our Commissariat stores, but whatever they derived from that source they would pay for as they did for other supplies.

POOR-LAW (SCOTLAND) BILL.

Mr. E. ELLICE moved the second reading of this bill. It did not propose to interfere with the operation of the existing law, or to take away any right which at present existed. Its only intention was to enforce the present law, to secure to the poor of Scotland, or at any rate a part of Scotland, those benefits which the Poor-law Act of Scotland professed to give them, but which in fact it entirely failed to give them.

Mr. DUNCAN seconded the motion.

The LORD ADVOCATE did not think it was desirable to disturb the settlement of 1844 by a measure of this kind, which he did not think would accomplish the object at which it aimed. He would, therefore, amend his hon. friend to leave the matter in the hands of the Government.

After some discussion the bill was withdrawn.

The Sunday Trading (Metropolis) Bill was read a second time.

The Income-tax Bill was read a third time and passed.

Several other Bills on the paper were forwarded a stage; and the House adjourned at an advanced hour of the morning.

HOUSE OF LORDS. FRIDAY.

The Jurisdiction of the Stannary Court Amendment Bill, and the Loan Bill, were severally read a third time and passed.

HOUSE OF COMMONS.—FRIDAY.

THE VIENNA CONFERENCE—MINISTERIAL EXPLANATIONS.

Mr. DISRAELI, on moving that the House at its rising do adjourn until Monday, put a question to the noble Lord at the head of her Majesty's Government in reference to the delay which had taken place in the production of papers bearing upon the recent Conferences at Vienna. The House was aware that, whatever might have been the result of these negotiations, whether they had been successful or the reverse—whether preliminaries of peace had been signed or the result had been as it now appeared to be, the papers which had been prepared during the negotiation might have been got ready, so that when the negotiation terminated, and only a protocol or two on the last despatch were to be presented, the papers might have been placed upon the table of the House; so that when the noble Lord who had been to Vienna to negotiate took his seat, the matter might have been fully before the members. He found that that had been the usual course on previous occasions. He had searched the journals of the House for precedents which might guide them in the present momentous crisis. He took the precedent of the rupture of the negotiations of 1796. On the 14th of October in that year the House was informed that the Sovereign had sent the Earl of Malmesbury to France to negotiate a peace. On the 20th December it became known to the country that the negotiation had terminated. The Earl of Malmesbury returned to this country on the 28th of December last, but before he returned—viz., on the 27th of December—the Minister came down to the House with a message from the Crown, stating the facts of the case, and adding that all the papers connected with the subject should be laid upon the table. On the 29th of December, in deference to the promise given, the Minister placed upon the table of the House the whole of the papers connected with those negotiations, detailing the circumstances which had led to their unsuccessful termination. The Minister on the very day he laid the papers on the table gave notice for the following Thursday of a motion to take them into consideration (Hear, hear). How had the Parliament been treated? Had there been the same promptitude or the same wish for communicating the facts to the House. The fact was that Parliament had no official information that any negotiation had taken place at all. He wished to know why they had not been laid before Parliament?

Lord PALMERSTON said, the answer which he should have to give would be anticipated by all who heard the question which the right hon. gentleman had proposed, and who were aware of the circumstances of the transaction to which he had adverted. The right hon. gentleman had referred to a case in which, in a war between England and France, negotiations were entered into directly between the two countries. But from that it was clear that there were no hopes of peace being established. Finding that there were no such hopes, it became the duty of the Government to appeal to Parliament for renewed means of carrying on the war. If Lord John Russell had gone to St. Petersburg, and the negotiation had turned out so unhappily as it had, the right hon. gentleman would have been more parallel to the right hon gentleman's case than he was. It was well known to everybody that the negotiations with Russia had been conducted by the intervention of the Government of Austria, and it was well known that before the commencement of the war Austria was incessant in her endeavours to bring about a reconciliation of differences. It was only the continuance of those efforts which had led to the Conferences in which the noble Lord the Secretary for the Colonies had taken part. Those Conferences did not lead to a successful issue, but they had not been broken off, and consequently the noble Lord left Vienna, and after the Conferences had been adjourned *sine die*, another Conference was called at the request of the Russian Plenipotentiary, who had other terms to propose. Those terms were reassembled, and (the noble Lord) believed that at the present moment the last protocol had not been received by her Majesty's Government, or if it had, it had been during the last day. There still existed at Vienna the elements of a Conference. The course which the right hon. gentleman opposite proposed to take might be a very good course in the determination of her Majesty's Government to exhaust every means of bringing about peace were at an end. If her Majesty's Government had determined not to listen to any further overtures, then undoubtedly the course which the right hon. gentleman would have the Government to pursue—of coming down with a message to Parliament, that every hope was lost, and that peace was impossible—he repeated that, if such were the circumstances, the course proposed by the right honourable gentleman would be the proper one to adopt. Her Majesty's Government had failed in the attempt that they had made, but he (the noble Lord) was not prepared to say that there were no other means open which, through the intervention of the friendly offices of Austria might have the result of bringing about a peace. The case was not parallel, even on the statement of the right hon. gentleman himself. A basis of negotiation had been accepted by Russia; and also, to some extent, the interpretation of that basis. The only matter that had failed, being the details on which they should be carried out. He (the noble Lord) wished to leave the question in the state in which it was, and not to adopt such a course as that to which the right hon. gentleman and his friends would drive him. The protocols would be laid with the least possible delay upon the table of the House, and it would then be for the House to determine what steps should be taken thereupon. Her Majesty's Government were very desirous to give the House and the country every information consistent with the interests of the country, consistent with any future amicable arrangements; but while, on the one hand, they were determined to continue the contest, should it be necessary to do so, in a manner consistent with the honour, dignity, and interests of the country, so, on the other hand, they would not be the parties to shut the door in the face of the conclusion of an honourable and satisfactory peace (Loud cheers)

In reply to Mr Trench, Lord PALMERSTON paid a high tribute to the professional skill of Lord Dundonald, and said that his plan was still under consideration.

Mr. H. BAILLIE drew attention to the present state of the Militia force, and, after some discussion in the course of which Mr. GROGAN moved that the bill be read a second time that day six months, the House divided: the numbers were—For the second reading, 163; against it, 50: majority 113. The bill was then read a second time.

TENANTS IMPROVEMENTS COMPENSATION (IRELAND) BILL.

The adjourned debate upon the second reading of the Tenants Improvements Compensation (Ireland) Bill, was commenced by

Mr. GEORGE, who objected to the measure on the ground of its retrospective character. He was, however, favourable to the principle of granting compensation to tenants for all *bona fide* improvements.

The SOLICITOR GENERAL supported the bill, on the ground that it protected the tenant on principles of natural justice.

After considerable discussion in the course of which Mr. GROGAN moved that the bill be read a second time that day six months, the House divided: the numbers were—For the second reading, 163; against it, 50: majority 113. The bill was then read a second time.

The House then adjourned [illegible] to-morrow (Saturday), for the purpose of a Royal Commission.

3 days above [illegible] average

The reading of the barometer has varied during the week from the highest reading, 30·40 inches, on April 30, to the lowest, 29.57 inches, on May 3, the range being rather more than six-tenths of an inch. The mean for the week, at the height of 81 feet above the level of the sea, was 30·018 inches

The mean temperature of the week was 44·6°, being 7·7 below the average of thirty-eight years

The range of temperature during the week was 36·7°.

The mean daily range of temperature during the week was 25 12°.

The weather throughout the week was fine and dry. It was generally cloudy during the former part, and nearly the whole from cloud during the latter half of the week.

LONDON, May 4, 1855. JAMES GLAISHER

HEALTH OF LONDON. Within the week ending April 28 the births of 892 boys and 864 girls, in all 1756 children, were registered within the metropolitan districts. In the corresponding week of the ten previous years the average number of births was 1668. The number of deaths was 1122, a number rather greater than in the previous week, which, when increased in proportion to increase of population, is nearly that of the ordinary number for the last week in April. The public health seems to be approaching a satisfactory state.

CHRIST'S HOSPITAL. A Special Court of the Governors of this hospital was held on Tuesday, for the purpose of considering the report of the select committee appointed on the 19th December, 1854, to inquire whether any—and if any, what—changes were necessary in the constitution, powers, and duties of the Committee of Almoners.

The meeting was presided over by his Royal Highness the Duke of Cambridge, and was attended by an unprecedented number of Governors; and on concluding that certain recommendations of the select committee be adopted. The motion was seconded by Lord Overstone. Mr Garrard proposed a long string of amendments, of which the main features were that the committee of almoners should be reduced from 48 to 42, whereof 6 members be chosen by themselves, and 6 by the Court. The Duke of Cambridge spoke strongly in favour of the recommendations, which were carried by 117 against 78. An alteration proposed by Mr. Russell Gurney was adopted, which appeared to give satisfaction to the supporters of the select committee.

KING'S COLLEGE HOSPITAL. The anniversary festival in aid of the funds of this institution was held at the Albion Tavern, on Wednesday, under the presidency of the Right Hon. Sidney Herbert. Lord Palmerston had promised to preside, but was unable to attend, owing to a Cabinet Council. After the usual loyal and patriotic toasts had been duly honoured, the CHAIRMAN proposed the health of the evening "Prosperity to King's College Hospital," and called attention to the [illegible] which had been made in the building, and to the [illegible] which remained to be raised. The hospital required £20,000 a year for its support, and, as the income was only £1500 a year, it was mainly dependent upon the benevolence of the public. The chairman proceeded to express in warm terms his admiration of the medical chiefs of King's College Hospital, of whom one was the physician to the Queen, and the other medical staff for service in the East, and added that, through their agency, one of the same family, namely, Miss Nightingale, had been established. Having expressed his hope that so good a beginning might lead to the permanent union of the civil and military branches of the medical profession, the chairman concluded with a hope that the receipts of the evening would leave the Hospital Chancellor of the Exchequer in a better position than the Chancellor of the Exchequer of the State found himself in at the present moment. The toast having been duly responded to, the Treasurer proceeded to read the list of subscriptions, including £500 from Mrs. Twining; sums of ten, twenty, and thirty guineas from various members of the same family, twenty-five guineas each, from the chairman, Lord Feversham, and one or two others, twenty guineas from Mr. Herbert Ingram, and various smaller donations, amounting in all to nearly £3000.

THE IMPERIAL REVIEW AT BOULOGNE.—In our Journal of last week it was erroneously stated that the Review took place in front of the Marine Hotel, whereas the Hotel was du Pavillon Imperial.

TOWN AND TABLE TALK ON LITERATURE, ART, &c.

THE statue of the poet Campbell was erected in Poets' Corner on Wednesday last. This fine work of art proceeds from the chisel of Mr. W. C. Marshall, R.A., and has been deservedly admired for its poetic conception and careful execution. Its history, too, deserves to be told, for there has been a sad delay in getting it to its present and final locality. When the poet died a subscription was raised for erecting a monument to his memory. The fund started well; good men gave subscriptions of average amounts, and there was a promise of more. In the meantime the committee commissioned a monument from the best man for the purpose, Mr. Marshall, and that true artist, bringing a Scottish heart to render additional honour to a Scottish poet, began a statue of the size of life, with a pedestal containing a bas-relief from the "Pleasures of Hope." The subscription flagged, but Mr. Marshall in no way bated a jot of heart or hope, and by the time the subscription stopped there was the statue in marble, with its appropriate pedestal, ready to be erected. Here was a two thousand pound statue with a four hundred pound subscription to pay for it! But this is not all. We now see a statue designed for a certain place, and almost wholly unpaid for, in want of a further sum of two hundred pounds to cover the fees demanded for its admission into Westminster Abbey. Poor poet—poor committee—noble-minded artist! There is still hope for the Bard of Hope. Will not the Dean and Chapter on this occasion forego the fees? and it was believed under the circumstances (vain thought!) that they would forego. Not they. The matter was taken up in Parliament, and Lord Aberdeen, then Prime Minister, stated in his place that the fees for monuments went to the repair of the building. Thus the matter dropped with both Houses, and the statue was still an inhabitant of the artist's studio—a sad spectacle of hope deferred. But better times are coming: there is still a chance. Lord Aberdeen was misinformed. The fees for monuments do not go to the repair of the fabric, but are subdivided as fees, proper and improper, among the vergers, organ-blowers, and other cathedral dignitaries and underlings. The pressure increases, and the once vain thought that a monument would be set up in Westminster Abbey without the payment of the fees has actually occurred in the case of Tom Campbell and his statue. Yes; the authorities of Westminster Abbey have foregone their fees, and the statue of the poet of "Hope" and "Ye Mariners of England" is now in Poets' Corner. Let no one look on this statue (and thousands will look on it) for its subject, and its own artistic excellence) without remembering that William Calder Marshall, sculptor, not only made this statue, but really—if we think of the amount of the subscriptions raised erected it.

Gossip about literature there is none. Authors talk of the Solicitor to the Inland Revenue and the recent debate in the House, and ask—once more—what is news? The answer, wherever we have been, is—a hopeless look and a helpless shrug of the shoulders—much like that which Sir Charles Trevelyan gave so expressively the other day before the Committee on Sebastopol and Lord Raglan. We can defend both look and shrug. Our newspapers in London, as far as literature is concerned, are certainly better than the best of the American press; and we must own (modestly) that the anonymous authors of the articles in our leading daily and weekly papers are writers of such real merit that antiquaries hereafter will be in. quiring who wrote this or true article against that Prime Minister—and what man among them was gifted with the prophetic eye of knowledge that he foresaw and foretold the destiny of a colony, the fate of an empire, or the future condition of his own country. We are inclined to concur with a remark passed pleasantly off at a Pall-mall Club not three days ago, that the same curiosity will be exercised in detecting the author of an article in a daily paper that has been exercised with so much skill, and unfortunately with so little success, in detecting the "Junius" of Woodfall's *Public Advertiser*

The engrossing subject of talk (out of politics) is, therefore, not literature, but art. On Monday next the great yearly Fine Arts Exhibition of our country will be thrown open to the possessors of a "splendid" or an unsplendid shilling. Are we to have a good Exhibition this year? or is our annual attraction a sufferer from the common fate of all things at this juncture? We have ourselves already answered in fact these queries. We have told in our Town and Table Talk that the Royal Academy Exhibition promises more than times of war would seem to promise. We shall have a really good Exhibition, and one of the attractions will be a picture sent by an unknown man, which the Academy could not reject, and which the "hangers" of that illustrious body (with all their proverbial hardness of heart) could not refuse to hang otherwise than well. Artists complain, notwithstanding but when are artists without a grievance? The rejected complain loudly; and even the admitted—the favoured forty and the sanctioned twenty have their own little sorrow We hear of the annual dinner—the great customary dinner at which Sir Joshua and Mr. George Jones have presided—that takes place on Saturday, with a true man, Sir Charles Eastlake, in the chair; but there is unfortunately no promise of that other annual dinner which the latent benevolence of our great landscape-painter bequeathed to his brethren of the Academy. Artists within the hallowed precincts of the Academy complain that "poor dear Turner's" bequest of £50 for an annual dinner is still locked up—in Chancery.

We are reminded, and properly at this moment, that the obituaries of the week record the loss of an outsider, and a better artist than many within the precincts of the favoured building. The elder Wilson, not he of Tivoli and Niobe, but the Wilson of our own generation—the Wilson of the sea—John, familiarly Jock, Wilson has just been removed from among us in sight of his favourite element at Folkestone, in his eighty-first year. This medium Wilson—for so we must call him to distinguish him from his illustrious predecessor, and his deserving well-known son—was an admirable painter of English seas. He was not a Vandevelde—he was not a Huggins. He was a truthful painter of salt water, and of all that the ingenuity of man has made to float upon it. True that he was not a favourite with the forty, yet he will be heard of hereafter, when your Yeos and your Westalls are utterly unknown.

While we are writing Mr. Albert Smith is presenting 250 bouquets to 250 of the first admitted to his nightly audiences at the Egyptian-hall. Wednesday last was the millennium of his Exhibition. He has actually gone through 1000 entertainments of Mont Blanc! And there is still (and properly) another chance of his reaching a much greater number of nights. Mr. Albert Smith needs for the success of his entertainment no commendation at the hands of either Press or Parliament. We simply record the fact that in this novelty-hunting age one entertainment has been found to run over four seasons, and repay and reward the skilful caterer who contrived and still sustains it.

CHURCH MISSIONARY SOCIETY.—The fifty-sixth annual meeting of this society was held in Exeter-hall, on Tuesday. The Earl of Chichester occupied the chair. There were also present the Earl of Shaftesbury, Lord Viscount Middleton, the Right Hon. and Most Rev. the Bishop of Meath, the Right Rev. the Bishop of Winchester, the Right Rev. the Bishop of Melbourne, Bishop Cotton, Lord H. Cholmondeley, M.P., &c. It appeared from the report that the receipts of the past year on account of the society the same [illegible] £100 less than in the former year. The former had been £187,952 8s. 8d. and the latter £187,852 8s. 8d. As there had been, however, a balance of £2292 8s. 9d. in hand at the commencement of the year, the total [illegible] amounted to only £2021 2s. 2d.

WESLEYAN MISSIONARY SOCIETY. On Tuesday morning the annual general meeting of this society was held at Exeter-hall; Sir Anthony Oliphant, C.B., late Chief Justice of Ceylon, in the chair. In opening the proceedings the Chairman gave a lengthened history of the progress of missionary operations at Ceylon and at the Cape of Good Hope, where he had been previously stationed. The report—which was read by the Rev. Elijah Hoole—stated that the receipts of the past year had amounted to £111,048 14s. 4d. The meeting was addressed by Mr. Cowan, M.P., Mr. Farmer, the Rev. G. Osborne, the Rev. W. Arthur, and other gentlemen.

SEBASTOPOL.—(SEE NEXT PAGE.)

THE CAMP OF THE NAVAL BRIGADE.

ONE of the first places which strangers inquire after, on arriving at Balaclava, is the Sailors' Encampment. Sanitary commissioners and travellers in search of the picturesque, naval and military amateurs—all are anxious to take a view at Jack's environment in the Crimea. Never was the superior training of a life at sea over one in barracks for enabling men to manage for themselves more visible than in a comparison of the Naval Brigade near Sebastopol with the generality of the soldiers. Some rather striking facts on that head were elicited by the Sebastopol Committee on Monday last. Commodore Hillyar, of the *Agamemnon*, having been examined as to the condition of the Naval Brigade, gave the following evidence:—

The brigade consisted of 1400 men. They were always much better off than the troops, both in the absence of sickness and the more plentiful and regular supply of provisions. Their Camp was six miles from Balaclava. They were supplied from a store-ship, made of an old transport that was dismasted in the storm of November. They at first carried their provisions up to the Camp in arabas and carts; but when the roads became impassable they were carried up by the men. In the first three months they had very little fresh meat and no vegetables. On an average the men were three nights in bed and one out. Their meals were cooked by an arrangement among the messes themselves, so that when the men returned from the trenches they found their dinners or suppers ready cooked for them. The brigade supplied men for the trenches when required, and on the whole they had as hard manual labour as the troops, but not to such an amount. In consequence of using too much salt provisions there was a good deal of scurvy among the sailors; but in December they were better supplied with fresh meat, and obtained a large quantity of oranges. From that time they had been liberally supplied both with fresh meat and vegetables. The greatest number of men the brigade ever had in the hospital was from forty to sixty—the last number when the cholera prevailed. The number of sick afterwards gradually lessened.

THE BOMBARDMENT OF SEBASTOPOL.

THE Panoramic View of the Bombardment which our Artist has given this week is taken from a hill about half a mile in front, and a little to the left, of Catheart's Hill, extending from Gordon's Battery to the left attack, occupied by the French. The group of spectators in the centre are evidently trying to ascertain what progress the Allies are making in the work of destruction. At a short distance on the left lies the Redan fortress, from which a dense smoke ascends, concealing every object in that neighbourhood. To the extreme left lies the fleet of the Allies, ready to co-operate with the land forces whenever the signal is given.

CALENDAR FOR THE WEEK

SUNDAY, May 6.—4th Sunday after Easter. Battle of Prague, 1757.
MONDAY, 7.—Richard Cumberland, dramatist, died, 1811.
TUESDAY, 8.—Easter Term ends.
WEDNESDAY, 9.—Corporation and Test Acts repealed, 1828.
THURSDAY, 10.—Theatrical Performances first licensed, 1574
FRIDAY, 11.—Earl of Chatham died, 1778.
SATURDAY, 12.—Lord Stafford beheaded, 1641.

TIMES OF HIGH WATER AT LONDON-BRIDGE,
FOR THE WEEK ENDING MAY 12, 1855.

Sunday		Monday.		Tuesday.		Wednesday.		Thursday.		Friday.		Saturday.

MADAME FUZZI'S ANNUAL GRAND MORNING CONCERT will take place on MONDAY, MAY 21, at WILLIS'S ROOMS, King-street, St. James's, when she will be assisted by many Eminent Artistes. Full particulars to be duly announced

MR. ALFRED MELLON respectfully announces that his SECOND GRAND VOCAL and INSTRUMENTAL CONCERT will take place at ST. MARTIN'S HALL, on MONDAY EVENING, MAY 7th, to commence at Eight; on which occasion Signor Rotteselli will make his first appearance in England these three years, and perform a new Concertino on the Contra-Basso. Vocalists: Miss Louisa Pyne and Mr. Wilbraham Reeves. Pianist, Mr. F. E. Bache. Leader, Mr. Sainton. The band will consist of fifty of the finest living instrumentalists, and will perform during the evening Mendelssohn's celebrated Symphony in A Minor; also Overtures by Beethoven, Weber, Auber, &c. Conductor, Mr. Alfred Mellon. Tickets, 10s., 5s., and 7s. 6d., to be had of Mr. Mellon, 134, Long-acre; Cramer and Beale, 201, Regent-street; St. Martin's Hall; and the principal Music-shops

THE ROYAL PANOPTICON, Leicester-square.—WAR in the CRIMEA, Monday, Wednesday, and Friday, at 9.0; and Tuesday, Thursday, and Saturday, at 4.15. LIFE in POMPEII, Monday, Wednesday, and Friday, at 4.15; and Tuesday, Thursday, and Saturday, at 9.15 Daily: The Grand Organ, at 12.45, 3, and 8.30 The Pyrenean Mountaineers, at 1.45 and 8 The Great Model Machine, at 2.45 and 8.30 The Luminous and Chromatic Fountain, at 4 55 and 9.35. Model of Ancient Jerusalem explained between 12 and 5 p.m., Lectures and Demonstrations as usual. Doors open Morning, 12 to 5, Evening, 7 to 10 Admission, 1s; Schools and Children, half price.

CRYSTAL PALACE, Sydenham.—The PALACE and PARK are OPEN to the Public on MONDAYS, at 9.0 a.m.; and on TUESDAYS, WEDNESDAYS, THURSDAYS, and FRIDAYS, at 10.0 a.m.; and on the admission is 1s.; and on SATURDAYS, at Noon, when the admission is 5s.; and on each day at 7 p.m., when the admission, including a programme by railway, may be obtained at the London-bridge Terminus, and at the several Agencies in London. Trains run to the Crystal Palace Station at 8.5 a.m., and every half-hour from 9.10 a.m up to 4.10 p.m.; and at 4.35, 5.30, 5.35, 5.50, 6.20, and 7.5 p.m., returning from the Crystal Palace Station up to 8.10 p.m.

INDIA, CHINA, AUSTRALIA, and CAPE of GOOD HOPE. W. O. YOUNG will dispatch the following fast-sailing A 1 Clipper SHIPS at the dates named as under:—

Ships.	Tons.	Commanders.	Destination.	Docks. To Sail.
Matilda Wattenbach	1200	J. C. Clare	Calcutta	London.. May 7
Stuart Wortley	800	J. Simpson	Bombay	S. India May 28
G. W. Bourne	781	W. H Harding	Madras	St. Kath. May 5
Planet	446	W. P. Backhurst	Hong-Kong & Singapore	London.. May 27
Kensington	900	W. King	Port Phillip	London.. May 15
Granite City	807	W. Leask	Sydney	London.. May 12
Ashton	904	Thomas Pill	Geelong	London.. May 5
Rechampton	469	Robert Bradshaw	Cape of Good Hope	London.. May 25
Meteor	370	J. Brodie	Cape of Good Hope	London.. June 5
Sea Queen	415	W. Rowe	Adelaide	St. Kath. May 16

These Ships have been selected specially for their high-class and fast-sailing qualities, and will be found well worthy the attention of Shippers and Passengers.—W. O. YOUNG, 84, Cross-street, Manchester; 18, Dale-street, Liverpool; and Sun-court, Cornhill, London.

THE ILLUSTRATED LONDON NEWS.

LONDON, SATURDAY, MAY 5, 1855.

LOUIS NAPOLEON had scarcely returned to his own country before his life was assailed by an assassin an Italian refugee—a man who has had an asylum in England; and we are at once made aware that men of his stamp can only have been prevented by respect for the sanctity of the asylum they enjoyed from making such attempts on his life, had they found an opportunity, while he was visiting the Queen. We may as a nation, therefore, be grateful that the natural result of the national kindness and *protection* granted to refugees imposed such a restraint on them as to keep entirely away from us the chance even of our being stained by any similar atrocious attempt. Now that it has been made, and we see the class of men who made it, we at once become sensible of the possible risk Louis Napoleon ran even here. Now, we cannot do otherwise than warmly approve of the precautions taken by our Government, unknown probably, to the Emperor, who fearlessly braves all danger—to provide for his safety, though at the time they were supposed by some persons to be unnecessary. Had such an attempt been made here, though unsuccessful, it would have subjected us to endless reproaches We may believe with the Emperor, who declares "he fears nothing from the attempts of assassins;" that "there are existences which are the instruments of the decrees of Providence;" that "he has yet a great mission to fulfil," and "till it be fulfilled he runs no danger;" but, whatever may be our faith, we can have no *à priori* knowledge who has such a mission to fulfil, and we must act according to the maxims of prudence rather than according to a faith, however fervent, without knowledge. By this event all the precautions of our Government are amply justified. Whatever opinions we may form as to the permanency of the laws which dictate the course of society, and as to the insignificance of any individual whose sphere of operation is extremely limited, in relation to the whole of society, no one can doubt that the life of Louis Napoleon has a great European value. Had the bullet of the assassin reached its mark—and it was deliberately and well aimed—it would have created considerable disturbances in Europe. The parties and factions in France, released from the powerful hand which has firmly wielded the national power voluntarily entrusted to it, and the parties and factions in Italy—awed in a great measure by the same strong will—would have burst into new life, and to the war with Russia we might have seen added an intestine war in the West of Europe. We are made aware of the great danger we have escaped by our present safety. The life of the Emperor—strange as this may now seem- is not only the guarantee of the alliance between England and France, but of the tranquillity of Europe. When such probable effects are brought under our notice we may adopt his faith. He is fulfilling a great mission, on which the social peace of Europe and the progress of civilisation mainly depend; and we may believe with him and hope with him that, having such a great mission to fulfil, his life cannot be in danger. Congratulatory addresses from many quarters show how general has been the alarm occasioned by the attempt, and how deep is the interest taken in the preservation of his life. He was expected to bring war in his train, and he has become the guardian of the general tranquillity, whose life nations are anxious to preserve.

Perhaps in consequence of this attack, but perhaps in consequence of the condition of the army before Sebastopol, the Emperor has yielded, we are informed, to the advice of his counsellors, and given up the intention of going to the Crimea. Partly on this account the Funds at Paris rose considerably on Wednesday; but more, we believe, on account of a report, which gains confidence, that M. Drouyn de Lhuys has formed a decided opinion in favour of the proposition made by Austria for restoring peace, and has brought the Emperor over to his opinion. The latter part of the statement is, however, more doubted than the former. Should it turn out to be correct, England, however reluctant, will probably adhere to the same terms. There is no doubt, we believe, that they will be accepted by Russia. An opinion accordingly that France and England will agree to the new proposition is at least prevalent, and gives firmness to our own Stock Market.

On this day a great meeting, called by thirty-seven of the influential men of the City, of all political parties, is to be held, to assert that "the true remedy for the system of maladministration, which has caused so lamentable a sacrifice of labour, money, and human life, is to be sought in the introduction of enlarged experience and practical ability into the service of the State." As this is just now a most interesting subject, and as the meeting is likely to give a direction to public meetings and public opinion throughout the country, it is very desirable that the proceedings should be carefully considered and carefully conducted. The movers properly disclaim "every desire of excluding the aristocratic classes from participating in the councils of the State;" but they protest "against the pretensions of any section of the community to monopolise the functions of administration." Such a resolution will meet with almost universal support; but, moved by one class of men, it may be considered, however erroneously, as an attack on another class—the aristocracy. This is not the object. It is desired more, we believe, to introduce into the administration of public affairs the principle which makes business successful, than substitute the men who carry on business for any other class. The emoluments of successful business are, in fact, greater than the State—to serve which is peculiarly honourable—is required to give for the highest talents which it employs; and men bred up to business, whom, from their success, we should think worthy of trust, would not accept office under the State. What is required, therefore, is far less a change of men than a change in the principles on which men reach office and continue in office. In private life no man succeeds who does not deserve the confidence of the bulk of the persons with whom he has business to transact. Every one has many competitors; and, to succeed, every man must be zealous and diligent in his calling, as well as trustworthy. His reward or his success depends on his own exertions, and those who employ him or do business with him. In administration all these things are reversed. A man is appointed to an office by favour or by affection, and all his rewards, except the little approbation or disapprobation he may meet from the public, are bestowed altogether independent of the persons with whom he transacts his business. The abolition in modern times of the old mode of paying public officers by fees, though recommended by unanswerable reasons, has added to the indifference of those whose rewards are never proportionate to their exertions. A man in office has confederates, rivals, fellow-intriguers for power and higher place, but he has no competitors. This is what must, if possible, be changed; and the principle of competition, throwing open all public situations to merit, and not confining them to birth or property, must be made the guiding principle of administration, as it is of private business. If the meeting, and the meetings which will be sure to follow, keep this object in view, and pursue it with care, they will, we believe, effect a great improvement in the Government. If they should be made the stalking-horses for individual ambition—if they should aim at substituting in office one class of men for another—they will only cause much mischief. In the present critical condition of public affairs we are all deeply interested in their proceedings, and may earnestly hope that they will be guided by good sense and moderation.

THE EXHIBITION OF THE SOCIETY OF PAINTERS IN WATER-COLOURS, opened to the public on Monday, will be noticed next week, with Illustrations.

AT a Court of Aldermen, held on Wednesday, a resolution indicative of the profound sorrow with which the Court had heard of the recent attempt to assassinate the Emperor of the French was unanimously adopted. It was further resolved that it should be presented to the French Ambassador.

THE CITY STATUE TO SIR ROBERT PEEL.—Orders were issued on Wednesday for the removal of the obelisk at the west end of Cheapside—at the point of junction of Aldersgate-street, St. Paul's Churchyard, Paternoster-row, and Newgate-street—that spot having been selected for the statue of the late Sir Robert Peel, by Behnes. It is expected to be up in fourteen days.

LATEST INTELLIGENCE.

VIENNA CONFERENCES.

Before the departure of Lord John Russell and M. Drouyn de Lhuys there was signed at Vienna a Convention between Austria and the Western Powers, the fifth article of which states expressly that the Four Points of the guarantee (in the form given to them by the protocol of the 28th December) cannot be separated, but must be accepted together by Russia; and that the refusal of any one point of the guarantee by that Power forms *(impliquerait)* a *casus belli*, for all the Powers who have signed the Treaty of the 2nd December.

This Convention is intended to be the basis of an ultimatum which Austria is charged to address to Russia, if after a certain delay (sufficiently marked out by the result of the present operations against Sebastopol) the Conferences of Vienna should not have concluded the signature of the preliminaries of peace.

Austria has made all the preparations necessary for entering on the war; and in case Russia finally refuses, the Emperor will issue a Manifesto, announcing to his people the object of the war he is about to undertake. We shall then see (Field Marshal Hess is reported to have said some days ago) if the Austrian army, which is supposed to sympathise with Russia, will understand the appeal of its chivalrous Emperor!"

—*Letter from Vienna in the Constitutionnel of Friday.*

LAND FORCES FOR THE BALTIC.

Orders have been issued for the line-of-battle ships *St. George*, 120; *Neptune*, 120; *Powerful*, 84; and *Calcutta*, 84, now lying at Spithead, under orders for particular service, to be held ready to embark a division of the French troops from the Encampment at Boulogne to co-operate with the Allied fleet in the Baltic. The Foreign Legion, being embodied and trained at Heligoland, will also furnish about 10,000 men for this service.

IT is rumoured in Paris that a telegraphic despatch has arrived there from General Canrobert, who anticipates an offensive movement on the part of the enemy.

THE COURT.

The Court has been very gay during the week just closed. On Tuesday her Majesty held a Court, and in the evening gave a juvenile ball, at which a great many members of the youthful aristocracy were present On the following day a very numerously-attended Drawing-room took place; and on Thursday her Majesty went in demi-state to a private view of the Exhibition of the Royal Academy.

On Saturday last his Serene Highness the Prince of Lehuingen took leave of the Queen, and quitted Buckingham Palace, on his return to the Continent. In the evening of the same day the Queen and the Prince, accompanied by their Serene Highnesses the Princess of Hohenlohe-Langenburg and Princess Adelaide of Hohenlohe, honoured the Royal Italian Opera with their presence.

On Tuesday the Queen held a Court at Buckingham Palace, at which Lord John Russell was, by command of the Queen, sworn in as one of her Majesty's principal Secretaries of State. The Queen was graciously pleased to confer the honour of Knighthood upon Mr. Alderman Henry Muggeridge and Mr. Charles Dennis Crosley, the Sheriffs of London and Middlesex. In the evening her Majesty gave a juvenile ball.

Her Majesty will give a State Ball on Wednesday, the 9th May; and a State Concert, on Friday, the 18th May.

JUVENILE BALL AT BUCKINGHAM PALACE

On Tuesday—the birthday of his Royal Highness Prince Arthur—her Majesty gave a ball in the evening to the juvenile nobility and gentry. About 240 invitations had been issued. The juveniles began to arrive at the Palace soon after eight o'clock, accompanied by their parents, and were ushered to the Reception room.

Her Royal Highness the Duchess of Kent arrived at half past eight o'clock, attended by Lady Anna Maria Dawson and Baroness de Speth.

Their Royal Highnesses the Duchess of Cambridge and the Princess Mary, and his Royal Highness the Duke of Cambridge, arrived at a quarter before nine o'clock.

Her Majesty the Queen and his Royal Highness Prince Albert left the White Drawing room at ten minutes before nine o'clock, and passed into the Throne-room, accompanied by the Prince of Wales, the Princess Royal, Prince Alfred, Prince Arthur, the Princesses Alice, Helena, and Louise, the Duchess of Kent, the Duchess of Cambridge, the Princess Mary, the Duke of Cambridge, the Princess of Hohenlohe-Langenburg, the Princesses Adelaide and Feodore of Hohenlohe, and Prince Victor of Hohenlohe.

The Princess Royal and the other Royal Princesses wore dresses of light blue tulle over a blue silk glacé slip, trimmed with ruches of white blonde and ribbon. A bouquet of white hyacinths. Their Royal Highnesses each wore a wreath of white hyacinths.

The Princess Mary of Cambridge wore a dress with three skirts of pink tulle over a rich pink glace silk petticoat, looped up with bunches of apple blossom and green crape leaves. Her Royal Highness wore a wreath of apple blossoms and green crape leaves.

The Princesses Adelaide and Feodore of Hohenlohe-Langenburg wore flounced dresses of white tarlatan, trimmed with white silk fringe. The Princess Adelaide wore a garland of pink roses and white lilac; the Princess Feodore a garland of pink roses

The Prince of Wales and Prince Alfred appeared in the Highland dress, which costume was also worn by the sons of the Duke of Argyll and other young Scottish nobles present.

The Queen's band was in attendance in the Throne-room; and soon after the entrance of her Majesty and the Royal circle dancing commenced. A quadrille was formed, in which the youthful members of the Royal family took part.

The festivities were prolonged until midnight.

THE DRAWING-ROOM

The Queen held a Drawing-room on Wednesday afternoon at St. James's Palace. It was the second this season, and was numerously attended.

The Queen wore a train of white and gold moiré silk, trimmed with white satin ribbon, gold blonde, and bows of red velvet; the petticoat was white satin, trimmed with gold blonde and bows of red velvet. Her Majesty wore on her head an opal and diamond diadem, and feathers.

The Duchess of Cambridge wore a train of grey satin, trimmed with Honiton lace, the corsage ornamented with diamonds and pearls. The petticoat is covered with seven flounces of Honiton lace. Her Royal Highness's head-dress was composed of a tiara of pearls and diamonds, feathers, and Honiton lace lappets.

The Princess Mary of Cambridge wore a train of rich blue glace silk, festooned with blue tulle, satin ribbon, and bunches of pink roses; the corsage was ornamented with diamonds and turquoise. The petticoat was blue tulle, over rich glace silk, and was festooned to match the train with bunches of pink roses. The necklace was pearls and diamonds. Her Royal Highness's head-dress was formed of a tiara of roses and stars in diamonds, lace lappets, and white feathers

The Foreign Ministers were first introduced, when several presentations took place. Almost all the members of the Corps Diplomatique, with their ladies, were present. In the general circle the following were among the more noticeable presentations:—

The Countess of Erroll, by Lady Agnes Duff.
Viscountess Doneraile, by the Marchioness of Ely
Viscountess Maidee by the Duchess of St. Albans
Viscountess Ingestre, on her marriage, by the Marchioness of Salisbury
The Lady Adagasla, on her marriage, by the Duchess of Sutherland
Lady Blanche Lascelles, by the Countess of Harewood
Lady Cecil Leveson, by her mother, the Countess of Sydney
Lady Barbara Leveson, by her mother, the Countess of Milltown
Lady Augusta Hay, by her mother, the Countess of Kinnoul.
Lady Emily Hay, by the Duchess of Wellington
Lady Louisa Corry, by her mother, the Countess of Belmore
Lady Harriet Chichester, by the Marchioness of Donegal
The Hon. Phillpps Sidney, by the Viscountess Combermere
Hon. Mary Amherst, by her mother, Viscountess Holmesdale.
Lady Pole, by the Duchess of Sutherland
Mrs. Gale, of Nunnykirk, by the Duchess of Northumberland
Miss Dancombe, by her mother, the Hon. Mrs. Arthur Dancombe.
Miss Rusbout, by Lady F. L.

BRITISH AND FOREIGN BIBLE SOCIETY.—The anniversary of this society was held on Wednesday in Exeter-hall, under the presidency of the Earl of Shaftesbury, who, in opening the proceedings, congratulated the meeting on the fact that, notwithstanding the pressure occasioned by the war, the income of the society exceeded that of any former year, except on the occasion of the Jubilee, and the total circulation of copies of the Scriptures was greater than during any previous year of the society's existence. From the annual report it appeared that the amount received for Bibles and Testaments was £98,600, making the total receipts from the ordinary sources of income £124,478. There had been also received £3694 further contributions to the Jubilee Fund, and £7360 to the Chinese New Testament Fund; making a grand total of £136,032. The expenditure for the year was £149,540, being an increase on the payments of £29,872. The meeting was then addressed by the Bishop of Meath, Lord Ebrington, Mr. Wylie, the Hon. and Rev. Baptist Noel, the Bishop of Melbourne, the Hon. and Rev. Mr. Pelham, the Rev. Norman M'Cleod, the Rev. Mr. Farrer, the Rev. Mr. Harrison, the Rev. Mr. Gill (from Karatonga), and Mr. T. Farmer; and resolutions were passed approving and commending the objects and operations of the society.

REMOVAL OF THE PATRIOTIC FUND EXHIBITION TO BURLINGTON-HOUSE, PICCADILLY.

THE Exhibition of Paintings and Drawings by members of the Royal family, and noble and distinguished amateurs, in aid of the Fund for the relief of the Widows and Families of Officers killed in the Crimea, which during some weeks past has attracted so much attention in the Gallery, 121, Pall-mall, has this week, by permission of the Government, been removed to Burlington-house, Piccadilly, in consequence of the former apartment being required, according to previous arrangement, for the Exhibition of Works by French Artists. Four of the principal rooms and a corridor on the first floor of the noble mansion above named have been allotted to the purpose; and one great advantage resulting to the charitable enterprise from the change is the increased space thus placed at the disposal of the committee, which enables them to display very many contributions which before it was impossible to do. Taking into account the fine proportions and elegant architecture of the rooms themselves, and the excellence of the light, the general effect of the Exhibition is very agreeable and satisfactory.

Of course, among the chief attractions are the contributions by the Princess Royal and the Prince of Wales, and the other Juvenile members of the royal family. The highest bid for the clever "Battle-field," by her Royal Highness, still continues to be 2700; but there are considerable hopes of a considerably higher bid before the day appointed for the sale —namely, the 14th inst. We should add that the hall and noble staircase of the mansion are appropriately decorated with trophies of the colours of the Allied armies. The visitors were numerous on the reopening day (Thursday).

Three Views of Burlington-house are engraved at page 436.

NATIONAL SPORTS.

Chester's May Carnival will be succeeded by a very quiet week. The Newmarket Second Spring has tapered away to nothing, and, now that the Rowley Mile Plate has ceased to have any important bearing on the Derby, there is little left to tempt the sportsman down the Eastern Counties on Tuesday morning. As Orion so positively declares that Acrobat cannot get beyond a mile and a half, we conclude that the three-mile sweepstakes on the first day will be left to Weathercock and Kaffir. The four fillies in the other 50 sovs. h. ft. race on Wednesday are unknown to fame; and the Suffolk Stakes will not do much towards eking out the sport. On Thursday there is rather an interesting contest, in which some Derby two-year-olds—Ariel, Miss Whip colt, &c.—are engaged; but the majority of the ring will be ere that comparing books within the sound of "Shrewsbury clock" many miles away. Mr. Frail has prepared a very strong list there for Thursday and Friday; but its interest is almost entirely confined to handicaps, as to all present appearance the Salopian Stakes includes no three-year-olds of any pretensions.

The settling for the Two Thousand Guineas has been remarkably easy, and their Chester Cup victory will no doubt have the effect of quite healing the rupture between Mr Howard and his trainer, and of infusing fresh spirit into the veterans of St. Hubert. The vassals of Lord of the Isles have also rallied round him; but, like his little rival, he will not easily forget the Newmarket race, and the strokes of the whip which Alderoft broke over his shoulders. De Clare existed no great hopes by his Newmarket performance; but three such Maltons (as gallop will do a great deal for his lusty frame. Bonnie Morn and Graculus Barnes are now looked on as "forlorn hopes," in consequence of leg infirmities. Wild Dayrell is a steady favourite, but he is comparatively untried, and is trained in the grounds of his owner, who is a gentleman-farmer somewhere in Wiltshire or Hampshire. Nancy's career terminated last Wednesday, on the scene of her first proud triumph, as she broke her leg while running for the Chester Cup race

Lord Exeter's sale is fixed for Monday at Tattersall's, and comprehends three racers and a dozen unbroken yearlings, principally by Bay and Nutwith. *Apropos* of sales, we may remark that the Surplice blood does not seem likely to be valuable, as a trio of his three-year-olds only averaged 217 guineas at the late hammer, in Newmarket Meeting.

The 1855 Cricket season may be said to have been inaugurated at that little town on Friday week, by a single-wicket match, the winner of which cleared 2425 in stakes and bets. "Opening dinners" are still the order of the day, and the wickets will not be pitched at Lord's for some three weeks to come.

The Prince of Wales Yacht Club sailing match, on Friday, is the only fixture of the week to rouse the interest of our amateur blue-jackets

CHESTER SPRING MEETING.—TUESDAY

Grosvenor Stakes.—Eplesus, 1. Lord Alfred, 2.
Palatine Stakes.—Lady Tatton, 1. Instructress, 2
Chesterfield Stakes.—Courtenay, 1. Pulsator, 2
Mostyn Stakes.—Epicurean, 1. Ariel, 2
Sweepstakes 5 sovs each.—Equivoque, 1 Cherry Brandy, 3
Wynnstay Handicap.—Typee, 1. Venison, 2

WEDNESDAY

Skelter —Comfort, 1. Helmet, 2
Chester Cup.—Scythian, 1 [illegible], 2
Scramble.—Questionable, 1. Noddy, 2
Members' Plate.—Mayfield, 1. Mayfield, 2
Queen's Plate.—Eulogist walked over
Triennial Stakes. Field Marshal, 1. Punch-box, 2.

THURSDAY

Dee Cup.—Orion, 1. Helmet, 2
Welter Cup.—Georgium Sidus, 1. Dalkeith, 2.
Dee Stakes.—Nossy, 1. Lord Alfred, 2.
Marquis of Westminster's Plate.—Jack Sheppard, 1. Orinoco, 2.
Triennial.—Delaine fly walked over.
Selling Stakes.—Jenny Wren, 1. Punch Box, 2.

FRIDAY

Earl's Stakes.—Alcyone, 1. Revival Buy, 2
Cheshire Stakes.—Typee, 1. Venison, 2
Grand Stand Cup.—Pomeroyne, 1. Ireland's Eye, 2
Wirral Stakes.—Stella, 1. Sugar Cane, 2
Ladies' Purse.—Jenny Wren, 1. Challow Boy, 2
Triennial.—Lady Tatton walked over.

THE annual dinner of the friends of the Printers' Pension Society took place on Friday week at the London Tavern. The Lord Mayor took the chair; supported by Mr. Sheriff Crosley, Dr. Spurgin, and other gentlemen The secretary announced that the subscriptions of the evening amounted to about £[illegible].

A FIRE broke out in the shipbuilding yard of Messrs. John Scott Russell and Co., at Millwall, on Thursday night, in the course of which the newly-built floating battery the *Etna* was totally destroyed.

MONETARY TRANSACTIONS OF THE WEEK.

(From our City Correspondent.)

Although prices of most national securities have not recovered the depression consequent upon the breaking up of the Conference at Vienna, and the amount of business done during the Consols this week has been comparatively small, the market has ruled tolerably firm. The quantity of Stock has not increased; and there has been a most abundant supply of money for commercial purposes; whilst we have to report a very limited demand for gold on Continental account This arises from the favourable nature of the exchanges, and the improved trade which is now carried on between this country and France, including some parts of Germany. A resumption in the demand for gold in general, is expected, as we have still large supplies of silver on hand to meet any sudden adverse alteration in the exchanges.

The imports of the precious metals have been good; viz., 1,393,624 dollars from New York, £8000 from Lisbon, £176,000 from Mexico, the West Indies &c.; and about £[illegible] from France.

The Consol Market was somewhat active on Monday; nevertheless, the quotations were steady The Three per Cents Reduced marked 87½ to 88⅞; the Three per Cent Consols, 88¼ up to 88⅞; the New Three per Cents, 87½ to 88; Consols for Account, 88⅞; Long Annuities, 1859, 3 1-16. The Omnium was done at ¼ dis. to ¼ prem. Bank Stock, 210. Exchequer Bills, 4s. to 5s. premium; Exchequer Bonds, 99½. The New Long Annuities realised 3 5-16. Tuesday was observed as a close holiday in the Stock Exchange. On Wednesday Bank Stock was done at 210 to 211½; the Three per Cents Reduced were 87⅞ to 88⅛; the Three per Cent Consols, 88⅜ to 88⅝; Consols for Account, 88⅝; the New Three per Cents, 87⅞; Long Annuities, 1860, 3⅛; Ditto, 1885, 16 3-16; India Bonds were 12s. to 15s. prem.; Omnium sold at ¼ prem. to par; Exchequer Bills, 4s. to 7s. prem.; Exchequer Bonds, 99½ ⅝. The market on Thursday was active, owing to the Bank of England having lowered its minimum rate of discount ½, or to 4 per cent per annum. The Three per Cents were done at 88⅜ to ½; the Three per Cents Reduced, 87⅝ to 88; and the New Three per Cents, 88⅛ ⅜; the Omnium advanced to ⅝ ¾ prem.; and the New Annuity was 16 3-16, Bank Stock, 211½; Exchequer Bills, 4s. to 7s.; and India Bonds, 12s. prem.

The business done in most Foreign Bonds has been limited Mexican Three per Cents, although 59,000 dollars have arrived on account of the dividends have been 20¾ Dutch Four per Cents have realised 93¾. French Rents, Four-and-a-Half per Cents, 93 (exchange, 25f. 15c.). Russian Four-and-a-Half per Cents, 85¾; Spanish New Deferred, 18 to 17⅞; Spanish Passive, 5⅜; Sardinian Five per Cents, 84½; Turkish Six per Cents, 70¾ to 71¾; Ditto for the Account, 73¾ to 75½; Ditto, Small, 73½; Peruvian Four-and-a-Half per Cents, 67¾.

The Bank of England has obtained a new French Loan of £16,000,000 sterling will be announced about the middle of June. The interest on French Treasury Bonds has been advanced 4 per cent.

There has been a moderate demand for Joint-Stock Bank Shares, the prices of which continue tolerably firm

The Railway Share-market has been in a most inactive state, and a slight general decline has taken place in the quotations The following are the official closing prices on Thursday:—

ORDINARY SHARES AND STOCKS.—Ambergate, Nottingham, and Boston, Junction, 4½; Caledonian, 69½; Eastern Counties, 11½; East Lancashire, 72; Great Northern, 89½; Ditto A Stock, 124; Ditto B Stock, 124; Great Western, 65¾; Lancashire and Yorkshire, 77½; London and Blackwall, 7¾; London and South Coast, 108; London and North-Western, 97½; Ditto Fifths, 15; London and South-Western, 80; Midland, 68½; Ditto, Birmingham and Derby, 60½; Newport, Abergavenny, and Hereford, 13½; North British, 37¾; North-Eastern —Berwick, 76½; Ditto, York, 47½; North Staffordshire, 12½; Oxford, Worcester, and Wolverhampton, 36¾; South Wales, 57½

LINES LEASED AT FIXED RENTALS.—Buckinghamshire, 96; Manchester, Buxton, and Matlock, 12.

PREFERENCE SHARES.—Great Northern, Five per Cent, 115; Ditto, December 31 per cent prem., 108½; Ditto, Four-and-a-Half per Cent, 101; Great Western: Irredeemable Four per Cent, 91; Ditto, Birmingham Stock, 78; Ditto, Chester, 14½; Midland Consolidated Bristol and Birmingham, 148; North-Eastern York B. and S. Purchase, 9¾; South-Eastern, 23¾; South Wales Four per Cent, 93; Ditto, Four-and-a-Half per Cent, 93.

FOREIGN.—Eastern of France, 7½; East Indian Five per Cent, 24¾; Great Luxembourg, 2¾; Great Western of Canada, 18¾; Namur and Liége, 6¾; Paris and Orleans, 46¾; Scinde, 13.

Mining Shares have nearly realised full prices:—Imperial Brazilian were done on Thursday at 2¾; Cobre Copper, 85¾; Tan Croft, 28; and United Mexican, 8 to 7¾.

Friday Evening.

Great inactivity has prevailed in the market for Consols to-day. The Three per Cents were at one period marked 88¾ ⅞, but they have since declined to 88⅝ The Three per Cents Reduced are 87⅞ ⅛ and the New Three per Cents, 87⅞ to 88¾. Foreign Bonds and Railway Shares have ruled dull.

THE MARKETS.

CORN EXCHANGE (Friday [illegible] the market this week have been on a very [illegible] and the [illegible] samples to-day was limited [illegible] [illegible] [illegible]

THE IMPERIAL VISIT. REVIEW OF THE HOUSEHOLD TROOPS IN WINDSOR GREAT PARK. THE CAVALRY CHARGE (see previous page)

London: Printed and Published at the Office, 198, Strand, in the Parish of St. Clement Danes, in the County of Middlesex, by WILLIAM LITTLE, 198, Strand, aforesaid.—SATURDAY, MAY 5, 1855.

THE ILLUSTRATED LONDON NEWS

No. 742.—VOL. XXVI.] SATURDAY, MAY 12, 1855. [WITH A SUPPLEMENT, SIXPENCE.

CRAVENS IN COUNCIL.

HAVE Great Britain and France undertaken a task beyond the limits of their strength? Are they in reality "tottering upon the pinnacle of their greatness"? Have they meddled with a business with which they had no real concern? And is it their duty—such being the case—to withdraw from it as fast as they can, and with the least possible loss of material wealth and moral dignity? Have they already suffered so much that to suffer still more would produce either the perilous exhaustion or the still more perilous exasperation of a people that have not the manly virtues of magnanimity and endurance? If either of these questions could be truly answered in the affirmative, the star of our national fortunes would indeed have culminated; our decline would be more rapid than our growth, and our shame would follow fast upon our glory. But to every one of these questions there is not an Englishman or Frenchman, competent to form a reasonable judgment, who would not answer with a proud and hopeful negative. And far beyond the limits of Great Britain and France;—in every civilised State of Europe and the world; the same reply would be given by every dispassionate student of past or contemporary history, and by every one who had eyes to see and ears to hear the events that are taking place from day to day in the great drama of human life. Whatever the sordid and the craven-spirited may think, England and France do not arrogate to themselves too much in claiming to be at the head of European civilisation. They are, as they assert themselves to be, the two foremost nations of the world—first in wealth, in arts, and in arms, and in everything that exalts humanity. If other States and Empires compete with them, they compete at a respectful distance. Some of their competitors may ultimately reach a point of power and greatness to which no State in the Old World has attained in modern times; but as yet such nations are in the immaturity of early youth, and must yield the place to their seniors, unless these should voluntarily abdicate their functions, or are in reality as decrepit and effete as they claim to be well-conditioned and vigorous. But if Great Britain and France, being in this enviable position, are desirous to maintain themselves in it, and if they do not care to receive at some future, and possibly at no very remote, time the law from barbarians, or from civilised States more virtuous and heroic than themselves, they must keep themselves up to the level of their destiny, whatever the sacrifices it may entail. An inevitable penalty attaches itself to all greatness, whether individual or national. No man and no Empire can continue to be great without continuing to act greatly. To remain great implies a continual struggle;—a struggle in the arts of peace, if circumstances allow of peace; but a struggle, also, in the battle-field, if honour, or duty, or the desire of self-preservation counsel and compel war as the sole alternative.

Yet, obvious as such considerations are, it would appear, if the current rumours of London and Paris are to be believed, that highly influential personages, both in and out of office, in this country and in France, are anxious to have the greatness without the responsibility; and, with this object, are desirous above all things of putting an end to the present war, by the concoction of any kind of compromise that it may please the Emperor of Russia in the infinitude of his condescension to accept. If these rumours be true it especially behoves the people of this country to be on the alert. The retirement of M. Drouyn de Lhuys from the Secretaryship of State for Foreign Affairs in France because he was the friend of an illusory peace, and of unsafe, if not dishonourable concessions to Russia, is a striking proof that Napoleon III. is no accomplice of such suicidal policy, and that he may be safely entrusted with the "mission" in which he has such indomitable confidence, and which he fulfils with such remarkable energy and sound judgment. But in England, where we have no such ruler, and where opinion and power are subdivided among classes and parties, it is the duty of every honest man to watch over the honour of his country as jealously as if it were his own. England can afford to lose men and money; she can afford to make sacrifices far greater than ever she has yet made in any period of her history; she can afford to wage a conflict more desperate than that of the perilous years which closed their cycle in 1815;—but England cannot afford the slightest loss of her national honour and prestige; she cannot afford to let it be known to the four winds of heaven that any antagonist the world can produce is too mighty for her; she cannot afford to let it be seen that she has degenerated; and that, in the struggle provoked by the wanton aggression of a barbarian State, she had the will but not the power to vindicate the right and to punish the wrong. Diplomacy has exhausted concession. The refusal by Russia of the terms offered at Vienna ought to be a proof that further negotiation would be a sacrifice of dignity and honour, unless the demand for negotiation came from the Power whose ambition produced the conflict. In that case, negotiation and battle might go hand-in-hand, without intermission of effort; but in every other, a consent to further negotiation would be a confession of weakness and a moral defeat.

Let ministers and diplomatists look well before them. We are not a nation of cravens. We are not demoralised by the spirit of commerce, or utterly degraded by the genius of "slop" and of "Devil's dust"; though it is but too palpably true that forty years of peace have subjected us too greatly to these influences. If further sacrifices are to be made, the nation will be ready to make them. All that it demands are honesty and decision in its rulers, and the prosecution of the war by the ablest heads and the strongest hands that the country can offer. It has no fear of the result. It is not discouraged; though it is doubtless exasperated by the mismanagement that has been disclosed, and by the

THE BALACLAVA RAILWAY. THE BAZAAR AT KADIKOI. (SEE NEXT PAGE)

suicidal nepotism displayed in the appointment to high and responsible office by Whig and Tory Administrations. When it recalls the history of the war as far as it has yet gone, it finds nothing to look back upon but Victory—dearly bought, it is true, but still Victory—and Glory. It finds its enemy humbled, crippled, and impoverished; it finds the sympathy and sentiment of all civilised nations upon its side; it finds itself in close and enthusiastic alliance with the only other nation in the world that can claim to be as great and as civilised as itself—and whose alliance is of itself worth a thousand times all that the war has yet, or is ever likely to cost us: it finds that it has, *ad interim*, erased its enemy from the list of Maritime Powers—that it has beaten the Russian armies in every encounter which they have dared to accept; that it has invaded and kept possession of the Russian territory; and that it is gradually approaching nearer and nearer to the triumphant completion of the difficult, but not impossible, achievement—the capture and destruction of one of the strongest fortresses in the world, with the existence of which all future peace is illusory and uncertain. And all this, and much more, the two Allies, without the overt aid of hesitating Austria, have been able to effect; and without putting forth a hundredth part of their strength. And is this the time to talk of peace on any terms but those of the surrender of the enemy? If there are any friends of such a peace in the Government of this country, they are traitors to the national cause. Let them come out of the Camp and the Council-chamber. The public heart is sound in this business. It does not complain of the war, but applauds it. What it complains of is mismanagement. If to mismanagement there be added treachery, there will be many things besides the conduct of the war which will come under revision on that fearful day of reckoning which is certain to come, and equally certain to be unsparing.

THE BALACLAVA AND SEBASTOPOL RAILWAY.

The following excellent *résumé* of the operations of the Railway and description of the country are taken from a report addressed to Messrs. Peto and Brassey by their chief engineer. It may not be out of place here to state that Lord Raglan has taken a great interest in the energy and skill of Mr. Beatty that he directed Mr. Romaine, who is acting (honorarily) as secretary to the Railway Board, to write that gentleman a letter, expressing his Lordship's high sense of his services:

What strikes a new comer most on his arrival here is the immense extent of country covered by the Allied forces. From Balaclava to the extreme right is about nine miles inside the intrenchments, and the length of defence and attacking works is over sixteen miles; so that, instead of being a contracted against a certain point, it is a series of detached batteries against batteries. I mention this to show that a few miles of rails are soon swallowed up in attempting to give railway accommodation to the army.

The whole is composed of lime and sandstone, covered, except where the limestone crops out, with a light, rich, luxuriant soil, varying from twelve to eighteen inches deep, over the surface, which works into a heavy and tenacious mud after rain. The whole face of the country changes after twelve hours' rain from a good hard surface to worse than a newly-ploughed field.

The line commences from both sides of the harbour, and proceeds direct up the valley to Kadikoi, where it turns sharp to the west, round the foot of the hill on which is placed the Sailors' Hospital, and through the French Camp, thence along the side of the hills to the Flagstaff at top of the plateau, and about half a mile from the quarters. The line then crosses the fourth, and proceeds direct to the Woronzow road; this is about seven miles from Balaclava. There is also a branch about one mile long to accommodate the Third and Fourth Divisions and left siege-train. Before the navvies arrived Lord Raglan placed at my disposal 200 soldiers of the 39th Regiment, who were employed in collecting stones from the several old buildings and walls between Balaclava and Kadikoi; these were loaded on the side of the Railway, to form a base for the rails; and very well they have noted. After twenty-four hours of the heaviest rain I ever saw, the portion of the line on which these stones were placed, with a sprinkling of ballast over them, remained uninjured; whereas the whole surface of the Camp was next door to impassable. We have also been so far fortunate as to find a large bed of serviceable stone to the Camp, which has been of great service in making the road travellable over the soft valley as far as Kadikoi and elsewhere, where we had not sufficient stones to form a base.

Beyond Kadikoi there is no ballast, except what comes out of the cuttings, which are in sandstone rock, soft at top, but about six feet down it becomes very hard and compact. Between the French Camp and the Flagstaff there are a few small excavations, unavoidable from the nature of the ground, [illegible] to get out, were avoid[illegible] travel) on the surface. [illegible] tenacious and deep mud.

From the Flagstaff to the Woronzow road the line follows the surface for upwards of a mile. There are a few small cuttings (sandstone) necessary, from the nature of the ground in this portion; but they will be soon out and ready for laying the road through as soon as the material is advanced that far. The branch to siege train will also be [illegible] surface.

As regards the labour furnished by the army, I mentioned that 150 men of the 39th Regiment (afterwards increased to 200) had been placed at my disposal for a short time (from the 27th of January to the 6th of February); they were of the greatest assistance, as far as they went, in forming the line, and were becoming very fair navvies, but, unfortunately were removed before they had time to be of much real benefit to us. I took great interest in these men; the officers seemed to take a pride in their work, and I was almost in despair when they were taken away.

Two hundred Croatians were given me on the 1st of February; they were at first literally useless, except as beasts of burden, and were only employed in carrying stones for the road. The want of interpreters who could speak English was also a great loss to us at first; however, by dint of perseverance, we have at last broken about thirty of them to handle the spade and shovel and the barrow. The remainder have been and are still engaged unloading the ships, for which they are extremely well qualified.

With the exception of these 200 Croats and 200 sailors lent by Captain Lushington for about ten days, we have had no assistance in labour from the army; indeed, the Quartermaster-General told me from the first that he could not spare any soldiers; and I do not believe he could. The amount of fatigue duty and work in the trenches had fully occupied every available man in the army; and I feel quite certain that General Airey, from whom I have always received the greatest kindness, would have willingly afforded me military aid if he could; but the truth was, until we began to convey goods by rail, and relieve the army of their daily trudge into Balaclava, the trenches were not half manned. From Balaclava to the summit the line has been completed some time; now it is comparatively down hill, and the labour of transport is reduced to one more nothing. To give one instance—three horses will now take thirty 13-inch shells from our dépôt at head-quarters to the advanced trenches in one day; before it was as much as ever they could manage, when the weather was fine, to take six 13-inch shells from Balaclava to the siege train.

The railway was commenced on the 8th of February by the navvies; it conveyed commissariat stores to Kadikoi on the 23rd; and on the 26th of March it conveyed shot and shell to the summit at head-quarters, four miles and a half from Balaclava, which, with the Diamond Wharf branch and the double line from Balaclava to Kadikoi, makes upwards of seven miles of rail laid down in less than seven weeks; and now I approach the most important question of the whole—What has the railway done, and what is it calculated to do?

First, I will state what the stores to be sent up to the front daily, as furnished by the Commissariat officer, Mr. Bailey. This is exclusive of the Highland Brigade or cavalry, who have long since made use of the line for getting up their stores.

"*Mem.*—Daily supply of provisions for the front.—	lbs.
Biscuit, 300 bags, 112lb. each	33,600
Salt meat, 100 casks, 450 lb each	45,000
Groceries and extras—say	30,000
Corn—say 500 bags, 150 lb. each	75,000
Hay, 120 bales, 150 lb. each	18,000
Fuel—wood and charcoal —say	45,000
Total	246,600

"Say 111 tons daily.

"W. BAILEY."

On the night that railway has taken up, as nearly as can be, 1000 tons of [illegible] shot, 300 tons of small arms, 3,500 tons of Commissariat stores [illegible] upwards of 1000 tons of miscellaneous—viz., [illegible] Quartermaster-General's stores, &c.

The biscuit, salt meat, and groceries Commissary General Filder has not had the arrangements about issuing at head-quarters as yet I have volunteered, time after time, to take everything up for the Commissariat, and at one time it was settled ever thing should go by rail, but this was countermanded. The Commissariat have now at their disposal every day thirty waggons or more, and these might be filled on the average twice a day, sufficient to take up everything in the shape of stores; but the Commissariat men will not work before eight in the morning nor after half-past five in the evening, and the Commissary-General does not seem disposed to take any steps, by inducing them to work later in the evening or earlier in the morning, to make any further use of the railway—in fact, he will not put himself out of the way one step to forward the comfort of the army, as far as the railway is concerned. Lord Raglan is, I believe, quite aware of this, and has strongly urged him to the point, but he is impoveable; so that, as regards the food of the men, unless the divisions send down men, and draw their own rations at Balaclava, and get them up by rail on their own account, the Commissary-General will not assist them.

In addition to the amount stated above, we have taken up all the railway materials for extending the line, forage, Commissariat huts for our own people, fuel for engine, &c.; and this, until the arrival of the 65 [illegible] per the *City of Norwich*, was all done by 35 of our own horses and a Commissariat mule; so that if the success of the railway has not come up to your expectations at home, it is not owing to any want of labour or energy on the part of the expedition; but, in addition to what has been done in reality, it has had an incalculably good moral effect on the army. It has shown them that everything that can possibly be done to assist them and lighten their labour will be done. It has enabled the siege to open again by the immense quantity of shot and ammunition it has got up. It has relieved the artillery horses of the killing journey up hill from Balaclava to the Camp, and enabled them to pick up their condition, which was deplorable in the extreme. It has—I say it without hesitation—been the means of clearing Balaclava of the wretched and filthy Turks who possessed the place and made it a perfect pesthouse, and, by the example afforded by the navvies, has shown the army how to work; and I am convinced that 50 soldiers will do more than double the number would two months ago.

Now, as to what it is likely to do:—It will show the army that there are other and better means of transport than ordinary roads; that, without infringing on the prerogative of military men, they may yet derive some assistance from the skill and science of civilians; that a railway—one of the most important means of transport—can be laid over an ordinary country as easily and quickly as a common road; that an immense amount of tonnage can be removed in one-fifth of the time required on common roads.

I am happy to say that the Royal Engineers are very friendly. I have been of some assistance to them in furnishing them with timber for their gun platforms and other purposes, and they reciprocate this accommodation by giving me every information and assistance they can. Indeed, I may say that every department works cordially with us.

Colonel M'Murdo is organising the Turkish service into an efficient corps, and I find him a good and energetic man of business.

Now, with regard to the men to be sent home. It will require nearly all the navvies to work the line. There must be a breaksman to each waggon; then we must furnish drivers for the mules supplied by the Land Transport Corps; the remainder will be barely sufficient to maintain the road—in fact, I do not think that a single good navvy can be sent home. The carpenters and smiths are fully occupied, and had I double the number they would not meet the requirements of the army and the expedition. The only men I can dispense with for some time are the masons, a few of the miners might also go home; but they are a very useful class of men out here, where the whole country is rock, and the majority of them can always be advantageously employed in quarrying stone to the Lucknlins. Before the *Prince of Wales* leaves with Capt. Raymond matters may take a different turn, but at present I certainly do not see that we can spare many men without seriously crippling the resources of the expedition. Captain Raymond has received positive order from Captain Andrews to send home all the ships, except the *Levant* and *Fox Humboldt*. These are to remain for the future as a very handy ship for our purposes, and may yet be exceedingly useful.

P.S. Since writing the above I have just learnt that Commissary General Filder has received a positive order to establish an issue department at head quarters, and we take up stores to-morrow.

THE ENGLISH BURYING-GROUND [illegible] Colonel Egerton, Captain Lempriere, and four soldiers of the 97th Regiment, all of whom were killed in the last attack on the 8th ult., were interred a little after 10 a.m. [illegible]. Lord Raglan, and a very numerous assemblage of Staff and other officers, attended the funeral. They were buried in a gentle declivity, which [illegible] in front of the land [illegible] once [illegible] Mamelon. From Wardsmoff road to Sebastopol skirts the burying-[illegible] stone marks the distance—five yards—from the [illegible] picket-house, which is seen so often spoken of, a little [illegible]. Formerly the ground [illegible] as part of the Camp took place in [illegible] end of the encampment, but many objections to this site were discovered, [illegible] selected. The ground is not enclosed, [illegible] ... ones till the names of some of the English soldiers [illegible]. There are nearly a hundred graves here. Nothing can exceed in beauty the magnificent prospect which opens in the rear as [illegible] as there that, on a clear day, [illegible] spending the fall from the [illegible], a traveller approaching [illegible] would first perceive the city and roadstead of Sebastopol. Then the feet of the spectator, like a map spread out before him, will [illegible] north side and a vast expanse of [illegible] complete [illegible] and its lighthouse, the longline of ships off [illegible] mouth to the sentry ships on watch before the mouth of the [illegible]. Then the French and Genoese camps [illegible] all visible at a glance. When there were vineyards and groves in the valleys, and flocks and herds grazing on the hills, and ships gliding in and out of the roadstead, the prospect must have indeed charming—one of the finest in the world. Now, the several lines dividing the besiegers and besieged—the barriers closing the harbour—the lifeless ships, prisoners in their own port—the ground furrowed by shells, with the sleigh of duty, that those who had been [illegible] encampments, French, English, and Russian—the wreaths of smoke from many batteries, and the booming of the guns—all these awaken far different emotions than could have been excited by the more peaceful prospect of former days. Agriculture and the arts of peace have fled, and yielded place to rough war. And here was some of war's hard work. Never were nobler hearts, never worthier soldiers, even in the [illegible] sphere of duty, than those who had been [illegible] down in the midst [illegible], and who are now finding their last resting-place on this spot. We [illegible] strange feelings, and works wonderful changes in men, even [illegible] day the sudden transition from life to death is seen, and at last the sight fails to produce even a passing agitation in the spirit of the beholder; but there were few, among the many who testified by their presence to the worth of the dead, who were not [illegible] with deep emotion as they heard the solemn words of the sacred service—"dust to dust" and who saw the grave cover all that remained of the gallant Colonel Egerton and the brave soldiers on his side.—*Letter from the Camp, April 24.*

TRIAL AND SENTENCE OF PIANORI. The trial of Pianori, the regicide, took place on Monday. The court was very full. The most crowded part was the space behind the bench, where official personages and the personal friends of the judges gathered in great numbers when the business of the sitting room. A remarkable novelty in the physiognomy of the court was the absence of [illegible] ades. The President of the present assizes, M. Partarieu Lafosse, with them in vests of purple velvet, and the procession was a comi[illegible] [illegible]eat and solemn occasion presenting the appearance [illegible] [illegible]ight; and, to the bitter disappointment of many hundreds [illegible] excluded to have no room in court. The trial was very brief. [illegible] the material facts, as stated in the *acte d'accusation*, were conclusively proved. The prisoner did not attempt to deny them. Although it was quite clear that he [illegible] the whole transaction, he refused to answer any questions. He gave [illegible] to be his judges regarding the main facts. He admitted he fired his double-barrelled pistol at the Emperor. He could not be sure whether he fired the second barrel, or whether it went off by accident. But he readily admitted that he had fired once. He denied that when he was seized another pistol was found in his hand. Both the others were, he said, in his pocke[illegible]. Two witnesses, however, swore positively that he had drawn the pistol, and was about to fire a third shot, when he was [illegible]. The most important fact that came out at the trial, beyond what is stated in the indictment, was that Pianori is a native of Romagna, and has been eight years in the galleys. The President read from the bench two telegraphic despatches from the French Chargé d'Affaires at Rome, the first of which is as follows:—"Pianori Senezzo, alias *Brizzi* Ghellino, aged twenty-two years, was condemned to the galleys for life for a political assassination in Servia, in 1852. He took refuge in Genoa. He has often returned to this country to commit fresh crimes." The second despatch is as follows:—"Rome, January 1, 1855. Pianori is a Romagnole. The jury returned forty-two questions, and returned a verdict of Guilty. The Court sentenced the prisoner to die the death of a parricide. Pianori retired with the gendarmes without betraying the slightest trepidation. A parricide" is led to the guillotine barefooted, in a black veil, and his right hand is cut off previous to his execution.

The French Minister of Commerce and Public Works has appointed a commission, composed of twenty-four members, presided over by him, and in his absence by Baron C. Dupin, charged to draw out a programme of questions to be submitted to the international Statistical Congress, which is to assemble in Paris this summer.

A funeral service for the anniversary of the death of the Emperor Napoleon I. was celebrated on Sunday, at the chapel of the Tuileries, at which the Emperor and Empress, Prince Napoleon, Princess Mathilde, the high officers of the Imperial Households, several of the Ministers, and some members of the Corps Diplomatique, were present.

THE PARIS UNIVERSAL EXHIBITION.

(From our Special Correspondent.)

PARIS, May 9.

SINCE I last wrote to you, the unexpected postponement of the Exhibition has astonished all people connected with it. I was in the Palais de l'Industrie in the afternoon of the 27th ult.: and, although the postponement had been that day determined upon, and the decree signed by the Emperor, nobody had any idea that it was even contemplated. I had seen the Secretary to the Imperial Commission, who talked of the opening for the 1st of May, and of the necessity of closing on the morrow for "five or six days." On the morning of the 28th the vigour of the exhibitors had sensibly slackened. The incitement to extraordinary labours, to overwork, &c., was gone. But, on the following Monday everybody appeared to have arrived at the conclusion that it would be no easy matter to finish, even by the 15th, and had set again to work vigorously. The ten days which have elapsed since this time have sufficed to produce great changes; and, with a moderate exercise of the imaginative faculties, the explorer may now realise the idea of the effect that is to burst upon Paris (or rather that section of Paris to which 50 francs are a trifle) next Tuesday. For I am positively assured that, as the tumbler says to his ring of spectators, "this time there will be no mistake." The Imperial Commissioners have even asked the English Commissioners to leave part of their gallery space unoccupied till the 16th inst., that 300 musicians may occupy it on the 15th. An address is to be read to the Emperor by Prince Napoleon, some music is to be heard, and the Paris Universal Exhibition is to be declared thereupon—opened! This is the description of the ceremony I have heard from the English authorities here, and I have every reason to believe that it is correct, up to the present time. But between this date and the 15th, the order may be changed. It may even be thought advisable to imitate the procession down the Nave, as formed in 1851 in the Hyde-park Building. I expect that the ceremony will be short, for the English authorities, including Mr. Henry Cole, Dr. Playfair, Mr. Redgrave, &c., were presented to the Emperor on Sunday last, in company with a group of other foreign Exhibition Commissioners.

The principal objects destined for the Nave are already placed, or they are in course of settlement. Our Astronomer Royal's circle and the great naval trophy are advanced. Some groups of French sculpture, and some sculptured altars, are also arranged in the eastern half of the Nave, together with two lighthouse lanterns. The colossal eagle which I noticed four or five weeks ago in the Sculpture-room of the Fine Art Building is in this Nave; also a group, by Cain, representing an eagle and a vulture devouring the remains of a crocodile, and a falling angel a daring conception—finely executed by Ferrat.

In the western half of the Nave I have already noticed some beautiful church ornaments, carved in wood, from Belgium; a large model of a steam-vessel; some German plastic ornaments for churches, some ceramic manufactures, effectively grouped; a splendid bookcase from Bordeaux; and the gorgeous stalls, supported by claret velvet pillars, relieved by plastic figures lightly gilt, of the Zollverein. The Bordeaux bookcase is, perhaps, the finest piece of furniture yet in the Building. In front of it, in full relief, are four boldly-designed figures representing the four quarters of the world; and at one side there is a veiled figure exquisitely carved. The Germans have also displayed some china chandeliers, that look like beautiful pendent flowers. In the English Gallery space Dr. Royal and Mr. Digby Wyatt are pushing forward the arrangement of the Indian collection. The gay Eastern tent is up; and the Bazaar—a faithful copy of Indian architecture—is in an advanced state. The Empress spent some time in this department last Saturday, and is said to have been much amused with the wonderful collection of Indian products which the Hon. East India Company have gathered from the provinces of our Eastern empire. The [illegible] photographs are nearly all arranged, and they will do infinite credit to the professors who have contributed. Mr Thurston Thompson's [illegible] drawing from the Royal collection at Windsor [illegible] the most remarkable, the most dangerous copies of priceless treasures that have yet been produced by means of the photographic process. Hereabouts Hanhart, and Baxter, and others, have already [illegible] their coloured engravings and chromo-lithographs. Mr. Digby [illegible] has covered his allotted space with a variety of designs contributed by him to various periodicals.

In the north eastern part of the Building, on the ground floor, the French have considerable space devoted to piano ornamentation. They [illegible] nearly filling it. [illegible] on-pierre. Their gallery space is [illegible] Lyons cases, the western corner [illegible] [illegible] ...ticks, cocoons, &c. At this end of [illegible] begins: at present furniture appears to be the prin[illegible] distribution of our phlegmatic friends. The Zollverein Gallery stalls are mostly finished. Some are even laid out, and covered carefully up till the opening. The Belgian section of the galleries is also in a very advanced state. Here are some excellent photographs from Brussels; some [illegible] from the same city; and not far off stands a Berlin-wool trophy of impressive height.

The American space, both on the ground floor and in the gallery, is [illegible] uncovered, yet I hear there are eight American Commissioners [illegible] after one hundred exhibitors—facetious gentlemen reverse these [illegible].

The Machinery Gallery is still in a backward state; and it is not presumed that it will be ready for public inspection before the 1st of June. I doubt whether even on that day the machinery will be in motion. The flooring has been so terribly damaged by the heavy packages that it is almost impossible to walk upon it. The floor of the Palace is also in a [illegible] condition.

The Committee-rooms and the Galle[illegible] are [illegible] being rapidly completed; [illegible] the latter is expected [illegible] that refreshment-stalls are to be loaded with bales and grosse[illegible] on the 15th.

The prizes are a mere question of form. It would be useless to anticipate the verdicts that are to be solemnly passed on the relative merits of the Western European schools; but I may inform your readers that our English [illegible] by astonished our neighbours. They are [illegible] and small landscapes generally are not fogs. I hear that Mulready hits the taste of the Parisian amateurs most completely. Many people are curious to hear what they will have to say about Millais' "Ophelia," and the pre-Raphaelite school generally. I fear they will hastily condemn all that is not shaped in the school of David—all that is not based upon rules painted in black letter! Few will be familiar with the subjects treated. But we have not long to wait. In a few days the Parisian critics will be busy with the art of all nations. May our artistic pen[illegible] [illegible] [illegible].

THE RIFLE-PITS.—The capture of these ambuscades has been [illegible] of great value, not only on account of the removal of an impediment to the progress of our sap in this direction, and of the annoyance caused by the fire of the Russian riflemen against our countrymen, but also on account of the opportunity it has afforded our men of intercepting the Russian artillerymen in the Redan. The ambuscade first taken, and now connected with our trench, at present forms a miniature bastion, as it were, and from its loopholed wall, turned towards the enemy, our men discharge their missiles with impunity. The work is so close to the Redan, and in such a position, that its guns cannot be sufficiently depressed so as to bear against it. Some men of the 1st battalion of the Rifle Brigade have been also placed under cover on the opposite side of the left ravine—near to which, on the right, our zigzag is being formed—and have thus been brought to act in concert with the troops in the advanced portion. The united fire of these two bodies has for the present almost silenced the Redan: a gunner could not show himself near any of the embrasures but he was at once marked down, and the Russian artillerymen were compelled to close these openings. In turn the enemy is constructing another formidable cover for his riflemen, taking advantage in its formation of a large quarry a short way below the abattis which extends in front of the battery above. This work threatens to be strong and formidable. It assumes at present the appearance which would be given by a number of crescent-shaped ambuscades joined together at the free extremities of their parapets. It will give cover to a large body of riflemen, who will have the opportunity of throwing out a diverging fire of very considerable range. The part of the Redan-hill on which it is placed has a steep incline, which will add to the difficulty of dislodging the enemy from this situation.

ADMINISTRATIVE REFORM.

PUBLIC MEETING IN THE CITY.

A meeting of the merchants and traders of the metropolis was held at the London Tavern, Bishopsgate-street, on Saturday last, for the purpose of organising an association to promote a thorough reform in the various departments of the State. One o'clock was the hour appointed for commencing the proceedings; but shortly after twelve the room, and it is —estimated as capable of containing 1500 persons—was filled to overflowing, and so great was the anxiety manifested to be present that many hundred eager applicants for admittance, including several members of Parliament, could not be accommodated. In this state of things the conductors of the movement, with great promptitude and tact, extemporised arrangements for the simultaneous holding elsewhere of a supplemental meeting on the same subject, and the use of the Guildhall having been readily granted by the Lord Mayor for that object, a medium was supplied for the expression of a large portion of the popular feeling which must otherwise have been stifled. On and about the platform at the London Tavern were Messrs. J. I. Travers, J. D Fowles, S. Morley, J. P. Gassiot, W. Tite, M.P., J. Hall, Jun., Hutchinson, W. S. Lindsay, M.P.; Norman Wilkinson, F. Bennoch, Samuel Baker, George Bishop, jun.; Johnstone Neale, Captain Seobell, M.P.; Bruyn, M.P.; Colonel Reed, M.P.; Mr. F. Smith, M.P.; Mr. Maguire, M.P.; Mr. Murrough, M.P.; Mr. Swift, M.P.; Mr. Duffy, M.P.; Mr. Oliveira, M.P., &c.

Shortly before one o'clock, on the motion of Mr. J. I. Travers, Mr. Samuel Morley was voted to the chair In introducing the business, he said, he had come there because he honestly feared that we were drifting into that state which, if unchecked, must land us in revolution, and because, in all seriousness, he had no taint in order [illegible] founded on contentment; and he for one was [illegible] peace," when he felt that there ought to be no peace [illegible] had been made to show that this movement was a mere [illegible] affair; but they would show that it was something more serious. They aimed to see the public business of the country conducted in an efficient manner. They had been accused of a wish to attack the aristocracy; but there need be no alarm on that head in a country like England, where the great mass of the people are so much attached to the aristocracy. The meeting had not been called to discuss the war, upon the wisdom or justice of which he would not pronounce. Their sole object was to obtain a reform of the present system of Government

Mr. J. I. Travers proposed the first resolution:—

That the disasters to which the country has been subjected in the conduct of the present war [illegible] attributable to the inefficient and pernicious mismanagement of the various departments of the State, and urgently demand a thorough change in the administrative system

He believed that the country, from one end of it to the other, would endorse the moderate expression of opinion embodied in this resolution. They did not require to look for evidence of the inefficiency and irresponsibility of the Government from without. There was not a living statesman who had not repeatedly in his speeches acknowledged the existence of those evils. It had been asserted that the supporters of that meeting were making an attempt at revolution; but the person who seriously brought such an accusation against [illegible] and traders, whose property was like a [illegible] on the hill side, and dependent for its safety on the maintenance of law and order, must be no less than a perfect madman. (Cheers.) Then, again, it was said, their desire was to subvert the existing Government. Their object, however, was too great for them to condescend to attack any particular Government or individual in the pursuit of it. They did not blame individuals for the inherent vices of the system; but, on the contrary, would admit that many of those on whom public odium had been cast most unmeasurably had had the best intentions, and had only failed from want of [illegible] from the impossibility of adapting the system to the exigencies of the moment. The real fault of the present system attached to the [illegible] who upheld its continuance. [illegible] convene the movement that, in every constituency of the country, [illegible] was a body of voters on the register who always remained unpolled, and who had it in their power, if they chose to exert themselves at the election, to make even the present representation of the people available for immediate purposes (Hear, hear); and it was therefore the duty of the city of London, the centre and metropolis of the country's activity, to [illegible] to the favour to rouse the middle classes to a due sense of their [illegible] to the present crisis

Mr. [illegible] seconded the resolution; and entered into a long [illegible] to [illegible] Government of 1809 [illegible] and who might have been [illegible] which the offer was received

Mr. J. D Fowles had great satisfaction in supporting the resolution The country at the present moment felt itself humiliated and degraded at home and depreciated abroad—not because its resources were impaired, or that there was any want of that patriotism which had always been a distinguished element in the British character, but because its resources had been squandered, and [illegible] tion. They must apply a remedy, constitutional and [illegible] effective, to the present state of things. [illegible] and no particular Government, but an imperfect system [illegible] (Hear, hear). The middle classes knew something of [illegible] business ought to be conducted; and, although they could not profess to be great diplomatists, or to understand all parts of the machinery of the State, they could judge of such matters as the mis-e transports, the supply of stores, the regularity with which [illegible] arrived, and they could see that there was a lamentable want of foresight in quarters where it ought not to exist

Mr. W. Lindsay, M.P., moved the following resolution:—

That the true remedy for the [illegible] has caused so lamentable a sacrifice of life and [illegible] introduction of enlarged experience and practical ability into the service of the State; that the statesmen of those who possess in a high degree the practical qualities necessary for the direction of affairs in a great and free country is a reflection upon its intelligence and a betrayal of its interests; that, while we disclaim every desire of excluding the aristocratic classes from participation in the councils of the Co[illegible] we feel it our duty to protest against the pretensions of any section of the community to monopolise the functions of administration

After stating that he should have preferred remaining a silent looker-on, the honourable gentleman went on to say that this was no party movement, as they would see from the fact that Mr. Fowles and himself were speaking from the same platform; it was a movement in which both Conservatives and Liberals joined (Hear, hear). All parties felt the necessity of a change; they all felt that they must have a thorough administrative reform that they must see whether the Government of this country could not be made to keep pace with the progress of the times generally. Men of business thought it strange that, while they were able to span England with gigantic undertakings, to construct railways, to tunnel through mountains, to send their ships to every part of the world, the harbingers of peace, civilisation, and Christianity, while they had made England what she was (for to whom did England owe her greatness but to her merchants and her people?), there should be raised her to the high position she justly held among other nations, those who pretended to govern them were not able to manage the affairs of the country. It was said that this movement was unconstitutional. It was constitutional; and it was those men who held office under the Crown and abused their sacred trust by giving appointments to particular individuals simply because they were their own relations, who were really acting unconstitutionally (Hear, hear). The merchants and traders of the city of London had no desire or intention to assail the Constitution—they had too much at stake for that. They deeply respected the Constitution, and they ardently loved their gracious Sovereign, who was the embodiment of every grace and the pattern of every virtue (cheers); but they were determined to make the Ministers adhere to the true constitution and maintain the dignity and honour of these realms (Hear, hear). A circumstance occurred to him six months ago, which he had never mentioned before but he would do so now because he felt it to be a duty. He would have had nothing personally to gain by the transfer of his services from Austin-friars to Whitehall or Downing-street, and nothing would ever induce him to accept office but the feeling that he might be of service to his country. Well, six months ago he saw Sir J Graham, and observed to him that those connected with our sea transport appeared to have no books, no order, and no system they did not seem to know what they were about, and could not tell how they were loading goods, or where they were carrying them to. "Now," he continued, addressing the right hon. Baronet, "I don't wish my name to appear at all in the matter; but will you just allow me to leave Austin-friars and come to the Admiralty for a week; and if you do not have the aid of some good men in that department, I will see whether I cannot give you a thorough set of books to start with (Cheers). Allow me," he still went on, "to go down to Deptford for you, and see what books you have got there, and I shall be more capable to make up books, no order, and is not only money that is concerned; but, unless you have a proper machinery in working order, the war cannot be conducted as it ought to be. Unless our men are fed, clothed, and sheltered, we cannot expect them to fight. Any suggestions that I may make, you, Sir James, may bring out as your own in Parliament, for I have no desire to be known in connexion with them." Well, in answer to all this, Sir James Graham thanked him very kindly for his offer, and heartily shook hands with him; but he (Mr. Lindsay) must say that he had never heard anything more about the subject from that day to this (Hear, hear). No doubt, after he withdrew, the right hon. Baronet went and consulted the Right Hon. Lord Redlynge or the Hon. Mr. Peter Dick on the matter, and they advised him that it would never do to take the opinion of a mere City man on such a question (Cheers) Now, without any great egotism, he (Mr. Lindsay) had no hesitation in saying that he would in a week have set on foot such a method and system as would have saved the country at least one out of the two millions that had been thrown away in sheer waste on the transport service (Hear, hear). It had been said at the West-end that that meeting would be a mere flash in the pan, ending in nothing. Now, he would tell these good people and it would go forth to them very speedily —that it would be no such thing as a simple flash in the pan that such business men as their excellent chairman and Mr. Travers, and many others of their class then present, would have left their desks for the pleasure of indulging in mere vain and idle talk. They would go about this matter like men of business, which they were, and not pause or rest until they had carried out with success what they deemed to be necessary (Hear, hear). At that meeting a committee would be formed, which would meet *instanter*, and whose business it would be to transmit the resolutions now to be adopted to every borough in the kingdom returning a member to Parliament Each member of the Committee had some correspondents or other—some man of substance, with a stake in the country, and having, consequently, consequently to lose—in every such borough; and these parties, if they approved the resolutions, would be invited to call public meetings in their respective towns to discuss them; and then, at those meetings, subcommittees, acting in concert with the central body, could be formed, so that the originators of this movement would speedily have their representatives in every Parliamentary borough in the kingdom.

This resolution (which was seconded by Mr. Bennoch, and supported by Mr. Johnstone Neale) was carried unanimously.

Mr. W. Tite moved (Mr. Baird and last resolution:—

That an association be now formed to promote, by all constitutional means, the attainment of administrative reform. That the association be called the Administrative Reform Association, and that the following gentlemen, with power to add to their number, be appointed the committee, to collect funds, to prepare an address to the constituencies of the United Kingdom, and generally to carry out the objects of the association:—Messrs. F. Bennoch, C. Bishop, jun., R. Crawfurd, J. B Gassiot, J. Hutchinson, W. J. Hall, M'Gregor Laird, Samuel Lang, W. S. Lindsay, W. T. M'Coll[illegible], S. Morley, R B Moore, H. L. Morgan, W. L. Ogilvy, J. D. Fowles, J. I. Travers, N. Wilkinson, J. G. Fr[illegible], S. Amory, W. Lister, W. Tite, D. Nicol, J. Collett, S. Baker, B. Smith, jun., and B. Oliveira

The resolution was also carried *nem. con.* The Chairman announced, as a proof of the earnest and sincere character of the movement that twenty-five gentlemen in the room had already put down their names for a subscription of £100 each.

ST. PANCRAS.—At a special meeting of the ratepayers, convened by the Representative Vestry, held in the Court-house, Kingsroad, Camden-town, on Monday (Mr. Churchwarden Farrer in the chair), it was resolved:—"That this meeting, cordially approving of the great and important movement commenced in the City of London on Saturday last, in reference to Administrative Reform, feels it desirable that an opportunity should be afforded to every constituency in the kingdom to express its opinion upon that momentous question at the present crisis, and therefore respectfully requests the vestry of St. Pancras to grant the use of the Vestry-hall for the purpose of holding a borough meeting on Monday evening, the 21st of May inst., and that the members for the borough be invited to attend."

BIRMINGHAM.—A requisition to the Mayor of Birmingham is in course of signature, requesting his worship to call a town's meeting, for the purpose of considering the propriety of co-operating with the Metropolitan movement in furtherance of administrative reform. Already the requisition is numerously and respectably signed.

MANCHESTER. An early public meeting is to be called at Manchester on this subject.

NORWICH.—A public meeting is to be held in Norwich on an early day, with a view to arrangements for co-operating with the London Administrative Reform Association

LIVERPOOL. An initiatory meeting of the reformers of this town was held at the Clarendon-rooms on Saturday last, to take into consideration the advisability of petitioning Parliament in aid of administrative reform. The meeting was adjourned until Wednesday. It said that the Conservatives of the town are preparing a requisition to the Mayor, praying him to call a public meeting on the same subject.

DEFEAT OF THE PRO RUSSIAN PARTY AT LEEDS.—On Monday evening last Mr. George Thompson attended a large meeting at Leeds, for the purpose of [illegible] upon the present war. In a speech of two hours long he [illegible] that the people of England are profoundly ignorant of the cause and origin of the present war; that it is a war really originated with France, in the demands made by that Power in respect to the Holy Places; that Turkey had throughout acted with duplicity, fair and temperate; that Russia had never demanded anything more than that Power was justified to by readers; that the conduct of Russia had been moderate in the extreme; that the Ring-dom had proved Russia to be right, and Turkey wrong; that from the first English and French diplomatists had protested against the conduct of Turkey, and praised that of Russia; and that England and France had not the shadow of a right to be [illegible] closing war against Russia. Several speakers replied to the arguments of the lecturer, explained the aggressive and despotic policy of Russia, whose territorial aggrandisement [illegible] was essential to the freedom of Western Europe to arrest. A [illegible] of his speech, [illegible] was carried [illegible] To this [illegible] England declaring [illegible] Russia is just and [illegible] to be pro[illegible] whose [illegible] a matter [illegible] aggression on the part of Russia [illegible] carried. To this [illegible] England declaring [illegible] That this meeting [illegible] the calamitous loss of life which has attended [illegible] war, which [illegible] urge our Government the duty of employing their utmost efforts to promote the conclusion of an honourable and permanent peace [illegible] session of four hours, and at last past eleven o'clock at night, the original [illegible] for a vigorous prosecution of the war was carried by a decisive majority.

DARING ATTACK BY ROBBERS IN OPEN DAY. ON Saturday last [illegible] daring attempt was made, in the broad day-light, to rob the Leeds [illegible] bank in Wentworth-park, within a short distance of a residence where [illegible] were several persons at the time of the outrage. The persons attacked were Robert Myers, a groom, and Charles Bury, a stable-boy, both in the employment of Messrs. Dawes and Co., of the Milton ironworks. It is the duty of these men to go to Rotherham every Saturday morning, where they obtain [illegible] the branch of the Sheffield and Rotherham bank) sufficient money [illegible] the wages of the men at the works, and return with it the same afternoon which they thus carry from Rotherham to the Milton works [illegible] considerable amount. No doubt the circumstance of these periodical journeys had become generally known; and the men who made the [illegible] were incited by the hope of obtaining a handsome booty. Last Saturday morning Myers and Bury went as usual on a dog-cart to the bank in Rotherham, where they obtained £800, one-half in gold and the other half in Bank of England notes. They deposited the money in a large leather bag, which they placed underneath the hind part of the dog-cart, and proceeded to drive back to Milton. In passing between twelve and one o'clock in the afternoon through Wentworth-park, they saw two men emerge from a plantation in advance of the vehicle, and station themselves one on each side of the road Their appearance was rather suspicious; but the men in the dog-cart drove on, never dreaming that any person would venture upon an attack in open day, at the very entrance of the park. [illegible] Lion's lodge, which is only about 200 yards distant. When they reached the spot where the two men were standing one of them seized the bridle, and producing a pistol, threatened to [illegible] if the [illegible] was resisted. Both the men in the vehicle protested that they had [illegible] but the man with the pistol exclaimed, "[illegible] have, I know very well [illegible] Myers replied that [illegible] The man then presented the pistol at [illegible] who [illegible] the [illegible] and discharged Myers of [illegible] Myers [illegible] Bury with a [illegible] [illegible] [illegible]

ELECTRIC TELEGRAPH FROM THE CAMP BEFORE SEBASTOPOL TO LONDON.—LANDING AND CONNECTING THE WIRE CABLE AT CAPE KALIAKRA.

ELECTRIC TELEGRAPH FROM THE CRIMEA TO LONDON.

In our Journal of last week we detailed the operation of laying down the electric cable from near Varna to Balaclava, by which means we are now in daily receipt of intelligence from the Camp before Sebastopol. We then also gave a View of the Varna Station, at Cape Kaliakra; and a Correspondent now enables us to illustrate the operation more in detail in the accompany bird's-eye Sketch, by Dr J. Johnston, surgeon of the *Argus*. Our Correspondent writes from Balaclava, April 14th:—"We arrived here yesterday, having safely landed the telegraphic cable in the small bay called St. George's, where the Monastery so often spoken of is situated. As we were cautiously and slowly approaching the coast, during the previous night, we could see the flashing of the guns around Sebastopol, and occasionally we heard the booming of the heavier pieces of artillery." Of St. George's Bay and Monastery we also annex a view.

Of all the applications yet made of electro-telegraphic communication, the most striking is that just effected by the throwing of the longest submarine cable yet made, across the Black Sea, from near Varna to Balaclava, whence it has been further laid down not only to the head-quarters of our army, but to the very trenches before Sebastopol. In the *Builder* of last week it is remarked that "it would not now be difficult, by some little further novelty of invention, to cause the reverberation of the very cannons themselves, as it were, to be transmitted, in the shape of electric vibration, through the 1000 miles of intervening ware, and heard, in still continuous vibrations, finally communicated to some acoustic apparatus in the British Houses of Parliament." Such is the close co-relationship of forces, that this is literally perfectly possible; and, although it would not be precisely the sound of the cannons which our legislators would hear, it would actually be the vibratory reverberations of that very sound itself, for all sounds are vibratory forces, which reverberate into the electric interiors of material substances, and some recent experiments have curiously illustrated this very point in physical science. At all events, now, we are practically and at farthest only a trifle of time distant from Sebastopol, and there is no physical reason why the public should not know every morning, noon, and night, what is at these very times going on at the seat of war."

THE RUSSIAN ENGINEER TODLEBEN. The name of the head engineer at Sebastopol is Todleben. He is thirty-two years of age. His parents are poor shopkeepers at Riga. When the siege commenced, Prince Menschikoff, it is said, asked the then head engineer how long it would take to put the place in a state of defence. He answered "Two months." A young captain, named Todleben, stepped forward and said he would undertake to do it, if he had as many men as he required, in two weeks. He did it in twelve days, and was made Colonel. Since that time he has had the direction of everything in the way of building batteries, defences, &c. The other day the Grand Duke called upon his wife, who is residing in St. Petersburg, to congratulate her upon her husband's promotion, for he is now General and Aide-de-Camp to the Emperor.

MONASTERY OF ST. GEORGE, BALACLAVA.

THE BALTIC FLEET.—"THE ARCHER" IN THE ICE IN WINGO BAY.

THE BALTIC FLEET.—H.M.S. "ARCHER" IN THE ICE.

WE have to thank a Correspondent in the Baltic Fleet for the accompanying Sketch of the *Archer*, surrounded by the ice, at the entrance of Wingo Sound. The *Archer*, with the *Desperate* under her command, had the honour and good fortune to first enter the Baltic this spring, and has also taken the first two Russian prizes—viz., the *Phœnix* brig, laden with rye, and a small schooner laden with coals, both bound for the Libau. The *Archer* sailed with the Flying Squadron from Deal, and anchored at the mouth of Wingo Sound on the evening of the 31st March. She there got completely surrounded by the ice, which, at the entrance to the Sound, was considerably broken up, but was quite safe to walk on for miles. In the Sound itself the masts of many small ships could be seen over the low sand-hills which border it, and the ice had the appearance of being quite compact all through the Sound. To enable the reader to judge of the lateness of the winter this year, our Correspondent states that the *Archer* arrived at Wingo Sound on the same day last year as in the present, when she found the navigation quite free, and steamers plying up and down to Gottenburg. On proceeding to Elsinore, the drift of ice through the Sound was considered so dangerous that the Flying Squadron had to proceed to Landskrona, on the opposite side, where their reception was most enthusiastic, and where a grand ball was given to the officers. From Landskrona the *Archer* and *Desperate* were dispatched to the Baltic, which they had some difficulty in entering from the ice; but found some reward for their labours in capturing the first prizes of the season in the Baltic.

M. SOYER AT SCUTARI.

M. SOYER had the satisfaction to open his large kitchen on Easter Monday, in the Barrack Hospital of Scutari, in the presence of Lord William Paulet, Brigadier-General, and a numerous staff of military officers, besides a select company of ladies and gentlemen, who formed a jury for the purpose of testing the condiments prepared by him as new diet for the hospital patients. Amongst the visitors were the eminent medical officials from the different hospitals now established on the banks of the Bosphorus, of which there are no less than six. M. Soyer's success has far exceeded his highest anticipations, though prior to his departure from England he felt assured that he should be able to effect some good in the way of ameliorating the diet.

We give M. Soyer's plan in his own words:—

"On my arrival here I first visited, in company with Miss Nightingale, and one of the principal medical officers of this Hospital, all the store-rooms, cook-houses, small kitchens, and provision departments, to learn the rules, regulations, and allowances made by the authorities. Having been initiated upon these points, at a trifling expense I at once organised one of the Turkish kitchens, belonging to the Hospital Barracks. Instead of there being no appropriate kitchen, as was represented to me by several Government employés prior to my embarkation for the East, I found

M. SOYER'S HOSPITAL KITCHEN, AT SCUTARI BARRACKS.

room for culinary purposes, even upon the most extensive scale. I then prepared my bill of fare, according to the provisions allowed, which at all times are of an inferior quality. I carefully made my experiments by means of weights and measures, and produced samples of the different preparations forming the new diet. I next submitted these, with specimens of this and the other hospitals of the original diet administered, for public inspection; the result of the comparison of the two systems by tasting each article led his Lordship to write and present me with a testimonial, signed by the medical authorities, a copy of which I herewith enclose. I cannot conclude without returning my sincere thanks to the authorities and officials, who have all rendered me the utmost assistance in my undertaking; and most especially have I to express my gratitude to Miss Nightingale, who, from her extraordinary intelligence and good organisation in her kitchen, procured me the requisite materials for commencing, and thus saving at least a week's loss of time, as my model kitchen did not arrive till Saturday last.

"I have commenced supplying several of the wards, to the great satisfaction of my new guests; and purpose, in a few days introducing the system at the General Hospital, thence in the three institutions at Kullalee, under the care of Lady Stratford. Her Ladyship has likewise paid me several visits at the Barrack Hospital, being anxious that my new diet should be fully adopted at all the above establishments, and competent persons left behind me to carry out the system, which is at once simple and economical.

"P.S. As soon as possible I shall start for Balaclava, and from thence proceed to the Camp. I am now only waiting for my new model campstove, which is capable of cooking for 200 men every three hours."

The following is the letter referred to above:—

"Scutari Barrack Hospital Kitchen, April 9, 1855

I cannot leave the kitchen without expressing to M. Soyer how fully I approve of the good things he has made out of the usual provisions issued for the patients in the hospital; and I could not have believed that difference could have been produced by only arrangement and a really simple art of cooking, and a proper organisation of proportions. (Signed)

WM. PAULEY, Brigadier General Commandant Troops.

NOTES OF THE WEEK.

WHATEVER they may say at Brooke's (by-the-by, the fact that this once-celebrated Club have now but two candidates on their list, while the Travellers' or the Athenæum have their thousand or fifteen hundred aspirants, looks like one of those shadows which coming events throw before them) the meeting at the London Tavern, on Saturday last, was a serious sign of the times—a noteworthy mark of the present tendency of public opinion. It is true that the Barings, the Hutts, the Rothschilds were not present, any more than the representatives of the great metropolitan banking firms; but every one knows that the natural tactics of the leading men in any line or profession is not to originate a movement, but to keep themselves in a neutral position until it has acquired a certain impetus, when, without a risk of failure, they may answer to the call which is sure to be made to them, to head the rising party. There is no great gallantry in this course of action, but plenty of selfish, common-sensical discretion, which, as it is by no means forgotten in St. James's, is very sure to be remembered in Lothbury or Lombard-street. But many of the speakers, though of the second rank in City estimation, were such as would rank as merchant princes in any other country; and, even setting aside their financial position, there was that in what they said which should win respect from thoughtful hearers or readers. Here were set of men—merchants, stockbrokers, ship-owners, attorneys—assembled; none of them, assuredly, though there were several high Tories among them, had any aristocratic tendencies or connections; and the object of their assembling was to oppose a system, which, right or wrong, they believed to be of aristocratic foundation. Suppose a similar meeting anywhere but in England—or, indeed, anywhere almost in England except in the City of London—what a deal of treble-X illiberal declamation—of tirades about Lord This's game preserving—of Lord That's son in the Excise—of Lady So-and-so's exclusive dealing—with a sprinkling of references to the Gracchi, to Brutus, or to Washington one would have been compelled to hear! On the contrary, whether from being better informed or better tempered, the London traders on Saturday spoke of none of these things. With the exception of showing some amount of dislike for Lord Palmerston's light way of treating serious matters not, as his best friends will admit, altogether unreasonable—the weight of attack fell, not on the aristocracy, but on the electors—the shopkeepers, tenant-farmers, yeomen, the middle class generally, of England. Is not this blame deserved? Is it not a fact that in almost every borough or county the man of high connection or of local influence has an enormous preponderance at election time over the mere possessor of talent and information? So the House of Commons is constituted:—bankers, shipowners, great landed proprietors, cotton-spinners, or their sons or nominees, together with a large infusion of lawyers, who have managed at sessions or assizes to conciliate the good will of a popular attorney or wealthy banker, and who look upon the couple of thousands spent in securing their return as so much money invested on the chance of an Attorney-Generalship, or a seat in Bankruptcy at the least; and, here and there, perhaps a man or two whose brains are his chief claim to membership. It is hard to blame a Minister for choosing in such a medium his subordinates chiefly from the aristocratic classes. In the first place, he knows them usually, and can judge them best; and secondly, they have leisure, which the great City man has not. The great merchants, bankers, railway men, can't afford to take office, on account of the magnitude of their private concerns; the second-rate people of the same kind are generally not fit for it; the lawyers, indeed, take very good care that no Minister shall ignore their claims, but their zeal for improvement usually ends with their first appointment; and as for the mere men of talent, they are so completely *rari nantes in gurgite vasto* that to Ministerial eyes, perhaps, they may be invisible. One fault in the ordinary governmental arrangements of late years most of the speakers insisted upon, as it seems to us with equal force and justice, of which certainly the Minister of the day must bear the blame—is that of making appointments as if each member of a Government was indifferently fit for every office. Of late, for instance, there has been a regular ministerial country-dance—Diplomacy *peasseting* with the Colonies, the India Board and the Admiralty changing hands, and so on. Now, it may be admitted, for the sake of argument (which is admitting a great deal), that all the Ministers are equally fit legislatively, under the cheak of Council-board conversation, for all the offices, but it is quite impossible that they should be so administratively. We don't see how possibly a man can be equally good at the Board of Control as at the Admiralty, or as fit for the Foreign-office as for the Home Department, any more than we can believe that the "heavy father" could be prudently translated to the "light comedy business," or the first tragedy lady set to do the chamber-maids.

The trial of the assassin Pianori has come to a conclusion, and the only possible verdict has been recorded. The most important fact that came out, beyond what was stated in the indictment, was, that Pianori was a notorious assassin who had escaped from the galleys in Rome. We read in the daily newspapers that the presiding Judge, M. Partarieu Lafosse, disliking to see a Court of Justice, on a great and solemn occasion, presenting the appearance of an Opera on a benefit night, refused to grant tickets of admission to ladies, to the great disappointm ent of hundreds of fair applicants. Well done, M. Partarieu Lafosse!

The last news from the Crimea is highly encouraging, and the more so because its entire exactitude is now corroborated by a Russian despatch. The French have effected a lodgment in the Russian fortifications. In an ordinarily fortified town this would be the immediate prelude before the reduction of the place; but, from the peculiar character of the Russian defences, it is here only a step in that direction. It is a step, however, and a long one. We may feel assured that the next fortnight will bring us news of the gravest interest. For one, I have much confidence.

IMPERIAL PARLIAMENT.

HOUSE OF LORDS.—MONDAY.

THE CONDUCT OF THE WAR.

The Earl of ELLENBOROUGH: My Lords, I rise to give notice that on Monday next I shall move

That a humble address be presented to her Majesty,

To assure her Majesty of our continued support in the prose cution of the just and necessary war in which her Majesty is engaged

To declare the sincere gratification with which we have regarded the perfect community of councils between her Majesty and the Emperor of the French, and have seen it endue cause established and increasing reliance on the French people and our own—events full of hope for the future to other nations as well as to ourselves.

To express our admiration of the many deeds of valour by which the Allied forces in the East have illustrated their brotherhood in arms, and our satisfaction that the brave Army of Piedmont is now called on to participate in their actions and in their fame.

To declare our persuasion that, amidst all their disappointments, the people of this country still retain the generous feelings which led them at the commencement of the war willingly to place at the disposal of her Majesty's counsels the means requisite for the assistance of the strong, and that they are not prepared to consent that Russia shall, by increasing preponderance, so control the Turkish Government as practically to hold Constantinople within her grasp.

To acquaint her Majesty, that while we admit and lament the privations to which the necessity subjects all classes of the people, we yet venture to assure her Majesty that they would, in so just a cause, bear these privations without complaint if they could feel that the war had been well conducted, that the troops had not been exposed to any hardships which could have been avoided or foreseen, and that everything had been done to enable them to achieve decisive success.

Humbly to represent to her Majesty that her people, suffering privations on account of the war, have, as yet, had no such consolation; for, on the contrary, we cannot withhold from her Majesty the avowal of our conviction, that the conduct of the war has occasioned unnecessarily, and in many cases to just complaints, and that we must humbly lay before her Majesty our deliberate opinion that it is only through the selection of men for public employment, without regard to anything but the public service, that the country can hope to prosecute the war successfully, and to attain its only legitimate object—a secure and honourable peace.

ARMY REFORM.

Lord PANMURE: My Lords, I am informed by command of the Queen that it is her intention to have submitted to your Lordships on Monday next a plan for the consolidation of the civil departments of the army; but, inasmuch as the debate upon the noble Earl's motion is likely to occupy the whole of this evening, I shall postpone my notice until Thursday week.

The Earl of ELLENBOROUGH: That will be Ascension day

Lord PANMURE: Then let the notice stand for Friday week

THE CRIMEAN MEDAL.

Lord VIVIAN wished to inquire of his noble friend what had been the cause of the delay in issuing the medals for the battles of the Alma, Balaclava, and Inkerman. The chances of war had carried off many of their last account, to whom this honour would have been a consolation.

Lord PANMURE said that it took some time to prepare the medals; but he was happy to say that they would be ready in a very short time for distribution to the troops. There was also a higher class of honours for the officers who were engaged in these actions, and no one regretted more than he the lapse of time between the period when these honours ought to have been so gallantly gained, and the present period, when they had actually been assigned. He referred to the honour of the Order of the Bath. In delay, however, arose from the necessity of having the names of those who were to receive the honour inserted in the *Gazette*. In order to meet that difficulty, he had some time ago written to Lord Raglan to send him the names of the officers whom he considered to be worthy of this honour.

The EARL of MALMESBURY said that there were several medals now in London which had been found on the Russian soldiers, marked "Inkerman." It was evident, therefore, that in the enemy's country these medals could be made sooner than in this country.

Lord PANMURE said, the Russian medals were prepared at the time, and all that they had to do was to inscribe the word Inkerman on them.

Lord VIVIAN said, it the noble Lord had had time to receive the list from Lord Raglan?

Lord PANMURE said, he might by this time have received it.

The ALEXANDRIA (Scotland) RAILWAY BILL was read a second time.

In answer to a question by Lord St. Leonards, the LORD CHANCELLOR said that the delay in proceeding with the Charitable Trusts Bill was owing to the illness of the Lord President of the Council, who was at the head of the Commissioners.

The Income-tax Bill was read a second time.

HOUSE OF COMMONS.—MONDAY.

THE STATE OF THE NATION.

MR. LAYARD asked the Government whether they could give a day for bringing forward his motion on the state of the nation

LORD PALMERSTON said, he could not give the hon. member a day—he must find a day for himself.

MR. LAYARD said, he would then take an early day on going into Committee of Supply for bringing forward his resolutions.

NEWSPAPER-STAMP BILL.

On the third reading of the Newspaper stamp Bill,

MR. HADFIELD complained of the publication of fifteen days, beyond which stamped newspapers could not pass through the post.

The CHANCELLOR of the EXCHEQUER thought fifteen days was sufficiently wide; though, if he should find it necessary, he would not object to extend the period to twenty days. He might add that, as soon as this law passed, it was the intention of the Government to establish a cheap postage for printed matter generally.

Mr. BRIGHT objected to the retransmission of newspapers altogether. He hoped that the Government would soon consider the question of the newspaper-stamp with a view to its abolition, as it was a great hardship to the people, and a grievance to its abolition, as it was a great hardship, at the expense of existing interests. He was in favour of a copyright in news, and in favour of transmitting the largest-sized newspapers through the post, and he now gave notice that, if newspapers of six ounces weight were not allowed to go through the post for a penny, he would divide the House against the third reading.

Mr. DUFFY reminded the House that, in the case of monthly mails to the Colonies, thirteen daily newspapers would be excluded from the Colonies altogether. He was, therefore, against the limitation altogether to at least a month ought to be allowed for the retransmission.

The CHANCELLOR of the EXCHEQUER had no objection to make the fortnight limitation apply exclusively to the United Kingdom.

Mr. VANSITTART moved that the bill should be read a third time that day six months. He could not find that anybody thoroughly liked this bill, except the right honourable member for Manchester, and nobody in the country wished for it, while the revenue to be lost was much more than the country could afford.

Mr. LABOUCHERE said he had voted against the second reading of the bill purely on financial grounds, and now that the Budget had been laid before them he would certainly vote for the third reading. He was favourable to the privilege of retransmitting newspapers as a measure likely to encourage the best and ablest papers.

Mr. WILKINSON intended to move a clause allowing a newspaper of six ounces in weight to go through the Post for a penny. He wanted to know where it had been proved that the Post-office would have more difficulty in carrying six ounces than four. He believed the great object of the present limitation to four ounces was to injure a parliamentary journal. He wished also to know what the Chancellor of the Exchequer proposed to do with reference to the second point to which his attention had been called—viz., that unstamped newspapers should be subjected to the same law as stamped newspapers, in reference to registration and the giving of securities. Under the law as it at present stood a penny-a-liner was at liberty to write what he pleased, while the respectable journalist was obliged to find security. The libels might depend upon it that no principle of legislation was so unwise and unjust as this—that, in order to obtain a general problematical good, they were at liberty to inflict a particular injury. For these reasons he felt that he must oppose the third reading of the bill.

The CHANCELLOR of the EXCHEQUER said, the hon. and learned member had, to say the least, adopted an unusual course in respect to the bill then before the House. When the Chancellor of the Exchequer was in Committee of the whole House, proposed a clause calculated to give a cheap and speedy remedy to those who suffered from the present state of the law in respect to copyright, the hon. and learned member opposed that clause on grounds with which he stated, and now he opposed the third reading on the ground that that clause did not form part of the original bill (hear, hear), and was not proposed until the bill became the House's property. But upon the grounds which he (the Chancellor of the Exchequer) stated to the House when he moved it. He understood that it was alleged that the Government, under the pretence of reducing newspapers, had proposed a measure which would be most beneficial to those persons by calling into existence a class of new newspapers which would rely upon the profits of existing newspapers for paying their way, and living upon the division of subscribers who would not take both the old and new papers. He believed that such papers would exist to any considerable extent; but it was intended to encourage but he apprehended that no such papers were anticipated by any persons, and he stated that the present law of copyright possessed by newspapers had proved ineffectual for the purposes it was intended to serve, and that the remedy was inefficient. He, therefore, proposed a clause which would give an effectual remedy. That clause was fully discussed in the House; it met with little support on either side, so that he did not think himself justified in pressing the matter to a division, being satisfied that the effect of such a division would be the rejection of the clause. Under the circumstances under which that clause was proposed and withdrawn, he did not see that its rejection afforded any reason to the House for dissenting from the third reading of the bill. If the fear entertained by certain gentlemen that the bill would call into existence a large class of piratical newspapers should be realised, it would then be in the power of the House to apply a remedy (hear, hear, hear). A single and short Act was all that was required, either identical to the clause he had already proposed, or somewhat similar to it. He would now merely say a few words with reference to a proposition by the hon. and learned member which stood upon the votes, which was an additional clause altering the law with respect to supplements. The clause was as follows:—"Every periodical publication that shall be printed and published at intervals not exceeding seven days between the two consecutive parts or numbers of such publication, and the weight of which shall not on the whole exceed six ounces, shall be entitled to the said privileges of transmission and retransmission by the post, if duly stamped with the appropriate duty of one penny." He (the Chancellor of the Exchequer, understood that clause to be subject to the rule of superficial inches; so that if a newspaper weighed more than six ounces it would be charged on the rule of superficies, and if it weighed less, by the rule of weight. But contingencies might arise, in which it would be impossible to apply any rule. How would the honourable and learned member frame a law, for instance, with the ILLUSTRATED LONDON NEWS, which weighed, on the 1st of April last, 4¼ ounces; on the 8th of April, 8¾ ounces, on the 21st of April, 4¼ ounces; and on the 28th, 7¾ ounces? The honourable and learned gentleman said, he wished to have a satisfactory answer to the question why an additional duty of one halfpenny should be placed on supplements, when the Post-office could carry six ounces as easily as four ounces, and when four ounces were carried for one penny? But by what means would the honourable and learned member be justified in charging, as at present, one penny on a letter which weighed half an ounce, and twopence for a whole ounce (Hear, hear)? Was it not quite fair to establish for newspapers a rate corresponding to that of letters (Hear, hear). There was, however, this great difference in the two cases, that, whereas a newspaper was allowed to transmit 4 ounces for a penny, letters were charged one penny for only half an ounce. Of all the newspapers carried through the post, the average was 1-16th ounces, whereas the average of letters was less than one-fourth of an ounce. Then, with respect to the proposition of the hon. and learned member, that cheap and unstamped papers should be subject to the same rules as others with respect to registration and security, he did not see that it would be at all necessary to impose those conditions upon penny prints, and the like, published by religious and other societies, and which did not contain news.

Lord PALMERSTON stated that the Speaker was labouring under indisposition, and suggested that the bill should at once be read a third time; that the amendments to be proposed on the question that the bill do pass be adjourned to a future day; and that the House should now go into Committee on the Spirit Duties bill.

MR. DISRAELI said, there could be no one feeling of sympathy for the Speaker; but he thought it would be better that the debate should be adjourned.

Lord PALMERSTON assented to this, and, on the motion of the Chancellor of the Exchequer the debate was adjourned till Friday.

The House then went into Committee of Supply, when a great many of the Civil Estimates were passed.

APPOINTMENT OF A DEPUTY-SPEAKER.

On the House resuming, about eleven o'clock, the Clerk (Sir D. Le Marchant) read a letter from the Speaker, intimating his deep regret that he was still unable to attend the House; on which,

Lord PALMERSTON moved that the resolution of the House in 1853, authorising the appointment of a Deputy-Speaker, should be read.

The resolution was read accordingly, and, in accordance with it, Lord PALMERSTON moved that MR. FITROY, as Chairman of Ways and Means, should act as Deputy-Speaker, which was agreed to amidst general cheering.

Several bills were then advanced a stage.

HOUSE OF LORDS. TUESDAY.

The Plymouth and Stonehouse Gas Bill and the Bangor Markets and Public Institutions Bill were read a second time.

The Belfast and Ballymena Railway Bill, the Chichester, Stour Valley, Southend, and Hadleigh Railway, and Great Eastern Water Bill, Wick, Wick Mound, and Pulteney Railway Bill, Scotch Ale and Beer Bill, Vale of North Railway Bill, Bewdley and Malvern Railway Bill, and Woolwich Equitable Gas Bill were severally passed.

THE VIENNA PAPERS.

The Earl of CLARENDON laid on the table papers relating to the negotiations at Vienna, to which he hoped to add in a few days the protocols of the Conferences which had been held since Lord John Russell's departure from Vienna.

HOUSE OF COMMONS.—TUESDAY.

In consequence of there not being forty members present at four o'clock, the House stood adjourned to Wednesday.

HOUSE OF COMMONS.—WEDNESDAY.

MARRIAGES (SCOTLAND) BILL.

Mr. HEADLAM moved the second reading of this bill, the object of which, he said, was to give effect to the principles of the Scotch law, which have become obsolete.

Mr. J. A. SMITH said he had no objection to the principle of the bill; but he very much doubted whether it would do what it professed.

Mr. J. ELLIOTT thought the bill dealt with a great subject in a very petty manner. It would inflict a penalty but would not render the marriages void, and would therefore form no real check. He moved, as an amendment, that the bill be read a second time this day six months

Mr. MAINS seconded the amendment.

Lord LOVAINE supported the bill on the ground that it would preserve the morality of the northern poor, and save them from an amount of misfortune which it was almost impossible to imagine.

Mr. DUNLOP supported the bill.

Mr. WALPOLE would vote for the amendment. He thought that the bill would promote rather than check immorality.

After a short discussion the House divided, when there appeared For the second reading, 40; against it, 149: majority against the second reading, 103. The bill was consequently lost.

ECCLESIASTICAL PROPERTY (IRELAND) BILL.

This bill went through Committee, and Thursday was fixed for the third reading

MARRIAGE LAW AMENDMENT BILL.

Sir W. HEATHCOTE resumed the debate on this subject, adjourned from the 25th April. The hon. Baronet opposed the bill upon the principle of disinclination of taking upon himself any responsibility of the passage of such a measure, and therefore supported the amendment.

Mr. PHINN supported the bill.

Mr. R. Palmer, Mr Gladstone, and Mr. Spooner, supported the amendment. Mr. Lowe and Mr. Cobden spoke in favour of the bill.

Mr. HEYWOOD replied; the House then divided, and the numbers were—For the second reading, 165; against it, 157: majority, 8. The announcement was received with loud cheers. The bill was then read a second time.

The Religious Worship Bill was read a second time.

PRIZE CHILDREN.—A motion for the physical amelioration of the human race has just been made and taken into consideration at the preparatory meeting of the agricultural committees of Givors. Labour is wanting for agricultural purposes, and the physical degradation of our peasantry is proved by the continually increasing amount of those declared unfit for military service. Doctor Menaret, a member of the committee, well known for his devotion to everything that concerns the human species, has paid great attention to this degeneracy, and attributes it to the relatively greater mortality of the country over the town in early infancy, and to the desertion of rural labour in after-life for town occupations. Considering that human produce is, viewed merely in an industrial light, more important than animal, and that we ought to take more sanitary care of men than of cattle, he proposes to institute prizes for small proprietors, farmers, farm-servants or labourers, who shall present to the examination of a special jury the finest and best-formed children, between the age of one and five years.—*Courrier de Lyon.*

SCARCITY OF HANDS IN RUSSIA. The fine spring weather we have had lately promises well for the crops, but the owners of estates complain sadly of the want of hands for work, as the country has been of late so much drained of men for the army. In former years thousands of able-bodied agricultural labourers came down from the provinces of Chackow, Kaluga, Orel, Reschm, and Kursk to seek employment. This year but very few have arrived, and they have been all engaged by the Government to assist in the military works of defence above described. The German colonists are best of all in this respect. Being exempted from military servitude, they are permitted to cultivate their lands without interruption. Formerly the Russian workmen came to them to seek employment. At present they are visited in return by the Russian proprietors, who endeavour to assist in tilling the fields of the latter, who are glad to obtain the use of their services under any conditions. —*Letter from Odessa.*

Madame Selvage, formerly a Lady of Honour to Queen Hortense, has just died at Rome, and left all her property to Napoleon III. M. Casabianca, the brother of the Minister, and agent for the Imperial estates in Italy, has received orders to proceed to Rome, and take legal possession of the property.

It turns out that, in addition to the skeleton of St. Felix the Martyr, sent to the Queen of Spain by the Pope, and to that of the same saint which previously existed in a church in Andalusia, there is also one in the Hermitage of the Virgin, near Manza..ares.

THE SILENT MEMBER. (No. XVI.)

THERE is, at all events, one branch of the public service in which the demand for Administrative Reform has been anticipated, and where the right man will be found in the right place—in the person of Mr. Rowland Hill, the Secretary to the Post-office. When I say that he is exactly in the right place I am not sure that I am doing him full justice, for I know no reason why he should not be at the very head of that department, to which he has rendered the most signal services. It is customary to make the office of Postmaster-General a political post, but there seems to be no good reason why the man who has shown the highest ability in the management of the department should not be at the top of it. Unless Lord Canning is an abler man than Mr. Rowland Hill, why should the former occupy the place of Postmaster-General, while the latter acts as Secretary? and why, in fact, should it always be thought necessary to have a gilt top to the staff—an expensive article for show rather than for use—in all our public departments? My attention has been called to this subject by the perusal of an admirable report from the Post-office, which seems to me to bear the stamp of Rowland Hill, though it bears the signature of Canning. If I am doing an injustice to the latter I shall be glad to be set right, but, if the Secretary has had a principal hand in framing the report, I think he ought to have the credit due to the production. It gives a very interesting account of the progress of our postal arrangements, from the earliest period at which they were commenced, and shows how one great idea—the acceleration of the mails—was due to Mr. Palmer, the manager of the theatre at Bath; while another still greater idea—the uniform Penny Postage—is known to have emanated from Mr. Rowland himself; so that the two most important steps in Post-office reform were the work of men who were wholly without official experience. This was pretty sure to be the case under the old system of patronage, which gave appointments in the public service as the rewards of political pliancy; and when the heads of public departments were disposed to amend rather than to encourage any zeal or ability that might be manifested among the subordinates. It has been the fashion to put down as "troublesome" the clerk who might presume to suggest any improvement in the mode of doing the business he is engaged to perform; and hence there has grown up an apathy among the members of the Civil Service, who have felt a chilling sense of the uselessness of any attempt to stir out of the ruts of routine in which they are doomed to travel. The Post-office may claim the distinguished honour of being the first of the public departments which has begun to set its own house in order before the hands of Administrative Reform have been laid on it. Nor can it be said that the threat of an approaching interference has been the cause of the improvements that have been made, for it is about a year ago that several very important changes were effected in the internal administration of the affairs of the Post-office. Arrangements were some time since proposed by which a more liberal treatment of those employed in the department might be adopted, with a view to encourage zeal and promote efficiency; and it must be said, to the credit of the Treasury, that the means were readily granted for carrying out the objects desired. The report just issued by the Post-office will, I hope, be the precursor of similar reports from other public departments, all of which may be improved by the very wholesome habit of giving periodically account of their stewardship

One would imagine that the House of Commons must be illuminated by laughing gas, so powerful is the propensity to laughter which the members appear to labour under. It would be disrespectful to the House to refer its continual merriment to the fact that "weak minds are easily amused," and it must therefore be assumed that the Legislature is suffering from fits of involuntary merriment. The most curious feature of the disease is its tendency to break out under the most naturally depressing circumstances, for there are sure to be the greatest number of "laughs" in the House of Commons on those nights when the disagreeable communications, or the still more disagreeable confessions of having no communication to make at all, on the part of the Government, are most numerous. It is, undoubtedly, a peculiarity of the weakest and worst side of human nature to laugh at the difficulties and distresses of others; but the House of Commons cannot so far separate its sympathies from the nation at large as to be able to laugh the more as often as the public disasters are multiplied. I am, therefore, disposed to regard the mirth of the House of Commons under the present gloomy aspect of our national affairs as somewhat hysterical, and the laughter which greets the appearance of Lord Palmerston must be the result of some fearful fascination, connected with the idea that he has something alarming to communicate.

Louis Napoleon has shown his wisdom in the mode he has adopted for bringing to justice the Italian who shot at him. The very short work that was made of the trial of this man offers little encouragement to those who are tempted by vanity to commit a crime which generally gives great prominence and some political interest to the person of the criminal. The exclusion of the crowd of ladies whom a prurient curiosity would have attracted to the Court was another admirable mode of divesting the affair of those accessories which, in the distorted views of some weak-minded persons, tend to alleviate the position of the assassin, and render it one to be endured, if not to be positively desired. The lesson will not be lost, it is to be hoped, on those ministers of justice in this country who sometimes have allowed the bench to be degraded by the admission of privileged friends, including, frequently, a large proportion of what are called "gentlewomen," who come to enjoy the not very gentle or womanly satisfaction of staring at a murderer, or some other notorious criminal. The example which has arisen out of a piece of political expediency will, I hope, henceforth be followed as a matter of good taste, and it will be for the first magistrate who happens to have a great culprit before him to refuse to allow his court to be turned into an exhibition, by permitting the prisoner to be "on view," except so far as the publicity of the administration of justice may require.

Nothing is known at the moment at which I write as to the fate of the criminal, whose antecedents, as they appear by intelligence from Rome, say nothing in his favour. If what has been stated is true, he has more than once committed crimes to which the law attaches the punishment of death; though, in the absence of any reason for his not having been executed, the fact of his being alive may give a *prima facie* validity to his denial of the crimes he is said to have already committed. In our Courts of Law we should require some stronger proof of a previous conviction than a telegraphic message from even such a source of infallibility as Rome, and, moreover, all the numerous hands through which such a message must have passed are not recognised even in Rome as exempt from the possibility of error. This accumulation of guilt by electric telegraph on the head of the attempted assassin is somewhat superfluous, for the crime of which he has been found guilty is quite bad enough to show that he deserves the highest penalty the law can inflict, and to make it an act of grace to spare his life, should such be the course adopted by the Emperor.

The ill effects of the practice of licensing prisoners have been shown, in a minor degree, by the recent insubordination of the Russians at Lewes, who have been petted and pampered until they have become too idle to work, and too insolent to obey the rules of necessary discipline. At one time it was feared that their position would be reversed, with reference to the prison authorities, at Lewes, who were very nearly being held in captivity by the captives. The little incident that has occurred will, it is to be hoped, remind some of those who indulge in the dissipation of fancy philanthropy that "charity begins at home," and that a taste for alleviating the sufferings of prisoners may be gratified in a very legitimate mode by visiting the gaols, and administering comfort, in various ways, to many of the unfortunate inmates.

DESPATCH FROM LORD RAGLAN.

War Department, May 7, 1855.

Lord Panmure has this day received a despatch and its enclosures, of which the following are copies, addressed to his Lordship by Field-Marshal the Lord Raglan, G.C.B

Before Sebastopol, April 24, 1855

My Lord,—Nothing material has occurred since I made my report to your Lordship on the 21st instant.

The Russian rifle-pit, immediately in front of that which was taken on the night of the 19th, was destroyed by a party of volunteers on the morning of the 21st instant. These were headed by Lieutenant and Adjutant Walker, of the 30th Regiment, who as stated to be an excellent officer, and to have conducted himself on the occasion in the most spirited manner. The pit was found to be empty, and, being useless, was immediately levelled and filled in. The enemy did not interrupt the work.

I enclose the list of casualties, which, I regret to say, is heavy. The nearer we approach the place the more loss is to be apprehended. Hitherto it has been less than might have been expected.

I have, &c.,

RAGLAN.

The Lord Panmure, &c., &c., &c.

RETURNS OF KILLED AND WOUNDED.

Officers who have been Wounded from the 20th to 22nd April, inclusive. 62nd Foot: Lieut.-Colonel R. A. Shearman, slightly

Non-commissioned Officers and Privates Killed from the 20th to 22nd April, inclusive. 7th Foot: Private Charles Hopkinson, dangerously. 49th: Private William Maitland. 68th: Private Michael Kelly. 57th: Private Alexander Graham and Foster Murray. 62nd: Private John Patton. Royal Artillery: Sergeant James Beattie

Non-commissioned Officers and Privates Wounded from the 20th to 22nd April, inclusive. 7th Foot, Private Richard Carr, slightly. 19th, Private Thomas Donnelly, severely (since dead). 33rd: Lance-Corporal James Mullens, slightly; Privates William Atherton (since dead), slightly. 41st: Corporals Samuel Allum, severely; James Davies, [illegible] John Burke, dangerously, since dead; William Coughlan, severely. [illegible] Garrard, Christopher Morgan, and Martin Rogan, slightly; George Renwick, dangerously. 49th: Private Patrick Rimes, John Henry, John Mahon, Patrick Sweeney, Henry Turner, and Robert Skinner, slightly. 68th: Sergeant Henry Gleed, severely. 97th: Privates Michael Grady, slightly; James Barry and John Lewis, severely. 30th, Private John Treacey, severely. Private Thomas Kemp, [illegible]. Private William Fairlie, dangerously; Sergeant Alexander M'Clay, [illegible]. Private Edmond Curtain, dangerously; John Pasfield slightly. 77th: Private T[illegible] Nicholls, dangerously. 89th: Private Moses Jones, slightly. [illegible] Samuel Buckley, slightly. 2nd Battalion Rifle Brigade: [illegible] slightly; Privates Wm. Perkins, Robert Hampston, and John Twiggs, slightly; Henry Arnitt and Thomas Flynn, severely.

Return of Casualties in the Royal Naval Brigade, before Sebastopol, from April 21st to 27th, inclusive.—*Wounded*: George Hogle, A.B., Rattler, slightly; John Collins, Ordinary, London, slightly. *Command*: Lieut. A. A. Douglas, R.M.A., slightly; Edward Smith, A.B., Leander, slightly; Jeremiah Mooney, Ord., Rodney, slightly; John Gordon, Ord., Queen, slightly

THE RECONNAISSANCE ON THE 21st OF APRIL.

On the morning of the 19th ult. orders were sent to the head-quarters of the Heavy Cavalry Brigade and to the 1st troop of the Royal Horse Artillery, to be in readiness to turn out at daybreak, and the 10th Hussars (Brigadier-General Parlby, of the Light Cavalry, in temporary command of the Cavalry Division, during General Scarlett's absence) received similar instructions. The Chasseurs d'Afrique and a French rocket troop, for mountain service, accompanied the reconnaissance, and rendered excellent service during the day. The Heavy Cavalry Brigade, consisting of the remnants of the 1st Royals, Scots Greys, Inniskillings, 4th (Royal Irish) Dragoon Guards, and 5th (Princess Charlotte) Dragoon Guards, as turned out about five o'clock, and, with the 10th Hussars in advance, proceeded into the plain of Balaclava, the heights over which were already crowned by the Turkish infantry to the number of some 6000 or 7000 men, and before seven o'clock the whole of the troops were in motion towards Kamara. The Chasseurs d'Afrique were in advance, with a line of skirmishers spread out in front of the little expedition. The French Rocket Troop and C Troop, Royal Horse Artillery, and the 10th Hussars and Heavy Cavalry Brigade covered the advance of the infantry and, as the morning was fine and clear, the sight presented by the troops as seen advancing across the plain from the heights was very beautiful. So little was known about the reconnaissance, that many officers at head quarters were not aware of it till they learnt that Lord Raglan, attended by a few members of the Staff, and followed by only six orderlies, had started to overtake the troops. A great number of amateurs, forming clouds of very irregular cavalry, followed and preceded the expedition. His Excellency the Lieut.-General was attended by his Staff, by Behrem Pacha (Colonel Cannon), and several Turkish officers of rank, had the control of the force.

The Turks marched in dense columns, bristling with steel, and the sunlight, flashing on the polished barrels of their firelocks and on their bayonets, relieved the sombre hue of the mass; for their dark blue uniform has a less little relieved by facings or gay shoulder-straps and cuffs, look quite black when the men are together. The Chasseurs d'Afrique, clad in light blue jackets, with white cartouch belts, and in bright red pantaloons, mounted on white Arab horses, again look, like a few flowers scattered over the plain. Nor did the rich verdure indeed require any such borrowed beauty, for the soil produces an abundance of wild flowering shrubs and beautiful plants. Dahlias, anemones, sweetbriar, whitethorn, wild parsley, mint, thyme, sage, asparagus, and a hundred other citizens of the vegetable kingdom spring up all over the plain; and, as the Turkish infantry moved along, their feet crushed the sweet flowers, and the air was filled with delicate odours, which overcame the sweltering atmosphere around the columns. Rectangular patches of long, rank, rich grass, waving high above the more natural green meadow, marked the mounds where the slain of the 25th of October are reposing for ever, and the snorting horse refuses to eat the unwholesome shoots. As the force moved on evidences of that fatal and glorious day became thick and painful. The skeleton of a fine dragoon, said to be one of the Royals, lay still extended on the plain, with tattered bits of red cloth hanging to the bones of his arms. All the buttons had been cut off the jacket. The man must have fallen early in the day, when the Heavy Cavalry were close up to Canrobert's-hill, and soon under the fire of the Russian artillery. There was also a Russian skeleton close at hand in ghastly companionship.

Not the least interesting part of the spectacle was furnished by the relics of the Heavy Cavalry Brigade passing over the scene of their grand encounter with the Muscovite cavalry. Scots Greys and Inniskillings, Royals, 4th Dragoon Guards, and 5th Dragoon Guards, all had been there; and the survivors might well feel proud when they thought of that day. These regiments were no longer large troops, and some of them, indeed, were not nearly equal in strength to a troop on war footing, for some of their men have been sent away for remount horses (a proceeding which strikes a civilian as rather curious, seeing that the horses might as well, one would think, have been brought up to them), and others of the men who were left have no horses to mount. The 10th Hussars were conspicuous for the soldierly and efficient look of the men, and the fine condition of their light sinewy and showy horses. As the force descended into the plain they extended their left flank, and marched towards Kamara, spreading across the ground in front of Canrobert's-hill from No. 2 Turkish Redoubt up to the slope which leads to the ruined village. A party of Turkish infantry followed the cavalry in skirmishing order, and on approaching the village the columns halted, formed in their own ballad, and Sono Johnny proceeded with great activity to cover the high wooded hill which overhangs the village to the right. This they did without resistance, as the few Cossacks in the village had abandoned it after firing a few straggling shots at the Heavy Cavalry when they came into view. Indeed, the Cossacks, taken by surprise that he left his lance leaning against a wall, as one officer of the 71st espied it just as the Cossack was making a bolt back for it. They both rode their best, but the Briton was first, and carried off the lance in triumph, while the Cossack retreated with effective pantomime, representing rage and despair.

As soon as the Turks on the right had gained the summit of the hill above Kamara three of the columns advanced and took possession of the ruins, and formed a line on the slope in front of the church. A few men were sent further on towards Baidar, but could see no enemy; and they contented themselves with burning a building which the Cossacks had left standing, the smoke from which led to the belief that a little skirmish was going on among the infantry. Meantime the great bulk of the force, leaving three columns halted at Kamara, marched on past Canrobert's-hill, the sides of which are covered with the wigwams of the Russians—some recent, others those which were partially burnt when Liprandi retired last year. They passed by the old Turkish redoubts, Nos. 1 and 2, towards a very steep and rocky conical hill covered with loose stones, near the top of which the Russians threw up a wall of rubbish, about 2½ feet high. A group of Cossacks and some Russian officers had assembled on the top of this hill to examine the strength of the Allies and watch their movements. As the Turkish skirmishers advanced, the French Rocket Troop accompanied them. The Turks ascended the hill with ardour and with great agility, firing their pieces as they advanced, to which the Cossacks replied by a petty fusillade. Suddenly an arch of thick white smoke rises from the ground with a fierce, hissing, rushing noise, and throws itself like a great snake towards the crest of the hill—as it rises onward the smoke disappears and the fiery trail is lost; but in a second a gulf of smoke bursts out with a slight explosion on the hill top, and the Cossacks and Russians disappear with precipitation. In fact, the French had begun their rocket practice with great accuracy and success. Nothing can be better for such work as this than these light rocket troops. The apparatus is simple and portable—a few mules, with panniers on each side, carry the whole of the tubes, cases, sticks, fuses, &c.; and the effect of rockets, though uncertain, is very great, especially against irregular and ill-disciplined cavalry. The skirmishers now crowned this hill also, and the generals and officers of the Staff, and numerous idlers and amateurs followed them. The Russians rode rapidly down the hill side, and crossed the Tchernaya by the bridge, and at one or two fords near Tchorgoun. Omer Pacha, Lord Raglan, and the French Generals then spent some time in surveying the country, while the troops were halted in the rear, the artillery and cavalry first, supported by four battalions of Egyptians. At two o'clock the reconnaissance was over, and the troops slowly retired to the Camp; the skirmishers of the French cavalry being followed by the Cossacks at a prudent distance, and exchanging long shots with them from time to time. Before the troops moved off the ground the 10th Hussars filed past Omer Pacha, who seemed very much gratified and pleased at the appearance of men and horses. He then inspected his own battalions, and on the march homeward followed the Turks, moving off in good style to the music of their own bands, to the great distress of those who heard them. Altogether, the reconnaissance was a most welcome and delightful interlude in the dull, monotonous "performance" of the siege.

NAVAL AND MILITARY INTELLIGENCE.

INFANTRY REGIMENTS of the line on home service, and regiments of militia serving in the Colonies, are to be supplied with twelve Minié rifles per company, and militia regiments doing duty within the United Kingdom four per company, for the purpose of instructing the men in the use of that weapon.

IT is understood to be the intention of the British and French Governments to send a strong force of artillery and infantry to assist in the operations about to be resumed against the Russian fortresses in the Gulfs of Finland and Bothnia, and the Baltic. It is stated that the expedition will number 25,000 men, France supplying the greater portion; but, as a set-off, the British Government is to increase the naval forces, and to furnish tonnage for the conveyance of the troops, which will embark sufficiently early to reach the scene of operations before the ice breaks up. The British will embark at Leith, and the French at Brest or Boulogne.

IT is intended to augment the army in the Crimea by two regiments of cavalry of 700 sabres each, and five battalions of infantry, each mustering 1200 bayonets; making a total of 7400 cavalry and infantry. In addition to the above, the horse brigade, siege, and field trains of the Royal Artillery are to be increased; and the line regiments in the Mediterranean and Ionian Islands will proceed to join the army in the East. It has not as yet been officially announced what regiments are to be placed under orders for active service; but it is believed that the 3rd Light Dragoons, quartered in Manchester, and the 7th Hussars, at York, will form the cavalry reinforcements, and that the infantry will consist of the 51st King's Own Light Infantry, from Manchester; 80th Foot, from Fort George; 82nd Foot, from Edinburgh; 94th Foot, from Windsor; and the 3rd battalion of the Rifle Brigade (newly raised), from Portsmouth.

THE importance of the fleet of screw gun-boats is being daily recognised. It is now determined to increase the number, so that both fleets in the Baltic and Black Sea shall have a squadron of these powerful little "sharpshooters."

TWELVE additional companies of the Royal Artillery have been placed under orders to hold themselves in readiness to embark for the seat of war in the East.

AN order has been received at the Royal Arsenal to send out immediately to the Crimea 20,000 shells—10,000 13-inch shells, and 10,000 10-inch shells. The order was received at Woolwich within twenty-four hours from leaving Sebastopol.

IN addition to Aldershott, which is to accommodate 10,000 men, several other encampments on a minor scale are to be formed; namely, one at Haverfordwest, capable of accommodating 1034 men; one at Exeter, for 2453 men; one at Gloucester, for 2836 men; one at Colchester, for 3222 men; and one at Shorncliff, near Dover; and it is expected that each so embodied will be ready for active service in about six weeks. This appears an incredibly short space of time, but it arises from the fact of there being scarcely a man enlisted who has not already completed three years service in his own country. They are entirely Germans, and are taken principally from amongst the artistical or mechanical classes of the community. The officers, particularly the juniors, are also Germans. Some of the superior officers are English, whose former career has recommended them to the notice of the War Minister. The Baron de Stutts rheim, who is employed to organise the force, is an officer of high distinction; and like Colonel Woolridge, who is to command a brigade, is also one of General Evans's officers. Colonel Hollock, appointed to be inspector of the force, is one of the late British Legion officers.

TELEGRAPHIC orders reached Sheerness on Monday for the gun-boats *Cracker*, *Clinker*, *Fancy*, and *Boxer* to get up steam and proceed immediately for Portsmouth *en route* for the Black Sea. They all left on Monday between one and two o'clock p.m.

A LARGE supply of the new regulation sword-bayonet has been received into the ordnance stores in the Tower. This weapon is for the use of the rifle regiments; it is intended to supersede the old bayonet, and, when attached to a rifle, the two together will be precisely the same length as the infantry musket with a fixed bayonet; so that the rifleman will be placed on an equality with a battalion soldier when fighting in line or exposed simply to an enemy. The length of the sword-bayonet is thirty inches from hilt to point. The blade is straight for twelve inches, when it assumes the shape of an ancient falchion, slightly curved, and with edges on either side.

MEDICINE-CHEST FOR THE ARMY.—MESSRS. Savory and Moore have just produced a medicine-chest, intended for the use of the Army, which is well worthy of notice, on account of its portable nature, and the comprehensive and orderly arrangement of its contents. The medicine-chest commonly used by the Army surgeons is a bulky, cumbrous affair, and, as in a midshipman's chest, everything is uppermost and nothing at hand. Savory and Moore's new medicine-chest is both convenient to carry on the back of a mule. The compartment which contains the lint, bandages, and dressings, required as a short notice on the field of battle, can be unslipped, and carried with ease to the spot where it may be required; and another compartment contains a lantern which can be fixed by a spike on the ground.

A BRAVE BUGLER.—After the funeral of Colonel Egerton Lord Raglan paid a visit to the hospital of the 77th Regiment. On the way, one of the regimental buglers, named M'Gill, was introduced to his Lordship's notice. The young soldier had particularly distinguished himself on the night of the attack. He was one of the first in the ambuscade, and, having marked a Russian bugler there, he selected him for his antagonist, as if were his particular province to attack a man of his own calling before any other. Although the Russian had the advantage in size, M'Gill knocked him over, and eventually succeeded in securing him as a prisoner. He also carried off his bugle as a prize; but after a hard struggle, for the Russian warmly contested his own right to this property. The trophy he had now the honour of exhibiting to Lord Raglan, and on being desired to sound some of the notes of the bugle, he at once complied to the satisfaction of his hearers. The instrument has a shriller tone than the English bugle, is small and portable, and has engraved on the bell the Russian imperial arms. In the struggle with the Russian bugler M'Gill inflicted a severe sword wound on a Russian soldier who came to the rescue, and afterwards, having placed his prisoner in safe keeping, remained by his Colonel's side till he fell.—*Letter from the Camp.*

THE REVOLT IN THE UKRAINE.—Private letters from St. Petersburg confirm the telegraphic announcement of the insurrection of the peasants in the Ukraine; and state, further, that it has already extended to the Governments of Poltowa, Tcherningoff, and Kharkoff. The names of twenty landed proprietors whom the maddened mobiks have destroyed, together with their wives and children, have reached St. Petersburg. M. Poletica, one of the richest proprietors in the government of Tcherningoff, was burnt alive in his country house at Reletz.

PRESENT STRENGTH OF RUSSIA IN THE CRIMEA.—The military correspondent of the *Augsburg Gazette* writes from the Polish frontier that the reinforcements received by the Russian Commanders in the west of the Crimea during the month of Inkerman bear no proportion to those which have reached the Allies. He says—"Numerically, Omer Pacha's corps alone is almost equal to the entire reinforcements of the Russians. The new Russian troops which have arrived in the Crimea since the battle just mentioned are the following: the 2nd Brigade of the Thirteenth Reserve Infantry Division, forming together twelve battalions, or at most seven men; further, the Ninth Infantry Division, present near Perekop, and numbering possibly 10,000 men. These and a Greek volunteer battalion make up the reinforcements of the Russian infantry, since the battle of Inkerman, for the troops of the Second Infantry Corps, reported by some journals as having marched to the Crimea, and the Division of General Wagner, said by the *Austrian Military Gazette* to be in the Valley of Baidar, are not there, the second corps, in fact, is still in Poland. Before the battle of Inkerman the Russians had no more than 70,000 infantry in the Crimea; at the present moment they should have about 90,000. The cavalry force which has joined the Russian army since the battle of Inkerman consists of six regular regiments. If we reckon the crews of the ships at 8000, and the Tchernomorskinchen battalions at 6000, the Rifles, Sappers, Engineers, and Artillery at 15,000; and the cavalry, regular and irregular, at 20,000—the Russian army at Perekop, Eupatoria, and near Sebastopol will number about 140,000 men."

SKETCHES FROM THE WAR.

SEBASTOPOL, FROM THE VICTORIA REDOUBT.

WE now engrave the pair of Sketches described in our Artist's letter last week. First is a view of Sebastopol, from the sketcher's right, near the Victoria Redoubt, a little to the left of Inkerman. To the extreme left is represented an explosion of a powder-magazine, which unfortunately occurred when our Artist was making his sketch. Two men were killed, and nine or ten wounded.

Among the late details of the first locality, it is stated that the English were engaged in pushing an advanced work beyond the new old-advanced parallel. The zigzags for this advance, from the extreme left of Gordon's Battery and from the right, form the advanced work near the Mamelon, and were within sixty yards of the Malakoff Tower on the right, and on the left within one hundred of the Redan. This is as far as they are at present intended to be taken, and the working parties were forming the parallel across which is to connect the approaches from the right and left.

The second Sketch is from the left, *Maison d'Observation*, or *Maison Blanche*, as it is sometimes called. At the end of the house, just above the garden wall, may be seen the Telegraph.

Our own Correspondent writes:—"Camp, near Sebastopol, April 28.—On Monday evening a Russian powder magazine on the left of the Malakoff (mortar battery) blew up, and the enemy ceased firing for nearly an hour. On Tuesday night an immense deal of musketry was heard on the left; our allies kept it up in order to prevent the Russians from advancing to retake a rifle-pit; but at daybreak on the following morning the firing from the French had nearly ceased, the enemy advanced in overpowering force, and our allies were obliged to retire. The general opinion is, that in about eight or ten days we open fire once more. At present the firing is very slack. Yesterday we had a grand review of Bosquet's Division, 40,000 men, and to-day that of Pelissier's, of about 30,000 to 35,000. Lady Stratford and her daughters were present."

SEBASTOPOL, FROM THE MAISON D'OBSERVATION.

OPENING OF THE EXHIBITION OF THE ROYAL ACADEMY.

"WAITING FOR THE GUNS."—PAINTED BY J. W. BOTTOMLEY.—FROM THE EXHIBITION OF THE ROYAL ACADEMY.

NEVER has the public been more divided about the merits and appearance of an Exhibition than they are now divided about the Exhibition opened to the public in Trafalgar-square on Monday last. If the Private View on Friday was somewhat thinly attended, and the people present somewhat guarded in their words of commendation, the Public Opening on Monday was a striking contrast, from its unpleasant overcrowding, and the marked freedom of the criticisms expressed pretty loudly on the general merits of the Exhibition and the relative excellence of particular works of art. To get near to certain pictures by artists of known reputation was, on Monday last, a difficulty not to be described; to see them was simply an impossibility. The greatest crowds were before Mr. Maclise's "Orlando," Mr. Millais' "Rescue," and Mr. Leighton's "Procession." Mr. Beets is the fortunate owner of the Maclise; Mr. Joseph Arden is the lucky possessor of the Millais, and her Majesty the tasteful purchaser of the Leighton, for the sum of six hundred pounds.

The walls exhibit a fearful increase of portraits, one or two of outrageous dimensions, and, worse still, reveal at every turn a most unfair distribution of the best places. A worse-used more reported "Hanging Committee" has not been seen since the public began to take an interest in the management of the Academy. The members composing it should be known. The Committee consists of three Academicians, and on this occasion Mr. Abraham Cooper, Mr. Herbert, and Mr. Lee were the three artists entrusted with this responsible and delicate duty. Their own pictures are, of course, in the very best places. This is not unnatural; but what shall we say of men who place on the floor Mr. Faed's "Mitherless Bairn," and hang all but out of sight Mr. Solomon's touching and carefully-painted "Contrast"?

Some of the best of our living artists are, unfortunately, either absentees or exhibitors of works on a very small scale. We allude to S[illegible] Mr. E. M. Ward, Mr. Frith, Mr. Frost, and Mr Holman Hunt. Sir [illegible] has not even a dog's head. Mr. Dyce is content with a very small study in the

"AN AVENUE IN HATFIELD PARK."—PAINTED BY H. [illegible]

style of early Italian art. The pre-Raphaelites are not in force; indeed, there seems to have been a kind of war against them, and critics who dislike their manner point with a sneer of triumph at their absence, and the revival of true art in the person of Mr. Leighton.

Notwithstanding the alleged inferiority of the present Exhibition over many that we can call to mind, we have endeavoured—and are still endeavouring—to represent some of the finest of its treasures by the art of engraving on wood. It is with pleasure we announce, therefore, that we have now a Fine Arts Supplement in active preparation. In this Supplement we shall engrave not only some of the choicest pictures in the Royal Academy Exhibition, but some of the very best examples of art to be seen in the Water-Colour Societies. We have had every assistance, and no expense or pains will be spared in making our Supplement worthy of the subject and ourselves. In the meantime we have chosen two pictures for this week's paper; two that will render no bad foretaste of what is coming, but will supply at the same time marked examples of the injustice rendered to artists by the Hanging Committee. Mr. Jutsum's exquisite "Avenue in Hatfield-park" (No. 1069) is one of the hidden treasures of the Octagon Room; and Mr. Bottomley's carefully-finished "Wasting for the Guns" (No. 793) is one of the certain decorations of the room devoted to miniatures. Mr. Jutsum has painted an English landscape with a fine eye for the beauties of landscape nature; and Mr. Bottomley has caught an incident in English sporting life with the skill of an artist artist and the ardelty of an eager sportsman.

EXHIBITION OF THE SOCIETY OF PAINTERS IN WATER-COLOURS

THE Fifty-first Exhibition of the Parent Society of Water-Colour Art is one of the very best that the society has had for many years. This was not, indeed, to have been expected, considering what losses by death the society has of late sustained. First, Dewint was removed from among us, and we missed his Lincolnshire rivers and delightful hayfields; then Prout was no longer a living master in the flesh, and we missed his quaint German market-places, filled with people dressed as quaintly; and now the winter of this year has carried Copley Fielding to Hove churchyard, and the air of the Sussex Downs is no longer to be inhaled in the little gallery in Pall-mall East.

There were yet other causes to lessen expectation. David Cox, that veteran in water-colour art, is no longer young; and last year his works were too blotted to afford delight: while Joseph Nash, properly content with his well-earned reputation, was likely, we were told, to leave to younger men his delightful task of peopling Elizabethan interiors with caval ers and ladies, chamberlains and chrplains, hounds and hawks, and the furniture and accessories true to the time represented.

If these were drawbacks to the success of the approaching entertainment, there were other inducements to make good the shortcomings of the year. Rumour spoke pleasantly of Mr. Topham's pencil pictures, smacking deliciously of Andalusia. Mr. John Lewis, we were assured, would be found even more exquisitely polished in his details of desert life; and all conversant with art knew to what height of perfection he had carried his skill in this particular. Carl Haag was to be on full force; Hunt as funny and gregarious as ever; the Frpps would be found in each in his best mood. Gilbert was to exhibit more masterly grouping and invention than he had yet evinced. Dodgson and Duncan were more than up to their old water-mark; Jenkins was beyond himself; while out of a new candidate for high reputation would be seen in a Mr Burton, of Nuremberg, who was up to the level, it was said, of Mr. Haghe, at the other gallery.

Nor has Rumour been found a false-tongued idler in the promises she put forth. A very pleasing Exhibition, indeed, is that in the first of the new half-century of the society's existence. Nor do we feel, as we wander from wall to wall, from screen to screen, that there is any want of former favourites. Entering, as we did, thanking of eminent artists now no longer among us, the thought lingered immediately we commenced our inspection, and we left the gallery, after a two hours' pleasant inspection, perfectly satisfied with what we had seen, and eager to communicate our delight to those we met.

As we shall very soon have better and ampler occasion to criticise in detail, and to illustrate our criticisms by the art of the engraver, we must be content, for the present, with this general recommendation of a very delightful Exhibition. Some of our old favourites are seen to great advantage. John Lewis delights in miraculous examples of well-placed, and therefore necessary, detail. His two small contributions from Egypt—"The Well in the Desert" (No 135), and "The Greeting in the Desert"—are not only wonders in microscopic art, but exquisite examples of Egyptian manners and Egyptian scenery. How fine is Alfred Fripp with (No. 5) his "Last Days of Pompeii," the Roman Campagna; "that view" in the Bay of Naples," by T. M. Richardson (No 30) is dexterous and satisfactory; how very fine are some of the human heads contributed by Carl Haag; Mr Jenkins's "Hopes and Fears" (No. 266) has aroused the ingenuity of more than one publisher; the fine taste and grace of Mr Duncan's "Harvest Moon" (No. 50) has been envied its possession by many tasteful collectors.

Critics of skill unite in praising Mr. Dodgson's "Beacon" (No. 147) Mr Topham's "Andalusian Letter-Writer" (No. 141) attracts a thick set circle of admirers. Mr. S. P. Jackson's "Summer Day on the Coast." (No. 186) is quitted with regret. Mr. Hunt's "Fruit" (No. 256) and his "Le Maude Imaginare" are differently suggestive: schoolboys shudder before the cup of rhubarb, and smack their lips at the grapes and pears. Artists of skill delight in calling attention to his two wonderful representations of Francolin peasantry contributed by Mr Burton (Nos. 191 and 239), and, while they censure the former as little too red, they accord to the latter high praise as being very near perfection. Nor must we omit that Mr. Collingwood Smith and Mr. Walter Goodall find and retain their own sensible circle of modest admirers.

Horace Vernet exhibits his grand Oriental style and Oriental atmosphere in his clever picture of "Joseph Sold by his Brethren." In "Victoria, a Peasant Girl of Albano," his pencil works in quite a different vein—the pure Italian; but with wonderful power, roundness, and success.

The "Francesca da Rimini" of Ingres, notwithstanding much merit of execution, must be pronounced comparatively a failure. Dante's heroine, as she receives the first warm kiss of her hapless lover, betrays none of that trembling agitation which the poet describes. On the contrary, she is cool, insipid, coquettish somewhat certainly in a very ordinary *intrigante*; whilst the hero is commonplace in character and extravagant in attitude. The colouring is crude, and much too hard.

T. Dubufe has an affecting picture—well considered throughout, and well treated in all its points—of "The Family of the Absent Soldier at Morning Prayers." The scene is supposed to be in Normandy, and the family group kneels before the picture of their absent husband which is affixed on the wall above a religious emblem. The expression of all the faces is full of feeling, and the colouring is warm and tender.

As we shall have a future opportunity of returning to the Exhibition, we shall close our present notice with a brief reference to some of those works of the genre and domestic class, in which we find the artists of the French school so admirably successful. The great secret of their triumph perhaps rests on the fact that all appearance of effort is absent—repose rather than action being their study—and their pencil being rather suggestive than demonstrative. Foremost in merit in this happy vein is Eugene Fichel, who exhibits eleven pieces, the largest of which is "A Conversazione in the Last Century," an admirable amateur concert group. "The Portrait" is an ingenious and pleasing subject—a lady painting a gentleman's portrait: the latter, sitting in a rather formal attitude, dressed in maroon velvet of the olden fashion, evidently contemplates with admiration the intellectual features of the fair artist. "The Duet" and "The Reader" are also extremely beautiful.

Antoine Plassan, amongst nine contributions, has what may be pronounced a gem, the "Message;" representing a young lady reading a letter, whilst her attendant stands respectfully and with demure expression beside her, prepared to go on her errand.

Vidal Chavet exhibits only one piece, a very small one, but how full of spirit and rare humour! It is entitled the "Connoisseurs," and represents, with their backs to us, a pair of *cognoscenti* expounding upon the merits of a cab net picture, which they are eagerly taking down from a wall.

Edouard Frere has half a dozen exhibits, of which the "Cut Finger" may be especially lauded for its telling effect, without the slightest obtrusion of exaggeration.

François Biard holds a very distinguished position amongst his brother artists, being remarkable also for the versatility of his talent and the dramatic action which he throws into his pictures. The "Pirates"—a starving scene on the deck of a pirate vessel, at the moment of preparing for action and plunder, which it would be impossible for any description to do justice to. The "Poets Recanted," and "Newly Decorated; or, How to Know no Danger," are comic, almost to extravagance; whilst "Henry IV. and Fleurette" is a sentimental subject, charming for its simplicity and genial treatment.

WATER-COLOUR PICTURES BY CARL WERNER.—M. Carl Werner, an artist of established reputation and unquestionable merit, has now on private view, by tickets, a collection of his works, at 49, Pall-mall. We had the pleasure of inspecting the collection the other day, and were certainly astonished and gratified at the evidence they afforded of the extent of the capabilities of the painter's art. Reading and working chiefly in Rome and Venice, it is natural that the artist's subjects should be chosen from those localities; but it is a high testimony to his genius that, in producing them, he has infused them with all the glittering atmospheric brightness which surrounds the objects themselves, and which is not to be found in less favoured lands. Under these circumstances his fine views become absolute realities, in contemplation of which the mind willingly travels to the sites they represent. To this must be added that M. Werner's studies of art and architectural remains is very fine; and that in the treatment of every pillar and capital, remains of ancient grandeur, he evinces an appreciating love for his subject. In figure subjects, also, M. Werner is extremely happy. Amongst many exhibited, we noticed particularly a remarkably fine picture of the "Annual Festivity of the Artists in Rome on the 1st of May"—a scene introducing innumerable figures, most of them portraits, engaged in a mimic ceremonial, in which the comic prevails. Of a different character, but no less able in the treatment, is the picture of "Venetian Bravos" in the small place of resort, round the Column of St. Januario, at Venice. We should hardly have expected, before we saw it, that so much could have been done in intensity of effect through the medium of water-colours. Most of the pictures exhibited—eighty in number—have been already sold; but they will repay the careful inspection of those who take interest in the progress of art.

FINE ARTS.

EXHIBITION OF THE FRENCH SCHOOL OF ART

THE Second Exhibition of the French School of Art in London was opened on Monday last, at the Gallery, 121, Pall-Mall. Taking the collection as a whole, it possesses many points of extraordinary interest, and many features which might challenge comparison with any school in Europe. Indeed, its success in many respects is so distinguished and so indisputable as almost to inspire misgivings amongst the votaries and admirers of other schools, as to a decided superiority in art existing in our friendly neighbours; and this we consider is true in respect to certain fields of art. Without attempting a comparison between the peculiar characteristics of the French school and those of other European schools, we may be allowed a few observations upon the distinguishing merits of the French School *per se*, and the fields in which we consider it exhibits shortcomings.

Those who know the subtle dramatic genius of the French nation will not be surprised to find that, in pieces *de circonstance*, "conversation pieces," and *genre* subjects generally, they take a decided lead of all competitors. Indeed, in the selection and treatment of their subjects in this agreeable branch of art, they are not surpass the Dutch and Flemish schools which originated it; their amusement character and of the *finesse* of society being as great as that we become absolutely astonished at the number and variety of their subjects, and the extraordinary earnestness with which they depict comparatively trivial incidents. If in the technical execution they do not always come up to the masters of the Dutch and Flemish schools, the aspect of reality and life which they throw into their works in this class more than compensates for any shortcomings in that respect.

Whilst we admit the decided superiority of the French School of Art in subjects of this class we have mentioned,—that which embraces the greatest comedy of life; we are bound to state—as we stated last year in a notice upon the first exhibition of this School—that in what pertains to the higher emotions, the grander incidents of poetic creation, they fall below many contemporary schools, and this is in nowise surprising when the same canon that rules in Painting rules also in the sister Arts; and who will pretend that French Tragedy has ever stood upon a footing equivalent with that occupied by French Comedy or Vaudeville? We think it right to make these few general remarks touching the present Exhibition; because, whilst all will acknowledge that it presents subjects of the first order of merit, it must yet be admitted that where the success is most palpable and indisputable the subject is not of the highest class.

In works of the severer school the present Exhibition is very deficient; and of those presented, the principal are tolerably well known to the art-public. Paul Delaroche's picture of "Lord Strafford Going to Execution," in the collection of the Duke of Sutherland, is perhaps best known by means of the fine engraving published of it. We cannot help observing upon the picture itself that it does not improve upon the engraving. The subject is solemn; the treatment mannered; and, above all, the colouring is sombre and monotonous; depressing with all the pigments which usually give warmth and life to a picture. This alone, in respect to such a subject, was an error fatal to success. The "Agony of Christ in the Garden," by the same artist, has many points of merit; but the expression of the face, though intensely painful, is not that which elicits the sublime amaze on.

"The Judgment of Solomon," by Schopin, is a powerful composition in many respects; but it wants breadth and keeping. The figure of the mother of the dead child has always struck us as exaggerated in attitude and *effronté* in aspect; and the colouring, from the preponderance of yellows, greys, and mixed tints introduced, is ungrateful.

Labuchere's picture of "Luther, Melancthon, Cruciger, and Pomeranius, Translating the Scriptures" is well known by the engraving published of it. It is a work of considerable merit: the expression of the faces being admirable but, as respects colour, more especially in the flesh tints, it is deficient.

That bid him tune the well-strung lyre,
Apollo's lay divine.

Now on the margin of death's stream,
Where fell the cold flu doth,
His boyhood's chime again at e'en
Came sweetly o'er the soul.

We listen'd; but the sounds I did caught
The fading earthly hue;
With something, 'twixt heaven-fraught
That spoke a language true

Which bid him leave the weary maze
Of the hard-trodden strand;
As upward then he fixed his gaze,
To join the spirit band.

No tolling more! He, too, has left
For that mysterious shore,
Where neither hope nor sighs avail—
A labourer here no more.

We give the tear to genius due,
The tribute of undying worth,
And bid a kindred spirit hail
That love-land of immortal birth

CECILIA MARY MEARES

BISHOP'S "EVENING BELLS."

(WRITTEN ON HEARING THEM ON THE NIGHT OF HIS DECEASE.)

As sun-rays in the chilling wind,
The liquid peals come faint but clear,
An echo of immortal mind,
By memory cherished dear.

As spirit roving in its might,
To burst its shackles vain,
About to take its last long flight,
Was gladden'd once again,

By those frail laurels hardly won,
Yes, oft too dearly bought,
His soul was cheer'd as o'er it shone
The tribute Genius sought.

Then slowly wending back to days
When first the genial flame
Inspir'd his sweetest melodies,
They heard those bells again.

The tones which spoke of youth and home,
Of zeal's expectant hours,
When Inspiration, taught by truth,
Expanded all his pow'rs,

And kindled into light the flame
That burn'd in manhood's prime—
May 8th, 1855.

MUSIC.

LABLACHE has reappeared at the ROYAL ITALIAN OPERA. He was welcomed on Saturday evening last by a crowded audience with every demonstration of the most genuine interest. The Queen and Prince Albert were present, and the Royal pair were observed to join warmly in the general applause. Her Majesty has always shown much regard for the illustrious veteran, to whose instructions she owes much of her proficiency in music and her taste and skill as a vocal performer. He appeared in his old and favourite character of *Dulcamara*, the quack-doctor, in the "Elisir d'Amore," in which he used of yore to shake the sides of the audiences at Her Majesty's Theatre. This was his first appearance in it on the boards of the Royal Italian Opera; the *Dulcamara* of this theatre having hitherto been Ronconi, who has not come to England this season. Nothing can be more unlike than the *readings* of the character as given by these two celebrated artists, and yet both are admirable. Ronconi's quack seems a literal copy of the quack of ordinary life; he is the very vagabond—shabby, sharp, cunning, and impudent—whom we can see gulling the bumpkins out of their pence at any English country fair. Lablache's charlatan is more of an ideal personage, and of a much more genial description. We are inclined, too, to think that his view of the character is that which is intended by the dramatist; for *Doctor Dulcamara* is not a mere strolling knave—he is a respectable person in his way—a man of substance, looked up to by the vulgar with the respect due to his station and magnificence, and admitted to the intimate society and confidence of the principal persons of the drama, who are guided and controlled by his influence. There is scarcely upon the stage a bit of more truthful and genuine comedy than Lablache's acting of it. On Saturday night he acted the part with all his usual good-humoured gaiety; but there was an evident falling off in his vocal powers, which it pained us to observe. His magnificent organ had lost much of its resonance and volume, and he brought out his high notes with visible effort. We trust, however, that this was only the temporary effect of the ungenial weather; and this seems the more likely from the circumstance that, on Tuesday, when he was to have repeated the part, he was unable to sing, owing to hoarseness. After the heavy losses our musical stage has suffered, we cannot afford to lose Lablache also; and we cling to the belief that he will yet be spared to us for a good long time to come. The "Elisir d'Amore" is admirably cast this season; with Bosio as *Adina*, Gardoni as *Nemorino*, Graziani as *Belcore*, and Lablache as *Dulcamara*, it forms as gay and delightful an entertainment as the Italian comic stage can possibly afford.

The first great novelty of the season—the "Trovatore" of Verdi—was produced on Thursday. Of this celebrated opera—its merits as a drama and a musical work, its performance, and its reception by the English public—we shall have occasion to speak fully next week.

THE ROYAL OPERA at Drury-Lane goes on with well-deserved success. Not only the company, but the whole arrangements of the theatre are much superior to what they were last year. The prima donna, Madame Gassier—would be an ornament to the greatest Opera-house in Europe. She is an intelligent, animated, and graceful comedian, and a singer of the very highest order. Her husband is a good actor, and an admirable baritone singer; Bettini is a light and agreeable tenor; and Susini, with a powerful bass voice, possesses considerable dramatic talent. The "Sonnambula," the "Barbiere di Siviglia," and "Don Pasquale," have been got up, and performed to crowded houses, with a completeness and excellence sufficient to gratify the most fastidious taste.

This establishment has gained such a hold of the public favour, that it is sure to prosper if it keep within its means, and do not attempt too much. In the first place, we hope the managers will confine themselves to Italian Opera, and not again commit the fatal mistake of having a German company as well; and, in the next place, that they will confine then selves to *comic* opera, and eschew altogether the more ambitious productions of the Italian stage. If they have the good judgment to follow this prudent course they will do well. Else, they will only split upon the rock which, by this time, they ought to have learned to avoid.

THE BIRMINGHAM FESTIVAL—the greatest provincial musical meeting in England, is fixed to be held on the four last days of August next. Its arrangements are already in a state of considerable forwardness, and are on a scale of magnitude equal to those of the greatest Festivals of former years. As formerly, the list of vocal and instrumental performers will include the highest talent that Europe can produce; and it is understood that more than one new and original work of great merit will be produced. The Birmingham Festival has peculiar claims to public attention and support. For three quarters of a century it has been the main support of one of the greatest benevolent institutions in England, the Old Hospital of Birmingham, an institution which, since it was opened in 1779, has ministered to the medical and surgical necessities of nearly 400 000 persons, of whom 90,000 have been in-patients. In the course of the last fifty-six years the hospital has been benefited by the music meetings to the extent of £66,460; and the last festival alone (in 1852) yielded to the hospital no less a sum than £4704. The great increase of the working population is rendering the demands upon this noble charity more and more heavy, and it is upon the expected proceeds of the approaching festival that reliance is placed for the means of meeting those demands.

THE STARS OF HEAVEN. Ballad. Sung by the same Author and Composer. Oliver.

THE STARS OF HEAVEN. Ballad. Sung by MRS. F. VALIANT, and composed by LOUISA M. B. VALIANT.—J. The Stars of Heaven. Addison and Hodson.

THE AUXILIARY SOLDIER. Song. Written by MRS. F. VALIANT, and composed by LOUISA M. B. VALIANT.—J. The Stars of Heaven. Addison and Hodson.

Above and beyond the claims which these songs possess on the score of graceful poetry, wedded to pleasing and appropriate music, the pieces before us possess an interest that must recommend them to all who have hearts across life to "melting charity," and sympathies for the less fortunate of their fellow-creatures. The ladies to whom we owe these pretty excretations for the piano and voice have consecrated their talents, and the produce which the patronage of the public may accord them, to two excellent societies: the first, the "Auxiliary Orly Museum;" the second, the "Southwark Ragged Schools." The "Absent Soldier" is a pathetic and smoothly-flowing melody, set in the key F Major, with a judicious introduction of an accidental natural A repeated (B B), passing into the normal B flat. The second composition, the "Stars of Heaven," is an easy ballad of moderate compass, and well deserves to become a drawing-room favourite. The verses are sweet, effective, and far above the namby pamby, which too frequently is the besetting sin of contemporaneous song-writers.

THE THEATRES, &c.

HAYMARKET. Miss Cushman on Friday achieved a decided triumph in the part of *Thèbe*, "the Actress of Padua," and heroine of a new version of Victor Hugo's "Angelo, Tyran de Padoue." A triumph achieved in a drama so repulsive to the tone of morality in this country is no small matter, and may be accepted as a test of histrionic genius. The creation of the French writer in this piece was to strip off the mask from respectability, and to degrade it in the presence of the social pariah, as an example of vice made worse by hypocrisy; and thus the mistress of Angelo assumes the dais of virtue, while the lady-wife stands below, convicted of infidelity a criminal protected by the conventional of artificial life. The state of society in Padua, as depicted by the poet, is completely demoralised, and thus a shadow of death is thrown over the entire action of the play; for all the characters, without distinction, are wretched and guilty. The main structure of the piece is melodramatic. Material incidents and stage properties are its stock-in-trade. Caskets of poison, phials of opiates, jewelled keys, memorial crucifixes, constitute, as it were, the furniture of the action; secret doors, oratories, and mysterious galleries, its scenery. All these are carefully prepared for and effectively introduced, while much of what should be understood as the motive of the drama is left unexplained, and of the grounds of character no interpretation whatever is attempted. How *Thèbe* ever came to believe that *Fredolfo* loved her, how it was that he contrived to establish so close an acquaintanceship, or what occasioned the strong interest needful to its existence,—these were points which the playwright transcended altogether in his haste to get at the situations that were to take the audience by storm. From these remarks the first act, however, must be excepted. Anything better than the introductory scene, in which *Thèbe* relates the story of her vagrant mother, and the simple cross with which she rewarded the compassionate service of the princely child, is not to be met with in the whole range of the drama. Passages of powerful writing are scattered in various parts of the dialogue, to which Miss Cushman gave the fitting prominence; and the last scene rises to a climax in which the sentiment of self sacrifice is made, as it were, to revel in its approaching consummation. Miss Reynolds, in the part of the unfortunate wife, was pleasingly pathetic, and her sorrows even acquired dignity and energy as they reached the crisis of her trial. The piece was, indeed, throughout well acted, well costumed, and scenically pictorial: and, altogether, may serve to demonstrate," not as *Pope* would say, "that," but rather thickly, that a strong tragic drama, if adequately acted, is not out of place on the boards of "the little theatre." We trust, however, that the next venture of the kind may be more English in its sentiment and manners, more purely dramatic in its spirit, and more original. An original drama not due to a foreign hand, but entirely home made. The house was crowded, and Miss Cushman was most unequivocally, as well as deservedly, applauded for the unwearied exertion that she manifested throughout a long, a difficult, and a laborious part.

ADELPHI.—Mr. Wright on Monday made his reappearance here in "Paul Pry"—and was, as might have been expected, enthusiastically received. His performance was distinguished by its ease and vigour; and we never recollect him more happy in his efforts at humour. His engagement is stated to be temporary only; but opinion runs in favour of its permanence. The house was well attended.

SADLER'S WELLS.—Mr. Keeley has, during the week, performed *Wild Meg*, in Mr. Mark Lemon's play of "Sea and Land;" and similar starring engagements are understood to be in progress for the continuance of a brief vaudeville season.

STRAND.—Since our last notice, Miss Glyn has performed at this house with her usual success, *Hermione*, in "The Winter's Tale," and *Lady Macbeth* and *Isabella*, in "The Fatal Marriage." Her engagement is renewed, and several characters are underlined, so that the audience will be able to judge of her in many phases. In all she has hitherto proved uncommonly attractive; and there is every reason to believe will continue to fascinate the admirers of our stern old drama with the beauties of a style formed in the most classical of histrionic schools.

BURLINGTON HALL (SAVILE-ROW).—A new entertainment has been opened here, under the title of "The Gaberlunzie Wallet," in which the speaking part is done by Mr. Andrew Halliday, and the singing *rôles* by Mr. Charles Weston and Mr. William Adam. The music to the songs (which are original) is by Mr. Leo Kerbusch. The songs are rude enough specimens of lyric verse, and Mr. Halliday has much to learn as a lecturer as well as a poet. But there is ability in him to do some things, which experience and acquired confidence will in time enable him to do well, but which he now does indifferently.

On Saturday a deputation of officers of the late British Auxiliary Legion waited upon General Sir De Lacy Evans, at his residence in Bryanston-square, for the purpose of presenting the gallant General with a congratulatory address on his return from the East.

A parliamentary paper issued on Tuesday contains a Treasury minute granting a special retired allowance of £1000 per annum to Sir Will am Burnett, Director of the Navy Medical Department. Sir John Liddell has been appointed his successor.

SOME OBSERVATIONS ON THE ORIGIN OF CHESS.

BY DR. DUNCAN FORBES.

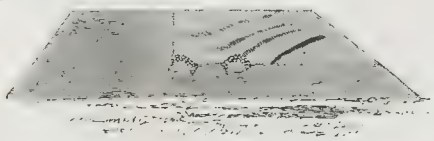
CHAPTER X, AND LAST.—THEORY AND PRACTICE OF THE SHATRANJ.

SECTION 3RD.—ON END-GAMES AND POSITIONS DRAWN BY FORCE.

We have seen in the last section that in the Shatranj a player lost the game, not only by receiving a checkmate, but by the mere circumstance of his being stripped of all his forces, while his adversary had any, however small, remaining. Even with this instance, we find that in the Oriental game the probabilities in favour of its ending in a draw were still very considerable, and the fact brings to light one of its defects or anomalies—proving at the same time that Chess, like all human inventions, even has been susceptive of progressive improvement. As a ludicrous instance of inconsistency in the Mediæval Game, I may mention that it sometimes ended in a draw, but from an absolute equality of forces, or anything near it; but owing to the peculiar powers and limited range of some of the pieces, these being such that they could not encounter their adversaries. For example, at 8s, suppose (as the books have it) that White remains with his King and a Bishop only; and that Black has, on his side, his King, has two Bishops, and five Queens—the latter all running on a different colour from that of White's Bishop. Well, here the Black has a numerical force equal to two Rooks and a Kn ght against a Bishop, which last is valued only as one quarter of a Rook; and yet, notwithstanding all this odds, the Black can only compel a draw; and yet, notwithstanding all this odds, the Black can only compel a draw; and yet, notwithstanding all this odds, the Black can only compel a draw

OPENING OF A TUMULUS AT ST. WEONARDS, HEREFORDSHIRE.

curious and unexpected manner, by the layers of different sorts of earth which had fallen into the hands of the men who had raised it. When the small mounds roofed with stones had been raised over the deposits of ashes, a circular embankment was first made round the whole, and from this embankment the workmen filled up the interior inwards to the centre. A little way from the outside is seen a dark streak, which defines with tolerable accuracy the form of the first embankment. This is earth of a different kind from that of the mass of the tumulus, and no doubt lies as it was thrown down the inner side of the first bank (perhaps from bas-



SECTION OF TUMULUS.

kets). Other similar streaks, but not quite so distinctly marked, are repeated as we proceed towards the centre; and, when the mound was more nearly completed, the labourers had made use of a large quantity of loose stones and rubble, which forms a very distinctly-marked layer, like a wide but shallow basin.

These various discoveries are so far satisfactory that they leave no further room for doubt—first, that the mound at St. Weonards is artificial: and, secondly, that it is a sepulchral monument;—and there is now every reason for believing that this is the case with all the other mounds of the same kind, on the Border. The antiquary and the historian are therefore indebted to Mr. Mynors for having set at rest a *vexata quæstio*. Unfortunately, no relics were discovered, to assist us in determining the people by whom this monument was erected. It belongs, however, evidently to that class which, as they bear no resemblance to anything known to have been made subsequently to Roman times, and as they present no marks of a decidedly Roman character, have been generally classed together as ancient British. Perhaps we may consider it as covering the last remains of some great Border chieftain of the earlier period of the Roman occupation of Britain. It is worthy of being recorded that Roman coins have been found in the churchyard of St. Weonards, which are now in the possession of Mr. Mynors, on whose ancient and picturesque mansion in the valley below this mound looks down. Tresgo is an early castellated mansion, probably of the fourteenth century, if not a century older, with a small round tower at each corner, and formerly inclosing a little court. When its present excellent and worthy proprietor fitted it up for a modern residence, it was necessary to make great alterations in the interior, but he has preserved as much as possible of the external appearance. Here the ancient family of Mynors has been situated since a period almost contemporary with the Conqueror, in whose train its founder is said to have come to this country; while branches of the same family became owners of the manor of Burghill, in Herefordshire, and of Westbury, in Gloucestershire. John de Miners, of Tresgo, was Sheriff of Herefordshire in the 16th Henry III.; and in his old age he was constituted by Edward II. keeper of the Castle of St Briavels, and of the forest of Dean. In the course of several generations, his descendants became connected directly, or by alliance, with nearly all the great Border families; and the present owner of these estates is the representative not only of the Mynors, but of the still more illustrious house of the Baskervilles, which claims direct descent from the Dukes of Normandy.

LAYING THE FOUNDATION-STONE OF HOLY TRINITY CHURCH, TULSE-HILL, NORWOOD.

FOR some time the inhabitants of Tulse-hill and vicinity have greatly felt the want of church accommodation; to provide which a public subscription has been opened, and the first stone of a new edifice was laid on Thursday week.

Sir Charles Decimus Crosley, Sheriff of London and Middlesex, having kindly undertaken to lay the stone, arrived on the ground at two o'clock, accompanied by the Rev. S. Bridge, Chaplain to the Sheriff; Mr. A. Crosley, Under-Sheriff; and a large number of ladies and gentlemen interested in the cause. The worthy Knight was received by the Committee appointed to carry out the undertaking.

The proceedings commenced with prayers, delivered by the Rev. J. W. Watson, M.A., the newly appointed Minister; after which the stone was lowered, and Sir Charles having spread the mortar, and placed the stone in its position, completed the ceremony.

After an eloquent address from the Rev. Mr. Watson, the Doxology was admirably sung by the pupils of the Westmoreland Schools.

The company then adjourned to a temporary building, where they partook of an excellent dejeûner; after which Mr. Nicholson, in eloquent terms, proposed the "Health of Sir Charles Crosley," passing a high eulogium on that gentleman. Sir C. Crosley returned thanks, and, in conclusion, passed a high compliment on their new pastor (the Rev. Mr. Watson), and congratulated those present upon having obtained his services.

After the toasts of "The Pastor," "The Committee," &c., Mr. E. L. Hayward, the hon. secretary, announced the subscriptions amounting to £300, expressing a hope and assurance that the sum still required (£1000) would, through their united exertions among their friends, be soon realised. The company then retired.

The Church—which is in the Early Geometric Decorated style—consists of chancel, with apsidal end; nave, north and south transepts; tower and spire at the north-west angle of the north transept. Spire 88 feet high.

The Church is designed to seat 1000 adults. An organ-gallery is also provided at the west end. The principal entrance will be on the north side, through the tower door, which will be divided by a stone shaft into two compartments, with heads of tracery, the intermediate spandril being filled with carved diaper-work.

The windows are to be tracerried, each being a distinct and original design. The prevailing form adopted in all the tracery is the trefoil, the church being dedicated to the Holy Trinity. The belfry of the tower contains on each side three deeply-moulded and recessed windows of one light, the heads being trefoliated, and the hollow mouldings in jambs heads being filled with the dogtooth ornament.

From an effective cornice, having carved gargoyles at the angles, rises the massive broach spire, with suitable lucarnes, or spire-lights, and surmounted with a suitable wrought-iron vane.

Internally the Church will be covered with a roof of one span (it being desired that no pillars or internal supports should exist), the principal timbers stopping upon moulded and carved stone brackets. The roofs will be open, with ceiling between the rafters, and boarding to receive the slates. The chancel arch will be richly moulded. The pulpit and desk will be of carved oak, and the font of Caen stone, richly carved. The walls are to be built of stock bricks, faced with Kentish rag-stone; and all the dressed masonry will be Corsham-down Bath stone. The foundations are concreted throughout. The parsonage will be of the Early Domestic English style.

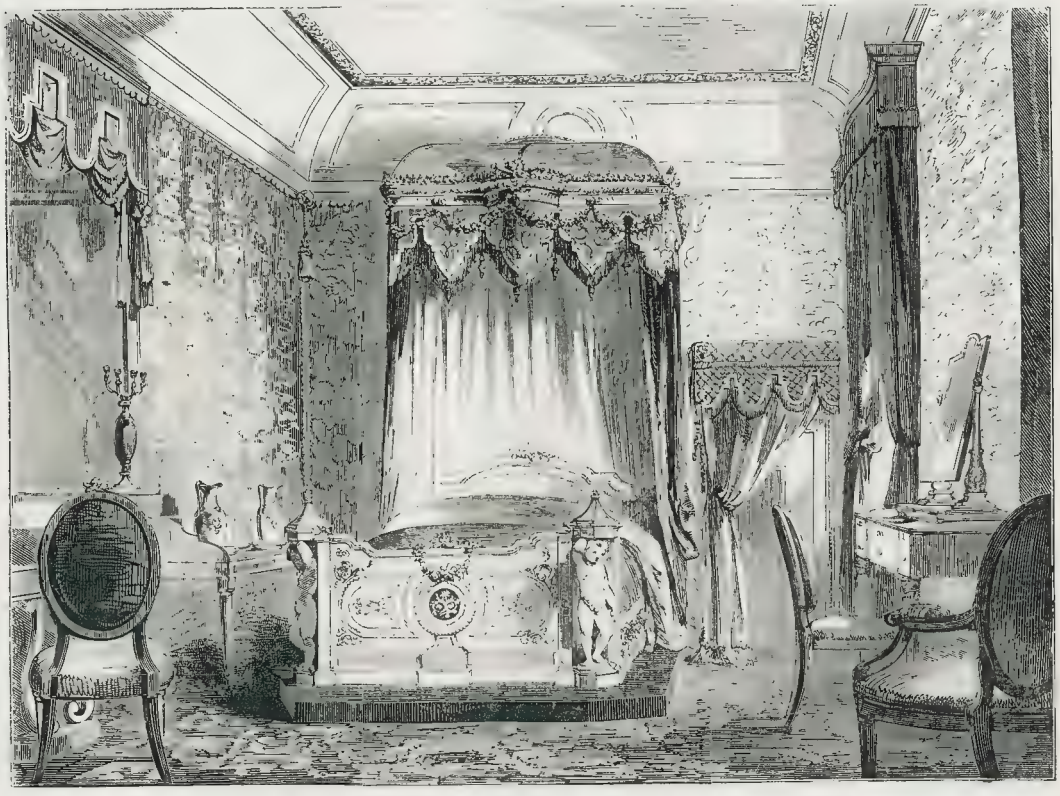
The total cost of both Church and parsonage, including complete fittings, drainage, fencing, warm water apparatus, gas lighting, and every expense, will be £7500. Taking into consideration the great size, substantial workmanship, and architectural pretensions of the Church and parsonage, and the distance from town, this will probably be the cheapest work of the kind ever erected in the neighbourhood of London.

The whole has been designed by, and is being carried out under the superintendence of, Mr. Thomas D. Barry, of 15, Lincoln's-inn-fields, and Liverpool.

THE OLD TOWN-HALL, LEOMINSTER.—(SEE PRECEDING PAGE.)

NEW CHURCH OF THE HOLY TRINITY, TULSE-HILL, NORWOOD.

THE EMPEROR'S RECEPTION-ROOM (VANDYKE GALLERY), WINDSOR CASTLE.



THE STATE BED-ROOM, BUCKINGHAM PALACE.—(SEE NEXT PAGE.)

TOILET-TABLE AT WINDSOR CASTLE

TOILET-TABLE AT BUCKINGHAM PALACE.

THE IMPERIAL APARTMENTS AT WINDSOR CASTLE AND BUCKINGHAM PALACE.

THE EMPEROR'S RECEPTION-ROOM, WINDSOR CASTLE.

This apartment (known to the public as the Vandyke-room) from the beautiful collection of pictures it [illegible] master which it contains, was handsomely refurnished for the Imperial [illegible] The chairs and couches are of white and gold, covered with green and gold damask. The curtains are of the same material, richly trimmed. The handsome pier-tables, with marble slabs, behind which and above rise the pier glasses; some cabinets of exquisite workmanship stand on the site opposite the windows. Three very elegant chandeliers, of cut glass, are suspended from the ceiling [illegible] and the [illegible] ranged; and but for the picture of Charles I. on horseback, a visitor could scarcely recognise the room. The carpet is of the richest velvet pile, and of a crimson ground, with a small pattern of oak branches placed in trellis fashion, at the centre of which is the garter surrounding a rose. Mr. Cross, of Wigmore-street, has the chief management of the redecoration here, as also in the other [illegible]

THE STATE BEDROOM, BUCKINGHAM PALACE.

This is a [illegible] apartment, newly [illegible] with blue figured silk. The glass over the mantelpiece and the [illegible] are draped with the same material, in the French style. The [illegible] hangings [illegible]. The curtains are of the same material [illegible] with the same silk, [illegible] The [illegible] linings, are of white Gros de Naples. The furniture, covered with the rose-coloured silk. The cabinets, [illegible] and marked ebonised wood, beautifully inlaid, and decorated with [illegible] the same beautiful description. The carpet is of [illegible] dark chocolate ground inclining to purple.

TOILET TABLE AT WINDSOR CASTLE.

This table is covered with fine Honiton lace hanging in festoons, and looped up near the top with gold cord and tassels. It [illegible] have each a deep border, the border or flounce [illegible] bottom of the table is nearly six inches [illegible] deep, and [illegible] each. The [illegible] of the table is of white satin [illegible] of oval form, is encircled by a moulding of pretty design [illegible] and [illegible] surmounted by the initial of the Empress [illegible] from this hangs a veil of beautiful lace, looped up so as to display the glass. It was manufactured at Mr. Cayley's, of Windsor.

TOILET TABLE AT BUCKINGHAM PALACE.

The next piece of a similar kind which we [illegible] of the Empress's Dressing-room in Buckingham Palace [illegible] enveloped in beautiful Honiton lace. There is a deep [illegible] be so termed, around the top of the table, hanging [illegible] glass is oval, with a handsome frame of white [illegible] upon two bases, upon each of which are seated a winged cherub, very nicely modelled, [illegible] in pure white. This glass is surrounded by a veil of lace, kept out from the frame by an ormolu rod passing from the sides of the table in a graceful curve until it reaches the centre above the glass, where it is a little flat, and sustains the slight fabric hung upon it. The body of the table is covered with rose-coloured silk damask: it is altogether an elegant design, and reflects great credit on Messrs. Holland and Son, its manufacturers.

THE TELEGRAPHIC PLATEAU OF THE ATLANTIC.—The basin of the Atlantic Ocean is a long trough, separating the Old World from the New, and extending [illegible] from pole to pole. [illegible] of furrow was probably [illegible] it to the south [illegible] [illegible] Arctic [illegible] city band; that there the waters which [illegible] [illegible] gathered together so as to let the dry land appear and fit the earth for the habitation of man. From the top of Chimborazo to the bottom of the Atlantic, at the deepest place yet reached by the plummet in the Northern Atlantic, the distance in a vertical line is nine miles. Could the waters of the Atlantic be drawn off so as to expose to view this great sea-gash, which separates continents and extends from the Arctic to the Antarctic, it would present a scene the most rugged, grand, and amazing. The very ribs of the solid earth, with the fossils [illegible] of the sea, would be brought to light, and we should have presented to us, at one view, in the empty cradle of the ocean, "a thousand fearful wrecks, with that fearful array of dead men's skulls, great anchors, heaps of pearl and inestimable stones, which, in the poet's eye, lie scattered in the bottom of the sea, making it indeed a sight of ugly death." The deepest part of the North Atlantic is probably somewhere between the Bermudas and the Grand Banks. The waters of the Gulf of Mexico are held in a basin about a mile deep in the deepest part. There is, at the bottom of the sea, between Cape Race, in Newfoundland, and Cape Clear, in Ireland, a remarkable steppe, which is already known as the telegraphic plateau. A company is now engaged with the project of a submarine telegraph across the Atlantic. It is proposed to carry the wires along the plateau from the eastern shores of Newfoundland to the western shores of Ireland. The great circle distance between these two shore lines is 1600 miles, and the sea along this route is probably nowhere more than 10,000 feet deep.—*Professor Maury.*

BARNUM'S ELEPHANT.—Passengers who travel by the New York and New Haven cars have a grand chance of seeing the elephant." Going from New York, the cars pass the farm of P. T. Barnum, a mile or so before reaching Bridgeport, Ct. On that farm, [illegible] to [illegible] from the railroad, an elephant may be seen every pleasant day attached to a large plough, and doing up the "sub-soiling" in first-rate style, at the rate of about three distinct double-horse teams. The animal is perfectly tractable. His attendant rides him, while a coloured man guides the plough. The elephant is also used for carting large loads of gravel in a cart arranged purposely for him, and in drawing stone on a stone boat or drag, in piling up wood, timber, &c., and in making himself generally useful.—*New York Tribune.*

Numerous arrests of a political nature have been made made at Cesena, Forli, and Ravenna.

DEFENSIVE PREPARATIONS AT ODESSA.—[illegible] months a great change in the outward appearance of [illegible] much so, that persons who were here last year would [illegible] Instead of the former commercial bustle and activity, the place is quiet and nearly deserted by civilians, who, in dread of a bombardment, have mostly shut up their houses, and retired to the interior of the country, taking with them their families and the most valuable part of their movable property. Not a single merchant ship is now to be seen in the harbour, the numerous workmen employed in [illegible] the corn warehouses up [illegible] the [illegible] and the [illegible] owing to the scarcity of the general necessity. Our [illegible] now [illegible] money. [illegible] to preserve [illegible] delight [illegible] have no confidence in the [illegible] Russians, nor do they evince any enthusiasm for the cause of the Emperor. From the number of spies about, they, however, feel and think more than they say, for they are looked on with suspicion, and every word that escapes them is subject to especial examination from the numerous secret agents of the police. This is especially the case with the foreigners resident here, and even the Consuls of neutral and friendly Powers are not exempt from this system of espionage. These now have an opportunity of looking behind the curtain which [illegible] [illegible] at the scandalously vaunted patriotism of the Russians right [illegible] [illegible] is really worth. Even the outside observer [illegible] [illegible] when a made-up despatch [illegible] [illegible] unpatriotic [illegible] [illegible] over the enemy. Soldiers [illegible] and even [illegible] [illegible] [illegible] [illegible] be studied, for a bed of feathers, [illegible] [illegible] amputation of a limb, and when hovering between life and death [illegible] Soldiers are apt to speak their minds freely, and communicate [illegible] [illegible] very feel and think without much fear of the knout in perspective, it being very problematical whether they shall live to undergo once more that [illegible] punishment, to which they have been accustomed all their days.—*Letter from Odessa, April 28.*

A DAY AT THE ALDERSHOTT CAMP.

IT is but a short time since the formation of a military camp at Cobham was considered by many as a useless experiment; and events have, however, shown the importance of this step, and the necessity for providing the means of instruction and preliminary practice in the larger operations of warfare.

Forty years' peace had nourished the growth of science and knowledge. We had to some extent become aware that the strength, life, and moral condition of man could only be satisfactorily sustained by attending to those rules of nature which require proper shelter, clothing, food, good water, and an atmosphere unpolluted by animal or vegetable refuse. Notwithstanding our advanced information, the arrangements of the Chobham [illegible] [illegible] [illegible] had been made at the time of the Peninsular War. We have, however, of late been [illegible] [illegible] of these fine soldiers of all ranks (and [illegible] [illegible] [illegible] pomp and glitter of Chobham, [illegible] [illegible] [illegible] plain that the majority of them were not killed in the midst of battle, but by the want of forethought and proper management. This consideration causes us to look with an anxious eye to the new Camp at present in progress at Aldershott; and as many of our readers will have a similar feeling, we will give them the following brief notes of a visit to the place.

Motioning it in the first place, that the Camp can easily be reached from two stations on the South-Western Railway, viz., Farnborough and Farnham, we will start by the seven o'clock morning train from Waterloo-bridge station. At that hour the smoke from the thousands of chimneys [illegible] [illegible] not [illegible] full operation, it is evident, the [illegible] of these various steels is not satisfactory. We, however, [illegible] [illegible] [illegible] [illegible]

The contents are the prices, weights, and patterns of new and second-hand Silver Spoons and Forks, Tea and Coffee services, Waiters, Cruet Stands, Candlesticks, Candelabra, and other Articles of Silver-plated Spoons and Forks.—A. B. Savory and Sons (opposite the Bank of England), 54 and 55, Cornhill, London.

BANK NOTES.—The full value given in CASH for DIAMONDS, PEARLS, OLD GOLD, and SILVER, GOLD and SILVER LACE, and ENGLISH and FOREIGN COINS, at 8s. 11M DEAN and CO.'S, 9, Coventry-street, Leicester-square. Irish Serials, Dean and Co.'s Foreign Coins Exchanged. N.B. A large assortment of Jewellery, Plate, and Pastel Goods to be sold at very reduced prices. Gold Watches, 44 10s.; Silver Ditto, £3 10s.; warranted.

SPECTACLES.—The best and only safe way of [illegible] with Spectacles is by means of SMITH'S [illegible] by Messrs Bland and Long. By this means [illegible] and the proper focus of the Spectacles at [illegible] most unerring manner.—BLAND and LONG, Opticians, 153, Fleet-street.

SLACK'S NICKEL SILVER is the hardest and most silver-like metal ever introduced. Made into every article for the table. A sample a pose sent free for ten postage stamps. Full [illegible] of a entire plated. Catalogues sent free.—8, and 9, Slack, 336, Strand

OPERA-GLASSES, of the very finest quality, a CALL HAN'S, Opticians, 63, Great Ormond-street, Bloomsbury, [illegible] Theatre, Opera, and Field Glasses, the Crystal Palace Improved Glasses, the size of your thumb only, yet so powerful that they will distinguish a man distant. Price 10s. 6d. each; can be had at the Booksalls, at the Railway Stations, or will be sent post-free, on receipt of stamps or money-order, payable to William Callaghan, as above

AT the CRYSTAL PALACE and the ensuing PARIS EXHIBITION.—TAILBY'S, of Nottingham) Newly Invented COTTAGE PHAETONS, of various shapes, and COTTAGE DOG-CARTS, for two or four wheels. They are of light make and some can [illegible] steel spindle ramper. Different from all others. The head is [illegible] connected, and when required, but instantly available, forming a close carriage when wanted. Greater accommodation, simplicity, and economy, with much less weight, than other carriages. Also, PONY BASKET CARRIAGES, holding four persons, made and sent for a few shillings per luggage.—Apply, to any part of the Kingdom, to T. TAILBY, Carriage Manufacturer, Nottingham.

THE CLIFTON SODA-WATER, prepared by [illegible] particularly offendless in all cases of indigestion, [illegible] acidity, and all [illegible] Sold in Bottles, 1s. per dozen; Soda Water. In the Crimea it would be [illegible] bottles, 3s. per dozen, six dozen in a hamper forwarded [illegible] 30s. The Bristol Mineral Water, an aperient quality, 1s. per dozen. [illegible] long voyages, or to take abroad, as it will keep good [illegible] Orders punctually attended to. JAMES SOLTON, Chemist, 11, Regent-street, Bristol. [illegible] Post-office Orders payable to JAMES SOLTON

11, REGENT-STREET, LONDON

MR. MECHI has OPENED a NEW ESTABLISHMENT at 11, REGENT-STREET (opposite Vigo-street, where [illegible] goods will be found. Ivory, Bone, and Pearl Dressing-cases, Bagatelle and Work Tables, Papier Mâché Manufactures and Dressing Bags, and other articles of Elegance, suitable for presentation

AT MR. MECHI'S ESTABLISHMENTS, 112, A, Regent-street, and 4, Leadenhall-street, London, are exhibited the finest assortment of Papier Mâché Manufactures and Dressing Bags, and other articles of Elegance, suitable for presentation

MR. MECHI'S ESTABLISHMENTS, 112, A, Regent-street, and 4, Leadenhall-street, London, are exhibited the finest assortment of Ivory, Bone, and Pearl Dressing-cases, Bagatelle and Work Tables, Writing cases,

IMPERIAL PRESENT TO THE LORD MAYOR.

THE Lord Mayor has been honoured by the Emperor of the French with a very gratifying testimonial of his Imperial Majesty's high satisfaction at his reception by the Chief Magistrate and the Corporation of London.

On the Monday after the Emperor and Empress had quitted England, the Lord Mayor received a magnificent snuff-box, accompanied by the following letter, addressed to his Lordship by the French Ambassador:—

Albert-gate House, April 22, 1855

My Lord Mayor,—I am commanded by the Emperor to transmit to your Lordship the casket which accompanies this letter, containing a snuff-box bearing the cipher of his Imperial Majesty.

The Emperor is desirous that you may preserve this remembrance of his presence in the city of London as a token of his gratitude for all the attentions you have paid on that occasion.

Accept, my Lord Mayor, the assurance of the feelings of high consideration I entertain for your Lordship

(Signed) The Ambassador of France, WALEWSKI

The Right Hon. the Lord Mayor of the City of London.

The Lord Mayor returned the following answer:—

Mansion-house, April 23, 1855

Monsieur l'Ambassadeur,—I have received with profound gratitude the most splendid souvenir which her Imperial Majesty has desired your Excellency to present to myself.

I shall indeed ever preserve it as a memorial of an event which, I trust, in its present aspect, and in its future effects, will redound to the glory of both our nations, and to the peace and happiness of the entire world

The pleasure with which I receive this token of his Imperial Majesty's remembrance is enhanced by the fact, that the auspicious event it commemorates has occurred during my mayoralty, to which distinguished office I was unanimously elected by my fellow-citizens

May I pray your Excellency to make these my sentiments known to his Imperial Majesty, and to accept the assurance of the high consideration with which I remain, Monsieur l'Ambassadeur, your faithful and obedient servant,

(Signed) FRANCIS GRAHAM MOON.

To Monsieur l'Ambassadeur to his Imperial Majesty the Emperor of the French.

The superb gift is a gold snuff box, the ornamentation of which is of beautiful design. The lid bears the Imperial cipher "N" in large brilliants, in testimony of "the lively and grateful remembrance which his Imperial Majesty the Emperor of the French retains of the reception he met with on the occasion of his visit to this great city."

TESTIMONIAL PRESENTED TO THE LORD MAYOR BY THE EMPEROR OF THE FRENCH.

THE PARIS EXHIBITION.

THE Government officials persist in their assurances that the Exhibition will be opened by the Emperor on the 15th of May; but as they were equally confident in assuring the public that the opening would take place on the 1st, there seems to be a good deal of doubt on the matter, more especially as the amount of work which still remains to be done before everything can be in order is no very great. Meanwhile the preparations are going forward rapidly in some of the departments.

In the English ground floor section great progress has been made by the exhibitors of Birmingham wares and furniture. Smee and Sons, and other English firms, have already arranged for the opening. In the galleries the English are equally conspicuous for their advanced state. The strange architecture of India is growing under the eyes of Mr Digby Wyatt: the central tent, gay with the bright dyes of the East, is already fixed. Nottingham is lining her sombre cases with yellow. De la Rue's case is receiving the remarkable combinations of colours loved by Owen Jones. Mr. J. C. Spurin, of New Bond-street, has already fixed his model farm: and against the southern walls various scientific gentlemen are arranging specimens of English printing and English photography. In the English Engineering Department a long stall of models, of Gravesend Pier, various lighthouses, &c., has been fixed and covered up. Hercabouts, also, Widdey and Co. have arranged the cocoa-nut fibre matting.

Passing westward through the Belgian and German Galleries (space, an activity almost equal to that of England is observable. Already many Belgian stalls are finally arranged, and covered with cloths, to be removed on the 10th inst. only. Bonnefoy and Roux, of Brussels, have arranged an effective still of carving and glass against the southern wall of the building. In the German Gallery space there is a Berlin-wool trophy, displaying every possible shade of the remarkable production, from the lightest buff essential to the wing of the unreal down to the chocolate ground of the suburban kettle-holder. In the Western Gallery Spain, Portugal, and Switzerland are hard at work, but display nothing at present.

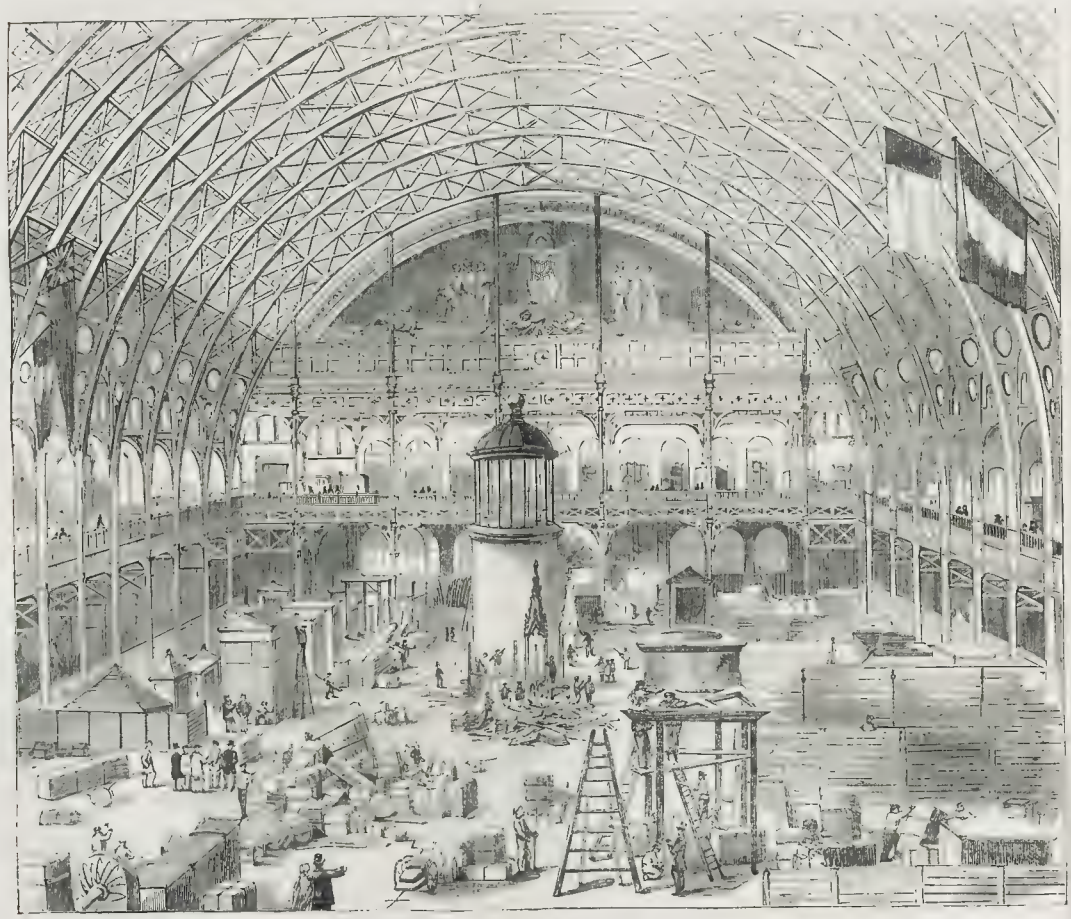
Some activity is now fairly perceptible in most of the French Courts. Counters are being covered with blue calico to show off ceramic manufactures, and a dull green ground pervades the court devoted to plastic ornaments. In this court exhibitors have already deposited some excellent specimens of Parisian taste and skill in modelling. Solon has some well-executed figures in carton-pierre; and there is an exceedingly pretty design, in red material, for gilding, by Vidal, representing an Allegory of Peace. Designs and modelling, indeed, appear to be the department of the Exhibition everywhere most advanced. The Germans are nearly ready with their plasters. In the English Gallery Mr. Digby Wyatt has already arranged his series of designs for various publications, and in the Belgian Gallery space stalls of designs are grouped

The accompanying View was sketched on the 27th ultimo.

DEATH OF MR. W. DEVONSHIRE SAULL. This kind-hearted gentleman (whose name will be remembered in the list of "Gratuitous Exhibitions" of the metropolis), died on the 26th ult., at his house, in Aldersgate-street, in his 72nd year. He was a member of the Geological and Astronomical Societies, and of the Society of Antiquaries: to the latter he communicated, in 1841, some observations on the discovery of some British, Celtic, and Roman remains in the neighbourhood of Dunstable; and he communicated to the Geological Society some observations on a notion of planetary influence on the globe, which were not allowed to be printed. In the *Literary Gazette* his views in regard to politics and religion, as well as science, are stated to have been anything but orthodox. He will, however, be remembered for his liberality in allowing to be visited by the public, on every Thursday, a very interesting Museum, which is thus described in the "Curiosities of London":—"The antiquities, principally excavated in the metropolis, consist of early British vases, Roman lamps and urns, amphoræ, and dishes, tiles, bricks, and pavements, and fragments of Samian ware; also, a few Egyptian antiquities; and a cabinet of Greek, Roman, and early British coins. The Geological Department contains a museum of the late Mr Sowerby, with additions by Mr Saull, together exceeding 20,000 specimens, arranged according to the probable order of the earth's structure. Every article bears a descriptive label; and the collection of the antiquities, some of which were dug up almost on the spot, renders these relics so many medals of our metropolitan civilisation." We are not aware of Mr. Saull's disposition of his museum; but it was understood to be his intention to bequeath it to some public institution, by which means it will be more accessible than it was in his lifetime.

TOPOGRAPHICAL EXPLANATIONS.—It may be as well to mention that the large work which is alluded to in the English and French despatches as the "Mamelon Redoubt," is called by the Russians the "Kamschatka Redoubt." The "Kornileff Bastion," which is frequently referred to in the Russian despatches, appears to be the work immediately in front of the ruin of the old Round Tower, and now known as the Malakoff Batteries. The ravine which in the English Camp is known as the "Middle Ravine," or sometimes the "Otchakov Ravine," is always spoken of as the "Karabelnaia Ravine" in the French despatches. The French have given this name to it because, in winding round to terminate in the valley of the South Harbour, it passes by the Karabelnaia suburb. (See *Letter from the Camp*.)

THE grape disease has again made its appearance in many parts of Portugal. The orange and lemon trees, in addition to the blight with which they have been attacked, have been injured in the roots by a worm which was destroying the trees



INTERIOR OF THE PARIS INDUSTRIAL EXHIBITION BUILDING.

THE FLOATING BATTERY "ETNA" ON FIRE, AT MESSRS. SCOTT RUSSELL AND CO.'S WORKS, MILLWALL.

DESTRUCTION OF THE "ETNA" FLOATING BATTERY.

As we mentioned briefly last week, the *Etna* floating-battery, built by Messrs. John Scott Russell and Co., which was to have been launched on Saturday last, was destroyed by fire on the night of the 3rd instant. The foreman of the battery went over the works as late as a quarter to nine that evening, when it appeared perfectly safe, and that within twenty-five minutes afterwards flames were seen encircling her port side as well as underneath. The fire had been kindled outside, and the flames being exposed to a strong north-easterly gale were wafted through the port-holes into the interior of the battery, and all attempts to check the progress proved ineffectual. The most strenuous exertions were made

REMAINS OF THE FLOATING BATTERY "ETNA," AT MESSRS SCOTT RUSSELL'S, MILLWALL.

collect the various hands together; but, before any one could render the least assistance, the flames rushed between the iron plates of the battery, firing every foot of timber from the stem to the stern; and eventually the heat became so great that the iron plates, 2 inches thick, started in sundry places, when the flames rose upwards of a hundred feet high, lighting up the east end of the Surrey side of the water. The reflection of the flames was so strong, that it was impossible to tell from a distance on which side of the river the fire was raging, and many of the engines were driven as far as Deptford before the firemen could ascertain the exact seat of the disaster. About eleven o'clock a frightful scene took place, as the ponderous vessel, in a thorough state of ignition, glided off the stocks most majestically into the river, amidst the shrieks of some thousands of people who were in boats at the mouth of the dock. Several persons were so frightened that they jumped into the river, but they were fortunately rescued by the Thames police and watermen. The loss caused by the fire—which is strongly suspected to have been the work of an incendiary—is estimated at from £80,000 to £100,000.

FOREIGN AND COLONIAL NEWS.

FRANCE.

(From our own Correspondent.)

PARIS, Thursday.

As may be supposed, the sudden and unexpected changes that have taken place among some of the high functionaries here form the great subject of conversation and interest. A thousand reports and conjectures are whispered about concerning the resignation of M. Drouyn de Lhuys, none of which, however, we feel justified in repeating. M. de Persigny is, we think, likely to be popular in England. His knowledge of the country, the society, and the people, acquired during his residence with the Emperor, when Prince Louis Napoleon his firmness of purpose, his intelligence, and composure of tone and manner—are all calculated to produce a favourable impression on the minds of our compatriots.

The latest intelligence respecting Pianori states that he has already suffered several condemnations in Italy; on what grounds has not yet transpired. He appears to have arrived in Paris better provided with money and clothes than there is any likelihood he could have obtained by his labour, and the pistol used in the attempt was one of considerable value. The sentence pronounced on the intended assassin is what was generally anticipated from the time it was known that he was to be submitted to the ordinary course of jurisdiction. It appears that some of the Senators, on the day after the attempt, went to the Tuileries, to consult with the Emperor on the subject; his reply is said to have been—"Je veux que cet homme soit juge comme s'il avait tiré sur un plâtrier de la plaine St. Denis." Innumerable, as may be supposed, are the reports relative to the event and its causes. Some assert that the assassin belongs to a vast secret society, different branches of which are scattered through various countries, and that each branch has appointed two delegates for this purpose, designed by the drawing of lots; others, that it is a party in the south that has employed Pianori (or Pianoli). None of these conjectural reports are in any degree corroborated by his testimony, in which he has never ceased to assert that his motive in the attempt was to carry out the vengeance he had sworn to perform when the siege of Rome was the cause of the ruin of his family. When in the Conciergerie, a photographic portrait was executed of Pianori, that, by distributing copies wherever there seemed to be any clue to his identification, further details respecting him may be obtained. A providential circumstance, but little known, seems, in some degree, to have contributed to the security of the Emperor on this occasion. The écuyer of the Empress, the Baron de Pierre, being ill on the day in question, the Emperor directed that M. de Valabreque, who habitually attended himself, should follow the carriage of the Empress, in order to fill his place; by this means his Majesty was left with M. Edgar Ney, who rode on his left. On the arrival of M. de Valabreque, the Empress, as if warned by a presentiment, refused to accept his escort, and desired him to return immediately to resume his post. It was within a few paces only of the spot where he took his place on the Emperor's right—the side from which the shot was fired that the attack was made, and there is no doubt but that this circumstance operated materially in falsifying the aim of the assassin.

Paris is beginning to fill perceptibly, but hardly to the degree that was anticipated, for the expected opening of the Exhibition. It appears now highly uncertain whether matters will be sufficiently advanced by the 15th to allow of the event taking place; and, indeed, we suspect that, if the month of May sees it occur at all, it will be the utmost that may be expected. As yet very few season tickets have been taken. The price of entrance during the month of May is to be 5 francs.

The Cercle de l'Exposition is sending round volumes of circulars respecting its plans, views, and intentions, and appealing to the *notabilities* of the capital to aid it in doing the honour to the celebrities of all classes and all countries about to be therein collected. All the *commissaires* sent by their various nations for this occasion have received letters of invitation, gratis, from the club; and furthermore, it has placed at their disposal a set of chambers belonging to the hotel, for the accommodation, free of expense, of such of their compatriots—members of the Cercle—who shall arrive in Paris unprovided with lodgings, until the day after their entrance.

On the 3rd the Emperor and Empress inaugurated the magnificent Horticultural Exhibition in the Champs Elysées—of which we gave our readers a recent account.

Preparations are being made for the departure of their Majesties for St. Cloud, to pass the commencement of the summer.

A singular accident occurred a few days since to Madame de Poize, one of the new *dames d'honneur* to the Empress. The horses of her carriage ran away in the court of the Tuileries, and, upsetting the vehicle, broke her leg, and considerably injured both the coachman and footman. It is hoped that the results of this distressing occurrence will not prove very serious.

It is a subject of remark that the nephew of the Duke of Wellington (Lord Cowley) presented to the nephew of the Emperor Napoleon an address of congratulation on his recent escape on the anniversary of the death of Napoleon I.

The Opéra Comique is busily occupied in preparing for representation the new opera of MM. Auber and Scribe—"Jenny Bell." Shortly after it is to follow the work of M. Gevaert—"Le Roveneal," in one act. At the Jardin d'Hiver is being produced a new plan, in high relief, of Sebastopol with all the latest works; executed by a first-rate modeller, M. Bauerkeller, from an original taken on the spot by M. C. Leger. It is on an extremely large scale; and, from the grandeur of the effect and correctness of the details, is full of interest and instruction. The reopening for the season of the Hippodrome has been a point of general attraction. One of the principal novelties on this occasion is the appearance of three of the Bushman race—two men and a woman—who vie with each other in singularity, hideousness, and the absence of all that most distinguishes the human from the brute race. The exhibition of these extraordinary creatures has produced some curiosity, but has not proved generally popular.

AMERICA.

The mail steam-ship *America*, which sailed from Boston on the 25th ult., arrived at Liverpool on Tuesday. The news by this arrival is meagre and uninteresting.

A despatch from Detroit, dated April 1, says that on that morning the propeller *Oregon*, of Cleveland, about four miles above that city, exploded, killing ten persons, and severely wounding several others. The explosion was caused by a defect in the boiler. The steamer was completely shattered, and shortly afterwards sank. Another steamer—the *William Knox* —from Cincinnati for St. Louis, was destroyed by fire on the 23rd ult., below Louisville. The boats were full of passengers, but all were expected to be saved by a steamer seen alongside.

In the Supreme Court of New York, on the 19th ult., a verdict of 15,234 dols was returned against Phineas T. Barnum, for Crystal Palace shares, bought at the time he assumed the Presidency.

THE WAR IN THE CRIMEA.

The news from the Allied Camp is unusually barren of incident this week. The letters, which come down to the 28th ult., report that there has been a little skirmishing in the night, a little firing in the day—not much of either, but just sufficient to show that we are still at war, and have not raised the siege. The enemy appear to have everywhere repaired the damage which was done to their works by the late fire from our batteries. On our side, it having been made evident that neither the proximity nor the weight of metal was sufficient to accomplish the desired object of silencing the hostile works, vigorous steps are being taken to remedy the deficiencies. Heavy guns, which were in the batteries of the first parallel, are being removed into the advanced work. Other batteries are being thrown up still further in front. Batteries which at the first bombardment were armed with 24-pounders, replaced at the late fire by 32-pounders, will now be wholly armed with 68-pounders. The late fire has shown, too, where other batteries were required, and some of these are already completed and armed, while others are in progress. The French have also thrown up a new battery on the right, and have added generally to the power of their works.

On some days the fire has been so slack that not more than twenty or thirty round shot have been fired for a whole day from the English lines, and the Russian and French works are said to be equally silent. Our tramway is taxed to its utmost, and each day large stores of ammunition are forwarded. Before the bombardment will again commence, 2000 tons of powder and shot are required at the English works alone, in addition to the daily supply of 150 tons of shot and shell. All the vessels in Balaclava having cargoes of shot have been required to discharge them immediately, and all vessels now using ordnance shot as ballast are also ordered to land them.

One hundred and fifty tons of shot and shell, and one hundred and twenty tons of powder, were forwarded to Camp on the 27th, with twelve more guns, taken from the *Lancaster*. The latter are six 32's and six 56's. Beyond these facts, and that they were sent to the trenches, when our works were progressing very slowly, there is literally nothing to chronicle connected with the English portion of the siege. On the side of our allies they are said to be getting on better, though even they are represented as not keeping pace with the enemy's defensive preparations.

The sanitary reports of the English army are very gratifying. The army now consists of 18,690 rank and file, exclusive of sergeants, drummers, seamen, marines, mounted staff corps, cavalry, artillery, or engineers, under arms, and also exclusive of those on camp duties. If sergeants and rank and file of cavalry, artillery, and infantry were reckoned, still, excluding the remainder of the above, we should have within a fraction of 24,000 bayonets.

General Canrobert, in a letter addressed to the Emperor, dated April 28, thus expresses himself:—

It is with pleasure that I announce to your Majesty that the English army, always so solid, has become as fine and healthy as it was in the first days of its arrival in the East. It is receiving reinforcements in infantry, in cavalry, and in means of transport. I continue to live on the most cordial terms with Lord Raglan, and the two armies continue to be closely united, and count one upon the other.

The general belief is that the Allies were to commence operations on a large scale as soon as the reinforcements have arrived. A telegraphic despatch from the Crimea of the 1st inst. announces that General Marmora had arrived with 4000 Piedmontese troops. The French army of reserve at Maslak was also about to go to the Crimea.

In consequence of alarming rumours from Eupatoria, Omer Pacha had returned from Baliclava, and made a reconnaissance towards Sax. The Russians would not venture on a battle, but an attack was anticipated from them.

THE VIENNA PROTOCOLS.

THE whole of the papers relating to the negotiations at Vienna on the Eastern question are now before the public, but their very great length forbids our giving more than a summary of their contents. They consist of the Memorandum communicated by the Three Powers to Prince Gortschakoff on the 28th December, 1854; and fourteen Protocols, which profess to give the substance of what took place at each Conference. The Memorandum contained a definition of the Four Points—the abolition of the Russian Protectorate over the Danubian Principalities; the free navigation of the Danube; the revision of the Treaty of 1841, with a view "to connect the existence of the Ottoman Empire more completely with the European equilibrium, and to put an end to the preponderance of Russia in the Black Sea;" and, lastly, the abrogation of all treaties under which Russia has claimed an official protectorate over the Christian subjects of the Sultan—the latter guaranteeing the religious privileges of the different Christian communities in Turkey.

At the first Conference, which was held on the 15th of March, Count Buol, who had been appointed president, stated that "the bases of peace," as explained in the memorandum, "had been communicated to the Russian Envoy," and that "he was authorised to adhere to all the principles laid down, and was ready to adopt them as a point of departure for the negotiations." Baron de Bourqueney and Lord John Russell then stated the determination of their respective Governments "to pursue the career of sacrifice until the four principles mentioned by the Austrian Plenipotentiary shall have been placed, with all their consequences, in the public law of Europe," and at the same time reserved the right of making such special conditions, over and above the four guarantees, as the interests of Europe might require, in order to secure a return of the existing complications. Prince Gortschakoff was also desirous to promote peace, and hoped that they had all a common object in wishing to secure a general peace, "a peace which cannot be lasting, or have any practical value, unless it be honourable for both parties." He added that, "if conditions of peace were wished to be imposed on Russia which should not be compatible with her honour, Russia would never consent to them, however serious the might be consequences."

The Russian Envoy (after an ineffectual attempt to obtain the admission of Prussia to the Conference) consented to the complete and permanent abrogation of the treaties formerly existing on the subject of the Principalities between Russia and Turkey; and the future condition of those provinces was to be settled by a firman act of the Porte, providing for the maintenance of all the privileges and liberties of the Moldo-Wallachians and the Servians, under the amicable sanction of the Great Powers. All exclusive protection was to be abolished, and the Russian Plenipotentiaries showed a singular and laudable, if it were genuine, zeal that the franchises of the people in these provinces should in nowise be abridged. The definitive arrangement of a scheme for the administration of the Principalities was referred to a committee, which was to wait for further instructions from Constantinople.

The question of the Danubian navigation was in like manner settled without much difficulty. Russia protested that she had never contested or opposed the commercial freedom of the river, and that the obstacles which had arisen proceeded from natural causes only; to which remark Baron Prokesch drily replied that, although he in no respect questioned the good intentions of the Russian Government on this subject, it unfortunately happened that the results were incontestably at variance with her professions. The arrangement eventually agreed upon provided that the principles established in 1815 with reference to the other navigable rivers of Europe should be applied to the Danube and guaranteed by all the Powers, and that a commission of all the Great Powers should be appointed to take all the necessary steps for opening and protecting the free navigation of the river. Russia agreed not to re-establish her quarantine on the Sulina mouth, and that no fortifications should be erected between the channels of Sulina and St George

On the 27th of March the Plenipotentiaries arrived at the discussion of the Third Point, upon which Count Buol proposed that the Ministers of Russia and of Turkey should, in the first instance, be requested to state respectively to the Conference the means by which they proposed to give effect to this general stipulation. This courteous proposition was assented to by France and England, but declined by Prince Gortschakoff, who stated that he was not in a condition to take the course suggested by Count Buol, and an adjournment was then agreed upon for the purpose of allowing time for Ali Pacha to arrive from Constantinople. M. Drouyn de Lhuys from Paris, and further instructions from St. Petersburg. Austria urged the expediency of proceeding in this interval of time to the discussion of the Fourth Point, and Russia strongly supported this opinion, but the French and English Envoys were ordered by their respective Governments to abstain from discussing the last point until the third had been settled.

On the 17th of April, after an interruption of eighteen days, the Conference resumed, in order to learn the result of the reference to St. Petersburg. Prince Gortschakoff at once declined to accept the offer made him at the former meeting, and to originate any proposal; but he added, that Russia was prepared to take into her serious consideration any means which might be proposed, provided they were not of a nature to infringe on the rights of sovereignty of the Emperor of Russia in his own dominions. Upon this announcement M. Drouyn de Lhuys (who was now present) expressed his regret that, after eighteen days' delay, the Russian Plenipotentiaries had no better communication to make to the Conference; he therefore proposed that the Allied Powers should immediately meet to agree upon a proposition; and he ended by asking Prince Gortschakoff whether Russia would consider her rights of sovereignty infringed if she deprived herself of the liberty of building an unlimited number of ships of war in the Black Sea? To this home question Prince Gortschakoff replied that "Russia would not consent to the strength of her navy being restricted to any fixed number, either by treaty or any other means."

Lord John Russell could not disguise the surprise which Prince Gortschakoff's statement had caused him. The sole object of the surrender of the initiative to Russia was to give her the opportunity of making proposals consistent with her honour. History recorded more than one instance of great and glorious boyo-reigns having consented to a limitation of their rights of sovereignty in their own territory, being animated with the desire of putting an end to the effusion of blood by a treaty of peace, or of preventing a rupture and the consequent evils of war. He instanced the consent of Louis XIV to the demolition of Dunkirk, and several other cases drawn from treaties concluded between Great Britain and France, and Great Britain and the United States, with a view of averting war. He had hoped that Russia would have voluntarily, and with the view of re-establishing peace, made proposals tending to this end. Since the Court of St. Petersburg had declined to take the initiative on this subject, the chances of success attending the negotiations for peace appeared in his eyes much diminished.

Prince Gortschakoff replied that a Power of the first order could hardly accept the limitations of the nature to which Lord John Russell had alluded, except after having sustained a long series of disasters, and that the case of Dunkirk could in no way be applied to the present position of Russia. As to the diminution of the chances of peace, spoken of by Lord John Russell, he begged him to consider that Russia had only excluded one point from discussion, and was ready to examine all the modes of solution which should be proposed, exclusive of this point.

Aali Pacha held that "the limitation of the naval forces in the Black Sea was the only mode of solution at once practicable and honourable to all parties. Count Buol regretted that the answer of the Court of St. Petersburg was not of a nature to serve as a point of departure for further deliberations. A short discussion followed, and then the Conference broke up.

On the 19th of April it again assembled, when a long discussion took place regarding the best means of "putting an end to the preponderance of Russia in the Black Sea." Lord John Russell remarked that of the two Powers which alone command the shores of that sea—"the one, already very strong, continually augments her forces; while the other is weakened by the wars which she has had successively to carry on against Russia. In this state of things England regards the excessive increase of the Russian fleet in the Black Sea as a perpetual menace hanging over the Bosphorus and Constantinople." Count Buol took the same view. As a general theory, to pretend to limit the [illegible] or sea forces of a foreign Power would be to encroach on her sovereign rights; but the case of the Euxine—a closed sea—was an exceptional one. "An indefinite development of the maritime forces of one of the bordering Powers," showed "an aggressive tendency" which ought to be guarded against by the proposed limitation.

Prince Gortschakoff asks the Minister for Foreign Affairs of Austria if the limitation of the Russian forces in the Black Sea which Count Buol had admitted to be an exception to a general principle recognised by himself were, in his opinion, to be accomplished by means of coercion, in case Russia were to refuse to concur in it spontaneously.

In answering this question, Count Buol declares that Austria, for the present, supports the project under discussion, by recommending it to the adoption of Russia, but that, in other respects, he must reserve for the Emperor his master full liberty as to the choice of means by which he may consider it expedient eventually to give his support to this proposition.

On the 21st of April a long discussion took place regarding the means of connecting the existence of the Ottoman Empire with the European equilibrium. To effect this arrangement a clause was drawn up by M. Drouyn de Lhuys, which bound all the Powers to respect the independence and territorial integrity of the Ottoman empire, and to guarantee the common due strict observance of this engagement. On this point Prince Gortschakoff at once refused to attach to this guarantee the signification of a positive or active guarantee of the Turkish territories. M. Drouyn de Lhuys showed that Russia was unwilling to give any real guarantee to the Ottoman empire. What it pretended to give was a mere sham, because "even in the case of a Turkish province being invaded by one of the contracting Powers, Russia, according to Prince Gortschakoff's interpretation, will confine herself to the employment of her good offices," while on the British and French plenipotentiaries but to refuse to discuss them, and to declare that their powers and instructions were exhausted. The Russian Envoy, nevertheless, continued to insist that he had redeemed the pledge of his Government by making several propositions for the solution of the difficulty; but the only value of those propositions in our eyes, and in the eyes of Europe, is the demonstration they contain that Russia will not until she be compelled, consent to give any guarantee for the territorial independence of Turkey the breach of which would constitute an immediate *casus belli* between herself and all the other Great Powers; and that Russia will maintain, as long as she is physically able to do so, that aggressive position in the Black Sea which has been the sole cause of the present war. Count Buol terminated the Conference, as he had opened it, by declaring that, in the opinion of the Court of Vienna, the plan proposed by M. Drouyn de Lhuys and rejected by Russia was complete and effectual, but that the counter-propositions of Russia "would only tend to augment the chances of a misunderstanding," and could not be considered as embodying principles proper to be introduced into a complete and general system of policy.

OBITUARY OF EMINENT PERSONS.

THE RT. HON. SIR ROBERT HARRY INGLIS, BART., LL.D., F.R.S., F.S.A.

THIS respected and much-esteemed gentleman died on the 6th inst. at his house in Bedford-square. Sir Robert was born 12th January, 1786, the only son of Sir Hugh Inglis, Chairman of the East India Company, on whom a Baronetcy was conferred 6th June, 1801. His mother, Catherine, was daughter and one of the coheirs of Harry Johnson, Esq., of Milton Bryan, county Bedford. Sir Robert, who completed his education at Christ Church, Oxford, was called to the bar by the Hon. Society of Lincoln's Inn in 1818. He entered Parliament, in 1824, as member for Dundalk, and sat subsequently from 1826 to 1832 as representative for Ripon. In 1828 he was elected by the University of Oxford, and continued to sit for that learned constituency until his recent final retirement from Parliament. He married, 10th February, 1807, Mary, only child (by his first marriage) of Joseph Seymour Biscoe, Esq., of Pendell, county Surrey, but had no issue. The Baronetcy is, consequently, extinct.

A Portrait, with a copious memoir of the Right Hon. Sir R. H. Inglis appeared in the ILLUSTRATED LONDON NEWS for January 21, 1854.

DR. ALEXANDER MELVILLE

DIED at Montrose, 1st May, aged 71, Alexander Melville, M.D., Surgeon to her Majesty's Forces in the West Indies, and Fellow of the Royal College of Surgeons of England. The deceased was son of the late Alexander Melville, M.D., Surgeon in the Royal Artillery, and for forty years Ordnance Surgeon in the Island of St. Vincent. He was lineally descended from the late General Sir David Ochterlony, of Tulyroskie, and Governor of India. The deceased was at the taking of Martinique and Guadaloupe, and served thirty years in

the British Army. He was generally beloved, especially for his watchful care of the sick and afflicted

SIR GEORGE HEAD, KNT.

THE death of this gentleman occurred on the 2nd inst., in Cockspur-street. Sir George, who had completed his seventy-third year, was brother of Sir Francis Bond Head, Bart., and eldest son of the late James Roper Head, Esq., of the Hermitage, Kent, whose father, Moses Mendez, Esq., was son of Fernando Mendez, who came from Portugal, and was physician to King Charles II. Moses Mendez married Anna Gabrella, second daughter and coheir of the Rev. Sir Francis Head, Bart., of Hermitage; and thus the name of Head became the cognomen of his descendants. Sir George Head, whose decease we record, received his education at the Charter-house. In 1808 he held a commission as Captain in the West Kent Militia; in 1809 entered the Commissariat at Lisbon, and, until 1814, served in the Peninsula. More recently he was employed in Canada, Nova Scotia, and Ireland. Sir George gained repute as Literature by his "Forest Scenes in the Wilds of North America," and has "Home Tour in the Manufacturing Districts of England." At the period of his death he was Deputy Knight Marshal to the Queen.

WILLS AND PERSONALTY.—The wills of Lieut.-Col. Harry Smith, 95th Regiment of Light Infantry, Scutari; and Major the Hon. Charles Daly, 99th Foot, Crimea, have been proved in London. The Right Hon. Lady Frances Preby, of Eaton-place and Elton, £15,000; Sir Philip Broke, Bart., £35,000; Major George Birch, H.E.I.C., £35,000, within the province of Canterbury; Shakespear Phillips, Esq., of Barlow-hall, and Hertford-street, Mayfair, £250,000; William Bredo Gurney, Esq., parliamentary shorthand-writer, £45,000; James Colman, miller and merchant, of Norfolk, £50,000

Note.—The sign — denotes below the average.

The reading of the barometer increased from 29.67 in. at the beginning of the week to 29.99 in. by the 6th; decreased to 29.85 in. by the afternoon of the same day; increased to 30.01 in. by the 6th; decreased to 29.73 in by the 8th; increased to 29.97 in. by the 9th; decreased to 29 47 in. by the 10th; and increased to 29 49 in. by the end of the week. The mean for the week, at the height of 82 feet above the level of the sea, was 29 796 in.

The mean daily temperatures have been below their average values every day from April 21 by quantities varying from 4° to 9½°. The mean daily defect for the whole period is 5½°.

The mean temperature of the week was 46·8°—being 5·1° below the average

The range of temperature during the week was 35·8°—being the difference between the highest reading, 62·8°, on the 10th; and the lowest, 26°, on the 8th.

The mean daily range of temperature during the week was 22·4°; the least was 14°, on the 4th; and the greatest, 33½°, on the 5th

Rain fell during the week, to the depth of two-tenths of an inch nearly

The weather throughout the week was changeable and cold.

Lewisham, May 11, 1855. JAMES GLAISHER.

HEALTH OF LONDON.—In the week ending Saturday, May 5, the births of 865 boys and of 779 girls, in all 1644 children, were registered within the metropolitan districts. The average number registered in each week of the year from the return of the preceding ten years is 1507. The number of deaths within the week ending last Saturday was 1139; of these 571 were males, and 568 females. The average number of deaths for this week from the returns of ten years, raised for increase of population, is 1089; and thus 96 deaths occurred last week more than the ordinary rate of mortality would have produced. The numbers of deaths in the preceding two weeks were 1087 and 1132 respectively, so that causes have been in operation inimical to health, the most apparent of which is the continuance of E. and N.E. winds, and low temperature of the air, as shown in our weather table.

ROYAL MEDICAL BENEVOLENT COLLEGE. The annual general meeting of the friends and supporters of this praiseworthy institution was held at the Hanover-square Rooms, on the 30th ult., Alexander Ellington, M.P., in the chair. The room was crowded with distinguished members of the medical profession, anxious to give their support to a benevolent institution of this kind, the necessity of which has been so long felt. The report of the Institution for the present year announced that Her Most Gracious Majesty had conferred her patronage on the Institution, under the title of The Royal Medical Benevolent College, and also that the College at Epsom was advancing rapidly towards completion, and would be in a fit state to receive the pensioners and students before the close of the present year. From the report of the Secretary it appeared that the amount in hand at the last meeting was £20,304; collected since then, £7,[illegible] making a grand total of £27,500. The total amount collected since the commencement of the Institution, three years ago, £30,369. The expenditure up to the present time, £16,469 17s. 6d.; invested in the funds, £9500; to receive, £2000; total liabilities, £24,000.—Leaving a balance in hand, clear of all liabilities, of £[illegible]

SCOTTISH AND IRISH SCHOOL SOCIETY. The annual general meeting of the members and friends of this society was held on Tuesday, at the institution, in the Borough-road. The proceedings commenced with an examination of the children; and at twelve o'clock the business of the meeting commenced; the Duke of Argyll, one of the Vice-Presidents, in the chair. His Grace, in opening the proceedings, referred to the great progress the schools had made during the last few years, and then dwelt upon the value of the society as the mouthpiece and the [illegible] of important educational principles. The report stated that the [illegible] of the year have been £17,353 18s. 4d., and the expenditure, including a repayment of loan, £15,491 18s. 1d. Several resolutions [illegible] and [illegible] was [illegible]

THE CHURCH PASTORAL AID SOCIETY. The twelfth annual meeting of this most important [illegible] was held in the large room of Exeter-hall, on Tuesday. The Right Hon. [illegible] of Shaftesbury took the chair, and was supported during the proceedings of the meeting by the Right Rev. the Lord Bishop of Winchester, the Marquis of Blandford, and the Lord Bishop of Melbourne, &c. The platform and body of the hall were much crowded. The chairman having briefly addressed the meeting on the great amount of good that had resulted from the formation of this society, and the necessity for increased exertion and support to enable the committee fully to carry out its objects, called upon the secretary to read the report, which, after enumerating the instances of aid supplied to clergymen, proceeded to state that the society had, during the last twelve months, sustained great loss by the death of many valuable supporters. The total receipts for [illegible] amounted to £28,173 7s., being a deficiency on those of the former year to the extent of £401. The expenditure for the same period had been £27,238, exceeding that of the preceding year by £456 8s. 8d. The total liabilities of the society were [illegible] at £29,635—a sum greatly exceeding its regular annual income. The Bishop of Winchester, the Marquis of Blandford, the Bishop of Melbourne, the Revs. Canon Miller and Champneys, the Rev. Mr. Magee (Bath), and the Rev Mr. Barry also addressed the meeting in support of resolutions in furtherance of the objects of the [illegible], which were unanimously adopted.

SAILORS' ORPHAN HOME The anniversary meeting of this institution, for educating and maintaining the orphan daughters of sailors, was held on Wednesday, in Willis's Rooms, St. James's; Vice-Admiral Sir George Seymour, K.C.B., in the chair. The chairman opened the business of the meeting by observing that the Sailors' Orphan Home was the only charity which provided for the destitute female orphans of the sailors belonging to the mercantile marine. There were 20,000 seamen and mariners, and 20,000 sailors in the transport service, and nearly half of these lost, and the greatest consolation they had when exposed to danger was the consciousness that they had friends at home to attend to the interests of their children should death remove them of their protectors. The annual report stated that very eligible premises had been taken at Hampstead, which would accommodate 100 children instead of 30, as heretofore. The number of inmates and expenditure have slowly risen. £3500 6s. 6d. had been received, and £1962 14s. expended; leaving a balance of £3497 12s. 6d. The committee had been enabled to fund £250, making the total funded property of the charity £3,3[illegible] 2s. 10d

SOCIETY OF THE FRIENDS OF FOREIGNERS IN DISTRESS.—The anniversary festival of this institution was celebrated at the London Tavern, on Wednesday—Mr. John Labouchere presiding, in the absence of the Right Hon. the Earl Granville, who was prevented attending by indisposition. A very favourable report of the position and prospects of the society was given, and the subscriptions of the evening, including £100 from her Majesty, amounted to nearly £1600

IMPERIAL PARLIAMENT.

(Continued from page 454.)

HOUSE OF LORDS.—THURSDAY.

VIENNA CONFERENCE.

Earl GREY gave notice that on Monday next he would move that an humble address be presented to her Majesty to thank her Majesty for having ordered the protocols and papers connected with the Vienna Conference to be laid on the table of the House; and to express to her Majesty their Lordships' regret at the failure of the negotiations in restoring peace; and also the opinion of the House that the terms proposed by Russia were reasonable in themselves, and calculated to secure the attainment of the objects for which arms were originally taken up.

The Affirmation (Scotland) Bill passed through Committee.

The Income-tax Bill was read a third time and passed.—Adjourned.

HOUSE OF COMMONS.—THURSDAY.

Mr. MACKINNON obtained leave to bring in a bill for making an embankment, road, and railway on the north side of the river Thames, between the cities of London and Westminster

Sir R. BETHELL, in reply to Sir J. Pakington, said, a bill with respect to Church disciplne had been submitted to the prelates of the Church. It would deal with the united Church of England and Ireland as one Church. It would, at all events, be brought in before the third reading of the English Testamentary Bill, which the Government had no intention of abandoning. A Matrimonial and Divorce Bill had been prepared, and would be introduced as soon as the House expressed an opinion on the second reading of the Testamentary Jurisdiction Bill.

Lord PALMERSTON gave notice that on Monday next he should move the suspension of the Standing Orders, in order that the House might proceed to the consideration of Mr. Layard's resolutions on the state of the nation. As it was very necessary that the Metropolis Local Management Bill should be considered, he proposed to take it to-morrow as soon as the Newspaper stamp Bill was disposed of.

In reply to Mr. Bright, Lord PALMERSTON said, that the elements of a Conference still existed at Vienna, and if at any time propositions were made by Russia directly, or by Austria in her behalf, which appeared to promise a successful issue, negotiations might at once be renewed.

THE INDIAN ARMY.

Sir E. PERRY moved for a Select Committee to consider and inquire how the army of India may be made most available for the war in Europe; and to inquire into the steps necessary to be taken, if it should be deemed expedient, to constitute the army of the East India Company a Royal army. It was obvious, he contended, that in time of war we must look to our Indian army as an available source from whence to derive reinforcements.

Sir DE LACY EVANS seconded the motion.

It was, however, opposed by Sir J. Fitzgerald, Col. Dunne, and Mr J. Hogg.

Mr. VERNON SMITH said he thought it would be impracticable to carry out the amalgamation of the two armies. At all events, he contended that this was not a question for a Committee of that House to adjudicate upon: it was one rather for the Executive Government to determine

After some further discussion the House divided, when the numbers were—For the motion, 62; against it, 171: majority against the motion, 109

Mr LAYARD said, as there was a similar motion to that of which he had given notice to come on in the House of Lords on Monday, he would avail himself of Lord Palmerston's kind permission to choose his own time, and select some other occasion for his (Mr. Layard's) motion (Laughter).

EDUCATION (SCOTLAND) BILL.

The adjourned debate upon the second reading of the Scotch Education Bill was then proceeded with, after an unsuccessful attempt on the part of the opponents of the measure to postpone the discussion to another evening.

After a speech from Mr. CUMMING BRUCE against the bill, the debate, on the motion of the Earl of DALKEITH, was again adjourned.

HOUSE OF LORDS.—FRIDAY.

The Affirmations (Scotland) Bill was reported with amendments.

The Fisheries (British Islands and France) Bill and the Charitable Trusts (1855) Bill were severally passed through Committee.

HOUSE OF COMMONS.—FRIDAY.

Mr. M. GIBSON gave notice that, on an early day, he would move a series of resolutions similar to those given last night by the Earl Grey in the House of Lords, in reference to the Vienna Conference

The CHANCELLOR of the EXCHEQUER, in reply to Major Fielden, said that no stamp was required on receipt of any sort of military pay.

THE NEWS FROM THE SEAT OF WAR.

In answer to Mr. Grogan, Lord PALMERSTON said, the news which the Government had this day received appeared in the evening papers, which gave a correct representation of the matter. He did not think it expedient to give the exact words of the message, as it might lead to the detection of the cipher.

THE MAYNOOTH COMMISSION.

Colonel GREVILLE asked the Chief Secretary for Ireland whether it was true that Mr. O'Ferrall, one of the Commissioners for inquiring into the College of Maynooth, and the two Secretaries to the Commission, have been invited to London, and examined as to the circumstances connected with the transmission of the evidence and report to Rome, and the alleged additions and alterations in the evidence without the knowledge or sanction of the Commissioners?

Mr. HORSMAN said, the gentleman alluded to had arrived in London. He read a letter from Lord Harrowby, and entered into a lengthened explanation in exculpation of the charges made against the Commissioners by Mr. Spooner. He admitted, however, that the evidence was given to Dr. Cullen by one of the Commissioners before it was published, and that it was a great irregularity. No change, however, was made in the evidence.

Mr. SPOONER reiterated the charges he had made during the recent debate, against the Commissioners, and made some strong statements in reference to the conduct of Lord Harrowby, whose letter was in many respects inaccurate

After some further discussion the subject dropped.

PUBLIC AFFAIRS.

Major REID called the attention of the House to the highly critical state of public affairs, and to the increasing anxiety and dissatisfaction which at present pervades all classes of society; and impressed upon the Government the wisdom of immediately anticipating these consequences which are certain to arise from continual popular demonstrations, by at once introducing such reforms in every branch of the State as are consonant with the intelligence of the age and the just demands of the people.

Lord PALMERSTON said, in forming his Government he was not influenced by family connections, but rather by the distinguished abilities which individuals had displayed in public affairs; and he only regretted that competent men of the greatest ability and talent were generally so absorbed in their commercial pursuits that it was difficult—indeed impossible—to obtain their assistance. The Government as it stood was, he thought, such as should command the confidence of the public. He was aware that great improvements might be made in various branches of the public service, and the utmost attention was paid to the subject. Within a few days after his introduction It was intended to abolish the office of Master-General of the Ordnance, and also the Ordnance Board itself. The Artillery and Engineers would be placed under the same authority as the rest of the Army. The civil departments of the Ordnance would be placed under the control of the Secretary for War, as would also the medical department of the Commissariat. The object which the Government had most at heart was to render all the branches of the public service as effective and vigorous as possible, for he felt the war was with a colossal Power who would become dominant in Europe—France and England should the secondary States—if we should be worsted in the struggle.

Mr. DISRAELI insinuated that Lord Palmerston was himself the author of Major Reid's motion. At all events, the noble Lord had furnished to the House but a meagre and frigid programme of what was done and contemplated by the Government.

NEWSPAPER-STAMP DUTIES BILL.

The adjourned debate on the third reading of the Newspaper-stamp Duties Bill was resumed by

Mr. FACKE, who protested against the measure, as grossly unjust to the rural districts. In towns people could get their paper one penny cheaper, while in the country the farmer would have to pay a penny more.

Mr. MAGUIRE advocated the principles urged by the *Times* newspaper.

Sir J. WALMSLEY was opposed to legislating for any one newspaper

Mr BARROW opposed the third reading on the same ground as that taken by Mr Facke.

Mr. M. CHAMBERS supported the bill.

Mr. HENTINCK did not believe the bill to be a spontaneous act on the part of the Government, nor did he think that the majority of the House, uninfluenced by other considerations, would ever consent to pass such a measure. The screw, however, had been applied by the right hon. member for Manchester with success. If members generally were left to their own opinions such a bill never could have been entertained.

The House then divided, and the numbers were—For the third reading, 128; against it, 60: majority, 78.

On the motion that the bill be now read a third time.

Mr. NAPIER moved the introduction of a clause providing that newspapers not exceeding six ounces in weight be transmissible through the post, at the charge of one penny during seven days after the date of publication.

The CHANCELLOR of the EXCHEQUER opposed the clause, which was substantially the same as that of Mr. M. Milnes, which had been fully considered and rejected by a large majority of the House.

The clause was negatived without a division.

The bill was then read a third time, and passed.

The Spirit Duties Bill passed through Committee.

The Report upon the Customs Duties Bill was brought up and agreed to

STAMP DUTIES (DRAFTS ON BANKERS) BILL.

The CHANCELLOR of the EXCHEQUER withdrew this Bill, believing that it would operate seriously against banking operations, and would interfere injuriously with commercial transactions.

TOWN AND TABLE TALK ON LITERATURE, ART, &c.

Two well-known and welcome faces in London society have just been removed from among us by death—Sir Robert Harry Inglis, and the widow of Sir Humphry Davy. The cheerful countenance of the old Baronet was one that invariably reflected the English gentleman of the Sir Roger de Coverley school; and few saw Lady Davy without thinking of bygone times, when (as Mrs. Apreece) she was the centre of a circle of fashion—the lively lady who won the heart and hand of the all-accomplished Sir Humphry Davy. Thirty years and more have glided since Inglis became known as something more than a mere Bedfordshire Baronet; forty and more have passed since Mrs. Apreece was married to Sir Humphry, and six-and-twenty years have passed by since Sir Humphry died and Lady Davy was seen in widow's weeds. Both the Baronet and my Lady lived in and for society; and both delighted in literature and literary men. The dinners of Sir Robert in Bedford-square, and the "at homes" in Park-street of Lady Davy, will long be remembered by all who had the happiness to attend them.

There is a passage in the letters of Mrs. Grant of Laggan, descriptive of Sir Robert Inglis when a young man, that deserves quotation. It was true at the time and it was true to the last:—

There came a young couple here, this winter (Mrs. Grant is writing in 1812), who have been three or four years married, but have no family. The gentleman is Mr. R. H. Inglis, the son of Sir Hugh Inglis, the India Director. He is pious, learned, and elegant, with all that is pleasing and engaging in a young man—in all that is respectable and estimable in an old one. His young wife is lively, sensible, and accomplished, without display or ostentation, which so utterly spoils the enjoyment of all those good things. We met them at Bishop Sandford's, and our acquaintance has since gone on with much satisfaction on both sides. Happy Mr. Inglis is the living representative of Sir Charles Grandison. I think he is, indeed, very much the character of male excellence which Richardson wished to draw.

The favourite contemporary English author of Sir Robert Inglis was his old friend Southey.

The last public appearance of Sir Robert Inglis was, we believe, at the annual meeting of the Literary Fund, when he took the chair, and the Council of the Society was taken by surprise. Though certainly annoyed at the proceedings, he did not suffer his usual urbanity of manner to forsake him. There was still the pleasing smile, as if all was passing off to his entire satisfaction.

Three honorary situations are vacant by the death of Sir Robert Inglis—that of a Trustee of the British Museum, of a Vice-President of the Society of Antiquaries, and of Antiquary to the Royal Academy of Arts. Sir Robert was a very influential trustee, and though he was too apt to be led by precedent, he was always in favour of securing real treasures at any reasonable cost. His successor as Vice-President of the Antiquaries will be, it is said, either Mr. John Bruce or the Rev. Joseph Hunter. As Antiquary to the Royal Academy he succeeded Sir Walter Scott, and will probably be succeeded by Mr. Layard or Lord Stanhope. The office of Antiquary to the Academy is entirely a sinecure, and with no other reward than a ticket to the private view and annual dinner.

The poor pay which Mr. Marshall has received for his statue of the poet Campbell, to which we directed attention last week, will be better understood by the public when the price is contrasted with the sums received by other sculptors for statues of the same size and material. Chantrey's usual charge for a standing statue, a little larger than life, was two thousand guineas. For the large Watt, in Westminster Abbey, he received six thousand pounds. The elder Bacon had thirteen hundred guineas for his statue of John Howard, and the late Mr. Joseph had eighteen hundred pounds for his statue of Wilkie in the National Gallery. The smallest sum ever given for a statue in marble of any excellence—before this unexpected small pay to Mr. Marshall—was six hundred guineas, the sum (minus a few pounds we believe) which the elder Bacon received for his fine statue of Dr. Johnson. Only the other day Mr. Gibson received five thousand pounds for the statue of Sir Robert Peel in Westminster Abbey. But the Peel pay was a vote of the House, while the Campbell pay was the poor produce of a starved subscription.

Since the Graphic Society stepped eastward our visits have been unfortunately less frequent. The society, however, has lost none of its attractions in its removal from St. James's-street to the London University. The meeting on Wednesday last was particularly good, and we were the more pleased at its success, as one of our own Graphic Correspondents at the seat of war was an important contributor that evening. The sketches by Mr. E. A. Goodall of Sebastopol and its vicinity made for the ILLUSTRATED LONDON NEWS were generally and deservedly admired.

Among the spy-reading sales of real interest to the English antiquary is one not as yet publicly announced. The very curious collection of Mr Fitch, of Ipswich—known beyond the limits of East Anglia—is to be scattered by the hammer of a London auctioneer

There is no attention of men and things at the National Gallery. Lord Palmerston has not accepted Lord Aberdeen's legacy of Sir Charles Eastlake and Mr. Wornum. Mr. Uwins is still keeper, and Colonel Thwaites is still secretary. Mr. Uwins has passed three sore and ten, and is, unhappily, a confirmed invalid; and Colonel Thwaites, though he has resigned office, is still obliged to perform its duties, because my Lord Palmerston will not appoint his successor.

A veteran ex-Chancellor, in a speech in Parliament the other night, presented an instructional contrast that gives food for reflection. When Lord Lyndhurst entered public life he found, he tells us, that the majority of the members of the House of Commons had been educated in one of our Universities; now he finds that not more than one-sixth, or, at the most, one-fifth, have been so educated. No wonder, then, that Latin quotations in the House are so scarce.

ROYAL POLYTECHNIC INSTITUTION.—VISIT OF HER MAJESTY.—On Thursday her Majesty, his Royal Highness Prince Albert, the Duke of Saxe-Coburg and Gotha, the Princess Royal, Princess Alice, the Prince of Wales, Prince Alfred, and the Princess of Hohenlohe, accompanied by Lord Canning, General Buckley, Capt. Du Plat, &c., honoured this institution with a visit. Her Majesty having expressed a particular desire that the visit should be strictly private, the preparations made by Mr. Pepper, the resident director, were such as befitted the occasion, and did honour to the taste and judgment which prompted them

ERUPTION OF VESUVIUS.—Everything in Naples is at present extinguished by the great fact—the eruption of Vesuvius. During the whole of yesterday nothing was to be seen but smoke and cloud, which enveloped not only the mountain, but the whole coast, and then swept away in immense volumes over the gulf. In the very centre of the cloud, however, might be seen an ashy sulphurous-coloured plain, which, by a sudden difference in the colour, and by the well marked outline, indicated that it was not all smoke, but that lava was coming out.—*Letter from Naples, May 2*

TESTIMONIAL TO THE REV. J. B. OWEN.—On Tuesday, a superb service of plate, value £1000, which had been purchased by subscription, was presented, in St. Mary's School-room, Bilston, to the Rev. J. B. Owen, M.A., on his resigning the Vicarage of that parish. The subscription originated with the members of his congregation, but was extended, to meet the wishes of his many admirers in the midland counties, who were anxious to join in the expression of their high admiration of the unwearied industry of the Rev. Mr. Owen, for nearly twenty years, in the advancement of religion, education, and morality. A large number of the subscribers and friends witnessed the presentation, which was made by Mr. P. H. Harper, prefaced by an appropriate address The Rev. Mr. Owen returned thanks in an eloquent speech, in which he paid a high tribute to the paramount services of the press in the education and enlightenment of the people, particularly in the district of the collieries.

THE CAMP AT ALDERSHOTT.

(Continued from page 462.)

Farnham is a pretty little town, most healthily situated—surrounded on one side by Farnham park, and on the others by extensive hop-gardens Soon after entering the town a picturesque hostelry catches the eye, on the sign of which is the following:—"Jolly Farmers: the birthplace of W. Cobbett, Esq., M.P." Here that industrious writer was taught by his father to earn his living from almost early infancy.

The town was originally called *Fern'ham*, from the fern growing on the heaths adjoining. Here, in 893, Alfred obtained a signal victory over the Danes, who were ravaging this part of the country; and, in the reign of Stephen, Henry de Blois, brother of that Monarch, and Bishop of Winchester—erected, on a hill commanding the town, a castle of great strength and of considerable extent, which is said to have been seized by the Dauphin of France, in his expedition against King John. This castle was demolished in the reign of Henry III., but was subsequently rebuilt by the Bishops of Winchester with greater magnificence as an episcopal palace. During the Parliamentary War the castle was garrisoned by the King; but, being besieged by Waller, the Parliamentary General, it fell into his hands, and was afterwards dismantled and nearly destroyed. At the Restoration the inhabited part was greatly improved by Bishop Morley it has, since then, been altered, and is still the residence of the Bishops of the diocese. Considerable portions of the keep, &c., are still remaining.

The church of Farnham is now undergoing restoration, and is well worthy of a visit. The chancel is of Transition Norman, and the nave of about the fifteenth century, of fine proportions. Here Cobbett was buried, at his own request, by the side of his father. Leaving the church, and passing the somewhat picturesque Town-hall, we ascend the hill on which the castle stands: remarking that Farnham, from the favourable nature of the soil and the peculiar care taken in the culture of the hop-plant, produces an article decidedly superior to that of any other part of England; and, in consequence, the Farnham growers command a higher price in the market. Behind the castle the park extends throughout a circumference of three miles, and is well stocked with deer and planted with fir and other trees. From hence the road towards Aldershott assumes a wilder appearance, and here and there small cottages are built amongst the heath. The ground, as we go onward, continues to rise, and gives us on one side a bold view of Cæsar's Camp, as the high point of land shown in the right hand of the Engraving of the general view of Aldershott Camp is called in the neighbourhood; and on the other a panorama so extensive and striking, that many would willingly undertake the journey for the purpose of viewing that alone.

STREET WITHIN THE LINES OF THE CAMP AT ALDERSHOTT.

As we get nearer to Cæsar's Camp, the surrounding scenery becomes more and more desolate; and, directed by a little girl engaged in gathering whins for firing, we mount the platform of the Camp said to have been erected by the Roman General above named. Here is a magnificent view of the country round, having for a foreground the rugged earthworks of the old warriors; and in the middle distance long ranges of uninhabited heaths, on one of which the new Camp is situated. Nothing can be more desolate and solitary, than this spot even the song of birds is scarcely heard. Although this place is named after Cæsar, it seems somewhat doubtful if it is a Roman camp at all. The embankments are very irregular, and of great extent, and may possibly have served as a place of defence during the severe struggles which occurred in this district between the Saxons and the Danes. Camden makes no mention of a Roman station of any importance being near this place. On the north side of this hill there is a large-made mound of earth, which has originally been of a circular form. The springs which abound here have caused part of this earthwork to slip away; it is, however, a matter well worthy of careful examination.

At a little distance, near Red-hill, or Red Field Farm, are several circular barrows. Leaving the hill, and proceeding towards the Aldershott Camp, we discovered a barrow of considerable length, and the visible remains of an undoubted Roman encampment, consisting of a

INTERIOR OF SOLDIERS' HUT.

GENERAL VIEW OF THE CAMP AT ALDERSHOTT, FROM THE FARNBOROUGH ROAD.

square platform, surrounded by three trenches. In the neighbourhood are also traces of a narrow embankment and ditch, which leads in one direction towards Cesar's Camp, and on the other at intervals towards Guildford. This may, probably, in former times have been raised to mark the division of two districts. Contrasted with this desolate spot, the new Camp presents an appearance of life and bustle; in all directions workmen are busily engaged either in completing huts or in commencing new ones, and, although the wind is strongly rushing over the place, bringing with it clouds of dust, we begin to make a careful examination of the residences preparing for 20,000 men; and first let us mention that the part of the Camp shown in the engraved general view will accommodate twelve battalions, or 12,000 men. The huts for eight more battalions have been commenced on a less elevated piece of land, situated at some distance towards the north-east.

The houses for each battalion consist of two rows of soldiers' huts, twenty four in a row, with 20 feet apart all round; those for the accommodation of twenty-five men are 36 feet long by 21 wide, and 7 feet high to the eaves. Behind the soldiers' dwellings in each battalion are placed the mess-rooms, guard-rooms, cooking-houses, and offices; apartments the latter are 45 feet by 21—the difference of length between these and the other being caused by entrances and passages. The remaining space is divided into eight rooms, four, two or four of which are appropriated to the use of officers according to their rank. These apartments are only 10 feet long, 9 feet 2 inches wide, and at the highest part 8 feet.

The roofs of the houses of both officers and men have been lined at the height of eight feet by a flat ceiling of wood, which, although it may perhaps give more finish to the work, does not improve the ventilation of the place, and, certainly to our eye, the position of the funnel of its stove must cause considerable risk from fire. The boarding of the roofs having been found insufficient to keep out the wet, they have been covered with a layer of felt. Although the cooking-houses and washing-places are unfinished, an improvement on those in use at Chobham, they are in many ways far from being perfect, and experience will undoubtedly suggest several alterations. The drainage is also considered at Aldershott, and is effected by means of glazed pipes, which are passed into the Basingstoke Canal. This, however, only provides for the surface drainage, Messrs. Henning having agreed to deodorise the remainder of the Camp by the use of peat charcoal.

The supply of water has been obtained from wells which, we are told, have been sunk to a depth of twenty-five or thirty feet. At this depth spring water has not been obtained. Ceasar's Camp is full of springs of the most pure and delicious water. Would it not have been possible to convey this to Aldershott, instead of sinking the wells, which only afford a comparatively impure supply, one of the necessaries of life? The huts, which form long streets, are occasionally broken by spaces for parade grounds, &c., and by two wide roads, which cross at right angles at the centre of the Camp. We understand that up to the present time no hospital accommodation has been provided, but that it is intended forthwith to provide for the reception of 400 patients, and also a slaughter-house for the Commissariat, in which we trust that the best means will be adopted to prevent danger from the refuse which the drainage is not prepared to carry off. The ground which will be covered with houses is about 500 acres. A detachment of the 97th Regiment have come into the Camp, and began in a very orderly and systematic manner to take possession of their new home. We must, however, for the present, leave the Camp for Farnborough, noting on the road the blackened hills, over which a fire a short time ago extended for several miles. The peeps through the fir-trees, the quiet churchyard near Farnborough, the long line of rail five miles without a curve, and the grove of trees near the station, particularly if seen with the full moon rising behind serve pleasantly to pass the little time it may be necessary to wait for the train, particularly if, as is a common occurrence, a number of nightingales add their song to the beauty of the scene.

CALENDAR FOR THE WEEK.

SUNDAY, May 13.—Rogation Sunday. Old May-day.
MONDAY, 14.—Henry Grattan died, 1820.
TUESDAY, 15.—Curzon died, 1833 O'Connell died, 1847.
WEDNESDAY, 16.—Oates convicted of perjury, 1685.
THURSDAY, 17.—Ascension-day.
FRIDAY, 18.—Napoleon I declared Emperor of France.
SATURDAY, 19.—St. Dunstan. Anna Boleyn beheaded, 1536.

TIMES OF HIGH WATER AT LONDON-BRIDGE,
FOR THE WEEK ENDING MAY 19, 1855.

Sunday.	Monday.	Tuesday.	Wednesday.	Thursday.	Friday.	Saturday.

LONDON SACRED HARMONIC SOCIETY, Exeter-hall.—MR. SUMNER'S ANNUAL NIGHT, on MONDAY, MAY 14th.—Haydn's CREATION. Preceded by the Royal Birthday Cantata. Principal Vocalists: Miss Birch, Miss C. Hodgkinson, Mr. Sims Reeves, Mr. Wells, Mr. G. Perkins, Mr. Thomas, Mr. H. Bamby, and Mr. Lawler; with Band and Chorus of nearly 800 performers. Conductors, Dr. Bexey and Mr. Surman. Tickets, 5s., 3s., and 2s. 6d. Only Office in the Society, No. 9, Exeter-hall, where may be obtained the Exeter-hall Edition of The Creation, price 6s.

ROYAL POLYTECHNIC INSTITUTION.—Patron, H.R.H. Prince Albert. The Lectures and Exhibitions as delivered before her most gracious Majesty and his Royal Highness Prince Albert will be continued during the week, consisting of the TELEPHONIC CONCERT, Dissolving Views of Arthur the Sailor, Dobson's Polymanated Cascade, the Lectures illustrating the Voyages across the Atlantic, and the Cities in the United States, and, in addition, on Thursday Evening, the 17th, Dramatic Reading by Mrs Chatterley: "Much Ado About Nothing." Lectures on Songs and Song-Writers, by George Buckland, Esq. Dissolving Views of the War, &c. &c.

ZOOLOGICAL GARDENS, REGENTS-PARK.—The collection of Living Animals includes a more recent series of Lions, Lion Whelps, Clouded Tigers, Hunting Dogs, and other Carnivora; Monkeys, Elephants, Rhinoceros, and a pair of Hippopotami, together with an increased number of Birds, Reptiles, Fish, and other Marine Animals. Admission, 1s.; on Mondays, 6d.

THE FOUNDLING HOSPITAL.—TO-MORROW WEEK, the 20th inst. the ANNIVERSARY SERMON for the Benefit of this Charity will be preached in the Chapel of the Hospital, by the Rev. Dr. GOULBURN, Head-Master of Rugby School, before his Royal Highness Prince ALBERT CHARLES, the President, and the rest of the Governors and Guardians of the Corporation.—Divine service will begin at eleven o'clock. JOHN BROWDLOW, Secretary.
London, May 1st, 1855.

LONDON, TILBURY, and SOUTHEND RAILWAY.—Communication to Southend and Sheerness Daily (sunday included) by the 10.37 a.m. and 5.37 p.m. Down Trains, from the Fenchurch-street and Bishopsgate-street Stations, direct Railway pier, thence by the fast steam-packet "Jupiter" (belonging to the Star Company), reaching Sheerness at 7.30 a.m. and 4.30 p.m., and Southend at 8 a.m. and 5 p.m., in time for the 9.45 a.m. and 6.30 p.m. Up Trains from Tilbury. Fares to Southend, first class, 3s.; second, 2s. 6d. Return Tickets, first class, 4s.; second, 3s. 6d. To Sheerness, 1st class, 3s. 6d.; second 2s. Return Tickets, first class, 4s.; second, 3s. 6d. Return Tickets only issued by the 10.37 Down Train, to return the same day by the 6.30 Up Train.
Fenchurch-street Station, May 3rd, 1855.

INDIA, CHINA, AUSTRALIA, and CAPE of GOOD HOPE.—W. O. YOUNG will dispatch the following fast-sailing A 1 Clipper SHIPS at the dates named as under.—

Ships.	Tons.	Commanders.	Destination	Docks.	To Sail.
Matilda Wattenbach	1309	J. C. Clare	Calcutta	London	May 12
Innocent	621		Calcutta	London	June 1
Stuart Wortley	800	J. Simpson	Bombay	E. India	May 23
G. W. Bourne	721	W. H. Harding	Madras	St. Kath.	May 5
Ismaet	412	W. P. Buckham	Hong-Kong & Shanghae	London	May 27
National	357	B. Clarke	Shanghae	London	June 15
Pemberton	900	Wm. King	Port Phillip	London	May 23

These ships have been selected specially for their ship-class and fast-sailing qualities, and will be found well worth the attention of Shippers and Passengers.—W. O. YOUNG, 54, Cross-street, Manchester; 25, Dale-street, Liverpool; and Sun-court, Cornhill, London.

THE ILLUSTRATED LONDON NEWS.

LONDON, SATURDAY, MAY 12, 1855.

As yet the British public has no quarrel with the aristocracy. The merchants of London who assembled last week, and took it upon themselves to represent the very general indignation which prevails throughout the middle and lower classes against the gross nepotism in all departments of the public service, which led to the too notorious mismanagement of our national affairs in the Crimea, were especially careful not to attack aristocracy as an institution, nor the aristocratic classes as a body. In adopting this course they acted with prudence, as well as with justice. There is no country in the world where there is so high-minded and so useful, and, if we may use a phrase apparently so contradictory, so democratic, an aristocracy as in Great Britain. Three-fourths of the Peerage are not of ancient lineage. The families who came in with the Conqueror are to be found, for the most part, among the untitled gentry; and our hereditary lawmakers are the descendants of men who sprang from the people in the comparatively recent days since Elizabeth and James I., or even since those of Queen Anne. They represent successful lawyers, merchants, soldiers, and sailors; and not the old feudal aristocracy which wrested Magna Charta from King John. As a body the aristocracy of England have in all ages proved themselves the friends of the people; and it is a fact, which cannot be too strongly impressed upon the public mind, that an enlightened aristocracy never can exist but with advantage to the classes below them. Despotism tolerates no aristocracy. Between the Emperor in all the despotic countries of Europe and the great bulk of the people there is no class but the class of functionaries, if we except the army—which is the main, if not the only, prop of arbitrary power. In Russia, in Austria, in Turkey, in France, there is no aristocracy except in name. If it exist at all, it has no power, no function, no collective existence. Despotism tolerates nothing betwixt itself and the people. In constitutional States the case is different; and in England, should the unhappy day ever arise when the aristocracy shall be abolished as an institution, the knell of popular freedom will have sounded; a huge standing army will stand between Sovereign and people; and a military despotism will replace the republican monarchy under which it has been our privilege to prosper for so many generations. But if the aristocracy should be so unwise as to resist the demand for administrative reform, which has been forced upon the country by the mismanagement of the last twelve months, there is no knowing to what height the clamour may rise, and what Revolutions may spring out of opposed and withheld Reforms. To be connected with aristocracy will never in the eyes of sensible men be held as a disqualification for the public service; but sensible men would cease to be sensible if they looked upon aristocratic birth as the only qualification. It is upon this rock that the aristocracy has run its ship, and against which it threatens to split it up, unless it has tact and judgment enough to back out into deep, calm, waters. "*La carrière ouverte aux talents*" was the maxim, by acting upon which Napoleon I. raised France to the highest point of glory and prosperity. In times of peace England might afford to let talent find its career in commerce and the arts—as it did; but in times of war a great nation must open up every department of the public service to the best men, irrespective of their birth, or it will flounder from difficulty into difficulty, and ultimately be overwhelmed in disgrace and disaster. If a mediocre man of the mercantile classes is the competitor of a clever Duke, or a Lord of genius, by all means let the Duke or the Lord win the day; but if the mediocrity is on the side of the Duke—if the Lord be a simpleton or a quack, and the man of business be the man of talent—let the man of business and of genius have the office to which he aspires, though his father may have swept a crossing, or though he may himself have commenced his career as a shoeblack or an errand-boy. It is by the employment of fitting instruments that great private enterprises are carried to successful completion; and it is by similar means, and by no others, that Great Britain will be enabled to face and conquer danger fifty or a hundredfold greater than any which have ever yet menaced her. The aristocracy will not, we believe, be unwise enough to resist a movement like this. On the contrary, we think they will be found in the rank of its supporters, and do justice to themselves as well as to their country, by lending their aid to overthrow the unsafe system by which a narrow section of their body has been compromising the whole, and bringing discredit and danger upon that finely-balanced constitutional system which not only tolerates but demands the existence of an aristocracy, as a necessary element in the general equilibrium.

But, while it is the duty of the aristocracy to look before them, and to act with wisdom in a crisis of no ordinary importance in the history of their country, it is no less the duty of the middle and lower classes to see that they enter into the work of Reform with clean hands and pure spirits. They should ask themselves if they are in all things blameless—if they have not abused the electoral privileges with which they have been entrusted—and if they have not sold themselves for money or money's worth to the aristocratic classes, against whom they are so ready to turn in the day of peril and perplexity. The shameless venality of our Parliamentary system may have done no great mischief in the days of peace. A very inefficient Government may be tolerated without the risk of fatal danger when we have no war upon our hands. In such a time the only boon the country has to ask of successive Governments is, not to govern, but to let it alone, and not interfere with the growth and development of its business. If at such a time a Government thinks itself bound to do some kind of work, to prove its existence, the greatest favour it can do the country is to devote its energies to the useful task of repealing the foolish over-legislation of past times. But in war the case is different. In war, hard, earnest, and wise work is absolutely essential. Hence the breakdown of 1854, at the first tug in the Crimea. But to say that the aristocracy are wholly to blame for the unhappy result is to conceal or shut our eyes against the truth. We do not seek to absolve the aristocracy from the charge of filling the minor—if not the major—departments of the public service with their relatives and dependents; but we would warn those who have commenced an agitation for the reform of this abuse that they will never succeed in their object unless they go to the root of the evil. How can we expect an entirely pure and disinterested aristocracy if we are a corrupt and venal people, and sell our votes, and job and barter for our private interest the trust which we hold for the advantage of the public?

THE cheerful tone of recent communications from the Camp before Sebastopol, and the satisfactory information we receive as to the health of the soldiers, the strength of the works, and the abundance of provision and matériel, would justify a belief that a grand struggle will speedily be followed by a great success. But there are two sides to the picture of war; and throughout the whole campaign Englishmen have been unequal to the accomplishment of the feat of regarding both at once. The army has either been ruined, starved, and dispirited, and about to be driven into the sea; or, reinforced, and flushed with military ardour, was about, on the next day, or the day after at latest to plant its victorious banners on the Star Fort and in the town. "A generous public no cold medium knows." It is now time to try and hit that medium. The speedy rectification of false impressions, by means of the electric telegraph, renders it absurd that the over-sanguine or the over-fearful should continue to promulgate their incorrect or unworthy views of the position of the Allies.

Especially is it most desirable that there should be no mystification upon the subject of the war at the present crisis, when our anxieties are additionally complicated by the intimation that Austria is willing but afraid to make common cause with the Allies; and that France and England may ultimately be left to do the work without her assistance. The situation of affairs before Sebastopol thus becomes at once a question of double interest; and the details of the siege, monotonous and discouraging as they have long been, acquire a great significance. First, as regards the actual capture of the town and great fort, it may be said that the balance of probabilities is now in favour of the reduction of the place, even if the commanders adhere to the bit-by-bit system of destruction which saves blood at the expense of powder. The skilful and pertinacious efforts of the French have weakened and wasted the defences against which they have pushed their scientific attack. Here a bulwark has been crumbled up by their mines, there a battery has been crushed by their cannon. Nor has the cold steel been idle, and the Allies have suddenly wrested, by the strong hand, the murderous rifle-pits from the enemy, and a number of his mortars have been seized, and prisoners taken. He has sought, by a series of desperate onslaughts, to repair his loss, but the Allies have held their own, and he has retreated with thinned ranks and disgraced banners. We have approached somewhat nearer, but whether for a "dreadful close," or only as an instalment of similar progress, is as yet unknown. Opposite statements, which may, however, be reconciled, are put forth, and the generals are described as waiting for reinforcements, in order to storm, and as about to renew bombardment, that the lives of the soldiers may not be needlessly risked. It seems probable that the assault will be given, but not until the reinforcement is complete. That the assault will be successful it would be an insult to the generals and to the soldiers to doubt: the former will not dare to make it unless military probabilities justify the act; and when did the latter fail to reduce probabilities of victory into glorious certainties?

All that can be said, therefore, on the first part of the question is, that the capture of Sebastopol is a matter of somewhat more reasonable expectation than was the case a few weeks ago. But a much larger field of inquiry opens upon the view, when, in the presence of the grand interests which a changed position of affairs may evoke, the Allies are asked how stand the prospects of the war. From the Baltic to the Euxine ranges the material for reply. Suppose that Sebastopol has fallen, and that the Russian forces, retreating for consolidation, and not pursued by the Allied armies, temporarily exhausted with their great effort, unite, and attack—and are, as we may hope and believe they will be, utterly routed. Suppose the recruited Allies achieve the utmost success which the most sanguine civilian who daily takes Sebastopol between his first and second bottle can plan out; that the Russians are unable to maintain themselves in the Crimea; that its inhabitants, duly aroused to the advantages of Constitutional government, form guerilla bands, and slaughter their old masters; and, finally, that not a Russian is seen in arms south of Perekop. Even with this splendid series of glories, this chain of triumph, beginning at Kalamita, and ending at Perekop, Europe will perhaps ask—"*et après?*" Deferring immediate answer, suppose that we can point to a simultaneous action, and show Constradt seething and writhing under the rain of fire from the fleet of Dundas. Then many people will hold that we have answered sufficiently, and that our natural allies—not yet implicated in the fight—are bound to arise and do battle. Others may think that this is a partial view of the case, and that Constradt and the Crimea may be ours, and yet that the bulwark against Russia, for which this war was undertaken, will not have risen appreciably from the soil of the continent—that it is but a barricade *pour rire*—"and if a fox go up, he shall break down their stone wall."

In short and not dogmatically to compress a great deal into few words—the European crisis is becoming more and more solemn, and those who now shut their ears to earthquake noises, and to the creaking and cracking of the pedestals of Continental thrones, will be bewildered into childish helplessness when the heaving volcano opens into flame. This is a time when a larger and a grander policy than British statesmen have hitherto dared should be initiated. The great European family has now an opportunity of joining its worthier members by a sacred bond, framed, not of diplomatists' tangles, but of two bright gold "strands" the love of Freedom and the love of Truth.

LATEST INTELLIGENCE.

REPULSE OF THE RUSSIANS.

A despatch from Lord Raglan, of which the following is a copy, announces another defeat of the Russians before Sebastopol, last Thursday morning—

"Sebastopol, 10th May, 1855.

"The Russians made a sortie with a large body of troops on our right advanced trench this morning, but were driven back immediately. A second and similar attempt shared the same fate.

"Nothing could be better than the conduct of the troops who took part in the affair.

"The loss of the enemy was serious."

THE BALTIC FLEET.

The steamers *Conflict*, *Impérieuse*, and *Arrogant*, appeared off Revel on the 29th ult., and notified the blockade, at the same time stating that a term of seven days would be allowed neutral ships to depart with the goods they then had on board, but that from the moment of the declaration of blockade no goods must be taken in—but ballast only. A letter from Hamburg of the 7th inst., says:—

Letters from Riga, read to-day on 'Change, state that four steamers of the Flying Squadron, commanded by Commodore Watson had entered the Gulf of Finland, in spite of the ice, which still rendered the navigation perilous. Some of these cruisers had even shown themselves before Revel. This circumstance is accounted for by the fact that the Russian fleet is blocked up in the ports by ice three or four feet thick, which obstructs their entrance. It was also said that several of these steamers which had thus ventured into the Gulf had been slightly damaged by the floating ice. The steam corvette *Conflict* had succeeded in reaching the Danish harbour of Elsineur, where she is now undergoing repairs. Hitherto, the only mission of these cruisers appears to have been to give chase to the Russian merchant vessels. In the course of a few days the *Bulldog* appeared twice before the neutral port of Libau, and the *Archer* before that of Memel. The Flying Squadron will shortly visit all the commercial harbours in the north.

THE COURT.

The Queen and Prince Albert honoured the Society of Painters in Water-Colours with a visit on Saturday last at their Gallery in Pall-mall. In the evening her Majesty and his Royal Highness, accompanied by a distinguished party, honoured the Royal Italian Opera with their presence.

On Monday her Majesty and his Royal Highness Prince Albert, accompanied by her Serene Highness the Princess of Hohenlohe-Langenburg, visited the Exhibition of the French School of Fine Arts in Pall-mall. In the evening the Queen and his Royal Highness, accompanied by the Princess of Hohenlohe-Langenburg and the Princess Adelaide of Hohenlohe, honoured the Opera House with their presence.

On Tuesday the Queen, attended by the Countess of Gainsborough and Major-General Buckley, visited her Royal Highness the Duchess of Gloucester, at Gloucester-house.

On Wednesday her Majesty and Prince Albert, accompanied by the Prince of Wales, Prince Alfred, the Duke of Saxe-Coburg (who had arrived on a visit the previous evening), and the Princess Hohenlohe-Langenburg, visited the Exhibition of the Royal Botanic Society in the Regent's-park. In the evening her Majesty gave her first State ball this season.

On Thursday the Queen and Prince Albert, accompanied by the youthful members of the Royal family, honoured the Polytechnic Institution with a visit.

THE QUEEN'S STATE BALL.

The Queen, on Wednesday evening, gave a State ball, to which a party of between 1600 and 1700 were invited, and for which the whole of the State rooms at Buckingham Palace were appropriated, and brilliantly illuminated. The Royal family were ushered on their arrival to the White Drawing-room. All the other guests assembled in the Picture-gallery and the Promenade-gallery, which, for the first time, was opened for a State ball.

Their Royal Highnesses the Duchess of Cambridge and the Princess Mary arrived a quarter-to ten o'clock. His Royal Highness the Duke of Cambridge came shortly afterwards. His Highness the Maharajah Dulleep Singh was also present.

Her Majesty and his Royal Highness Prince Albert left the White Drawing-room shortly before ten o'clock, accompanied by their Royal Highnesses the Duchess of Cambridge, the Princess Mary, the Duke of Cambridge, and the Duke of Saxe-Coburg, their Serene Highnesses the Princess of Hohenlohe-Langenburg, and the Princess Adelaide and Prince Victor of Hohenlohe.

The Queen wore a dress of pink tulle, over pink silk, trimmed with five flounces of white blonde, and ornamented with bouquets of pink roses and white jessamine and diamonds. Her Majesty's head-dress was composed of diamonds and pink roses.

The Queen opened the ball with his Royal Highness the Duke of Saxe-Coburg-Gotha, at ten o'clock.

The festivities were prolonged until two o'clock on Thursday morning.

The Earl of Clarendon, as Secretary of State for the Foreign Department, has received an invitation to a banquet to the whole of the Foreign Ministers on Saturday next, to celebrate her Majesty's birthday.

NATIONAL SPORTS.

The ominous and feverish week which precedes the Derby offers but little inducement to the turfite to leave Tattersall's, except on Tuesday and Wednesday, when Bath, the beloved city of the late King Bladud, will open the doors of its grand stand. On Tuesday we shall have the Three-Year-Old Biennial, which was won last year by Oulston. On Wednesday the Liverpool Hunt Club have some races at Hoylake, and the Tavistock sportsmen have also fixed their fair meeting for that day, and intend to follow it up by three steeplechases on the Thursday. Harpenden has also a gathering on Friday, which will not lack attendance from the "great metropolis."

John Scott has come to Leatherhead with his three Derby horses, none of which, with the exception of De Clare, excite much notice. Bonnie Morn is quite out of favour, as there is no doubt that he showed the white feather in his races with Rifle-man, Habena, and Cornbus at "The Field" is now at the head of the list, with Hungerford stretched for the Oaks at half-past three on Wednesday, in consequence of lameness. Scythian, the winner of the Chester Cup, is said to be one of the "Major's Remedy" triumphs. The owner won £11,000 on him, or just half the amount of his winnings in stakes alone during the last fifteen months. If Mort never had won it is believed that Mr. Parr would have had a balance of £27,000 against the Ring.

The wickets will be pitched at Lord's on Monday, when a one-day's match will be played between two eleven, with two professional bowlers on each side; and to-day the Marylebone Club and ground will play the Undergraduates at Cambridge. It is worthy of notice that a five-shilling subscription is at present in progress to place a monument over the remains of William Lillywhite in the Highgate Cemetery.

The boat races in Oxford commence on Monday, and will be continued for several after. Tuesday, ending May 25th. There are said to be fourteen crews at present training, among which Balliol, Exeter, Christchurch, and Wadham have a favourable report. Much purchasing have been very brisk of rods and salmon-fishers, especially on the Thurso, have been enjoying prime sport.

NEWMARKET SECOND SPRING MEETING.—TUESDAY.

Fifty Pounds.—Testy, 1. High Priest, 2.
Fifty Pounds. Sable g., 1. Afghan, 2.
Sweepstakes of 10 sovs.—Merry Monk, 1. Cortez, 2
Suffolk Stakes.—Tumbler, 1. Venusen, 2.

WEDNESDAY.

Sweepstakes of 50 sovs.—Acrobat, 1. Kaffir, 2.
Handicap Plate.—Pizarro, 1. Cheddar, 2.
Queen's Plate.—Bluebeard, 1. Commodore Charley, 2.
Sweepstakes.—Tyne walked over.

THURSDAY

Jockey Club Plate.—Hermit walked over
Sweepstakes for Two and Three Year Olds.—Ceres, 1. Lord Raglan, 2.
£50 Handicap Plate.—Fact, 1. Pastrycook, 2
Sweepstakes for Two-Year-Olds.—Alastor, 1. Iago colt, 2

SHREWSBURY RACES.—THURSDAY

Salopian Stakes.—Sea Cheer, 1. Betty Bayliss 2, 2
Herbert Stakes.—Blossom 1. Romeo, 2
Cleveland Handicap.—Shoreham, 1. Lurley, 2
Longnor Stakes.—Tilley, 1. Pearl Jelly, 2
Queen's Plate.—Rataplan, 1. Chanter, 2
Stanley Handicap.—Eva, 1. Timothess, 2
Members' Plate.—Copper, 1. Vingt-un, 2.

FRIDAY.

Attingham Stakes.—Cropper, 1. Presteraft, 2
Acton Burnel Stakes.—Usurer, 1. [illegible]
Hawkstone Cup.—Wingham, 1. Lurley, 2
Shropshire Stakes.—W. Rolock, 1. Hobby Horse, 2
£50 Plate.—Whalebone, 1. Master Slender, 2
£50 Plate.—The Lord, 1. Van Buck, 2.

MONETARY TRANSACTIONS OF THE WEEK.

(From our City Correspondent.)

Owing to the resignation of the French Minister of Foreign Affairs, there have been numerous sales of Stock this week, partly on French account. The supply in the hands of the jobbers has, consequently, increased, and the Consol-market has assumed a dull appearance. There has not, however, been any serious decline in prices—the fall, since the opening on Monday, not having more than about one-quarter per cent. In the present state of affairs, the *Bears* have, as a matter of course, taken advantage of every rumour afloat; but at present, though the assistance of Austria to carry the pretensions of Russia is still held up as genuine, we see nothing indicative of an unusual price for most national securities. There has been a failure announced in the Stock Exchange for £300,000 Consols and Omnium.

The Stock-market on Monday was heavy. Three per Cents opened at 88½, but gave way to 88¾, finally closing at 88⅞ to ⅞. The Three per Cents Reduced were 88 to 87⅞, the New Three per Cents, 88⅜; and Long Annuities, 20 5-16ths. Bank Stock, 207 to 208 xxxx being 16½. Omnium was done at 2⅞ prem. India Bonds were 13s. to 15s.; Exchequer Bills, 5s. to 10s. prem.; Exchequer Bonds, 99¾. There was a further fall in prices on Tuesday. The Three per Cents Reduced were 87⅝ to 87⅞; the Three per Cent Consols, 87⅞ to ⅞. Consols for Account, 88⅛ to ⅜; the New Three per Cents, 88⅜ to ⅞; the New Two-and-a-Half per Cents, 73; Long Annuities, 19 5-16; Ditto for 30 years, 16⅝. India Stock, 251; India Bonds, 17s.; Exchequer Bills, 5s. to 8s. prem. Omnium, 2⅞ prem. On Wednesday, there was a fair amount of business transacted in the Stock Exchange, and prices were fully supported. The Three per Cents Reduced were 87⅞ to ⅞; the Three per Cent Consols, 88⅛ to ⅜; the New Three per Cents, 87⅞ to 88⅜; Consols for Account, 88⅜ to ⅝; India Stock, 250½ to 251; India Bonds, 16s. to 17s. prem.; Exchequer Bills, 5s. to 8s. prem.; and Exchequer Bonds, 99¾. In the market on Thursday only a moderate business was done in Stocks. The Account passed off tolerably well, although one defaulter was declared. Consols were 88⅜ to 88⅝; the prices for May, 30 were 88⅜ to ⅝. The New Three per Cents marked 87⅞; Exchequer Bills, 5s. to 8s.; India Bonds, 16s. prem.

There have been several large shipments of silver to the East, and about 800,000 dollars have sold for that destination, at 61½d. per ounce. This quotation shows an advance of ½d. per ounce upon the previous sale. The imports of dollars have been on a liberal scale, viz., £100,000 from New York, and rather over £300,000 from Australia. The exchanges being favourable, scarcely any shipments have been made to the Continent.

In the Discount-Market money is plentiful and cheap, first-class bills being readily discounted in Lombard-street at 3½ per cent.

Most Foreign Bonds have been dull. In prices very little change has taken place.

Joint-stock Bank Shares have ruled steady, at full prix s: Australasia have marked 81; Commercial of London, 20½; English, Scottish, and Australian Chartered, 16⅜; London Chartered of Australia, 20½; London Joint Stock, 27½; London and Westminster, 43; New South Wales, 34; South Australia, 41. There has been a full average business doing in Miscellaneous Securities, as follows:—Australian Agricultural, 29; Canada Six per Cents, 109½; Crystal Palace, 9¾; General Screw Steam Shipping Company, 1¾; Mexican and South American, 9¾; Peninsular and Oriental Steam Navigation, 11; Royal Mail Steam, 69¾; Scottish Australian Investment, 1⅞; South Australian Land, 2⅝; Ditto Annuities Bonds, 82; Van Diemen's Land, 13; Victoria Docks, New, 9. In Canal Shares very little has been passing, at previous rates:—Birmingham, 99; Coventry, 209; Derby, 84; Leicester, 59; Loughborough, 370; North, 150; Peak Forest, 88; Stourbridge, 285; Stafford and Worcester, 435; Warwick and Birmingham, 20. Wales-Wrexham Shares realised the following rates:—East London, 105; Grand Junction, 68¼; Kent, 78½; Southwark and Vauxhall, 89½; West Middlesex, 91; Ditto, New, 16½. Gaslight and Coke Companies' Securities have met a dull market:—Brighton, 104; City of London, 90; Equitable, 33; Imperial, 103; Ditto, New, 20; Ratcliffe, 70; Surrey Consumers, 11; Westminster Chartered, 99½. Some transactions have taken place in Insurance Companies' Shares:—Globe (Marine) 108, to date, 55; Imperial Fire, 93; Ditto, Life, 18; Law, 10½; Ditto, Life, 59½; Pelican, 47; Phœnix, 45½; Rock Life, 8; Universal, 2½; United Kingdom, 4½. Railway and Canal Shares have changed hands as follows:—Waterloo, 2⅜; Ditto, Old Annuities, 1; Ditto, New Annuities, 1.

Joint-Stock Bank Shares are sold heavily, and prices almost generally have tended downwards. The following are the official closing quotations on Thursday:—

ORDINARY SHARES AND STOCKS.—Edinburgh and Glasgow, 55; Edinburgh, Perth, and Dundee, 112; Great Northern, 92; English, Scottish, and Australian Chartered, 16; London Chartered of Australia, 20½; London Joint Stock, 27½; London and Westminster, 43; New South Wales, 34; South Australia, 41. There has been a full average business doing in Miscellaneous Securities, as follows:—Australian Agricultural, 29; Canada Six per Cents, 109½; Crystal Palace, 9¾; General Screw Steam Shipping Company, 1¾; Mexican and South American, 9¾; Peninsular and Oriental Steam Navigation, 11; Royal Mail Steam, 69¾; Scottish Australian Investment, 1⅞; South Australian Land, 2⅝; Ditto Annuities Bonds, 82; Van Diemen's Land, 13; Victoria Docks, New, 9. In Canal Shares very little has been passing, at previous rates:—Birmingham, 99; Coventry, 209; Derby, 84; Leicester, 59; Loughborough, 370; North, 150; Peak Forest, 88; Stourbridge, 285; Stafford and Worcester, 435; Warwick and Birmingham, 20. Wales-Wrexham Shares realised the following rates:—East London, 105; Grand Junction, 68¼; Kent, 78½; Southwark and Vauxhall, 89½; West Middlesex, 91; Ditto, New, 16½. Gaslight and Coke Companies' Securities have met a dull market:—Brighton, 104; City of London, 90; Equitable, 33; Imperial, 103; Ditto, New, 20; Ratcliffe, 70; Surrey Consumers, 11; Westminster Chartered, 99½. Some transactions have taken place in Insurance Companies' Shares:—Globe (Marine) 108, to date, 55; Imperial Fire, 93; Ditto, Life, 18; Law, 10½; Ditto, Life, 59½; Pelican, 47; Phœnix, 45½; Rock Life, 8; Universal, 2½; United Kingdom, 4½. Railway and Canal Shares have changed hands as follows:—Waterloo, 2⅜; Ditto, Old Annuities, 1; Ditto, New Annuities, 1.

Joint-Stock Bank Shares are sold heavily, and prices almost generally have tended downwards. The following are the official closing quotations on Thursday:—

ORDINARY SHARES AND STOCKS.—Edinburgh and Glasgow, 55; Edinburgh, Perth, and Dundee, 112; Great Northern, 92; English, Scottish, and Australian Chartered, 16; London Chartered of Australia, 20½; London Joint Stock, 27½; London and Westminster, 43; New South Wales, 34; South Australia, 41. There has been a full average business doing in Miscellaneous Securities, as follows:—Australian Agricultural, 29; Canada Six per Cents, 109½; Crystal Palace, 9¾; General Screw Steam Shipping Company, 1¾; Mexican and South American, 9¾; Peninsular and Oriental Steam Navigation, 11; Royal Mail Steam, 69¾; Scottish Australian Investment, 1⅞; South Australian Land, 2⅝; Ditto Annuities Bonds, 82; Van Diemen's Land, 13; Victoria Docks, New, 9. In Canal Shares very little has been passing, at previous rates:—Birmingham, 99; Coventry, 209; Derby, 84; Leicester, 59; Loughborough, 370; North, 150; Peak Forest, 88; Stourbridge, 285; Stafford and Worcester, 435; Warwick and Birmingham, 20. Wales-Wrexham Shares realised the following rates:—East London, 105; Grand Junction, 68¼; Kent, 78½; Southwark and Vauxhall, 89½; West Middlesex, 91; Ditto, New, 16½. Gaslight and Coke Companies' Securities have met a dull market:—Brighton, 104; City of London, 90; Equitable, 33; Imperial, 103; Ditto, New, 20; Ratcliffe, 70; Surrey Consumers, 11; Westminster Chartered, 99½. Some transactions have taken place in Insurance Companies' Shares:—Globe (Marine) 108, to date, 55; Imperial Fire, 93; Ditto, Life, 18; Law, 10½; Ditto, Life, 59½; Pelican, 47; Phœnix, 45½; Rock Life, 8; Universal, 2½; United Kingdom, 4½. Railway and Canal Shares have changed hands as follows:—Waterloo, 2⅜; Ditto, Old Annuities, 1; Ditto, New Annuities, 1.

Very little change has taken place in the value of Consols to-day. The business doing is limited, owing to its being "pay-day" upon the Account. The Three per Cents are 88⅜; the Three per Cents Reduced, 87⅞; and the New Three per Cents, 88 to 88⅜. Omnium, ⅛ prem.; Foreign Bonds and Railway Shares are dull.

THE MARKETS.

CORN EXCHANGE (Friday).—There has been a moderate arrival of English wheat up to our market constantly this week. Fresh up to-day, however, the receipts of that grain were small, and the show of samples was limited. Most trade met a slow sale, yet scarcely any change took place in Monday's currency. We had a dull market for foreign wheat, the show of which was by no means extensive, at Monday's prices. Barley and malt changed hands slowly; but no actual decline took place in prices. Good sound oats were steady, at full prices; but inferior parcels were dull, and 6d. per quarter cheaper. Beans, peas, and flour moved off slowly, on former terms.

ARRIVALS.—English: wheat, 1670; barley, 930; malt, 2800; oats, 1310; flour, 690. Irish: oats, 4940. Foreign: wheat, 6720; barley, 700; oats, 8310; flour, 2400 sacks, 930 barrels.

English.—Wheat, 1 week and head rod, 70s. to 79s.; ditto, white, 77s. to 80s.; Norfolk and Suffolk ditto, 77s. to 79s.; ditto, white, 4 to —; rye, 49s. to 49s.; grinding barley, 32s. to 34s.; distilling ditto, 35s. to 38s.; malting, ditto, 30s. to 36s.; Lincoln and Norfolk malt, 58s. to 68s.; brown ditto, 56s. to 58s.; Kingston and Ware, 67s. to 68s.; Chevalier, 70s. to 72s.; Yorkshire and Lincolnshire feed oats, 21s. to 25s.; potato ditto, 25s. to 30s.; Youghal and Cork ditto, 23s. to 26s.; ditto, white, 26s. to 28s.; tick beans, 37s. to 40s.; ditto, grey, 42s. to 43s.; maple, 36s. to 41s.; white, 41s. to 44s.; harlem, 42s. to 45s.; per quarter. Town-made flour, 55s. to 70s.; Suffolk, 52s. to 56s.; Stockton and Yorkshire, 48s. to 50s.; per 280 lbs. American flour, 38s. to 46s. per barrel.

Irish.—Wheat, 1 week and two by, at full prices. Most other seeds, including cakes, command extreme rates.

Baltic.—Wheat, new, 68s. to 70s.; Baltic, crushing, 66s. to 68s.; Mediterranean and Odessa, —s. to —s.; ditto, white, 4s. to —s.; Marianopoli, 48s. to 50s.; Taganrog, 48s. to 50s.; per qrt. Rye, 42s. to 43s.; oats, 21s. to 23s.; ditto, 23s. to 25s.; per load. Barley, 30s. to 32s.; per qrt. Beans, 40s. to 42s.; per load. Peas, 40s. to 42s.; per load. Linseed, 52s. to 54s.; per qrt. Rapeseed, 42l. to 43l.; per last. Flour, 50s. to 52s.; per sack.

Foreign.—Wheat, 1 week and head rod, 70s. to 79s.; ditto, white, 77s. to 80s.; Norfolk and Suffolk ditto, 77s. to 79s.; ditto, white, 4 to —; rye, 49s. to 49s.; grinding barley, 32s. to 34s.; distilling ditto, 35s. to 38s.; malting, ditto, 30s. to 36s.; Lincoln and Norfolk malt, 58s. to 68s.; brown ditto, 56s. to 58s.; Kingston and Ware, 67s. to 68s.; Chevalier, 70s. to 72s.; Yorkshire and Lincolnshire feed oats, 21s. to 25s.; potato ditto, 25s. to 30s.; Youghal and Cork ditto, 23s. to 26s.; ditto, white, 26s. to 28s.; tick beans, 37s. to 40s.; ditto, grey, 42s. to 43s.; maple, 36s. to 41s.; white, 41s. to 44s.; harlem, 42s. to 45s.; per quarter. Town-made flour, 55s. to 70s.; Suffolk, 52s. to 56s.; Stockton and Yorkshire, 48s. to 50s.; per 280 lbs. American flour, 38s. to 46s. per barrel.

Irish.—Wheat, 1 week and two by, at full prices. Most other seeds, including cakes, command extreme rates.

Baltic.—Wheat, new, 68s. to 70s.; Baltic, crushing, 66s. to 68s.; Mediterranean and Odessa, —s. to —s.; ditto, white, 4s. to —s.; Marianopoli, 48s. to 50s.; Taganrog, 48s. to 50s.; per qrt. Rye, 42s. to 43s.; oats, 21s. to 23s.; ditto, 23s. to 25s.; per load. Barley, 30s. to 32s.; per qrt. Beans, 40s. to 42s.; per load. Peas, 40s. to 42s.; per load. Linseed, 52s. to 54s.; per qrt. Rapeseed, 42l. to 43l.; per last. Flour, 50s. to 52s.; per sack.

Foreign.—Wheat, 6720; barley, 700; oats, 8310; flour, 2400 sacks, 930 barrels.

English.—Wheat, 1670; barley, 930; malt, 2800; oats, 1310; flour, 690. Irish: oats, 4940. Foreign: wheat, 6720; barley, 700; oats, 8310; flour, 2400 sacks, 930 barrels.

Imperial Weekly Averages.—Wheat, 67s. 5d.; barley, 31s. 3d.; oats, 23s. 6d.; rye, 39s. 9d.; beans, 41s. 7d.; peas, 39s. 7d

The Seven Years' Average.—Wheat, 68s. 7d.; barley, 31s. 1d.; oats, 23s. 8d.; rye, 39s. 9d.; beans 41s. 2d.; peas, 39s. 8s.

Aggregate Corn Sold Last Week.—Wheat, 162,062 bushels; barley, 29,858; oats, 17,938; rye, 324; beans, 4,690; peas, 512 quarters

Average.—The portion of business done in the metropolis are from 9½d. to 10½d. of thousand ditto, 9½d. to 9¾d. per 4 lb. 7 oz.

Butter.—The arrivals from Ireland have become extremely inactive, and prices have declined. Foreign and Common sound continue to meet a fair demand.

Bacon.—All kinds are barely changed. The arrivals from Ireland have been moderate. The demand is dull, at late rates. Foreign is in fair request, at late prices. The stock is moderate.

Hams.—The scarcity continues, and prices are well supported. Mild cures, 56s. to 62s.; and choice, 64s. to 70s. per cwt.

Lard.—Most kinds have sold slowly, at about stationary prices. Good ordinary natives have realised 47s. per cwt.

Beef.—There is less activity in the demand; yet the late improvement in the quotations is supported.

Pork.—Fine mess pieces of Irish have been in the metropolis are from 94s. to 102s.; of thousand ditto, 85s. to 90s.; per 196 lbs.

Veal.—The supply of calves has been extremely inactive, and prices have declined. Good and Common sound calves continue to meet a fair demand.

Mutton.—All kinds are barely changed. The arrivals from Ireland have been moderate. The demand is dull, at late rates. Foreign is in fair request, at late prices. The stock is moderate.

Lamb.—Fine grazing, 56s. to 62s.; fine, 64s. to 68s.; and choice, 70s. to 72s.; per 8 lbs.

Pork.—Fine bacon pigs, 6s. to 6s. 4d.; small ditto, 6s. to 6s. 4d.; and fine sucking pigs, 6s. to 6s. 4d.; per score pounds.

Coals.—Lambton's, 21s. 6d.; Hetton, 21s.; Tanfield Moor, 18s.; Wylam, 18s. 3d.; Bell, 17s. 6d.; Belmont, 17s. 6d.; Caradon, 19s.; Hartlepool, 18s. 6d.; Stewart, 18s.

Hops (Friday).—The show of hops is very limited, and a fair business is doing, on rather higher terms. The imports this week are, 17 bags from New York. Mid and East Kent pockets, £14 to £20; Weald of Kent, £13 10s. to £15 10s.; Sussex, £10 0s. to £13 0s. per cwt.

Southfield (Friday).—We were fairly supplied with boasts to-day. On the whole the trade is not for all kinds rated steady, at prices fully as high as on Monday last. Beasts generally, although of very fair quality, were moderate—moved off freely, and late rates were well supported. In every instance. The lamb trade was rather brisk, and very fine lambs were worth 6s. 10d. to 7s. per 8lbs. The best calves were rather dearer, some of which sold at 5s. 6d. per 8lbs.; but other kinds of veal met a slow sale. In pigs, very little was doing. Much cows sold at from £14 to £19 each. [illegible]

Per 8 lbs. to sink the offals:—[illegible] second quality ditto, 3s. 6d. to 4s.; coarse and inferior ditto, 3s. to 3s. 4d.; first quality calves, 5s. to 5s. 4d.; second quality ditto, 4s. 6d. to 5s.; prime Southdown ditto, 5s. 4d. to 5s. 8d.; prime calves, 5s. 6d. to 5s. 8d.; prime sam.—ditto 4s. 8d to 5s. 2d.; inferior ditto, 4s. to 4s. 4d.; prime small porkers, 5s. 4d. to 5s. 8d.; large ditto, 5s. to 5s. 4d. Per 4 lbs. 2 oz.—Inferior to middling quarter-old store pigs, 30s. to 36s. each. Total supply, beasts, 3670; sheep, 21,830; calves, 290; pigs, 400. *Farmers' Journal*, 30 acres, 6th ed.

Newgate and Leadenhall (Friday).—The general demand ruled rather dull, as follows:—Per 8 lbs. by the carcase:—Inferior beef, 3s. 6d. to 3s. 8d.; middling ditto, 3s. 10d. to 4s.; prime large ditto, 3s. 8d. to 4s.; prime small ditto, 4s. to 4s. 2d.; large pork, 3s. 10d. to 4s. 4d.; small ditto, 4s. 4d. to 4s. 8d.; inferior mutton, 3s. 8d. to 3s. 10d.; middling ditto, 3s. 6d. to 4s. 8d.; prime ditto, 4s. 2d. to 4s. 6d.; veal, 3s. 8d. to 4s. 10d.; small pork, 5s. 10d. to 6s. 6d.; lamb, 6s. 10d. to 7s. 6d.

WRECK OF "THE CRESCENT" TRANSPORT SHIP, IN FRUITFUL BAY [illegible] PRECEDING PAGE.]

RETURN OF THE "ENTERPRISE."

THE *Enterprise*, Captain Collinson, arrived at Spithead on Sunday evening, after sunset, from the Arctic Regions, China, and Cape of Good Hope. She sailed from the latter station, Table Bay, on the 18th Feb., and St. Helena on the 2nd March. The only news the *Enterprise* has brought confirms the reports which have preceded her arrival, as to the hostile relations between her captain and his officers. It is quite true that all the executive officers of the ship (Commander Phayre, Lieutenants Jago and Parks, and Mr. Skead, the Master) are under arrest, and have been so for terms varying from three years, and Mr. Parks over two years and a half. All the chief executive officers being thus debarred from doing duty, an acting mate (Mr. Wise, of the *Comus* sloop) was sent to assist in navigating the ship home by Rear-Admiral Sir James Stirling, the Commander-in-Chief of the China squadron, who refused to hold a series of courts-martial on that station. The *Enterprise* was commissioned

CAPTAIN COLLINSON, COMMANDER OF "THE ENTERPRISE" ARCTIC DISCOVERY SHIP.

by Captain Collinson to go in search of Sir John Franklin on the 20th December, 1849, in concert with the *Investigator*, Captain M'Clure, but we regret to add, has achieved nothing in the way of discovery of the lo- expedition

Captain Collinson, C.B., of whom we engrave a Portrait, entered the Navy in 1822. He passed his examination in 1831, obtained his first commission in March, 1835, and in the following September was appointed to the *Sulphur* surveying-vessel. During operations against Canton, in March, 1841, he was officially praised for his very skilful and highly meritorious exertions in piloting the *Modeste*. 18, Captain Harry Eyres, to an excellent and effective position near the last fort protecting the approaches to the city. In October of the same year he assisted at the recapture of Chusan, and the storming of the fortified heights and citadel of Chinghae. In June, 1841, he was promoted to the rank of Commander, and in February, 1842, was appointed to the *Plover* surveying-vessel. In the latter part of that year he was promoted for services to Post rank, and nominated a C.B. the day following.

THE CIVIL HOSPITAL, SMYRNA.

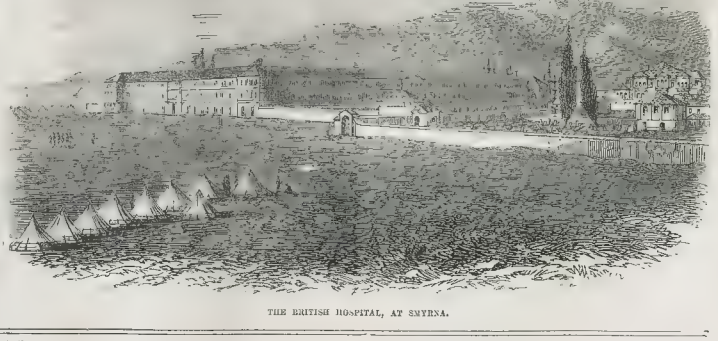
WE have been favoured with the accompanying View of the Civil Hospital, Smyrna, from a sketch by Mr. Edward Atkinson. For the accompanying details we are indebted to Dr. Septimus Gibbon, Assistant Physician to the London Hospital, and Physician to the Smyrna Hospital.

The large building is situated at the southern extremity of the town of Smyrna, and is entirely detached from all other structures. On the southern side of it is a large open field admirably suited for the erection of a wooden hospital. The Hospital, as shown in the accompanying Sketch, is close by the sea, and consequently well situated for the disembarking of sick and wounded soldiers. The fabric is newly built, well ventilated, and well adapted for an hospital. Few of the wards contain more than twenty beds; but there are open corridors which run through the whole building, and all these corridors are at present fitted with beds. It is estimated that the building will accommodate about 600 patients. At the time we write there are 190 patients in it. Hitherto the Hospital has been partly under the military system, but the management is now essentially civil. The Hospital physicians and surgeons, who have come out from the London Hospital, are unanimous in expressing their disapproval of the military provisions for attending the sick and wounded. Their excellent and able superintendent, Dr. Meyer, arrived last week, and has been indefatigable in completing arrangements for introducing the civil system.

A letter from Smyrna, of April 21, gives the following account of the sanitary condition of the place:-

Fever, you will be glad to learn, is on the decrease; fresh cases occur at intervals, it is true, but deaths are now few and far between. It is not a Mediterranean form that has raged amongst us; but evidently the fever imported from a northern clime; and very similar, if not the same, as the typhus in Ireland following upon scarcity, famine, and want of cleanliness. It has certainly been highly contagious; but the great improvement in ventilation and closing of the ground-floor for patients, better food, and closer watching, have reduced the number of actual cases to below the number an hospital of such a size might fairly expect. The fever had not mitigated its rapacity, however, until it had attacked several of our nurses, and clutched hold of one, Miss Drusilla Smyth, beyond all powers of rescue. She died on Thursday morning, at six a.m., and was buried in the Protestant burial-ground at six in the evening. Though burials had been frequent, this one cast a heavy gloom over all. It was the first victim to untiring self-devotion among the delicate fragile beings who had come with us to show how much stronger a spirit of self-sacrifice is than the strutest muscular frame. The whole of the military at disposal preceded her remains through the tortuous streets and bazaars of Smyrna, and her companions in love and labour, the lady-nurses, followed her to her last resting-place. The Colonel Commandant and the whole of the medical staff, purveyor's staff, and as many wardmasters and orderlies as could be spared, attended in a long and mournful train, two and two. One thing throughout this sad and melancholy duty made a great impression upon me, namely, the death-silence of all the streets as we passed through them. The Turks and Greeks all showed the greatest respect to the ceremony of sorrow, even of those they looked upon with some disgust and suspicion. Miss Aphis, one of the nurses, has had a very severe attack, but is pronounced to be out of danger. For a long time we were very nervous about her. But now everything is so much improved, and our prospects are so cheerful, that we are almost forgetting the past. Our real difficulty is to find a wholesome residence for the lady-nurses. They cannot be in the hospital, and Turkish houses are so filthily drained that they are almost all unhealthy.

After all the pains and expense incurred in fitting up this Hospital, we are now told that it is to be given up. When Smyrna was first spoken about as the site of an hospital for convalescent soldiers, strong objections were made on the ground of its unhealthiness, and its distance from the Crimea; but these were all overruled by Government. It appears that the medical authorities in the East have already come to the conclusion that the Hospital is really too far from the seat of war, and that part of the staff is to leave Smyrna for the wooden barracks about to be erected on the Bosphorus. It has frequently been suggested that the best arrangement would be to have sufficient accommodation at Balaclava and in the vicinity of Constantinople for all those sick and wounded who are likely to be soon restored to health, and for those who are too ill to stand a long voyage, while those who have been disabled so as to be unfit for service should be brought home at once. This we believe is the plan pursued by the French, and we cannot do better than follow their example.



THE BRITISH HOSPITAL, AT SMYRNA.

No. 743.—VOL. XXVI.] SATURDAY, MAY 19, 1855. [WITH A SUPPLEMENT, SIXPENCE.

WILLING AND UNWILLING AUSTRIA.

FORTUNATELY for Great Britain and France, and for the cause of European liberty and civilisation of which they have made themselves the champions, they are able to fight the battle without assistance. Perhaps if they had had the aid of Austria and Prussia, it would have been unnecessary to draw the sword; and there is little doubt that, with such aid—which they had every right to expect—the war, if it had begun in 1854, would have ended before 1855. Even at this late period the complete and cordial cohesion of Austria—leaving Prussia out of the question—would diminish the duration of the struggle by increasing its intensity. To that consummation, in spite of delays and procrastination, Austria must march. She is no longer mistress of her actions. It is impossible for her to remain neutral—or, more monstrous still, to take part against the Allies. She is with us, by her pledged honour, by her obvious interest, by her plain duty, by inevitable necessity, by every consideration of right, of sympathy, and of self-preservation. But she is slow, unwieldy, and hampered by obstructions. The leaders of public opinion in France and England should beware of throwing further, and quite unnecessary, impediments in the way of her Government. The work goes on without her, and will. But at the earliest moment in which she can overcome those internal difficulties, that appear small to foreigners who do not understand her position, but which are large, if not formidable, to her own subjects, she will throw her whole weight into the struggle, and perform her part with the dignity that becomes her.

It must not be forgotten that Austria has just emerged from a sanguinary revolution, during which her polished capital rivalled, in the atrocity and horror of the deeds committed by an exasperated populace, the worst horrors committed by the people of the still more polished capital of France in 1789 and 1793. The passions then aroused have not entirely subsided; and demagogues, who would rather that France and England should be defeated, and that Russia should ride rampant over the world, than that their theories of Republicanism or Nationality should not have a chance of spasmodic life during the struggle, are on the watch for events, and take more delight in perplexing and injuring Austria than in serving that cause of liberty and independence which dwells upon their tongues, even if it have no abiding place in their hearts. When the British public hear any such men talking of the nationality—say of Hungary, for instance—let them ask themselves what they would have thought during the lifetime of the late Daniel O'Connell, if an agitation had been fomented in Vienna, or in Prague, in favour o. the nationality of Ireland? if the Government of Great Britain had been denounced by Austrians with every conceivable form and combination of opprobrious epithet as an alien Government—the bitter and implacable oppressor of the Celtic people? And if the Austrian Government, or its Prime Minister, had been unwise enough to countenance and aspire to lead such a movement, what language would have characterised the folly and impertinence—not to say the wickedness—of the attempt? Under such circumstances, how long would peace have been possible between the two Governments? At the present time, neither this country nor France has any concern with nationalities—with the sole exception of Poland—and with that they would have nothing to do if they were at peace with Russia. But if we really desire the aid of Austria—aid which would be invaluable in bringing the war to a speedier conclusion than it is likely to arrive at while she keeps aloof—we should beware how we embarrass her by talking with favour of projects that, if successful, would lead to her dismemberment, and the mere mention of which, in influential quarters, is a source of weakness and embarrassment to her Government.

It should also be remembered that Austria is in a state of pecuniary difficulty. She has immense resources—but they are undeveloped. She has a rich soil, an active-minded and industrious people, with unnumbered facilities for the extension both of her internal and her maritime trade; but she has been kept back by the feudalism happily abolished in 1848 and 1849; and requires time to turn that necessary revolution to its proper uses, and to become something better than a merely military power. Much as Great Britain and France require peace, Austria requires it still more. Great Britain and France can wage this war without the prospect of financial ruin; but it is difficult to see how Austria can bear so heavy a burden without incurring risks in the highest degree perilous. Solvency no less than stability is essential to every Government that desires to be respected and feared. All this should be taken into account before Austria is accused of treachery to the Allies, or of a design, near or remote, to make common cause with Russia. Yet much, if not all, of this is forgotten both in and out of the British Parliament; and Austria—jealous and susceptible, and rendered so by recent revolutions and mob rule—is perplexed with the idea that the Government of England is so weak, and popular passion so strong, that her alliance, which it would cost her so much to give, would not be appreciated, and might be repudiated, in thi country.

Yet, while acknowledging all this, and much more in the interna politics of Austria that is but very imperfectly understood by British statesmen and the British people, we cannot forget that there is a limit to prudence, which overpassed, subjects him who

PEREKOP IN THE CRIMEA.—FROM A SKETCH BY WILLIBALD RICHTER, OF VIENNA.—(SEE NEXT PAGE.)

exceeds it, to the imputation of cowardice. Has not Austria reached that limit? With the fullest appreciation of their many difficulties, and with the utmost confidence in their honour, we believe that the Emperor Francis Joseph, and his advisers, have arrived at a climax, at which further hesitation will not only be dishonourable in itself, and in opposition to their past pledges, and present duty, but more costly and more dangerous than decided action. In Austria there is such a thing as public opinion. It does not find vent in newspapers, because the press is not free; it does not make a loud utterance in society, because the Government is despotic;—but it exists, nevertheless, and must be known to such men as Count Buol, and Baron Bruck, and in all probability to the Emperor himself. That opinion is to a large extent identical with their own, and is in favour of the Allies, and as energetically opposed to Russia, on every point and pretence, and for every conceivable reason, as the public opinion of Great Britain and France. But there is another kind of public opinion with which it is right these eminent and patriotic men should be made acquainted—the public opinion of Europe. If they hesitate longer—whatever the sacrifices which their decision might involve—they will fall in the estimation of the world. Like Prussia, they will lose character and caste. The moral *prestige* which makes nations great and keeps them so, will fail them if that quality which in proper subjection to duty is prudence, but which, in subjection to fear of consequences becomes poltroonery, leads them to hesitate when action is essential both to their honour and their safety. Neutral they cannot be; for their neutrality, or any course of conduct which they might attempt to disguise under that name, would be hostility to the Allies, and nothing less. As such it would be resented; and then the question of "nationalities"—with which France and England have no present right or call to meddle, would be as legitimate a weapon of aggression as a bombshell, a ship-of-the-line, or Lord Dundonald's apparatus, whatever it may be, for destroying Cronstadt and Sebastopol. But Austria will not, we are certain, require any such reminder of the danger of disappointing the just expectations of Europe. If she have been slow to make engagements, she has scrupulously performed them. She has never encouraged the designs of Russia; she has more to lose by their fulfilment than any other State of Europe; and her honour is pledged to unite with the Allies, in a contingency, which doubtless she would like to postpone, but which is fast approaching; and which nothing but the surrender or defeat of the Czar can prevent.

But what would be the position of Austria, if Great Britain and France—as is by no means improbable—should achieve a splendid and decisive victory, while she stood trembling, and inactive? Certainly it would not be a position which the young Emperor would have much pleasure in reflecting upon; or from which Count Buol and Baron Bruck could, as true patriots and wise statesmen, derive either satisfaction or credit. She would forfeit her right to be considered as a first-rate Power. She would afford a proof that the peace of the world could be kept without her aid; and would teach the oppressed, in every part of the Continent, whatever their "nationality," their grievances, or their objects, that the real masters of Europe were France and England. This may be a very desirable consummation for France and England; but how it would conduce to the integrity of the Austrian Empire, to the extension of her resources, to the rescue of her people from the evil effects of past misgovernment, and to her assumption of her rightful place among civilised and prosperous States, it is for the Emperor of Austria and his Ministers to determine.

We have been informed on high authority that Marshal Radetzky is ready to guarantee the tranquillity of Lombardy with only one-fourth of the army now stationed in that province. No fears are entertained of Hungary, for the Hungarian peasantry and people are satisfied with the destruction of the feudal privileges which oppressed them prior to 1848, and are to a man loyal and well-affected to the Emperor; and the Czek population supplies a large portion of one of the finest armies in the world, and partakes the satisfaction of Hungary at the new order of things, inaugurated by the reign of Francis Joseph. What, then, keeps back the Austrian Government? Is it Baron Bruck, the man of one idea? Or is it pusillanimity on the part, not of one but, of many? We cannot believe in the pusillanimity. The machine is cumbrous, but it will move. The men are slow, but they are right-minded and honest. Let them take care that the battle be not won without them; and that the next settlement of Europe be not effected without consultation with those who, like Prussia, have lent no hand in the heat of the struggle, and who cannot expect either honour or advantage if they did not share in the sacrifices.

PEREKOP.

This little village is an important point of the Crimea, inasmuch as it is situated upon the isthmus which is the principal entrance to the country. Our View is from an original Sketch by Willibald Richter: it shows the principal portion of the village, with the arrival of a reinforcement of Russian soldiers, Cossacks, artillerymen, &c. The buildings shown are a post-station, and a dépôt for salt, which is manufactured here. On the right is an ancient minaret, on the road leading to Simpheropol: it has a rent caused by a stroke of lightning some years since. The fortress east of the town contains a palace, barracks, a mosque, and a Greek church. We quote the following descriptive sketch of the place from an interesting little volume just published, entitled "The Crimea: its Towns, Inhabitants, and Social Customs, by a Lady, resident near the Alma":—

About two miles and a half from Armiankoi Bazaar is the little village of Perekop, inhabited chiefly by Government *employés* and those connected with the salt lakes in the neighbourhood. The village is entered on the Russian side by a bridge, which crosses a wide and deep ditch cut across the isthmus. It is this ditch which has probably given its name to the isthmus—Perekop, in the Russian language, signifying a ditch cut across the road, or between two seas.

The principal entrance to the Crimea is by this isthmus, which separates the Black Sea from the Putrid Sea, and is about seventeen miles in length and five in breadth; but there is still another, which is now very much used, along the tongue of Arabat. This narrow strips of land, seventy miles in length, which runs between the Sivash, or Putrid Sea, and the Sea of Azoff, is separated from the mainland at the northern extremity by a narrow channel. There are several post stations along this road; and at the southern extremity, where it is joined to the mainland, stands a fortress, which is in a very ruinous state. Not many years ago a bridge was constructed to complete the communication between the Russian mainland and the Crimea, and by this bridge the chief intercourse between the eastern part of the Crimea and Russia is now carried on.

A few years ago several rich and influential men in Russia proposed to form themselves into a company for the purpose of making a railway from Moscow to Theodosia, and the line chosen as the most advantageous was along the tongue of Arabat. This plan was presented to the Emperor for approval; but, as it was his wish that a railway should first be made between Moscow and Odessa, the execution of the company's projected line was postponed.

CONSTANTINOPLE. DANGEROUS CONSPIRACY OF THE COOKS.

(From a Correspondent.)

We have hitherto, out of consideration for the Government, left many complaints of mismanagement in the East entirely to Commissioners. We cannot say that we have been quite easy in our minds about many things, but we felt that a complimentary forbearance was due to Ministers. Even now we by no means desire to embitter the Ministerial white-bait dinners, which form so agreeable an official prospect at this season of the year, by any mistimed relation of the horrors to which our heroic fellow-countrymen are bowed down and dispirited at the cheerless hour of dinner in the East. These brave men, however, are subject to no common privations; and, after much and careful consideration, we have come to the conclusion that their miseries must be occasioned by that fiendish cabinet of St. Petersburg, which being unable to overcome Lord Raglan in the field, or Lord John Russell in the council, have resolved on the cowardly expedient of attacking our noble army through its digestion, and destroying it collectively with so mean a weapon as the dinner-knife.

Even while we are writing, their diabolical machinations are ripening daily. Highly-connected Generals, each with a staff of his own and his banker's relations, are now compelled to devour the most impossible and injurious food. By the utter absence of all evening entertainments (another cunning design of our enemies), dinners at Constantinople are unnaturally prolonged, and the cooks have thus full time to effect our ruin. Their ingenuity is diabolical. You may dine at every table in the town for six months running, and you will get the same cloying, insipid food. Some of the Greek cooks in the houses of the natives, still undebauched by European visitors, have now and then ideas pungent and succulent enough, especially about lobsters; but the Franks seldom, indeed, have an opportunity of profiting by them. The native cooks in Frank houses and hotels are soon denaturalised and spoiled. They make spurious French and English dishes, of an appearance and flavour quite astounding. They will introduce you to the strangest and most ill-favoured alimentary acquaintance with the utmost effrontery as an old friend. You will be puzzled by seeing a singular soup served under the name of plum-pudding, and a piece of tough fried anything is impudently called roast beef. They will take the longest names out of a *carte* of a French *restaurateur*, altogether haphazard, and apply them in an unblushing manner to any mess whatsoever that they may have thought worthy of an European digestion. This is not surprising. The cooks of our allies the Turks are never employed; and the Greek cook, as well as the rest of that uncomfortable and perplexing people will fast for six weeks at a time, and during the whole of that period never suffers anything but acrid shrivelled little olives and rank caviare to pass his lips. How can such a cynical-minded fellow (they are all men, a plague on them) become a good cook? It is physically impossible that he should ever be able to penetrate the sublime and hidden mysteries of his craft. A cook, to be worthy of that respectable name, should be a smooth, snug, comfortable genius, with a thorough appreciation of the consoling delicacies of the table; with a chaste and correct idea of the "Nice" in all things. He should have a portly and dignified development of apron. He should have an enthusiastic idea of the benefit conferred on a dyspeptic world by his honourable and lucrative profession. He should reverence cooking as an art, beside which that of the most accomplished physician is vanity and vexation of spirit. An air of studious philosophy should brood over the culinary temple where he officiates as high priest and king. Laughter and light talk should be absolutely banished. A cook who comprehends his mission will understand its solemnity and importance too well to allow the absorbing reflection in which he is constantly engaged to be disturbed by irreverent conversation or ideas. He will know that an indigestible dish served at the table of a General may occasion the destruction of his army, by the state of feverish irritation and ill-temper into which the General is thus thrown. Improper food may spoil the negotiation of the ablest diplomatist, by occasioning in him sudden starts of spleen or passion. It may disturb the rest of the harassed courier on his way with important despatches, and render the further prosecution of his journey impossible.

As the Greek cooks of Constantinople must understand the grave responsibilities which rest upon them, we cannot but conclude from their perverse conduct that they are employed and paid by some far-sighted Russian diplomatist, slowly to effect our entire destruction by the constant administration of pernicious sustenance. We would rather not discuss this question, indeed, but the Greeks are very angry just now, and very reasonably so. They are a pestilent and brooding race of men; and it is certain that whether this idea may have distinctly presented itself to the minds of the cooks as a body or not, they are evidently animated by some earnest and deep-seated feeling of hostility towards us. The unvarying toughness of some preparations issuing from their hands; the constant and nauseous squashiness of others; the dinginess of the plates, the bluntness of the knives, the melancholy inefficiency of the garlic-smelling waiters; the flatness, muddiness, and general impossibility of the wine, added to the excessive charges, would certainly lead any unprejudiced inquirer to the conclusion, that a conspiracy of no common nature has been formed against our gallant army, even in the very country of the Allies whose cause we have espoused. Far be it from us to insinuate any charge of a disgreeable nature against the oppressed Christians in Turkey; but even in the quiet homes of England there are many anxious mothers and fond wives who have viewed with feelings of unutterable anguish the attenuated forms of their gallant sons and husbands, and who have heard those heroes declare with their own lips that their cheeks have grown pale, and their constitutions have been injured, by the dreadful dinners to which they have been compelled to submit during a brief sojourn at Constantinople. In compassion, therefore, to our suffering fellow-countrymen, we trust that our present *débonnaire* and unoccupied Minister will make this important matter the subject of a prompt official inquiry.

Royal Institution.—On Friday evening, the 11th inst., at the Royal Institution, a very interesting lecture was delivered by Mr. Henry Bradbury, on the beautiful process recently introduced in this country known as Nature-printing. The splendid work on "Ferns," edited by Dr. Lindley, and printed at the office of Messrs. Bradbury and Evans, has attracted general notice. The principle of Nature-printing, which consists in taking an exact facsimile of a plant by pressure, has been known for many years; and Mr. Bradbury gave an interesting account of the practice of the art in the early days of typography, of its long disuse, and of its modern revival. In Germany it has been chiefly brought to its recent perfection; and during a professional residence in Vienna the lecturer made himself familiar with the process, and has most successfully introduced it in England. The audience at the Royal Institution were delighted to trace this process throughout its various stages, by the exhibition, not of models, but of the actual machinery, including the electric battery, by which the impression of a plant is produced; and Mr. Henry Bradbury's intelligent explanations showed how completely he had mastered this art, and how, at his hands, we may look for its attaining a high perfection in this country. After the lecture, Mr. Bradbury produced, for the gratification of the company, thin electro casts of the impressed plates in the remarkably short space of five minutes.

Indian Rivers.—A very interesting discussion on the capabilities of our Indian empire has been lately originated at the Society of Arts by a paper read by Colonel Cotton, Engineer of the Madras service. Those interested in this question, which, among other points, involves our cotton supply, will find information of the most complete and clear kind conveyed by a model of the water-sheds of India, which Mr. Montgomery Martin has lately presented to the museum of the India House, Leadenhall-street.

An Income-Tax Collector.—One of the collectors of the Income-tax in a district near Birmingham, has been committed for trial at Warwick assizes, on a charge of embezzling sums of money collected by him on account of the Income-tax. He had returned a number of houses void on which the tax had been collected, but in the subsequent half-year he had paid the amount in full.

THE SILENT MEMBER.—(No. XVII.)

Lord John Russell seems to be desirous of making up for lost time—a loss he has lately incurred to a very considerable extent—and has already presented a bill for giving a Constitution to the colony of Victoria. This measure bears as near a likeness as the Imperial Government will permit to a draft sent over from the Colony and agreed to by the Legislative body there; but it is threatened with opposition by Mr. Lowe, on the ground that it does not represent the real wishes of the colonists. Should the member for Kidderminster succeed in embarassing the Administration of which he lately formed a part, by causing this bill to be rejected, he will, no doubt, answer his own purpose by showing how troublesome he can be in opposition, but it is very doubtful whether he will do a service to the colony of whose interests he assumes to be the guardian. The Constitution proposed by Lord John Russell is essentially the same as that which has been framed by the Council, which is the legally recognised organ of the views and interests of the colonists. If Mr. Lowe wishes to reject everything proceeding from that legitimate source, it will be difficult to discover the quarter from which he expects to obtain a measure that will be likely to receive the sanction of the British Parliament. The colonists will not be very grateful to their friend Mr. Lowe for throwing over the proposed Constitution, and failing to substitute some other plan for putting an end to the state of uncertainty and discontent which has long prevailed in Victoria. Supposing that the bill introduced by Lord John Russell does not go the length of doing all that the whole of the colonists might agree to demand, there is, nevertheless, a very great amount of good in the scheme and it might, of course, be subjected hereafter to extension and improvement. If this plan is now defeated, it is most likely that two years at least will be lost before any constitution at all can be given to Victoria; and, considering the unsettled state of the colony, it is impossible to see what might be the effect of this seeming neglect of its interests by the Home Government.

The Committee on the State of the Army in the Crimea has completed the taking of the evidence. Though there has been from the commencement a constant fire kept up against the official witnesses, and the affair has gone on advancing, through the newspapers, in double columns, the progress seemed to be as unsatisfactory as the advance of the Allies has been, until lately, on the walls of Sebastopol. Every one is now expecting anxiously the report, which it is to be hoped will not end in mere noise and smoke, but will be in effect a vigorous assault on the bad system to which so much has been sacrificed. Lord Aberdeen was selected to furnish the subject of the finale to the inquiry, but the result was not very brilliant or satisfactory. His Lordship admitted the great inconvenience arising from the absence of the Master-General of the Ordnance; but he had got over the difficulty in a truly official manner, by appointing a Lieutenant-General to do the duty of the absentee—or, rather, to attempt to do it while the absentee still held the office. In ordinary business, if a merchant has an inefficient or an absent clerk, his place is supplied by another; but in the public service it seems to be quite orthodox to make a new place for a new servant, at an additional salary; so that the public have to pay two officers for the services of one of them.

Great calamities will of course happen in spite of every precaution, but it does seem rather hard that a misfortune should occur in relation to a matter which legislation has especially been employed to guard against. Everybody who has added a few bricks to a garden wall, or changed the position of a copper, will be aware by a demand upon him for fees, that there is in existence a very stringent measure called the Building Act. This would of course be a very wholesome law, if it did all the good it was professedly passed to accomplish; but when one hears of such a frightful casualty as the fall of the Atlas Iron Works, it is impossible not to feel that, in spite of a great deal of inconvenience and expense occasioned by the Act in question, whenever bricks and mortar are to be used, the law is not effectual for the prevention of such alarming incidents as that by which more than a hundred lives might have been sacrificed. We shall probably hear that everything that was done was done in conformity with the established rules of science, and we shall have the great fact of the fall of the building utterly unaccounted for. As providentially no life may be lost, there will be no coroner's inquest, and consequently no inquiry whether the alterations at the works had been effected in conformity with the Building Act; and, if such has been the case, who is to blame for the occurrence of the accident?

It is easy to understand why Lord Palmerston should feel sore with Mr. Layard, but it is difficult to conceive how the Premier can allow himself to descend to those petty acts which render his soreness visible. The refusal of his Lordship to give Mr. Layard a day for the discussion of his motion, with an intimation that "the honourable member must find a day for himself," was quite unworthy of the Premier, who will find that his own day will come, perhaps, before he is prepared for it. Considering how many days are lost by the Legislature, it is strange that there should be any difficulty in finding one for the discussion of a subject in which the country takes a serious interest.

The debate on Lord Ellenborough's resolutions in the House of Lords did not give the public a very favourable opinion of the capacity of the statesmen who took part in it, but the dullness of the affair has been accounted for by Lord Redesdale, who declared that the presence of ladies had paralysed a portion of their Lordships' eloquence. One Peer had positively intended to have addressed the House; but, like the sentimental gentleman in the song, who "rose, but could not speak, for her eye was upon him." His Lordship remained silent under the gaze of the ladies who were permitted to be present. There is no knowing what an amount of brilliant eloquence may have been lost to the pages of Hansard by the attendance of the fair sex in the House of Lords on Monday last; but if I thought that the debates would be curtailed by an extension of the privilege of admission to an increased number of females, I would for once break my silence in the House of Commons and propose the enlargement of the Ladies' Gallery. Lord Redesdale compared the appearance of the House of Lords on the evening in question to that of a Casino—a comparison not very complimentary to the ladies who happened to "assist" at the debate, and whose conduct and manners surely were not such as to warrant the rather odd allusion.

One of the reasons assigned for the infrequency and poverty of the news conveyed by the electric telegraph at the Crimea is the difficulty found by the Government in comprehending the explanatory cipher. If the members of the Administration do not understand ciphers they must find it rather hard, occasionally, to understand each other. In one instance the key is said to have been lost—a sign that it must have fallen into hands as careless or incompetent as those in which the keys of office are sometimes deposited.

Art Contributions in aid of the Patriotic Fund.—The drawings contributed by the Royal children to this fund were sold on Monday, according to announcement. The Princess Royal's drawing was purchased for the sum of 260 guineas. The Prince of Wales' brought 55 guineas; and the remaining drawings, by the Princess Alice, Princess Helena, and Prince Alfred, 50 guineas each. The owners of these attractive contributions have considerately allowed them to remain at Kensington-house, where they will be exhibited during the present season. Independently of the invited, 1000 persons paid for admission at the doors.

Testimonial.—On the 2nd inst., a handsome silver inkstand was presented to the Vestry Clerk of Hillingdon, at a vestry-meeting attended by the Rev. Beilby Porteous Hodgson, the Vicar; the churchwardens, and several influential parishioners. The inks and bears the following inscription:—"This testimonial is presented to Thomas Witts Watford, Esq., by a few of the parishioners of Hillingdon, as a mark of their high appreciation of his valuable services as Vestry Clerk of the parish for a period of fifty years, which he completed on Tuesday April 10th, 1855."

IMPERIAL PARLIAMENT.

HOUSE OF LORDS.—MONDAY.

CONDUCT OF THE WAR.

The Earl of ELLENBOROUGH, in moving the series of resolutions of which he had given notice, and which we gave last week, said that the country had now been more than a year in a war in which its whole naval and military strength had been called into operation. There had been no failure of courage on the part of our soldiers and sailors, and yet our military operations had been attended with sufferings unequalled, but without being also attended with any correspondent success. He adverted to the topic which apparently weighed upon both Houses of Parliament during the present Session, and traced the lamentable cause to the incompetence of the present Government. The only sound principle, he contended, was that merit should be the passport to office, though he admitted it would expose a Minister to dangers resulting from the jealousy of influential persons, unless supported by public opinion. He was, he confessed, apprehensive at the growth of popular impulses out of doors, and he, therefore, asked their Lordships to neutralise any mischiefs which might thereby be occasioned by those guiding the general movement, so that offi- l persons should be chosen with an eye to their capacity, and to that alone. The noble Lord then proceeded to comment on the blunder of losing the enlistment of 16,000 militiamen, by an attempt to save some £50,000; on the fact that the services of the Baltic fleet were rendered nugatory by the non-supply of soldiers and gun-boats; that the Asiatic field of action against the Czar had been neglected, and that the attack on Sebastopol had been both ill judged and ill timed—a double blunder—a blunder in diplomacy and a blunder in warfare. The noble Lord also dwelt on the besieging army of the Allies was that it was itself beleaguered between the Russian trenchments and the sea—unable to take the field, and yet finding it hopeless to take its trenches. He considered the Government at home responsible for all the disasters which had taken place, and for the eventual failure of the siege: and the fault, he believed, was more fairly attributable to the men than to the system upon which it was sought to be thrown. He supported administrative reform for the same reason as he had formerly opposed the Reform Bill, because he wished to see the ablest men placed in the public service. Their Lordships should recollect that they enjoyed their hereditary rank and privileges owing to the merits of their ancestors, who had won their position, not by favour but by fitness, and he trusted in the present crisis like the present they would act on the very principle to which they owed their own existence, and place themselves in the van of public opinion.

Lord ABERDEEN said, the resolutions were a series of truisms and platitudes ending in accusations in which both the persons and the acts impugned were alike vague and indistinct. Viewing the resolutions, however, as a censure on the Government, he would meet them with a distinct negative. As an apology for the mistakes which had taken place he advanced to the forty years of peace which the country had enjoyed, and the insufficiency which not unnaturally followed on our armaments, after all the retrenchments which had been effected. The Government had, however, laboured indefatigably and successfully to place them on a proper footing when a sudden war rendered their assistance necessary. Considerations of public policy prevented his citing any documents in support of his assertion; but he assured their Lordship that since February the British troops had been constantly improving in health, strength, and efficiency, and were now unrivalled in every quality which could render an army formidable to an enemy. The noble Earl had not advanced a single instance in which insufficient functionaries had been placed in high offices from favouritism, and he could only meet the general charge with as general a denial. The noble Lord proceeded to say that true patriotism would suggest to their Lordships the adoption of a course which would strengthen the hands of Government, and give the army and its General increased confidence in their constitutional directors.

The Earl of HARDWICKE entered in much detail into the conduct of the transport service and the establishment of the blockades, charging the Government with numerous faults in the commission and commission, and pointing out better modes of procedure for the future.

The Earl of ELGIN defended the Government, whose measures were as yet to a considerable degree untried, and no advantage could, therefore, arise from a mere change in the *personnel* of the Government.

Earl GRANVILLE repudiated the charge of nepotism in the election of public officers. The resolutions exaggerated all the disasters they referred to on the one hand, while they ignored, on the other all the improvements which had been carried out, and all the advantages which had been obtained

The Earl of DERBY said, he could not allow Ministers to shelter themselves behind the bravery of our armies, who had so gloriously upheld the character of the country in the field of battle. He entered into considerable detail to show that the expedition to Sebastopol was a total and a disgraceful failure undertaken without proper consideration or preparation undertaken at the wrong time, in a wrong manner, and resulting in placing the army in a situation of being rather the besieged than the besiegers. The terrible sufferings in this winter campaign in the Crimea were to be attributed to the negligence and incapacity and want of foresight exhibited by all the public departments. It would be a useless task. Amongst those changes he instanced the conclusion of the Vienna Conferences and the extinction of Lord Palmerston's excessive popularity.

The Duke of NEWCASTLE defended the Government of which he had been a member from the censures of the Earl of Derby.

The Marquis of CLANRICARDE opposed the resolutions

The Marquis of LONDONDERRY supported the resolutions

The Marquis of LANSDOWNE, in defending the conduct of Government, said they must look merely at the losses sustained by the Allied army in the present winter. The Russians had suffered far greater losses than we had done. A few days before the death of the Emperor Nicholas, a return was given in, which showed that no less than 177,000 Russian soldiers were lifted up to that time. According to a supplemental return furnished some days later, 70,000 men were added to the list, making in all 247,000 men since the beginning of the war

Lord ELLENBOROUGH having replied, their Lordships divided. The numbers were For the motion—present, 71; against it, 116. Majority, 44. The Government then called for proxies, and 66 were produced. Lord Ellenborough did not call for proxies.

HOUSE OF COMMONS.—MONDAY.

THE VIENNA CONFERENCES.

In reply to questions from Mr. M. Gibson and Mr. Layard, Lord PALMERSTON said, he could not give a Government day for the discussion of the protocols of the Vienna Conferences, owing to the great pressure of public busine- He had offered a day to Mr. Layard, which he had declined.

Mr. DISRAELI said that in all former cases where similar papers had been communicated to Parliament the Government of the day had invariably made them the subject of discussion of its own accord. If the noble Lord at the head of the Government was disinclined to adopt the precedent he referred to, he might at all events feel it to be consistent with his duty to give facilities to other hon. members to bring forward the discussion

Lord PALMERSTON said, he would not offer any impediment to such a discussion, and any hon. member, by an arrangement with gentlemen who had notices on the paper, might bring forward a motion on the subject. The Government business was very pressing, and he could not, therefore, bring forward any measure of importance, but he would be ready to meet any discussion which might be originated by others.

The Customs Duties Bill was read a third time and passed.

METROPOLITAN LOCAL MANAGEMENT BILL.

Sir B. HALL entered into some explanations with respect to certain changes which he deemed necessary to make in Hobhouse's Act, which is incorporated in the bill.

Viscount ERRINGTON moved as an amendment that the further consideration of the bill be deferred till the House has decided upon the principles of the bill announced by the President of the Board of Health for the modification of the Act commonly known as Hobhouse's Act, which Act is proposed to be incorporated in the Metropolitan Bill.

After a short discussion.

Lord ERRINGTON withdrew his motion.

Mr. MACKINNON then moved that the bill be referred to a Select Committee

The House divided, and the amendment was negatived by a majority of 131 to 8.

The House then went into Committee, and considerable progress was made before midnight, when the House resumed, and the Chairman reported progress.

Lord PALMERSTON said, he would give precedence on Monday to the motion of Mr. M. Gibson with respect to the Vienna Conferences.

HOUSE OF LORDS.—TUESDAY.

PROXIES.

The Earl of MALMESBURY complained of some irregularities in taking the division on the previous night. He was, he said, had been called for without notice, with the result of securing the Ministerial majority, the Opposition not having had time to call the proxy papers on their side.

The Earl of ELLENBOROUGH gave some explanations, and, after a brief conversation, the subject dropped.

TRADE WITH RUSSIA.

The Earl of ALBEMARLE moved the following resolution:—"That it is the opinion of this House that, in order to bring the war with Russia to a speedy termination, it is necessary to restrict the trade with that country by more efficient measures than any which have hitherto been adopted or announced by her Majesty's Government."

Lord STANLEY of ALDERLEY repeated the explanations which had already been often urged by the Government to justify the leniency heretofore shown towards neutral Powers with respect to the export of Russian commodities. Every exertion, however, would be made to establish a rigid blockade at all the Russian ports, and to intercept, as far as possible, the direct commerce of that country along the whole extent of her seaboard.

Lord Ravensworth, Lord Wodehouse, Earl Granville, the Marquis of Clanricarde, Earl Grey, the Earl of Derby, and Earl Fitzwilliam continued the discussion

Their Lordships then divided, and the motion was negatived, the numbers being—Contents, 31; non-contents, 47: majority, 16.

HOUSE OF COMMONS.—TUESDAY.

Mr. LAYARD announced his intention of bringing forward the resolutions of which he had given notice as an amendment on the motion for Committee of Supply, upon Thursday week.

THE HARDWARE TRADE

Mr. HADFIELD moved that the House should resolve itself into Committee to consider the laws which secured the property of the manufacturers and the wages of the workmen engaged in the fabrication of various descriptions of hardware. The object of his motion he explained to be the extension of the statute of 6 and 7 Victoria, so as to include Birmingham, Sheffield, and Wolverhampton in its provisions

The motion was agreed to, and the House having gone into Committee, a resolution framed to carry out the object indicated was agreed to

On resuming, Mr. HADFIELD obtained leave to bring in a bill on the subject.

THE SCREW-PROPELLER.

Capt. SCOBELL moved for a Select Committee to inquire into the circumstances under which the £20,000 compensation voted to the patentees of the screw-propeller had been distributed to the several recipients. The hon. member related at much length the history of the invention in question, and of the various claims to which it had given rise, contending that the poor title of Captain Carpenter, who, it seems, obtained none of the honours

Sir J. BARING gave a different version of some of the transactions alluded to, exonerating the Board of Admiralty of which he had been a member—from the charge of negligence or favouritism in the allotment of the compensation fund.

Mr. HEATING and Admiral WALCOTT supported the motion.

Sir F. TRESIGER, in opposing it, stated reasons for believing that Captain Carpenter could claim no share in the original contrivance of the screw-propeller, which he contended should be assigned to previous inventors, and especially to Mr. Francis Petit Smith.

After some remarks from Sir G. Pechell, Mr. J. G. Phillimore, Sir C. Wood, and other members, the House divided.—For the motion, 49; against, 69: majority, 20.

FORMATION OF PARISHES.

The Marquis of BLANDFORD moved for leave to bring in a bill to make better provision for the formation and endowment of separate and distinct parishes in certain districts. The measure, he explained, would enlarge the powers of the Church Commissioners, so as to enable them to subdivide parishes in certain cases where the population had increased, and new churches were built, and to give to existing districts a distinct parochial character.

Lord PALMERSTON gave his assent to the introduction of the measure, and, after a few words from Mr. HADFIELD, the motion was agreed to, and leave given to bring in the bill.

Mr. ATHERTON obtained leave to bring in a bill for amending the laws relating to mortmain; and

Mr. COLLIER for a bill amending the law relating to the qualification of justices of the peace; and

Sir G. GREY for a bill to amend the law for the inspection of coalmines.

The Spirit Duties (Excise) Bill was read a third time and passed

The Alteration in Pleadings Bill was read a second time

The Sewers (House Drainage) Bill was read a third time and passed.

HOUSE OF COMMONS.—WEDNESDAY.

CHURCH-RATES ABOLITION BILL.

On the motion for the second reading of this bill,

Sir W. CLAY commented on the absence of all the members of the Government; and then proceeded to explain the provisions of the bill. The populus cry was "Are you going to deprive the Church of its stability?—It is the poor man's Church." By the bill a new body was now brought forward, for the first time would the poor man have the benefit of the Church. By the bill he had provided that one-third of the area of churches should be allotted to free seats, and no rents, or rents equivalent to, to supply the place of church-rates: that scarcely could be objected to; for, when it was said that the present Church was the poor man's Church, the whole of a sixpenny pay there. The auditors provided by the bill were to be selected from the poor. The auditors provided by the bill were to be selected from parishioners; and reservation was made that churchwardens should be liable to account for sums of money that they had during the last twenty years, and the expenses of which were, to a vast extent, borne by the public, was evidence in favour of the arguments that he had advanced in favour of the bill, and he strongly urged the adoption of the voluntary system being brought in aid of pew rents. After some further observations the hon. Baronet moved that the bill be read a second time.

Mr. PAGE contended that there was not sufficient evidence that the public feeling was in favour of the bill, as he found on examination that the number of signatures was not one-fourth of the number of those who signed petitions against the bill of last session. He moved that the bill be read a second time that day six months.

Mr. L. DAVIES said, the Government ought to come forward and tell the public feeling on this subject, and he told the noble Lord at the head of the Government that he ought to state the views of the Government on the subject. The question was not one of religion, but one affecting the property of the land. He should therefore second the amendment

Mr. COWPER did not think it would be desirable to accept the present bill; although he might not be indisposed that some remedy should be applied to alter the present system, he could not approve of the present bill, and therefore he was compelled to support the amendment.

Mr. LIDDELL opposed the bill. It was most objectionable in principle, and unjust both to the Church and the poor, who would be precluded from any free places in houses of worship

Mr. LABOUCHERE supported the second reading. If the bill went into Committee, much of its machinery might be altered, and on that ground he supported the bill.

Lord PALMERSTON did not think that the bill of the hon. member would be calculated to meet with the approbation of both branches of the Legislature. He could not put those places of worship that existed for centuries in the country as church-rates could more recently spring up. The bill did not contain sufficient provisions for supporting the maintenance of the fabrics of the Church. These churches were the national institutions, and could not be for the advancement of religion that they should be suffered to decay. Many hon. members had said it was the duty of Government to find out the means which would solve the difficulty. (Loud cries of "Hear, hear.") It was all very well and very easy for hon. members to say so; Government had dealt with the question before without any success. He was not, on the part of the Government, disposed to bring in any bill in the session (Hear, hear), nor could he at present see any means of the settlement of the question. Personally he felt bound to resist its further progress, and vote against the bill.

Lord SEYMOUR regretted the speech of Lord Palmerston, which was in direct contradiction of the assertion of Lord John Russell last session, that it was the intention of the Government to settle the question this session

The House divided, when the numbers were—For the second reading, 217; for the amendment, 159: majority, 58.

The bill was consequently read a second time. The announcement was received with loud and continued cheering

CARLISLE CANONRIES BILL.

Mr. FERGUSSON moved the second reading of this bill, which was to suspend a canonry and to divide the proceeds amongst the four incumbents of the parishes of Carlisle, which were very insufficiently provided for.

Mr. COWPER moved that the bill be read a second time that day six months.

After a short discussion the House divided, when the numbers were:—For the second reading, 169; against, 98: majority, 71. The announcement was loudly cheered. The bill was then read a second time.

POLISH AND HUNGARIAN VOLUNTEERS.—The *Siècle* says, several chiefs of the Polish and Hungarian insurrections of 1830 and 1848 have, within the last few days, left England and France to embark for Constantinople Many of them went to that capital at the beginning of the war, and the Ottoman Government accepted their services, but, afterwards, owing to the intervention of foreign diplomacy, declined them. They hope that at present their services into the service of the Porte will not encounter any difficulty, or at all events calculate on being employed in the Anglo-Turkish Legion now being raised by the British Government. A number of the prisoners taken from the Russians at Remarsund arrived last week at Montpellier, under the command of an officer of the 6th Regiment of the Line, who is to accompany them to Marseilles. These men have been enrolled for the Polish Legion in the service of Turkey, almost every one of them being Poles.

FALL OF THE ATLAS IRON-WORKS.

THE premises of the Atlas Iron-works Company are situate immediately facing the racket-ground of the Queen's Bench Prison, in the Borough-road, and stretch as far as the back of the houses in Newington-causeway. The place was originally built for carpenters' workshops, and was four stories high, being built of timber, covered with heavy sheets of slate, the supports of the roof being long iron horizontal girders, braced together. The uprights, it appeared, were too weak for the weight of the metal required in such premises as are used in the engineering trade, although sufficiently strong for the purposes they were originally intended. The building which has fallen was about 90 ft. long and nearly 70 ft. high; the lower floor being used as the casting-houses. The drying-shops were on the next floor, over which were the carpenters' shops; and on the floor above were deposited all kinds of iron work—the whole being of great weight.

Shortly after two o'clock on Monday afternoon the various workmen, numbering upwards of 100, had returned from dinner, and had taken their respective places at their lathes, drums, and benches, when of a sudden some persons, who were in the top part, had their attention directed to one of the sides rocking to and fro. They raised an immediate alarm, and at once made an attempt to gain the street. Others in the lower floor, also seeing the building move, made an attempt to leave, and fortunately several were successful; but before the whole number could get out, the roof fell in, and in an instant afterwards the top floor fell, and the lower floors, being pressed by the additional weight thrown upon them, fell down to the ground. As soon as the dust had in some measure cleared away, the exact amount of the injury done and the cause became apparent; and the cries which proceeded from the ruins proved that several persons were embedded. Messengers were dispatched to the Stones-end Police Station for the aid of a strong master of police, and Inspectors Moore and M'Intosh, with nearly 100 officers, repaired to the scene, and found men almost in a state of frenzy, rushing about, and begging the officers to allow them to assist in rescuing the less fortunate workmen who were under the ruins. The request was, of course, readily granted, and the police assisted the men in digging the poor fellows out. The neighbours also showed every willingness in assisting in getting the rubbish away, and, after some time, two men were got out by Mr. Day, of the Fox-and-Knot Tavern, Cross-street, Blackfriars-road, who removed them in a cab, and they were driven off to St. Thomas's Hospital. The state of the premises having been made known to the authorities of the hospital, and the great number of persons who were buried alive in the ruins, several medical gentlemen connected with the institution proceeded to the scene, in order to render immediate assistance as the men were got out.

Several persons were, by dint of great exertion, removed from the rubbish; and they were found to be very badly cut and injured by the fall of timber and iron work; two were taken to the surgery of Mr. Odling, in High-street, Borough, and Mr. Charles Smith, his assistant, dressed up their wounds. One man had received a contused wound at the back of the head, and the other had his leg severely cut. Tackling having been obtained, and the assistance of some 200 men, the stones, after about two hours, were raised, and a man liberated. He was taken to St. Thomas's Hospital, but he is in a very dangerous condition. Another man, named Joseph Giles, was also extricated, after much time and trouble, with his skull fearfully fractured. A man named James Holden was next brought from the ruins, and was taken by the police to St. Thomas's Hospital. Charles Pryer was likewise got out, with his leg fractured by a millstone falling on it, and he was also removed to the same institution. Another man, whose name could not be ascertained, owing to his being perfectly insensible, was removed to the hospital, but not the less hopes can be entertained of his recovery. A man named John Regan was extricated from the broken timber and forthwith removed to Guy's Hospital. The total number of sufferers taken to St. Thomas's Hospital was seventeen; twelve of whom had their wounds dressed and were able to be removed home, but the other five remain in a very dangerous state

The cause of the accident is said to have been the giving way of a temporary wooden block, which had been substituted for an iron pillar while some alterations were being carried out.

SHIPWRECK OF THE EMIGRANT BARQUE "JOHN."

THE melancholy case of shipwreck took place on the night of the 3rd inst., on the Manacles, off the coast of Cornwall. The unfortunate barque left Plymouth Sound on the afternoon of that day, bound for Quebec, having on board 149 adult passengers, 38 children, and 16 infants, together with a crew, in all, of 18; making the total number of souls on board 220. The passengers were principally from the north of Devon, the great source of emigration in the west of England. Sailed at four p.m., on the top of the ebb tide, with a favourable wind off the land; and all bade fair for a rapid and prosperous voyage down Channel. About half-past nine they made the Falmouth light, the captain himself pointing it out to one of the passengers on deck. Just at this time the second mate was trying to sight the Lizard light, and he asked some of the passengers if they could not see the reflection of the light in the sky? They replied they could not; when the captain said, he could not either, but they would see it fast enough when they got there. It was the second mate's watch, and the captain shortly after went below. About ten o'clock the mate came on the poop and asked the passengers if they had seen the captain, and on being asked what he wanted the captain for, he said he (the mate) thought they were a deal too nigh land. Shortly after this the captain came on deck, and what the mate had stated, "that they were getting too close on land," was reported to him. The captain pooh-poohed the report. Soon afterwards some one forward sung out "rocks," and almost immediately the vessel struck with violence, so much so that she bumped over the rock, and then struck with still greater force upon rocks further in. The captain was then distinctly heard to call out, "Run her aground." The vessel then had all sail on her with great way, as she was when the accident happened going eight or nine knots, and though run aground the sea washed her off again, and she ran down the coast for some distance. An attempt was then made to bring her up by letting go her anchor, when she grounded heavily broadside on. Attention was then directed to the boats, of which she had four on board (three on deck and one over the side); the captain, four seamen, and one passenger, jumped into the latter boat and called out to lower; but finding no one answer the call, the captain returned to the deck of the vessel, when the boat was lowered. On her touching the water it was found there was no plug in her, and she was without thowle pins. While they were trying to supply these deficiencies, her stern became submerged, and the boat drifted off from the vessel without the captain. The men put their knives in for thowle pins, and the passenger his German pipe for a like purpose, and they pulled out to sea to get round a point of rocks over further in. The breakers were rolling heavily. When they had weathered this point they pulled for the land, on nearing which they saw a light. Not being able to find a landing-place they called aloud for help, when they were heard by the son of Lieut. Hearn, of the Coast-guard, who pointed out a place of landing. Immediately the alarm was spread that a vessel had struck on the Manacles. An attempt was then made to pull out some of the Coast-guard boats without success, from the dangerous character of the coast. The passenger who had got on shore was taken by the Coast-guard people in their attempt to put out to assist the vessel, in order to direct them where she lay, those of the ship's crew who got ashore positively refusing to lend even this assistance. Unfortunately the boats could not reach the vessel, and were compelled to return to the shore. They postponed all further efforts till the following morning, when, going further up the coast to a more favourable place of embarkation, they reached the vessel, which was then not above 200 yards from the shore. During the whole of this time—the crew being for the most part intoxicated—not a single effort was made to save the passengers by either captain or crew. Some of the passengers attempted of themselves to get the cutter out; in so doing they stove her bottom, and lost the boat. The tide at the time the vessel struck was about two-thirds ebb, and she sunk she filled with water; but the decks were dry, and if assistance had been rendered at this time all might have been safely landed. The master would not allow the two largest boats to be hoisted out, telling the passengers to be quiet, that they were perfectly safe, as the tide would not flow before daylight, when boats from the shore would come off and take them from the wreck, evincing hereby his perfect ignorance of the tides, a most important matter to attend to; instead of which the tide commenced flowing at one, and before two the sea broke heavily over the vessel, dashing the boats to pieces, each wave carrying its victims into eternity amidst the most terrific shrieks of the rest, expecting every moment to meet the same doom. One hundred and ninety six men, women, and children, were swallowed up, and about eighty saved. The crew, with the exception of the steward, evinced the greatest apathy throughout this dreadful scene, and did not render the slightest assistance to the passengers. When the shore boats arrived, about half-past three

WRECK OF THE EMIGRANT SHIP "JOHN."

or four o'clock, they were the first to try to get into them, with their bags, showing a greater anxiety to secure these than to save the lives of the emigrants. Not a seaman perished.

An inquest was held on the bodies which have come to land, and the jury, in recording their verdict, observed that they considered the conduct of the whole crew, with the exception of a seaman named Elder, most blameable, and expressed their surprise that the ship was not supplied with a signal gun nor blue lights, and recommended that a light should be placed on the Manacles. Against the captain (Rawle) they returned a verdict of manslaughter, and the coroner's warrant was at once issued for his apprehension, on which he has been lodged in the Cornwall county gaol at Bodmin.

THE FOREIGN LEGION, MELVILLE ISLAND, HALIFAX.

We have been favoured with the accompanying Sketch, by Lieut. Bland, 76th Regiment, illustrative of the activity shown in Nova Scotia, in providing auxiliaries for the vigorous prosecution of the war. Of the formation of the Legion for this purpose we have received the following details:—

A few weeks back, one of the members of the Colonial Government was dispatched to the United States, the object of his going being kept secret; but the arrival of the brig *America*, on the 30th of March, with seventy-six emigrants on board, cleared up the mystery. On the morning of that day the Governor, Sir Gaspard le Marchant, went down to the Queen's Wharf, where he was met by the military staff. A Captain Schobel, who came in charge of the emigrants, reported himself and introduced two other officers and a doctor. Seventy-one of them were paraded, and expressed a wish to enter her Majesty's service, the other five sought employment on the railroad or elsewhere. They were then taken up to the Military Hospital and inspected, when, with one or two exceptions, they all passed, and were declared, by the principal medical officer and his staff, to be a very creditable lot of recruits, equal to the average of those raised in England. After the medical inspection they were marched out to Melville Island, where accommodation for 500 men had been provided (at about three days' notice), under the direction of Colonel Stotherd, R.E., and his staff, Captain Barry and Lieut. Walker, R.E. The building in which they are located is a large wooden edifice, formerly employed for the accommodation of French prisoners, and would, on an emergency, hold from 1300 to 1500 men, by means of hammocks suspended one above the other. Although but a short notice had been given, the men were comfortably housed the first night — a cook-house, canteen, engine house, &c., having been previously erected. As large numbers were, and are still expected, our informant states the following officers of her Majesty's 76th Regiment were doing duty with them:—Brevet-Lieut. Col. Lloyd, Capt. Thomas Tydd, Lieut. J. W. Preston, and Lieut. J. F. Bland. The men were progressing favourably with their drill, many of them having served before in the Hungarian and Prussian services.

The situation of Melville Island is remarkably picturesque; and in the summer it is a great resort of the ladies of Halifax, for pic-nics, and lobster-spearing. This latter amusement is carried on by torch-light, at which let no too susceptible young man attend. It appears by the American papers that the Yankees do not approve of the emigrants coming here.

BARRACKS OF THE FOREIGN LEGION, MELVILLE ISLAND, HALIFAX.

FIELD-MARSHAL'S BATON FOR LORD RAGLAN.

FIELD-MARSHAL'S BATON, FOR PRESENTATION TO LORD RAGLAN BY HER MAJESTY.

We have been favoured with an inspection of the Field-Marshal's Baton, intended for presentation by her Majesty to Lord Raglan. The Staff, or Baton, is covered with crimson velvet, powdered with gold lions. The Staff is surmounted by a group of St. George and the Dragon, in solid gold, of exquisite workmanship. The lower end of the Staff bears on a richly-chased gold mounting the following inscription:—

"From Her Majesty Alexandrina Victoria, Queen of the United Kingdom of Great Britain and Ireland, to Field-Marshal the Lord Raglan, G.C.B. 1855."

The upper and lower mouldings are richly chased with the rose, shamrock, and thistle. The whole has been beautifully executed by Messrs. Turner, of New Bond street.

THE SOURCE OF FRENCH BRAVERY.—A young Zouave, who had entered the army as a volunteer, excited the greatest astonishment and admiration amongst the English and French officers by his gymnastic powers. He attempted the most extraordinary feats, and always succeeded. An English captain asked him one day why, gifted as he was with such marvellous agility, he had entered the army voluntarily, when in a circus he could earn ten times, twenty-times as much as in the army. The Zouave coloured to the very temples, and in a tone of wounded pride replied, "Because I hope to die a French general, and not a riding-master. The French soldier looks to something besides money." Then, plunging his hands into his side-pockets, he turned round and took his departure, but from that day nothing in the world would tempt him to give any specimen of his wonderful powers before an English officer."—*French paper.*

EMBARKATION OF THE SARDINIAN CONTINGENT FOR THE CRIMEA.

THE accompanying Illustration (from a sketch by Chev. Bossoli) represents the embarkation of the Sardinian Contingent from the port of Genoa for the East, and has been obligingly communicated by P. F. Campbell Johnston, who has just returned to England from the Sardinian States, where he has been spending a few weeks examining the state and prospects of that interesting country. The Constitution granted by the late King is being carried out with great success; and, under the able administration of Count Cavour, the welfare of the people and the resources of the country are being gradually developed.

The whole of the Sardinian Contingent (numbering upwards of 15,000 soldiers) will shortly be on their way to the East; and, before the end of the month, will, in all probability, be actively engaged assisting the English and French in their operations in the Crimea, under their able and distinguished leader, General La Marmora, who married an English lady (Miss Bertie Matthew), and whose recent visit to England excited so much interest.

M. DROUYN DE LHUYS.

M. DROUYN DE LHUYS, the late able Minister for Foreign Affairs in France—who has resigned, or been requested to resign, office, on account, it is supposed, of his too great love for peace a *tout prix*—was born in the year 1802, at Melun, in the department of Seine et Marne. Although the scion of a rich and noble house, he did not, like so many others in his position, consider himself exempt from the sacred obligation of labour, but put himself in training to become useful to his country and to mankind. He was educated at the College of Louis-le-Grand, and distinguished himself by his quickness and his industry, particularly in reference to rhetoric, for which he gained the prize of honour.

The instruction he had received, combined with the position occupied by his family, put many opportunities in his way which many young men do not enjoy. His early penchant for rhetoric manifested itself more decidedly in an enthusiastic love of politics and diplomacy; and he was appointed Secretary to the Embassy under the Government of July. He did more than *play* the public man—he devoted himself heart and soul to his vocation. He bestowed very little of his time to gaiety—much of it to business. He studied the relations of his native country with the rest of the world; penetrated the secrets of the European Cabinets; and finally, by a laborious apprenticeship, made himself a consummate master of his art.

In 1841 the abdication of M. Jules Desaugiers left vacant the directorship of the commercial transactions of the Ministry for Foreign Affairs, which was forthwith confided to M. Drouyn de Lhuys. In the following year M. le Duc de Praslin passed from the Chamber of Deputies to the House of Peers; and the electors of the department of the Seine et Marne were convoked to choose a successor. The new Director of Commercial Affairs presented himself as a candidate, and was immediately elected.

M. Drouyn de Lhuys never sold himself to party, but acted entirely from his own convictions and his own sense of right: and never hesitated publicly to disavow any proceeding which he deemed contrary to the interests and dignity of his country. Up to the revolution of February he sat in the Centre Gauche, amongst the opponents of the unpopular Cabinet which carried with it in its fall the dynasty of Orleans.

M. DROUYN DE LHUYS.—FROM A PHOTOGRAPH BY MILLER, OF VIENNA.

After the proclamation of the Republic, upwards of 41,000 voices called M. Drouyn de Lhuys to the Constituent Assembly, in company with M Gilbert and three descendants of Lafayette. He subsequently became one of the Committee of Foreign Affairs, and in the sitting of May 24th, 1848, he, in the name of the Convention, presented a paper, of which the following was the burden:—"The National Assembly invites the Executive Commission to continue to take for its motto the unanimous wishes of the Assembly, thus worded:—*Fraternal Compact with Germany; the re-establishment of the Independence of Poland; and the Enfranchisement of Italy.*"

On the election of Louis Napoleon to the Presidency, in 1848, M. Drouyn de Lhuys received the portfolio of the Foreign-office under M. Odilon Barrot, and found that he had to grapple with two formidable questions. "There are," said he, "two duties to fulfil—two interests to maintain; on the one side the liberty of a particular nation, and on the other the peace of the world. * * * * * It was necessary to conciliate matters. The case under consideration was essentially a policy of conciliation between contending interests. The thing to be done was to sacrifice something on each side, so to give as much satisfaction as possible to both parties."

We will not dwell upon the expedition to Rome. M. Drouyn de Lhuys, who directed the secret instructions of General Oudinot, acted in this question entirely in conformity with the personal policy of the President of the Republic. He believed it to be the duty of France to re-establish Pius IX. on his temporal throne, in order to prevent the interference of the Neapolitans and Austrians. This policy, although condemned by the Constituant, was highly approved by the Legislative Assembly. A Ministerial modification took place in June, 1849. M. Dufaure was elected President of the Council, and M. Drouyn de Lhuys was replaced in the Ministry of Foreign Affairs by M. de Tocqueville. Re-elected to the Legislative Assembly by nearly forty thousand votes, he resumed his business as Representative, but was a

EMBARKATION OF THE SARDINIAN CONTINGENT AT GENOA.

short time afterwards sent to London as Ambassador Extraordinary. After the taking of Rome, France confined her intervention to occupying the States of the Church; and M. Drouyn de Lhuys, in his character of Ambassador, was at length enabled to enjoy a little repose. In the following year, however (1850), affairs in Greece again called him into action. The French Cabinet demanded explanations from Lord Palmerston; numerous interviews took place between the Ambassadors, which ended in Lord Palmerston's accepting the good offices of France.

An unfortunate misunderstanding having arisen, M. Drouyn de Lhuys was recalled. Explanations were soon after made, however; and, on the 20th of June, Lord Palmerston formally accepted the convention signed by M. Drouyn de Lhuys. The French Ambassador saw with joy the most sincere and complete accord established between the two countries—due in great measure to his own efforts.

In France the political crisis grew more and more threatening. The Legislative Assembly commenced hostilities against Louis Napoleon, which ended in the famous *coup d'état* of the 2nd December. On the 9th January, 1851, the President was again elected, and the same day were published the decrees of the 29th December, 1848, and the 11th June, 1849, which reunited under one commander the National Guards of the Seine and the troops of the first division. The Assembly favoured General Changarnier, and counted on his aid in case of a rupture. His unexpected withdrawal threw them into the greatest disorder. They publicly declared they had no longer any confidence in the Ministry of the 9th of January, and M. Drouyn de Lhuys sent in his resignation

But Louis Napoleon had not the intention of depriving himself of the services of so useful a Minister. After the *coup d'état*, which put into his hands the sovereign power, he named him Vice-President of the Senate, and a few months afterwards Minister of Foreign Affairs, in the place of M. Turgot

We need not recall to the recollection of the reader the numerous despatches sent by M. Drouyn de Lhuys to his diplomatic agents from the commencement of the dispute between Russia and Turkey to the present time. Such a relation would comprise a complete history of the Eastern question. However much he may have deserved his recent dismissal from office, it would not only be ungenerous but unjust to deny him merits as a diplomatist.

THE THEATRES, &c.

PRINCESS'

If the often-mooted question whether Shakspeare's plays should be subjected to all the means and appliances for their illustration that modern art can furnish has not hitherto been settled by that supreme and ultimate court of appeal in dramatic law, the playgoing public, we fancy the production of "Henry VIII.," at the Princess' Theatre, will put the question to rest for ever. The sternest believer in the æsthetic simplicity of the "wretched pair of flats" that formed the scenic decoration of the period before Garrick and Kemble, will be constrained to admit that Mr. Kean, in his selection of "Henry VIII." for one of his series of grand historical illustrations, has done nothing unworthy his own fame as a manager, or derogatory to the poetic genius of the poet whom he illustrates. Besides, too, that the period of the action is one especially suited to the display of magnificent decorations, we have the evidence of Coleridge in favour of this being treated as a *show* play; and it is clear from the lengthened and detailed stage directions, the accounts of ceremonies and processions that form part of the original text of "Henry VIII.," and the selection of pompous incidents in its construction, that it was intended as such by Shakspeare himself.

The wars which had so long agitated our fair isle which had extinguished half our noble families and decimated our bold yeomanry—had ceased. The times in which pomps and ceremonies must have been of rare occurrence, and snatched in moments of cessation from rude conflicts, were past and gone. A season of repose had succeeded, and this period was, moreover, marked with social changes, particularly favourable to the growth of luxury, to the encouragement of habits of personal expense, and to the cultivation of the people to a point at which they began, in the certainty of peaceful times, to take a greater interest than ever in the "forms and shows of things."

In selecting "Henry VIII.," we are informed by Mr. Kean, in the prefatory remarks appended to his play-bill, that he has had in view the effect of contrast with the varied character of the subjects he has previously chosen for illustration; and, with the object of rendering theatric effect subservient to strict historic correctness, he has confirmed his own well-trained judgment in such matters by seeking the assistance of gentle men each in their several departments excellent authorities: and there is not, we should think, the slightest room for the fall of the curtain, a single scene, dress, or decoration, for which historical authority could not be given. The play itself is excellently adapted for such a purpose, and, as we have said above, was intended for effect, and with this view Shakspeare seems to have crowded into it incidents completely suited to represent pomp and circumstance to the public eye. The curtain rises upon a view of Old Palace-yard: in this scene Wolsey enters, attended by that ceremony and state so familiar in description; and at the conclusion of Act 1, in the banquet at York house, we have the more than Royal splendour in which the proud Cardinal lived placed before us, with the introduction of an incident calling forth that splendour of the masque of which our ancestors were so fond. In the second act, in the passage of Buckingham to execution, we have a show of more solemn and awful terror of the glittering axe the dignity of the victim, the expression of popular interest in suffering. In the trial Scene a different but grand and dignified ceremonial is placed before us in all its form, shape, and appliances. We have, moreover, in the procession to Anne Boleyn's coronation, and in the incident which concludes the play of the christening the infant Elizabeth, other ceremonies, completing a series of situations, evidently intended to be placed before the spectator's eye with all the means of decoration at the manager's command, however limited these may have been at Blackfriars or the Globe. Nay, so well adapted are these for scenic illustration, that it would almost seem that Shakspeare had foreseen the resources that would be found in Oxford-street in the nineteenth century, although the wildest dreams of the dramatist cannot have anticipated the union of scene-painting, machinery, aërial suspension, and bode-light, that are combined in the vision of *Queen Katherine*; perhaps the most beautiful effect ever introduced upon the stage—an effect so beautiful and dream-like, that it kept the audience entranced and hushed, repressing the customary tokens of applause till the lovely group of floating figures had vanished from their eyes.

Following the indications of the poet, the management of the Princess' Theatre has based upon "Henry VIII." a series of gorgeous illustrations of the architecture, furniture, manners, dress, and customs of the sixteenth century—illustrations more perfect and more correct than have hitherto been presented upon the stage, alike acceptable from their splendour to the uncultivated eye of the humble spectator, and, from their beauty and correctness, to the artist, antiquary, and historical student.

We have scarcely left ourselves space to criticise the acting of the play, although one circumstance of the performance can certainly not be passed over—we mean the return to the stage, after a long and serious illness, of Mrs. C. Kean. The reception afforded by the audience to this the first of our living actresses, was not an unworthy expression of the estimation in which she is held. The loud, hearty, and continued plaudits which greeted her entrance seemed as much the expression of respect to an accomplished lady as of admiration for a popular actress, and were so marked that Mrs. Kean was completely overcome with her feelings, and could with difficulty go on with the business of the scene. The character of *Queen Katherine* is the one in the play upon which Shakspeare seems to have expended most care: the gentleness, dignity, and womanliness that mark it were admirably represented by Mrs. Kean, who has seldom appeared to greater advantage than in the trial where the dignity of her appeal to the *King*, contrasted with the outbreak of temper with which, irritated by contradiction, she hastily leaves the Court—and in the dying scene where the patience, continuing to the end, and the still queen-like manner, gradually giving place to physical weakness, exhibited not by violent contortion of face or gasping spasms, but by the wandering eye and hesitating speech, seemed the very poetry of suffering.

The *Wolsey* of Mr. Kean must be ranked amongst the most beautiful and successful of his Shakspearian assumptions. Departing from the cold conventional dignity which has hitherto been taken, we think wrongly, to be the key-note of the character, the idea of the *Priest* seems to be the primary one upon which he has based his conception. The manner of a man habitually self restrained runs through his performance; and, although in the look which he gives *Buckingham* in the first scene you may detect the strong lurking passion beneath the surface, it is only when goaded by the Lords and in the last scene with *Cromwell* when he feels his public career to be finished, that he gives way to the expression of natural feelings: all else is calm, courtly, priestly, and restrained. Mr. Kean's delivery of the familiar speeches was perfect in its elocution and touching in its solemnity. Mr. Walter Lacy, in figure and face, looked the bluff *King Hal* to perfection; and as he sat upon the throne seemed a living Holbein.

We must not omit to record that the scene between the *Queen* and the two *Cardinals* has now been restored to the play;—containing, as it does, some of the most familiar and popular quotations from Shakspeare, and affording an opportunity of preventing one of the most beautiful *tableaux* in the play an interior of the period, with all its furniture and decoration, and an artistically-arranged group of *Katherine* surrounded by her ladies. Nor must we forget Mr. Grieve's Panorama of Old London, from Blackfriars to Greenwich, with its fine old ships, bright water, and gay barges, and view of the so often-mentioned old Palace at Greenwich, the scene of so much that is interesting in English history

The success of this revival of "Henry VIII." was great, but not beyond its merits. The crowded audience must have felt that everything that care, good taste, lavish expenditure, and careful research could do for the production of this celebrated and favourite play had been done—that a grand historical drama of a brilliant period had been placed before them in the most complete form; and they were not slow or niggardly in testifying their approbation.

DRURY-LANE.—The amateur pantomime of "Guy Fawkes" was reproduced here on Friday week. It was preceded by Mr. Planché's "Romantic Idea;" and both were acted with indisputable success to a large and highly fashionable audience. Her Majesty and the Royal Family were present. The receipts were applied in aid of the funds of the Wellington College.

OLYMPIC.—Mr. Wigan has been exceedingly fortunate during his management of this theatre in his new pieces. On Monday an original drama in three acts, by Mr. Tom Taylor, was produced with perfect success. Its title is, "Still Waters Run Deep;" and the moral is exemplified in the character of a north country hero, *John Mildmay* (Mr. Wigan), whose usual quiet demeanour misleads his wife and household into the belief that he is "a spoon," but who proves himself in the upshot to be a man of great practical talent. He defeats a swindler, who had plotted the ruin of his domestic peace, with the utmost coolness and courage, and saves the reputation of his wife's strong-minded aunt, who had previously ruled the family. Brought face to face with the former, whom he has to identify, as a forger, he compels him to light a cigar with the one that he himself is smoking, while he notes his features, and convicts him of being the guilty party. With the same *sangfroid* and dexterity, he tempts him on to demand a duel, and inflict the horsewhip, whereby the criminal is entrapped into the custody of an officer. The dialogue is equal to the situations—both are thoroughly powerful; and the piece ought to be accepted. on the whole, as exhibiting masterly skill equally in the construction and composition. Mr. Wigan, as the hero, was admirable, and was effectively antagonised by Mr. G. Vining, as *Captain Hawkshaw*, so that the various collisions between them were most effective in detail

MR. W. S. WOODIN'S OLIO OF ODDITIES. This entertainment commenced on Saturday last, in the Polygraphic Hall, King William-street, Charing-cross, which has been elegantly fitted up for the purpose. The libretto, so to speak, does great credit to Mr. E. L. Blanchard, who has excelled his former attempt in many important particulars. In rapidity and brilliancy, as well as in the number of characters, this entertainment is almost unique. The whole, too, is so artistically disposed—every point is so well introduced, and all the parts follow in such exact order, that Mr. Woodin requires so much respect from the public in which he works—the materials themselves require of illustration from his various talents. The action of the entertainment consists of a visit to the Lakes, and the *dramatis personæ* are composed of such individuals as the tourist would be likely to meet with on such an excursion, diversified and accompanied with a diorama of the scenery, which has been beautifully painted. Eighteen scenes are thus very effectively exhibited; among which are Kendal, Windermere, Rydal Fall, the Slate Quarry, Eskdale in a storm, Keswick, Ullswater, Borrowdale, and Carlisle. The impersonations have been in general well adapted to Mr. Woodin's light and graceful style, which much resembles that of Mr. C. Mathews, and is, in some cases, quite equal to its prototype. Mr. Woodin is a dashing member of the "fast" school; and, in the patter and clatter class of song, is excellent. His best specimen of this sort of thing occurred in "A Chapter of Crisies," which commenced with a capital portrait of Dr. Johnson as a contrast to more modern professors of the "art deteriorative," and concluded with a Murillo sketch of a boy in the gallery of a theatre, enthusiastically animated and responded to the life. *Sir Harry Hinton*, *Mr Theophilus Tramroad*, and *Squire Clutterbuck* are the full-length portraits in the first part, but the little bit of *Giles Joskyn* chaffing the Londoner, may be regarded as most effective. There are, also, a grand "Improvisation" of *Lady Esther Evergreen*, with a song; and what is called a "daguerreotype" of *Mr. Gustavus Gobbleton*, with a technical memory referable to the cuisine, that have proofs of vitality. In the second part, our memory dwells on *Mr. Cymon Sensitive*, and the gorgeous appearance of *Addie Thorne*—the make-up of the latter being astonishing. The concluding character is that of *Clinton*, in proper costume, imitating the Senora Perea Nana; with which piece of exaggeration Mr. Woodin brought down his curtain to the unanimous applause of a crowded house.

MUSIC.

THE Concert of the PHILHARMONIC SOCIETY, on Monday last (the fifth of the season) was very fully attended. It was of remarkable excellence, both in the instrumental and vocal departments. The two symphonies were chefs-d'œuvre of their respective authors: one was Mozart's in E flat; the other Beethoven's Pastorale. Chopin's beautiful pianoforte concerto in E minor—a piece which has seldom been heard in this country—was played by M. Charles Halle with the utmost perfection of style, expression, and execution. The overture to Wagner's much-talked-of opera, "Tannhäuser," was performed under the direction of the composer, the conductor of the Philharmonic Concerts. It was most carefully executed, and listened to with much curiosity and interest. Opinions were much divided with respect to its merits. Some deemed it, though wild and eccentric, a work of originality and genius, while others condemned it *in toto*. For ourselves, we did not, nor do we now, feel disposed to speak dogmatically. Very few acquainted with music is aware of the uncertainty of hasty opinions, and their liability to be changed by better acquaintance with the subject. We found in this composition some beautiful and striking effects, mingled with (as it seemed to us) much obscurity and confusion; but how far this obscurity may be dissipated by further hearing we do not at present pretend to know. The vocal performers were Mdlle. Jenny Ney and Signor Belletti, who sang with their usual excellence and success

Madame Anna Thillon, who is about to take a final leave of the stage, has begun a series of farewell performances at the Lyceum, of which theatre Mr. Alfred T. Lee is the lessee. The retirement of this captivating performer will be no small loss to our musical stage. She has not been driven to this step by the decay of her powers, or the loss of her attractive qualities. But still she is acting wisely: it is better for performers to withdraw, leaving regret behind them, than to linger on the stage till they become objects of neglect. Madame Thillon gave the first of these farewell performances on Wednesday evening, when she appeared in her favourite part of *Catarina*, in Auber's most popular comic opera, the "Crown Diamonds," which (mainly through the charms of her acting and singing) has long been familiar to the English public. Her performance was as delightful as ever. Her neat and trim figure, comely features, and fresh and flexible voice, showed how lightly the hand of time is laid on her; and she sang with all the brilliancy, and acted with the arch and playful grace for which she has ever been distinguished. Her success was triumphant; and all the more complete from being achieved entirely from her own efforts: for we must say that she was very poorly supported, and that Mr. Allcroft ought to have made some efforts to muster a more efficient company.

NOTES OF THE WEEK.

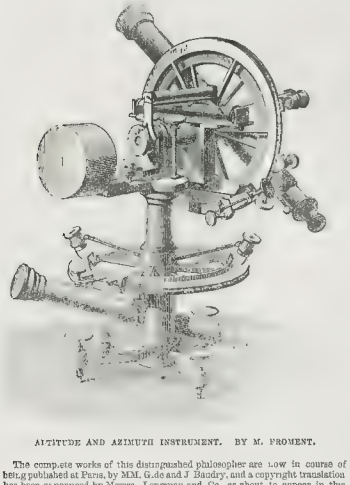
If newspapers were printed by magic, if the composing-stick were a fairy wand, or half-a-dozen cabalistic words sufficed to transform white paper into letter-press and engravings, it might be possible to give in a weekly paper the criticism of all that has happened during the week. But as the public *will* buy the ILLUSTRATED LONDON NEWS and as the paper itself is, woodcuts and all, not exactly a flying sheet, the turning it out in a marketable form must take no inconsiderable time, so that the best-disposed journalist cannot pretend to write up his criticisms and details to the facts of the Friday night. This is my excuse for having only now to speak of the amateur performance at Drury-lane Theatre on the 11th. I forget what General was complimented, either by his Sovereign, the Speaker of the House of Commons, or somebody who wanted an appointment on his staff, by being told "that he had made past glory doubtful, and future fame impossible." Were I inclined to hyperbolical praise, I would say as much of the amateurs who performed the "Romantic Idea," and *the* Pantomime on Friday night. In the first place, surely never was such an audience collected under the roof of a theatre. The entire pit was turned into stalls—let at first at enormous, and finally at fabulous, prices: fancy £5 being paid for a very narrow chair in the remotest part of Drury-Lane pit! Even more was received (as a favour, too) in several instances. People who usually look for private boxes had to content themselves with the gallery. The Queen, too, occupying with her suite two private boxes in addition to her own, was present from the rising of the curtain till after it fell. That her Majesty was highly gratified was quite visible from her manner, and put beyond doubt by her gracious and graceful expression of approval. For the performers, all I will say is, what they did well at the Olympic, they did better on the larger stage, and that the *luxe* of costume and scenery was such as few people could have expected in a performance got up for a single night. As I have heard it said that such extreme costliness of decoration was hardly justifiable, considering that by just so much the advantage to the charity (the Wellington School) which was to benefit by the surplus would be diminished, I will mention that the managers were treated by every one concerned, from the lessee of the theatre to the furnisher of wigs, with a liberality that almost put an end to the idea of profit. A great deal was done absolutely gratis the fittings of the Queen's box and anterooms, all of the greatest beauty, by Jackson and Graham, for instance; and the hundreds of yards of red cloth for the staircases, lent by the Crystal Palace Company; and finally the flowers, for which the Duke of Devonshire allowed the conservatories at Chiswick to be pillaged *à volonté*. It was certainly a great success, both before and behind the footlights, but such uses of this kind are not to be had for nothing; and the getting up of such a night's entertainment, involving the rearrangement of the whole audience part of the house—the removal of all the pit—the transformation of the whole of the centre of the theatre into a drawing-room, and finally by their merriest friends when disappointed of places (as they necessarily were, seeing that about three times the number of people that the house would hold wanted to come), the new scenery, the dresses, the ballet, the drilling some sixty or seventy amateur *supers*, must have given the managing committee quite enough fatigue to make them not regret that the thing is over

That rarest of all events, a field day in the House of Lords, occurred on Monday night. A discursive series of motions, introduced in an equally discursive speech by Lord Ellenborough was the cause. the result was a considerable strengthening of Ministers, inasmuch as they had by far the best of the debate (partly because their opponents by no means agreed among themselves), and finally won the division by a very large majority. It is hardly my province to speak of politics, except incidentally. My chief object in alluding to this debate, is to give an explanation, which I have not yet seen done, of an allusion of Lord Lansdowne. Lord Ellenborough, not in very good taste, told a story of the Duke of Wellington having some twenty-eight years ago (when on the East Retford case, the Canningites seceded from the Duke's Government) refused to give Lord Palmerston an answer. on the plea that he "did not choose to fire great guns on small birds;" Lord Lansdowne, in reply, said that he could, if he chose, relate an equally amusing speech of the Duke's, about Lord Ellenborough himself, but would not. It would be a pity that any one should be ignorant that Lord Lansdowne alluded to the Duke having said, in his rough, soldierly way of the then Governor-General of India, *apropos* to his grandiloquent language on the subject of the gates of Somnauth, "Hang'd if he isn't a regular Brummagem Napoleon." One circumstance was mentioned by Lord Lansdowne, which, if correct, and he assured the House that he had every reason to believe it was so, gives hope that the drain of the war even on those resources which she is best provided with, must soon begin to tell on Russia. He told the House that the loss of men to that power, since the commencement of hostilities, was stated in official documents to be not less than 240,000! Of course a very small portion of these have fallen in battle; by far the greater number have dropped down, wasted and worn out by fatigue, by hunger, or by disease, as their regiments wound their slow length along the immense plains and morasses of the interior of the empire. They were not the less a serious loss to the Emperor Alexander's military force; and, if we take into consideration the drain of money which must be continually going on—taking it as equal to what France and England are spending on similar objects, it cannot amount to less than seventy millions a year there seems some reason to hope that before long Russia may be compelled by sheer exhaustion to consent to such terms as the Allies may think fit to impose upon her. The real strength of the Western Powers lies in the fact that their command of money is practically unlimited. No doubt taxation presses heavily, yet no one denies that without any thing approaching to ruin we can support it even in an increased ratio for many years to come; while the credit of the two countries is so good that while there is a five-pound note in any strong-box, it will always be lent on the security of their good faith. This is by no means the case with Russia

It is sometimes good to be an ill-used man. A few years ago churchrate martyrdom was quite a popular method of raising the wind; you had only to refuse conscientiously to pay a levy of one-and-tenpence, to go to prison thereupon for a few weeks or months, as the case might be; and when you came out, you found a couple of thousand Consols standing in your name, and an amount of popularity belonging to you which gave you a fair chance, if so inclined, of representing your native town in Parliament. It now appears that it is no bad thing to be ill-used by the Government. It will be in the recollection of most people that Mr. Thomas Kennedy, a Right Honourable Commissioner of Woods and Forests, was, some little time ago, dismissed from his office in a very summary way; and many people certainly thought him an ill used man. It appears by a letter published in the *Daily News* that a magnificent benefactor has made up to him at least the pecuniary loss, by settling upon him an annuity *of twelve hundred a year*. Mr. Kennedy states the fact, but is not permitted to mention the donor's name. The reason for this princely gift is stated in the document conferring it to be the belief that Mr. Kennedy was dismissed from his post "mainly for his inflexible zeal in the discharge of the duties of that office, in promoting the welfare of the country at the sacrifice of influential patronage." Altogether, the transaction is a most remarkable one.

ARAGO THE ASTRONOMER.

IT is an indisputable fact that there is no name so intimately associated with the triumphs of physical science in the present century as that of the late FRANÇOIS ARAGO. The unparalleled reputation of the French savant is due to a combination of various favourable circumstances. While his high intellectual qualities and the importance of his researches on several subjects of physics secured to him a place among the most eminent of his contemporary labourers in the same fields of inquiry, he was no less distinguished by his incessant efforts to familiarise the minds of all classes of society with the brilliant achievements of modern science. He possessed qualifications which, indeed, eminently fitted him for the office of a popular high priest of nature. Endowed with mental powers of essentially a deductive character,—an excellent, eloquent, and enthusiastic,—he enjoyed especial delight in unlocking the precious treasures of science, and exposing their varied and exquisite beauties to the admiring gaze of the world. His career in life was also highly favourable to the development of this peculiar bent of his mind. As Perpetual Secretary of the Academy of Sciences, it was his duty to pronounce *éloges* on eminent men, formerly members of that body. It will be obvious, from a cursory perusal of some of these compositions, that they were eminently adapted to the display of Arago's peculiar excellences of style. While lively and dramatic in narration, and always eloquent in his advocacy of the great interests of science, his expositions of scientific discovery are perfect models of chaste and lucid writing. The course of lectures on astronomy, which he was in the habit of delivering annually at the Observatory at Paris, furnished him with a still more appropriate field for the exercise of his talents as a popular expounder of science. These lectures were always listened to with breathless attention, by a crowded audience. With admirable perspicuity, and in a flow of sustained eloquence, he explained the grand phenomena of the celestial bodies, seizing intuitively on every occasion the most salient points of his subject, and bringing home his conclusions to the minds of even persons unacquainted with the technicalities of science with a force of conviction which it was impossible to resist.



ALTITUDE AND AZIMUTH INSTRUMENT. BY M. FROMENT.

The complete works of this distinguished philosopher are now in course of being published at Paris, by MM. Gide and Baudry, and a copyright translation has been announced by Messrs. Longman and Co., as about to appear in this country simultaneously with the volumes of the original. It is well known that for several years before his death M. Arago had devoted much of his time to a careful revisal of all his writings, with a view to their definitive publication in a complete form. This circumstance will account for the deep interest which has been excited in the scientific world by the actual realisation of an object so ardently cherished by the illustrious philosopher

According to the plan of publication adopted by the French publishers, the complete works of Arago will be comprised in fourteen volumes octavo. Three of these volumes will be devoted to biographical notices of eminent men of science, four volumes to a treatise on popular Astronomy, four volumes to critical discussions of certain subjects of physics, two volumes to scientific memoirs of a more formal character, and, finally, one volume to reports and short essays of a miscellaneous nature

The three volumes of Biographical Notices have already been published in the original. The subject-matter of the first two volumes consists chiefly of the *éloges* pronounced by Arago before the Academy of Sciences, being a series of masterly dissertations on the lives and scientific discoveries of a number of distinguished individuals whose names are familiarly known throughout the civilised world. It suffices to mention the names of Volta, Fresnel, Young, Watt, and Carnot, to be convinced of the interest with which every page of these volumes is replete. Some of these interesting biographical sketches have already been published; but in several instances the new edition has been enriched with notes, which greatly enhances its value. There are other *éloges* contained in these volumes, which have not hitherto been given forth to the world, such as those of Poisson, Ampère, and Condorcet. The first volume of these Biographical Notices contains an interesting sketch of the life and labours of Arago by his attached friend the illustrious Baron Humboldt. When Arago arrived at Marseilles, in 1809, after an absence of three years from France, the first letter which he received was one from Humboldt congratulating him upon his safe return to his native country. Then commenced an intimate friendship between these two distinguished men, which continued without interruption till the death of Arago. The following tribute paid to the memory of the latter by his surviving friend is highly honourable to both parties

"What distinguished this extraordinary man was not merely the power of genius which produces and fertilises, or that rare penetration which knows how to develop new and complex ideas with the same ease as if they had been long the property of the human intellect; it was also the attractive blending of the force and elevation of a passionate character with the warmest tenderness of feeling. I am proud to think that, by my affectionate devotion, and by the admiration which I have constantly expressed in all my works, I have belonged to him during a period of forty-four years, and that my name will be occasionally pronounced in connection with his great name."

The introduction by Humboldt is followed by an autobiography which Arago drew up before his death, and which is now for the first time published. A translation of this charming little production by Professor Powell has recently emanated from the establishment of Messrs. Longman and Co. Besides containing a graphic account of the author's early education, and of his subsequent adventurous career in Spain and Africa, it reveals to us some interesting views of the state of society in the scientific circles of Paris when Monge, Lagrange, and Laplace were in the height of their fame. When Arago first arrived in Paris, being then a very young man, he was naturally much gratified by the attention which he received from Laplace, having conceived an intense admiration of the great geometer from a perusal of his works while still residing in the provinces. He confesses, however, that his feelings of reverence for the illustrious author of the "Mecanique Celeste" were rudely disturbed on one occasion when, having been at his house, he heard Madame Laplace, approaching her husband, say to him "Voulez-vous me confier la clef du sucre?"

The biographical notice of Bailly, contained in the second volume, will be read with intense interest. It is well known that the illustrious historian of astronomy, having imprudently involved himself in the political storms of the Revolution, fell a victim to the fury of the populace in the year 1793. In giving an account of the circumstances connected with his execution, Arago points out several inaccuracies which Thiers has committed in his "History of the French Revolution," the tendency of which is to represent the conduct of the populace towards their illustrious victim as odious in the highest degree. Every one who has read Thiers's work must recollect many similar passages in which the author attempts to vilify the multitude whom shortly before he did not scruple to employ as the instruments of his ambition. It must be borne in mind that the "History of the French Revolution" was written subsequently to the year 1830, when its author, having been appointed to a high office in the Government of Louis Philippe, no longer found it convenient to identify himself with the class which had mainly contributed to the Revolution of July. What a striking contrast does the conduct of Arago offer to that of Thiers! Whatever opinion may be entertained respecting the political sentiments of the illustrious philosopher, it is impossible to deny that he was consistent to the end of his career, and that he never evinced the slightest disposition to sacrifice principle at the shrine of self-aggrandisement. The third volume of the Biographical Notices is devoted exclusively to an account of the lives and discoveries of eminent astronomers. The subject-matter of this volume, with the exception of only a very small portion, has hitherto been unpublished. The reader cannot fail to peruse with deep interest the brilliant sketches which it contains, of the intellectual achievements of Copernicus, Galileo, Kepler, Newton, Picard, Roemer, Halley, Herschel, and a multitude of other distinguished individuals.

MM. Gide and Baudry have also published one volume of the "Astronomie Populaire." Of all the works which Arago had prepared for the press this was undoubtedly the one which he regarded with the greatest partiality. A French writer has prettily designated it as "the cherished offspring of his old age" (*l'enfant chéri de sa vieillesse*). It embraces a complete exposition of the great truths of astronomy, and is written in a style adapted to the comprehension of persons who have not the advantage of any previous training in scientific studies. It may be considered as embodying the substance of the course of lectures on astronomy which Arago was in the habit of delivering annually, with such brilliant éclat, at the Observatory of Paris. The volume which has just appeared is chiefly devoted to an exposition of the sublime truths which have been established by the researches of modern astronomers relative to the magnitudes, distances, and physical constitution of the fixed stars

It is impossible, even upon the most cursory glance at the pages of this volume, not to be struck with the fascinating style of the author, and the unrivalled simplicity of the illustrations, by means of which he has rendered the astounding revelations of astronomical discovery easily accessible to any person of ordinary intelligence. The work, when completely published, will unquestionably form the most valuable contribution to popular astronomy which has hitherto appeared in any country. It ought to be mentioned, that the volumes are got up in an extremely handsome style—the publishers, apparently, sparing no expense to render the work in every respect worthy of its illustrious author. The same remark is applicable to the three volumes of Biographical Notices which we have alluded to, as having been already published.

We annex two Engravings, which have been chosen from among the many beautiful illustrations contained in the "Astronomie Populaire." The first represents an Altitude and Azimuth Instrument constructed by the French artist M. Froment. It consists essentially of two divided circles, one adjusted in a horizontal and the other in a vertical position. By observing the heavenly bodies with this instrument, the astronomer is enabled to fix the exact position of the meridian, and to ascertain *for time* with great precision. The Altitude and Azimuth Instrument is of indispensable use in all those great geodesical operations which have been undertaken in various parts of the world for the purpose of arriving at an accurate knowledge of the magnitude and figure of the earth

The second figure represents the mounting of the great Equatoreal Telescope which has been recently constructed for the Observatory of Paris. The object of this mechanism, which is due to the eminent French artist, M Brunner, is to give the telescope a smooth and uniform motion from east to west, upon an axis which is parallel to the earth's axis, the velocity of rotation being exactly equal to the apparent diurnal motion of the stars. By this arrangement it will be easily seen that when once a celestial object is brought into the field of view of the telescope, it will remain visible the during the whole of the interval of its continuance above the horizon; and by this means the observer may examine at leisure its various physical peculiarities. The instrument is surrounded by a revolving dome, having an aperture which enables the observer to direct the telescope to any region of the heavens which he may choose to examine

The drawings of the equatoreal telescope and the revolving dome are engraved upon steel. The same is true with respect to the representations of solar spots, comets, nebulæ, &c. Charming celestial charts, containing the various constellations generally admitted by astronomers, and including all the stars down to the sixth magnitude, have been constructed from the most recent authorities by the learned editor, M. Barral; and, besides being also engraved upon steel, is adapted to the octavo form of the volume. We might cite, also, an engraving executed from a photographic image of the sun, obtained by MM. Fizeau and Foucault, and a detailed description, accompanied with two engravings, of the ingenious apparatus of M. Foucault for demonstrating the diurnal rotation of the earth.

The greater number of the subjects treated of in the volumes of Scientific Notices have already been given forth to the world from time to time in the annual series of the "Annuaire du Bureau des Longitudes." Many of the have excited deep interest in the scientific world by the ability which the auth exhibits in grouping together under one point of view a number of apparently isolated phenomena. One would be apt, however, to form a very imperfect idea of these admirable essays from a perusal of them as they were originally published in the "Annuaire:" the author having, previously to his death, subjected them to extensive modifications, so as to adapt them to the present state of science. One of the volumes embracing these *Notices* devoted to the subject of meteorology, will shortly be published; and Messrs. Longman have announced that the English translation by Colonel Sabine will appear about the same time.

MOUNTING OF EQUATOREAL. BY M. BRUNNER.

DESPATCH FROM LORD RAGLAN.

War Department, May 16, 1855.

Lord Panmure has this day received a despatch and its enclosures, of which the following are copies, addressed to his Lordship by Field-Marshal the Lord Raglan, G.C.B.

Before Sebastopol, May 1.

My Lord,—I have little to report to your Lordship to-day.

The Russians continue actively engaged in covering their advanced works, and they have constructed a new battery on their left of the Mamelon: troops are constantly in motion on the north side, and there is every appearance of the establishment of a very large camp on the plateau above the Belbec, extending towards Mackenzie's Farm.

No movement has been perceived on the Tchernaya.

I have the satisfaction to acquaint your Lordship that the 3rd Regiment of Buffs has arrived at Balaclava, and that the *Alma*, having the draught of the Guards on board, reached Kazatch Bay yesterday; she has proceeded to Balaclava to-day

I enclose the list of casualties to the 29th ult. I have, &c.,

The Lord Panmure, &c RAGLAN.

NON-COMMISSIONED OFFICERS AND PRIVATES KILLED, FROM THE 23RD TO THE 29TH APRIL, INCLUSIVE

Sergeant—49th Foot: Henry Headen.

Privates—7th Foot: Thomas Byrne. 14th: Matthew Briody. 23rd: James Harvey. 30th: Thomas Walsh. 33rd: William Ryan. 34th: Richard Pinkard. 41st: John Cocolly and John Kane. 49th: Thomas Richardson. 47th: John Burke. 49th: William White. 50th: Thomas Dalton and John Flynn. 62nd: Patrick Donovan. 97th: Michael Crough. Royal Artillery: Gunner William Henderson, *Acting Bombardier* James Sweeney.

NOMINAL RETURN OF NON-COMMISSIONED OFFICERS AND PRIVATES WOUNDED FROM THE 23RD TO 29TH APRIL, INCLUSIVE

Sergeant—9th Foot: James Moss, severely

Privates—9th Foot: Thomas Keating, slightly. 30th: Alexander Cole, slightly. 49th: Thomas Willis, slightly. 89th: William Love dangerously

Lance-Corporals—30th: Edmund Burke, slightly. 49th: Henry Hueston

Privates—2nd Batt. 1st Foot: Peter Scully, slightly. 4th: George Cake, severely. 7th: Charles Firth, severely. 9th: Patrick Power, slightly. 14th: William Harrison, mortally (since dead), Patrick M'Govern, severely; William Lock, Thomas Weadhall, and Thomas Barry, slightly. 19th: Edward Tyler and Michael Toles, severely; and Thomas Johnson, slightly. 23rd: William Taylor, and Lock Haynes, severely. 30th: Michael M'Guire, slightly. 33rd: Owen Callaghan, severely. 34th: William Gorman and Joseph Mansfield, dangerously; James M'Gowan and George Atchison, severely; John Bacon, Ralph Hinson, Thomas Lovejoy, and Christopher Rostron, slightly. 39th: Edward Mormon, John Miller, and John Fakett, severely. 41st: Jason Kennedy, dangerously (since dead), Jonah Connell, Thomas Davis (since dead), Hugh Flan Thomas, John Sullivan, and Michael Conway, severely; Patrick Kenna, John M'Ready, Patrick O'Halloran, Patrick Tremble, and James Keogh, slightly. 47th: James Cleary, dangerously; John Tally, and Patrick Griffin, severely. 49th: Robert Berwick, severely. 49th: Robert Thompson, dangerously (since dead); Joan Delaney, slightly. 50th: John Taylor, dangerously. 97th: Martin Seagrove, severely; Samuel Hill and John Barfoe, slightly. 62nd: David Amos, George Simpson, and John M'Laughlin, severely; Patrick Mark, slightly. 68th: John Rogerson, severely. 77th: James Powell, dangerously. 88th: Patrick Foley, severely. 89th: Thomas Dixon, severely. 97th: Peter Hepburn, Joseph Harper, and William Miller, severely. 47th: William Quans and Michael Maloney, severely. 2nd Battalion 11th Brigade: Thomas Parkinson, Sharpshooters: Royal Artillery: *Acting Bombardier* Robert James, slightly; *Gunner* John Mags, severely

A RETURN OF CASUALTIES IN THE ROYAL NAVAL BRIGADE, BEFORE SEBASTOPOL, IN THE WEEK ENDING 27TH APRIL

Killed—Benjamin Taylor, A.B., *Queen*

Wounded—Robert Baker, ord., *Queen*, dangerously: William Clarke 2nd), ord., *Queen*, slightly; John Collins, ord., *London*, slightly; George Boyle, A.B., *Queen*, slightly.

Left abroad (not A. A. D. Douglas, R.M.A., slightly; Edward Smith, A.B., *Leander*, slightly; Jeremiah Mahoney, Ord, *Rodney*, slightly; John Gordon, ord., *Queen*, slightly.

H.M. FLOATING BATTERY, "THUNDER."

WE this week give an Illustration of one of the Floating Batteries in a finished state, four of which are now nearly ready for sea—two are fitting out at Sheerness, and two at Woolwich, for service in the Baltic Though extremely heavy in appearance, the external forms of these vessels as good as could be desired for the purposes for which they are intended, a service where neither speed nor beauty of mould is required.

The vessels consist of a perfectly-built and strongly-framed wooden ship, of great durability, encased from the gunwale to a little below the water line, with hammered iron plates of four and a half inches thickness, and considered capable of resisting, even at close quarters, the effects of the heaviest shot. It was originally intended to cover the deck with the same material and of the same thickness; but, from miscalculation as to the weight of this suit of armour, this idea has been abandoned, from the fact of the vessels drawing now without their guns as much water as it was intended they should when perfectly equipped for sea. A wider beam would have overcome these difficulties, and have given space for some efficient means of ventilating the vessel when in action. The mooring chains descend from hawser holes below the water line, so that the cable will be out of the reach of shot. They are pierced with ports for fighting twenty-eight guns; but what armament they will carry is at present undecided. In the trial trips they have proved themselves tolerably fast, and also capable of towing other vessels; but their effectiveness for the purposes for which they are intended is generally doubted. Their dimensions, &c., are as follow:—Length between the perpendiculars, 172 ft. 6 in.; beam, 48 ft. 6 in.; depth of hold, 14 ft. 7 in.; tonnage, 1469; power, 150 horses. The *Thunder* was built by Messrs. Mare and Co., of Blackwall, and the engines by Messrs. Maudsley. Many exaggerated accounts having appeared in the papers respecting the destruction of the *Etna*, the following letter from Mr. Scott Russell, her builder, will throw the best light on the occurrence:

SIR,—As accounts of the fire in my dockyard have been published which may give exaggerated impressions of a calamity in itself sufficiently serious both to the country and to myself, I beg you will do me the favour to give such prominence as you think fit to the following exact statements of fact, which may, I hope, serve to moderate the anxiety of friends on my account and of owners of steam ships building by me, who in distant countries may hear of this casualty without knowing its limits:—

1. No ship was burnt on that occasion, except the steam battery, but that was hopelessly destroyed

2. Two ships on each side of the battery were injured, but only slightly, so that the injuries of one will probably be remedied in a week, and the other in a fortnight

3. All the other ships in the building-yard escaped without the slightest injury, including the great ship of the Eastern Steam Navigation Company

4. The whole of the buildings and machinery of the establishment escaped without injury, and continue uninterruptedly at work

5. The battery and the other ships now in the yard are covered by the insurances I am in the habit of making for the benefit of those who intrust me with the construction of ships for them, to the extent of £110,000. It is, however, true that the loss by the battery is not entirely covered by insurance, as the ships building in the yard at the time of the fire exceeded the amount above stated. But a large proportion of the value is insured.

6. Besides the insurance, the works themselves, and the machinery they contain, are insured to the extent of £100,000

7. Owners of ships now on the stocks at Millwall should not, therefore, be alarmed for the safety of their property by the exaggerated statements they may have heard; and my own friends will, I hope, allow me, in thanking them for their ready sympathy, to assure them that, excepting the vexation which I naturally feel in losing all the thought and labour it has cost the executors of my establishment and myself to do our work well, and my distress in disappointing the just expectations of our Government that I would execute successfully one of the works destined for the defence of the country, I shall not be a sufferer to any considerable extent. I must add that, but for the successful exertions of the Fire Brigade, of the authorities of Deptford Dockyard, and of the foremen and workmen of Millwall: and, further, for two providential circumstances—the steady direction of the wind towards the water, and the spontaneous launching of the battery while in flames, the conflagration could not have failed to have become much more serious.—I am, Sir, your obedient servant,

Millwall, London, May 5. J. SCOTT RUSSELL

MR. ROEBUCK, M.P.

THE public is always in a hurry: the public which cried out for an inquiry into the administration of the war is now clamouring for that inquiry to come to a conclusion. "Why don't you make a report?" is now the somewhat indignant question addressed to that "Sebastopol Committee" which only sat about forty days (to investigate the system that has grown up in ages), and which had yet become too old to be popular. In this phase of popular impatience there is nothing new. When you commence a revolution you cannot expect your public to stand still. The Sebastopol Committee served the purpose of the moment: it is succeeded by a still more elaborate protest against "the system"—the "Administrative Reform Association." Already all men are inquiring—What next? As the originator of the Sebastopol Committee—

the first stage of the new organisation of national reform—Mr. Roebuck becomes an historical personage; and we are the more inclined to watch that hon. and learned gentleman at the present moment, on finding, after a study of his significant career, that he has all his life been leading up to the movement which seems now virtually commenced. For Mr. Roebuck has spent his life in England, in aiding in the abolition of class Government, and we may naturally look for that career being consummated consistently, in participating in an effort to abolish Government *by* a class. Mr. Roebuck has been in Parliament about twenty years. During the whole of that period he has been one of the most active, best known, most popular, and most respected, members of the House of Commons. He has been all that time sacrificing professional honours, literary ambition—all the prizes of the ordinary lives of able men—to the public service—to a conscientious discharge of his duties as an elected deputy of the people. It has been known, he never concealed it from his constituents, that he has always thought that the "popular" member might be most useful in office; and as his means were notoriously not large, he seemed precisely that class of man whom the Sovereign ought to reward for public services by high office. But Mr. Roebuck, with all his ability, all his experience, and a fame for public honesty and political purity singularly high, has never received one farthing of the public money—has never for a day, in all the accidents of political change, held any, even the most subordinate, office. Why? Because Mr. Roebuck, as the independent member and conscientious reformer, was necessarily opposed to the two parties into which the governing aristocracy have ever divided themselves. The life of such a man is, therefore, an illustration of "the system" on which the country is now making war; the country considering that "the system" is an alliance, offensive and defensive, with the Czar of Russia.

Mr. Roebuck is of a family, not noble in the aristocratic sense, but illustrious in the best sense. He is the grandson of the celebrated savant Dr. Roebuck, famous in his time as the partner and co worker of Watt in those great undertakings in Scotland and in Birmingham in which the steam discoveries of Watt were first brought to a business application; and on the mother's side Mr. Roebuck boasts a gentle descent from the poet Tickell, the friend of Addison. Mr. Roebuck now sits in the House of Commons for the place (Sheffield) where his family have been eminent and honoured citizens for many generations.

Born in India (in 1801), he was brea in England, and studied the law in the Temple with the intention of practising in the colony of Canada, where his apparently migratory father had eventually settled. But it was a busy and earnest time, in literature and politics in London in 1820-30; and it would appear that the eager and ambitious young student, who had established an early reputation in "advanced" circles, became too interested in the affairs of the mother country to take more than an episodical interest in Canada. The Canadas—ill governed, discontented, undeveloped—were in agitation just then against the views and decisions of the Imperial Parliament; and, wanting aman to do in London what Franklin had done years before for the "Federal Union," they decided upon the young Mr Roebuck's stay in England, by pitching upon him as their agent—at first a subordinate one, subsequently as plenipotentiary.

MR. ROEBUCK, M.P. FOR SHEFFIELD, CHAIRMAN OF THE COMMITTEE ON THE STATE OF THE ARMY BEFORE SEBASTOPOL. FROM A PHOTOGRAPH BY MAYALL.

He remained, and went the Northern Circuit; but though the leaders of that circuit—then Brougham and Denman—were strong Liberals, Mr. Roebuck was a marked man as a violent Radical; and, not getting into business, and finding his small presence and thin voice opposed to the progress of a young barrister, he seems to have given himself up to newspaper writing (he was a champion in the days of "the unstamped"), and to very effective Benthamite articles in the new, noisy, and greatly abused, because so very Radical, *Westminster Review*. In the Reform agitation he made himself conspicuous, for boldness of speech and philosophical views of statesmanship; and, when the bill at last passed, he stood for the generally Radical Bath, and was returned second on the poll. He remained in Parliament for five years; and, from the first, took up his peculiar position—sometimes sneeringly defined by his opponents as "Objector-General." He faced every sort of fact in politics, analysed all kinds of men; opposed and lectured Whigs and Tories; headed the rest of the Radicals in plain speaking; and, being still a young man, of no definitive position, and with no obvious aims, he created inside and outside Parliament a mingled feeling of detestation, wonder, admiration, and amusement. In fact, he had become a House of Commons character. But he was as independent with his constituents as with the House; an "unmanageable" man; and not being yet understood, having only reached the stage of unpopularity, he was thrown out of his seat at the general election of 1837, polling only 910 where he had formerly polled 1138

But such a man could not long remain out. He remained a public man, and took to meetings as he was denied the House. The Corn-law question was coming uppermost—the Colonial question was forcing itself on. Mr. Roebuck understood both; and by the next general election, in 1841, he had reached popularity, had ceased to be regarded as an eccentricity; and even by the Whigs, who availed themselves of his precise but pungent pen in the *Edinburgh Review*, he was coming to be considered as "rising." Bath was in one of its Radical humours in 1841; and the £10 householders returned him and Lord Duncan by a triumphant majority against the Peelite Tories. In that new Parliament Mr. Roebuck made himself more conspicuous than ever. There had been great electoral corruption. He pointed it out; he insisted on inquiry; he demanded committees; he even had members down at the Bar! He made 600 enemies out of the 658 members, but he pleased the public, and made his own courageous independence thoroughly comprehended. From 1841 to 1847 he was an ardent and energetic Reformer. He had got disgusted with Whig shortcomings, and was delighted with the realities of Sir Robert Peel, whom he accordingly warmly supported through all the memorable tariff changes up to Corn-law repeal. But he was moving, all this time, on Colonial Reform, Church Reform, Parliamentary Reform, daily, weekly, monthly, he was doing something to form and bring to a point public opinion on the numerous "shams" he ruthlessly laid bare. All this time he peculiarly preserved his individuality; for though an earnest Radical and a profound politico-economist, he avoided the vulgar inutility of Chartism, and he deprecated the too material influence of the newly-risen Manchester School. He had likewise held aloof from the "Tory Socialist" school of Lord Ashley; and, being opposed at Bath at the election of 1847 by that then and still popular nobleman (now Lord Shaftesbury), he had to yield to the combined influence of aristocratic and philanthropic interests, and was beaten;—the press at the time (thus indicating the high position Mr. Roebuck had attained in national estimation) severely condemning Lord Ashley for opposing such a man.

Mr. Roebuck remained out for two years; but a vacancy occurring in Sheffield, in 1849, by the appointment of Sir Henry Ward to the government of the Ionian Islands, he was returned by that thoroughly Liberal community without opposition, and the feeling at the time was, that a right thing had been done, inasmuch as Mr. Roebuck had been missed in the House of Commons. His health, however, had begun to fail, and during 1851-2-3 he was not much seen in Parliament. His constituents, re-electing him in 1852, generously besought him to retire for a time; and at his farm, in Hampshire, he spent this period in composing a "History of the Whigs," two volumes of which have been published, admirable as a political essay, and certain to live as the picture by an actor of the stormy drama of 1830-5. He was greatly missed again in the Session of 1853, when electoral corruption, exposed at the general election of the preceding year, was again the question, and when there was no man in the House of Commons to force Lord John into the bold cure that the country demanded. Mr. Roebuck reappeared in his place at the latter end of last Session; and, though his health is still infirm to that extent that the House has had to show its indulgence in a manner which was a tribute of its esteem, he has this Session not hesitated to risk his life in insisting upon the exposure of the maladministration of the war. There was not another man who would not have been suspected either of party or personal objects in asking for a committee to inquire into the working of the Government offices in a great war crisis. When he made the motion for the Committee, it was as much as anything else the conviction of his lofty patriotism and stern determination to get at the truth which caused the national cry for an investigation—the House of Commons giving way to that cry against all the entreaties and precedents of placemen. In the chair of the Committee Mr. Roebuck has at least fulfilled the country's expectations formed on its experience of his character; he has been undauntedly earnest in probing, at whatever pain to or exposure of individuals, the whole truth; but that he does this, and has always done this, from a deep sense of his duty as an English statesman, and not from any cynicism or malignity of nature—over and over again charged against him he has shown, by a courtesy, and even kindliness, to the witnesses, which has left all of them, however passionate with the Committee, pleased with the Chairman.

Let us trust that Mr. Roebuck has still many years in which to continue and complete his service to his country; and that under the new system we are about to inaugurate he will be invited by his Sovereign to bring his wisdom and his virtue into her Cabinet.

H.M. NEW FLOATING BATTERY, "THUNDER." (SEE PRECEDING PAGE.)

BRIGHT'S NAVVY-A DAY UNDER FIRE AT THE GREEN-HILL.—(SEE NEXT PAGE.)

A DAY UNDER FIRE.

THE men employed in working the guns, as represented in the Engraving on the preceding page, seem to take the matter very coolly. A round shot has just struck the parapet on the right hand, but the sailors are evidently no way alarmed at so every-day an incident. The following extract from a letter, dated "Camp before Sebastopol, April 15," gives a very lively description of a day under fire:—

In my last letter told you that I was going to the trenches. Well, I went, and I had enough of it. But I suppose you would like to hear the whole story; so I shall begin at the beginning. We paraded at a quarter past six p.m. I had a bandsman attached to me, to carry the pack containing lint, &c. As we are not allowed to take down our servants with our breakfasts now, I had to take everything I wanted myself. I accordingly took in my haversack a tin canteen to boil water in, and in it some tea, sugar, butter, and a tot or nugg; also, in the haversack, some red herrings, biscuits, rum, and a plate and knife and fork, a little firewood, a candle, and some matches. I also had my wooden barrel, with water in it, slung on the other side, my telescope, cloak, and macintosh. Altogether, I was in heavy marching order. My orders were to stay in the surgeons' hut, and to do the best I could with the wounded. There are four assistant-surgeons in the trenches—one, an artillery man, who goes wherever he is most wanted, a naval man, and two line assistant-surgeons, who stay in the first parallel. The firing stopped for the night shortly after I went down, so I walked over the trenches to see what had been done. I did not think there was much harm, except to the battery in the advanced trench (No. 7), which had been a good deal knocked about—in fact, smashed almost entirely. The artillery surgeon told me he had to go there next day, and I must say I did not envy him. I came back to the hut, and seeing a nice soft board, I took possession, and was soon sound asleep. I got up about six o'clock, when the firing commenced. About seven o'clock in walked the artillery surgeon, with his face bandaged up. He had gone to the advanced battery at daybreak, where he had a number of men wounded, and he had got hit himself. He also said that some one must go there, as the men were busy, but every minute. Well, I was rather in a fix. Being senior medical officer, I was of course asked to send some one. Now, I had been told that we were to stay in the hut; and if I sent any one forward, and he got hit, the authorities would have come down on me for so doing, and there I must get hit, and no help at hand, they would be equally down on me; so I thought the best thing I could do was to go myself. I accordingly went forward, and found that during the short time the other surgeon had been away five new men had been wounded. There are two batteries there, Nos. 7 and 8: No. 7 battery is much the most dangerous. So, after doing what was wanted there, I went to No. 8. The ground of it is composed of gravel and large stones, and, of course, the battery is constructed of the same material. The consequence was that every shot fired by the enemy threw up a perfect shower of stones, some of them very large; and, as they fired at us all day, every one was hit more or less, some very severely: fortunately, although this morning I am black and blue, and my back aches from a large stone that fell on it, I was not hurt. They kept me running between the two batteries all day, and most disagreeable work it was, as in one place there is no cover at all, and in getting into No. 7 there was a sort of channel which we had to run through that was always getting filled up through it. The corpses we had were most wonderful. One time it was almost miraculous. I was leaning on the carriage of a gun that was loaded, and run out, speaking to an artillery officer who was pointing it. He had his face on the gun-carriage, with his right cheek resting on the muzzle, looking through the sights every time it was run out to reload, and the next time it went out his head was off. I never saw anything so complete, particularly the cheek which had been on the gun. I almost fell over myself, as I was leaning forward, but which fell sooner than myself in the same place as the first. This is very well as was that the enemy, as such, are so far behind a traverse or my shelter. So does every one except the Lieutenant-Colonel, the doctor, who must go to his men, no matter where. To give you an instance of this:—A man got his hand blown off in No. 7. They sent for me at once, as the man was bleeding. At the time there was a perfect storm of shot coming on the unfortunate battery. I had to dart into it the best way I could. When I got there the wounded man was lying where he was hit, with another beside him, and all the rest were snugly placed behind traverses and parapets. I had had to go to the unfortunate, and it took me nearly a quarter of an hour to dress the wound, it was such a bad one, and I the most part of the time bleeding. At the time there was a perfect storm of shot coming on the unfortunate battery. I had to dart into it the best way I could. When I got there the wounded man was lying where he was hit, with another beside him, and all the rest were snugly placed behind traverses and parapets. I had had to go to the unfortunate, and it took me nearly a quarter of an hour to dress the wound, it was such a bad one, and I the most part of the time bleeding. This nice work lasted till about half-past seven, when they had nearly stopped firing, I thought I might go back to the first parallel, and when I got there I found my relief had come; so I started home, breakfasted, and was very hungry, as I had nothing but some rum and biscuit for 24 hours, cooking being quite out of the question in such a target as the advanced battery. It would be quite impossible to tell all the narrow escapes on hand. A shell fell into the middle of us, but fortunately did not burst; we screwed out the fuse and found it was an English one, probably a shell of ours that had not burst, and was returned by the enemy. The noise all day was terrific. The shot from our batteries and the shot from theirs about 300 yards distant, never ceased. We were in a capital position for hearing everything. Their practice was much better than ours. I used to climb up an embrasure and watch our shells always went over their battery. This was quite safe, as they had withdrawn their riflemen, and one could always jump into the battery after they fired a gun before the shot came. You saw the flash. Our shot went too high, hence the embrasures were too high, and the guns consequently could not be sufficiently depressed. And now you have the experience of a 'non-combatant' of the trenches under fire. I suppose you would like to know how I felt yesterday. Of course, no one can see men knocked down all around him, and getting wounds of which he best knows the full danger, and take it quite coolly at first, but you very soon get accustomed to it. After a bit, the fear of no danger fairly collected in a corner that was well covered, and made ourselves quite jolly. It seems to be all habit, and perhaps, if you could get over it once or twice, you would soon get quite accustomed to being killed. *Letter from the Camp.*

NAPOLEON III. AND POLAND. I learn from a private source that, in answer to the address presented to the Emperor by the Poles in Paris, to congratulate him on his escape from Pianori's pistol, his Majesty replied in the following unmistakable terms:—"I am deeply moved by the sentiments expressed in your address. I expected such a manifestation from you. Hitherto I have not been able to do what I could have wished for your country; but the moment of events now permits me to hope that I may be useful to you, in continuing the work commenced by him whose heir I am." I am informed that the "embers of the Polish Legion are being fast completed; but there are striking symptoms that the impending Polish movement is to be entirely confined to, and not confined to the Czartoryski party, which, however respectable and patriotic, is but a party. General Rybinski himself is a democrat, and a dissident from Prince Czartoryski's politics, and for that reason he would not join in the general address, but wrote to the Emperor the separate letter which has met with such a favourable reception. M. Adam Mickiewicz, one of the deputation to the Tuileries with the Polish address, was in 1840 the *Professor ad hoc* of the journal, *Le Tribune des Peuples*, founded by Count Branicki, which advocated the insurrection of oppressed peoples throughout the world. From the moment when the claims of Count Walewski's appointment to the Ministry of Foreign Affairs was known the Poles in Paris felt persuaded that the dawn of a new era had arrived. Walewski was a Pole by his mother's side, and, although brought up in France, he found and bled in the Polish cause in the insurrectionary war of 1831, and was decorated for his distinguished conduct at the battle of Grochow. It may not, perhaps, be generally remembered that after this battle he went to London as a diplomatic envoy from the Revolutionary Government. He then made the acquaintance of Lord Dudley Stuart, and has ever since been a member of the Polish Association.—*Letter from Paris.*

THE AUSTRIAN PROPOSITION.—Of the last Austrian proposition put forward since the discontinuance of the Conference, for giving effect to the Third Point, a correspondent of the *Indépendance Belge* gives the following account (as reliable):—"The Austrian proposition for terminating the preponderance of Russia in the Black Sea proceeded less upon the principle of a reduction than upon that of equalising the forces of Russia and Turkey respectively. It limited the forces of Russia in restoring them to a figure which, it is true, was very little lower than that at which they stood before the war, but it sustained by Turkey, by means of her own resources, and those of France and England, her allies, forces constantly equal to those of Russia. Thus it had neither the inconvenience of the absolute principle of *mare liberum*, which, by opening the Straits to the Russian forces, would have permitted that to exercise a powerful and continuous influence in the waters of Greece and the Adriatic, nor the inconvenience of the principle of *mare clausum*, which would have left Turkey to contend with her own forces against Russia. In fact, it would have opened the Straits only to the fleets of France and England in the proportion necessary to maintain the forces required for the protection of Turkey at the level of the Russian forces, and

EPITOME OF NEWS—FOREIGN AND DOMESTIC.

Prince Ernest of Leiningen arrived in town on Saturday night, and is staying at Buckingham Palace, on a visit to her Majesty.

The King of Portugal and the Duke of Oporto, after being present at the Paris Exhibition, intend to visit England and Italy before returning to Portugal.

The Duke and Duchess de Montpensier are to go to Italy in the beginning of June.

The King of Bavaria arrived at Rome on the 27th ult., under the incognito of Count of Augsburg, and on the next day paid a visit to the Pope.

The Grand Duchess of Mecklenburg-Strelitz, with the youthful Prince Adolphus, arrived in town on Tuesday, on a visit to her Majesty.

The young Prince Adalbert of Bavaria has arrived in Rome. The Count de Trapani, brother of the King of Naples, has also paid a flying visit to attend the horse-races, that have just gone off very brilliantly, under the auspices of the English and French resident aristocracy.

The French Emperor and the Empress will again spend part of the summer at Biarritz. The health of her Majesty was so much benefited by her residence there last year, that sea-bathing has been again considered advisable. It is said that his Majesty intends inviting several of the augest visitors at the Exhibition to accompany him to the new Imperial residence which has been built by his orders.

The health of the King of Prussia continues to improve, but he is still far from entirely restored. His Majesty's medical advisers recommend him to proceed for a few weeks to the Royal residence at Erdmannsdorff, in Silesia, where the fine mountain air will remove, they think, all the ill effects of the late illness

Prince Albert, as the nearest agnate to the Saxe-Gotha throne, has given his assent to the Constitution of 1852. A similar assent is expected from the King of the Belgians, the King Regent of Portugal, and Prince Augustus of Saxe-Coburg.

The Emperor and Empress of the French have forwarded to Lady Cowley the sum of 2000 francs, towards the ball given by the committee of the British Charitable Fund in aid of the English Poor, on Tuesday last, at the Jardin d'Hiver.

The Czar has just conferred new orders and insignia, enriched with diamonds, upon Prince Gortschakoff III. (not the Commander-in-Chief) and General Mardefelf for their services in the Crimea.

The King of Denmark, accompanied by the Countess Danner, intend to go this summer to Aix-la-Chapelle to use the waters of that place for the re-establishment of his health after the serious illness from which he has lately risen, and which has left him in a very weak state. He has bought a beautiful estate in the Duchy of Schleswig, for the sum of 180,000 rix dollars, and made a present of it to the Countess.

The Lord-Lieutenant of Ireland will visit Cork on Monday next, and will get a public reception from the municipal and military authorities.

Lord and Lady Strafford de Redcliffe, their two daughters, and Lady George Paget, were present at the review of the First French *Corps d'Armée*, by General Canrobert, on the plateau of the Round Bay before Sebastopol, on the 27th ult.

The French Emperor and the Empress, wishing to reserve to themselves at the Exhibition, the free selection of such articles as they may think proper to purchase, will not accept any offer that may be made to them.

Colonel Sibthorp now lies in a precarious state of health, at his residence in town. His condition is said to be such as to cause the utmost alarm to his friends.

The dignity of Pacha has been conferred upon Iskender Bey by Omer Pacha for his gallant services during the war.

Among the passengers by the last American steamer is the Hon. Augustus Cæsar Dodge, of Iowa, the new American Minister to Spain.

Vice-Admiral Kreuger, of the Swedish navy, has invented an instrument by which the force of the winds can be measured with the greatest exactitude, and by order of the King of Sweden it is to be exhibited in the Universal Exhibition of Paris.

Dr. George Errington, who has hitherto filled the Roman Catholic See of Plymouth, is appointed coadjutor of Cardinal Wiseman, with the title of Archbishop of Trebizond *in partibus infidelium*.

The late Cardinal Oppizzoni, Archbishop of Bologna, has left all his fortune, amounting to 100,000 scudi (£216,000), to the Banca de Misericordia, a charitable establishment in that city.

Dr. Monro, the celebrated physician in lunacy, is now suffering from that grievous malady, and in such an ill state of health as to give no hope to his bed without hope of recovery.

Governor Brigham Young, of Utah territory, the high priest of Mormonism, delivered a long and impassioned harangue to the Latter-day Saints, at Great Salt Lake City, on the 18th February, denying the right of Congress to interfere with the religion of the Mormons—polygamy, of course, included.

Count Microlawski, a noted revolutionist leader of Germany, prominent in the insurrections of 1848 in Berlin and Baden, is in Halifax receiving men for the English service in the Crimea.

The King of Sweden has nominated Marshal Vaillant, Minister of War, Commander Grand Cross of the Order of the Sword.

A duel has taken place at Pera, between the principal editors of the *Press of Orient* and of the *Journal de Constantinople*, in which the gentleman connected with the former was slightly wounded.

"Our Friends in Hell" is the startling title of a new publication by the Rev. J. M Killen, of Glasgow

The Ionian Parliament was opened by the Lord High Commissioner, with the usual formalities, on Tuesday, May 1.

Commodore Vandarbilt has reduced the price of passage in his new line of New York and Havre steamers, for first cabin from 120 dols. to 110 dols.; second cabin, from 75 dols. to 60 dols

The South-Western Railway Company have done away with open carriages for the excursion trains. The cheapest carriages are now covered over.

A line of electric telegraph is about to be established from Westenborg, province of Somala, in Sweden, to the frontier of Norway. It is to run along the western coast of Sweden.

The Aberdeen county meeting unanimously agreed to give the usual guarantee of £300 to the Highland Society, so as to have their meeting at Aberdeen in 1856

A destructive fire took place at Boston on the 27th ult., involving a loss of property to the amount of nearly a million of dollars

Preparations are made at Dover to receive a first portion of the Foreign Legion shortly expected in England.

The Government of the United States has decided that American vessels sold to strangers, and then bought back by American citizens, cannot receive papers as vessels of the United States

Complaints are made that the Overland Indian postage via Marseilles is still maintained at 1s. 8d., notwithstanding the reduction which has taken place in the charge for the transit through France

The picture-galleries of the palace of Versailles are henceforth to be opened to the public every day, except Mondays, from eleven to five.

The Dresden Gallery was shut on the 15th inst., for the purpose of moving the pictures to the new Museum—an operation which will probably occupy several weeks.

The Staats Colleries Association at Newcastle-on-Tyne offer a premium of £500 for the invention of an effectual method for preventing the emission of smoke from the chimneys of multitubular boilers.

The Spanish Government has issued a circular to the ecclesiastical authorities, directing them to suspend the admission of novices into convents until the number and occupation of all the nuns of Spain shall have been ascertained.

The musical festival on the Lower Rhine will this year be held at Dusseldorf, and commence on the 27th inst. Haydn's "Creation," and Dr. Schumann's "Paradise and the Peri," are in the programme.

The Prussian Government is to establish forthwith a submarine telegraph from the Prussian coast to the Island of Rugen, and thence to Ystadt, in Sweden.

Workmen are at present employed in setting out the orange-trees in the garden of the Tuileries. They are about 200 in number, and were planted in the reign of Louis XIV.

The telegraph from Varna to Rustchuk is terminated, with the exception of crossing the Danube near the latter town, which operation presents some difficulty.

The gross receipts for the United States Treasury for the quarter ending on the 31st ult., reached 14,766,000 dollars, while the expenditure of the same period amounted to 16,572,000 dollars.

According to a return just published, the number of soldiers in the Infantry, Cavalry, Artillery, and Marines, who have purchased their discharges in the last ten years was 17,322.

All apprehension is at an end of any serious difficulty arising out of what are known in the United States as the "Cuban outrages."

CHESS.

*** Customary Notices to Correspondents are postponed until next week

SOLUTION OF PROBLEM No. 583.

WHITE.	BLACK.
1. K to K 6th	B to Q B 8th
(Black has a choice of moves, but none by which the Mate can be averted or delayed.)	
2. Kt to Q 4th	Any move.
3. R or Kt mates	

SOLUTION OF PROBLEM No. 584.

WHITE.	BLACK.	WHITE.	BLACK.
1. K to Kt 5th	P to KB 3rd (ch) (best)	3. B takes Kt	K takes Kt
2. K to R 5th	K to K 4th	4. R to Q 6th (ch)	K moves
		5. B mates	

PROBLEM No. 587.

By Mr W. GRIMSHAW.

BLACK.

WHITE.

White to play, and mate in four moves.

CHESS IN PARIS.

Second Game in the Match between MM. LA BOURDONNAIS and DE RIVIERE.

(Irregular Opening.)

BLACK (M. de R.)	WHITE (M. LA R.)	BLACK (M. de R.)	WHITE (M. LA R.)
1. P to Q 4th	P to K B 4th	32. Kt to Q Kt 4th	B to Q R 5th

16. P takes P	B takes B	48. K to Q B 3rd	P takes P
17. P takes B	Q R to Q Kt sq	49. K takes R (g)	P takes P
18. Q R to Q Kt sq	R takes R	50. Kt to Q 5th (ch)	K takes Kt
19. Q takes R	K Kt to K sq	51. R to Q Kt sq	B to Q B 3rd
20. K to Q sq	Q to K B 3rd	52. R to his 3rd	K to his 4th
21. Q Kt to Q R 4th	Q to K 4th	53. K to K B 2nd	K to Q 5th
22. Q to Q 3rd (g)	Q to Q R 4th	54. R to Q 8 sq	B to Q 4th
23. Q Kt to his 2nd	Q Kt to K 4th	55. R to Q 8 sq	K to Q 4th
24. Q to Q 3rd	B to Q Kt 2nd	56. R to Q 3rd (ch)	K to Q 5th
25. Q Kt to Q B 4th	Kt takes Kt	57. B takes Kt	B takes B
26. B takes Kt	Kt to K B 2nd	58. K takes P	K to his 6th
27. Q to Q R 7th	B to Q B 3rd	59. B to Q B 3rd (ch)	B to Q 6th
28. Kt to K B 4th	K to K 2nd	60. P to Q R 4th	P to K B 4th
29. Kt to Q 3rd	Kt to Q 4th	61. P to Q R 5th	P to K B 8th (ch)
30. Q takes Q P	B to Q B sq	62. R to Kt 3rd	P to K B 7th
31. Q takes Q	R takes Q	63. R takes B (ch), and wins.	

(a) P to K 4th is also a safe and good move at this moment See the "Handbook," page 331

(b) Q Kt to Q B 3rd is usually played.

(c) The Pawn cannot now be thrown forward to K 4th without loss. *Ex. gr.* —

3. P to K 4th	P takes K P
4. Q takes Q P (ch)	K B to Q Kt 3rd

And white may preserve the Pawn

(d) As on this move appears to lose a Piece. If we are right, it is strange, in fact, that a player so cautious and experienced as M. La Roche should be guilty of such a fault in the opening of a match game, and still more remarkable that his young antagonist, vigilant opponents, should have failed to detect it

(e) M. de Riviere, instead of so playing, *had attacked the Q Kt with his Pawn*, we see no possible means by which his adversary could have escaped the loss of an officer. For suppose—

9. P to Q 5th	K Kt to K 4th
(His best play. If he move the Q Kt the Pawn advances to Q 6th, and wins the Bishop. If he take Pawn with Pawn, or Pawn with K Kt, the result is obvious.)	
10. Q Kt takes K B P	P takes Kt
11. P takes Kt	B takes B
12. P takes Q P	

and wins one of the Bishops

(f) Some think Kt, if at all, cannot be played advantageously either to K Kt 3rd, or to K B 3rd, his march to K 4th was a vain move, and evidently made without consideration.

(g) The wish to defend the advanced Pawn was very natural, but we believe something more demonstrative might have been attempted with advantage For example, Kt to Q Kt 6th, when the game would, no doubt, have been continued as follows

22. Q Kt to his 6th	K takes Q P
23. Q Kt takes B	Q Kt takes B
24. P takes Kt	B takes B

(This is best for him. If he take with the Rook. Black may play with Q to her 3rd, and will have a decisive superiority after a few moves.)

25. B takes Q P.	

And we prefer Black's game. Note, that at his 22nd move in this variant, Black may play Q to her 3rd *before taking the Bishop*, and still maintains an advantage in position

(h) It is certainly here that the two minor pieces for a Rook, but Black's Q R Pawn would probably have cost him a piece otherwise

(i) The termination is interesting and very well played, especially by M. de Riviere.

THE FLORENTINE MS. OF GRECO

We have no wish whatever to anticipate the researches of Sir Frederic Madden and Mr. Staunton among the occult treasures of the early European Greek literature. When treating of the writers of the sixteenth and seventeenth centuries, we may be sure of receiving at their hands complete history and minute description of the beautiful Greco MS. so lately found at Florence. There is one point, however, connected with this MS which, as it excites a good deal of conjecture at the present moment among our Archæological Chess amateurs, both here and abroad, we may be pardoned, perhaps, for clearing up. The MS. of the Florentine MS., it throws no light upon the question of the Pedrone's name. Bearing in mind, however, the date and place of Greco's dedicatory epistle, a reference to the history of the House of Lorraine shows clearly that the Prince in question was no other than Henry Le Gros, Duke of Lorraine. Henry was the eldest son of Charles II. of Lorraine and Claude of France, and was born at Nancy, the 3rd of November, 1563. Upon the death of his father, in 1608, he ascended the throne. He made a solemn entry into Nancy 1610, and died in 1624. His connection with Calabria, to which Greco alludes, was in this wise:—After the marriage of Violante, the daughter of Renato, the last Duke of Anjou, with Ferry of Lorraine, Count of Vaudemont, the Duke of Lorraine, considering themselves successors to all the rights of the House of Anjou, even to the Kingdom of Naples, quartered the arms of Sicily with their own, and, under other titles, assumed that of Dukes of Calabria. (See Beaucourt, "Traité Historique et Critique sur l'Origine et la Généalogie de la Maison de Lorraine.")

NAVAL AND MILITARY INTELLIGENCE.

THE *Enterprise* discovery ship, Captain Richard Collinson, C.B., has been taken into the lesser basin, Sheerness, to be stripped and paid off. Nothing official has been communicated to her officers under arrest, who are now at liberty at large, as to whether a court-martial will be held to investigate the charges brought against them.

LORD ADOLPHUS VANE TEMPEST, M.P., for North Durham, who is with his regiment of Guards in the Crimea, having received a hut from his mother, the Dowager Marchioness of Londonderry, immediately on its erection fitted up a large and roomy tent adjoining it, which he furnished with a library of standard works, several periodicals, and three daily papers, and, having a good stock of stationery, has opened it for the use of the men of his company for reading, and writing letters home.

The screw-transport *Simla* arrived at Spithead from the Crimea on Sunday. She had on board 200 Russian prisoners, 12 officers, 150 English invalids, a guard of 47 men, and 16 other military passengers. She left Constantinople on the 27th of April, and Malta on the 2nd May.

THE *Odin*, paddle-wheel steam frigate, and *Rosamond*, paddle-wheel steam sloop, left Sheerness on Saturday last, at 4 a.m., with five of the mortar vessels, for the Black Sea. The marine artillery officers and gunners for service in the sea mortar vessels proceeded out in the *Odin* and *Rosamond*

FOREIGN ORDERS AND MEDALS.—The *Gazette* of Friday week contains new regulations respecting foreign orders and medals, in substitution of the regulations now in force. No subject is to accept or wear a foreign order without the permission of her Majesty, under sign manual, and this will not be given unless the order shall have been conferred for active and distinguished service before the enemy, or unless the subject shall have been employed in the service of the foreign Sovereign conferring the order

It is reported at Portsmouth that Vice-Admiral of the Red Sir George Seymour, K.C.B., G.C.H., will succeed Sir Thomas Cochrane as Commander-in-Chief at that port at the expiration of the term of commission of the latter officer.

THE Duke of Cambridge, accompanied by Lord Adolphus Fitzclarence, paid a visit to Woolwich Dockyard on Monday afternoon. They went on board the *Thunder* floating-battery, and afterwards to the mortar-boats.

TEN six mortar-vessels that arrived at Spithead on Sunday night, from Sheerness, *en route* to the Black Sea, are ordered into harbour, and they have discharged their shot and shell for this purpose. In their passage round they were found to labour very much in a rough sea, and it is now considered that the mortars, and sand to be used in the Black Sea by other means—probably on board the *Odin* paddle frigate and *Rosamond* paddle-sloop, which are to accompany the mortar vessels to Sebastopol. Another alteration in the trim of the vessels is also taken.

In addition to the three regiments of Household Cavalry, there are now only nine heavy and light regiments quartered in the United Kingdom, five of which are under orders for foreign service. The regiments at home are as follows, viz.:—Henry Cavalry: 1st or Kings Dragoon Guards, at Piershill Barracks, Edinburgh, under orders for foreign service; 2nd or the Queen's Dragoon Guards, at Dundalk, under orders for foreign service; 3rd Dragoon Guards, at Dublin; 5th ditto Carabineers, at Hounslow, under orders for foreign service; 7th Dragoon Guards, at Dublin. Light Cavalry: 3rd Light Dragoons, at Manchester; 7th Hussars, at Hounslow, under orders for foreign service; 18th ditto, at Exeter, ditto: and 16th Lancers, at Cahir. Twelve regiments are in the colonies and two in India, making the total of 23 regiments of Cavalry.

In order to meet the garrison wants of the naval station at Pembroke Dock, the Government have determined upon the erection of new barracks at Pater, and the Board of Ordnance have taken the preliminary steps for their construction. The building is to be capable of holding 1000 troops, and it has been selected on the rising ground in the vicinity of Hobbs Point. The barracks are to be fortified, and they will prove another adjunct to the defence of the dockyard

It is intended to concentrate the Foreign Legion enlisted in British America at Shorncliffe, where also a large number of Swiss volunteers will be encamped. The Poles and Germans will be quartered and disciplined at Helgoland.

SINCE the enlistment bounty was raised to £8 per man, in November last, the recruiting service has gone on very briskly in Scotland, and especially in Glasgow (the head-quarters of the west country), which has of late supplied a large body of fine young men to her Majesty's service. The enlistments in Glasgow alone, for the East India Company's service, during the last four months, have been 283—viz., in January, 64; February, 71; March, 43; and April, 64. It appears from the returns that Scotland is recruiting at the rate of more than 600 per annum, and that if recruiting should go on at the same ratio over England, Ireland, and Scotland generally, a total of upwards of 60,000 men would this year be added to her Majesty's forces

According to present arrangements, about 9000 troops will occupy the ground at the opening of the Camp at Aldershot, and it is stated that her Majesty, Prince Albert, the Duke of Cambridge, Lord Hardinge, and the Earl of Cardigan will be present on the occasion. It is understood that the following regiments of cavalry, infantry, and militia will be the first troops to occupy the ground; viz., 2nd Regiment of Life Guards, from Hyde-park barracks, 4th Dragoon Guards, Carabiniers, from Hounslow (this regiment was relieved by the 7th Hussars, from York, and will remain in Camp until ready to embark for the seat of war); detachments from the cavalry depôts at Maidstone, and Brighton, consisting of the 4th battalion of the Coldstream, and 2nd battalion of the Scots Fusilier Guards; 51st (King's) Light Infantry, from Manchester; 89th Foot, from Portsmouth; two companies of the 94th ditto, from Windsor; and the newly-raised 3rd battalion of the Rifle Brigade, from Portsmouth; and detachments from the provisional battalions and depôt companies at Parkhurst, Winchester, and Chatham. Militia Regiments:—Berkshire, Buckinghamshire, Sussex Rifles, West Kent, 1st or East Middlesex, 2nd ditto Westminster, and 5th ditto Eithorne Regiment, Tower Hamlets King's Own Light Infantry, and Tower Hamlets Queen's own Light Infantry, and 1st, 2nd, and 3rd Regiments of Surrey Militia. These will give in round number, 1100 cavalry, 2500 Guards and Infantry of the line, and about 4300 militia; which, added to 900 artillery and 150 Sappers and Miners, will complete the number of 9000 men. These will be relieved occasionally, until the whole force quartered in England has received a month's instruction in field evolutions.

THE FOREIGN LEGION.—On the 3rd inst. fourteen English officers landed on Helgoland; among them was an officer of the Commissariat and a Paymaster. The natives have consented, from the very complete outfit of these gentlemen (paraphernalia being in some cases included for the benefit of those who are accompanied by their families) that their stay will be somewhat lengthy. All available premises were inspected the day after their arrival, and put into requisition for the accommodation of some coming troops, even to the place hitherto destined to protecting the bathing machines from the rigour of the elements. The amount of force expected is guessed to be between 5000 and 6000 men; for this number of additional mouths large supplies of provisions are announced as on their way. As there was a French officer in company of our countrymen, the notion has obtained both that a joint stock allied depôt is to be formed on that island. Although there is nothing in the above statement to favour the idea of Helgoland being selected as a station for the foreign legion, other news from the south of Germany mentions that recruiting for the English service is going on there *sub rosa*, but more successfully than was at first expected, under the auspices of a *ci-devant* Schleswig-Holstein officer. It appears that the Government allow £3 7*s* per hundred head of recruits delivered safe and sound at Helgoland, including keep and travelling expenses. The bounty paid to the individuals by the contractors is stated to be £6 each.—*Letter from Berlin, May 7.*

---

* The following is a translation of this cento in a performance, which shows that Greco was not above what Dr Johnson terms "the very ill, of hyperbolical adulation:—

"TO HIS MOST SERENE HIGHNESS OF LORRAINE,

"My Most Serene Lord,

The true and glorious fame of your Highness' heroic virtues has reached even to my ears, one of an immeasurable multitude who behold and admire the sun of virtue and renown from me the doubt which I have had until now as to whom I should dedicate and present this my production, whether—not on my account, but for the credit of the subject which it treats—is not alone incontemptible, and ought, therefore, only to be dedicated to a Sovereign Prince like your Highness; it is a treatise (*a*) on the noble and ancient game of Chess, formerly the invention of a Prince and valiant soldier, who, enamoured of virtue, as you have more profitably discovered, I will not say the game, but this trial of intellect, which afterwards, although in his sole end is to recreate our minds, was called a game. Your Highness will recognise in the book, under the metaphor of the said game, the most illustrious and distinguished virtues, which cause it to be regarded by all the world, and will discern in me also an infinite desire to manifest to your Highness the amount devotion which I, in common with all our province, retain for your Illustrious House, as to our supreme Lord and Governor. To your Highness, therefore—a true image of virtue—the sole mirror of military glory, and the glorious offspring of the immortal progenitors of Calabria—I dedicate and consecrate this my volume, in order that you being yourself warned as to fine a game may be its perpetual encourager and defender against any who may dare to blame as lendable a thing—as much the more rare, as it appears to me only to be commonly found among persons of your distinguished quality. Wishing your Highness every happiness, I reverently kiss your robe.

"Your Most Illustrious Highness's

Humble and devoted servant,

From Nancy, 9th July, 1621. GIOVANNI GIACCO CALABRESE."

(*a*) The whole of the beginning, thus far, is missing in the Florentine MS., and we translate from the old French of the Brussels copy. The remainder, however, is rendered from the Italian of the former.

which are wanting), and a copy of verses addressed "A SUA ALTEZZA SERENISSIME." From some expressions in the dedication, and the following verse in the poetic address—

Gran Signor, che in Lorreno invitto regni
E di tal trionfar gli alumi impera—

We gather that this "Altezza Serenissime" was a Prince of the house of Lorraine, but of his name, strange to say, there is no mention. Our first impression was that the name must have been lost with the missing lines of the dedication, and that another MS of Greco, in the Library at Dresden, supposed by some to be Lucenter, would furnish it. This is not the case; we have been at the pains to procure a transcript of the Dresden work, and, although it enables us to fill up the *lacuna* in the Italian one, and by turning out to be nothing more than a verbatim translation of the latter into old French, adds inestimably to the value of the Florentine MS., it throws no light upon the question of the Pedrone's name. Bearing in mind, however, the date and place of Greco's dedicatory epistle, a reference to the history of the House of Lorraine shows clearly that the Prince in question was no other than Henry Le Gros, Duke of Lorraine. Henry was the eldest son of Charles II. of Lorraine and Claude of France, and was born at Nancy, the 3rd of November, 1563. Upon the death of his father, in 1608, he ascended the throne. He made a solemn entry into Nancy 1610, and died in 1624. His connection with Calabria, to which Greco alludes, was in this wise:—After the marriage of Violante, the daughter of Renato, the last Duke of Anjou, with Ferry of Lorraine, Count of Vaudemont, the Duke of Lorraine, considering themselves successors to all the rights of the House of Anjou, even to the Kingdom of Naples, quartered the arms of Sicily with their own, and, under other titles, assumed that of Dukes of Calabria. (See Beaucourt, "Traité Historique et Critique sur l'Origine et la Généalogie de la Maison de Lorraine.")

A MONOGRAPH OF THE TOUCANS, OR RAMPHASTIDÆ.

BY JOHN GOULD, ESQ., F.R.S.

MANY and splendid are the works on ornithology which Mr. Gould has produced, and most favourable has been their reception. Among these works his "Monograph of the Toucans" holds a conspicuous place, both as regards its intrinsic merits, as a contribution to science, and the beauty of the plates, which every eye can appreciate. It is upon this work that we design to offer our observations. At the same time, we cannot in justice refrain from a brief notice of the labours of this eminent naturalist, as evidenced by his various publications: and when we consider that these have been undertaken at his sole personal risk, without other encouragement than that of the more opulent patrons of science, we shall appreciate the moral courage displayed in encountering the heavy pecuniary responsibility necessarily involved in their production. Well is it that these works, costly as they cannot but be, bear within themselves the power to command success,—displaying as they do extensive knowledge, combined with anxious care and attention. Nothing, in fact, can exceed the spirit, fidelity, and beauty of the plates. True to the life, they afford a study to the artist, and constitute for the naturalist a pictorial museum of ornithology.

Passing by Mr. Gould's communications to the proceedings and transactions of the Zoological Society, both numerous and important, we come first to his "Century of Birds from the Himalayan Mountains," which appeared in the year 1832. Encouraged by the success of this first attempt, Mr. Gould commenced a more formidable undertaking, and in due time "The Birds of Europe" was completed. Then followed various Monographs—namely, of the Toucans, of the Trogons, and of the Partridges of America (*Odontophorinæ*), the intrinsic value of which the naturalist will at once appreciate, while to all persons the beauty of the illustrations will be patent. We now come to the year 1838. Hitherto, our knowledge of the ornithology of Australia was limited and uncertain; not, indeed, that the subject had been altogether neglected; but the materials were few, the collection of Australian birds in the museum of the Linnean Society being the most important then extant. An unexplored field invited, but it was not to be rashly entered. Actuated by that zeal which urges an energetic spirit to further achievements, Mr. Gould determined to visit Australia, penetrate as far as desirable into the remoter settlements, and collect and study the objects of nature in their native wilds. After an absence of about two years, he returned to England and commenced his labours upon the "Birds of Australia," in conjunction with a work on the "Quadrupeds" of the same country. Of these splendid publications we shall at present only say that they are, in every point, worthy of the author of the "Birds of Europe."

And here, Mr. Gould, might have "rested on his oars," and enjoyed *otium cum dignitate*; but new spheres of labour opened before him, and at one and the same time he undertook the following works—namely, the "Birds of Asia," "A Monograph of the Humming Birds" (or *Trochilidæ*), and a new "Monograph of the Toucans" (or *Ramphastidæ*.) The two former of these works are now in course of publication. The latter is completed; and it is to this that, on the present occasion, we especially direct our attention.

To persons not conversant with the science of Natural History, a "Monograph"—that is, a detailed description of every species of a given group or family—may appear a task of no very great difficulty; but, in truth, the very contrary is the fact. In the first place every known species must be verified; and this can only be done by careful and repeated comparison: for which purpose, as original specimens are scattered among different museums, both British and Continental, express visits to these treasuries respectively have to be made—and that not once, but many times—in order to clear away doubts, disentangle a maze of confusion, and rectify errors. Then as, from time to time, new, or apparently new, species are brought to light, fresh researches must be made, lest, in some neglected work, an obscure description may have been overlooked, or a duplicate of the species in question be lying perdue in some little-known collection. After all this, follow the scientific results, namely, the rearrangement of the component parts of the group, in conformity with the newly acquired data, and the increase of information. No group of birds more urgently demanded this rigorous investigation than the Toucans; for, although Mr. Gould had previously published a Monograph, which included many new species, he could not but perceive that it was only the embryo of a more enlarged and complete undertaking. But Mr Gould may here speak for himself. "In order (he says) to render this work as perfect as possible, I have obtained access to all the collections of this country, and have also visited and examined the principal museums of the Continent,—in several of which I found some species not contained in the others. Thus in Vienna I first saw the many-banded Araçari (*Pteroglossus pluricinctus*); in Munich, Reinwardt's Toucanet (*Selenidera Reinwardtii*), Langsdorff's Toucanet (*S. Langsdorffii*), Wagler's Groove-bill (*Aulacoramphus Waglerii*); in Paris, the Yellow-billed Araçari (*Pteroglossus flavirostris*); while Berlin and Leyden both contained other species not previously known to me." "Just as my first Monograph was brought to a close, that celebrated traveller and naturalist, the late Mr. John Natterer, of Vienna, returned to Europe, bringing with him females of the species of which I found only males at Munich, together with several other new ones, acquired during a sojourn of eighteen years in the Brazils. Unfortunately he did not arrive in London until the last sheets of that Monograph had gone to press; consequently, I was unable to include therein figures of these new species, as well as the many valuable notes, which, in the kindest manner, he placed at my disposal." Mr Gould, therefore, resumed a new Monograph imperative; and some idea of his industry may be conceived from the fact that he has described and figured more that fifty species; whereas only six (and these ill-determined) were all with which Linnæus was acquainted. It was, in fact, only a few years previously to the time of the great Swedish naturalist that actual specimens of the Toucan had been received in Europe. The beaks, however, of these birds, regarded as curiosities, had occasionally found their way to our shores, probably brought over by sailors from Brazil or Surinam, and had occasioned some curious conjectures. The earliest

THE TOCO TOUCAN (RAMPHASTOS TOCO).

record respecting the existence of a species of this remarkable group, now so well known by the common appellation of Toucans, occurs in the 28th chapter of Belon's third book, published in 1555. He there figures the beak of the Toco Toucan, and assigns the bird to the web-footed order, evidently regarding it as a sort of duck. He comments on its size, its transparency, lightness, and beauty; but informs us that he has never seen the bird itself. He suspects, however, that it is one of the *Aves palmipedes*, and therefore places it among birds "*ressemblants le long des rivières.*"—("De la Nature d'Oyseaux, etc.") Elsewhere ("Portraits d'Oyseaux") the same beak is figured as belonging to an "*aquatic bird brought from the New World.*"

Among the curiosities of Tradescant's collection the bill of a Toucan was preserved as an object of value, and was described in the "Museum Tradescantum," published in 1656, under the division "Heads and Beaks," as that of the Araçari of Brazil—four inches long, almost two thick, and in shape resembling a Turkish scimitar. Whether Tradescant had ever seen the bird itself does not appear: it is, however, probable, from his terming it the Araçari of Brazil, that he was not altogether unacquainted with it.

The first figure of an entire bird, but so rude that it is impossible to refer it to any definite species, appeared in the "Ornithologia" of Willoughby, under the title of "*Picus Brasilianus*, the *Tocaro* of Margrave, the *Xochitenocotl* of the Mexicans." In this figure ("Ornithol. Libr.," 1676, published by Ray, from "Willoughby's Posthumous Papers") the feet are incorrectly drawn, evidently by a mistake of the artist; for we well know that Willoughby was acquainted with their real conformation, since he not only expressly notices them, but refers to Thevetus, Faber Oviedo, John De Laet, and other authorities.

Subsequently a correct, but very ill-drawn figure of some species of Toucan, probably the Red-billed, was published in Petiver's "*Gazophy-*

THE MANY-BANDED ARAÇARI (PTEROGLOSSUS PLURICINCTUS.)

THE CURL-CRESTED ARAÇARI (BEUHARNAISIUS ULOCOMUS).

lacii Naturæ," under the title of *Toucan Surinamensis* (Tab xliv.) In this figure the toes are rightly arranged.

To these meagre materials but little appears to have been added until the appearance of the "*Systema Naturæ*" of the celebrated Linnæus, in the twelfth edition of which he enumerates eight species; but of these two have nothing to do with the present family; so that six species were all that were really known to him. Gmelin, in his edition of the "*Systema Naturæ*," introduces seven other species; but of these five cannot be identified; one is referable to the *Ramphastos Tucanus* of Linnæus, and hence one alone was the true extent of the addition made by him to the previous list.

Illiger appears to have added another species. Dr. Shaw described a Linnæan species under another name, and Vieillot merely Latinized the French names given by Le Vaillant to three of the species figured in his "Oiseaux de Paradis." Mr. Swainson made us acquainted with three additional species. Dr. Lichtenstein described two others. Dr. Latham does not appear to have added a single species to the group, for his "Blue-eared Toucan" is probably a species previously described.

Wagler, in his "Systema Avium," 1827, added four species, and in Oken's "Isis," added a fifth. His other species, which he supposed to be new, are either described from faded specimens or from specimens manufactured by the bird-mounter—a not unfrequent practice. To these a few species have been more recently added, by naturalists of the present day, but their descriptions are scattered through various publications.

From what we have said, the value of Mr. Gould's labour may be in some degree appreciated.

The Toucans (a word derived from their Brazilian name, *Toco*, *Tuca*, *Tucana*, or *Tucatuca*) were formed by Linnæus into a single genus, to which he applied the title of *Ramphastos*, in allusion to the great volume of the beak (ῥαμφος—Ramphos). They now constitute a family (*Ramphastidæ*) comprehending several sections or genera, each having its distinguishing characters. All, however, have certain peculiarities in common, which at once distinguish them from every other group. In some respects, indeed, they resemble the Hornbills for example, in the development of the beak, and its growth from youth to mature age: in scantiness of plumage, and impatience of cold; as well as in general habits and actions; and even in the position assumed when roosting, both sating with the tail turned over the back. Hence, the Toucans may be said to represent in America the Hornbills in India and Africa. They differ, however, in the structure of the feet, the toes of the latter having the normal situation. Large as is the beak of the Toucans compared with the size of the body, it is in reality very light. Its outer sheathing is somewhat elastic, very thin, smooth, and semi-transparent; and the interior consists of a maze of delicate cells, throughout which the ramifications of the olfactory nerves are multitudinously distributed. The nostrils are basal, the edges of each mandible are serrated, and the colouring of the whole beak is bright, rich, and often relieved by contrasted markings. But these tints begin to fade after death, and become ultimately dissipated. In young birds the bill is much smaller than in adults, but little or no difference is manifested in the colours of the plumage. The eyes are surrounded by a considerable space of naked skin, often very richly tinted. The tongue is very long, slender, horizontally flattened, pointed, and, except at its base, horny; it is fringed or feathered along each side; the feet are strong and zygodactyle: that is, two toes are placed before and two behind, with a broad palm or sole at their junction. This mode of structure well adapts them for grasping firmly, but not for climbing, after the manner of the zygodactyle woodpeckers. The wings are short, concave, and comparatively feeble. The tail is variable, equal and squared, or graduated; it is remarkable for the facility with which it can be retroverted or turned up, so as to be upon the back. This position is easily results from a modification of structure in the caudal vertebræ, which enables the tail to turn with a jerk by the action of certain muscles, as if it were fixed on a hinge put into action by means of a spring. When the retroversion is accomplished, the muscles which caused it become passive, and offer no resistance to their antagonists, which restore the tail to its ordinary direction.

It need scarcely be said that the Toucans possess but indifferent powers of flight; at the same time there is a certain buoyancy in their actions, which might scarcely be expected from them, encumbered as they seem to be with so large a beak. They fly lightly, and hop and flit from branch to branch with graceful ease and address, so much so as to have suggested for one species the appellation of Ariel.

The Toucans are natives of the intertropical latitudes of America, and are strictly arboreal in their habits. They tenant the vast forests, are mostly seen in small companies, and utter from time to time harsh, clattering, or discordant cries. The localities they affect are various. "Some (says Mr. Gould) frequent the humid woods of the temperate regions, while others resort to comparatively colder districts, and dwell at an elevation of from six to ten thousand feet. Those inhabiting the lofty regions are generically different from those residing in the low lands, and are clothed in a more thick and sombre coloured plumage. All the members of the genus *Andigena* (Hill Toucans) are thus distinguished as well as by their bills being strong, heavy, and hard, when compared with those of the true Toucans and Aracaris, all of which have their bills of a more delicate structure, and in several species so thin and elastic on the sides as to be compressible between the fingers." Their food in a state of nature consists of fruits, eggs, and nestling birds; to which, in domestication, are added small birds, mice, caterpillars, and raw flesh. They incubate in the hollows of gigantic trees, and the eggs are said by Azara to be two in number.

Faber was told by Fryer, Alayza, and other Spaniards who had lived long in America, and also by the Indians, that the Toucan even hews out holes in trees, in which to nidify; and Oviedo who remarks that no bird protects herself from the troublesome monkeys with better success—adds, that it is from this habit of chipping the trees that the bird is called by the Spaniards *Carpintero*, and by the Brazilians *Tocatoca*, in imitation, apparently, of the sound it thus makes. We cannot help suspecting some error or confusion in this statement, which is certainly true as respects the woodpecker; but cannot, we think, apply even to the hardest-billed species of Toucan or Aracari.

THE GREY-BREASTED HILL-TOUCAN (ANDIGENA HYPO-GLAUCUS).

"Humboldt states that the Toucan loves to fish on the banks of rivers; and it was doubtless some report of this kind that induced Linnæus to give the name of *Piscivorus* to a species of this family; but I apprehend that in this particular both these celebrated men have been misinformed, for I have every reason to believe that, in a state of nature, fruit is the principal food—the larger species feeding upon bananas and other succulent kinds, while the Aracaris and Toucanets mainly subsist upon the smaller fruits and berries." GOULD.

Prince Maximilian de Wied, who communicated to Mr. Gould many details relative to the species observed by him in Brazil, states that he found only the remains of fruits in their stomach, and adds that they make sad havoc in plantations of fruit trees. He was informed, however, that they steal and eat birds, but never himself saw them in the act. They abound in the vast forests, and are killed in great numbers during the cooler season of the year for the purposes of the table.

"In their manners the *Ramphastidæ* (he says) offer some resemblance to the *Corvidæ* (crow tribe), and especially to the magpies: like them, they are very troublesome to the birds of prey—particularly to the owls, which they surround and annoy by making a great noise, all the while jerking their tails upwards and downwards. The flight of these birds is easy and graceful, and they sweep with facility over the loftiest trees of their native forests." Their feathers, especially their yellow breasts, are used by the Indians for personal decoration.

Azara states that they attack even the solid nests of the white ants

GOULD'S TOUCANET (SELENIDERA GOULDII).

THE GROOVE-BILLED ARAÇARI (AULACORAMPHUS SULCATUS).

when the clay of which these structures are formed becomes moistened with the rain; in this condition they break them up with their beaks, so as to obtain the young ants and the eggs; in fact, he says that, during the breeding season, the Toucan feeds upon nothing else; during the rest of the year he subsists upon fruits, insects, and the buds of trees. Azara talks about the impossibility of their digesting the feathers and bones of other birds; forgetting that hawks strip the feathers from their prey, and cast up the bones and indigestible particles.

Edwards, in his voyage up the Amazon, observes that when a party of Toucans alights on a tree, one usually takes the part of a sentinel, uttering the loud cry of Tucano, whence they derive their name: the others disperse over the branches in search of fruit. While feeding they keep a hoarse chattering, and at intervals unite with the noisy sentry, and scream a concert that may be heard a mile. Having appeased their appetites they seek the depths of a forest, and there quietly pass away the noon. Often in the very early morning a few of them may be seen sitting quietly upon the branches of some dead tree, apparently awaiting the coming sunlight before starting for their feeding trees. The nests (he adds) of the Toucans are represented in works of natural history as being constructed in the hollow of trees. It may be so in many cases, and with some species, but the only one which we ever saw, and which was of the Red-Toucan, was in the fork of a large tree overhanging the water upon the Amazon

The mode in which the Toucans roost is not a little curious. The perch being taken, they puff out their plumage, retract the tail over the back, draw the head between the shoulders, close the eyes, and remain in a state betwixt sleeping and waking for a considerable period, sometimes nearly for two hours. Once roused from this condition, they open their eyes, move a little, and soon relapse again. To this stage of sol lodency succeeds that of true sleep; the bill now begins to turn gradually over the right shoulder, and is at last buried among the feathers within the plumage of the back; at the same time the pinions of the wings droop, and with the cover s of the thighs entirely conceal the feet. The bird now presents the appearance of a small ball of puffed-up feathers, and is well protected against the cold.

With respect to the carnivorous appetite of at least some species of Toucan, we have abundance of evidence. They were seen by Mr. Such often engaged in quarrels with the monkeys, a nest of eggs being, it is presumed, the object of the contention. Their carnivorous propensity has been strikingly displayed by all the specimens which have been kept in this country. It was noticed by Mr. Vigors that at the approach of any small bird the Toucan becomes highly excited, raises itself up, erects its feathers, and utters a hollow clucking sound; the sides of the eyes expand, and the bill is intently pointed upon the prey on which it seems ready to dart with impetuosity. On one occasion Mr. Broderip tried a Toucan with a live goldfinch. The moment the bird was presented into the cage, the Toucan seized it with the beak, and the poor little victim had only time to utter a short weak cry, for within a second it was dead, killed by the powerful compression of the mandibles. The Toucan now quietly laid the dead bird firmly between its foot and the perch, stripped off the feathers with its bill, and then broke the bones of the wings and legs, by strongly wrenching them from the body and crushing them with its foot. He then continued to work with great dexterity till he had reduced the goldfinch to a shapeless mass. "Ever and anon he would take his prey from the capacious bill, making at the same time a peculiar clattering noise, at which times I observed that his bill and wings were affected with a vibratory or shivering motion, though the latter were not expanded. He would then return the bird to the perch with his bill, and set his foot upon it. He first ate the viscera, and continued pulling off and swallowing piece after piece, till the head, neck, and part of the back and breast, with their soft parts, were alone left. These, after a little more wrenching, while they were held on the perch, and mastication while they were held in the bill, he at last swallowed, not even leaving the legs or the beak of their prey." The latter part of the work, though it gave him the most trouble, evidently produced the keenest enjoyment. To each morsel he applied his tongue, and as each piece disappeared he smacked and crunched with delight. "I have more than once (says Mr. Broderip) seen him return his food soon after he had taken it into his crop, and, after masticating the mixed food in his bill, again swallow it; the whole operation, particularly by the return of the food to the bill, bearing a strong resemblance to the analogous action in ruminating animals."

Light and dance diaphenous as the bill of the Toucan, its strength and the power of the muscles which act upon the mandibles, are evident in the wrenching and masticatory processes thus detailed. When taking fruit the Toucan generally holds it for a short time at the extremity of the bill, applying to it, with apparent delight, the pointed tip of the slender tongue: the bird then throws it, by a sudden upward jerk, to the throat, where it is caught and instantly swallowed.

Cuvier (evidently on the authority of Azara) says of the Toucans that the structure of the beak obliges them to swallow their food without masticating it. This is not correct in the instance of the goldfinch above alluded to, is not correct. The tongue, however, does not assist in deglutition.

The Toucans, previously ranged in only two groups—namely, Toucans proper, and Aracaris—are divided by Mr. Gould into six genera distinguished by well-marked chara

1. RAMPHASTOS. The true Toucans have very large and gaily coloured bills. Their general plumage black; tail spare. Sexes alike in plumage. Species seven.

2. PTEROGLOSSUS (Aracaris). The Aracaris, with smaller beaks, a more elegant contour, a graceful tail: the bright plumage green, with one of the under parts yellow and red, with bands of black. Sexes alike. Species, ten.

3. BEAUHARNAISIUS (Shaw [Aracaris]).—This is an Amazonian genus proposed by Prince L. B. The females of the Toucans closely assimilate to the males in colour, but differ in the lighter line of the throat. Species, six

4. SELENIDERA (the Toucanets).—All the members of this group are of small size, when compared with the true Ara aris, have shorter and harder bills, and shorter and less graduated tails. They are, moreover, distinguished by a screscentic mark of yellow across the back, by brilliant orange and yellow ear-coverts, and by a great difference in the colouring of the sexes. Species, six

5. ANDIGENA (Hill Toucans). A group inhabiting the elevated portions of the Andes. They are well proportioned birds: have larger and harder bills than the *Selenidera*, a thick but lax plumage, and are not banded on the under surface, like the *Aracaris*. The sexes are alike in plumage. Species, five

6. ALLACORNIPHUS (Groove-bills). These birds are distinguished by elegance of form, and a nearly uniform green colouring of the plumage. The feathers composing the latter are long and loose; and in most species the bill is grooved along the sides. The sexes are alike in colour. Species, ten. Total, fifty-one

Of the first genus, the True Toucans, we figure the Toco (*Ramphastos Toco*—Gmel.), remarkable for the splendour and size of the bill, which is of a fine orange-red, with a black patch and mark near the tip. The naked skin round the eye is bright orange. The chest is white, with a tinge of sulphur below, and a slight scarlet margin. Upper tail-coverts, white; under tail-coverts, scarlet; the rest of the plumage black. Several specimens of this beautiful bird have lived both in the menageris of the late Earl of Derby and in the gardens of the Zoological Society. It is a native of Guyana, Paraguay, &c. Prince Maximilian says:—"This species is never found near the coast, but is plentiful in the province of Minas Geraes, and Bahia. It is also abundant in the southern part of Brazil. Those observed in the vicinity of Bahia were very shy; the result of their having been repeatedly fired at by the inhabitants, in defence of their fruit-trees, as well for the purpose of procuring them for the table. Notwithstanding this, the desire to feed upon the delicious oranges and guavas induces them to approach very near the town at the season when these fruits are ripening. Very pretty little powder-flasks are occasionally made of their large and finely-coloured bills."

Of the second group, the Aracaris, the species selected as an example is the Many banded Aracari (*Pteroglossus pluricinctus*). This species was first described by Mr. Gould from specimens obtained in the Upper Amazon and Rio Negro. It was observed by the natural wilds by Mr. Natterer, who observes:—"I have seen five or six together in a tree near Villa de Thomar, on the Rio Negro, and readily recognised them, with the assistance of a glass, by their conspicuous yellow tip. That it is found as far north as the Rio Padauiri and Castanha Parana, on the Orinoco, I know from the circumstance of many specimens having come to me by the Macusi Indians." The upper parts of the body generally, the sides of the tail and throat black; the under parts, base of the tail, and crescentic mark, and crosses with two bold bands of black; bill white, with a broad yellow stripe along the sides of the upper mandible, and a narrow boundary line of the same around the basal portion of each; naked skin round the eye, blue.

Of the third group, the Banded Aracaris of the Amazon, we figure the Curl-crested Aracari (*Beauharnaisius vitellorinus*). This elegant species was not known in Europe previously to the year 1830. During the last five years, however, Mr. Gould observes, several specimens have entered the upper tributaries of the Amazon, so that many specimens, as might naturally be expected, have been recently procured. According to Wallace, it is extremely local in its habits, and is never found on the south side of the Amazon, above the Rio Madeira; although Professor Pepping is stated to have found it on the eastern dip of the Peruvian Andes. Mr. Wallace adds that it appears on the districts mentioned in great numbers during the month of July, when certain fruits on which it feeds are abundant. It is called in its native country the Maiasto Aracari, probably from its "curly head." The upper mandible and tip, green, then dark red along the sides. Under mandible, white. Head covered by a jet-black crest, the feathers of which represent the appearance of curled glossy metallic lamina: each feather being, in fact, so modified in its structure as to form a simple horny strip, of considerable firmness and elasticity. Naked skin round the eye, blue. Upper part of the back, red: lower part, green, followed by a scarlet band, to which succeed the green upper tail-coverts. Cheeks, straw-yellow, dotted with blackish. Under parts, yellow, dashed—especially along the sides—with scarlet.

From the fourth group, the Toucanets, we select as an example Gould's Toucanet (*Selenidera Gouldi*). This species was first figured by Mr. Gould in the "Icones Avium," from the specimens procured by Mr. Natterer, on the Rio Madeira, Brazil; and who named the species in honour of Mr Gould, in the Proceedings of the Zoological Society, April 11, 1837. Mr Gould has since obtained many specimens from the banks of the Amazon. Still it is one of the rarest specimens of the genus, and is not very often to be found in ornithological collections. Of its habits we have no detailed account. In the male the head, the upper part of the back, and the chest, are black, the naked skin round the eye green; ear-coverts parti-coloured being anteriorly dark orange, and posteriorly straw-yellow, abruptly distinct; a pale yellow crescentic band edges the black across the back; sides orange; under tail-coverts scarlet: upper plumage below the yellow band dull green; tail tipped with brown. In the female, the head, neck, throat, and breast are reddish brown, and the ear-coverts reddish olive. In both the bill is green at the tip; the upper mandible is black, edged and bounded by straw-yellow; under mandible green at the tip, with a black mark, or bar, and then white

The fifth group, the Hill Toucans, presents us with a fine example, in the Grey-breasted Hill Toucan (*Andigena Hypo-glauca*.—Gould). This species was first described by Mr. Gould, from specimens sent over from Peru. Like the rest of the genus, it is an inhabitant of the mountains, and is only to be found in the deepest-wooded portions of the Andes, for which elevated and cold situation the full and downy texture of its plumage admirably adapts it, a feature also characteristic of the other species of this genus. The specific name refers to the beautiful silvery hairs which pervades the delicate grey spread over the breast and under surface. Bill above red, yellow at the base, where it is bounded by a black band. Tip of under mandible black. Back brown at the upper part, yellow at the lower. Under tail-coverts scarlet. Tail blackish olive, tipped with brown. Wings olive green. Head sooty black; naked skin round the eye yellow before, passing into green behind.

The sixth genus is that of the Groove-Bills, characterised by the solidness and hardness of the bill, and the green colouring of the plumage. As an example we select the Groove-billed Araçari (*Aulacoramphus velentus*). In the peculiarly narrow and attenuated form of the bill, and the deep and decided grooves, along its sides, this species differs from all its congeners. Its precise habitat (says Mr. Gould) is still unknown to me, but I believe it to frequent the country to the northward of the river Amazon, between Guiana and the Caracas. It is a rare species, and is wanting in many of our European collections The beak has the upper ridge red, the sides black. The under mandible is black, passing into red at its base. Two furrows run along the side of the upper mandible, and one along the sides of the under. General colour green with a wash of blue below the eye; throat, white; plumage of both sexes alike.

We may add, in conclusion, that eight or nine specimens of Toucans and Aracaris have been living at different times in the gardens of the Zoological Society. In their manners they were gentle and confident, and readily lost all alarm at the close approach of a concourse of bystanders attracted by their novel appearance. With this familiarity they combined considerable playfulness of disposition, and amused themselves much in the same way as kittens, or puppies in a large aviary. Hence we readily believe the statements of travellers, who assure us that they may be taught tricks and feats like parrots: and that, although utterly destitute of the power of imitating the human voice, they evince, like those birds, a considerable share of intelligence.

THE GRENOBLE MIRACLE.—Some time ago great noise was occasioned by a pretended miracle on the mountain of La Salette, near Grenoble, consisting of the appearance of the Virgin to a shepherd boy. Two priests of the diocese of Grenoble, M. Delion and M. Carteret, published pamphlets in which they laboured to prove that there had been no miracle at all, and that the person whom the boy had supposed was the Holy Virgin was a young female named Lamerlière. Mdlle. Lamerlière considered herself deserted by her protectors, and a few days ago she brought an action before the Civil Tribunal at Grenoble against the two priests, and against M. Redon, their printer, to obtain 20,000f. damages. The Tribunal, after making a searching examination of all the facts, and hearing lengthened readings, decided that what the deponents had said with respect to her part in the alleged miracle did not constitute defamation; that they had, besides, honestly believed it to be true, and that they had sufficient reasons for so believing. It has therefore dismissed the action

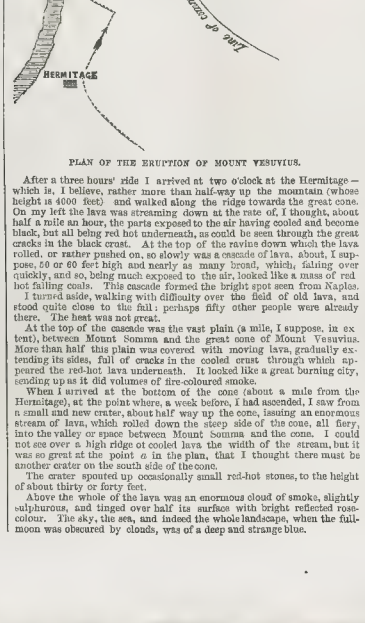
ERUPTION OF VESUVIUS.

(We have been favoured by two correspondents with the following Letters, describing the new eruption of Vesuvius.)

NAPLES, May 2nd, 1855

THE steamer in which I had taken a berth to Leghorn having changed its start yesterday, I was detained unwillingly at Naples. The departure of the steamer at the Russe was not finished, when I observed a general excitement in motion and rushing for hats and shawls, and people said one to another, "an eruption of Vesuvius!" In the streets carriages were already rolling off to the mountain, and crowds had assembled in those spots whence the eruption could be seen.

A slight line of fire down the side of the great cone, a bright spot lower down and just behind the Hermitage, and a great body of rose or orange coloured smoke, formed up the space between Mount Vesuvius and the wall of the old crater (called Monte Somma), reflected a rose-coloured stream across the calm bay almost to Naples



PLAN OF THE ERUPTION OF MOUNT VESUVIUS.

After a three hours' ride I arrived at two o'clock at the Hermitage—which is, I believe, rather more than half-way up the mountain (whose height is 4000 feet) and walked along the ridge towards the great cone. On my left the lava was streaming down at the rate of, I thought, about half a mile an hour, the parts exposed to the air having cooled and become black, but all being red hot underneath, as could be seen through the great cracks in the black crust. At the top of the ravine down which the lava rolled, or rather pushed on, so slowly was a cascade of lava, about, I suppose, 50 or 60 feet high and nearly as many broad, which, falling over quickly, and so being much exposed to the air, looked like a mass of red hot falling coals. This cascade formed the bright spot seen from Naples.

I turned aside, walking with difficulty over one field of old lava, and stood quite close to the fall: perhaps fifty other people were already there. The heat was not great.

At the top of the cascade was the vast plain (a mile, I suppose, in extent), between Mount Somma and the great cone of Mount Vesuvius. More than half this plain was covered with moving lava, gradually extending its sides, full of cracks in the cooled crust through which appeared the red-hot lava underneath. It looked like a great burning city, sending up as it did volumes of fire and coloured smoke.

When I arrived at the bottom of the cone (about a mile from the Hermitage), at the point where, a week before, I had ascended, I saw from a small and new crater, about half way up the cone, issuing an enormous stream of lava, which rolled down the side of the cone, and then fiery into the valley or space between Mount Somma and the cone. I could not see over a high ridge of cooled lava the width of the stream, but it was so great at the point *a* in the plan, that I thought there must be another crater on the south side of the cone.

The crater spouted up occasionally small red-hot stones, to the height of about thirty or forty feet.

Above the whole of the lava was an enormous cloud of smoke, slightly sulphurous, and tinged over half its surface with bright reflected rose-colour. The sky, the sea, and indeed the whole landscape, when the full-moon was obscured by clouds, was of a deep and strange blue.

While I looked at this grand sight, another small new crater near the top of the mountain, which had sent forth a large body of lava in the morning, began again to vomit, and sent down a crackling river of fire.

There was no flame that I saw anywhere, nor did any ashes fall. The heat was not great, even close to the lava, which cools so quickly that we could walk upon it, even while it was red-hot underneath. The air was still, and I heard no noise but the crackling of the moving lava, and occasionally a rumbling, as of very distant thunder. The eruption had begun at half-past four in the morning, but the mountain had been covered all day with a body of smoke, which I took to be a cloud. The last eruption was in 1850, and this has been expected for some months. G. C.

NAPLES, May 5, 1855.

AFTER the lapse of now five years, Vesuvius has again burst forth with most destructive violence. It is an event which has been anxiously waited and hoped for during the last year, for the stillness of the mountain, and the occasional drying up of the wells, and the shocks of earthquake which have taken place more or less remote from Naples, have led people to desire an eruption as the less of two evils. What if the prediction should be verified that this is the Italian city to be destroyed this year, and that this vast mass of human souls who now live upon a mere crust, should sink into the abyss which is known to exist beneath! To many, then, it was a relief when the chief guide of the mountain announced that as he was ascending on the morning of the 1st May, at half-past four o'clock, he heard, as it were, a discharge of artillery, and saw fire and stones being thrown up from several new openings. The intelligence spread like wildfire through the city, and the evening was looked forward to with intense interest for a confirmation of the guide's report. As Ave Maria was tolled, thousands were pouring down towards the Mola, Santa Lucia, and other spots whence a good view could be obtained: as we turned round by the Swiss guard-house, we came to a stopping, the whole heavens appeared to be on fire. Scarcely any portion of the mountain was visible, for as the wind was rather a Sirocco, the dense swelling clouds were congregated about its summit and its sides, so as to conceal the cone, and render the scene as mysterious as it was grand. The flames which were thrown up, too, were only perceptible from their effects, being reflected from cloud to cloud, until the sky appeared to be one mass of flame. In the centre only was there any opening, and there might be seen a portion of that burning stream which was now pouring down on the devoted country beneath. Not content with the distant view, we resolved the next night on going up the mountain. It was one continued line of carriages, donkeys, horses, and pedestrians, which we joined, and with which we ascended to the Hermitage. Crowds were coming down, having already satisfied their curiosity, with their torches streaming wildly in the air; and, shouting or shrieking, or else singing in a chorus of a hundred voices some *canzonetta* in a minor key, added vastly to the mental picturesqueness of the scene. From the Hermitage a road leads over beds of volcanic deposit in the direction of the cone, to the foot of which is, perhaps, an hour's walk. Diverging, however, from this road, we traversed, on the left, what appeared now to be a mass of coke—the deposit of last night. It was still hot. We took up huge pieces of the lava, and the fire glowed beneath us. We threw in paper, or other combustible matter, and kept up a continual flame. At last we came to the edge of a cascade of fire, over which the burning stream precipitated itself into the abyss beneath. It is this point of view we have undertaken to represent, in preference to a more distant one, which, though it might have given a pleasing general effect, would have conveyed no adequate idea of the gorgeous spectacle on the mountain Divided by an imaginary line only from the stream which was flowing down, we looked on the cataract I have endeavoured to describe. A plain of burning coke, some 200 feet wide, was moving on before our eyes, almost touching our feet; until, accumulating in large masses, over it tumbled into the valley beneath. Down, down, we watched the red line in the distance, burning and destroying every thing it met with. A whole plantation of chestnut trees yielded to its power: they twisted, and screeched, and groaned, like martyrs in an *auto da fé*, and then gave signals by their gallant flame that their sufferings were over. Moving away from this point, we descended a little, by jumping from mass to mass, and crossing channels of fire, until we were in face of the cataract. The noise of the advancing stream was as that of an Alpine flood over a shingly bed—shi-she-shi: such was the continued murmur of the thousands of tons of burning coke which were ever moving on, and tumbling mass over mass. The outer crust here and there became cooled and blackened and then, clutching itself, the burst of heat and light was again evident, for a moment to blast and scorch the involuntary who held up our hands as if to shield ourselves: but, unable any longer to resist it, were compelled to retire. The figures on the side of the cataract represent our position as we looked into the boiling gulf. Clouds of red smoke issued from it, reminding one of what Mount or Danby has done. Behind me, with a group of soldiers, are their Majesties and two of the Princesses *in portantini*. The Hereditary Prince is on foot; and a crowd of soldiers, policemen, and couriers are around. After gazing on this wondrous spectacle for an hour or two, we lighted our cigars in the pre-sence of the soldiers, and came. "This dangerous," said some: "parties have just turned back." But we were bent on seeing it; and, taking a man who was selling pieces of copper which he had incrusted with lava for our guide, we returned to the main path which the torches indicate the road by which we ascended. As we began to mount the cone, before and behind us the view was startling. Crossing, as before, the deposit of yesterday, we placed ourselves close to the edge of one of the six mouths which are now opened on the side. one other has opened more in the rear, and is, therefore, invisible. The main crater was inactive, throwing out only smoke. The next below it threw out red-hot stones and fire. The others were pouring out tons of lava: and the one by which we stood threw out also stones, some of which fell amongst us. The surface around it was red as a heated copper boiler, and destructive indeed were the ingredients which were seething within. As material was thrown out, the noise was like the discharge of distant artillery, and so it continued without interval. Neither pen nor pencil can describe the scene which presented itself on looking back. Two streams of lava were flowing down the cone, their crisped undulations being strongly marked. Down they went, serpent-like, into the valley we had passed through, until, after the cataract we have described, they were hurled over. The form of the whole length of the main stream was that of the letter S, and, until it reached the cataract, measured between one and two miles. The background was composed of red, ready looking clouds, which rose from the crater, and gave a mysterious aspect to the scene. Above the mountain on the right we have placed the moon, which was eclipsed the first night after the eruption: she is looking down as cold as any Stoic on the ruin that is going on below. Torches were scattered about, and no vast number that the mountain appeared to be covered with glow-worms. A hundred remarkable points of view presented themselves, but we have selected that which, to our imagination, was the most striking. In short, we can think of nothing else: it dazzles our recollection, as it did our eyes, and were we to live a thousand years we could not forget that wondrous spectacle.

The Second View represents the mountain from an entirely different point. As the first is taken beyond the Hermitage, looking down on the cascade and up to the cone—this sketch is taken from the bottom of the Valley of Vesuvius, in the midst of burning vineyards, and close to the villages of Pollena and Massa di Somma. The mountain, in the foreground, is so elevated that the cone is thrown back, and is perfectly invisible. This locality is on the north side of the mountain; and as the lava has now descended into the plain, we resolved to go with the tens of thousands who were all tending in the same direction. The scene, as we approached nearer and nearer, was more remarkable than we can describe. the roads were full of carriages, jammed so closely together that it was impossible to move on. The windows and doorways of every house we passed were crowded as at a fair. Leaving our carriage at Pollena, a walk of a quarter of an hour brought us to the bed of the winter stream of Vetrana—and those who know Italy know exactly such a bed and such a stream are. Turning sharp off to the left we came on an embankment of lava of from one to two hundred feet in depth or thickness. As the mass accumulated from one moment to another behind it, gigantic fragments of the outer crust fell off, and showers of liquid lava came pouring down, swelling on to overflow first, and laying the basis for a fresh embankment. Vineyards were burning right and left, and the axe of woodcutters, now past midnight, resounded in every direction, in the forlorn hope of saving something from the ruin. Soldiers and guards were mingled with the crowd to keep order, to preserve life, and to be in readiness to break down a bridge which might impede the lava, and thus diffuse it more widely. Leaving this spot, we ascended through grounds teeming with the abundant produce of an Italian spring, now trodden under foot, and walking on the edge of a precipice from which we looked down on a river—nay, sea—of fire which flooded down beneath us, we arrived at the spot from which we have endeavoured to give what is a most fair representation of the most marvellous spectacle that the eye can gaze upon. We looked down into the valley 150 feet beneath us, filled in the winter by water, now by boiling red hot lava; the width of the stream being in many parts 200 feet. Supporting ourselves

DARING ATTEMPT to FORCE OPEN one of CHUBB'S FIRE and THIEF-PROOF SAFES.

"Wadham Hill, Wolverhampton,
"Feb. 9, 1855

"Gentlemen,—Last night some thieves broke into our office, and made a violent attack upon our iron safe, which is one of your fire and thief proof manufacture, and contained a large sum of money, which they failed. From the dishonest condition of its lock, and the appearance of several very strong housebreaking instruments which they had left in their attempts, and left behind them, it is certain that the thieves spared no efforts in their endeavours to force it open; but we have much satisfaction in informing you that, owing to the great strength of your safe, their object was entirely defeated.

"We are, gentlemen, your obedient servants,
"T. and S. JONES.

"Messrs. Chubb and Son, 57, St. Paul's Churchyard, London."

CHUBB'S LOCKS, with all the newest improvements. Complete Illustrated Lists, with sizes and prices, will be sent on application.
Chubb and Son, 57, St. Paul's Churchyard, London; 28, Lord-street, Liverpool; 16, Market-street, Manchester; and Horsely-fields, Wolverhampton.

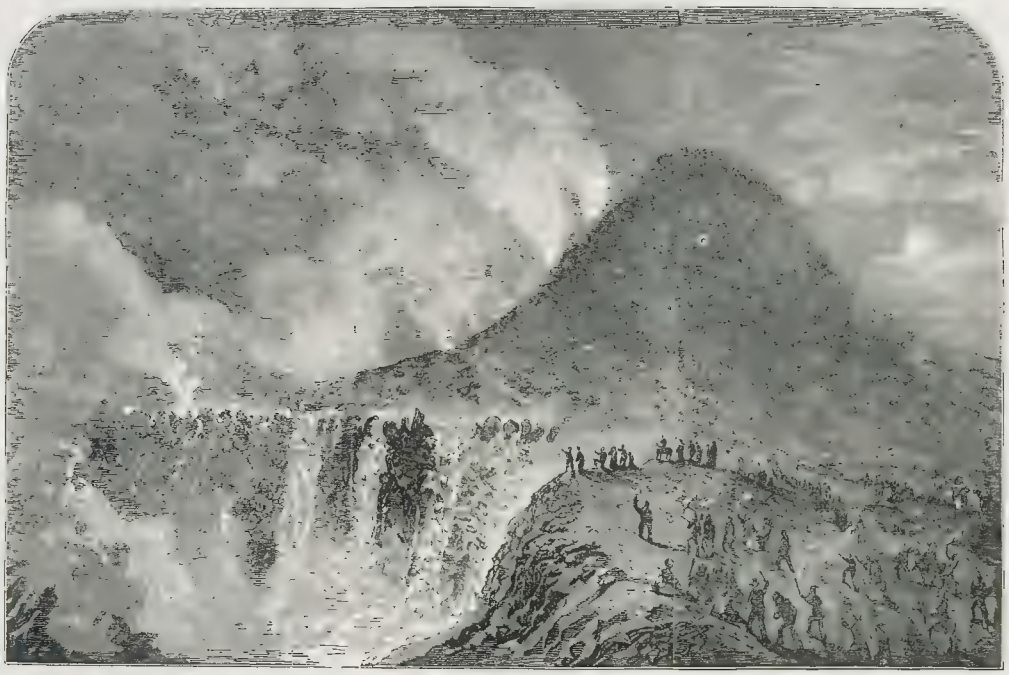
FOR INDIA, THE CRIMEA, ALDERSHOTT, AND TRAVELLING GENERALLY.
PATENT FUSED CANDLE COOKING LAMP.—Will boil or stew a pound of meat in one hour—boil water, coffee, tea, &c., giving at the same time a most brilliant light; in fact, a complete kitchen in a box, forms a reading or bed-room Lantern.
The Patent Fuse Cand as can be instantly ignited as a lucifer; are made of hard stearine; will keep good for years in any climate
The cost in using is less than one halfpenny per hour; the weight of the lamp complete—with one canister of candles sufficient to last a month, supposing the lamp to be in use eight hours per day—not exceeding two pounds.
The size of the two together is ten inches broad, ten inches high, and six inches wide, promptly fit to be [illegible] portable, effectual, and economical lamp that has yet been invented for the army and the public generally.
Sold Wholesale by the Patentee, at 53, Albany-street, Regent's-park, London, and Palmer and Co., Great Queen-street; Retail: imported by Beach, Son, and Nephew, 37, Lime-street, City; Retail by Darby, Lamp-dealer, Ivy Lamp-dealer, Ivy Lamp-dealer, Ivy



ERUPTION OF VESUVIUS, MAY 2, 1855.

(*Continued from page 486.*)

by one of the trees we looked over, and watched the flaming flood rolling down majestically towards the village we had left. Looking upwards, we beheld one continued sheet—a cascade of fire, flame, and smoke, at least 1000 feet in height. We speak in measured terms. It fell into the abyss beneath us and then flowed on as we have described. It is a continuation of No 1. The difference being that this latter view was taken close to the head of the cascade, whilst No. 2 is taken at some little distance, and from below. The dark mountain of Somma, on the left, at times glowed with the reflected light; whilst the right, on which stands the Hermitage, was generally concealed by the vast masses of cloud which the heavy wind swept over it. Right and left are infant currents of lava, destined, perhaps, to increase and commit great havoc. In the foreground are a portion of the multitudes who stood or sat about, gazing intently on the scene; and, whenever there was a grand landslip of lava, shouting with admiration, and almost horror—"Giudizio di Dio!" "Castigo di Dio!" or any other phrase suggested by their highly-wrought feelings. We never can forget that night. At the last moment we have to report that a portion of Mass di Somma has been destroyed; the people are in full flight and there is no indication of the mountain ceasing its ravages.

HENRY WREFORD.

ERUPTION OF VESUVIUS, MAY 4, 1855.

EXHIBITION OF THE HORTICULTURAL SOCIETY, AT GORE-HOUSE, KENSINGTON.

THE HOTEL MUNSCH, VIENNA.

THE Hotel Munsch, at Vienna—the residence of Lord John Russell, during the celebrated Vienna Conferences of March and April, 1855—is a specimen of the grand palatial style of hostelrie of which we only find examples in the great capitals of the Continent. It stands in the Neumarkt, close to the Imperial Palace and the theatres, in the centre of the city, and was formerly known as the Casino. The building is very spacious, built round a square which serves as a court-yard. The apartments are numerous—forming, in parts, extensive suites. The stairs of the principal passages are of stone; the walls are substantial, nearly six feet thick, and the ceilings of all the rooms are domed in brick, so that the whole is fireproof and almost bomb-proof. The Hotel in all its departments is extremely well regulated. There are two dining saloons—one on the principal floor, where the bill of fare is as *recherché* as at the most celebrated restaurants of Paris; the other on the basement, where all is excellent, but more moderate in price. Lord John Russell and suite occupied the whole of the upper part of the building—about thirty-two rooms. In Mr. Munsch English travellers will find an accommodating, agreeable, and, we may add, a *reasonable* host.

HORTICULTURAL SOCIETY.

THE first of the summer exhibitions of this society for the season was held on Wednesday, in the beautiful gardens attached to Gore-house, Kensington, which had been kindly granted to them by her Majesty's Commissioners—it having been found that, of late years, the May meetings at Chiswick have not proved so attractive as they would otherwise have been, owing to the weather not being of that genial nature as to invite a visit to so great a distance from town.

Her Majesty, his Royal Highness Prince Albert, the Duke of Saxe-Coburg, the Princess Hohenlohe, and a numerous suite, visited the exhibition as early as half-past ten in the morning, and the distinguished party appeared much pleased with the whole of the arrangements and the floral and other beauties presented to their view—the fruits and flowers being arranged in two extensive marquees, supplied by Mr. Benjamin Edgington, of London-bridge.

During the afternoon the bands of the Coldstream Guards, the Grenadier Guards, and the 1st Life Guards added much to the general enjoyment, by the excellence with which they performed numerous overtures, marches and other favourite music.

In the floral department, the azaleas were peculiarly attractive, from their great variety of colour, whilst the roses were complete triumphs of horticultural skill. The geraniums were also magnificent, as were the stove and greenhouse plants. The orchids and the fruits were also highly attractive; and, indeed, we do not recollect to have seen better specimens at any former meeting.

Among the attractions of the exhibition was a new Rhododendron (*Rhododendron jasminiflorum*), exhibited by Mr. Veitch, of the Exotic Nursery, Chelsea. We have engraved this extremely beautiful plant. Its form is that of a low shrub, with thick evergreen foliage, and numerous panicles of wax-like flowers of dazzling whiteness. The anthers are of an orange-scarlet, the reflection from which imparts a delicate blush tint to the face of the flowers. The form and texture of the blossom remind one of the favourite *Stephanotis*, or the Jessamine—from the latter of which it derives its specific name. Altogether the plant has a most lovely effect, and it possesses the additional recommendation of a most agreeable fragrance, somewhat resembling that of the auricula. This new Rhododendron is a native of Mount Ophir, in the Straits of Malacca, where it was discovered by Mr. Veitch's indefatigable collector, Mr. Thomas Lobb, growing at an elevation of 5000 feet. Its culture is easy, and it thrives well in the greenhouse.

The following is a list of the prizes, with their value, as given in the various classes for different fruits and flowers:—

[illegible]

The medals granted for the fruits were as follow:—

Pine Apples. 1. S., Mr. Robinson, gardener to Lord Boston. Provid[illegible]
Mr. Clements, gardener to Lord Boston, Baronet. 5th. Sco[illegible]
Forman, Esq., Queen's 30th Regt., S. K., Mr. Gilmore, Hi[illegible]
Farming gardener to the Duke of Sutherland, Moss-w Queen, 2d. Sco[illegible]
Peaches and Nectarines. S. G., Mr. Fleming, gardener to the Duke of Sutherland.
Potted Vegetables. S. K., Mr. Savage, gardener to [illegible]
Robertson, gardener to Lady Dorothy Nevill, Hybrid [illegible]
White Grapes. 1. S., Mr. Brady, gardener to Sir S. M. Peto, S. K., Mr. Cumming, S. G.
Mr. Warren, gardener to Mr. Stephenson Ellis.
Black Grapes. 1. S., Mr. Clements, Black Hamburgh, S. K., Mr. Stowe, gardener to W[illegible]

THE HOTEL MUNSCH, AT VIENNA.

JASMINE-FLOWER RHODODENDRON.

Baker, Esq ; S. K. Mr. Ibels, gardener to Sir John Cathcart, Bart ; S. B. Mr Fleming, gardener to the Duke of Sutherland. S B. Mr. Mains gardener to Mrs Oddie; S. B. Mr. Bradly, gardener to Sir S. M Peto.

Figs Mr Bailey gardener to J. S Crawley, Esq., Brown Turkey

Cherries: S. K Mr. Fleming, gardener to the Duke of Sutherland; S B. Mr. Ingram, gardener to her Majesty.

Straw berries in collection: L. S. Mr. M'Ewan, gardener to the Duke of Norfolk, Eleanor, Bivil I., ... ; Vicl ria.

Straw berries (single dishes) S K. Mr. Cox, gardener to J. Hodgson, Esq., Keen's seedling, S B Mr Cumming, gardener to C Mills, Esq ; Prince of Wales

Hare boxes Fruits: L S Mr. Iveson, gardener to the Duke of Northumberland, fruit of the Raspberries.

Miscellaneous S K Mr Fleming, gardener to the Duke of Sutherland, mandarine oranges in pots. ; B. Mr. Constantine gardener to E. Mills, Esq , grapes in pots

The most successful exhibitors of plants in the collections were the gardeners to Sir J Cathcart, Sir Edmund Antrobus, Mr. A. Bassett, Mr. W F. G Farmer, and Mr. Gales Child; and among nurserymen, Messrs Fraser, Mr. Catleuh, and Messrs. Rollisons

Of Greenhouse Azaleas the chief competitors were the gardeners to Mr. W F. G Farmer, Mr. A. Bassett; Mrs. Webb, of Holdenby; Baron Rothschild, and Mr. J. Fullpott; and of nurserymen, Messrs. Lane, Messrs Fraser, and Mr. Gaines

Of Cinerarias the exhibitors were Mr C. B Warner, Mr R S Kerr, Mrs Ellis, Mrs. Webb, Mr Bart ... , Mr Robert Hanbury, Sir E. Antrobus, and Mr J. S. Venn; and Messrs. Veitch and Mr ... E Jones

For Heaths Prizes were awarded to the gardeners of Mr Bassett and Mr Philpott; and to Messrs ... and Messrs Fraser, Messrs Veitch, and Mr. Catleuh.

For Ixoras ... to the gardeners of Mr. J. S. Crawley, Mr A Rowland, Lady Giles Fraser, and to Messrs Lane and Messrs Fraser.

For Orchideæ: To the gardeners of Mr Windsor Mr. Dawkins ... Mr. J Simpson, Mr A. Barrett, and to Mr. Turner, of Slough; Messrs Dobson, Messrs Fraser, and Mr Gaines

For Cucumbers To the gardeners of Mr Turner, Mr. Edward Beck, and Messrs Dobson

FOREIGN AND COLONIAL NEWS.

FRANCE

(From our own Correspondent.)

PARIS, Thursday.

Of course the great event of the day has been the opening of the Palais d'Industrie; an event which, but a few days previously, was not expected to occur before the end of May, or even the 1st of June. A raw, cold, wet morning, ushered in the solemnity; despite which from ten in the morning the crowds who had invitation or season tickets, began to assemble at the various entrances, and from that hour (at which the doors opened) till twelve, when they closed, the building kept gradually filling. Being favoured with an invitation-ticket, we were able, during the interval of nearly three hours that elapsed between our entrance and the arrival of the Imperial cortége, to examine at leisure the general effect of many of the details of the interior. At each end of the building, within the arch which forms the centre aisle, is a transparency one representing France, seated on a throne, calling the nations round her; in the other, the principal figure represents Justice, with Art and Science, and various other allegorical figures of the several nations grouped at her feet and on either side. In front of the gallery which runs round the building are inscribed the names of the countries, with their different standard. As yet there is not a single department complete Here and there certain stalls, if we may so call them, display their contents, wholly or partially arranged as they are to appear, standing amid a wilderness of yet unopened packing-cases. The arrangement of the Centre Aisle is further advanced than the galleries. At one o'clock the sound of cannon announced the departure of the Emperor and Empress from the Tuileries; in about a quarter of an hour they arrived, and were greeted at the entrance by cries of "Vive l'Empereur!" "Vive l'Impératrice!" Their Majesties were received by the Prince Napoleon and the Princess Mathilde, and proceeded to the dais of crimson and gold erected opposite the principal entrance, where they stood surrounded by the Court, the Ministers, the Senate, the Clergy, the *Représentants*, the Generals, &c., &c., while the Emperor pronounced his discourse. At its conclusion, the band (rather inefficient for the size of the building, which, at the entrance of the Imperial couple, had played "Partant pour la Syrie," performed the overture to the "Muette de Portici," while the Emperor and Empress, followed by the Prince Napoleon and Princess Mathilde, and attended by the whole cortége, made the entire tour of the building, and then departed. The Emperor and Prince Napoleon were in uniform; the Empress, and all the ladies who attended her, in full evening attire. Her Imperial Majesty wore a dress of *vert islay*, with lace flounces up to the waist, and a *tablier* of white silk or satin, with *bouillonés* of white tulle. A diamond tiara encircled her head. She bowed right and left during the whole of the circuit. The Emperor, as he walked round, took a survey of the galleries, but seemed to pay little attention to the salutations of the assembly. After the departure of the Court, the spectators, in the galleries, who had been compelled to keep their places during the preceding time, became at liberty to go over the building, and to visit the Palais des Beaux Arts, opened at the same time.

Various fêtes are in contemplation, principally in the official world, for the season of the Exhibition. It is intended, on the arrival of the Queen, to give three of unusual magnificence at St. Cloud, the English Embassy, and the Hôtel de Ville.

It is not yet certain whether or not the Italian Opera will open during the summer; in the meanwhile it is decided that the Odéon will not close, as it usually does. Mdlle. Georges is to give three representations of her great parts in "Rodogune," "Sémiramis," "Une Fête de Néron," and some others. A great theatrical measure, that of the creation of Imperial theatres in the provinces, especially at Strasbourg, Lyons, Rouen, Toulouse, and perhaps Bordeaux, is decided upon. Tragedy and high comedy are to be performed in them on certain days in the week, and it is expected that the high functionaries in these towns will attend them, to a certain degree official).

The custom introduced into England, of mixing, on all public occasions, the French and Turkish standards with the British, has led to the adoption of a similar usage here, which, on certain occasions, has led to some singular rencontres. At the fête of the inauguration of the statue of Jeanne d'Arc at Orleans, the colours which presided at the burning of the heroine of Vaucouleurs aided to do honour to her memory; and, on another occasion, the Turkish flag has been hoisted at a fête dedicated to the Virgin

The excessive dearness of living has risen to such a point here that the poorer classes begin to murmur too loudly not to call the attention of Government to the state of affairs. It is expected that ere long certain measures will be proposed to ameliorate them; daily the evil is rising to a greater pitch; and the continuation of the war, to which is added the excessive backwardness of the season, causes much and painful preoccupation

It appears that on the evening of the day on which the attempt was made on the life of the Emperor, the Empress received a telegraphic despatch from M de Turgot, announcing that he had obtained certain information to the effect that the secret societies were contemplating such a measure. It appears by different foreign journals that an anonymous letter to the same effect was sent about the same time to the Pope. Up to the last, no information on this subject could be obtained from Pianori, but some intelligence has been arrived at in Toulouse, which related to the intention of such an attempt on the return of the Emperor from London.

Preparations have been made in the *orangeries* of the Tuileries and the other palaces in Paris, for placing the orange-trees in the open air, but such is the rigour of the weather that it has not yet been considered safe to expose them. The cold baths on the Seine have also deferred opening; and a few days since, a large flock of swallows, having arrived for the season, felt so little encouraged by the state of the temperature to take up their summer residence in the capital, that, after flying round it two or three times, they again took their departure. Fires continue to be kept up in every house, and winter clothing is almost universally worn.

The sudden death of M. Pleyel, the celebrated manufacturer of pianos and himself a distinguished musician, has excited sincere regret in the musical world. Camille Pleyel was the most intimate friend of Chopin, and a host of celebrities in all branches ranked among the friends and admirers of the man and of the artist.

THE WAR IN THE CRIMEA.

Another week of inaction has passed before Sebastopol:—it is feast the despatches which come down to the 16th relate nothing of much importance. Various sorties have been made by the Russians, as usual, all of which, we are duly informed, have been "vigorously repulsed;" but no indication is given of any movement into the interior. The letters received by the last steamer from Constantinople give some scraps from General Canrobert's address to the French army, at the review on the 26th ult., which show that something is intended. After mentioning that large reinforcements were about to arrive, he went on to say that they would soon be able to enlarge the basis of their operations. "France and England demand the taking of Sebastopol—it shall be taken. If we cannot enter by the gate, we shall enter by the window."

The most precise information regarding the progress of the siege comes from St. Petersburg. According to the *Invalide Russe*, the fire of the Allies, although described as moderate, caused a daily loss to the Russians of 100 to 175.

In a previous despatch Prince Gortschakoff states that on the 3rd of May a division of the Allied armies, amounting to from 10,000 to 15,000 men, embarked in the greater part of the vessels before Sebastopol, and proceeded to sea in a north-easterly direction along the coast. The squadron passed Yalta and the Bay of Kaffa, until it reached the Straits of Kertch; but, after showing itself off that place, appears suddenly to have been recalled, and sailed back to Kamiesch Bay, where it arrived on the 8th of May, without having attempted anything against the enemy. Nothing is said regarding the object of this expedition in any of the recent letters from the Crimea; but private letters from Constantinople explain why it returned in so sudden and unexpected a manner. It appears that the Emperor of the French, without knowing a plan by which all the line-of-battle ships are to be fitted with steam machinery, and utimately the screw. It is not said, however, where the steam machinery is to be made, or by whom. They cannot now get it from England, and, as the greater part of the English engineers and mechanics have returned home, and those that remain still detained in Russia are not adequate to the work—even if they were induced by threats or good pay to work for their country's enemy—it is difficult to understand how the Grand Duke will be able during the present war to transform his dull sailing ships into steamers.

In the meantime he has come down to Sveaborg, where there are half a dozen steam frigates, and it is said to be his intention to proceed with them to sea, to endeavour to pick up some of the ships of the blockading squadron. It is added that each of the steamers will take a line-of-battle ship in tow to cover his retreat if too hard pressed by the English frigates. If this news be confirmed, it will be glorious intelligence for our sailors, who desire nothing better than to catch the Russian slugs out of port, and have a brush with them.

TROUBLES IN RUSSIA

The most important intelligence from St. Petersburg is the alleged resignation of Count Nesselrode, caused, it is said, by his opposition to the war party in the Russian Cabinet

The cautious old Chancellor has, no doubt, good reason to argue in favour of accepting such terms as the Allies have offered. The recent accounts from the Ukraine represent the insurrectionary spirit among impecuniosity as very far from being suppressed. In other parts of Russia the heavy requisitions are causing loud complaints, nor is it at all unlikely that the Government may find it necessary to call a large portion of its army at home, if the disaffection should spread, as is highly probable.

In Poland, on the other hand, where the repressive system has been carried out most rigorously, the Government has all at once adopted the mild method. Letters from Warsaw affirm that measures calculated to give just satisfaction to Poland are impatiently expected there, and that the police has been extremely indulgent; so much so, that people talk freely of public matters at *cafés* and theatres—a thing unheard of before, and which excites the astonishment of all those who know what severity there was before. This, however, may be only a ruse of the authorities for the purpose of ascertaining what the real opinions of the people are, with a view to check any free movement in concert with the Allies.

AMERICA.

The mail-steamer *Pacific*, which sailed from New York on the 2nd inst., arrived at Liverpool on Sunday. The city and state of New York appear to be principally occupied with rival meetings of the friends of temperance and their opponents the retail liquor-dealers and those interested in that trade. The present licenses were to expire on the 8th inst., and would not be renewed. After that date, persons selling spirits in less quantity than five gallons would be liable to a fine of 20 dollars for each offence. The trade were attempting to prove that the prohibition was unconstitutional, and were obtaining legal opinions to that effect. There was to be a great gathering of temperance men in Boston on the 8th, the main object of which would be to make the enforcement of the new Massachusetts prohibitory liquor-law an easy matter. Governor Gardner was to preside on the occasion, and a strong deputation from New York and other States would participate.

Recruiting for the Foreign Legion of the British service is going on vigorously at Boston, under the direction of the Provincial Secretary of Nova Scotia. Although the agents make no secret of their business, the authorities have not yet interfered with them.

The citizens of the Kansas territory expelled their Governor, and summoned the different districts to send one delegate each to Leavenworth city, on the 28th April, to select a new Governor, whose appointment the President of the United States was to be requested to confirm. The expelled Governor, the Hon. A. H. Reeder, has been warmly hailed by public meeting on his return to Pennsylvania

Mr. Soulé, the late American Minister at Madrid, has been received by his admirers at a public meeting in New Orleans, when, in replying to the resolutions of congratulation on his return, this "diplomatic model man" is reported to have made use of the following sentence:—"I come back to you with a heart undaunted by the ire which the mere mention of my name has kindled, the privilege of provoking in the turgid breast of the crowned cut-throat who rules over France, and with a brow on which the most abject and reckless calumnies have not as yet been able to start a blush."

Colonel Kinney, of the Nicaragua expedition, charged with meditating a breach of the neutrality laws, has been held to bail in a sum of 10,000 dols.

The latest news from New Mexico, consist of accounts of skirmishes between the Government troops and parties of Utah and Apache Indians. It would appear that this Indian war will be both troublesome and costly.

In California a Know Nothing convention has been held in Sacramento, at which it was determined to support the nomines of the American party at the next Presidential election; to uphold the Constitution in all its compromises; and to maintain the principles embodied in the Nebraska Bill to their fullest extent

THE OVERLAND MAIL.

The steamer *Calcutta* arrived at Trieste on Tuesday morning, in 131 hours from Alexandria.

The Indian mails bring news from Calcutta of the 10th April and from Bombay of the 17th April. A treaty was signed with Hyder Khan at Peshawar on the 30th March, by Mr. Lawrence, containing three articles:—1. Perpetual peace between Dost Mahomed and the English. 2. The English to respect the territories of Dost Mahomed. 3. Dost Mahomed to recognise the territories of the East India Company. There are rumours of hostile preparations at Ava against the English. There had been fighting between Golab Singh and his nephew. The Afredees have been chastised by Colonel Craigie Lord Dalhousie's health at Ootacamund has greatly improved.

PRESENTATION OF CRIMEAN MEDALS BY HER MAJESTY.

The most interesting sight this generation has witnessed—the distribution of Crimean medals by her Majesty to the officers, non-commissioned officers, and invalided and wounded soldiers returned from the war—took place yesterday forenoon in the Tilt Yard, Horse Guards, with all the pomp and ceremony befitting such an occasion.

In the centre of the parade was a raised dais, or throne. It was two feet from the ground, and was approached by three wide and shallow steps. Her Majesty's chair of state was placed in front, and preparations were made to enable the whole of the Royal suite to occupy their respective positions on the platform. For the accommodation of distinguished and privileged persons, raised seats were erected in front of the Commander-in-Chief's office, the seats being covered with cocoa-nut fibre matting. Her Royal Highness the Princess Mary of Cambridge, the Duchess of Kent, the Duchess of Gloucester, and several of the youthful members of the Royal Family, attended by the Earl of Clarendon, occupied the seats; and there were also present in their immediate neighbourhood, the Right Hon. the Lord Mayor (Sir Francis Graham Moon, Bart.), the Lady Mayoress, the Marquis of Londonderry, the Earl of Mulgrave, Lord Ravensworth, and a large number of the nobility. The Admiralty, the Treasury, and every other building in the Park, were occupied by crowds of persons eager to witness the ceremony.

Her Majesty's suite entered the Park through the the Horse Guards at eleven precisely: the route taken having been from Buckingham Palace, along the Park-road, through the grounds of St. James's Palace, along Pall-mall, Charing-cross, and Whitehall. As soon as her Majesty entered a Royal salute was fired; and her Majesty, having alighted from her carriage, took her seat on the dais, to which she was conducted by his Royal Highness Prince Albert. After the customary ceremony of marching past in slow and quick time, the line formed three sides of a square facing the dais. The names of the officers, &c., entitled to the decoration—commencing with those of the Grenadiers, next the Coldstreams, and then the Scots Fusilier Guards—were called over by the Deputy Adjutant-General, and each person passing in succession was presented with the Crimean medal commemorative of his gallantry. As each soldier came up, Lord Panmure handed to the Queen the medal to which he was entitled, and the soldier, having saluted her Majesty, passed on.

The first medal was awarded to his Royal Highness the Duke of Cambridge. Amongst those who followed were General Sir De Lacy Evans, Lord Cardigan, and Lord Lucan. Captain Sir Thomas Troubridge, who so gallantly fought at Inkerman, was wheeled up to the throne in a Bath chair. Sir Thomas was loudly cheered as he received the medal from the hands of the Queen; as was Captain Maude, who was most miraculously saved from destruction a shell having struck and exploded upon the right shoulder of his horse, which was killed on the spot, a piece of flesh being forced into the eye of the gallant Captain, which has destroyed his sight, portions of the shell in bursting also wounding him in the right arm and leg, but not dangerously.

In less than an hour her Majesty had distributed 300 medals to as many officers and men. At the close of the ceremony another salute was fired, the National Anthem was played, and the Queen and her suite proceeded through the Park to Buckingham Palace, where she arrived a little after twelve o'clock. Near Royal Highnesses the Prince of Wales and the Princess Royal were with her Majesty on the platform.

CURIOUS PROPHECIES ON THE WAR.

The Rev. Dr. Cumming begs to enclose to the Editor of the ILLUSTRATED LONDON NEWS the following very curious old predictions, which, in reference to our present position, must interest.

7, Montague-place, May 14

The Rev. Dr. Cumming quoted, in the course of a series of lectures he has been giving, in Halkin-street, Belgrave square, the following remarkable anticipation of present events—such, he said, as of inspired prophecies, but as proofs of early and sound interpretation of inspired prophecy. The following lines he quoted from an old volume of predictions, written in the fifteenth century. In 1453 the Turks took Constantinople. The poet says

In twice two hundred years, from that date,
The Crescent will assail:
But, if the Cock and Bull unite,
The Bear will not prevail.

But mark, in twice ten years, 254
Let Islam know and fear—
The Cross shall stand, the Crescent wane
Dissolve, and disappear

The rev. lecturer also quoted from a work in the Augustinian monastery at Rome, entitled, "De finibus mystice mixis, 1675," in which are these remarkable words:—"Before the middle of the nineteenth century sections will be excited everywhere in Europe; famines, pestilences, and earthquakes will spread desolation over many cities. Rome will lose her sceptre the Pope will be driven captive by his own people. A prince from the North will overrun Europe; his sword will vigorously defend the church, uphold the orthodox faith, and subdue the Moslem"

These, said the lecturer, were plainly drawn from inspired prophecy. Their fulfilment is evidence of their origin.

[NOTE OF THE EDITOR. Perhaps Dr. Cumming will inform the world of the title of the "old volume," written in the fifteenth century, and further state where it may be seen? Without such information, "the cock and bull," referred to in the "prediction," will be applied, we fear, both by good and by ill-natured readers, to designate the character of the Rev Doctor's communication to our columns.]

OBITUARY OF EMINENT PERSONS.

REAR-ADMIRAL CHRISTOPHER STRACHEY

The death of this gallant naval officer occurred on Saturday, the 5th inst. He was in the seventy-second year of his age, and had been above sixty years in the Royal Navy. During that lengthened period he greatly distinguished himself, and received a medal for his services afloat, besides the Order of St. Vladimir, conferred on him by the Emperor Alexander of Russia. In 1803, when commanding the *Minos* sloop, while in company with the *Amaranthe* and *Cruiser*, he fought a brilliant action off Cape Blanc Nez, and captured a brig and schooner of war. In 1807 he assisted at the defence of Dantzic

Admiral Strachey was fourth son of the Venerable Archdeacon John Strachey, and grandson of George III.; whose eldest brother, Sir Henry Strachey, Bart., was created a Baronet in 1801. The Admiral married Mademoiselle Marguerite, daughter of the Chevalier de Rocha, of Verdun-sur-Meuse, Knight of Malta, and leaves, with other issue, a son, the present Leonard Marcus Strachey, Esq., of Bowman, county Gloucester

WILLS AND BEQUESTS.—The will of the Right Hon. John Wilson Patten, M.P. for Lancashire, late Lord Winmarleigh, the Right Hon. Joseph Planta, C.B., late Principal Librarian of the British Museum, under £14,000; Major-General Henry Wm. Adams, C.B. of Aldershott, £18,000; Joseph Levick, Esq., Bristol, £70,000, which he bequeaths to the Bristol Infirmary.

CHARITABLE BEQUESTS. The Rev. Sheldon Jodrell, M.A., Rector of Sedgeford, Norfolk, has bequeathed to the Society for promoting Christian Knowledge, £300; Propagation of the Gospel in Foreign Parts, £300, Church Building Society, £300; Norfolk and Norwich Hospital, £300; Blind Institution, Norwich, £300; Eye Infirmary, Norfolk, £100; Norfolk and Norwich Magdalen Asylum, £100. The late Mr. John Ward has left £300 to the London Missionary Society, and £200 to the Baptist Mission, and bequests to the Home Mission, Irish Evangelical Society, Missions, Continental and other societies. Jacob Post, of the Society of Friends, left personalty, £16,000, and bequeathed a legacy to each of the places of worship near his residence at Islington, namely, the parish church, Islington Green Chapel, Baptist, Wesleyan, Irvingites, Presbyterian, and Roman Catholics

WHAT NEXT? A lady, connected with one of the principal churches in the New Town, Edinburgh, having become enfeebled in health, and unable to leave her bed, felt her inability to join in the public exercises of devotion one of the greatest deprivations. An ingenious friend suggested that she should take a house adjoining the church, and have a gallery perforated to be led to her bed. The suggestion was carried into effect, and now in the solitude of her sick chamber she listens to the public ministrations of her spiritual adviser. —*Caledonian Mercury*

EXECUTION OF PIANORI.—Pianori was guillotined at five o'clock on Monday morning, in front of the prison of La Roquette, near Père la Chaise Although the morning was wet and cold, and although no public announcement of the day of execution had been made, a very large number of people were assembled. Up to a late hour on Sunday night the authorities repeated to him an offer which had been frequently made—that his life should be spared if he would discover his confederates. His only answer was, that he had no revelation to make.

IMPERIAL PARLIAMENT.

(Continued from page 475.)

HOUSE OF LORDS.—THURSDAY.

This being Ascension-day no business was transacted in their Lordships' House.

HOUSE OF COMMONS.—THURSDAY.

Sir C. WOOD, in reply to Mr. Otway, said, that despatches had been received from Sir E. Lyons with respect to the naval attacks on the forts of Sebastopol, but they contained nothing of any importance; and, in such cases, it was not usual to lay them on the table.

Mr. J. G. PHILLIMORE moved the second reading of the Public Prosecutors Bill.

Lord PALMERSTON, in the absence of the Attorney-General, moved as an amendment that the whole subject, which was one well deserving the consideration of the House, should be referred to a Select Committee.

After some conversation, Mr. J. G. Phillimore assented to the amendment, and to the postponement of his bill for six months, with the view of carrying out the suggestion of the noble Viscount.

Mr. DEEDES moved the second reading of the Parish Constables Bill, the object of which was to compel parishes to appoint superintendent constables in counties in which the Rural Police Act was not brought into operation.

Mr. RICE opposed the bill, thinking that such a measure should emanate from the Government.

Sir J. TROLLOPE moved that the bill be read that day six months.

Mr. COWPER said, he would support the bill with a view to its being amended in Committee.

After some discussion, the amendment was withdrawn, and the bill was read a second time.

The Personal Estates of Intestates Bill passed through Committee.

Lord J. RUSSELL obtained leave to introduce a bill to enable her Majesty to assent to a Bill, as amended, of the Legislature of New South Wales, and to grant a Civil List to her Majesty.

Mr. LOWE contended that, if the bill passed, it would defeat the very object which it had in view, that of giving a new Constitution to New South Wales, and would in its operation defeat all attempts at good government in the colony. He suggested that all the Australian Bills should be sent to a Select Committee.

Lord J. RUSSELL objected to sending those bills to a Select Committee, thinking that such a course would be unjust to the colony.

Mr. DUFFY and Mr. W. WILLIAMS opposed the bill.

Mr. J. BALL defended the measure.

Lord J. RUSSELL also obtained leave to repeal the acts of Parliament now in force respecting the disposal of the Waste Lands of the Crown in her Majesty's Australian Colonies, and to make other provision in lieu thereof. The two bills were brought in and read a first time.

HOUSE OF LORDS.—FRIDAY.

Earl GREY postponed his motion relative to the late Conferences at Vienna until next Friday.

ADMINISTRATION OF THE ARMY.

Lord PANMURE submitted his plan for the consolidation of the civil departments of the army. He said, on such an occasion it would be difficult for him to bring forward his plan without congratulating the Lordships on the scene which had been witnessed in St. James's-p. e this day. It was the first time that the Sovereign of this country had condescended to bestow with her own hand distinctions for military service, not merely on officers of high rank, but on the very humblest soldier, and he trusted that gratifying spectacle would be frequently repeated. It was intended by his plan to abolish altogether the office of Master-General of the Ordnance and the Board of Ordnance. To abolish those offices, it was only necessary for her Majesty to issue a few letters patent to that effect; and the only matter which would require the intervention of Parliament was to effect a transfer of the land which was now held by the Board of Ordnance in connection with that department. The noble Lord then proceeded, at considerable length, to state the details of his plan, which was in substance the same as that announced on a former evening by Lord Palmerston in the House of Commons.

Lord ELLENBOROUGH and other noble Lords generally approved of the proposed change.

HOUSE OF COMMONS.—FRIDAY.

Sir M. S. Stewart, Bart., took the oaths and his seat for the county of Renfrew, and Sir J. Ferguson, Bart., for the county of Ayrshire.

Mr. HUME inquired, what progress had been made in the formation of a foreign legion.

Mr. PEEL said that about 13,000 had been enlisted, and that others would be added as speedily as possible.

UNSTAMPED NEWSPAPERS.

Mr. CRAUFURD asked the Chancellor of the Exchequer whether orders had been sent from London to seize the presses of Mr. Henderson in Glasgow for publishing an unstamped newspaper; and, if so, whether that order was generally against Mr. Henderson, or against any other parties in Scotland?

The CHANCELLOR of the EXCHEQUER said that proceedings had been taken against Mr. Henderson, but his presses had not been seized, nor the presses of any other person.

CAPTAIN CHRISTIE.

Mr. FERGUS called upon Mr. Layard for some explanation of a statement he had publicly made, in which he preferred several serious charges against Captain Christie. That gallant gentleman was the person responsible for the filthy condition of Balaclava harbour, that he was upwards of seventy years of age, and was quite incompetent to the discharge of his duties; several letters had been sent to Mr. Layard, but he had given no answer. Captain Christie had been removed from earth, and neither slander nor praise could reach him, but it was a matter of anxiety to his friends, and he wished to know whether he had received the letters, and whether he had returned any answer.

Mr. LAYARD, after challenging the House not to indulge in the unseemly language which discredited its members when he was last upon his defence, said that when he was living on board the *Agamemnon* he had frequent opportunities of seeing Captain Christie, and his impression was that he was seventy years of age. Mr. Christie, the captain's brother, wrote him an intemperate letter, which he afterwards saw in the newspapers. After publication he considered himself absolved from taking any further notice of it. He afterwards received a letter from Captain Christie, which was evidently written under a mistake, and to which he replied. The honourable gentleman referred to the evidence taken before the Sebastopol Committee in reference to the connection of Captain Christie with the harbour of Balaclava. Turning to Sir James Graham, he said that the right hon. Baronet had remarked, in the course of his evidence before the Committee, in a tone which could not be mistaken, "Captain Christie died of a broken heart." He (Mr Layard) had been accused of being the murderer of Captain Christie. If any one had treated Captain Christie as he was First Lord of the Admiralty, of whom it had been truly said that, if you wanted to put a bad case into good hands, you should go there. He warned those gallant officers who tried to hunt him down, and who sat in that House, unwilling to assist in fighting their country's battles, that, though they might crush him, they would never destroy the great movement with which he is identified.

Sir J. PAKINGTON said, the charges made against Sir J. Graham were totally unfounded. He believed that if Mr. Layard was crushed, it would be to himself that he crushed it.

Mr. BRIGHT defended Mr. Layard.

Sir J. GRAHAM said, he cared little for the remarks of the hon. member for Aylesbury; but he felt that a debt of justice was due to the memory of a gallant man. He (Sir J. Graham) was responsible for the appointment of Capt. Christie, who was totally unknown to him, except by reputation. He bore a high and honourable character in the gallant profession to which he belonged. Two faults were alleged against Capt. Christie first that he did not exercise a sound discretion in reference to the transports on the coast at the time of the storm on the 14th of November; and, secondly, he had made a serious mistake in ordering a portion of Turkish troops, bound for the Crimea, to go to Balaclava instead of to Eupatoria. Such charges having been made, he ordered a court-martial, believing that course to be preferable to allowing him to be subject to the ordeal of the Sebastopol Committee. He admitted that when he was before the Committee he looked on the hon. member for Aylesbury full in the face when he said Captain Christie was a broken-hearted man. He hoped the lesson the hon. gentleman had received would not be thrown away.

Mr. CRAWFORD said, that if Captain Christie died of a broken heart, it was in consequence of being superseded, and ordered to take his trial by court-martial both which acts were those of Sir James Graham.

Admiral BERKELEY spoke in favour of Captain Christie.

After some further conversation, the subject dropped.

EDUCATION (SCOTLAND) BILL.

The adjourned debate upon the second reading of the Lord Advocate's Scotch Education Bill was then resumed.

After a prolonged debate the House divided, and the numbers were—For Mr. C. Bruce's amendment, 142; against it, 159: majority against the amendment, 7.

The Committee on the Bill was then postponed until after Whitsuntide.

RENFREW COUNTY ELECTION.—Michael Shaw Stewart was elected M.P. for the county on Monday last, without opposition on the room of Colonel Mure.

A MEETING of Protestants was held yesterday at the Amphitheatre, Liverpool, Dr. M'Neill in the chair, to discuss the propriety of continuing the endowment of the College of Maynooth.

METROPOLITAN NEWS.

RESULTS OF METEOROLOGICAL OBSERVATIONS

TAKEN DURING THE WEEK ENDING THURSDAY, MAY 17.

Month and Day.	Corrected Reading of Barom. at 32° & M	Thermometer. Highest Reading.	Thermometer. Lowest Reading.	Mean Temperature of Day.	Departure of Temperature from Average.	Degree of Humidity.	Direction of Wind.	Rain in Inches.
	Inches.	°	°	°	°			Inches

„ 16	29.771	61·4	41·5	49·5	— 2·1	87	N.W.	0·03
„ 17	29.872	61·0	37	44·5	— 8·3	88	N.W.	0·01

NOTE.—The sign — denotes below the average. The numbers in the seventh column are calculated on the supposition that the saturation of the air is represented by 100.

The reading of the Barometer increased from 29.34 inches at the beginning of the week, to 29.81 inches by the the 12th; decreased to 29.33 inches by the 13th; increased to 29.66 inches by the 14th; decreased to 29.53 inches by the 16th; and increased to 29.91 inches by the end of the week. The mean for the week at the level of the sea, was 29.716 inches

The mean daily temperatures have been below their average values on every day since April 20, in quantities varying from 1° to 11·2°; the mean deficet for the period averaging 5·7° daily. The effect of this continued cold weather is shown in our health report, below.

The mean temperature of the week was 45·1° being 6° below the average

The range of temperature during the week was 31°, being the difference between the highest reading on the 11th, and the lowest on the 14th

The mean daily range of temperature during the week was 16·9°.

Rain fell during the week to the depth of nearly nine-tenths of an inch

The weather throughout the week was dull and gloomy, and for the most part overcast all the time. On the 11th, at 3h. p.m., a thunderstorm occurred, with heavy peals of thunder and vivid flashes of lightning; and about 4h. p.m., the atmosphere was unusually dark and dense for a short time.

Lewisham, May 18, 1855. JAMES GLAISHER

HEALTH OF LONDON.—Within the week ending May 12, the births of 909 males and of 769 females were registered within the metropolitan districts—in all, 1678 children; the average number for the preceding ten years, in the nineteenth week of the year, are 737 boys and 730 girls. The number of deaths within the same districts, in the same time, in the same districts, was 1183—viz., 610 males and 567 females: the average for the same week of the year, from the records of ten years, are 494 males and 489 females,—or together, 974 deaths. In order to compare this number with that of the deaths of last week, it is necessary to increase it in the proportion of the increase of population, and thus increased it becomes 1074; a number less by 112 than the number of deaths; thus showing the effect produced on the public health by this backward spring and cold weather, owing to which about 15 deaths daily have occurred lately above the numbers for the season.

INSPECTION OF THE NEW METROPOLITAN CATTLE-MARKET.—The Right Hon. the Chancellor of the Exchequer, Sir George Cornewall Lewis, visited the New Metropolitan Cattle-market, at Copenhagen-fields, on Saturday. The first market-day for the sale of cattle in the new Metropolitan Cattle-market will be on Friday, the 1st of June. The inauguration will take place a few days earlier.

THE CITY of London lease of the manor of Finsbury, held of the Prebendary of Finsbury, in the Church of St. Paul, for a total period of about 700 years, is about to fall in, and the large rental of Finsbury square, and the adjoining streets, will belong to the Ecclesiastical Commissioners.—*Land and Building News.*

SUPPRESSION OF MENDICITY SOCIETY.—On Saturday last the annual meeting of this society was held at their rooms, in Red Lion-square; the Marquis of Westminster, president, in the chair. After a few introductory remarks from the noble chairman, the report was read. It stated that the results of last year's operations were favourable to the society, the war, the demand for labour, and emigration, having diminished the pressure on its resources. The registered cases of applicants with ticket at the office had fallen from 419 in 1853, to 329 in 1854. The unregistered cases fell from 761 to 601. The receipts of the year amounted to £2244 2s. 11d., and at its close there was a balance in hand, and at the bankers, of £736. The adoption of the report was carried unanimously.

ST. JOHN'S HOUSE TRAINING INSTITUTION FOR NURSES, QUEEN-SQUARE, WESTMINSTER.—On Tuesday the seventh annual meeting of this excellent institution was held; the Bishop of London presided, and the Bishop of Oxford and several other influential members of the establishment were present. The Bishop of London observed that the institution had made rapid progress during the past year, and that the painful interest felt last autumn throughout the country in the sick and wounded soldiers in the hospitals at Scutari, had done more to make known the existence and objects of St. John's House than had been done in all its previous history. In the sudden emergency, which the Government had determined to send sisters and nurses to the East, the council placed the St. John's House and its resources at their disposal, and in forty nurses had already gone, and others were preparing to follow them, to the several hospitals in the East. Of those, six were now at Smyrna, four at Scutari, ten at Kululee, two at Therapia, one (the senior nurse) at Balaclava—one had died, and four had returned to England. Besides the extraordinary work abroad, the nursery had also been fully occupied at home. Two hundred sick persons had been attended in the past year, and the most satisfactory reports of the nurses had been received from all quarters. A large number of poor persons had received constant nursing and food; some of them uninterruptedly during the whole of the year. They had also taken charge of the men's cholera ward in Westminster Hospital, day and night, during the prevalence of that disease. The Rev. C. F. Shepherd (the master) read the report of the council, by which it appeared that the house at present numbered forty-two members—viz., four resident sisters, seven associate sisters, twenty-five nurses, and six probationers. The balance-sheet showed that the total income of the house during the past year amounted to £3,693 18s. 11d., of which upwards of £300 consisted of extraordinary donations towards the fund for sending nurses to the East. The total expenditure in the same period amounted to £3641 11s. 5d. The report was adopted.

THE ROYAL ORTHOPÆDIC HOSPITAL.—The fifteenth anniversary festival of the Royal Orthopædic Hospital was celebrated on Wednesday last, at the Freemasons' Tavern. The chair was taken by the Marquis of Westminster, vice-president of the hospital, and the company at the cross table included Lord Robert Grosvenor, M.P., the Rev. Mr. Mackenzie, Mr. Charles Harris (the founder of the hospital), Mr Tamplin (the principal surgeon), and other gentlemen immediately connected with the institution. After the usual loyal and constitutional toasts, the noble chairman proposed the toast of the evening—"Success to the Royal Orthopædic Hospital," in a very able speech, seasoned with much humour and many classical allusions. The noble chairman concluded the proceedings by proposing the health of Mr. S. Maskell, in acknowledgment of his zeal and assiduity as secretary to the hospital. The subscriptions announced amounted to the sum of £2100.

POLYTECHNIC INSTITUTION.—The Queen has been graciously pleased to forward, through Colonel Phipps, to Mr. Pepper, the resident director, the sum of £100, as an acknowledgment of her Majesty's approbation of the various entertainments presented on the recent occasion of the Royal visit to this institution. Her Majesty has also been pleased to purchase a photograph exhibited in the institution the same evening the subject being an artistic design representing a soldier who had lost an arm at the battle of Inkerman, and whose child—a little girl of some six or seven years of age—is looking up into his face with an expression of grief at her father's misfortune. The picture conveys the portrait of Sergeant Dawson, who, it may be remembered, was promoted for his bravery at the battle of the Alma.

MARYLEBONE LITERARY AND SCIENTIFIC INSTITUTION.—A handsome silver inkstand has just been presented by the members of the Saint George Literary and Scientific Institution to their President, Mr. Jacob Bell. The presentation took place in the lecture-hall of the institution, at the half-yearly general meeting on Tuesday, the 8th inst., and was witnessed by a crowded gallery of the lady friends of the members. An address, with the names of subscribers, was splendidly emblazoned on vellum by two of the members.

SURREY ZOOLOGICAL GARDENS.—The proprietor of this establishment is preparing for this season exhibition a gigantic modelled picture of St. Sebastopol, executed by M. Danson, from drawings made on the spot, expressly for the purpose. An attempt will be made to give the public an idea of the military operations of attack and defence, as now actually carried on by the belligerent forces; and a considerable number of the well-drilled heroes of the Alma, Balaclava, and Inkerman will assist at the manœuvres and other manœuvres of the siege, which will form the grand feature of the spectacle.

THE HORTICULTURAL FETE AT THE CRYSTAL PALACE.—It appears that the horticultural fete, announced to be held at the Crystal Palace on the 2nd of June, is exciting great interest amongst the florists and private gardeners of all parts of the country. The leading horticulturists, almost without exception, intend exhibiting, and many are keeping back their best plants for the occasion. There is every reason to believe that this will be the finest show of flowers and fruit that has ever taken place. The prizes range from £30 each, and amount in all to above £1000.

BANQUET TO HER MAJESTY'S MINISTERS.

On Wednesday evening the Right Hon. the Lord Mayor and the Lady Mayoress, according to time-honoured custom, entertained her Majesty's Ministers and a numerous and highly distinguished party of ladies and gentlemen at a sumptuous banquet at the Mansion house. The guests began to assemble in the reception-room at six o'clock, and the arrival of the noble Premier and Lady Palmerston was announced about half an hour later. The banquet took place in the Egyptian hall, which was decorated on the occasion with the flags of England, France, Turkey, and Sardinia; and when the whole of the company had assembled, most of whom were attired in their official costumes, the company dessert presented by the brilliant apartment surpassed in dazzling splendour the imposing spectacles for which these festivals have been so long and so justly famed.

Covers were laid for 270, and the company included the Archbishop of Canterbury, Lord Palmerston, the Duke of Argyll, Sir George Grey, Lord John Russell, Sir Charles Wood, and the rest of the Cabinet; the Foreign Ambassadors and a large number of the nobility, and members of the House of Commons, and other gentlemen.

Grace after meat having been said by the Rev. Mr. Moon, the Lord Mayor's chaplain,

His Lordship rose and gave in succession "The Health of her Majesty" and "Prince Albert and the Royal Family."

The Lord Mayor then proposed in terms highly laudatory of their achievements, "The United Fleets and Armies of France and England," with which he coupled "The Health of the Commander-in-Chief and the First Lord of the Admiralty."

Viscount Hardinge and Sir Charles Wood respectively returned thanks on behalf of the two services.

Lord Palmerston, in a brief speech in reply to the toast of the evening—"Her Majesty's Ministers, with which his name was coupled, stated that the British army is as perfect in physical power, in spirit, and in every thing that constitutes efficiency, as any British army that ever took the field.

"The House of Lords and the Duke of Argyll" was acknowledged by his Grace in a very able speech.

Lord John Russell, in replying to the toast of "The House of Commons," with which he was coupled, took occasion to defend that branch of the Legislature from charges brought against it by Lord Ellenborough. He could not believe that Parliament had lost weight in the country. It was calculated that it should have lost weight. He thought the representatives of the people ought to preside over public affairs "with that deliberation, with that weight, and at the same time in that spirit which befits the representatives of a free people;" and he trusted that they would always do their duty, and that the people would have confidence in them.

Several other toasts were given, and the company separated at eleven o'clock.

NATIONAL SPORTS.

RACING will "rule the court, the senate, and the grove" next week; but great as is the amount of money invested on the Derby favourites, the public interest is nothing equal to that felt in the years when Cossack, Surplice, Flying Dutchman, Voltigeur, and West Australian were "household words" for weeks before.

On Monday, nine of Lord Spencer's yearlings will be sold at Tattersall's, including six by his Lordship's favourite Cotherstone. The principal features of the sport at Epsom on Tuesday are the Woodcote Stakes for two-year-olds, nearly all of which are "dark;" and the Summer Handicap, for which eighteen have accepted. Among them are Nabob, 8 st. 10 lb.; Hermit, 8 st. 1 lb.; and Vanderdecken, 7 st. 8 lb. On Wednesday, the Epsom Cup, which produced such a noble contest last year between Kingston and Rataplan, has a very great entry. The latter horse is in it again, along with Nabob, Arbat, Andover, Virago, Scythian, Knight of St. George, Herald, Cossack, &c. As far as we can bear up to the present date, the field for the Derby will not be very large. The starters and their jockeys will include De Clare (Templeman), Greculus Esuriens, or Bonny Mora (Holmes), Noisy (Goater), Lord of the Isles (Aldcroft), Dirk Hatteraick (Kingstown (A. Day), St. Hubert (Wells), Oulston (Maton), Flatterer (Bartholemew), Rifleman (Nat), Wild Dayrell (Custance), Benhams (Clement), and Rotherham (Job Marson). Among the more doubtful division may be reckoned Shoreham, The Cropper, Mosaic, Caracas, Claret, Lord Alfred (Osborne), Rambling Katie (France), and Kylestone (G. Oates). We have, in fact, strong doubts whether more than twenty, if so many, will answer the saddling summons—a very slight array as compared with former years

On Thursday an uninteresting two-year-old stakes and countless plates will make up a conventionally dull afternoon's sport; and the Oaks, on Friday, does not promise to be a very stirring affair. The scratching of Habena has quite taken the fire out of it; and we are assured that she galloped on Tuesday last as well as she ever did in her life. Her scratching is a mysterious business, and we never so much as inquired at any thing, time out of mind, as every one there had backed her. The starters, as far as we can see at present, seem likely to comprise Dame Judith (Aldcroft), Marchioness (Templeman), Mosquito (Bartholomew), Blooming Heather (Charlton), Lady Elton (Osborne), Morgan la Faye (Prince), Capucine (Marson), and Nettie (Marlow). Among the doubtfuls are Beska, Antoinette, Cypriana, Clotilde, and Lady Ann. The performances of the 2000-guinea Nettle are far the best on the list, and she has been heavily backed, although it is rumoured that her tottering position at Tattersall's confirms it) that she has been a little "off" of late. Morgan la Faye has been highly tried, and ought to be very near winning, if the report of Nettle be true. Capucine is a very light thing, and looks more like speed than a distance. Dame Judith is not much backed as yet; and we fancy that none of John Scott's trio are of a very high order. Capucine's running in the 1000 guineas should make her good enough to win the Surrey Foal Stakes, for which Shoreham and Pantaloon will probably meet her.

There are no other racing fixtures on the list for the week, either in England or Ireland; but the Tipperary annual steeplechases will occupy their admirers on Monday and Tuesday, and those at Portumna on Tuesday. Among the yachting appointments for the week are the sailing-match of the Royal Thames Yacht-club, and the Royal Mersey Yacht-club opening trip, on Saturday; while the Cambridge University commences its one-pair oar races on Thursday. The sister University will be engaged on the same day with a cricket-match to wit, twenty-two of Christ Church against the All England eleven; and those who choose to stroll up to Lord's ground on Monday will come in for a one-day match between the Marylebone club and ground against the St. John's-wood Club.

BATH AND SOMERSET COUNTY RACES. TUESDAY

Lansdowne Stakes.—Van Tromp, 1. Octavia, 2

Burwalls Old Biennial Stakes. Oulston, 1. Sandboy, 2

Two-Year Old Biennial Stakes.—Coroner, 1. Stork, —

Somersetshire Stakes. Types, 1. Humboldt, 2

Selling Stakes.—Donna, 1. Pit or Pay, 2. Nobody, 3.

Members' Plate.—Vingt-un, 1. Vandeshoff, 2

WEDNESDAY

Weston Stakes.—Ceres, 1. Sweet Cane, 2.

City Cup.—Captain, 1. Prism, 2.

Dynham-Park Handicap.—Le Jour, 1. Vingt Un, 2

Aristocratic Handicap. Royalist, 1. Waterfall, 3.

Sweepstakes of 5 sovs.—Bordeaux, 1. Leave que Peut, 2

Short's Handicap. Novice, 1. Fearless, 2.

TATTERSALL'S.—FRIDAY EVENING.

DERBY.—5 to 2 agst De Clare (t), 5 to 1 agst Lord of the Isles (t), 5 to 1 agst Rotherham (t), 7 to 1 agst Wild Dayrell, (taken and offered), 10 to 1 agst Kingstown (t), 11 to 1 agst Flatterer (taken 10 to 1), 20 to 1 agst Dirk Hatteraick (offered), 30 to 1 agst Royston (t). Also taken and backed 8 to 1 agst Nabob, and 8 to 1 agst Hermit.

OAKS.—8 to 1 agst Capucine (t), 10 to 1 agst Morgan la Faye (t).

All Mr. Saunders's horses are scratched for the Derby and Oaks.

THE Victoria Rifles will muster for target practice every Wednesday afternoon during the summer, at their shooting-ground at Kilburn.

THE PREVENTION OF SMOKE IN STEAM-VESSELS.—A highly-satisfactory experiment was tried at Portsmouth on Saturday, by Captain Sir Baldwin Joseph Deaman and the scientific officers of her Majesty's yacht and dockyard, on board the Royal steam-tender *Lifey*, with Mr. Prideaux's furnace valves, for the prevention of smoke, which, as recently described in the ILLUSTRATED LONDON NEWS for April 7. The experiments took place in the midst of the fleet assembled, and excited considerable attention. Numerous scientific gentlemen were present, and, in Mr. Hardy's words, "the result was more successful than the most sanguine could have anticipated." The furnace doors were after one furnace fire out of four was extinguished, showing that the undoubted advantages conferred by these valves in preventing smoke and reducing the temperature of the engine-room are combined without any diminution of the steam-generating power of the furnaces. Upon Mr. Prideaux's valve-doors being removed, and the ordinary doors substituted, the thermometer, which had previously stood at 81 degrees, rose to 98; examples which must certainly be regarded as one of the most valuable features of his invention—viz., that during its use the exterior of the fire furnace-door always remains perfectly cool, no matter to what extent the firing in the furnace may be pushed

FETE OF JOAN OF ARC AT ORLE

THE FETES OF JOAN OF ARC, AT ORLEANS.

On Sunday, the 6th of May, great rejoicings took place in the ancient city of Orleans on the occasion of the erection of a statue to Joan of Arc The many historical buildings for which Orleans is noted were decorated in the style of the fifteenth century. Architecture, sculpture, eloquence, music—were all put in requisition to do honour to that illustrious amazon of the middle ages, known in England as the Maid of Orleans, but more familiarly spoken of in France as the Pucelle, or "Maid" The fêtes lasted four days; and commenced on the morning of Sunday with a grand musical festival held in the Town-hall, which was brilliantly illuminated for the occasion. In the evening another concert took place on a still larger scale, which attracted upwards of two thousand persons. One of the principal pieces was a beautiful symphony, with a chorus in three parts, which described in a touching manner the career of the beloved Jeanne from the time when she strayed in the peaceful fields of Domrémy down to the time of her victory and cruel death. The violin of Sivori (worthy successor of Paganini) commenced the concert by a composition in honour of the Pucelle; and M. Jules Lefort, one of the chief ornaments of the French Opera, concluded it by a magnificent *cantate* which won for him the applause of the assembled multitude. On the morrow the festivities recommenced with increased splendour. From early twilight the bells of the Tourelles pealed the same music which they pealed in the year 1429, after the capture of the town by Joan of Arc. About noon a mass was celebrated in the cathedral, and in the evening the Historical Cavalcade (of which we have given an illustration) made the round of the city. The gorgeous procession followed the same route as that which had been taken by the victorious troops of the heroine four hundred and twenty-five years ago. The streets were thronged with jubilant crowds; thousands of allegorical illuminations blazed from the houses, while the air was filled with many-coloured fire-balloons and Bengal lights. The cavaliers, who formed the bulk of the procession, were dressed in the costumes of the fifteenth century, and were preceded by torch bearers, bowmen, heralds, pages, and men in armour. The principal banners were borne by the descendants of those valiant knights who fought side by side with Joan of Arc, and whose names on that account are so dear to France. Dunois was represented by M. le Vicomte de Morogues. Jean de Brosses, Maréchal de St. Sevère, by one of his descendants, a M. de Maussac. Jean d'Aulon the Ecuyerry of the Pucelle, by M. de Vathaire. La Hire, by M. le Vicomte de Lamets. Maréchal Lafayette, by M. de Fresnel. Olivier de la Saussaye, by his direct descendant, M. de la Saussaye. Lieutenant-

INAUGURATION OF THE STATUE OF JOAN OF ARC AT ORLEANS.

THE HISTORICAL PROCESSION.

General Herve Laurens, by a descendant, &c. After making the prescribed round, the cavalcade returned about midnight to the place whence it had started.

On Tuesday the fêtes were opened by a grand service at the Cathedral, which was decorated in the most gorgeous style. Near the principal entrance hung the shield of Joan of Arc; together with a sword, supporting the Crown of France, underneath which was traced the motto—*Consumes Beauté Dé*. The aisles were lined with oriflammes and the banners of those towns which had sent succour to Orleans. In front of the pulpit stood the banner of the Pucelle, a rich white flag ornamented with golden lilies and a representation of the Saviour seated on a throne, with two angels kneeling; and the inscription "Jesus Maria."

The mass was performed by the *curé* of Domremy, assisted by a great number of ecclesiastical celebrities, forming a cortège of unusual pomp. "At the end of the service," says a local journal, "M. Dupanloup mounted the pulpit from which so many orators have sounded the glory of the deliverer of France, and preached a sermon so beautiful, so touching in its simplicity, and at the same time so manly and so much to the purpose, that many persons, were seen to turn their heads away to hide tears they were unable to restrain and which they were foolish enough to be ashamed of."

After the sermon, the grand procession to the Fort des Tourelles took place. It was escorted by bands of young girls dressed in blue, and wearing garlands of violets interwoven with gold. Next came the clergy, the civil functionaries of all ranks, in grand costume; then the guests, who had been invited from distant parts to assist at the ceremony; then the descendants of the family of which Joan of Arc was the daughter, the "observed of all observers;" then the torchbearers, the religious communities, charity children, and, lastly, the venerable prelate who had delivered the morning oration. This splendid cortége took three hours in passing through the avenue of breathless spectators. When it arrived at the new monument in the Place du Martroi a solemn stillness prevailed. All at once the awning surrounding the monument was seen to fall slowly, discovering the flowing locks of the amazon, which glistened in the sunshine; till at length the whole statue was disclosed to view, and then the clamour of bells began, and the booming of cannon, drowned in the roar of thousands of voices.

In the evening another grand general illumination took place, which lit up the country round about, and filled the streets with artificial daylight. A grand official banquet was also held at the prefecture, at which all the notabilities of the district were present.

The fêtes were concluded on Wednesday evening, by public games and a ball, which rivalled in splendour even those of the Hôtel de Ville, at Paris.

FETE OF JOAN OF ARC.—ORLEANS ILLUMINATED.

CALENDAR FOR THE WEEK.

SUNDAY, May 20.—Sunday after Ascension-day.
MONDAY, 21.—First Railway Act passed, 1801.
TUESDAY, 22.—Alexander Pope born, 1688
WEDNESDAY, 23.—Trinity Term begins.
THURSDAY, 24.—Queen Victoria born, 1819.
FRIDAY, 25.—Princess Helena born, 1846.
SATURDAY, 26.—Oxford Term ends.

HIGH WATER AT LONDON-BRIDGE,

FOR THE WEEK ENDING MAY 26.

ROYAL POLYTECHNIC INSTITUTION.—The Lectures and Exhibition, as delivered before her Most Gracious Majesty and his Royal Highness Prince Albert, the Patron of the Institution, will be continued, consisting of the Telephonic Concert, Dissolving Views of Sinbad the Sailor, the Pictures of Children's Games, the Diorama illustrating the Voyage Across the Atlantic and the Cities in the United States, Lectures on Songs and Song Writers, by George Buckland, Esq. Dissolving Views of the War, &c., &c.

MONDAY EVENING, 21st.—LECTURE to the INDUSTRIAL CLASSES: HISTORY of a CORAL ISLAND, by TREVYTHAN SYMES, LL.D.

LUMINOUS and CHROMATIC FOUNTAIN, at the ROYAL PANOPTICON, Leicester-square, at 4.55 and 9.55. The Institution is open—Morning, 12 to 5; Evening, 7 to 10. Schools and Children Half-price.

TWO THOUSAND TWO HUNDRED and THIRTY-FIRST REPRESENTATION of LOVE'S ENTERTAINMENT in LONDON.—ONE HUNDRED and TWENTY-FIFTH CONSECUTIVE NIGHT of the PRESENT PIECE, on MONDAY, MAY 21, at the REGENT GALLERY, 69, Quadrant, where Mr. LOVE now appears every Evening at Eight, except Saturday. Saturday at Three.

ROYAL GALLERY of ILLUSTRATION, 14, Regent-street. The DIORAMA illustrating Events of the WAR is now Exhibiting Daily at Three and Eight. The Lectures by Mr. Stoequeler. Admission 1s., 2s., and 3s.

THE CHALON EXHIBITION.—SOCIETY OF ARTS.—This Collection of the Paintings, Drawings, and Sketches of the late JOHN CHALON, Esq., R.A.; with a Selection from the Works of ALFRED E. CHALON, Esq., R.A., will be OPENED at the Society's House, Adelphi, on THURSDAY, JUNE 7th. Admission, 1s.

WHITSUN HOLIDAYS.—The ZOOLOGICAL GARDENS, REGENT'S-PARK, will be OPEN to Visitors EVERY DAY during Whitsun Week except SATURDAY, on payment of SIXPENCE each person. The Military Band will commence their performances on Saturday, May 26.

MAINE LAW.—A PUBLIC PRELIMINARY MEETING will be held, by the United Kingdom Alliance, on MONDAY EVENING next, MAY 21, in ST. MARTIN'S HALL, Long-acre. Chair taken at Seven o'clock. Admission free.

JOHN B. GOUGH will deliver TWO ORATIONS in EXETER-HALL, as follows: WHIT-MONDAY, May 28, and THURSDAY, May 31 Doors open each evening at Seven, Chair taken at Eight o'clock. Tickets to the Royal Gallery, 2s. 6d. each; Front Seats and Platform, 1s. each; Back Seats, 6d. each; to be had at 337, Strand, or at the door of the Hall.

UNITED KINGDOM ALLIANCE (Formed June 1st, 1853), for the Total and Immediate Legislative Suppression of the Traffic in all Intoxicating Beverages. A PUBLIC MEETING of the Friends and Friends of the Alliance will be held, in EXETER-HALL, on WEDNESDAY EVENING, May 30, 1855, at six o'clock. The Meeting will be addressed by the Right Hon. the Earl of Harrington, K.C.B., Archdeacon Bardwell, Rev. Hibbert, Esq., Barrister-at-Law; Samuel Bowley, Esq., Gloucester; Richard Hibbert, Esq., Barrister-at-Law; Samuel Pope, Esq., Honorary Secretary; and several noblemen and distinguished supporters of the movement. Sir Walter C. Trevelyan, Bart., the President of the Alliance, will preside.

Tickets of admission (free) may be obtained at the offices of the Alliance, 41, John Dalton-street, Manchester; at W. Tweedie's, 337, Strand; or at 20, Bishopsgate-street Within.

REPEAL OF THE COMPULSORY NEWSPAPER STAMP.

THE ILLUSTRATED LONDON NEWS

WILL BE

DOUBLED IN SIZE,

AND CONTAIN NINETY-SIX COLUMNS EVERY WEEK

PRICE ONLY SIXPENCE:

AS SOON AS THE NEW LAW COMES INTO OPERATION.

STAMPED COPIES, SEVENPENCE.

Orders received by all Newsmen, and at the Office, 198, Strand, London.

THE ILLUSTRATED LONDON NEWS.

LONDON, SATURDAY, MAY 19, 1855.

THE Government having carried its bill for the settlement of the Newspaper-stamp question on which its predecessors allowed themselves to get into difficulties by the non-enforcement of an existing law—the proprietors and conductors of the ILLUSTRATED LONDON NEWS have the honour to announce to the numerous and continually-increasing body of their readers, the measures which they have determined to adopt in consequence of the change. They may take occasion to state that, so far from having any complaint to urge against the Legislature for its interference with the interests of established newspapers, they supported the measure of Sir Cornewall Lewis; and in fact suggested it to the Government as the only compromise which it would be possible to carry through Parliament. For the future the stamp on newspapers will be optional. Those who desire a cheap press, may have it cheapened to the extent of the virtually abolished stamp duty; but without the privilege of transmission and re-transmission by post. Those to whom the postal privilege is essential, will find that the alteration of the law has produced no considerable change, and that almost the only result of the measure is the much-needed disappearance of a great scandal—a law which it was impossible or inexpedient to enforce, and which was daily and weekly set at defiance, in every part of the country.

The proprietors of the ILLUSTRATED LONDON NEWS, after mature consideration of the subject in all its bearings, have resolved to give their readers a far greater advantage from the new measure than could be afforded by the reduction of the price of their Journal from sixpence to fivepence, which is the utmost reduction they would have been warranted in making by adherence to the letter of the law. Even this small reduction, if made, could only apply to the case of those who did not wish to transmit their papers through the post, and would leave a large proportion of their subscribers in the British isles, and the whole of their subscribers on the continent of Europe, at the Cape, in India, in China, in Australia, in North and South America, and in every place where the English language is understood, or where British trade, curiosity, or love of adventure is able to penetrate, in exactly the same position as before. Instead of minimising in this manner the change to be effected, the proprietors of the ILLUSTRATED LONDON NEWS a Journal which may proudly claim to be an "English institution," and which is seen and read, and we hope admired, in every part of the civilised world—have resolved, immediately after the passing of Sir Cornewall Lewis's bill, to increase its size, and to issue weekly, at the cost of sixpence (unstamped) a DOUBLE SHEET, containing thirty-two pages, or ninety-six columns of letter-press and Engravings. In other words, the Double Sheet, instead of being occasional, and charged a shilling, will be published weekly at the price of *sixpence*. The price of the stamped edition for the post will be raised to *sevenpence*. This change will entail upon us a very large additional outlay. The mere extra paper which we shall consume will amount to several hundreds of pounds per week, as any one may calculate. To say that we do not expect our reward for such a large increase of our expenditure would be affectation. We do expect it—in the shape of a largely-increased sale. Our average circulation, with our present single sheet and half supplement, is upwards of 170,000 per week. When our size is doubled, and we have more space at command to make the ILLUSTRATED LONDON NEWS a still more copious and accurate record than it now is—not only of Politics and News, but of the progress of Literature, Music, the Drama, and the Fine Arts—we believe that a sale of a QUARTER OF A MILLION of copies per week will by no means be the ultimate limit to which our popularity and our usefulness will attain. As soon as the new law shall come into operation, we shall commence the new and enlarged series, and hope to prove—no less by the beauty and the quantity of our engravings, than by the general completeness and efficiency of our Journal in every department—that, quality considered, it is in every respect the cheapest newspaper in the world. It is possible that the mechanical arrangements for printing so large an impression may not be so perfectly completed as to enable us to publish a double sheet every week during the first month; but if there should be any hiatus and we should be compelled, in default of these arrangements, to issue only a single sheet and half-supplement, as we do this week, we must beg the temporary indulgence of our readers and subscribers. They may be assured, in such case, that the difficulty will be speedily surmounted; and that, when our mechanical arrangements are finally made, they shall receive the double sheet with the utmost regularity. We do not pledge ourselves never, under any circumstances whatever, to issue a *treble* number, price one shilling. But, with the increased space which will be every week at our disposal by our new arrangements, such circumstances, if they occur at all, will, of necessity, be rare. If we are driven at any time to such an expedient to keep pace with the all-engrossing topics either of peace or war, our readers may be assured that it will be only in case of the absolute impossibility of otherwise recording and illustrating, in a befitting manner, the great events of our time.

THE factitious excitement which was caused by the announcement of the motion brought on by Lord Ellenborough on Monday night, the perilous debate which it initiated, and the majority by which the noble Earl's resolutions were negatived, could occasion little surprise to a calm observer of political events. The insincerity of the whole proceeding has been too apparent to allow the demonstration to take a place even in the history of faction.

The scene in the Gilded Chamber of Peers was a brilliant one, and, to the unthinking part of the audience, we doubt not that Monday afforded as pleasant an evening as could have been obtained in town. The ladies crowded the House to such an extent as to infringe upon positions to which they had no claim, and to draw from Lord Redesdale the excessively impolite remark that they "made the place look like a casino"—an observation which has an increased point for those who know his Lordship's own waiter-like costume. Strangers filled every corner into which they could be crammed, and the highest Legislative Assembly in the world presented much the appearance of an aristocratic theatre on the first night of a new piece. "What came they out to hear?" An earnest, serious, and candid discussion of a topic closely connected with all the dearest interests of the nation? Not they. If this kind of thing had been certain, a handful of Peers would have debated before empty benches and abbreviating reporters. That showy audience gathered, because Lord Ellenborough was going to make a dashing attack upon Government, which, it was thought, would bring up Lord Aberdeen, and because it would be interesting to see the podagraic War Minister baited, and because Lord "Darby" was sure to come out with something smart.

Nor was the distinguished audience disappointed. Lord Aberdeen certainly declined to make sport for the Philistines, but all the rest of the anticipated programme was faithfully given. Lord Ellenborough did make a "dashing" kind of attack, chiefly aimed at Lord Palmerston, who has incurred the Earl's displeasure by his blindness to Lord Ellenborough's fitness to be Secretary at War. With exceedingly bad taste he retailed an alleged story of the Duke of Wellington, who, when Lord Palmerston (to his credit) intimated that he should retire from the then Government if Mr. Huskisson did, made no reply, and justified his silence by telling Lord Ellenborough that he "should not fire great guns at small birds." Lord Lansdowne, later in the evening, said that he also had an anecdote about Lord Ellenborough and the Duke, but he could not tell it. It has, however, oozed out that the Duke greatly approved a squib in which certain political men were described as "horses for sale," and Lord Ellenborough's character was, "all action, and no go." And the Duke said, "Very good, very good—that's just it." Here, at all events, are two solemn facts elicited by a legislative discussion. And then Lord Panmure was duly roused to as severe a reply as that most good-natured personage could find it in his heart to make, and he scoffed at Lord Ellenborough's Oriental "grandiloquence" and his commonplace "truisms." Lord Hardwicke, a retired Rear-Admiral, went into some details which were felt to be too real for the occasion: they stood out, literal and hard, like cut figures against painted theatrical scenery, and Lord Derby restored the debate to its natural tone by a fluent and lively criticism delivered in the manner which, in the old-fashioned times, was called "rallying" upon the conduct of the war; but his allusions to Mr. Layard, whom he admitted to be the representative of a popular want, but with whom his Lordship was in no way connected, were more amusing, especially his announcement that in a supposed firm of "Ellenborough, Derby, and Layard," he (the Earl) was really not a partner. Nor was the Government leader of the Lords, the Earl Granville, less good-humoured. Indeed, to preserve the theatrical illustrations, he "came down to the lights," and played to the stalls. He told us that he was a Gower, and mentioned his aristocratic connexions; puffed Lord Carlisle, and, finally, took us into his very drawing-room, by reminding us that three ladies of his household had married into a Protectionist Administration. Now, really, to find living and actual Lords so amusing and affable as this; to get smart little stories from them, mock diatribes, and allusions to the ladies of their families, was quite delightful. And, as for the war, and our 20,000 lost men, who thought of that? or, if anybody did, was it not reassuring to be informed that the Emperor of Russia had already lost 277,000 men? The idea of complaining in the face of a fact like that!

Then the division was equally significant. Does anybody suppose that, though Lord Palmerston alleges that he has "got the Lords," the Earl of Derby could not have made a far more formidable show of men had he chosen? Had the Earl ordered a "whip," would there have been anything like the numerous majority against the other Earl—his noble friend? Would the party managers have been so careless as not to call the proxies they actually had, by which a difference of some sixty would have been made on the division? The Conservative party had no more idea of really supporting the principle which, however awkwardly enshrined, was to be found in Lord Ellenborough's resolution, than—the House of Commons will be found to have when the test is really applied.

It would be waste of time and space to apply ourselves in earnest to such part of Monday's debate as purported to be serious. Lord Ellenborough stated as a proposition, that promotion ought to be given only to those who are fitted for it, and the House of Lords certified that this was very true, just as in Smollett's novel, the doctor soothes the indignant lady with a certificate "that anybody who wilfully kills a child by immersing it in cold water, is guilty of the death of that child." But the Earl himself was compelled, at the close of his address, to make even this proposition palatable, by reminding their Lordships that a large portion of themselves held their exalted position through the merits of an ancestor who had been the fitting man for some place of chosen trust and responsibility. He might have said that nearly all he addressed were in that category, for, with the exception of a few descendants of those whose peerages took their rise in certain interesting favouritisms, every Lord in the House had an ancestor, whose strong hand, sharp sword, skilful management, or legal learning, gained *his* coronet. But how, in any system of logic in vulgar use, does this fact connect the sons or descendants of the "right men" with the proposition of the noble Earl. In fact the whole thing was hollow: the criticisms on the war had more or less truth in them; but they were not advanced in earnest any more than the arguments for administrative reform. It was not a war or a reform debate, but a "prepared impromptu" performance, suggested by the present discontent of the popular mind with things as they are.

But how long are such farces to continue? Between the House of Peers on the one hand, and Mr. Milner Gibson and his friends of the Lower House on the other, the character of the British nation stands a chance of being damaged, not only in the estimation of Europe, but in that of the British people. Let the triflers and the cravens beware. The people are in no mood to be jested with by the one or insulted by the other. If the Legislature has not as much earnestness, as much knowledge, and as much virtue as the people, the day of reckoning, which is certain to come, may sweep away many things, merely to mention which, at the present moment, might appear indiscreet and invidious, if not perilous. Just Reforms that are thwarted have an ugly propensity to expand into Revolutions. Is the Government of Great Britain never to reform an abuse until a revolution is imminent?

THE COURT.

The Levee on the 11th inst. was more fully attended than any similar reception since her Majesty's accession to the throne, with the exception of the first, held by the Queen. On the evening of the same day the Queen and the Prince honoured with their presence the amateur performance at Drury-lane Theatre for the benefit of the Wellington College.

On Saturday morning her Majesty and his Royal Highness Prince Albert visited the Crystal Palace, at Sydenham, accompanied by his Royal Highness the Duke of Saxe-Coburg and her Serene Highness the Princess of Hohenlohe-Langenburg. In the evening the Queen and the Prince, with their illustrious visitors, honoured the Royal Italian Opera with their presence.

On Sunday the Queen and Prince Albert, with the Prince of Wales, the Princess Royal, Prince Alfred, the Princess Alice, the Duchess of Kent, the Princess of Hohenlohe-Langenburg, and Prince Ernest of Leiningen attended Divine service in the private chapel at Buckingham Palace. The Princesses Adelaide and Feodore of Hohenlohe attended Divine service in the Royal German Chapel, St. James's Palace.

On Monday the Prince Consort presided at the Council for the Management of the Duchy of Cornwall, and in the afternoon left Buckingham Palace for Windsor Castle, returning to town about six o'clock. Her Majesty had a dinner party in the evening. In the course of the day one hundred and eight Guards, wounded and disabled in the Crimea, and recently arrived in this country, were inspected by her Majesty in the Grand Hall of Buckingham Palace. The invalids numbered 49 of the Grenadiers, 29 of the Coldstreams, and 30 of the Scots Fusiliers. The Queen was accompanied by his Royal Highness Prince Albert, and also by their Royal Highnesses Prince Arthur, the Duchess of Kent, and the Duke of Saxe-Coburg, and was attended by ladies and gentlemen in Waiting. Her Majesty inspected each soldier present, commencing with the Grenadiers, and afterwards the Coldstreams and Scots Fusiliers; the respective commanding officers and officers bringing the actions in which the invalids were wounded, and the name of the medal they had won. After the inspection the invalids were conducted to dinner in the Servants' Hall, which her Majesty and his Royal Highness the Prince visited while the repast was being served.

On Tuesday Count Walewski, the French Ambassador, had an audience of the Queen, at Buckingham Palace, to take leave. Prince Albert rode on horseback, in the forenoon, accompanied by the Prince of Wales and Prince Alfred, and attended by his Equerry in Waiting. His Royal Highness again rode in the afternoon, with the Duke of Saxe-Coburg.

On Wednesday her Majesty and her Royal Highness Prince Albert visited the Exhibition of the Horticultural Society, at Gore House, Kensington Gore. The Queen and the Prince were accompanied by the Duke of Saxe-Coburg, the Princess of Hohenlohe-Langenburg, and the Princess Adelaide of Hohenlohe.

On Thursday the Queen and the Prince honoured the Royal Italian Opera with their presence.

On Friday morning the Queen presented medals to the officers and soldiers of the three regiments of Guards, on the parade-ground, in St. James's park. In the evening her Majesty gave a state concert.

Her Royal Highness the Grand Duchess of Mecklenburg-Strelitz, accompanied by her son, Prince Adolph, arrived at Kew, on Tuesday, from Germany, on a visit to her mother the Duchess of Cambridge. Her Royal Highness was attended by her Lady and Gentleman in Waiting, and by Baron Ansesbeck.

The departure of the late Ambassador of France is a subject of universal regret in the higher circles. The formal act of retirement was completed on Tuesday by the presentation of his Excellency to her Majesty, for the purpose of delivering his letters of recall. On the completion of the ceremony, her Majesty was pleased to pay the Countess Walewska the gracious compliment of a private interview, for the purpose of bidding her farewell.

His Serene Highness Prince Ernest of Leiningen arrived in London on Saturday night, and is staying at Buckingham Palace, on a visit to her Majesty.

The Countess of Clarendon will be "at home" at the Foreign-office on Tuesday next.

SACRED HARMONIC SOCIETY. Haydn's popular work, "The Creation," will be repeated for the last time this season, on Friday next, 25th May. Clara Novello, Sims Reeves, and Formes, are the principal singers.

LATEST INTELLIGENCE.

RESIGNATION OF GENERAL CANROBERT.

General Canrobert, in consequence of ill health has committed his command of the army to General Pelissier, but, not willing to leave the seat of war, has placed himself at the head of General Pelissier's division.

The *Moniteur* of yesterday announces that the Emperor has received the following despatch from General Canrobert:

Crimea, May 16, Ten a.m.

My shattered health no longer allowing me to continue in the chief command, my duty towards my Sovereign and my country compels me to assign to transfer the command to General Pelissier, a skilful and experienced leader. The army which I leave him is intact, hardened to war, full of ardour and confidence. I beseech the Emperor to leave me a soldier's place (*place de combattant*) as commandant of a simple division.

The Minister of War has addressed the following reply to General Canrobert:—

Paris, May 16, Eleven p.m.

The Emperor accepts your resignation. He regrets that your health has suffered; he congratulates you upon the sentiment which makes you ask to remain in the army, where you shall have the command, not of a division, but of the corps of General Pelissier. Hand over the chief command to the General.

DESPATCH FROM LORD RAGLAN.

War Department, May 18.

Lord Panmure has this day received a despatch and its enclosures, of which the following are copies, addressed to his Lordship by Field Marshal the Lord Raglan, G.C.B. —

Before Sebastopol, May 5.

My Lord,—Since I wrote to your Lordship on the 1st instant, nothing of importance has arisen; the enemy still continues collecting troops upon the high ground on the opposite side of the Tchernaya, in the neighbourhood of Schuliapol, and convoys are constantly seen moving in that direction.

The fire from the place upon our trenches has not been heavy; but, we hear, during the same period, and in a measure in consequence of the more powerful fire of the enemy, we have lamented the death of three promising young officers—Lieutenants Carter, of the Royal Engineers, Curtis, of the 44th, and White, of the 62nd Regiment.

On the night of the 1st inst. the French attacked a kind of counter-guard, which had been established in front of the central bastion.

The operation was quite successful, and the enemy were driven out with great slaughter, and there nine small mortars. Our allies have remained in the work, and have pushed the heavy fire to which they have been exposed, and have established themselves even more frustrating the efforts made by their adversaries to dispossess them of it on the following day, when a vigorous sortie was repulsed, and the Russians were again great sufferers.

The conduct of the French troops was very brilliant.

The Lord Panmure, &c. &c. &c. I have, &c., RAGLAN.

OFFICERS KILLED FROM THE 30TH APRIL TO THE 3RD MAY, INCLUSIVE.

Lieutenants.—6th Foot, P. J. Carey. Gend. G. J. White. Royal Engineers J. H. S. Curtis.

RANKS KILLED FROM THE 30TH APRIL TO THE 3RD MAY, INCLUSIVE.

Privates. 1st Foot, Anne Dyer, 7th Michael Murphy. 18th Regiment Thomas Chevelon and John Edward. 20th Patrick Lynch. 47th Edward Corbett.

Drummer. 77th Owen Rogers.

NON-COMMISSIONED OFFICERS AND PRIVATES WOUNDED FROM THE 30TH APRIL TO THE 3RD MAY, INCLUSIVE.

Sergeants.—1st Foot George Cordell, severely. 77th Wm. Steers, severely. 89th James Carruthers, severely. Rifle Brigade William Brodie, dangerously, happens amputation. [illegible]

Privates. [illegible] Williams, severely. [illegible]

[illegible] Mayhew, severely. [illegible] Mitchell, severely. [illegible] Quilliard, severely. [illegible] Edward Tuite, severely. [illegible] 19th William Atkinson, Thomas Ryan, both severely still. David Bunch, dangerously; Thomas Fahey, severely. 2nd Queen's Royal Rifles, slightly.

CASUALTIES IN THE ROYAL NAVAL BRIGADE BEFORE SEBASTOPOL, FROM THE 8TH TO THE 30TH APRIL.

Wounded.—Petty Officer A.B., [illegible] slightly.

Hamburg, May 18.

The English fleet has penetrated into the Gulf of Bothnia.

OPENING OF THE FRENCH EXHIBITION.

As early as nine o'clock on Tuesday morning the approaches of the Crystal Palace in the Champs Elysées were besieged by crowds waiting for the opening of the doors.

The Emperor and Empress arrived at a quarter past one, and were received at the chief entrance of the building by Prince Napoleon, President of the Imperial Commission of the Exhibition, who afterwards read an address setting forth the origin, progress, and character of the undertaking. The Emperor replied:—

My dear Cousin,—In placing you at the head of a Commission that had so many difficulties to overcome, I wished to give you a particular proof of my confidence. I am happy to find that you have so fully justified it. I beg of you to thank the Commission in my name for the enlightened zeal it has displayed.

I open with happiness this Temple of Peace, which invites all nations to concord.

Their Majesties afterwards followed Prince Napoleon and the Princess Mathilde, placed themselves at the end of the procession and walked through the building. The applause was considerable. The Empress wore a low green bonnet [illegible]. The ceremony lasted only an hour. Their Majesties left the Palace by the land playing "Partant pour la Syrie." There was no firing—owing to the Champs Elysées. The Imperial cortège was magnificent. The Emperor's carriage which contained, besides [illegible] and the Empress, Prince Jerome and the Princess Mathilde—was quite new and was drawn by eight horses. As soon as the Imperial party had left the building, the public were allowed to visit it in all its parts.

POST-OFFICE AT THE UNIVERSAL EXHIBITION IN PARIS.—GENERAL POST-OFFICE, MAY, 1855.

The Postmaster-General has received the following notice from the Director-General of the French Post-office:—(Translation):—"The public is informed that a post-office will be established in the building of the Universal Exhibition in Paris for the time during which the Exhibition will be open. Natives of France, and foreigners residing in the neighbourhood of the building, or obliged to spend the greater part of their time there, and persons who, at the time of their leaving home, do not know where they shall fix their abode in Paris, may have their letters addressed to them at the Post-office at the Exhibition. These letters will be kept at the office, and will be delivered to the persons to whom they are addressed, on the presentation of their [illegible] or of any other document which may be sufficient to establish the [illegible]. The letters should be directed as follows:—'A Monsieur —, Bureau de Poste du Palais de l'Exposition Universelle, Champs Elysées.' Letters addressed to evaluation will be delivered in the same way; or, if the particular part of the building in which the exhibitor may be found is stated in the address of the letter, it will be carried to that place by the letter-carrier. Further, the public may avail of the post-office of the Exhibition all the facilities afforded in other French post-offices, for the purchase of postage-stamps, the payment of postage, the transmission of money, &c."—ROWLAND HILL, Secretary.

NAVAL PRIZE MONEY, &c.—It appears from a Parliamentary paper, published on Saturday last, that the total receipt of naval prize money, bounty, salvage, and other moneys between June 1, 1854, and March 31, 1855, amounted to £71,980, and the total expenditure to £35,715. The balance in hand is £36,265. Of the receipts the sum of £682,577 arose from proceeds of the sales of Russian vessels and cargoes captured by her Majesty's ships, and £5,403 from the amount of prize money, &c., remaining [illegible] after the apportionment of three months. Sums to the amount of £31,580, consisting of freight money, *pendente lite*, of the cargoes on board vessels seized, and of the proceeds of the sales of vessels and cargoes captured by Custom-house officers, and condemned as droits and perquisites to Her Majesty, have been paid into the Bank of England on account of naval prizes by order of the High Court of Admiralty.

MONETARY TRANSACTIONS OF THE WEEK.

(From our City Correspondent.)

Connected with many previous weeks, the Consol Market—though the amount of money has been transacted in it has not been to say extensive—has assumed a very firm appearance. The resignation of Count Nesselrode—assumed to belong to the Peace party in Russia—has had little or no effect upon prices, which have steadily advanced, until the Three per Cents have realised 89¼. This shows an improvement, compared with the highest figure on Friday last, of ¾ per cent. The public have evidently been the largest buyers of stock, and we understand that the supply in the Stock-Exchange has become very small. However, on Tuesday next, a payment of 15 per cent on the new Loan of £16,000,000, sterling, or £3,400,000, falls due, and a creation of stock to that amount will take place; besides, we shall have an issue of the New Thirty Years' Annuities. Thus, any additional demand upon the jobbers will be more easily met than at present. No doubt, the great abundance of money, the steady increase in the stock of gold in the Bank of England, and the large supplies of bullion, have tended to keep up the price of Consols, and to impart considerable confidence as respects the future.

The Foreign Exchanges continue very favourable, consequently scarcely any shipments of bullion have been made to the continent, and nearly the whole of the imports of gold (rather over £500,000, chiefly from Australia and New York) have gone into the Bank of England. In London-street there is a large amount of unemployed capital, and first-class commercial bills are done at 3½ per cent.

There was a fair business doing in Consols on Monday, and the Three per Cents marked 89¾. The Three per Cents Reduced were 89¾; the New Three per Cents, 89¾; Consols for Account, 89¾; Long Annuities, 1860, 3 15-16; India Bills, 1859, 16s. pm.; Ditto Bonds, 3½, to 1774. Exchequer Bills, 5s. to 8s. prem.; Exchequer Bonds, 96¾. On Tuesday the transactions in National Securities were small. Bank Stock declined from 209½ to 208. The Three per Cents Reduced were 89¾ to 89¾; the Three per Cent Consols, 89¾; and the New Three per Cents, 89¾ ⅜. Long Annuities, 1885, 16⅜. India Bonds, 20s. to 18s. prem. Consols for Account were 89¾, and Onnuum, ⅜ per. Exchequer Bills, 5s. to 8s. pm.; Ditto Bonds, 100. The dealings in Foreign Securities were tolerably numerous. Buenos Ayre Six were 30⅜. The Three per Cents Reduced realised 89¾; the Three per Cent Consols, 89¾; the New Three per Cents, 89¾; Consols for Account, 89¾; Long Ann'uum, 1885, 3 15-16; India Bills, 16s. pm. India Bonds, 20s. to 17s. Exchequer Bills, 5s. to 8s. prem.; Ditto Bonds, 99¾ to 100. Onnuum was ⅜ pm. On Thursday, the English Stock-market was rather animated, and a further rise took place in the quotations. The Three per Cents, both for money and time, marked 89¾ to 89¾. The new Three per Cents were done at 89¾ to ⅞; and the Three per Cents Reduced, 89¾. India Stock realised 209½; Bonds, 20s. pm. Consols for Account were 89¾, and Onnuum, ⅜ pm. Exchequer Bills, 5s. to 8s. prem.

It has been asserted that a new loan of £8,000,000 will shortly appear in the market for Turkey, and that [illegible], together with the last loan of £20,000,000, will be guaranteed by England and France. Turkish Bonds have been active, and the price has advanced to 8. Other foreign bonds have been tolerably active. Mexican. There was a rise to have realised 21; Peruvian Four and-a-Half per Cents, 69; Sardinian Five per Cents, 86¾; Spanish Three per Cents, 24¾; Ditto, New Deferred, 15¾; Ditto, Passive, 5¼; Dutch Two-and-a-Half per Cents, 62¾; Dutch Four per Cents, 92¾; Russia Five per Cents, 93; Brazilian Five per Cents, 97¾. Ditto, Four-and-a-Half per Cents, 95; Buenos Ayres Six per Cents, 82¾.

Joint stock Bank Shares have continued very firm, and the quotations have been well supported. [illegible] America have realised 64¾; London Joint stock, 27¾; Union of Australia, 71; Union of London, 26. Mail Steamship Securities have [illegible]—Canada Bonds have realised 111; Crystal Palace, 5¾; Ditto Preference, 4¼; London Docks, 93¾; General Screw Steam Shipping Company, 1¾; North British Australasian, 6¾; Royal Mail Steam, 7½; South Australian Land, 3¾; Van Dieman's Land, 1¾; Electric Telegraph, 17; Morocco and South American, 6¾. There has been very little doing in Canal Shares, yet the quotations for nearly all marks have remained firm. Birmingham and Liverpool, 220; Derby, 84; Grand Junction, 49¾; Leicester, 49¾; Loughborough, 5, 57½; Neath, 150; Peak Forest, 86; Regent's, 14¼; Shorncliffe, 2½; Stourbridge, 1 and Worcester, 42¾; Warwick and Birmingham, 20. Railway Shares have produced the following prices:—Berlin, 94; East London, 108; Grand Junction, 83¾; Kent, 78¾; Southwark and Vauxhall, 89¾; West Middlesex, 91; Ditto, New, 94¾. Gaslight and Coke Companies Securities have realised:—British Provincial, 20; Brighton, 151; City of London, [illegible]; Equitable, 35; Imperial, 111; Ditto New, 20; Phœnix, 2½. United General, 20. Insurance Companies Shares have ruled rather dull. Albion, 95; City of London, 72; General, 6¾; Globe, 10d; Imperial Fire, 94; Law Life, 18¾; Pelican, 45 ex. div. and Bonus; Rock Life, 7¾; Royal Exchange, 3; United Kingdom, 4¾. Hungerford Bridge Shares have sold at 2¾. Waterloo, 6; Ditto Old Annuities of 24, 8¾; Vauxhall, 2¼.

Railway Shares have been very firm, and the quotations have had an upward tendency. The following are the official closing prices:—

ORDINARY SHARES AND STOCKS.—Aberdeen, 39; Exeter, 37; Caledonian, 62¾; Eastern Counties, 11¾; East Lancashire, 75; Edinburgh and Glasgow, 95¾; Great Northern, 92; Ditto, A Stock, 73¾; Great Southern and Western (Ireland), 94¾; Great Western, 86; Lancashire and Yorkshire, 76¾; London and Blackwall, 7¾; London and Brighton, 93¾; London and North-Western, 100; Ditto, Eighths, 1¾; London and South-Western, 81¾; Manchester Sheffield and Lincolnshire, 36; Midland, 70; Ditto, Birmingham and Derby, 41¾; North British, 29¾; North-Eastern—Berwick, 79¾; Ditto, Extension, 1; Ditto, G N E Purchase, 8; Ditto, York, 46¾; North Staffordshire, 12¾. Oxford, Worcester, and Wolverhampton, 27¾; Shropshire Union Railways and Canal, 3¾; Scottish Central, 99½.

LINES LEASED AT FIXED RENTALS.—Midland Bra ilway, 93¾; Ditto, Consolidated, 93¾; Ditto, Leeds and Bradford, 93¾; Ditto, Leeds and Thirsk, 93¾; Ditto, Ripon and Boroughbridge, 93¾; Ditto, Sheffield and Rotherham, 93¾; Ditto, Wakefield, Pontefract, and Goole, 93¾; Ditto, West Riding and Grimsby, 93¾; Ditto, Wirksworth, 93¾; Eastern Counties Purchase, 93¾; Great Northern, 93¾; Ditto, A Stock, 93¾; Ditto, Quadruple Shares, 93¾; Ditto, Extension, 93¾; Ditto, Shares, 93¾; Ditto, Stock, 93¾; Great Western, 93¾; Ditto, Bristol and Exeter, 93¾; Ditto, Cheltenham and Great Western Union, 93¾; Ditto, Extension, 93¾; Ditto, Shares, 93¾; Ditto, Stock, 93¾; Lancashire and Yorkshire, 93¾; Ditto, Extension, 93¾; Ditto, Preference, 93¾; London and Blackwall, 93¾; London and North-Western, 93¾; Ditto, Extension, 93¾; Ditto, Preference, 93¾; Ditto, Quadruple Shares, 93¾; Ditto, Shares, 93¾; Ditto, Stock, 93¾; London and South-Western, 93¾; Ditto, Extension, 93¾; Ditto, Preference, 93¾; Manchester Sheffield and Lincolnshire, 93¾; Ditto, Extension, 93¾; Ditto, Preference, 93¾; Ditto, Shares, 93¾; Ditto, Stock, 93¾; Midland, 93¾; Ditto, Birmingham and Derby, 93¾; Ditto, Extension, 93¾; Ditto, Preference, 93¾; Ditto, Shares, 93¾; Ditto, Stock, 93¾; North British, 93¾; North-Eastern—Berwick, 93¾; Ditto, Extension, 93¾; Ditto, G N E Purchase, 93¾; Ditto, York, 93¾; North Staffordshire, 93¾; Oxford, Worcester, and Wolverhampton, 93¾; Shropshire Union Railways and Canal, 93¾; Scottish Central, 93¾.

FOREIGN SHARES.—Antwerp and Rotterdam, 7¾; Dutch Rhenish, 7¾; Eastern Counties, 7¾; Great Western of Canada, 20¾; Hamburg, 21¾; Namur and Liege, 9¾; Paris and Lyons, 41¾; Royal Dutch, 9¾; Western of France, 21¾.

MINING SHARES.—Australasian, 1¾; Australian Agricultural, 1¾; Ditto, Copper, 1¾; Ditto, Cocoas and Cuddia, 3¾; General, 1¾; Santiago de Cuba, [illegible]; Mexican, 6¾; St. John del Rey have marked 32; and Colorado Copper, 3¾.

Friday Evening.

The Consol-market has ruled steady to-day, and prices have had an upward tendency. The Three per Cents are 89¾ ⅞; the Three per Cents Reduced, 89¾; and the New Three per Cents, 89¾ ⅞. Exchequer Bills, 5s. to 8s. premium. All Foreign Bonds and Railway Shares are very firm.

THE MARKETS.

[illegible] Fair to-day's arrivals of English wheat [illegible] have been tolerably good, but the show of samples in to-day's sale was very moderate. On the whole, the demand ruled steady at Monday's prices. But little more of the same [illegible] There was a fair average [illegible] supply of fresh up-country barley, and the trade ruled steady. There was a steady inquiry for barley and malt, at full currencies. The supply of oats was small, but trade was inactive at late rates. Beans, peas, and flour sold steady at late quotations. The imports of the week were [illegible] qrs. of wheat, chiefly from Spain.

ARRIVALS.—English wheat, 2,731 quarters; barley, 2,940; malt, 7,230; oats, 440; flour, 1,600. Irish oats, 1,900. Foreign, wheat, 16,700 qrs., 19,210 flour, 12,360 sacks, 50 barrels.

English.—Wheat, Essex and Kent, red, 70s to 78s; ditto, white, 77s to 85s; Norfolk and Suffolk, red, 70s to 77s; ditto, white, 75s to 83s; Lincolnshire and Yorkshire, red, 68s to 74s; ditto, white, 74s to 80s; Rye, 48s to 50s; Barley, grinding, 28s to 30s; ditto, distilling, 31s to 33s; Malting, 34s to 36s; Lincoln and Norfolk malt, 65s to 70s; brown ditto, 61s to 63s; Kingston and Ware, 68s to 72s; Chevalier, 67s to 72s; Yorkshire and Lincolnshire oats, 23s to 25s; Scotch ditto, 27s. to 30s; Youghal and Cork, black, 22s. to 23s; ditto, white, [illegible] 24s. to 25s; ditto, mixed, 23s. to 24s; grey peas, 37s. to 39s; maple, 40s. to 42s.; white, 40s. to 43s.; boilers, 42s. to 47s. per quarter. Town-made flour, 45s. to 50s.; Suffolk, 42s. to 44s.; Stockton and Yorkshire, 40s. to 42s. per 280 lbs. Foreign, free on board, per barrel [illegible]

Scotch.—Potato oats, 25s. to 26s. per quarter.

Irish.—Limerick, [illegible] Waterford and Clonmel, [illegible] Cork, [illegible] Tralee, [illegible] Belfast, [illegible] Londonderry, [illegible] Dublin, [illegible] Sligo, [illegible] Galway, [illegible] Newry, [illegible] Drogheda, [illegible] Dundalk, [illegible] Ballina, [illegible] Limerick, [illegible] Youghal, [illegible] Cork, [illegible] Foreign, [illegible] Waterford, [illegible] Sligo, [illegible] Limerick, [illegible] Galway, [illegible] Cork, [illegible] Dublin, [illegible] Belfast, [illegible] Londonderry, [illegible] Newry, [illegible] Drogheda, [illegible] Dundalk, [illegible] Ballina, [illegible] Limerick, [illegible] Youghal

if their sagacious opinions of those days were now brought up in evidence against them. In process of time, the critics, unable to resist the general voice, were constrained to allow Rossini's claims as an artist. He gradually became a classic, while his successors, Bellini and Donizetti, were treated as he had been before. They, too, triumphed by the irresistible voice of popular opinion; and then the critics were glad to admit that the men whom they had treated so lightly—the authors of the "Somnambula" and "Norma," and "Lucia di Lammermoor," and "Lucrezia Borgia," were men of genius and true artists. In the case of *their* successor, Verdi, the opinion of critics is in a similar state of transition. They have resisted the general voice as long as they could; and, now that they can do so no longer, they are constrained to allow that there must be something in it. Verdi is now talked of, *ex cathedrâ*, with tolerable respect; and his claims to the character of an artist will at length be admitted, as those of his predecessors have been. Of course, the musical Parnassus has many degrees of elevation; and, though Verdi may not reach the height of some who have gone before him, yet he has done enough to entitle him to an honoured place among the worthies of the art.

The "Trovatore" may be regarded as the best work he has yet produced. As a drama it is not equal to some of his previous operas. The story is revoltingly horrible, confused, and full of gross improbabilities. It turns upon revenge in its most atrocious form. A Gipsy woman, put to death by a nobleman on a charge of witchcraft, has a daughter, to whom she bequeaths the task of avenging her death. The daughter steals the *Count's* younger child, and brings him up as her own, instilling into his mind a hatred of his own brother, whom he knows not to be such. The brothers become rivals in love, the reputed son of the Gipsy (who has risen to distinction) being preferred by the object of their passion. The quarrel becomes deadly; the younger brother falls into the hands of the elder, who orders his execution. The Gipsy witnesses the death of her supposed son; and, when the axe has fallen, turns exultingly to the *Count*, exclaiming, "My mother is avenged; you have murdered your own brother!" The lady who is beloved by the rival brothers, unable to save her lover's life, swallows poison.

This black drama, equalling in horror the wildest imaginations of a Parisian melodramatist, is, nevertheless, strongly interesting, and its striking situations and impassioned scenes afford much scope for musical expression and effect. Of these capabilities the composer has availed himself; and the opera, when well performed, never fails to make a deep impression on the audience.

It has, probably, never been better performed than by the company of the Royal Italian Opera. *Azucena*, the Gipsy woman, on whose terrible revenge the whole piece turns, is represented by Mdme. Viardot in a manner worthy of her original genius. Like *Fidès* in the "Prophète," it is a creation entirely her own: full of individuality and truthfulness. She is a true Gipsy, exhibiting the peculiar features and violent passions of her race. Nothing can be more artistic than her singing, though the extraordinary power of her acting throws it into the shade.

Musically speaking, the part of *Leonora* is more prominent. The music of this part is of the most brilliant and arduous kind, bringing into action the whole powers of Mdlle. Jenny Ney's voice and execution. The lady is not only one of the most accomplished singers, but one of the greatest tragedians, now on the stage. Tamberlik gives the greatest possible effect to the character of the hero of the piece, *Manrico*, the younger brother; and the elder, the *Count di Luna*, is excellently performed by Tagliafico. The opera has been put upon the stage with even more than usual splendour. Some of Beverley's scenes (particularly the second) and the costumes, decorations, and other accessories, are rich and tasteful.

The accompanying Illustration represents a striking situation in the fourth scene of the second act. *Leonora*, believing her lover dead, has resolved to take the veil, and is proceeding towards the chapel with that intent, followed by her female attendants. The *Count di Luna*, at the head of a band of armed men, has issued from the adjoining wood, to carry her off by force, when *Manrico*, suddenly appearing, "like a vision," stands between them. *Leonora* is kneeling, with her arms stretched towards the form of her lover, in an attitude of joyful wonder, while the *Count*, with folded arms, looks on in haughty indignation.

"A NEAPOLITAN FISHER-BOY," PAINTED BY G. A. HURLSTONE, EXHIBITED AT THE SOCIETY OF BRITISH ARTISTS.

EXHIBITION OF SOCIETY OF BRITISH ARTISTS, IN SUFFOLK-STREET.

THE "Neapolitan Fisher-Boy," to which we directed attention in our notice of the Exhibition in Suffolk-street, is a very pleasing example of the pencil of the able President of the Society of British Artists. It will be seen how greatly the fisher-boys of Naples differ from our own Hastings and Cromer boys, and from the Boulogne fisher-boys—now so familiar even to the veriest Cockney. Mr. Hurlstone has thoroughly understood the characteristics of the class he has so successfully portrayed. Few English artists have caught more happily the boyish peculiarities of Spain and Naples than Mr. Hurlstone has done. The execution of the picture—though somewhat rough—is in good keeping

SCENE FROM VERDI'S "IL TROVATORE," AT THE ROYAL ITALIAN OPERA.

London: Printed and Published at the Office, 198, Strand, in the Parish of St. Clement Danes, in the County of Middlesex, by WILLIAM LITTLE, [illegible] Strand.—SATURDAY, May [illegible], 1855.

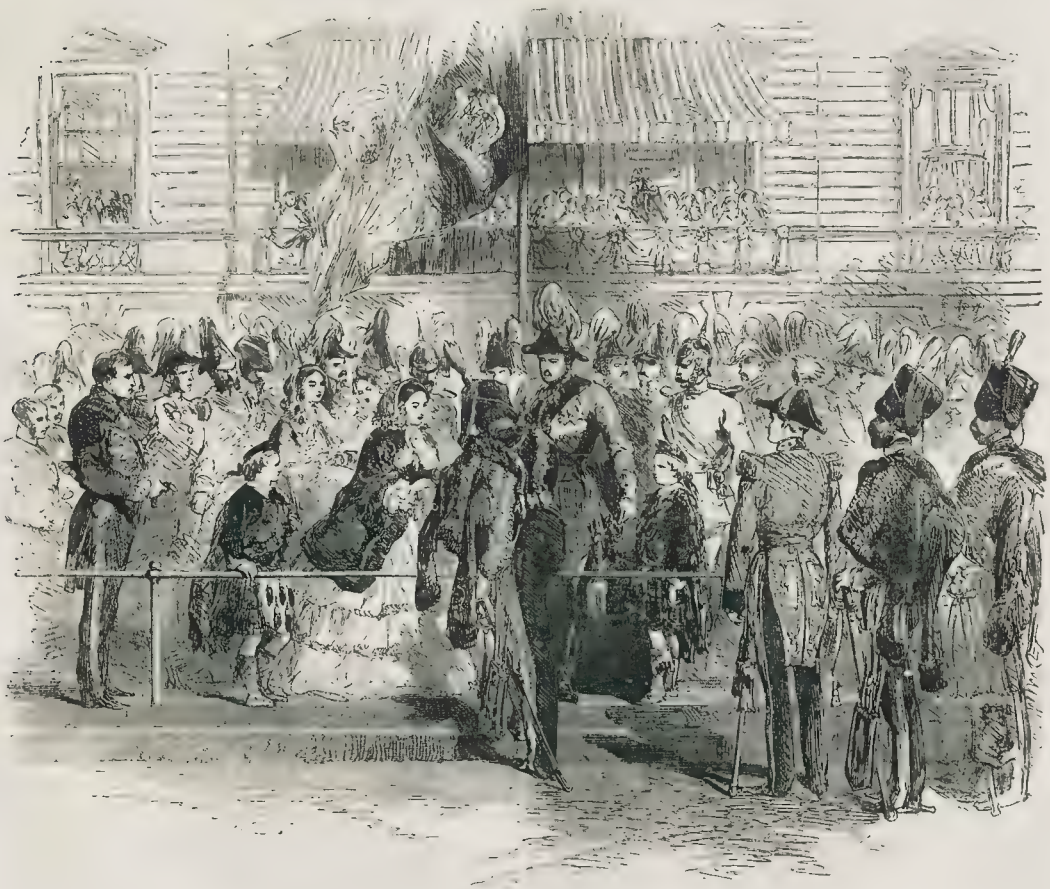
THE ILLUSTRATED LONDON NEWS.

No. 744.—VOL. XXVI.] SATURDAY, MAY 26, 1855. [WITH A SUPPLEMENT, SIXPENCE.

THE MINISTRY.

THE great British nation is in a "fix." The arbitress of civilisation—the foremost State in all this breathing world—the coloniser and the mother of States and Empires—the mistress of India, of Canada, and of Australia—upon whose wide dominions the sun never sets—the most populous, the most wealthy, and hitherto the most vigorous and enterprising Empire in the world—is, if we may use another expressive colloquialism, in a "cleft stick." In the cause of right and justice, in support of the oppressed, and in vindication of the public law and morality of Europe, she has entered into a war against a large and powerful Empire, but not so large and powerful as herself. In this struggle her opponent stands alone, and has to bear the tacit or avowed disapproval of every State in Europe, and the still heavier weight of the active hostility of the only Empire in the world that can claim equality with England in art or arms, in moral prestige or in material resources. And yet, notwithstanding all these and many other advantages—the possession of which ought to raise a small nation into the position of a great one, and to make a great nation still more great and glorious than ever—England is in a "fix"—foiled by the arms and bamboozled by the diplomacy of her foe. And who is to blame for this state of things? Is it the people or the army? Certainly not. Is it the Parliament? It cannot be alleged. Is it the Government? We fear, and indeed we know, that the Government is doubtful of the cause that it has taken in hand; that it is not able to lift itself to the level of its duty, or of the destiny of the country; that its members lack confidence in themselves, or in the people whose interests they have undertaken to guard; that they are timid when they ought to be bold; and that they have listened, and are preparing once more to listen, without displeasure, to propositions for peace, where there is not and where there cannot be, peace—and the mere mention of which ought, among a nation of average spirit and courage, to be considered as an insult. It is no longer a secret that the Government is grievously disunited; and that the Premier—the statesman whose name was once a tower of strength in support of the honour of England—sees other means of ending the war than the dictation of peace to Russia; and that more than one of his colleagues are agreed with him. If the people of England were unfortunately of the same opinion, English patriots and true statesmen might well say "Farewell to the honour and glory of England! Our race is run;—our star has culminated; the tale of our greatness is a tale that is told; we must go the way of Greece and Rome, and of other Empires that became effete, and must receive from others the laws which we were formerly able to dictate."

But if the people do not share the opinion of a section of the



DISTRIBUTION OF THE CRIMEAN MEDALS BY HER MAJESTY, AT THE HORSE GUARDS.—(SEE PAGE 506.)

Palmerston Cabinet—if, as we believe, they loathe and scorn it, and are as far in advance in right sentiment as the peace-at-all-price party is in arrear—we may ask how long is such a Government to last? And is not every day that it continues in office a day of peril, which may be succeeded by a day of shame and humiliation?

Far be it from us to say that the Conferences of Vienna ought not to be reopened. If Russia have any proposition to make which is not a sham and a delusion, by all means let her make it at Vienna—if that place suits her better than any other; or at Paris and London, if she really desires to end the war which she has provoked. If Austria, who bids fair to bring upon herself by her hesitation a ruin far more sudden and complete than she could possibly incur by the utmost stretch of boldness and decision, imagines, in her intense dislike of the war, that she has hit upon a compromise which can satisfy the honour of all parties, while it conduces to the permanent security of Europe, by all means let her say her say, and make a clean breast of it. But that the Government of this country, after their bitter experience of the fact that Russia will not and dare not yield except to force, should still persist in clinging to the absurd hope that any good can come of such negotiations, is damaging to the character and the arms of England. It is enough to paralyse the energies and the zeal of our Generals, to discourage the brave men who are fighting in our cause, to ruin us in the opinion of our Allies, and to make Austria and Prussia seriously consider whether it would not be the wiser and safer policy to leave us to our fate and coalesce with Russia. More than all this, it is enough to lead to the belief among our dependants in Asia, and among our rivals in Europe and America, that we reached the climax of our greatness in 1815; that we are but a nation of vain boasters; that we can talk, but cannot do; that we can brag, but not perform; and that we care far less for our honour and our character than for our miserable ease and our still more miserable money.

Let the friends of peace at all price have their say and their day, and see in what result they would plunge us if their efforts were to be successful. Those who have faith in any further negotiations at Vienna might allege—"By all means let us have peace! We had no business with the Turks or with the Russians. Our duty was to make cotton goods, and sell them; to reduce our military and naval establishments, so that the legitimate profits of trade might not be unduly diminished by taxation for the support of those much-consuming, but non-producing locusts—our soldiers and sailors. Let us have peace, by all means. Russia is not vindictive. If she desires the preponderance in the Black Sea, it is natural that she should try to obtain it; and if she wants Constantinople also, let us not forget that Constantinople is a pleasanter residence and a more available and commanding position than St. Petersburg. Why should she not obtain it if she can? Have we not acquired Calcutta, and Bombay, and Madras? Constantinople is not ours. We have no right to it. If the Sultan cannot keep it, that is his affair and that of his people. Are we to right the affairs of the whole world? If France chooses to be such a fool, let her. She will have work enough upon her hands if she undertake the task. But we are wiser and more prudent. The only sound doctrine is that of non-intervention. We have no concern with the affairs of Europe. If Russia, in addition to Turkey, desire to annex Sweden and Denmark, she may if she can. At all events it is no business of ours, though we may pity the poor Swedes and Danes if the scheme succeed! If Austria desires Piedmont, let her take it. If France determine on the annexation of Switzerland again we say, we have nothing to do with it, except to express an opinion that it is very wrong. Let the United States take Cuba, and let Spain defend it. We shall not interfere. Our duty is to look to our own business, and let other nations look to theirs. As for Russia, it will be time enough for us to take offence against her when the Czar sends a squadron to the Frith of Forth, or menaces Ipswich and Dover. He is not likely to attempt anything so hazardous, for we know, on the authority of Lord Lansdowne, that, much as the armies of England have suffered, those of Russia have suffered still more; that where we have lost one soldier he has lost a hundred; and that all our money-losses are trifles to those which he has incurred, not only in actual expenditure, but in damage to his trade and resources. Besides, should he attack us on our own soil at some future period, even the worm will turn when trod upon, and why not Great Britain?"

It is with shame we confess that such arguments as these are maintained by men who call themselves Englishmen; but what, we ask, would be the result if such cowardly doctrines were to sway the councils of the nation? The merest tyro in history could predicate it. Russia would inevitably obtain Constantinople. She would be the mistress of Europe. England and France would exist in her shadow, and hold their commercial position by her sufferance. With our character would fall our credit, and with our credit our dominion over every part of the world, except within the limits of our own little islands; and it would only depend upon the forbearance of a Power that has never been forbearing, and upon the justice of a nation that has never been just, if we had not to fight for our independence or our very existence upon our own soil.

Even if the House of Commons entertained such sentiments no true Englishman would despair of the cause that his country has undertaken. Englishmen are not likely to forget that the same power which made the House of Commons can unmake it. But if the Ministers entertain such opinions—or are even supposed to entertain them—it is the duty of the House of Commons to disavow them. If without the sanction of Parliament the Ministers were to make a dishonourable peace—which they may do if they please—impeachment would cease to be an empty word, and the nation would have to proceed to the judgment of criminals of a higher position than it has seen since the days of the Jacobites. It is of no use for Lord Palmerston, or any other Minister, to speak in vague and general terms, and to say that he will agree to no peace that is not "safe, honourable, and satisfactory." The country wants to know upon what terms he considers peace to be safe and honourable; and it will be for the country, not for the Ministry, to decide whether such terms are satisfactory. The Russian view of the Third Point, as disclosed at Vienna, is considered safe and honourable by some persons in the House of Commons; but does any one, except Mr. Milner Gibson and Earl Grey, and a score of persons in, or, it may be, a hundred or two of persons out of Parliament consider it would be satisfactory? The nation has had too much of jocularity and jauntiness on grave matters; and Lord Palmerston must declare once for all his policy and his intentions, so that there may be no mistake in England or out of it—among our Allies, or among our foes. If he do not, he must give place to a bolder and wiser Minister. We may end the present war, and adjourn the next, for a few years, by patching up an inglorious peace; but, in that case, it is probable that when war ends Revolution will begin. But is this the point to which the Ministry is drifting us?

THE RUSSIAN MANIFESTO ON THE NEGOTIATIONS.

Count Nesselrode's circular note to the Russian Envoys at the several Courts in that country, giving the Russian account of the Conferences at Vienna, appears at full length, in an extraordinary supplement of the *St. Peter-burg Journal* of the 19th inst., in which it occupies six columns. Like all other Russian State Papers, the new document exhibits great skill in evading any discussion of the actual state of things. Mr. Bright himself could not have made out a more triumphant case in favour the peaceful intentions of Russia, and the unreasonableness of France and England, than the old Chancellor has done. The following summary of the line of policy taken by the Court of St. Petersburg will show the spirit in which Count Nesselrode's circular has been drawn up:—

The first condition was one of political rivalry. The Emperor regarded it from the most elevated point. He resolved upon it in the interest and benefit of the Principalities, of which Russia has promised to guarantee the prosperity. She has kept—and she will keep, that promise.

The second was united with the general interests of commerce. The Emperor decided in favour of the commercial liberty of all nations.

The third concerned not only the general equilibrium, but it nearly touched the dignity and honour of Russia. It was thus that our august master considered it. The national sentiment of the country will unanimously respond to this decision.

The fourth concerned religious liberty, civilisation, and social order all over Christendom. In the view of the Imperial Cabinet, this condition ought to be placed at the head of any treaty of general pacification, for it is worthy of receiving the sanction of all the Sovereigns in Europe. The Plenipotentiaries of France and England refused, however, to open the question of religious interest until that concerning the navigation of the Black Sea had been settled.

After this observation there remains nothing for us to add to the statement just made.

You are authorised to bring this narrative under the view of the Cabinet at which the Court you have the honour of being accredited. They will decide on which side there was the most desire seriously to arrive at the establishment of peace. They will decide on which side obstacles were raised which have hitherto delayed that salutary work. If it is prevented definitively by the rupture of the Conferences, the impartial opinion of friendly Powers will attest to Russia the justice of acknowledging that she has spared no effort to secure the success of a negotiation intended to realise the desire, profoundly felt, of a general pacification. Europe may count upon the constant and unalterable gratitude which the Emperor will know how to devote to that great interest, when the time shall come that Divine Providence will enlighten the conscience of Christ's whose hostility, implacable even before the mournful developments which cover an unjust bomb, calls upon his Majesty, with arms in his hands, to defend the honour and safety of his country.

THE WAR IN THE BALTIC.

(To the Editor of the ILLUSTRATED LONDON NEWS*)*

THAT there are "cravens in council," and that the war has hitherto been grossly mismanaged, admits of little doubt. Things appear to be mending in the Black Sea, but the little effected last year in the Baltic seems to have produced an impression that our enemy is there unassailable; for we too often hear the question "What can we do in the Baltic?" It is somewhat surprising that this has not been answered; and with your permission I submit the following:—

The present fleet under Rear-Admiral Dundas will probably be strengthened by ten more sail of the line, as many more screw gun-boats, and mortar-vessels, and two of the shot-proof batteries. The Aland Islands are admirably suited as a base of operations; and there the transports, stores, and hospitals might be kept and established.

A blockading force of eight sail-of-the-line and a few smaller vessels should be stationed in Baro Sound to watch Sveaborg and Helsingfors; another, of greater strength, at a convenient distance from the west end of Cronstadt—having prepared to meet the enemy should he come out. These two harbours contain nearly the whole of his fleet. Revel might then be bombarded and destroyed with guns of sufficient range; and, if advantage were taken of a fog, a small force collected with comparative impunity—our measures known and exactly where to push shot and shell, while the enemy's batteries could only fire at random in return. Other places could be visited in like manner. This year let there be no half-measures, and the war will soon be brought to a close.

Helsingfors, in consequence of the strong forts of Sveaborg, is very difficult of access, but, if the shot-proof batteries are found to answer, some of these forts may be successfully attacked, and a position gained from which the town and harbour may be burned by hot shot or shells from our gun-boats and mortar-vessels.

It would be madness to attempt Cronstadt in the face of those immense forts; but last year it was easily assailable from the north. The fleet would be anchored off the west end of the island, for the double purpose of meeting the enemy should he venture out, and for covering our operations in the north channel, the end of which (towards St. Petersburg) the Russians some years since very obligingly closed up, and have thus added to our security. Here a room for steamers, gun-boats, and transports, to lie in security. The best charts show a depth of three fathoms within a mile of the shore, the intermediate space being a mud bank with from ten to six feet of water upon it. The distance from the water on the north shore to the enemy's fleet, which are moored close together beyond the dockyard and stores, is another mile and a quarter, or two miles and a quarter from the three-fathom mark: that is well within range of our mortar-boats. We should have to contend with a strand batteries, and some from the town; but, with an unlimited command of Baltic timber, rafts might be floated on to the mud bank (there are no tides), and sandbag batteries made that will stand more hammering than the stone walls. There would here be no danger from sorties, the enemy's shot being the only thing to guard against, while our supplies and reliefs would be close at hand. The object of the expedition is *to destroy the Russian fleet.* I consider it might be thus burned, together with the dockyard, all the stores, magazines, and the city of Cronstadt, and without any great sacrifice of life on the side of the Allies.

The papers state that 20,000 troops are to be sent to the Baltic. The wisdom of this step might be questioned, for it would be too large a force to act with the fleet, and too small a force to be of use as a body against the Russian troops on shore. Two thousand Marines, with 500 Sappers and Miners well commanded, and kept at the Aland Islands in readiness to embark in half a dozen steamers at an hour's notice, might effect a great deal in the way of destroying telegraph stations, cutting up roads, and surprises, that would have the effect of harrassing the enemy's troops, and keeping the whole of his exposed coast in constant alarm; but this force should never be allowed to remain ten hours in one place, or a strong force of the enemy would be concentrated to crush them. If the war were carried on vigorously in this style, the Russian merchants and nobles would soon change their tone, and oblige the Czar to sue for peace in less than three months; but if we still go on temporising, and *afraid to strike hard*, it may last for years. I am, &c.,

14th May, 1855. A CAPTAIN ROYAL MARINES.

BROWN BESS AND THE MINIE RIFLE.—I have had it in my power to give a satisfactory explanation of a point respecting the Guards, which has puzzled many somewhat mysterious. The fresh draughts came over well. Brown Bess and the older soldiers are armed with Minies, the confusion of the two weapons in one and the same corps seemed danger ous to their efficiency in battle. Upon enquiry in the proper quarters I find that the men were sent out on purpose with their old muskets, because at least 6,000 horses of the Army, and, another say of two the whole of the corps will be provided with that formidable weapon. It is intended to distribute the smooth-bore percussion muskets to the Turks, in whose hands our enemy findsticks; and I can only hope that in the distribution of those favours the brave and hardy Egyptian troops will have the preference. Indeed, I would well pay if the Egyptian Sappers were provided with Minies. They are capital shots, have a decided talent for mechanics—more especially as applied to firearms—and with a very little instruction they would soon learn to clean their Minie rifles, and keep them in order. Since these dusky troops are our allies, and fight on our side, it is obviously our interest to make them as effective as they possibly can be made.—*Letter from Kadikoi, May 7.*

THE PARIS UNIVERSAL EXHIBITION.

(From our Special Correspondent.)

PARIS, May 22.

SINCE I last wrote, the Universal Exhibition has been thrown open to the world—or to so much of the world as chose to accept an invitation, price fifty francs, to the inauguration. I do not entirely share the opinions expressed in several Journals on the general arrangements. I allow that the correspondents of English papers—and on this occasion the representatives of the English public—were not well treated: but I am not certain that this ill-treatment can be traced home to the English Committee. It is to be lamented, however; because its result was a want of colour in all the accounts of the opening ceremony sent to London. It is wonderful to me, knowing how little the representatives of the English public saw on the occasion, how they contrived to gather together accounts in every respect so faithful of what took place. For myself, I may state that I was excellently placed to see the backs of the ladies' bonnets in the galleries. By dint of stretching myself forward I could just catch a glimpse of some velvet hangings, which appeared to indicate to the imaginative people round about me the neighbourhood of the Imperial seats. All I did see was the procession round the building, the low dress of the Empress, her gracious smiles and stately steps, and the serious, impenetrable face of her illustrious consort. The Court ladies have been called by one of the London correspondents "an ugly set." Beauty is a matter of individual taste. I like a pug nose, perhaps; well, Tomkins will lose his heart only to a Roman bridge. Jones likes blue eyes—to him they are the only eyes; now I melt under the influence of grey orbs, fringed with black. Therefore, to the eyes of some men the Court ladies who surround Eugénie may be wanting in all the elements of the beautiful. But —well, I leave readers who intend to visit Paris this summer to judge, when they stand before Winterhalter's great picture in the Fine Art Building of the French Empress surrounded by the ladies of her Court. None of these notes are intended to be beauty of their Imperial mistress, perhaps; but are they "an ugly set"?

Let us now turn to the Exhibition as it now appears open to the world!

I will refrain from drawing comparisons between certain parts of it—even now—and Pickford's yard! We will pass by the Machinery Gallery, still in progress; pass the Panorama, the Buffet, and the Connecting Gallery, still in progress also, and arrive at the points of the Exhibition which are most advanced. The Nave is now nearly finished. It is crammed from one end to the other with pieces of sculpture; church architecture of all kinds, including two pulpits and at least six altars; war trophies of formidable aspect—the great naval trophy of England; some Saxon china of gorgeous design; a magnificent candelabrum by Osler; a stall of beautiful French glass; a Royal carriage from Brussels; a lighthouse encompassed with Géromes's fine allegorical figures of maritime towns; Islington's specimens of castings including "Boadicea," by Thomas, R.A.; Bell's "Eagle Slayer"—these and many other things are among the attractions of the Nave. But let the visitor once wander from the Nave where everything is disposed for show, to the Courts on each side, and he will at once see how far the Exhibition is from being completed. The English Courts are perhaps the most advanced of all in the Building; but even these are not quite out of the hands of the workmen. The same with our beautiful Indian Court, where the manufactures indicative of the wealth of our subject princes are displayed; although Dr. Royle has managed to make an excellent show—to cram a gorgeous tent with furniture of Bombay and other work, with crowns and state chairs, and ivory chess men and chess tables—he has still much to accomplish. But then he is no doubt consoled with the view of other countries far behind him. There is the gaudy Turkish Court, for instance, empty! There are Sweden and Norway leisurely nailing up the deal foundations for counters! There are the American authorities snugly ensconced in a deal watch-box, opposite the principal entrance, awaiting to begin business! This American delay is accounted for, I am told, by the fact that at the last moment, when the Yankee goods were ready to be sent off, the American Government refused to give the Commissioners a ship to carry them across the Atlantic. This refusal was a mistake, for I believe that the French Commissioners are really irritated by the vacant space which the American allotment still exhibits. Not that these authorities can be in any way pleased with their own countrymen, for, indisputably, the most unfinished half of the General Exhibition is that allotted to French goods. Then, again, this delay is said to be attributable to indecision at head-quarters. Certainly only a week before the opening day numbers of French exhibitors had not been told where they would be allowed to place their goods.

As yet the great Machinery Gallery, which will certainly present the most original effect of any throughout the Universal Exhibition, and the Connecting Gallery, are unapproachable to visitors, and when I add that in this Connecting Gallery are to be placed a brilliant collection of the wonderful *articles de Paris*, that the Panorama building encloses the collections from Sèvres, the Gobelins, &c., the reader may be left to judge for himself whether or not the time has arrived for his Exhibition visit to Paris. The fact is, the Universal Exhibition will not be fit for inspection throughout before the middle of next month, at the earliest. Those deluded people who, in small groups, are led to pay five francs a head entrance money, must return to their hotel in a state of desperate discontent. I sympathise with this state of things to your readers with regret, because I fear that it will deter many altogether from their projected visit to Paris. This would be a pity—inasmuch as the Art Exhibition of All Nations is worth alone a long journey. No less than twenty-eight nations have sent in specimens of their modern art. Here is represented the genius of more than two thousand artists, here are collected together nearly five thousand works of art by living men, or men living when France sent forth her invitations to the world. Englishmen should come to see their own school in contrast with those of France and Germany. They will return home, on the whole, satisfied with the manner in which Anglican art has here asserted itself bravely, even in the teeth of Frenchmen who would give it up to ridicule. To this part of the Exhibition I would advise all lovers of art to come at once; it is perfectly ready for their inspection. They will find in the collection no less than 777 English works, 270 from Belgium, 224 from Prussia, 159 from Austria, 131 from Holland, 123 from Spain, and 111 from Switzerland. Even Java and Mexico contribute a painting each; while Peru sends five, although Turkey has mustered only one! The United States have mustered ten painters, who have sent thirty-nine paintings; and two sculptors, who have sent four pieces of sculpture.

The weather continues to be wet and chilly—most unpropitious for the money-takers before the Palais de l'Industrie and their employers. The day after the opening, however, 1700 people paid to the Palace, and 737 to the Fine Art Building.

RUSSIAN LOSSES.—Lord Lansdowne stated in the House of Peers last week that the Russian loss since the commencement of the war had been 247,000 men. The following are further details. In the month of January last a report was presented to the Emperor Nicholas, stating the loss of the army at 187,000 men, including those who died under the severity of the long marches and of sickness. A new report was presented to the Emperor Alexander in April, fixing the total loss of the army to March 31 at 230,000. In this report especial stress was laid on the effect of the typhus, and some disastrous incidents were particularised. It was stated that an entire company had perished under the snows between Odessa and Perekop, and another between St. Petersburg and the south. An entire battery has been lost in the same manner, with the men and horses. The guns were found after the thaw, and are again in use. It is calculated that the addition to the Russian army to be made under the last ukase will consist of about 240,000 men. Twelve in a thousand is the ratio, and the area includes the most populous governments of the empire.

"WILD DAYRELL," WINNER OF THE DERBY, 1855.

EPSOM RACES.—THE DERBY DAY.

THIS great race has fully shared in the universal dulness which has pervaded the Turf ever since its regular military supporters, some five or six hundred strong, received their marching orders for the Crimea. At one time, however, it seemed as if its seventy-sixth anniversary would be one of unusual interest, owing to the heavy betting which had taken place about some five or six of the favourites. These hopes proved fallacious, and one by one the objects of them were scratched, till at last John Scott had (as in 1850) not one starter out of his lot of fourteen, and the field sank to twelve. In fact, Nat, Templeman, Rogers, Whitehouse, Bumby, Charlton, and Wells, found their horses taken from under them by the fortune of war, and were merely present as spectators! The history of the defunct favourites is easily told. Grecculus Esuriens has been infirm and done his work very irregularly all this spring, while Bonnie Morn has been both lame and unrich into the bargain. De Clare was therefore the only crack the Whitewall stable had left, but he broke down so palpably towards the end of last week, that he was friendless on Monday, and scratched on Tuesday. Cruiser, who would have been John Day's horse, was equally unfortunate about three weeks since; St. Hubert could not stand his preparation more than a fortnight or so after his Two Thousand Guineas race; and his companion, Oulston, was scratched for pretty palpable reasons to those who had watched the money market at Tattersall's. As if to complete the chapter of accidents, Rifleman, who had been doing comparatively well the whole spring, and been ver highly tried, was found to be so lame on Monday, that Mr. Osbaldeston at nce announced at Tattersall's that he would not start; and thus the "Squire's" fondly-cherished hopes of a Derby victory have come to an end—most probably for ever. All these casualties are hardly to be wondered at, as the spring has been dry beyond precedent, and horses need sinews of iron to train every anything but a tan-gallop. The friends of Lord of the Isles were very sanguine about their horse till Wild Dayrell was seen in the Paddock, and then their courage began to give way. Nothing could be finer than the condition in which this beautiful monster (for we know not what else to term him) was brought to the post by his private trainer, and it certainly seemed a foregone conclusion the moment the sheets were removed from his back. The anxiety to see the horse was immense; but his temper was so perfect that he did not take the slightest notice of his enthusiastic auditory. His trial (8 lbs. to Jack Sheppard) was not thought a very high one when it first came out; but Orinoco's running on the previous day greatly enhanced its value. With the exception of Flatterer and Lord of the Isles, the remaining eleven were very ordinary-looking, although Rylstone was the *beau-ideal* of a clever hunter. Robert swelled the throng with three, and was considerd (as he is always is) about Dirk Hatteraick, who looked dull, and very little, if any, improved. Lord of the Isles also seemed by means in the same form as he was when he won the 2000 Guineas; while Little Brownie hardly bore out the high private character which he brought from Beverley with him.

The start was made without the slightest difficulty; and at the brow of the hill the Lord of the Isles (who laid next the rails) had a slight lead. At the mile-post Kingstown went resolutely to work, Wild Dayrell waiting quietly at his quarters, and brought the lot along at a very strong pace to the distance, where these two and The Lord were the only ones left in the race. Alfred Day worked hard at his horse, and Aldcroft brought The Lord again at the Stand, but only to lose the second place by a head, as Wild Dayrell was never caught after the distance, and won "hands down" very easily by a length. Flatterer was fourth, and Corcebus and Courtenay next, thus putting at defiance all Fobert's calculations as to their stable companion Dirk. Little Brownie ran gamely till within a quarter of a mile from home, when the pace became too good for him, and Job Marson's whipcord was of no avail. The winner was very steadily ridden by Ralph Sherwood, who was bred at Epsom; he has been in Mr. Popham's service of late, and has ridden the horse in all his gallops. One or two other jockeys of higher standing had been engaged; but Sherwood had done his duty so thoroughly at home by the horse, that Mr. P. determined not to displace him in favour of any one—a piece of kind feeling which met with its full reward. It is incorrect to say that he is not a regular jockey, as he has always been bred to the profession, and ridden for his father's stable, besides winning some good prizes in France last year. The stakes amount to £4925 net, which is about £1000 less than they were in 1854: Alfred Day was second, in Mr. Hill's colours—the same fate which attended him in 1850, when Voltigeur, another home-trained horse, was successful. It is a fact, that on this occasion, he was promised the whole of the stake if he won, and it was singular ill-luck to be pitted against an animal of such remarkable size and power. The audience on the Downs was hardly so great as it usually is, and unusually apathetic, until Wild Dayrell was led back *from* scale, when they raised a shout, which for heartiness we have seldom heard excelled, except on a Yorkshire race-course. Winners and losers seemed for once to agree, that, true to the great maxim of the hour, they saw "THE RIGHT HORSE IN THE RIGHT PLACE." Subjoined is a return of the sport:—

TUESDAY.

Craven Stakes.—Chicken, 1. Ellermire, 2.
Woodcote Stakes.—Lawn, 1.
Epsom Summer Handicap—Escape, 1. Hercules, 2
Horton Stakes.—Sextus, 1. Bordeaux, 2.
Manor Plate.—Orinoco, 1. Eulogist, 2.
Heathcote Plate.—Comfort, 1. King of Trumps, 2

WEDNESDAY.

Carew Stakes.—King of Trumps, 1. Lanswood, 2.
Derby Stakes.—Wild Dayrell, 1. Kingstown, 2. Lord of the Isles, 3. Flatterer, 4.
Great Exhibition Plate.—Tom Bowling, 1. Eulogist, 2.
Epsom Cup.—Ratapian, 1. The Nabob, 2
Epsom Town Plate.—Orinoco, 1. Duke of Lancaster, 2
Dorsdun's Stakes.—The Novice, 1. Nestor, 2

THURSDAY.

Four-year-old Stakes.—Mad Antony, 1. Tom, 2.
Two-year-old Stakes.—Sugar-Cane, 1. Bubble, 2.
Grand Stand Plate.—Veteran, 1. Cossey, 2.
Cobham Plate.—Duke of Lancaster, 1. Old Rowley 2.
Queen's Plate.—Ellermire, 1. Nell Gywnne, 2.
Selling Stakes.—Allington walked over.

FRIDAY

The Oaks.—Marchioness, 1. Blooming Heather, 2. Capsicine, 3. Elsworth. Nettle fell.
Members' Plate.—Radulphus, 1. Chisel 2
Bretwa Plate.—Rosaline, 1. Radulphus, 2
Foal Stakes.—Escape, 1. Herald, 2.
Derby and Oaks Stakes.—Novice, 1. Usurer, 2.
Foreign Visitors' Plate.—Professor Airy, 1. Cornu, 2.

NATIONAL SPORTS

THE great racing problem of the year is at last most satisfactorily solved in favour of a country squire (Mr. Popham, of Littlecote, Wilts), who has, we believe, never owned race-horses before. Owing to countless breakings-down and scratchings, only twelve horses came to the post—the smallest number that has ever been seen there since the Duke of York won thus race with Moses in 1822. The winner is full sixteen one, and most capitally furnished to boot. In short, there was but one opinion among racing men in the paddock, viz., that such a magnificent animal has hardly trod the turf during the present century. Neither he nor Kingstown is in the St. Leger, and hence, at this present moment, that race seems anybody's, and will, no doubt, bring out a very large field.

The Manchester meeting will be quite a Triton among the minnows during the ensuing Whitsun week, and has as usual a strongly filled list. Ellermire has a 5 lb. allowance in the Produce Stakes, for which Lord of the Isles carries 7 lb. extra: her old Catterick opponent Lady Tatton also meets her on equal terms; and Lady Palmerston, Vandal, and Lord Alfred are in the race—the two latter with 3 lb. allowed. The Sapling Stakes has no name of note among its 29; but the Union Cup has a great entry of 74, which is headed by Andover, 8st. 12lb. On Thursday the principal features of sport are the Two-Year-Old Stakes, the Chesterfield Handicap, and the Tradesmen's Cup, for which 25 have accepted. The Salford Borough Cup, on Friday, has 28 acceptances; and the meeting promises on the whole to be one of considerable spirit. The other fixtures are Redditch on Monday and Tuesday; Coggeshall, Wye, and Cardiff, on Wednesday; and Southwell, the North Herts Yeomanry Meeting at Royston, and Confy Castle, on Thursday. The Portland Plate and Eglinton Stakes for the ensuing Doncaster Meeting close on Tuesday next; and we hear that the Newmarket Second Spring Meeting is to be abolished, and the Craven and First Spring limited to four days, and commence on the Tuesday.

Cricketers are now in full force for the season, and the weather is beginning to invite not a few spectators to the "tented field." Whit-Monday will be celebrated at Lord's by a match between the North and South of England; and on Whit-Thursday the Surrey v. England issue will be tried at the Kennington-oval. The water diversions of the week will comprise a four-oar race between crews of the London Unity Club, who will row from Wandsworth to Lambeth at 5 p.m. on Tuesday. Leads has fixed its Regatta for the same day; and on Friday the Birkenhead Model Yacht Club have their opening trip. St. John's has left off at the head of the river, and hence "the willowy Camus" must "murmur with delight" that her courtship is not incompatible with the acquisition of the highest University honours.

There will be some sales of interest at Tattersall's next week, among which may be reckoned the Maresfield yearlings (nine in number, and principally by Collingwood) on Monday; and the five Dudding-hill yearlings on Thursday. A stud of twenty Vale of Aylesbury hunters will also come to the hammer on Thursday, as well as some greyhounds of the Sam, Foremost, and Bedlamite blood from the Cardington country. Lord Spencer's yearlings did not sell as well as usual last Monday, as the Cotherstone blood is rather going out of fashion; but hunters have of late fetched very great prices. A stud of twenty-eight, last week, averaged 170 gs., the top price being 420 gs.

THE Duke and Duchess of Brabant, at their late visit to Jerusalem, were admitted to enter and examine the mosque of Omar, built on the second site of the ancient temple, mentioned in Scripture. Hitherto no Christian had ever obtained leave to enter this Mussulman building.

"WILD DAYRELL," THE WINNER OF THE DERBY.

WE engrave a portrait of Wild Dayrell, who so easily carried off, to use the expression of the late Lord George Bentinck, "the blue ribbon of the turf," on Wednesday last. He won the Derby by two lengths easily.

Wild Dayrell was bred by F. J. Popham, Esq., of Littlecote-hall, near Hungerford, and in the paddocks attached to a baronial seat celebrated in heraldic history. His sire is Ion, son of Cain; and his dam Ellen Middleton, daughter of Bay Middleton, a former winner of the Derby, for whom the late Lord George Bentinck gave no less a sum than £6000. Wild Dayrell stands 16 hands 1 inch high; and is dark brown in colour. The horse was trained in Mr. Popham's own park, by Rickaby, his private groom. Since the winter of last year he has been ridden in exercise by Robert Sherwood (son to Mr. Sherwood, trainer, of Epsom), who steered him in his victory on Wednesday last. The triumph of this horse will (as Mr. Dorling, of Epsom, truly remarked) dispel many of the delusions which people entertain regarding the turf. The horse, a good one, was bred by a gentleman, trained in his own private park, and ridden by his private jockey. Yet he won! Mr. Popham, though for many years an ardent admirer of the sports of the field, has not until last year, when Wild Dayrell won a race at Newmarket First October Meeting, been engaged in racing matters. We believe that Earl Craven is a part proprietor of the horse. The field, twelve in number, is the smallest which has started for the Derby for nearly a quarter of a century.

MAY-DAY IN THE CRIMEA. A blue sky, dotted with milk-white clouds, a warm but not too hot sun, and a gentle breeze fanning the flattering canvas of the wide-spread streets of tents, here pitched on swelling mounds covered with fresh grass, there sunk in valleys of black mould, trodden up by innumerable feet and hoofs, and scattered broadcast over the vast plateau of the Chersonese;—it is enough to make one credulous of peace, and to listen to the pleasant whispers of home, notwithstanding the rude interruption of the cannon before Sebastopol. This bright sun, however, develops fever and malaria. The reeking earth, saturated with dew and rain, pours forth poisonous vapours, and the sad rows of mounds covered with long dank grass, which rise in all directions above the soil, impregnate the air with disease. As the atmosphere is purged of clouds and vapour, the reports of the cannon and of the rifles become more distinct. The white houses, green roofs, and the domes and cupolas of Sebastopol stand out with tantalizing distinctness against the sky, and the ruined suburbs and masses of rubbish inside the Russian batteries seem almost incorporated with the French intrenchments. The French on the left are indeed too near the enemy's lines; they are exposed to constant annoyance and loss by frequent volleys of hand-grenades and coborns, and their works are interrupted by little sorties of a few yards—out and back again. On the extreme right, however, the English works towards the Round Tower are in advance of the French works towards the Mamelon. On our proper left we can make no considerable approaches in advance of our actual works up to the Redan in consequence of the deep ravine before our batteries. The ravine winding from the right between the two attacks sweeps down below the Green-hill, with a precipitous ascent on the Russian side, towards the Redan, and a gentle rise up to the Green-hill. The French approach towards the Round Tower is obstructed by the Mamelon, which is due south of it, and we cannot approach much nearer towards the Round Tower by working from our right, till the Mamelon is taken. The distance from the Mamelon to the Redan is about 550 yards. From the Round Tower to the sea (of the harbour) behind it the distance is about 1700 yards. The French are now within a few hundred yards of the Mamelon, and our advanced parallel, which is connected with theirs, inclines forward of their line towards the Round Tower. Although the Mamelon is pierced for eleven guns, there are not apparently more than five guns mounted; but all the embrasures are screened. The Russians have been checked in their attempts to advance upon our right towards Inkerman; and, as I have said, the French on the left towards the sea have pushed their lines inside the old Russian outworks; but the centre, protected by the Garden Battery, Road Battery, Barrack Battery, and Redan, still offers considerable difficulty to an approach, and presents a very strong position. Not only must we have ample guns and ammunition to fight the Russian batteries again, but we must be prepared with a siege train and material to move up to the heights inside the town, commanding the fleet and the northern forts and batteries, as soon as we get into the south side, which must be entered by hook or crook—by the window, if not by the door, to use the idiom of General Canrobert. At present there is an interregnum—nothing to report—nothing to write about except the movements of guns and waggonloads of shell, the arrivals of horses and detachments of men, or the events of the racecourse.—*Letter from the Camp, May 1.*

NO FLINCHING.—I see, from some late publications, that our friends at home begin to waver—the raising of the siege of Sebastopol, even the evacuation of the Crimea, is talked of. Those who talk so lightly of these things have but little idea how dear to us is the ground we stand on; how speaking of the majority of the army—we have centred all our wishes, placed all our hopes, on the event. People at home have paid for the war; politicians at home have jobbed with it—may God forgive them what man can never pardon! But the Allied armies have a higher claim to the ground. They have hungered, and starved, and bled on it and for it. At whosesoever door the fault may lie, it is not their fault that they have not conquered the Crimea. They have fought and borne labour and more than blood can well suffice for the conquest of two such provinces—they are willing to give more. They are told that to force the lines of the Tchernaya would lay 3000 of them bleeding on the grass; they say, "Lead us on!" They are told that if French and British storming columns are led against Sebastopol, that 10,000 of their number must fall before the intrenchments can be taken. Still, all they demand is the permission to go on. Surely those at home that waver and talk of retreat, or grumble at the expense of war, one half of which is of their own jobbing, should take an example from the officers and men whom they have sent out to fight their battles. If the armies are not tired of the war—if the armies do not despair of success—what pretence can those at home have for complaining of the burdens of war, or grumbling at its want of results?—*Letter from Kadikoi, May 7.*

THE ERUPTION OF VESUVIUS.—THE BED OF LAVA IN THE VALLEY OF SOMMA.

THE ERUPTION OF VESUVIUS.

NAPLES, May 12th, 1855.

THE drawing which accompanies this short description is a continuation of the scenes represented in the two former sketches of the Eruption of Vesuvius. It is the lowest part of that river of fire which, having its source in the craters opened in the side of the cone of Vesuvius, has flowed through the valley of Somma, fallen in one mighty sheet full one thousand feet in depth, and, after a course of nine or ten miles, is now devouring houses and vineyards. The front view of the lava gives a precise idea of its formation, and of the mode of its advance. It is, in fact, a bed of burning scoriæ, moving ever on, gradually and irresistibly—tumbling and rolling forwards piece by piece rather than flowing, though that term would have correctly described its movement at the source. The cone is hidden from the view by the great height of the lower part of the mountain. The stream in the upper part is that wonderful cascade which falls a thousand feet into the abyss below; and the grounds on the right are those through which we passed on our road to the table-land facing the cascade. On the left, on an eminence, is a villa, belonging to the Marchese St. Angelo, which, however, is removed from the line of danger. The moment that we have seized for taking our View was when the Cardinal Nunzio Sforza visited the ground that was threatened by the lava, and implored the Almighty to stay the scourge. There was a vast concourse of foreigners as well as Italians present; and whilst to the eye the coup d'œil was remarkable, to the feelings it was deeply interesting and painful to watch the anxiety and grief which had taken possession of the minds of the poor "contadini." Here they had been born, here they had lived and worked, and now were these pleasant scenes being swept away by that irresistible power whose hand no man can stay. The Cardinal is on the left, with his mitre and crosier; his clergy are around him, and below him are groups of country people on their knees, weeping and praying, in full confidence in the power of the Cardinal's intercession. Since that occasion this stream of lava has progressed rapidly, sometimes at the rate of ninety palms (270 inches) an hour. Rising above the banks of the river course it has spread far and wide over the country—in some places forming a bed of a thousand palms in extent. It has swallowed up houses, and covered fertile vineyards; and in three separate diverging streams is now pouring down on St. Jorio (near Portici), on St. Sebastiano, Pollena, and Massa di Somma. A bridge has been knocked down by a company of Sappers some distance below the mass of scoriæ in the View; and houses, also, are being removed. No words can adequately describe the consternation of the people, as no pencil can depict the terrific grandeur of the spectacle.

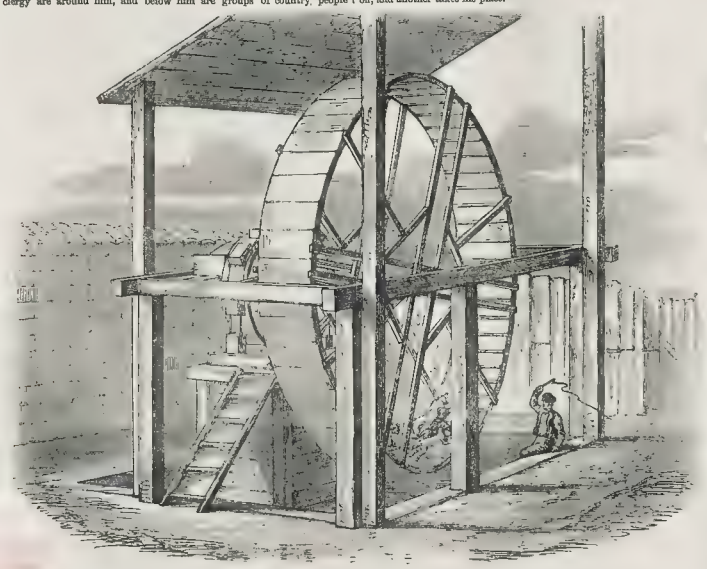
I send you a precise Sketch, taken on the spot, of the bed of lava as it descends from the mountain. It is doing here so much damage and exciting such an intensity of interest that I may over-estimate the interest which an English public may feel on the subject. HENRY WREFORD.

WATER-WHEEL AT VALPARAISO.

THIS ingenious method of raising water from deep wells, by the means of dogs, has now, for a number of years, been the only way of supplying all English and foreign men-of war and merchantmen, as well as almost the whole town of Valparaiso, with water.

The water is raised from the well by wooden buckets, emptying themselves on a table, from which, through pipes, the water is conveyed to launches, into casks and buckets, and delivered to its various quarters.

The wheel raising the buckets is driven by eight dogs, belonging to Don Juan Augustine Vives: they continually run upwards, with perfect ease; only four of the dogs work at a time; and when one is tired he jumps off, and another takes his place.



WHEEL FOR RAISING WATER AT VALPARAISO.

REAR-ADMIRAL SEYMOUR.

THIS gallant officer was born on the 3rd of December, 1802, and is the third son of the late Rear-Admiral Sir Michael Seymour, Bart., K.C.B., one of the most distinguished officers of the long war. He is the nephew of Lieut. Richard Seymour, R.N., who, as First Lieutenant of the *Amazon*, 38, was killed in action with the French frigate *La Belle Poule*, of 40 guns, on the 13th of March, 1806. He entered the Navy as first-class volunteer on the 5th Nov., 1813, on board the *Hannibal*, then commanded by his father; and was present at the capture of *La Sultane*, a French frigate of 44 guns, in March, 1814. From the years 1816 to 1818 he studied at the Royal Naval College. He afterwards joined in succession, on the Mediterranean and Home stations, the *Rochfort*, 80, flagship of Sir T. Fremantle; *Ganymede*, 26; the Hon. Robert C. Spencer; *Glasgow*, 50; *Camelion*, 10; *Seringapatam*, 46; *Revolutionaire*, 46; and *Apollo* yacht, under the respective commands of Captains the Hon. A. Maitland, Wm. J. Mingaye, Samuel Warren, the Hon. Fleetwood Pellew, and the Hon. Sir C. Paget. In the last-mentioned ship he held the rating of midshipman. On the 12th September, 1823, he obtained his commission, and became attached, on the 1st July, 1824, to the *Sybille*, 48, Captain Samuel J. Pechell, employed in the Mediterranean. On the 6th of December, 1824, he attained the rank of Commander, and in that capacity was appointed, in August, 1825, to the *Camelion*, 10 guns; and in August, 1826, he was advanced to Post rank. His subsequent appointments were to the *Menai*, 26, and *Volage*, 28, on the South American station, whence he returned in 1829. In June, 1833, he was appointed to the *Challenger*, 28—in which ship he was wrecked on the coast of Chili, May, 1835; and in 1841, to the *Britannia*, 120, bearing the flag of Sir John Ommanney in the Mediterranean. In September, 1841, he joined the *Powerful*, 84, which ship was paid off early in 1843; and, in January, 1845, the *Vindictive*, 50, with the flag of Sir F. W. Austen, Commander-in-Chief of the stations of North America and the West Indies, where he remained until the year 1848. In November, 1850, he was appointed to the command of the Ordinary, at Sheerness, with the superintendence of the dockyard there; and in September, 1851, entered her Majesty's dockyard at Devonport, as Superintendent, with the rank of first-class Commodore. In March, 1854, he received the appointment of Captain of the Fleet, under the command of Sir Charles Napier, and resumed his duties in Devonport Dockyard in December following, which he has now resigned as second in command of the Baltic Fleet.

We are indebted to Mr. Julian Brewer, of Plymouth, for the accompanying Portrait.

REAR-ADMIRAL SEYMOUR, SECOND IN COMMAND OF THE BALTIC FLEET.

"THE ABDICATION OF MARY QUEEN OF SCOTS."—PAINTED BY A. JOHNSTON. EXHIBITION OF THE ROYAL ACADEMY.

"ROMEO AND JULIET."—PAINTED BY E. H. WEHNERT. EXHIBITION OF THE SOCIETY OF PAINTERS IN WATER-COLOURS.

THE ABDICATION OF MARY QUEEN OF SCOTS

Mr Johnston, always an agreeable painter, has found the subject of his single contribution to the walls of the Royal Academy in the page of Scottish history. The abdication of Mary Queen of Scots is a situation particularly adapted to the purposes of art, and Mr Johnston has wrought as if he was aware that much was required of him. The face and figure of the lively and ill-fated queen contrast most admirably with the marked figure of the harsh and brutal Lord Lindsay. Other thoughts with more application passed through Mary's mind, and these Mr Johnston has sought to embody.

Mary, for the first time, became aggrieved, for she remembered the evening of Rizzio's murder, when Lindsay stood beside the grand form of Ruthven, instigating him to the commission of the deed in words with fearful oaths and expressions. Lindsay vowed that unless she checked the deeds of that day he would sign them himself with her blood, and wear them on his heart.—*Lesley's History of Scotland.*

NEW SOCIETY OF PAINTERS IN WATER-COLOURS

The Exhibition of this year has among its many works of excellence a very striking group painted by Mr Wehnert from 'Romeo and Juliet, Act iii. Scene 5,' wherein Romeo leaving the chamber of Juliet says—

[illegible]

The pleasing picture reveals to advantage Mr Wehnert's skill in composition and his knowledge of the rarer resources of his art.

IMPERIAL PARLIAMENT.

HOUSE OF LORDS. MONDAY.

The Charitable Trusts Bill, on the motion of the LORD CHANCELLOR, was referred to a Select Committee.

The Customs Duties Bill and the Spirit Duties Bill were both read a second time.

RELIGIOUS WORSHIP BILL.

The Earl of SHAFTESBURY moved that this bill be read a second time, with a view to its being referred to a Select Committee.

Lord REDESDALE thought the measure in some respects objectionable, as tending to encourage meeting-houses for religious worship in private houses, neither of a strictly public nor private character, and which might lead to many improper practices. He should not, however, oppose the second reading.

The measure was then read a second time.

INCENDIARISM IN THE NEW FOREST.

The Earl of MALMESBURY called attention to the extraordinary state of the New Forest during the last two months. There had been a number of incendiary fires, destroying the grass and trees, and spreading into the adjoining counties, doing serious damage to many persons, his own amongst the rest. Between January and May last, there had been no less than twenty four cottages and out-offices consumed, and been burned down. In spite of this the number of keepers had been reduced, and four placed upon duty in the forest had been dismissed. There was a very serious state of things in a country which still remained in the wild state which had existed for centuries, and he thought the Government had been extremely supine in taking adequate measures of protection.

Earl GRANVILLE believed the noble Earl's description of the state of the beautiful district to which he alluded was perfectly correct. There could be no doubt that the unfortunate state of the ground, caused by the protracted drought, had much facilitated the operations of incendiaries, and led to greater destruction than would otherwise have taken place; but it had been the matter of extreme difficulty to discover the guilty parties in these cases. Three persons suspected of participating in these offences had been apprehended and committed for trial, and the evidence was now under the consideration of the Attorney-General, with whom it would rest to decide whether they should be brought to trial.

The Intestacy (Scotland) Bill was read a third time and passed.

HOUSE OF COMMONS.—MONDAY.

Sir J. GRAHAM gave some explanations respecting the court-martial ordered upon the late Captain Christie, and admitted some errors of facts in the former statement on that subject.

Lord PALMERSTON announced that he should, on Friday, move the adjournment of the House until Monday, the 4th of June, for the Whitsuntide recess.

THE VIENNA CONFERENCES.

In reply to several queries from Mr. S. HERBERT, who intimated that the course which himself and his friends would pursue with regard to Mr. Milner Gibson's proposed motion depended upon the answer,

Lord PALMERSTON said that the Government did not consider the means of pacification exhausted—that Austria was still furnished, under the consent of the Allies, with the means of bringing about a peace; that the Conferences were suspended, but not closed; and that the most favourable consideration would be given by the Government to any propositions made through Austria by Russia for a pacific purpose, although they would never consent to any terms of peace which did not satisfy the House, and secure the objects of the war.

Mr. GLADSTONE remarked that the replies just given conveyed the assurance that negotiations had not yet been ended; and, under these circumstances, urged an appeal to the member for Manchester to postpone his motion. Having been interrupted in the course of his remarks by Mr. Roebuck on the point of order, Mr. Gladstone concluded by moving the adjournment of the debate.

Mr. S. HERBERT intimated his intention of opposing Mr. Gibson's motion, if then urged to a division.

Lord H. VANE, as the intended seconder of the motion, also expressed his persuasion that a postponement would be desirable.

Mr. DISRAELI submitted that, before the motion was withdrawn, the House had a right to expect a more explicit statement from the Government as to their intentions. At present the Ministerial announcement amounted only to a vague declaration that the means of peace were not exhausted, but furnished no such ground of expectation as to prevent the Legislature from discussing the subject at once. When the baffled Envoy first returned, the Government might either have made an appeal for forbearance, pleading the existence of still pending negotiations, or might himself, according to precedent, have invited a debate upon the past Conferences. Neither of these courses was followed; but the protocols were laid before Parliament, as if to challenge discussion. Insisting upon the right of independent members to criticise transactions which were in prospect to some mysterious and sinister operations of the Prime MINISTER.

Lord PALMERSTON justified his conduct as having been uniform and consistent throughout. When the Conferences were suspended he had a record of the proceedings before Parliament as a matter of right, but had always declined himself to invite a discussion on them, because he might have been to injure the door to that hope of peace. But, at the same time, he could not shirk such a discussion, which involved the question of confidence in his Administration. He wished to-day at the same arose from no apprehension that the debate might be inconvenient to the Government, but that it would be prejudicial to the country. All chance of a negotiation being brought to a successful issue must be destroyed if that House took the management of affairs out of the hands of the executive, and prescribed beforehand the basis on which they should treat, and the conditions on which peace could be accepted.

Mr. BRIGHT, on behalf of the Peace party, disclaimed all partisan associations and all indirect objects, their single purpose being to obtain an honourable peace. If he could obtain an assurance from the Government that the Conferences were still actually alive, and that no opportunity for making peace would be let slip, he was willing to adjourn the discussion, trusting that in a fortnight the Ministers might be prepared with some satisfactory and definitive information.

Mr. ROEBUCK contended that nothing either in the circumstances that had occurred or in the Ministerial speeches that had been made, gave any new complexion to affairs since Mr. Gibson first announced the terms of his motion; which, accordingly, he saw no reason for postponing

The Marquis of GRANBY wished to know distinctly whether any new proposals for peace were now offered or under consideration?

Lord J. RUSSELL recapitulated the incidents of the last Conferences in which he took part, and adverted to the communications that had subsequently been exchanged between the Russian Envoys and the representatives of the Western Powers. Austria, he remarked, still declared that the means of pacification were not exhausted, and had shown herself prepared to negotiations which, if not with the Allies, but reluctant to propose terms which would involve her in actual hostilities with Russia. As matters stood, he expected that Austria would make some final propositions, which, if rejected, must terminate the Conferences; and, if accepted, would re-open the negotiations under far more favourable auspices than heretofore.

Sir J. PAKINGTON contended that no fact had been stated or reason alleged by the Government to warrant their asking the House to suspend proceedings so deliberately entered upon.

Sir G. GREY regretted that the Government had never asked for a delay of the discussion, but simply shown cause for the inference that it might, at the present juncture, prove prejudicial to the interests of peace.

Mr. M. GIBSON submitted that the Government ought to have anticipated discussion when they published the protocols of the Conferences. After the production of those documents, he thought himself at liberty to bring forward his motion. He still persevered, however, to the extent now made, he consented to postpone it until after the Whitsuntide recess.

This course, after some further conversation, was adopted, and the debate stood adjourned accordingly.

The orders of the day were then rapidly disposed of, principally by adjournment, and the House rose a few minutes before eight o'clock.

HOUSE OF LORDS.—TUESDAY.

THE VIENNA CONFERENCES.

Lord LYNDHURST asked Earl Grey what course he meant to pursue in respect to his motion for Friday?

Earl GREY said not say. He had not yet heard any sufficient reason for postponing it.

Lord LYNDHURST asked if the negotiations were still pending at Vienna?

Earl GRANVILLE said the Conferences were not closed. The Government were still open to receive any propositions which might be made by any of the Powers engaged in those Conferences; and they were also still open to decline any terms which they might not think sufficient.

Lord LYNDHURST wanted to know whether negotiations were or were not going on? Whether any propositions had been made by either of the Four Powers? If so, whether they had been rejected, or whether they were still under consideration? Whether, if they were under consideration, the Government could not make up their minds to state within what period they would be decided on? Surely these were reasonable questions. The propositions might be under consideration for twelve months. He had never heard anything so vague as the noble Lord's answer.

HOUSE OF COMMONS TUESDAY.

The early sitting of the House was chiefly occupied in Committee on the Metropolitan Local Improvement Bill, in which considerable progress was made. The Chairman, at four o'clock, reported progress, and obtained leave to sit again on Friday.

THE WAR.

Mr. DISRAELI called attention to the discouraging language and demeanor of the Government on the previous night, and said that, in the present critical position, the House ought not to adjourn for the Whitsuntide holidays without receiving some more specific information from the Government, which might relieve the country of putting from entry in better heart as to the position and future prospects. Last Session the House was muzzled as to the position of affairs, lest mischief might follow; and the result of its silence was that we had drifted into a disastrous war; and if it was to remain silent, it might be that, before the holidays were over, we might find that we had drifted into an ignominious peace. He, therefore, resolved to ask the House to express an opinion; and he would therefore lay a motion on the table on Thursday next, expressive of its wish that her Majesty should be supported in war until a satisfactory peace should be brought about consistent with the honour of the country. The hon. member for Aylesbury had given notice of a motion for Thursday, which was of importance. He had no right to ask that member to postpone his motion; but it were much to be desired that he should not by his attempt, before the adjournment, to ascertain the feeling of the House.

[The following are the words of the resolution, which was laid on the table at a late hour on Tuesday night:—"That this House cannot adjourn for the recess without expressing its dissatisfaction with the ambiguous language and uncertain conduct of her Majesty's Government with reference to the great question of peace or war; and that, under these circumstances, this House feels it a duty to declare that it will continue to give every support to her Majesty in the prosecution of the war, until her Majesty shall, in conjunction with her Allies, obtain for this country a safe and honourable peace."

Mr. LAYARD said, he should certainly give way to the motion of the right hon. gentleman.

Lord PALMERSTON said that the scene was well acted, and did much credit to the actors. He would be ready to meet the motion, but he denied that there was any ambiguity in the language of the Government. He believed the silence of 1853 had done much towards the chances of accommodation, for it had kept Austria as a friendly Power anxious to bring about a restoration of peace. They had not, however, relaxed for one moment in making every exertion to carry on the war with the utmost vigour. As to any fear of a dishonourable peace the country had nothing to fear as long as the present Government remained in office, for they would listen to no terms which would not be honourable to the country, safe for the future, and calculated to carry out the objects for which hostilities had been commenced.

The matter then dropped.

DIPLOMATIC ESTABLISHMENT.

Mr. WISE then moved the following resolution:—"That it is the opinion of this House that the complete revision of our diplomatic establishments, recommended in the Report of the Select Committee of 18 on official salaries, should be carried into effect."

Mr. EWART seconded the motion, suggesting the establishment of some test of qualification for diplomatic service.

Lord PALMERSTON admitted the importance of the subject, but said that several of the recommendations of the Committee had been carried into effect. He did not think they ought to be all of them carried out, and instanced the recommendation that the highest salary should not exceed £8000 per annum—a sum much too limited for an Ambassador to Paris, Vienna, or Constantinople. He begged, however, to assure the hon. gentleman that every reduction would be made in those appointments consistent with the public service. As to the suggestion for submitting candidates for diplomatic service to examination, he had to state that on the previous day it had been agreed to in Council that there should be examinations of candidates for some departments of the public service, and it should be considered by the Government whether the same system should not be extended to diplomatic candidates also.

Mr. W. WILLIAMS thought the explanations of the noble Lord unsatisfactory. The United States obtained as good diplomatists as England at less than half the cost

Mr. R. PHILLIMORE hoped Mr. Wise would be satisfied with the explanation given by Lord Palmerston on the subject.

Mr. WYNDHAM said that more care ought to be taken than had usually been taken in the appointment of Attachés.

After some observations from Mr. Mitchell, Mr. OTWAY complained that all those appointments in the diplomatic service, leading ultimately frequently to Ambassadorships, were conferred almost exclusively on the sons or near relatives of peers. He instanced the case of the promotion of Mr. Ellis, one of the heads of people of less influence, in order to disprove the assertion that those diplomatic appointments were made according to fitness.

Mr. WISE said he would withdraw the motion, satisfied with the discussion to which it had given rise.

Mr. H. BAILEY objected to the withdrawal of the motion; and the House therefore divided, when the motion was carried by a majority of 112 to 57. The announcement of the numbers elicited loud cheers.

THE BALLOT.

Mr H. BERKELLY moved for leave to bring in a bill to cause the votes of the electors of Great Britain and Ireland to be given by way of ballot at Parliamentary elections. The agitation of this system was never more called for than at a moment of disaster like the present, in order to give the people an opportunity of rescuing the nation from the hands of those of aristocratic high-caste government who were its curse. Every popular measure, if it was allowed to pass through Parliament at all, was so mangled in Committee as to be worthless; and this was the case with the Reform Bill, when they recollected that the last election surpassed all others in corruption; and, by means well understood, the aristocracy succeeded in obtaining a majority of the seats. The hon. gentleman having quoted Macaulay, Hayle Mount, Lord Congleton and Durham, and Mr. Disraeli, as authorities in favour of the ballot, concluded by submitting his motion for the adoption of the House.

Mr FIELDEN seconded the motion, and referred to the intimidation which had been practised at Blackburn as a proof that some change in the law was necessary.

Lord SEYMOUR contended that members of Parliament ought not to be made in a secret manner, and that voters ought not to be protected more than any other class, in a country where everything was public.

Mr. Gordon, Mr. P. O'Brien, Mr. Blackall and other hon. members supported, and Mr. Bentinck opposed the motion.

Lord PALMERSTON also opposed the motion, as he thought secret voting incompatible with the constitutional principles of the franchise, and opposed to the feelings of the majority of the people.

The House then divided, when the motion was lost by a majority of 62; there being ayes, 160; noes, 218.

ILLEGITIMATE CHILDREN.

There have been one or two deserters from the French lately. They have crossed the Bidassoa Valley, at its narrow part near the Irun road. It is difficult to imagine what motives can actuate these men, as they can hardly look for better treatment than they receive in their own Camp. A day or two since a soldier of our own 50th Regiment, having a horse with him, was taken up by the French picket in this neighbourhood, and sent to head-quarters on suspicion that he was going to desert. He stated that he had lost his way, and was returning from purchasing some things for his master at Renteria. It was difficult to understand how he could have wandered so far past his division without discovering the mistake. A few days previously a servant of the Commandant of one of the French divisions deserted in the same direction, and for the same locality. He not only robbed his master of a horse, but also of some twenty Napoleons, and other property. Could there not be an understanding between the contending forces, and such an arrangement of the kind made, that deserters should be mutually given up on proper evidence of their guilt being afforded? Certain international laws are made to provide for such cases, and an arrangement of the kind would be equally advantageous on both sides, here even contending armies. The robberies at least, if not the desertions, would cease, perhaps, with the knowledge that they could not be committed with impunity.—*Letter from the Camp, May 9.*

A DOMESTIC TRAGEDY IN WISCONSIN.—At Beloit, Wisconsin, on the night of the 23rd ult., the wife of a citizen of that place awoke and saw a man with a dark lantern in the bed-room, and awakened her husband with her cries. As he sprang from the bed the intruder fired a pistol, the ball from which hit his head, and lodging itself in the pillow. Snatching a double-barrelled gun from the wall, he discharged both barrels at the intruder. The contents of one barrel entered the man's head and the other his body, killing him instantly. Leaving the body where it fell, the gentleman and his wife proceeded to the nearest neighbour, told him what had happened, and induced him to return with them to their house. Imagine the feelings of the neighbour, himself a man unmarried, esteemed and respected, when he recognised in the mangled body of the robber his own son

TORONTO.—Perhaps the most remarkable growth of any city in the province is that of Toronto, the capital of Upper Canada. As it is now about to become a great railway centre and emporium, it is evidently destined before long to exceed all other Canadian cities in population, and to rival them in commercial wealth and importance. In 1801 its population was 336. In 1830 it had only reached its progress of Sisson but from that time its rapid rise. At the close of 1854 it was upwards of 45,000. The import customs duties of Toronto were £5040 in 1840; £63,303 in 1852; £156,026 in 1853; and £173,583 in 1854. In 1840 the value of its exports was about £35,000, in 1854, £1,446,168 —*Sir Francis Head's Report of the Great Trunk Railway Company of Canada.*

A band of forty ruffians has appeared in Lower Albania. They attacked a party of travellers on the road from Salonica to Georgia; murdered six, and stripped the remaining nine of all they had about them.

The Egyptian Museum at the Louvre, which is to be opened on the 1st of June, has been increased considerably of late by the various objects collected by M. Mariette, in his late excursion in Egypt. The addition, in vases, pillars, inscriptions, &c., amounts to 1500 objects.

ADMINISTRATIVE REFORM.

FINSBURY.—A very crowded meeting of the inhabitants of the borough of Finsbury was held at the London Mechanics' Institution, Southampton-buildings, in Chancery-lane, on Tuesday evening, to co-operate with the movement now on foot on the subject of Administrative Reform. Mr. T. S. Duncombe, M.P., one of the representatives of the borough, took the chair. The chairman expressed the heartiness of his concurrence in the attempt that was now being made to support the present system of administering the affairs of the nation, and was prepared to go even further than the course put forward by the committee formed at the meeting which took place in the City a short time back. Mr. W. Wiles moved the first resolution:—"That, in the judgment of this meeting of the inhabitants of the borough of Finsbury, the disasters of the Crimean expedition are mainly attributable to the incapacity of her Majesty's Ministers, the corruption of the House of Commons, and the general inefficiency of the public service—the results of the undue influence of the aristocracy in the councils of the Sovereign." Mr. Jacob Bell seconded the resolution, which was put to the meeting and carried amid loud cheers. Mr. W. Shaen moved the second resolution:—"That, while the only efficient remedy for this principal evil of the State is the adoption of the suffrage, and the protection of the voter by the ballot, the meeting heartily sympathises with every genuine movement in opposition to oligarchical government, and especially tenders its thanks to Mr. Layard for his independent and courageous conduct in the House of Commons" (Loud cheers). Mr. Shaen addressed the meeting in support of the resolution, which, having been seconded, was also carried. On the motion of Dr. Epps, seconded by Mr. Lloyd, it was agreed that the substance of the foregoing resolutions should be embodied in a petition to the House of Commons in support of Mr. Layard's motion, and that the chairman (Mr. Duncombe), with his colleague in the representation of Finsbury, be requested to promote the adoption of that motion by speech and vote, and that a copy of the above resolutions should be transmitted to Mr. Layard. Several other gentlemen having addressed the meeting, a vote of thanks was given to the hon. chairman, who briefly acknowledged the compliment, and expressed his determination to use his utmost endeavours to further the objects of the meeting and place the administration of the country on a substantial footing. The meeting, which was characterised throughout by the greatest good feeling towards the movement, then separated.

BIRMINGHAM.—A meeting was held at Birmingham on Monday evening, to pass resolutions on Administrative Reform. The following was the first resolution:—"That this meeting entertains a strong and earnest conviction that the disastrous and disgraceful condition in which England has been placed in the conduct of the war with Russia, is mainly attributable to the inefficiency of the executive and the defective system of conducting the business of the nation; and that this state of things is the natural result of the systematic postponement of merit to family and personal influence in the selection of Ministers and other public servants." The speakers represented various classes, some being working-men and others county magistrates. Mr. Muntz, M.P., moved a resolution in favour of the "test of merit and fitness" in public appointments, and spoke at some length in support of the resolution. Referring to the House of Commons, he said:—Let the nation take care that there are more honest and competent men in places of importance, by sending proper men to the House of Commons; if the constituencies did not do this, why he found as much fault with the democracy as the aristocracy (Hear, hear). If honest and independent men had been sent to Parliament, the Foreign Enlistment Bill would never have been passed; instead of which Government was supported in it by men who had the fear of a dissolution before their eyes. The Sebastopol expedition was a mistake. The motion of Milner Gibson he could not support; it was a Manchester doctrine—peace at any price; and although no man was more sensible of the hopelessness of war than he was, he could not consent to patch up a peace of a character degrading to the country (cheers). The consequence of that would, moreover, be a renewal of depredations by Russia at an early period (hear, hear). Mr. George Dawson at great length descanted on the "evils of our present system." The aristocracy he denounced as greedy, rapacious, selfish, and grasping. After several other speeches, a committee was appointed, and the meeting separated.

GLOUCESTER.—A public meeting was held in the Shire-hall, Gloucester, on the 18th inst. (the Mayor in the chair), to consider the evils arising from the disgraceful state of the public departments, and the best means of remedying them. A letter of apology for absence was read from Admiral Berkeley, M.P., in which he says, "I am quite alive to the necessity of reforming or rather eradicating those evils. At the same time, I greatly regret to see so much exaggeration and so many false statements have been made within and without the walls of Parliament on such subjects. Truth, the whole truth, and nothing but the truth, should be the polar star of all public men. I utterly despise those who, for the sake of a momentary party triumph, notoriety, or popularity, ever lose sight of it." It was resolved to form a branch association, in accordance with the London Administrative Reform Association, and a petition to Parliament was adopted. Mr. Price, M.P., then addressed the meeting at some length. He supported the movement, but cautioned the people as to what they could do, and what they were really in earnest. If they trusted a little more to themselves and less to others they would be enabled more successfully to deal with those difficulties which they dwelt on in such overrated abilities of his man or that. There was another danger which occurred to his mind, and against which he thought they ought to take especial care to guard. He had said that this should not be a party movement; he would also add, let it not be a class movement.

LINCOLN.—In compliance with a requisition to the MAYOR (T. J. N. Brogden, Esq.), signed by nearly 400 householders, and comprising the names of the leading merchants and men of all parties a meeting was convened in the Theatre, at seven o'clock on Monday, to consider the propriety of aiding the movement in favour of Administrative Reform. The Mayor occupied the chair, and the meeting was the largest and most influential of any held for a long time past in that town. The Mayor, in opening the business, drew attention to the fact that though there are thirty millions of people in this kingdom, the members of the Government are, with one or two exceptions, all the relatives of some five or six families, that enjoy the monopoly of ruling. He did not believe that the intellect of the nation concentrated in those half-a-dozen families. Resolutions in favour of the movement were passed unanimously.

GREAT YARMOUTH.—On the 17th inst. an influential meeting of the inhabitants of the borough was held in the Town-hall, Mr. Hammond in the chair. Mr. M'Cullagh, Mr. D. A. Gourlay, Mr. Ferrier, Mr. W. N. Burroughs, Mr. Cheny, Mr. Alderman Wilkinson, Mr. C. Bartram, and Mr. J. Cobb addressed the meeting, and resolutions were passed pledging it to promote by every legitimate means the object contemplated by the movement.

RAILWAYS IN CANADA.

The debt of Canada is about £4,870,000 sterling; £3,060,000 of it have been created for the construction of railways through the province. In exchange for this creation the Government has become the first mortgagee, to the same extent, on the lines in favour of which the debentures have been issued.—*See Charnock Bovey's Report of the Great Trunk Railway Company of Canada.*

ATTEMPT TO SOUND NIAGARA RIVER.—A gentleman who has been trying the experiment of sounding the river below Niagara Falls writes as follows:—Another attempt was made with a similar iron of about 50lb. weight, attached to a line which was carefully suspended, so as not to impede the fall of the weight. I then let the weight fall from the bridge, a height of 235 feet; it struck the surface fairly, with the point downwards, and must have sunk to some depth, but was not thrown out of sight. It rose in about one second, when it made its appearance again on the surface, about 100 feet down the stream, and skipped along like a chip, until it was checked by the weir. We then commenced hauling in the line, which we found to be broken like a ball, when a cake of ice struck it and ended the sport. I am satisfied that no metal has sufficient specific gravity to pierce that current, even with the momentum acquired by a fall of 235 feet. The weight on the line, from the striking, must have been equal to 1.4 feet per second; and, consequently, its momentum near 5000 lb. Its surface opposed to the current was about 50 superficial inches. This will give an idea of the strength of the current, and, at the same time, hint at the Titan forces that have been at work to scoop out the bed of the Niagara river.—*New York Herald.*

THE BULLION ROBBERY.—A robbery took place last week on the way from London to Paris, which was evidently perpetrated by persons who were acquainted with the extent and the mode of the consignments. A quantity of gold, in bars and American coins, amounting to between £13,000 and £14,000 had been deposited in three boxes, which were specially consigned to Paris from the bullion dealers, Thomas Bull, and Spellmans, and were also taken from the mail train of the South-Eastern Railway, which set off from London at half-past eight o'clock on the evening of Tuesday, the 15th instant, to Folkestone; thence they were taken via Boulogne and the Northern Railway of France, to Paris. When delivered in Paris, it was found that the three boxes had been opened and plundered, and then re-hooped and re-sealed. It is rather remarkable that the depredators left on one of the boxes, between £6000 and £7000 worth of gold—it is conjectured, because they had not materials at command to supply what might have been the deficiency in weight. They had filled up that box with sporting discs, Nos. 4 and 7, and the two other boxes were supplied with a quantity of shot sufficient to represent in weight the amount of gold abstracted from them. The French as well as the English police are engaged in investigating the robbery.

Another chapel has just been uncovered at the Church of St. Eustache, namely, that of St. Louis, King of France. He is represented in four pictures: in prayer, bringing to Paris the holy crown of thorns, on his death-bed, and ascending to heaven.

As some masons were effecting repairs in a house in the Rue Mercière, in Lyons, they surprised in its nest, where it was apparently expiring of old age, a swallow, having round its neck a chain bearing a little silver plate, with the following words engraved on it:—"Ludovicus Margaritæ Edelis, 1748."

DESPATCHES FROM LORD RAGLAN.

War Department, May 21.

Lord Panmure has this day received a despatch and its enclosures, of which the following are copies, addressed to his Lordship, by Field-Marshal the Lord Raglan, G.C.B.:—

Before Sebastopol, May 8, 1855.

My Lord,—The enemy assailed our advanced parallel on the right attack on the night of the 5th inst., and some actually got into the trench; but they were speedily driven out and repulsed with the utmost gallantry by the detachments occupying it, of the 30th and 49th Regiments, under Captain Wilkinson and Lieut. Gubbins, of the former, and Lieut. Rochfort, of the latter—who, unfortunately, was severely wounded; and I regret to have to add that several valuable non-commissioned officers and men were killed and wounded on the occasion.

On the same night Captain Arnold,* of the 4th Foot, was wounded and taken prisoner, whilst posting the advanced sentries on the left attack. The loss of the services of this officer is greatly to be lamented. He had done his duty unremittingly, and in the most spirited manner, throughout the operations of the siege.

I inclose the return of casualties to the 6th inst.

I have heard that six ships, having on board Sardinian troops have arrived in the Bosphorus. I have, &c., RAGLAN.

P.S.—I have the satisfaction to announce to you the arrival of the first detachment of the 12th Lancers.

The Lord Panmure, &c.

OFFICERS WOUNDED FROM THE 4TH TO THE 6TH MAY, INCLUSIVE.

Lieutenant.—49th Foot: G. Rochfort, severely.

OFFICERS MISSING FROM THE 4TH TO THE 6TH MAY, INCLUSIVE

Captain.—4th Foot: W. T. Arnold, taken prisoner, and supposed to have been wounded.

NON-COMMISSIONED OFFICERS AND PRIVATES KILLED FROM THE 4TH TO THE 6TH MAY, INCLUSIVE.

Corporal. 49th Foot: William Kent.
Private. 14th Foot: Patrick Callaghan, George Walker. 18th: Daniel Walpole. 47th: John Forsyth, Andrew Ash, Patrick Creighan. 49th: Henry Nicholson. 2nd Battalion Rifle Brigade: Thomas Turner.

NON-COMMISSIONED OFFICERS AND PRIVATES WOUNDED FROM THE 4TH TO 6TH MAY INCLUSIVE

Sergeants. 30th Foot: Thomas Delaney, severely. 47th: Daniel Ford, severely.
Corporal. 47th Foot: Mark Connolly, severely.
Lance-Corporal. 30th Foot: James Edward Jones, severely.
Private. 2nd Battalion, 1st Foot: David Buchanan, slightly. 7th: David Norman, Philip Guest, severely. 23rd: Thomas Lent, slightly, David Jones, severely, William Brown, dangerously. 30th: James Martin, slightly. 34th: John Day, severely. 47th: Patrick Mara, severely; Thomas Woodrough, dangerously (since dead); William Worthington, slightly; John Wallace, slightly. 49th: Thomas Edwards, Frederick Courtney, Peter Farquhar, William Patrick Hall, severely; Edward Linahan, dangerously, severely; Denis Linahan, John Neil, Patrick Neil, Michael Rogers, Thomas Treasey, and John Williams, slightly. 50th: Patrick Ivers, slightly. 88th: Robert Steele, dangerously; Thomas Jones, severely; Thomas Brennan, dangerously; William Johnson, slightly. 2nd Battalion Rifle Brigade: Arthur French slightly.

NON-COMMISSIONED OFFICERS AND PRIVATES MISSING FROM THE 4TH TO THE 6TH OF MAY, INCLUSIVE

Sergeant. 49th Foot: James Robinson.
Private.—30th Foot: Patrick Driscoll. 49th: Patrick Barnon.
TOTAL.—9 rank and file, killed, 1 officer, 2 sergeants, 35 rank and file, wounded 1 officer, 1 sergeant, 2 rank and file, missing.

War Department, May 24, 1855.

Lord Panmure has this day received a despatch and its enclosures, of which the following are copies, addressed to his Lordship by Field Marshal the Lord Raglan, G.C.B.:

Before Sebastopol, May 12.

My Lord,—I do myself the honour to acquaint your Lordship that General de la Marmora, with a portion of the Sardinian Contingent, arrived off Balaclava on the night of the 8th inst., and he came up to head-quarters the following morning.

The very unfavourable state of the weather since the 6th has prevented any material part of the force being landed; and it has been found necessary to send the vessels that brought it, and which could not be got into the harbour to Kamiesch Bay, until it should moderate.

Five troops of the 12th Lancers landed on the 9th from the *Himalaya*, which performed the voyage from Alexandria to Balaclava in ninety-four hours.

The enemy made two serious assaults upon our most advanced parallel of the right attack on the night of the 5th; but were on each occasion most nobly met and repulsed with considerable loss.

The arrangements of Colonel Trollope, who had charge of the right attack, and Lieut.-Colonel Munro, the Field Officer of the trenches, were most judicious; and Captain Turner, of the Royal Fusiliers, and Captain Jordan, of the 34th Regiment, are reported to have done their duty in the most gallant manner.

They opened a powerful fire on our trenches on the following night, and exposed their columns to a heavy musketry fire from the troops on duty. They did not, however, reach the parapets, nor indeed come very near them.

Last night a very determined sortie was made upon the advance of our left attack, three enemy columns from the Woronzow road and the Quarantine. Our advanced sentries having slowly retired, the guard of the trenches was prepared to receive them, and consequently drove them back in the most determined manner. A few Russians only got into the parallel, and five were left dead close outside.

The conduct of both officers and men was admirable, and it is with deep concern that I have to report the death of Captain Edwards, of the 68th Foot, and that of five men.

I have also the pain of saying that the wounded amount to thirty

Owing to the great quantity of rain which has fallen during the last few days, the service in the trenches has again been most arduous and severe upon our men, who deserve all praise for their energy and untiring perseverance.

I enclose the return of casualties to the 10th inst.—I have, &c., RAGLAN

The Lord Panmure, &c.

OFFICERS WOUNDED FROM MAY 7 TO 10, INCLUSIVE.

Major 2nd Battalion 1st Foot: T. M. Byrne, contusion in left breast
Lieutenant—34th Foot: H. M. Lawrence, slightly.

NON-COMMISSIONED OFFICERS AND PRIVATES KILLED FROM MAY 7 TO 10, INCLUSIVE

Sergeant.—57th Foot: John Magee
Corporal—8th Foot: John Downie
Private.—34th Foot: Francis Murray, Thomas Kennedy. 88th: John William Kennedy. 89th: Michael Kennedy. 90th: Thomas Ferrey. 41st: James Fitzgibbons. 47th: Thomas Bussen. 68th: Thomas Dowd.

NON-COMMISSIONED OFFICERS AND PRIVATES WOUNDED FROM MAY 7 TO 10 INCLUSIVE

Sergeant. 57th: John Griffith, severely
Corporal 34th: Thomas Hickey, slightly
Private. 1st Battalion Grenadier Guards: Thomas Hennessy, severely. John Sheehan, slightly. 34th: Patrick Lynch, slightly. 41st: John Goode (and, severely. 50th: James Grogan, severely. 77th: John Berry, John Batten, dangerously. 89th: William Burke, slightly. 2nd Battalion, 1st Foot: Richard Cannon, Edward Faithful, slightly. 19th: Joseph Murgatroyd, severely. 30th: Joseph Robinson, slightly. 41st: R. Colgan, slightly. 47th: James Mahoney, severely. 49th: Bernard Caffrey, Charles Cummings, severely; James Brien, slightly. 1st Battalion Rifle Foot: Joseph Adams, slightly. 7th: John Moroney, John Berry, William Pilcher, Anthony Mansfield, severely; George [illegible] slightly. 20th: Patrick Bray, severely. 34th: Henry Richardson, slightly. 34th: Isaac [illegible] seller, John Dwyer, James Murphy, severely. 41st: John Davis, severely. 47th: Philip Woodhouse, severely. 49th: David Redpath, severely. John Griffin, severely; Patrick Dalton, Charles, slightly; James Shaw, dangerously. 90th: James Jordon, severely. 2nd Battalion, 1st Foot: Patrick [illegible] severely. 7th: Robert Clements, severely. 9th: Martin Thomson, dangerously. 18th: James Hopkins, severely. 23rd: Richard Lowery, severely. 30th: John Behan and John Kenny, slightly. 41st: Timothy Driscoll and Peter Grounds, slightly; Martin [illegible] and Patrick Lowry severely. 47th: Edward Connors, severely. 47th: John Kelly, severely. 49th: James Connor, dangerously (since dead); John Donohoe, slightly; William [illegible] dangerously, and Michael Cummins, slightly. 50th: John Carruthers, severely

Commissariat.—Royal Artillery: James Walsh, severely; Wm. Cook, dangerously.

CASUALTIES IN THE ROYAL NAVAL BRIGADE, BEFORE SEBASTOPOL, OF MAY 10

Killed. Henry Hill, A.B., Queen.
Wounded. Alexander Sunderland, ord., Queen; Robert Hart, ord., Queen, severely; James Reynolds, ord., Queen; John Mansfield, Queen, slightly.

ENGLISH PRISONERS IN RUSSIA.

The following is a list of some of the English prisoners at Voronetz, in Russia, who have been relieved from funds supplied by her Majesty's Government for that purpose through the obliging intervention of the Danish Minister at St. Petersburg

The publication of this list might be satisfactory to the families of the persons mention ed.

Foreign-office, May 11.

RANK AND NAMES OF THE ENGLISH OFFICERS OF WAR TO WHOM CLOTHING, &c HAS BEEN ISSUED BY H. CHRISTOPHERSEN, ESQ.

Troop-Major Hugh Crawford, 4th Light Dragoons.
Sergeant-Major John Lincoln, 12th Light Dragoons
Sergeant-Major Alderson, 12th Light Dragoons.
Corporal Joseph Armstrong, 4th Light Dragoons.
Privates—Joseph Chapman, James Donoughoun, and Denis Driscoll, 4th Dragoon Guards. James Bagshawe, James Bolton, Robert Farquharson, Charles Fredericks, Thomas Smith, Miles Sullivan, and Samuel Parkes, 4th Light Dragoons; William Bird, John Beavan, Patrick Horan, and Richard Palfryman, 8th Hussars; Henry Parker and William Pilkington, 11th Hussars; John McCann and Charles Warren, 13th Light Dragoons; and James McAlister, 17th Lancers.
Gunner—Royal Artillery: Alexander Wales.
Sergeant-Major—44th Foot: Francis O Neill.
Sergeants, 23rd: George Newman. 49th: John Surrage. 50th: James Connanly.
Corporals—7th: Thomas Edwards; James Walsh [illegible] Richard Clarke, William Hill
Privates—Coldstream Guards: James Kerby. 4th Foot: John Parker. 7th: Robert Argue, Robert Brekkin, Thomas Kelson, Atkinson Sanderson. 30th: Patrick Murray, Terence Lynch. 23rd: John Birch, George Cumber, John Crooke, John Gosling, William Lancaster, Edward Mandeville, Charles Williams. 33rd: William [illegible] 41st: John M'Carthy. 47th: [illegible] James Lithgow, James Whitshire. 50th: John Callaghan, Patrick Thompson. 55th: Martin Graham, Michael Mahoney. 62nd: Laurence Gleeson. 68th: James Sywan, James Connor, James Staley. 77th: Christopher Border, James M'Guire. 97th: Patrick [illegible] George Littlefield. 88th: Michael Kelly

Sailor—Royal Navy: John Campbell.

Land Service—Frederick Appleton, William Barrett, Wilders Bell, August [illegible] Dalleit, Henry [illegible] William Lueck, James Bowers, Arthur Franks, Oliver [illegible] Thomas Lincook, John Housleap, John Jumper, Alexander Little, John M'Cauger, William Mason, Page, George Phipps, John Richardson, Charles Rivers, John [illegible] Daniel Sheridan, Joseph Sharper, Edward Wells, John West [illegible] José B. Salmon, Joseph Jefferenzie, Francis Solomon, Zachariah Wa[illegible]

ROYAL LITERARY FUND.

The anniversary festival of the friends of this institution, established to administer assistance to authors of genius and learning, who may be reduced to distress by unavoidable calamities, or deprived by enfeebled faculties or declining life, of the power of literary exertion, was celebrated at the Freemasons' Tavern, on Tuesday evening. The chair was occupied by the Right Rev. the Lord Bishop of Oxford, supported by the Archbishop of Dublin, the Bishop of St. David's, Mr. Buchanan, the American Minister; Mr. Monckton Milnes, M.P., Sir A. Alison, Bart., Dr. M'Bride, Principal of Magdalen-hall, Oxford; M. De la Pierre, the Belgian Consul-General; Sir R. W. Jodrell, Bart., Colonel Gibson, the Rev. Arthur P. Stanley, Sir J. G. Hubbard, Archdeacon West, Rev. Professor Stacey, the Rev. Dr. Russell, the Rev. Dr. Parkinson, of Manchester; the Rev. E. Stokes, Christ Church, Oxford; the Rev. J. Moseley, Magdalen College, Oxford; the Rev. T. B. Morel, the Rev. G. Pottiery, the Rev. Austen Lee, Rev. Henry Alford, Professor Perowne, King's College; Rev. J. R. Morris, Rev. J. Fenwick, Corpus Christi College, Cambridge; Rev. Peter Neate, St. Peter's College, Cambridge; Rev. Dr. Major, Rev. J. Major, Sir Denham Norreys, Mr. Alderman Sydney, and about 120 other friends of the Institution.

Dinner over, and the usual loyal toasts having been given, with all the honours, the Chairman gave "The Church," coupled with the name of Archbishop Whately, than whom there was no more distinguished ornament of literature. The right rev. prelate had always placed aside a tithe of his profits, as a literary man, in aid of that institution, so that, by a bequest of the Rev. E. Stokes, of the Literary Fund, they could pretty well calculate the progress which Dr. Whately was making in his literary labours. He looked upon literature and Christianity as indissolubly united, and no man had done more for the promotion of either than his right rev. friend.

Archbishop Whately, in returning thanks, said that if his contributions to the society had not been, in a past year or two, as previously, it had arisen from the fact, not so much in a diminution of the sale of his works, as the expense of re-printing; but he hoped yet to prove of some benefit to that society. He looked upon the Queen and the Church as an integral portion of their constitution; and, in alluding to the Church, he spoke of it in its general sense, and not as confined to that portion to which he had the honour to belong. It had always been his desire to conciliate the greatest confidence and union between the people of Ireland, and also between the Churches of England and Ireland, and if anything he had written could conduce to that event he should leave self at least he had done some good in the sphere of life to which God had called him.

The Right Rev. Chairman, in proposing the toast of the evening—"Prosperity to the Royal Literary Fund, and health to its noble President, the Marquis of Lansdowne"—expressed his regret that the noble Marquis would not be present that evening, as just prior to the festival a letter had been received from that noble Lord, stating that he could not attend, but as a token of his sympathy enclosing a cheque for £25. He need say but little in proposing this toast, inasmuch as they all knew the object of the institution, it being to aid the suffering members of the literary profession. That profession was peculiarly in want of occasional assistance, because success was so uncertain, however valuable the works of the literary aspirant. He was happy to say they lived in a time when they depended not on the patronage of kings and princes, but on a liberal public; but at the same time they lost those rewards and encouragements which kings used to bestow upon them in former times. That patronage had created considerable evil, in fettering the independence of the writers; and they had to guard now against the influence of the pecuniary stem of patronage, lest writers, by flattering the prejudices of the multitude, should depress rather than elevate the character of our literature. To secure the independence of literary men such an institution as this was very beneficial, as no person could read the heart-breathing autobiography of Haydon without comprehending the difficulties and temptations with which genius was surrounded. It therefore became those who had the means to make a provision for the evil days of their poorer brethren, as the prizes in literature were but few, and the blanks very many. He had had an opportunity of examining the records of the society, and found clear testimony to the ability, integrity, and faithfulness with which the affairs were conducted. He considered that one of the great features of the institution was the secrecy with which all relief and assistance was conferred on the members of the literary profession, for such was the modesty and delicacy of feeling of genius, that it would rather struggle against any difficulty than that its woes should become known; and the world might lose the brightest emanations of talent, or the most erudite results of research, if those who required their assistance felt that, in the days of prosperity, they could be pointed out as having formerly received assistance from the society. If they wished to foster literature, they would encourage that modesty of genius, and cordially join with him in drinking to, and aiding the prosperity of the institution. He therefore called upon them to drink to the "Prosperity of the Royal Literary Fund, and the Health of its Noble President, the Marquis of Lansdowne."

"The Historians of England" was responded to by Sir Archibald Alison, who pointed out that all history showed that it was only when France and England were united the advance of barbarism upon Europe had been repelled and kept in check.

A variety of other toasts were given, including "The Literature of Europe and America," to which Mr. Buchanan, the American Minister, replied.

The collection of the evening amounted to rather more than £800; including £16 from her Majesty, £25 from the President (the Marquis of Lansdowne), £10 10s. from the Chairman of the evening, &c.

NEWSVENDERS' BENEVOLENT INSTITUTION.—The general meeting of this praiseworthy institution was held on Monday evening, at the Freemasons' Tavern—Mr. Charles Dickens, the president, in the chair. The chairman, after explaining the objects of the institution, briefly recommended it, and expressed his satisfaction at the manner in which it was managed. He then drew a humorous picture of the newsvenders' business, showing how admirably they managed their affairs, in contradistinction to the way in which matters were conducted in other places. From the excellent way in which this society was conducted he had every hope of its success; but if Mr. Wild had been appointed to carry out the distribution of newspapers simply because his great-great-great-grandmother had done so, he should have very little hope indeed (Laughter). Again, if Lord —— (the chairman) received papers, or three years old, with all sorts of publications which he did not want, and if his staff could do no more than stand on their heads, or "over" all the street posts upon their beat, instead of distributing papers, while some gentleman under him with their oilskin "portfolio," he should have also very little hope (Laughter). Some time ago they had a strike of cabmen, which caused a great deal of inconvenience; but he could assure them, as an idea of their usefulness, a cab strike would be a mere trifle compared to the importance of a suspension of the labours of the distributors of news (Laughter). Their calling had become of vital interest to the community in the assistance which it rendered to the diffusion of that mighty engine—the terror alike of all humbugs and despots—the press (loud cheers); and that calling had now become more useful than ever. He remembered the period when the sheet of the *Times* would have hardly furnished one night's curling paper for a young lady's hair—particularly if she was possessed of anything like a tolerable crop; and he had watched its growth up to the present day, when every one must admit that a morning's *Times* would make a moderate sized carpet for a dining room (Cheers and laughter). Looking, then, at this development of its power, which, including speculating upon the future, he thought that the newspaper trade should, in justice to itself, rise also in influence and position (Hear). It rested with the trade, now admirably they managed their affairs, to consider whether they should obtain that support from each other and from the public which he believed their exertions deserved. Mr. Coles, the secretary, then read the report, which was of a gratifying character—it having been added to their funded stock during the last year. Mr. Herbert moved, and Mr. Wyld seconded, the adoption of the report, which was unanimously agreed to. Mr. Hogarth moved a vote of thanks to the chairman for his able conduct, which he acknowledged. Mr. Dickens moved a vote of thanks to the press for the valuable assistance which it had rendered them. On looking over the list of subscriptions he found that more than two-thirds came from the press. He was glad of that, and was also happy to say that they were enabled to distribute the influence of that mighty engine over the world. Carried unanimously. Mr. C. D. Walter moved, and Mr. W. Wright seconded, another resolution:—"That the thanks of the meeting are due, and are hereby given, to those proprietors of newspapers and other friends who have liberally contributed to the funds of the institution." Carried unanimously. Votes of thanks to the committee and to the chairman were then agreed to.

TOWN AND TABLE TALK ON LITERATURE, ART, &c.

ADDISON depicts a newsmonger of Queen Anne's time who, in a dearth of news, was invariably observed to turn extremely thin. If any newsmonger of Queen Victoria's time is similarly affected, we may easily depict his present appearance—his hatchet-shaped face, and his living skeleton of a figure. Gossips by nature and habit have as much difficulty in obtaining news as the authorities at the Stamp-office have in defining what is news. Authors have all but ceased submitting manuscripts to publishers; and no Royal Academy Exhibition of the last five-and-twenty years has done so little for engravers as this of 1855. We cannot hear of a good book that is likely to appear in print; or of a good picture that has opened the pocket of a print publisher. One of the most eminent and liberal of printsellers has been heard to declare that the Royal Academy does not contain a single picture that deserves to be engraved. This is a hard judgment; but we know in what way publishers pronounce on what is good. Ben Jonson's "bookseller" was the type of a still-existing class:—

Then that mak'st gain thy end, and, wisely well,
Call'st a book good or bad, as it doth sell

If a print publisher could foresee a fair profit in any picture, he would at once declare that "here we have a very fine work of art; one, Sir, that deserves to be engraved; one, Sir, that I shall entrust to Mr. Cousins or Mr. Atkinson—to the best engraver of our day. I spare no cost, Sir, when I can really see a repaying picture."

The last mail from India returned to this country the two most distinguished antiquaries that India possesses—Colonel Rawlinson, of the Bombay Infantry; and Major Cunningham, of the Bengal Engineers. The Colonel has been pursuing his studies in Persian antiquities (he was Resident at Bagdad); and the Major has, it is said, completed the work on which he has been long engaged, "The History of the Successors in the East of Alexander the Great." Each, with Indian liberality, has brought for presentation contributions of moment to the British Museum.

Who is to be the successor at the Antiquaries of Sir Robert Inglis will be settled this week. Mr. Hunter was first thought of, then Mr Layard; but the election will fall—if the Council have their way—on Mr. Edward Hawkins, the Keeper of the Antiquities in the British Museum. An honour of this kind—it is that of one of the Vice-Presidents—is eminently due to Mr. Hawkins. We are not sure that the selection will satisfy some of the noisier members of that learned body; but it will satisfy the public (as far as the public cares about the choice), and will reflect credit on the Society itself.

The more intimate friends of the late Mr. Lockhart are raising among themselves a subscription to erect a monument at Drybrugh Abbey over his remains. Lockhart is buried next to his illustrious father-in-law. The monument will be in modest keeping with the tomb which protects all that is mortal of Sir Walter Scott. It will be a kind of altar-tomb of granite, with a profile medallion in bronze on the top of the author it seeks to commemorate. The chief subscribers are the Earl of Ellesmere, Dean Milman, Mr. Richard Ford, Mr. John Murray, Dr. Ferguson, and the Rev. Dr. Wellesley. The medallion is entrusted to Mr. Steell.

India has been contributing its fair share to the subscription for raising a statue in Edinburgh to Christopher North. The subscription now amounts to more than £1300. This will be sufficient, it is said thanks to Mr. Steell's hearty co-operation—to erect a statue in bronze a little larger than life, that will do justice to Wilson, and satisfy his many admirers within our own metropolis. The statue will be set to come in every poet's creed" included a portrait statue in bronze in a public thoroughfare. Poets crept into Westminster Abbey by a kind of good-natured indulgence, now they are maintained there, and find as many admirers among thoughtful visitors as kings and statesmen.

There is a passage in one of the *Tatlers* a paper attributed to Addison—that is curiously true of our own times. He tells us of a vagrant politician who delighted in retailing intelligence on one of the benches in St. James's-park. "This newswender of the day told us, with a seeming concern," says the *Tatler*, "that by some news he had lately read from Muscovy, it appeared to him that there was a storm gathering in the Black Sea which might in time do hurt to the naval forces of this nation. That for his part he could not wish to see the Turk driven out of Europe, which he believed could not but be prejudicial to our woollen manufactures. He then added that he looked upon those extraordinary revolutions which had lately happened in those parts of the world to have risen chiefly from two persons who were not much talked of, and those, says he, are Prince Menzikoff and ——." What we quote is from No. 165 of the *Tatler*, of the 6th of April, 1710. Is it not true of 1855? Is not the name of Menzikoff a remarkable coincidence? Only substitute cotton for woollen, and Mr. Bright and Mr. Gibson will admit its extreme applicability to the present juncture of affairs

The great historian of the Peninsular War has told us for the first time—in a delightful volume just issued of selections from his "History"—who his authorities were for some of the more striking and disputed statements in his work. His chief authority, we now learn, was the Duke of Wellington himself. The Great Captain was always ready to answer any query that the historian put to him, and the historian had the good sense to profit by such promptness and liberality. If anything was wanting to stamp Napier's "Peninsular War" as a standard work, the fact that the Duke was a contributor to its accuracy is more than sufficient to satisfy that want. Oddly enough, we know—but not from Napier that the Duke never read Napier's history; and this not from any discourtesy to a man he esteemed, but from a desire to avoid controversy.

While we are writing that there is no news a bit has reached us that merits publicity. The new edition of Dean Swift's works, which Mr. Murray for some time has announced without the name of any editor, will now appear with the name of Mr. John Forster as editor. Mr. Forster's admirable articles on De Foe and Sir Richard Steele point out him as unquestionably the man peculiarly fitted for the task of editing Swift. A really good edition of the Dean's works is much wanted. Sir Walter Scott's edition is in nineteen volumes, and is now a costly work. Its original price was £8 18s., and its present auction price is still dearer. Sir Walter did good service to Swift; but he retained too many idle notes, and left very much for others to do. Many of the notes are sadly out of place; and the journal to Stella, which requires and deserves the most careful illustration, is all but barren of the assistance which every reader must wish to obtain. Mr. Forster's edition will be in ten volumes, and will comprise all of Sir Walter Scott that is worth retaining

MR. HOPE'S LIBRARY.—At the sale of the valuable library of the late Mr. William Hope, at Paris, the manuscripts which fetched the highest prices were:—A missal in folio of the sixteenth century, with 36 beautiful miniatures, and richly bound, 5600 fr.; a Prayer book, 8vo, on vellum, 144 leaves, and 13 miniatures, 950 fr.; another, written for Madame de Chantilly, 8vo, on vellum, of 401 pages, a miniature and ornaments, initials, with the arms of the calligraphist Le Couteux upon it, 655 fr.; and a other, said to have belonged to Charles VII. and sold for 99 fr. in 1776, 325 fr. Among the books were the "Galerie des Peintres Flamands, Hollandais, et Allemands," Paris, 1792, three vols. folio, proof engravings, 685 fr.; full-length portraits of the personages of the Court of Louis XIV., under the title of "Memoires de Mesdames de la Mode," folio, 260 fr.; "Roland Furieux," translated by Cesaire, Paris, 1775, four vols. 4to, bound in morocco, with proof engravings, 580 fr.; and "Lettres de Madame de Sévigné," Paris, twelve vols., in India paper, bound in green morocco, with Mr. Hope's arms on the cover, with a turkeyish volume, containing 1500 portraits and views, 1690 fr. The sale fetched an aggregate sum of 33,800 fr.

The French Minister of State has addressed a circular to the Prefects, calling their attention to the fact of companies of strolling players being about to go through the country for the purpose of performing at different theatres during the absence of the regular performers. The representations of such companies are forbidden, as, from their stock of plays being exempt from any control, they may play pieces dangerous to morality and to public order.

* Intelligence has since been received of the death of Captain Arnold.

DISTRIBUTION OF THE CRIMEAN MEDALS BY H

ESTY, AT THE HORSE GUARDS.—(SEE NEXT PAGE.)

DISTRIBUTION OF WAR MEDALS BY THE QUEEN AT THE HORSE GUARDS.

HER Majesty's intention to distribute medals for service in the Crimea to all such officers as could be assembled for the purpose, and to a portion of the non-commissioned officers and soldiers from every regiment engaged in the campaign in the East, was announced as an event requiring little preparation except the necessary orders from the Horse Guards and Admiralty for the arrival in town of the officers, soldiers, and seamen entitled to receive the Crimean Medals. But when her Majesty's gracious intention became known, the desire to witness and take part in the ceremony became as deep and as general among all classes of the metropolis as the sentiment of admiration for the valour and fortitude of the brave army of the East. Parliament itself desired to lend its sanction to the scene; and at the last moment galleries and stages of enormous extent were constructed at every point overlooking the Parade in front of the Horse Guards. The House of Lords and House of Commons were accommodated in galleries erected on the Park side of the Parade, looking towards the Horse Guards. On the opposite side of the Parade, and attached to the Horse Guards, were two large galleries, one on each side the archway—that to the north being devoted to the families of the officers participating in the ceremony, and the southern gallery being appropriated to members of the Government and their families and friends. Among the occupants of the latter gallery were Viscount Palmerston, the Duke of Newcastle, Mr. Gladstone, M.P.; Sir G. Grey, M.P.; Mr. F. Peel, M.P.; the Duke of Argyll, the Marquis of Clanricarde, Mr. Bankes, M.P.; the Earl of Minto, Mr. Cowper, M.P., &c.

Between these two galleries a capacious balcony, projecting from the lower central windows of the Horse Guards, and handsomely festooned with scarlet cloth, was constructed for the members of the Royal family. Extensive flights of seats were also erected at the south end of the Parade, near the residence of the First Lord of the Treasury, and at the north end along the Admiralty Gardens; while the roof and stone balconies of the Horse Guards, the Admiralty, the Treasury, and of every house commanding a view of the spectacle, were crowded. The stages and galleries were all covered with crimson cloth; and when, between nine and ten o'clock they became filled with a brilliant assemblage of beauty and fashion, clad in the gayest hues of spring, the picture had received one of its most charming accessories. But that which gave unparalleled magnificence to the spectacle was the scene upon the Parade near the Horse Guards, where were assembled hundreds of officers of every rank and of every arm in the service, wearing the full uniform of their regiment, with all the stars, medals, ribbons, crosses, and orders which they were privileged to wear. Among the earlier arrivals was General Sir De Lacy Evans, whose breast was a blaze of decorations. Officers in uniform, whether belonging to the Line or Militia, were admitted without tickets within the line of sentries, and the loose pelisse of the Hussars, the picturesque cap of the Lancers, and the scarlet and gold of the Line, were agreeably diversified by the gay semi-Oriental uniform of the Nizam's Irregular Cavalry (worn by Brigadier Mayne), the light-blue and silver of the East India Regular Cavalry, and the manly and serviceable dark-blue uniform of the Land Transport Corp (represented by Captain Mayne, now on recruiting service), whose Robin Hood style of bearer excited no little attention. There was a numerous assemblage of officers of Militia and Yeomanry, whose dress was puzzling from its novelty and diversity. The general uniform of the Militia regiments was scarlet and silver, to distinguish it from the gold and scarlet of the Line; but officers of Militia rifle regiments, of Militia artillery regiments, and of the Royal Navy, were not wanting to vary the monotony of scarlet; nor must we pass over without a line the useful dark grey uniform of Colonel Deedes, M.P., the Major-Commandant of the East Kent Yeomanry Cavalry. Whatever may be the merits or demerits of cavalry in the battle-field and in campaigning, it is certain that upon holidays and festivals there is no more splendid uniform in the world than that of English military officers. Let the reader, then, imagine the effect of this glorious contrast and combination and of colour seen from every part of the Parade under a brilliant sun, and he will admit that we have "filled in" a striking background to our picture.

The central object of the Parade, towards which all eyes were turned, was the Royal dais, lined with crimson cloth, situated about fifty yards from the Horse Guards. It contained a handsome gilded chair of state for her Majesty, and a smaller chair for the Prince Consort.

The chair was placed so that her Majesty, when seated, faced St. James's-park, and ample space was afforded for the movements of the troops in the large area between the dais and the railings of St. James's-park. Right and left of the Royal dais, was a double line of sentries. Thousands of ladies and gentlemen were admitted by cards to pass the line of sentries who obtained a view more or less complete view of the ceremony. The future of the day's proceedings which was, perhaps, the least satisfactory was the small space left behind the barriers for the general public, who have shown such English feeling with regard to our army and the prosecution of the war, that their claims to consideration is undoubted, and would, no doubt, have been recognised, but for the unavoidable necessity of securing sufficient space for the evolutions of the troops. The crowd outside the barriers, along the Mall, and at every point from which anything could be seen was so vast, and the pressure so dense, that Hyde-park would hardly have sufficed for the display.

At nine o'clock four flank companies of the Grenadier Guards, two of the Coldstream Guards, and two of the Fusilier Guards, marched upon the Parade with their bands, and took up the position usual on Birth days. The front line also consisted (at right angles to the infantry) of the first squadron of the Life Guards, the first squadron of the 2nd Life Guards, the first squadron of the Royal Horse Guards Blue, and the first squadron of the 6th Dragoon Guards. The rear of the Foot Guards (namely, between them and St. James's-park) were drawn up the non-commissioned officers and men who were to receive medals, and also detachments who witnessed the spectacle as representatives of the regiments in the Crimea. Those who were to receive medals were placed upon the left flank, and those who were not entitled to receive medals on the left flank the officers being drawn up in three ranks in front of their respective corps. The regiments were arranged, according to their numbers, from right to left. About half-past nine the band of the Royal Marines marched through the Horse Guards from Whitehall, followed by the officers and seamen of the Royal Navy and the officers and men of the Royal Marines, who were to receive medals. The sailors, when they emerged from the archway into the centre of the distinguished military throng, themselves taken aback, but soon recovered a joyous kind of composure, which they maintained throughout the ceremony. They took up a position on the right of the dais, near the Admiralty.

At ten o'clock the cheering of the populace in Whitehall announced the arrival of the Duke of Cambridge who immediately took the command of the Parade. His Royal Highness wore the uniform of a Lieutenant-General, with the Ribbon and Star of the Garter, &c. Shortly afterwards the Royal carriages arrived, with the Princess Royal, the Duchess of Kent, and other juvenile members of the Royal family, who took their places in the Horse Guards central balcony, with her Royal Highness the Duchess of Kent, her Royal Highness the Duchess of Cambridge, her Royal Highness the Grand Duchess of Mecklenburg-Strelitz, her Royal Highness the Princess Mary of Cambridge, &c. The General Commanding-in-Chief, Viscount Hardinge; General Lord Gough, Major-General the Earl of Lucan, Major-General the Earl of Cardigan, Major-General Wetherall, Major-General the Hon. J. Scarlett, Major-General Torrens; the Minister of War, Lord Panmure, and the Chancellor of the Order of the Thistle; the First Lord of the Admiralty, Sir C. Wood; Admiral Berkeley, &c., were ready to receive her Majesty, who entered the Parade from Whitehall precisely at eleven o'clock, amid the cheers of the multitude and the thunder of cannon. Her Majesty was accompanied by Prince Albert, the Duke of Saxe-Coburg, the Prince of Wales, Prince Alfred, and the Princess Hohenlohe, and attended by the Duchess of Sutherland and a brilliant suite. Her Majesty, who wore a lilac and white dress, green velvet mantle, and white bonnet, rode a beautiful grey. Prince Albert wore the uniform of a Field Marshal, while the Duke of Saxe-Coburg and another Royal visitor wore the white uniform of the Austrian army. The Queen courteously acknowledged the cheers of the multitude, as "God Save the Queen" pealed out from the bands of the various regiments which assisted at the parade.

The distribution of the medals immediately commenced, after an evolution which may be termed a kind of *coup de théâtre*. The various recipients of the medals were, as we have stated, formed in line in rear of the Foot Guards. The Duke of Cambridge ordered both lines to form four deep, and then the rear line, passing through the front line, marched until it arrived at a distance of 100 feet from the dais, when the word "halt" was given. The recipients of the medals then formed in line, and her Majesty stood face to face with her brave soldiers of the Crimea. The Sailors and Marines formed in line on the left of the Guards. A murmur of applause ran round the countless multitudes to see the dais drawn up as the order of their precedence—Cavalry, Royal Horse Artillery, Sappers and Miners, Guards, and Infantry of the Line—the gallant fellows who have done their part in sustaining the honour of our country, and poured out their blood like water in its defence.

The officers and soldiers then passed before her Majesty in single file, the band playing the "Coronation March" from the "Prophète." As they arrived at the left side of the dais, each man handed to Major-General Wetherall a card containing his name, rank, and, if wounded, at what battle. These particulars were read out by the Adjutant-General for the information of the Queen and Court. On her Majesty's right stood the Minister for War, who handed the medals successively to her Majesty, which her Majesty handed to the men with a most gracious and dignified grace. The first person who received the medal was his Royal Highness the Duke of Cambridge, and a shout rang out from the multitude which alike expressed the public sense of the Royal Duke's deserts and a consciousness of the high gratification which it must have afforded the Queen to see in the van of that gallant body one so nearly allied to her in blood and friendship. Then came Colonel Macdonald, the Duke's Aide-de-Camp, Major-General the Earl of Lucan, Major-General the Earl of Cardigan, who was greeted near the Queen, Major-General the Hon. J. Scarlett, with their respective staffs, and the Cavalry in the order of their regiments. The Royal Artillery, Royal Engineers, and Royal Sappers and Miners, under Lieutenant-General Sir J. Burgoyne, G.C.B., followed. Then came the officers and men of the three regiments of Foot Guards, under his Royal Highness the Duke of Cambridge. Next advanced the infantry of the line, under Lieutenant-General Sir De Lacy Evans and his staff, with Major-General Torrens and his staff.

It is impossible to describe the mingled sensations of admiration and pity which went like an electric thrill through the vast multitude as they saw that line of heroes, whose gaunt and pallid forms, scarred features, and maimed and mutilated limbs, told alike the story of their bravery, and of their many sufferings and heart-rending sufferings and self-privation. Many of those who hobbled upon crutches or walked painfully with the assistance of a stick wore upon their arms the emblems of mourning for some brother or near relative, now reposing on the hill-side at Balaclava, or in the hospital graveyard of Scutari. To every one of the wounded, whether soldiers or officers, her Majesty said some kind word, or asked some gracious question. Many of the poor fellows were almost overcome by their emotion and by the sweetness of her Majesty's condescension, and many a moistened eye upon the Royal dais bore witness to the intimate sympathy that exists between the Palace and the Camp. A few of the private soldiers appeared to lose their self-possession for a moment on finding themselves thus brought into the very presence of the "divinity that doth hedge a King;" but for the most part the brave fellows exhibited a simple gratitude and manly self-respect which did them infinite honour.

Three officers, whose wounds rendered them unable to walk, were wheeled past her Majesty in Bath chairs. Lieutenant-Colonel Sir Thomas Troubridge, of the 7th Fusiliers, who lost both his feet in action, was the first of these maimed heroes. The Queen, leaning over the chair, handed Sir Thomas his medal with the most gracious gesture, and conferred upon the delighted officer the post of Aide-de-Camp to her Majesty. Captain Sayer, of the 3rd Fusiliers, was also compelled to receive his medal from his wheeled chair, and her Majesty's sympathy was here also manifested with the liveliest grace. Another gallant sufferer, Captain Currie, of the 19th Foot, was scarcely able to walk the length of the dais, even with the aid of a pair of crutches; and his helpless condition and severe sufferings deeply excited the sympathy, not only of the Sovereign, but of his comrades in arms. When the Highland regiment passed before the dais the band changed the tune to the "Blue Bells of Scotland," and "Where's the man to be seen in Tartan?" Such fine stalwart fellows were some of these Highlanders that one might have thought that the finest men of the regiment were also the bravest, or that they had been selected as much for their physical prowess as for their valour. As the men received the medals as they passed towards the line of sentries on the Admiralty side, where they became the objects of eager but respectful curiosity. Upon many faces the lines of suffering yet remained, and here and there might be seen traces of that resentful rightness of face, that fierce and sullen look in the eyes, which those who have seen them lying in their blankets in the hospital at Scutari have depicted with such graphic power.

When the soldiers had passed before the Royal dais, the Royal Navy and Marines, under Vice-Admiral Dundas, presented themselves—the gallant Admiral being the first to receive the medal from the Queen, the band playing "Rule Britannia." The soldier had, according to regulation, satisfied the necessities of the service by touching his hat to the Sovereign; but Jack took his off reverently as he approached Her Majesty. The officers of the Royal Navy having passed the dais, then came the turn of the midshipmen, smart gallant little fellows, who, in all the glory of white kid gloves, received such an honour from the hands of their Sovereign as middies never received before. The Queen appeared to be so pleased to learn that any man had been wounded, the inquiries of the Queen were made with an earnestness and sympathy which appeared to be highly relished by the rough, but honest tars. The marines brought up the rear; and no body of men better deserved to participate in the honours and distinctions of such a day.

The distribution of medals having been brought to a close, the detachments from the depôts of various regiments in the Crimea who had been allowed to witness the ceremony—but who have not seen service yet, marched to the rear of the Guards and formed there. The Guards, who all wore their new scarlet tunic regimentals, then marched past and saluted the Queen, which brought to a termination the imposing pageant. The Royal carriages drove up, the bands again played "God Save the Queen," and her Majesty left the ground amid the cheering of the people, returning to Buckingham Palace by the Centre Mall.

After the parade the non-commissioned officers and soldiers who had received medals were formed in line and marched to the Queen's Riding school, Pimlico, where a substantial repast was prepared for them, and the sailors, marines, and marine artillery. During the dinner Mr. Majesty, leaning on the arm of Prince Albert, and accompanied by the Prince of Wales, and other members of the Royal family, paid them a visit. A party of seamen and marines also enjoyed an *al fresco* entertainment at the Admiralty Gardens.

The following are the names of those who were honoured with the Crimean Medal:—

OFFICERS OF THE ARMY.

Lieutenant-General his Royal Highness the Duke of Cambridge.
Lieutenant-General Sir De Lacy Evans, K.C.B.
Lieutenant-General Sir John Burgoyne, K.C.B.
Major-General the Earl of Lucan.
Major-General the Earl of Cardigan.
Major-General the Hon. J. Scarlett.
Major-General Torrens.
1st Dragoon Guards [illegible] Robertson, Lieutenant Gunter.
5th, Captains Swiftden, Scott, Reynolds, Hutton.
Royal Dragoons Captain [illegible], Sykes; Lieutenant Hartopp, Cruse; Veterinary-Surgeon Penn.
2nd Dragoons: Captain Sutherland, Lieutenant Prendergast.
4th Light Dragoons: Captains Hume, Hodge, Lieutenant Booth, Assistant-Surgeon Crichton.
6th Dragoons. Lieutenant White, Cornet Anderson.
8th Hussars: Cornet Reid.
11th: Captains Dallas, Travelyan, Cornet Silver.
13th Light Dragoons: Lieutenant the Hon. G. Paton, Newton, Lieutenant-Colonel Lord Fleury, Lord Inverkeilth, Wilson, Brown-Major Fielding; Captains Baring, Lord Bingham, [illegible]
[illegible] Captain Cobbe, Surgeon Hearn.
[illegible] Trevor.
[illegible]-and-Colonel Sir T. Troubridge; Captains Rose, Tryon, Butler, Carpenter, Neville, Curry, Fitz Gerald, Watson; Lieuts. the Hon. A. Crofton, Blaney, M'Henry
14th Foot: Captain Marycock.
17th: Captains Earle, Brinckman.
18th: Captain Swinburn.
19th: Lieutenant-Colonel Unett; Captains Barrett, Clay, Morrison, Currie, Jennings; Lieutenants Unett, Thompson, Mitford
20th: Captains M'Neill, Lord.
21st: Lieutenant Colonel Haines, Brevet-Major Holdaro, Lieutenant Stevens
22nd: Captains Bulwer, Bathurst, Sayer, Granville, John Clarke
[illegible]th: Major Lindsell, Brevet-Major Wakefield, Captain Orlebar
30th: Brevet-Majors Rose, Fakenham, Dickson, Bagley; Captains O'Brien, Harcourt,
Falkner; Assistant-Surgeon Fyfe
33rd: Brevet-Lieut.-Colonel Gough, Captain Nugent; Lieuts. Sirce, Greenwood, Owens, Keenick
34th: Captain Pope
38th: Captains Crozier, Beswick, Glester; Quartermaster Doherty
39th: Captains Newport, Wilson, Agnew, Dixon.
41st: Captains Meredith, Rugh, Bush, Stewart, Assistant-Surgeons King, Abbott
47th: Lieutenant-Colonels Tulloch, Cameron; Brevet-Major Campbell, Captains Wilkinson, Wheatley, Paymaster Muilhem
49th: Captains Brickelthwaite, Shrestfield; Brevet-Major Browne, Lieutenant Bradford
50th: Major Vesey, Captains Pane, Wadly, Llewellyn; Lieutenants Waldy, Wiltem.
[illegible]th: Lieutenant-Colonel Daly, Brevet-Majors Sankey, Lodder; Captain Phillips.
54th: Captains Astley, Corban, Rooker; Lieutenant Cobbe.
55th: Brevet Lieutenant-Colonel Maxwell, Major Weare, Assistant-Surgeon Noot
56th: Lieutenant-Colonel Powell Late Major of the 97th Regiment.
58th: Colonel Warren, Major Coates, Captains Blacett, Armstrong, Barnston, Marchand, Hume, Brown: Lieutenant Twyson
[illegible]th: Captain Copeland, Lieutenant Buller, Assistant-Surgeon Scott
62nd: Lieutenant-Colonel Tidwell, Major Harries Captains Bamford, Fairclough, Chambers Johns; Surgeon Watt Assistant-Surgeon Flower.
68th: Captains Morant, Storer, Seymour, Fitzroy; Lieutenants Light, Cator; Assistant Surgeon Johnston
71st: Captains Brownehassett, Smith
77th: Lieutenant-Colonel Sirston, Captain Carden
79th, Lieutenant-Colonel Taylor, Captains Maitland, Miller, Cunningham, Frome, Muro; Paymaster Cortes
[illegible]th: Major Brown; Captains Crosse, Haynes, Riley, Heaning, Lieutenant Reid.
[illegible]th: Captains Phillipps, Nixon; Lieutenant Cresswell
90th: Captain Sulse, Lieutenant Irby
[illegible]rd: Lieutenant-Colonel Hay, Captain Dawson, Lieutenant Clayhills, Assistant-Surgeon [illegible]
[illegible]th: Lieutenant-Colonel Hume; Captains Charlton, Garrard, Morgan, Lieutenants Bazalgette, Smith, Brobby
97th: Captain Annesley.
[illegible]th: Brevet-Lieut.-Colonels Bradford, Hereford; Majors Hardinge, Elrington; Majors Earle of Errol, Elliot, Captains Inglis, Nixon, Warren, Butler, Boarcher, Hore, Lieutenants Paymaster Cortes
Staff, Unattached, &c.: Lieut.-Colonel Hon. J. Macdonald, Brevet-Major Mundy, 1st Regiment, Major Walker, 7th Dragoon Guards; Lieut. Lotly, Royal Horse Guards; Colonel Jeffreys, Parkhouse, Dep. Captains Clifton, Carpenter, 7th Dragoon Guards; Connolly, unattached; Major Nasmyth, Knox, East India Company's Service, Lieut. Colonel Evelyn, Turk service.
Medical Staff: Drs. Dumbreck, Forrest, Deputy-Inspectors-General Lawrence, Hawker, Staff-Surgeons, Darcy, Mr. Cock, Mitchell, Stewart, Assistant-Surgeons
Acting Commissariat Clerks: Le Maitre, Brown
Chaplain: Rev. R. Hopkin

NON-COMMISSIONED OFFICERS AND PRIVATES.

1st Royal Dragoons: Private Samuel Woodwards (wounded).
4th Dragoon Guards: Corporal Schofield (wounded), Private Perks, Farrier Innis
5th: Corporal K. Malone (wounded), Privates Carney, Wilkins.
6th: Private C. Stockwell.
[illegible]nd, Dragoons (Scots Greys): Private Alexander Turner (wounded). Charles Adam, Robert Hunter
6th (Inniskilling) Dragoons: Sergeant-Major Alexander Shields (wounded), Private Thomas Waite (wounded), Michael Rooke (wounded), John Brown
4th Light Dragoons: Sergeant David Dillon (wounded), Privates Thomas Moon (wounded), William Simpson, Healey (curation.
8th Hussars: Private Mcdonnell, Saddler Twohey
11th: Sergeants John Bruce (wounded), John Kilvert (wounded), Corporal Clark, Private Michaels (wounded), Walker (wounded).
13th Light Dragoons. Private Mountain, Gibbons, Keene (wounded)
14th: Lance-Corporals Thomas Hose (wounded), William Hancock; Private John Yates (wounded)
Coldstream Guards, 2nd Battalion: Sergeant-Major Talbott (wounded), Sergeants Thomas Austin (wounded), Robert Harvey, William Talbott, Corporal Frederick Bridges (wounded), Private William Scranton (wounded), John King (wounded), John Simmons, Thomas Reed, John Rutter (wounded), John Hurt (wounded) Emanuel Barnard (wounded), Richard Hibbard, William Harnill (wounded), John Hay (wounded), Peter Burtonwood, [illegible], Walter Robinson, Joseph Hawkins (wounded), James Hadley, James Lacey, William Haworthy (wounded), Frederick Sheldrake (wounded), William Nicholls (wounded).
Scots Fusilier Guards, 2nd Battalion, Sergeants Richard Rye and John Crase, [illegible] Scots Fusilier Guards, 2nd Battalion, Sergeants Richard Rye and John Crase, [illegible] C. Mcmillen; Privates William Joy, William M'Legan, Thomas Walters, William Roberson, James M'Kay, William Boyd, James Wyatt, Benjamin Drummond, Jonathan Kitt, Alexander Hannah, Duncan Menzies, Elijah Richens (sick), Peter Grimmald, Christopher Peter Raffi, John Fye, George Biddlecombe, George Watt; Drummers James Graham, [illegible]
Royal Regiment. Lance-Sergeants J. Roberts, Privates Patrick O'Donnel, John Manning, [illegible]
6th King's Own: Corporal Peter Dunn. Lance-Corporal James Ponton, Privates John Cowley, Jesse Gault
Royal Fusiliers. Sergeant Thomas Sarjeant (wounded), Private Thomas Court (wounded), James Mooney (wounded), William Barrack (wounded)
5th: Sergeant H Rudd. Private H Rudd, Private T Madigan
19th: Sergeant P Daly (wounded), Privates J O'Callagan (wounded), J. Hicks, J. [illegible]
20th: Corporal M. Smith, Private J. Adams (wounded); J. Stokes (wounded), W. Wood (wounded).
23rd Fusiliers: Corpors. Lawson, Privates Bradshaw (wounded), Lyons, Talbot.
[illegible]rd: Corporal S. Lock, Privates T. Owans (wounded), J. Healey (wounded), Shave (wounded)
28th: Private Patrick Fitzgerald, William Carey, John Edwards, William Wilcox
30th (detachment): Sergeant John Taylor, Corporal Michael Walsh, Private Robert Welsh
32nd (Duke of Wellington's): Colour-Sergeant William Mason (wounded), Sergeant William Knox (wounded), Private Joseph Murray (wounded), Jeremia...Crowley (wounded), William Burton (wounded)
38th: Colour-Sergeant James Stone (wounded), Corporal William Goodall (wounded), Private Isaac Kite (wounded), James Stone (wounded)
[illegible]rd: Corporal Elijah Thomas, Lance-Corporal Robert Welsman (wounded), Private Martin Truston (wounded), Isaak O'Connell (wounded)
44th: Corporal Fox, Privates Lyal (wounded), Thomas Such (wounded), Lawson.
47th: Lance-Corporal George Rogers (wounded), Privates William Carney (wounded), Daniel Moloney (wounded), Henry George (wounded)
49th: Sergeant William Spooner, Privates Daniel Beedwood, John Ryan, James [illegible] (wounded).
[illegible]th: Lance-Sergeant Charles Cross (wounded), Lance-Corporal [illegible] Wright (wounded), Private James Sadler (wounded), Peter Gallagher
[illegible]: Sergeant Robert Cross, Corporal John Cunningham (wounded), Privates Cowan, Lee, Hearn (wounded)
[illegible]th: Colour-Sergeant Cornelius Wrenn, Privates George Young, James Lidell, Hudson
50th: Privates John Foster Edward Fox (wounded), John Farrell (wounded), Daniel Hudson
57th: Corporals J. Keeling (wounded), H Smith (wounded), Private W. Noble (wounded), Bird, Sergeant W. Proose (wounded), Privates Duke Hagan, James Gaffny, W. Hudson
62nd: Private Peter Edward Fox (wounded), John Farrell (wounded), Daniel Hudson
63rd: Light Infantry: Privates Patrick Reid (wounded), Private W. Noble (wounded), Bird, Sergeant W. Proose (wounded), Privates Duke Hagan, James Gaffny, W. Hudson
68th: Light Infantry: Private Patrick Reid (wounded), John Boden
77th: Sergeants Mc, or Robert Bourgeau, Corporal Charles Dillon (wounded), Private Samuel Brown, Matthew Cromwell, Charles Yeldyn
79th: Highlanders: Sergeant John M'Even, Privates Alexander M'Donald (wounded), James Anderson (wounded), Charles Borthwick
[illegible]: Sergeant O'Lynn (wounded), Privates Martin Day (wounded), Patrick Sullivan (wounded), Thomas Sullivan (wounded)
90th: Light Infantry (detachment): Privates John Hall, John Thompson, John Bastable
93rd: Highlanders, Sergeant Alexander M'Donald (wounded); Privates Ervan, Fyfe, [illegible] Sergeant Joseph Cluff, Privates Joseph Cluff (wounded), Edward Beaton (wounded), Patrick Mulaney (wounded)
[illegible]th: Corporal Samuel Maddon, Privates John Holbrook, Henry Sergeant, Charles Fay
[illegible]nd: Battalion Rifle Brigade: Colour-Sergeant William Muggridge (wounded), Privates Edward Palmer (wounded), William Carolees (wounded), T. Dobbins (wounded)
[illegible]rd Battalion Rifle Brigade: Colour-Sergeant Thomas Holden, Sergeant James [illegible], Private John Tatem
Royal Artillery: Sergt.-Major J. Hains, Quartermaster-Sergt. W. Brown, Staff Wheelwright Carriage, Sergeant-Farrier John Phillips, Colour-Sergeants Robert [illegible] and William Ferguson William Crawford (wounded), James Hodgson, Thomas Sadler, Richard William Crowe (wounded at Inkerman); Corporals Clifton, Applope, William Wardle, Edmund Bombardier Robert Cox, Alexander Macdonald (wounded in trenches); Gunner Henry Lindsell, Drivers William Coachman, David Pinkey, Hunter Hugh Elliott, Robert Hawkins (wounded at Inkerman), Samuel Bastlen, Richard William Crowe (wounded at Inkerman); Corporals Clifton, Applope, William Wardle, Edmund Bombardier Robert Cox, Alexander Macdonald (wounded in trenches); Gunner Henry Lindsell, Drivers William Coachman, David Pinkey, Hunter Hugh Elliott, Robert Hawkins (wounded at Inkerman), Samuel Bastlen, Richard Thomas Pilling, [illegible] Alexander Thompson, William Dixon, Hugh Bailey, Charles Hall, Edward Hutchinson; Henry Bush, John Davis, Henry Sawyer, John Pressy (wounded), [illegible] Bombardier Peter Macintosh
Sappers and Miners: Corporals Cobbe, Surgeon Hearn.

ROYAL NAVY.

Vice-Admiral J. W. Deans Dundas
Captains G. Graham, late of the Sidney; Lord G. Paulet, late of the Bellerophon; C. Ewart, late Command[illegible] of the Irrafagar, A. F. Kyeaston late in command of the [illegible]; Hon. Keppel Craven, late Commander of the Albion, R. C. Dacres of the steamer, Lord St. Russell, late of the Vengeance; H. F. Greville, Trafalgar
Commander W. R. Edlund, late Lieutenant of the Agamemnon; J. N. Norman, late Trafalgar (severely wounded); W. H. Bridge, late Lieutenant of the Vengeance; [illegible] Jones, late Lieutenant of the Hercules; John W. D. Macdonald, late Flag-Lieutenant to Admiral Boxer, late in Agamemnon; J. N. Norman, late Trafalgar (severely wounded); W. H. Bridge, late Lieutenant of the Vengeance; [illegible] Jones, late Lieutenant of the Hercules; John W. D. Macdonald, late Flag-Lieutenant to Admiral Boxer, late in Agamemnon; Sampson Reed, late Master's Assistant of the Sutlej; Lord E. Conolly, late Lieutenant Robinson, wounded at Inkerman; Joseph Holmes, William Leander; the Hon. H. W. Chetwynd, late of the Sphynx; J. Berkeley, Vengeance
Second Master Mr. C. Parkinson, of the Sinapard, (wounded); Mr. W. H. Faweett of the Vengeance
Mates Mr. J. W. Lambe, late of the Trafalgar; Mr. G. T. Nicholas, Retribution.
Midshipmen Mollyeux, of the Belvidera; the Hon. Maurice Wingfield, late of the Agamemnon; F. H. Fleece, late of the Belvidera, W. H. M. Molyneux, Sutlej; A. C. A. Hunt, late of the Trafalgar; Sampson Reed, late Master's Assistant of the Sutlej; Lord E. Conolly, late Lieutenant Robinson, wounded at Inkerman; Joseph Holmes, William Leander; the Hon. H. W. Chetwynd, late of the Sphynx; J. Berkeley, Vengeance
Second Master Mr. C. Parkinson, of the Sinapard, (wounded); Mr. W. H. Faweett of the Vengeance
Mates Mr. J. W. Lambe, late of the Trafalgar; Mr. G. T. Nicholas, Retribution.
Midshipmen Mollyeux, of the Belvidera; the Hon. Maurice Wingfield, late of the Agamemnon; F. H. Fleece, late of the Belvidera, W. H. M. Molyneux, Sutlej; A. C. A. Hunt, late of the Trafalgar; E. S. Hamilton, late of the Britannia; Durant, late of the Trafalgar; Stirling, Coldstream Guards, late of the Britannia; N. F. T. Digby, late of the Britannia; Mr. J. T. B. Brenner, M.D., late of the Sanspareil
Surgeon: Dr. W. Lewis, late of the Vengeance; Dr. H. T. S. Beveridge, late of the Agamemnon
Assistant-Surgeon Mr. R. Creighton, Trafalgar.
Paymaster Mr. W. Hamilton, late of the Britannia.
Engineers. Mr. E. T. B. Bird, late of the Terrible; Mr. R. C. Reynolds, late of the Agamemnon
Clerk Mr. C. K. Foulkes Bellerophon
Boatswain Mr. J. Starling, late of the Samson.
Carpenters Mr. J. Brier, Armourer; J. S. Johnson, carpenters crew
Bellerophon, H. Bridge, chief quartermaster; J. Knowles, second captain of forecastle, Dawson, armourer; J. S. Johnson, carpenters crew
Sanspareil: T. Brown, chief quartermaster; W. Foot, J. Mooney, E. Penguilley, leading seamen
Arethusa: Thomas Thorne, gunner's mate (wounded); William Mann, Charles Wyatt, Robert Jones, leading seamen
Retribution: James Garland, admiral's cox-wain; John Goulding, John Beard, seamen; James Gribble.
Trafalgar: Mr. Derek Melson, captain of afterguard; Jacob Jillard, James Willis, Robert Pepys, leading seamen
Britannia: Charles Brooks, admiral's coxswain; Daniel Cockley, gunner's mate; Michael Lacey, John Knue, able seamen
Trafalgar: John James, captain of forecastle, Joseph Ridley, Charles Smith, leading seamen, Joseph Day, able seaman

ROYAL MARINES.

Captains W. H. March (severely wounded) E. F. Usher; Lieutenants F. H. Cox M'Arthur, F. G. Fym, Francis Walton
Chatham Division: Colour-Sergeant Edward Smith, Lance-Corporal Arthur H. Privates Frederick Hensen, James Schooling, William Cimpson, James Jackson, George Osborn, Charles Goff (wounded).
Portsmouth Division: Privates Henry Eldell, Corporal William Chase; Privates Timothy Lyons, Benjamin Bush, Charles Tucker, Richard Woolley, George Haywood
Plymouth Division: Corporal Patrick Farrell; Privates William Robinson, William Waverley, John M'Cann [illegible], William Midgley, John E. Hutchinson, Robert Woods, Charles Robinson (wounded), John M'Elroy (wounded), John Burton (wounded), Robert Wilson (wounded), Joshua France (wounded), Robert Wilcox (wounded), and Joseph Smith (wounded).
Artillery Companies Sergeant William Rigney, Bombardier Michael Flynn; Gunners Samuel Sir [illegible], Edward Tiele, William J. Hewlett, Robert Kennedy, John McIlnlah.

NOTES OF THE WEEK.

LAST week I had to chronicle the rare occurrence of a field-day in the House of Lords; this week has given us the incident of a "cross" in the House of Commons. The sort of thing has happened before, but not with the unblushing completeness of Monday night. The disappointment of the crowds of people who hurried over early dinners so as to get down to Westminster in time to hear what they anticipated would be the great debate of the Session, and then found that the matter had been arranged out of court, was comical, and reminds one of what happened in former days, on the unexpected break-up of Lord North's Government. On that occasion there was a crowded house. Every one expected a long debate—a full-mouthed bard—and the members sent their carriages away. To the surprise of every one, instead of showing a bold front to the attacks of his adversaries, the Premier calmly informed the House that he and his colleagues had resigned in the afternoon, and thereupon moved the adjournment, which—as there was no business before the House except the intended badgering of a Ministry which had ceased to exist—was forcedly carried. "There is some good in being in the secret, gentlemen," said the ex-Minister, as he passed down Westminster-hall to his carriage, addressing the discomfited groups who were peering out through the rain in the vain hope of arresting some arrant hackney-coach. Certainly so decided a cross as that of Monday night was never *not* fought: but, as members of all parties were implicated in the transaction, the tendency is to treat the matter rather as a good joke than otherwise. Whether the character of the House of Commons stands the higher for such jokes is a question.

An eruption of Vesuvius, exceeding in severity any that has occurred for a great number of years, was, at the last accounts, still continuing. In these days hardly any occurrence gets the honour of serious treatment; where our fathers shuddered we prefer to laugh—just as they listened to Siddons, and our predilections incline to Keeley. So, instead of those emotions of terror and sublimity which so great a convulsion of nature would have excited in the minds of the spectators in former days, now the sensations experienced appear to be principally those of amusement. Vesuvius in its fury is looked upon in the light of a popular performer: people order their carriages, and drive to Castellamare, or scramble to the Hermitage or the Somma, just as they would go to the opera, or the San Carlino, with a grateful sense of the advantage, never absent from the Neapolitan mind, of not having to pay for their seats. If eruptions could be had to order, no doubt the Sorrento Railway Company would get one up every year, for they are making much money of this one by running trains, filled with the curious, every quarter of an hour to Portici. The art of advertising is not much known in Naples, or the walls would doubtless disappear beneath posters, composed on the Vauxhall or Cremorne model, as thus—"Immense attraction!!! Grand Eruption! Floods of Lava—Destruction of Vineyards—probable overwhelming of Castellamare! Tickets for the grand stand to be had at the office. Refreshments by Messieurs Cecchi and Reschi," &c. It may be as well to remark that in one respect the eruption seems to have been hitherto almost harmless: we have heard of little, if any, loss of life.

In answer to a question relating to the mysterious engine proposed by Lord Dundonald to be employed in the destruction of Sebastopol and Cronstadt, Lord Palmerston has said that, although he could say nothing positive, it appeared to him that the difficulties of its employment were almost unconquerable. One cannot guess what may be the exact nature of Lord Dundonald's invention; but no very deep science is requisite to know that there exist explosive mixtures compared with which gunpowder is as harmless as a child's toy, and which, introduced, even in small quantities, within a hostile fortress, would by their explosion absolutely pulverise the most solid ramparts. Probably the most active agent of this kind with which we are acquainted is that which chemists call chloride of azote (a combination of chlorine gas and nitrogen) which has hitherto been only procured in the form of very small globules, of an oily liquid. The explosive force of this substance far exceeds that of any other known. Almost anything—even a bare touch by a piece of metal sets it off; and a globule no bigger than a large pea will blow a hole in a thick table. A pint bottle of this agreeable fluid would certainly blow Sebastopol "into the middle of next week," if a man in a balloon could drop it into one of the batteries. It is only a question if it would not also blow the Allied armies and the Crimea itself into the Black Sea. But then who could, or would, make a pint bottle of it?—or, supposing it made, and the city containing the manufacturers have contrived to have escaped the dangers of the process, who is to take charge of it, or carry it where it is wanted? Many people think that Lord Dundonald's plan has some reference to the use of balloons. If so it would not be the first time that balloons have been used in warfare: they were successfully employed by Dumouriez for the purpose of reconnoitring, I think, before the battle of Jemappes.

A long letter, signed Verbena, has appeared in the *Times*, setting forth in very lively terms the amount of crowding, pushing, hustling, struggling, inflicted and undergone by ladies and gentlemen who attend the Drawing-rooms at St. James's. No doubt it is very bad, but the English people have themselves to thank for it. It is hard to conceive for what earthly reason, unless out of kindness to the milliners, half the people who attend Drawing-rooms do so. To say that the object is to show respect to the Queen appears to me simple nonsense. The fact is, the English have a mania for going to Court. In foreign capitals, our Ministers are plagued out of their lives by applications from all sorts of people "to be presented." Quantities of applications are made, as I happen to know, after every Drawingroom, at the Chamberlain's office, for certificates of presentation. Of course there are no such things, but the reason of asking for them is the notion that no one can be presented at a foreign Court unless he or she has first undergone the operation at home. The consequence of this singular anxiety to bow or curtsey to the Sovereign is, that a thousand people are almost squeezed to death, where the two or three hundred who appeared at St. James's in former times could move about in comfort.

THE LATE "O." SMITH'S LIBRARY.—The library of this well-known connoisseur (whose real name was Richard John Smith) was sold, by auction, by Messrs. Puttick and Simpson, of Piccadilly, last week—the sale occupying three days. Few among the frequenters of the Adelphi Theatre, where the deceased gentleman's impersonations of diableries and human atrocities have alternately horrified and amused, would have supposed that, in his private pursuits, the laborious student and assiduous "collector" were combined. Evidence of this, however, is furnished by the catalogue of his library, which contains upwards of 1000 articles, chiefly books, the selection of which is alike creditable to the good taste and discrimination of the late possessor; while the careful manuscript notes and occasional illustrative drawings by his hand bear testimony that his books served not as mere furniture to his shelves. The collection was not one of rarities, but consisted mainly of useful books. A few of the more remarkable were the following, viz.:—Lot 312, collections for a dramatic every-day book, formed by the late Mr. Smith, and entirely in his singularly neat and beautiful autograph, sold for £8. Lot 313, dramatic autographs, consisting of letters of David Garrick, Mrs. Siddons, and many other dramatic celebrities, sold for £4 2s. 6d. Lot 483, Percy Society's publications, sold for £3 5s.; a set of Richardson's works, sold for £6 2s. 6d. Lot 538, a collection of materials towards a history of the English stage, by the late Richard John Smith, Esq., 25 vols., sold for £31. Lot 559, a manuscript and printed collections relative to the English stage, compiled by the late Mr. Joseph Haslewood, 9 vols., sold for £35. Lot 604, Garrickiana, a collection of engravings to illustrate the life and theatrical career of David Garrick and his contemporaries, in two atlas folio volumes, sold for £35. Lot 610, a series of Hogarth's works, sold for £12 10s. Lot 871, Theatrical Caricatures, a large collection of engravings, mounted in a volume, sold for £7 7s. Lot 872, Title-pages, a very large and interesting collection, presenting examples by Faithorne, Cross, Dorigny, De Hry and others, in two vols., sold for £5 12s. Lot 876, Wilkinson (J.) Theatrum Illustratum, memorials of ancient playhouses and modern theatres, copiously illustrated, by the late Mr Smith, sold for £8. After the books were sold some curiosities and personal relics of the late owner, but presenting nothing remarkable—amongst them (lot 994) knife used in playing *Shylock*, by the late Edmund Kean, sold for 12s.

CHESS.

TO CORRESPONDENTS.

J. K., Manchester.—We have received but one of the Games, and shall be glad to have some other specimens.

J. T., Tottenham.—The Solution of 581 as given by us is perfectly correct omitting the superfluous letter (that White's set moves); and if Black take the Rook, as you suggest, he is obviously mated next move.

A. P., Florence.—Your letter of the 28th ult., and the subsequent enclosures, have duly arrived. The translations are admirably done.

J. C. BAYLISS.—1. It shall be submitted to the author, and we hope may prove incorrect, as it always a pity to find a clever Problem in other respects, stumbling of a commonplace scheme. 2. We have no recollection of receiving any correct Solutions of yours which were not noticed.

A. K., Lambeth.—Now under consideration.

M. M., Cayras, F. Deacon of Bruges, J. B of Bridport, W. Grimshaw, H. Turton, C. M. J. C. F. H., and Mr Kilroy are thanked for the Problems.

DELTA.—An early reply will very much expedite the arrangements and oblige us.

W. C. S.—If, on playing a game two stops, it pass over a square commanded by an adverse pawn, your opponent may take it with his pawn, as if you had played it only one step but, of course, he cannot do that and make another move also.

S. S. T., Nottingham.—You may obtain the German "Handbook" of Williams and Norgate, the foreign booksellers, and the other work named of Mr. C. Stoet, publisher, Klaw-Wilhelm-street, Charing-cross.

C. W., Sunbury.—Your Problem is not quite up to the standard. 2 The Solutions are correct. 3. We are too much driven for space to reprint the position you ask for.

H. F., Penzance.—Simply because Black would have re-seated his King to Q R 2nd, and then have won the game.

C. G., Ashwell.—We have no room at present for the Solution, or it should be given

W. C. S., Streatham.—No. 6 shall have attention. No 7 is below par

QUEEN'S STEPHEN, E. L. B.—The Solution of the "Smothered Mate," which Leonora gives in 1 Q to K 6th (ch), 2. Kt to K B 7th (ch), 3. R to K R 6th (double ch), 4. Q to K Kt 6th (ch), 5. Kt to K. B 7th—Mate: and in the modern versions of this beautiful stratagem the Pieces are so arranged that they admit of no other.

SOLUTIONS OF PROBLEM NO. 585, by Absolom, Yeldav, Argus, J. P., Guernsey; E. H., Norwich, S. T., Falmouth, C. W., Sunbury, are correct.

SOLUTIONS OF PROBLEMS NO. 586, by Arty, Yeldav, J. P., Guernsey, E. H., Norwich, F. Addison, C. E. B., Dublin; Ernest, M. P., Septimus, Philip, P. R. S., Alexander, G. P., J. T. H., W. D., W. C. G., Streatham, C. P. G. J., Rosehouse, F. H. of Norwich, Bystander, Lorenzo, Belfast, Edmonton, Peter-Pamflies, Dogberry, Osculphonic, D. D., Bemid Artilleryman of Woolwich, Medicus, Dot, Argus, T. F. G., are correct. All others are wrong.

SOLUTION OF PROBLEM NO. 585.

WHITE.	BLACK.	WHITE.	BLACK
1. Q to Q B sq	Q to K Kt sq	3. Q to K B 4th (ch)	P takes Q
2. Kt from Q 3rd to K B 2nd (ch)	B takes Kt	4. R to K R 4th—Mate	

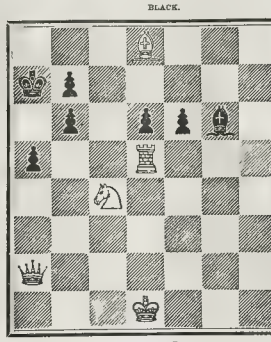
SOLUTION OF PROBLEM NO. 586.

WHITE.	BLACK.	WHITE.	BLACK.
1. Q to Q Kt 5th (ch)	P to B 3rd	3. B takes R	R takes R.P(best)
2. Q to Q Kt 8th	R takes P (ch) (best)	4. B to K Kt 5th	Anything
		5. Kt mates	

PROBLEM NO. 588.

By Mr. H. TURTON

BLACK.



WHITE.

White to play, and mate in four moves.

CHESS IN PARIS.

Match between MM. LA ROCHE and DE RIVIERE.

This contest has terminated somewhat unexpectedly, and in a manner more satisfactory, perhaps, to the *amour propre* of the combatants than to the expectations of the public, who are not generally very fond of negative issues, whether of war or sport. The conditions of the match were, that the first who won seven games should be declared victor. After each party had scored six, just when expectation was on tiptoe for the decading struggle, the belligerents, considering that one game was an insufficient test of superiority, agreed, by mutual consent to draw stakes and count the battle drawn. No one can blame them for this arrangement: the match was of their own making, and they had an undoubted right to conclude it as they pleased. We can hardly believe, however, that either will now rest content until the question of supremacy is fairly determined, and have no doubt that another match, of a larger number of games, will take place on the next occasion of M. La Roche paying a visit to the capital.

THE FOLLOWING IS THE THIRD GAME PLAYED:—

(Irregular Opening.)

WHITE (M. La R.)	BLACK (M. de R.)	WHITE (M. La R.)	BLACK (M. de R.)
1 P to K B 4th	P to Q 4th	31. K to his 2nd (*f*)	K to B 2nd
2. P to Q B 4th	P to K 3rd (*a*)	32. K to K R sq	Kt to K Kt sq
3. K Kt to K B 3rd	P to Q B 4th	33. K R to his 5th	K to his 2nd
4 P to Q Kt 3rd	Q Kt to Q B 3rd	34. Q R to K R sq	K to Q 3rd
5 Q B to Q Kt 2nd	P to Q 5th	35. Q to her 3rd	B to Q 2nd
6. P to K Kt 3rd	P to K B 4th	36. Q to her 2nd	Q R to Q B 2nd
7 Q Kt to Q B 3rd	K Kt to K B 3rd	37. K R takes P	K R takes R
8 Q Kt to Q B 2nd	K Kt to K 5th	38. Q takes B	Q takes Q
9. K B to K Kt 2nd	P to Q R 4th	39. B takes Q	P to Q Kt 4th
10. Castles	K B to K 2nd	40. R to K R 8th	R to Q B sq
11 P to Q 3rd	K Kt to K B 3rd	41. Q B to K R 4th	P takes P
12. K R to K sq	Castles	42. P takes P	R to Q Kt sq
13. P to K 4th	K B P takes P	43. K to Q 3rd	R to Q Kt 7th
14. P takes P	P to K 4th	44. K B to K R 3rd	R takes Q R P
15. P to K B 5th (*b*)	Q to Q B 2nd	45. Q B to Q 8th	R to Q R 6th(ch)
16 K Kt to K R 4th	K Kt to K sq	46. K to Q 3rd	R to Q R 7th(ch)
17. Q to K R 5th	K B takes Kt	47. K to Q 3rd	B to Q R 5th
18. Q takes B	Q to her sq	48. P to K B 6th	B to Q B 7th (ch)
19. Q to K R 3rd	Q Kt to K 2nd	49. K to his 2nd	B takes K P (discovering ch)
20. P to K Kt 4th	Q to her 2nd		
21. Q R to Q sq	Q R to his 3rd	50 K to B sq	B to Q 6th (ch)
22. Q R to Q R 3rd	Q R to Q B 3rd(*c*)	51. K to Kt sq	B takes Q B P
23. Kt to K 3rd	P to Q Kt 3rd	52. P to K Kt 6th	P to Q 6th
24. Kt to Q 5th	K R to K B 2nd	53. P to K Kt 6th	P to Q 7th
25. Q to K Kt 3rd (*d*)	P to K Kt 4th	54. B to K Kt 4th	Kt takes P
26. Q B to his sq (*e*)	P to K B 3rd	55. B takes Kt	R to Q R 8th (ch)
27. P to K R 4th	K Kt to K Kt 2nd	56. K to R 3rd	B to Q 4th
28. K to R 2nd	K Kt to K B 3rd	57. R to Q 8th (ch)	K to Q B 3rd
29. P takes K Kt P	P takes P	58. R takes P	
30. Kt takes K Kt (ch)	Q takes Kt	And Black resigned.	

(*a*) If the Pawn be taken, then would follow

3. P to K 4th	P to Q Kt 4th
4. P to Q B 4th	

and, in a few moves, White regains a Pawn, and acquires an advantageous position.

(*b*) Nothing could have been gained by capturing the Pawn, since Black might always win another by re-pawning to K Kt to K Kt 5th, &c.

(*c*) To enable him to play the Q Kt Pawn without imprisoning his Rook.

(*d*) Daring and hazardous as it may seem at first sight, we should certainly in White's place have taken the Q. Pawn with the Q. Rook, and we err egregiously in our calculation if by that sacrifice M. La Roche would not have gained an almost decisive superiority. For example, suppose—

25. Q R takes Q P	K P takes R

(The result of Black taking Kt with Kt is so obviously in favour of White, that it hardly needs to be shown.)

26 P to K 5th	Q to K R 3rd

(If he play Q to her 2nd, White answers with P to K 6th, and wins easily. If he retire the Queen to her Kt sq, White simply takes Kt with Kt, checking, and then captures the Queen's Rook.)

27. P to K 6th	B takes P (best)	30. R takes R	R takes Q
28. Kt takes Kt (ch)	K R takes Kt	31. R takes B—	
29. Q takes Q	B to Q 2nd	With a won game.	

(*e*) It is pretty evident, from the last move made on each side, that the idea of sacrificing the Queen's Rook either did not present itself to the players, or that they saw some objection to the manœuvre which we have overlooked. If our view is correct, the Queen's Pawn might have been taken now with as much advantage as before, and the capture would certainly have imparted more vivacity and interest to the combat than the comparatively tame move made.

(*f*) This was done probably from apprehension of Black's playing his Kt to K Kt 3rd, but we should have preferred moving K Rook to his sq, and if the Kt were then marched to Kt 3rd, K R to R 6th would have proved a very troublesome rejoinder.

EPITOME OF NEWS—FOREIGN AND DOMESTIC.

The King of Portugal has recovered from the measles. He was to set out for France on the 20th

The reigning Duke of Saxe-Coburg-Gotha arrived at Brussels on Saturday morning last.

A public meeting was held at Sydney on the 22nd of February, over which Sir W. Denison presided, when £6000 was subscribed towards the Patriotic Fund.

The journey of the Empress-Dowager of Russia to Berlin will take place next month. Her Majesty is to go by Warsaw, Myscowitz, and Breslau. The King of Prussia is to receive his sister on the frontier of his states, to which point, it is thought, the Emperor will conduct her Majesty.

General Canrobert has been nominated a Grand Cross of the Legion of Honour.

Mr. Phinn, Q.C., M.P. for Bath, and Counsel to the Naval Department of the High Court of Admiralty, has been appointed to succeed Rear-Admiral W. A. B. Hamilton as Second Secretary to the Admiralty.

The Royal family of Sardinia has sustained another loss. The Duke de Genevois, the youngest-born child of the King, died last week.

In consequence of the death of Admiral de Mackau, there are now only two full Admirals in the French service—Admiral Parseval-Deschênes and Admiral Hamelin, both promoted on the 2nd December, 1854.

The foundation-stone of the new museum at Oxford will be laid by the Chancellor of the University (the Earl of Derby) at the approaching commemoration, on June 20.

M. Fané, Officier d'Ordonnance of the French Emperor, has carried out to the Crimea a new plan of operations, concerted between the Emperor and Marshal Vaillant.

The Prince Regent of Baden is about to contract a matrimonial alliance with the Princess Louisa, daughter of the Prince of Prussia. The Princess was born in 1838.

The Emperor Alexander has just sent to Baron de Jomini, the well-known writer on military tactics, a very flattering letter, and a valuable gold snuff-box, having his Majesty's portrait on the lid, and enriched with diamonds.

Dr. Kendt, Professor of Chemistry at the University of Leipsic, has been sent to Paris by the Saxon Government, to make detailed reports on the different articles in the Exhibition

Professor Rosini, the author of the novel "La Monaca di Monza," died at Pisa on the 16th, at the age of eighty.

M. Roger, who is at present on a professional tour in Germany, has been engaged for one year by an American *impresario*, for £8000 (200,000 fr.)

M. Gerdes left New Orleans in a balloon the other day, travelled 310 miles in six hours, landed his passengers at Port Gibson, Mississippi, and then resumed his voyage.

Lavigne, one of the oldest *pensionnaires* of the Académie Impériale de Musique, and the predecessor of Nourrit and Dupré, died a few days ago at Pau, his native town. He was much distinguished at the Opera for his fine tenor voice from 1808 to 1826.

G. V. Brooke, and Miss Fanny Cathcart have arrived at Melbourne, and are creating a great sensation

The Scientific Congress of France will assemble at Puy on the 16th September next to hold its 22nd session.

The "Requiem" of Mozart is to form a part of the programme at the approaching Birmingham Festival.

In pursuance of the resolution adopted on the 12th April by the Diet of Frankfort, the King of Hanover has annulled all the electoral laws of 1upi relative to the Chambers and the Provincial states.

The barracks which were formerly occupied at Versailles by the Guards of Louis XIV., have now received the inscription "Hôtel des Cent-Gardes."

A return moved for by Sir John Shelley, M.P., shows that the total cost of the Victoria-street sewer amounts to £54,986.

The telegraphic line between Genoa and Nice was inaugurated on the 17th, and opened to the public on the following day.

During the period of the Exhibition the grand waterworks at Versailles will play every other Sunday afternoon

The proposition made by Austria to the Diet, to suppress all the gaming-houses at the different baths in Germany, is likely to be adopted.

Arrangements are about to be made for issuing passports, free of charge, to continue in force for one month, to all British subjects visiting the Paris Industrial Exhibition

A hogshead of hardware, in which revolvers and pistols were concealed, was seized by the authorities at Hull on Wednesday. It was at the Humber Dock, ready for shipment in the *Hamburg* steamer.

The recruitment of men for our "Turkish Contingent" is proceeding with success. Eight hundred horsemen arrived on the 10th at Smyrna.

Two shocks of an earthquake were felt at Nismes on the 14th at half-past ten at night, the second being the stronger one.

Preparations are now in progress, in the garden of the Palace of Versailles, for the exhibition of horticultural produce, which is to commence on the 27th.

The latest advices from Port Phillip announce shipments of gold from London to the amount of £401,500.

The exhibitors in the Palais de l'Industrie complain that the full price of admission (2*f.*) is extorted from their workmen and assistants engaged in unpacking and arranging their goods.

The Russian steam fleet in the Caspian Sea has been recently increased by four vessels, the *Astrabad*, *Count Wrontschenk*, *Ural*, and *Kura*.

In consequence of the want of water in Liverpool, it has been found necessary to make arrangements for watering the streets with salt water. The supply of fresh water from all sources, is 25,000,000 gallons a week, whereas no less than 60,000,000 is required.

All vessels loading guano at the islands of the Mexican Republic are prohibited from shooting birds on them, under a penalty of fifty dollars for each offence.

The Canadian Legislature have sanctioned, by a large majority, the additional grant of £900,000 to the Grand Trunk Railway of Canada.

Cronstadt has been declared in a state of siege. No person can hereafter enter the place without a special permission from the Governor.

Workmen are at present employed in erecting light constructions for the great cattle show which is to take place in the Champ de Mars, Paris, from the 1st to the 9th of June.

The tide of emigration still continues to flow from the north of Scotland to Canada. One vessel left the city of Aberdeen last week for Quebec with 500 emigrants. The total number from that quarter during the last two months amounts to about 5000 persons.

The railway from Genoa to Lake Maggiore will be completed towards the end of June, by the opening of the section from Oleggio to Arona. Genoa will then communicate directly with Switzerland and Germany.

On the 16th of February the Council of Victoria voted £20,000 as a contribution from the colony to the Patriotic Fund.

The recruitment of men for our 1000 tons of rich copper ore were extracted from four or five different places near the Cape of Good Hope.

The rush of travellers from the United States to Europe this season is unparalleled, steamers and sailing-vessels being out full complements of passengers each trip.

The trial of the prisoners for high treason, taken at Ballarat, commenced on the 22nd of February.

On Saturday morning, between twelve and one o'clock, the *fortuna*, emigrant vessel, on her voyage from Liverpool to Australia, was driven into Dundrum Bay, with 290 passengers on board. Only two lives were lost.

The Paris Exhibition of the Fine Arts, which may now be considered complete, contains 5028 works, from 2004 artists

There are in the City of London 44,239 rateable houses, and in the metropolis generally, 336,384 houses.

There has been a total failure in the Newfoundland spring seal fishery. Letters from the colony give a deplorable account of the wretchedness and misery of a very large portion of its inhabitants.

The Australian clipper *James Baines* arrived in the Mersey on Sunday evening, from Melbourne, having made the voyage out and home, including detention, in five months and ten days.

A monument to the Genoese that fell in the Italian war of independence of 1848-1849 was inaugurated with great pomp on the 19th, in the Municipal Palace at Genoa, by the Syndic and the Municipality, in the presence of the staff of the National Guard and deputations from the army and navy.

NEW GRÆCO-ROMAN ROOM, JUST OPENED AT THE BRITISH MUSEUM.

THE BRITISH MUSEUM.

This apartment, which will form one of the attractive novelties to the Whitsuntide visitors, occupies the basement under the new room entitled the "Third Græco-Roman Saloon." The apartment was not originally designed for exhibition, and is, therefore, less dignified in its proportions, and less sumptuous in its decorations, than the galleries on the principal floor. Deficiency of space, however, has led to its present appropriation to a portion of the "Græco Roman" Collection—a term applied to those sculptures of a mixed class, which, though dating from the period of the Roman Empire, and found chiefly in Italy, were executed generally by Greek artists, and in many instances copied, or but slightly varied, from earlier Greek models.

The objects exhibited in this room are miscellaneous monuments of subordinate rank to the ideal and historical statuary preserved in the galleries above, but by no means less interesting as illustrations of the arts, religion, and social life of the Greeks and Romans. All the articles are classified, with a view to facilitate comparison; and titles are attached to them, to explain their original application, and record, when known, the locality of their discovery. They are disposed in the following classes:—

I. Vases; II. *Patera*, or bowl; III. Labra, or basins; IV. Candelabra; V. Representations of Animals; VI. Votive Human Feet; VII. *Trapezophora*, or table-supports; VIII. Sun dial; IX. Fountains; X. Masks; XI. Sculptured Discs, originally suspended as architectural ornaments; XII. Altars, XIII. *Cippi*, or low square columns; XIV. Bath-chair; XV. Architectural Fragments, and Models; XVI. Inscribed Pig of Lead.

THE MANGOSTEEN (GARCINIA MANGOSTANA).

THE MANGOSTEEN.

The production of this delicious tropical fruit, lately accomplished in the stove of the Duke of Northumberland, at Sion house, is considered by those conversant with the difficulties attending the labour as one of the greatest triumphs of modern horticulture; this being, we believe, the only successful attempt made since the introduction of the plant into England, in 1729. The ripe fruit exhibited last week at Gore-house, was one of four produced by a tree sent over by Dr. Wallich from the Calcutta Botanic Garden in 1853; since which time it has received the unremitting attention of twenty-two years, before crowning the exertions of its cultivator with fruit.

The botanic name of the tree is *Garcinia Mangostana*, in the Malayan language, *Mangostana*; and it is originally a native of the Moluccas Islands, whence it has been transplanted to various Islands of the Indian Archipelago. We engrave the tree, and an enlarged illustration of the fruit and leaves. The former, when at its full growth, rises to the height of about twenty feet; having an extremely straight, tapering stem, with numerous horizontal branches, bearing large oval shining leaves, seven or eight inches long. The appearance of the tree is somewhat formal, owing to the great regularity of its growth, and the straightness of the stem and branches. The flower resembles a single rose in form and colour; and is succeeded by a round fruit the size of a small orange—its colour being chocolate-red; with a shell like the pomegranate, filled with a soft juicy pulp, of exquisite flavour, which has been described as between that of the strawberry and grape, or peach and grape; and it is esteemed one of the richest fruits in existence. The specimens from Sion-house have been pronounced by connoisseurs fully equal to those of tropical growth. Dr. Garcin says (*Philos. Transact.*) the Mangosteen is esteemed the most delicious of East Indian fruits, and a great deal may be eaten without any inconvenience; it is the only fruit which sick people are allowed to eat unsparingly; it is given with safety in almost every disorder, and we are told that Dr. Solander, in the last stage of a putrid fever in Batavia, found himself insensibly recovering by sucking this delicious and refreshing Mangosteen.

FRUIT OF THE MANGOSTEEN, PRODUCED AT SION-HOUSE.

It is to the care and skill of Mr. Iveson, head gardener to the Duke of Northumberland at Sion-house that this successful result of exotic fruit culture must be mainly attributed; but though the practicability of fruiting the Mangosteen in this country has been established, the same result must not be often expected, owing to the great difficulty and expense attending its accomplishment

REVIEW OF THE HON. ARTILLERY COMPANY, ON HER MAJESTY'S BIRTHDAY.

REVIEW OF THE HONOURABLE ARTILLERY COMPANY.

On Saturday the Hon. Artillery Company, of which Prince Albert is the Colonel, assembled to the number of about 300, under the command of Lieutenant-Colonel the Hon. H. Fitzroy, M.P., and Major Reed, M.P., on their grounds in the City-road, for the purpose of commemorating the birthday of her Majesty by firing a royal double salute; on which occasion the vast area in front of the armoury, on which the union-jack conspicuously floated, was crowded with a large and fashionable company. The corps mustered about two o'clock, when, having been formed in line, it went through the usual evolutions, which lasted nearly two hours; after which a *feu de joie* was fired from thirty-one guns. A great many gentlemen connected with the Army were present, who congratulated the Lieutenant-Colonel on the efficiency of the company. The corps afterwards dined in the large room of the armoury, when the health of her Majesty was drunk with every demonstration of respect; and the other usual loyal toasts followed.

NEW COSTUME OF THE HON. ARTILLERY COMPANY.

MADAME BOSIO.

MADAME ANGIOLINA BOSIO was born at Turin, and at a very early age displayed remarkable talents for music. She was sent to Milan to pursue her studies, and for seven years was a pupil of Maestro Vincenzo Cattora. Such was her rapid progress in vocalisation that an engagement was made with her for the opening of the Teatro Ré; and her first appearance on the stage was in Verdi's opera, "I Due Foscari." Her success was unquestionable, and offers of engagement poured in upon her from all parts of Italy. Madame Bosio accepted a contract for the Imperial Theatre at Verona, where her lyric qualifications began to be more developed, particularly in Mercadante's "Bravo." From the sunny south she travelled to the north, having been engaged as prima donna at Copenhagen. At the Court Theatre, in the Danish capital, she created a sensation in the "Somnambula," and in Verdi's popular operas. The climate proving too cold and trying, she was compelled to decline a lucrative engagement of three years from the Danish directors; King Christian VIII. and his Queen, however, loading her with Royal presents prior to her departure. On her return to Italy she was immediately engaged by Senor de Salamanca, afterwards Minister of Finance, and one of the original backers of Persiani, in the London Royal Italian Opera undertaking for the Circo. It was here that Mdme. Bosio had to contend with the reminiscences of one of the most florid and accomplished vocalists of any age or country, the celebrated Mdme. Persiani, but Mdme. Bosio's fame gradually gained ground. She was eventually tempted to visit the French capital, in 1848. Her health was not good, during the stormy days of the Republic; and although her pure style attracted the attention of amateurs, her dramatic powers were not at that time sufficiently strong for the exacting Parisians. The Havannah operatic managers came into the field, and tempted Mdme. Bosio to quit Europe. At the Tacon theatre she achieved triumph upon triumph, ap-

MADAME BOSIO, OF THE ROYAL ITALIAN OPERA.

pearing in succession in Meyerbeer's "Roberto il Diavolo," and "Gli Ugonotti;" in Donizetti's "Lucia," "Lucrezia Borgia," "Anna Bolena," "Don Pasquale, "Elisir d'Amore;" in Bellini's "Puritani;" Verdi's "Macbeth," "Attila," &c. For three years Madame Bosio travelled and sung in the North and South American States—following in the wake of Jenny Lind, and yet commanding her position as an exponent of the pure Italian school. In 1852 Madame Bosio was engaged by Mr. Gye for the Royal Italian Opera, Covent-garden, and since that début she has gradually risen in public estimation. Her career is too well known to require the repetition of notices of the operas in which she has appeared; but, in addition to the parts already enumerated as appertaining to her répertoire, Rossini's "Semiramide," "Matilda di Shabran," "Count Ory," "Mosè;" Spohr's "Jessonda;" Verdi's "Rigoletto," "Ernani," "Luisa Miller," may be specified. After the London season, Madame Bosio, for the last three years, has been alternately the prima donna at the French Imperial Opera in Paris and the Italian Opera in the same capital. As an interpreter of the florid school of vocalisation Madame Bosio is now probably without a rival.

MUSIC.

THE management of the ROYAL ITALIAN OPERA is distinguished by remarkable activity this season. The attraction of the "Trovatore" is undiminished; it continues to be repeated to immense houses and with unabated applause. But this has not prevented Mr. Gye from bringing forward other attractions of the highest kind. Mario has reappeared—and Grisi, too, notwithstanding her formal adieu to our stage last season. Mario appeared last week in the "Puritani," and Grisi this week in the "Favorita." The great tenor is greater than ever. Last year his voice showed symptoms of decay. It had fallen off both in strength and quality; and was so uncertain that, during the whole season, he exposed the public to a series of teasing disappointments. His reappearance excited great curiosity and interest. The theatre was crammed in every part. The audience received their old favourite with the most cordial welcome; and soon found, to their agreeable surprise, not only that every trace of decay or weakness had disappeared, but that he sang better than he had done for years. He looked robust and vigorous, and his voice had not only regained the power and flexibility, but even the exquisite freshness, of his early days. Nay, more, it was generally felt and remarked that in some things he had positively improved: that he sang with a higher degree of artistic refinement and finish than he had ever exhibited before. The delight of the public, accordingly, exceeds all bounds, and Mario is an object of greater enthusiasm than ever.

In regard to Madame Grisi, it seems to have been thought necessary to prepare the public for her reappearance after her "farewell performances" of last season, and the high prices paid for boxes and stalls under that impression. A semi-apologetic announcement, accordingly, was put forth, to the effect that circumstances have prevented Madame Grisi from retiring to her residence at Florence this year, the directors naturally sought to induce her to reappear on the Covent-garden boards; that they were at first unable to prevail on her, and applied to another distinguished artiste to undertake her parts; that, having failed in this, they again applied to Madame Grisi, who at length agreed to sing for ten nights. With this preparation, the great prima donna appeared on Thursday (as already mentioned) in one of her most attractive characters. As might have been expected, there was no cause for apprehension. The public were delighted to welcome their old favourite. There was an immense house, and she was received with a tumult of applause. Grisi looked extremely well, and her voice was as rich, sweet, and mellow as ever. We may expect, therefore, to have another series of "farewell nights" as brilliant and exciting as those of last year.

THE ROYAL OPERA at Drury-lane, after having been suddenly closed, without notice or explanation, and having remained shut for eight or ten days, has been reopened by Mr. Smith with the same company of performers as before, including Madame Lucile Grisier and her husband, but with an unprecedented reduction of prices. The pit and upper boxes are only a shilling, the dress-circle half a-crown, the stalls four shillings, and the galleries sixpence. Cheapness is a good thing, but it may be carried too far. We greatly doubt—supposing the house to be filled every night—whether such prices will afford a good company of vocal performers (who cannot be obtained at a cheap rate), a sufficient orchestra, chorus, and all the accessories essential to the establishment of a respectable musical theatre.

MR. ELLA, the able director of the Musical Union, has just concluded a series of six lectures at the London Institution, which have excited much attention and attracted crowded audiences. The general subject of the course was the power of music. The lecturer took a review of the history of the art, analysed the various classes and styles, and explained the sources of its influence on the mind and the feelings; illustrating his observation by ample specimens of ancient and modern music, performed by a select choir from the Royal Italian Opera, Miss E. Birch, and Miss Lascelles, principal vocalists; and Mr. Kuhlmark and Mr. Ella himself at the pianoforte. The first lecture treated of devotional music, from the days of the Hebrews and the Greeks down to the present time, with illustrations from the works of Palestrina, Luther, Mozart, Mendelssohn, &c. The subject of the second lecture was secular harmony; including the Italian and English madrigals of the 16th and 17th centuries, and the more modern glees and part-songs. The third lecture was on the subject of pastoral music; and the fourth, fifth, and sixth were devoted to dramatic music—the topic which afforded the greatest variety of discussion and illustration. On all these subjects the lectures were rich in historical research, sound and refined criticism, original remark, and interesting anecdote. Their style evinced the accomplished man of letters as well as the learned musician; and they were delivered in an easy and agreeable manner. Their reception was such as must lead to their repetition on other occasions.

A *soirée musicale*, under the direction of Signor Nappi, took place at the New Beethoven Rooms, on Tuesday. Madame Escott, Miss Rainford, and Signor G. Regondi, were among the artistes engaged; and the concert, which was well supported, went off with considerable spirit.

DEATH OF MR. TRAVERS, THE TENOR. We regret to announce the decease of Travers, the English tenor, who expired last Sunday, at Kensington, after a lingering and painful illness. He was only in his thirty-eighth year. He was much appreciated in private circles than this lamented singer. He was born in Liverpool, and was not originally destined for the stage; but the great success of his cousin, Miss Emma Romer, so many years the prima donna of National Opera, first prompted Mr. Travers (whose voice was of a pure and genuine musical quality, nature having given him a fine voice. He went to Milan, and sang at several theatres in Italy prior to his début at Drury lane Theatre. His sister, Miss Annie Romer, afterwards appeared at the Princess's Theatre as a vocalist. Her career was also cut short by an early death. If English opera occupied the position, to which the abilities of our composers and singers entitle it, when compared with Continental establishments devoted to the lyric drama, Mr. Travers would always have commanded a foremost place. The last time he was heard in public was at the Musical Union Soirée, where, at the outbreak of the war, he produced his entertainment of "Nelson," which he illustrated with remarkable vigour by his admirable rendering of Dibdin's nautical ballads.

LORD LONDESBOROUGH has issued cards for a conversazione on Monday at his residence on Carlton-house-terrace, as President of the Numismatic Society.

GENERAL SIR DE LACY EVANS.—A Bust of this Veteran, from life, has just been completed by Mr Pepper, of Brighton. The work is the result of a "shilling subscription," raised at Brighton, and is to be executed in marble.

SOCIETY OF ARTS. THE TRADE MUSEUM. At the weekly meeting of this society, held on Wednesday evening, a paper was read by Professor Edward Solly, F.R.S., "On the Mutual Relations of Trade and Commerce," as inaugural of the opening of the nucleus of a trade museum, which the learned professor has been for some time past zealously and actively engaged in collecting under the auspices of the Society, in conjunction with the Commissioners for the Great Exhibition of 1851.

AT meetings of the Electric Telegraph and International Telegraph Companies, held on Tuesday, the shareholders sanctioned the bill proposed in Parliament for consolidating the [illegible] undertakings, and for obtaining further powers in connexion with the [illegible] general company.

BAL MASQUE AT DRURY-LANE. Mr. Smith gave a *bal masqué* on Wednesday night at Drury-lane Theatre. The pit was boarded over and carpeted, and a profusion of flowers, statues, and coloured lamps, added to the gay dresses of the masqueraders, imparted a most delightful and brilliant effect to the whole. The masqueraders assembled in a great variety of fanciful and grotesque costumes. An excellent band was in attendance, and, owing to the judicious arrangements of Mr. Smith and his assistants, the utmost order prevailed throughout the evening. The boxes and galleries were crowded with spectators.

THE SILENT MEMBER.—(No. XVIII.)

"THOSE who live in glass houses ought not to throw stones," is a maxim which seems to have been forgotten by some of those who have lately amused themselves by hurling all kinds of abuse at Mr. Layard. A few of the scenes in which honourable members have lately figured have been worthy rather of the hustings at a contested election than of the House of Commons. It is true that Mr. Layard has by some inaccurances laid himself open to attack; but his enemies have overshot their own mark by the indiscriminate volley of vituperation for which he has been made the target. Whatever may be the weight attached by the Legislature to a shower of derisive "cheers" or an avalanche of empty "Ohs," the English nation has an objection to seeing a man cried or laughed down, even when he is in the wrong; and, as Mr. Layard happens to have been a great deal in the right there is still less chance of success for those who are desirous of overwhelming him with unmeaning clamour. Perhaps, however, these desperate tactics have been adopted from a consciousness that any more legitimate mode of attack would only be followed by still more signal failure. This view of the case receives some confirmation from the very unfortunate result of the attempt made by Sir James Graham to assume the high moral tone in dealing with the dispute between the House of Commons and Mr. Layard. Sir James Graham has taken rather a melodramatic part in the business; for, while under examination before Mr. Roebuck's Committee, the late First Lord of the Admiralty turned, with a look of stern significance, upon Mr. Layard, and declared that "poor Captain Christie had died a broken-hearted man." This is not very far from accusing Mr. Layard of having persecuted the unfortunate officer to his death—and, indeed, Sir James Graham implied as much by asserting in the House of Commons that he had yielded too much to clamour by ordering a court-martial on Captain Christie in consequence of what Mr. Layard had said of him. The parties in this melancholy dis.ussion seem to have agreed to take issue on the question, "Who caused Captain Christie's death?" and, at the outset of the dispute, the murdered man is laid by Sir James Graham at the door of Mr. Layard. This state of things does not, however, last very long; for a letter in the *Times* of Monday, transfers the melancholy burden to the door of the Admiralty, where it is of necessity allowed to remain, as Sir James Graham is compelled to admit that Captain Christie was sacrificed before he had been made the subject of any imputation by Mr. Layard. It is very unfortunate for the high moral party in the House of Commons, that one of its most respectable members, one whose honour and character have been the admiration of successive Parliaments for nearly forty years, has been obliged to admit that he has made a mis-statement quite as flagrant as any that have brought down the howls of the lower branch of the Legislature on the head of poor Mr. Layard. Of course we shall hear of the impossibility of anything like wilful misrepresentation on the part of an individual so high in the political world, and of such vast official experience as Sir James Graham. There would be no objection, perhaps, to taking the charitable view of the matter, and putting the most favourable construction on the erroneous statements of the late First Lord of the Admiralty, but it is hardly fair to ask for an acquittal of Sir James while calling for a condemnation of Mr. Layard. The young and ardent politician may be excused for any inaccuracies committed in the warmth and zeal of his denunciations of a bad system; but it is not so easy to pardon the errors of fact of the cool and practised statesman, who has learned caution, and should have acquired the habit of scrupulous accuracy during a long career in the highest public employment. The House of Commons will, of course, shelter Sir James Graham under the plea that the most truthful are liable to mistake; and the country may, perhaps, be disposed to accept the plea, if it is one of which Mr. Layard is also to be allowed the benefit.

It is strange that Sir James Graham should complain of no opportunity having been afforded him to set himself right, for if unfairness has been practised towards him, he must feel that the example of unfairness in dealing with a mistake has not been set by Mr. Layard. When a member of the House of Commons finds his explanations received in Parliament with all kinds of unmeaning interruptions, it is not unnatural that he had rather address the public through a letter in the *Times* than make a vain attempt to make his voice heard in the country above the din with which he is liable to be assailed in the House of Commons. If he had attempted to reply to Sir James Graham's erroneous statements in the House it is not unlikely that a chorus of "Ohs," and an obligato accompaniment of other still more discordant sounds, might have drowned the voice of the speaker.

The confidence of the public in the earnestness and sincerity of some of those who profess to have the interests of the country most at heart will not be much increased by the scene that was acted on Monday night, when Mr. Milner Gibson was induced to withdraw a motion, the result of which had been looked for with the greatest anxiety. Amidst the vacillation of those who pretend to the greatest zeal for the public good, there is something to be thankful for in the boldness with which Mr. Disraeli determined to bring matters to an issue. Even supposing his object may only be to damage the Ministry, we may in this instance reverse the usual practice, and, instead of taking "the will for the deed," we may accept "the deed," which is of real value, for "the will," which may be of a more dubious character.

The Colonial affairs, and especially those of Australia, are in a condition to require all the energies and all the tact of the ablest Colonial Minister. In Melbourne the dissatisfaction seems to be such, that juries will not convict in cases of rebellion even on the clearest evidence; and the Government, rather than continue to submit to the humiliation of defeat, has postponed the prosecution of the Ballarat rioters. It is a sad symptom when the administration of the law is thwarted by the citizens themselves; but such is the present condition of the colony of Victoria. In the face of this state of things, there is a small party led by Mr. Lowe, the member for Kidderminster, who would risk the further embittering of the feelings of the Colonists, by opposing the Constitution Bills, which have been sent home for the approval of the English Government. It is all very well to say that the bills do not represent the feeling of the Colonies, but they have been framed by the only recognised organs of Colonial opinion—the Legislative Assemblies of New South Wales and Victoria. It would be satisfactory to know what Mr. Lowe and his adherents would propose to accept as an expression of the feeling of the Colonies. Perhaps the honourable member would be satisfied with a string of resolutions passed at a meeting of diggers armed with revolvers; but, until the local Government is violently overthrown, and mob law or lawless anarchy established, the only mode of getting at the wishes of colonists is through the legitimate channel of their authorised representatives. The Legislative Assembly may, and no doubt does, need reform; but if the Colonies are to have any Constitution at all within the next five years, it is better that the British Parliament should consent to give what the Colonies have asked through the medium of their constituted authorities.

Many people have heard, more or less vaguely, of the alleged ill-treatment of Mr. Kennedy, who was dismissed from a lucrative appointment in the public service for having shown too much zeal in the discharge of his duties. He has accordingly sold many estates to relieve the office he holds, and it is not surprising that under the present—let it be hoped expiring—system, the would-be reformer will be sacrificed. Mr. Kennedy's patriotic exertions have, however, met with sympathy in some private quarters, for, in addition to the annuity of £120 a year settled on him by a friend as a compensation for the loss of his public employment, Professor Lindley has dedicated to him the new edition of a well-known work on Horticulture, in the following terms

"To the Right Hon. T. F. Kennedy, lately one of her Majesty's Commissioners of Woods and Forests and Land Revenues, who endeavoured to reform a public department in which unskilful management has been most disastrous, this edition of a work on the principles of cultivation is inscribed, as a mark of respect for high official character and ill-requited public services."

This is almost as remarkable a testimony as the annuity of £1200.

NAVAL AND MILITARY INTELLIGENCE.

THE five 60-gun screw-ships at Spithead are understood to be destined for the Black Sea, instead of the Baltic, sailing at a French port to embark troops for the Crimea.

DR. MORTIMER GLOVER, late of Newcastle-on-Tyne, having been appointed by the Government to the Civil Medical Staff, has left London for Scutari.

IT is expected that the huts and stables for cavalry and artillery horses at the Camp of Aldershott will be ready for occupation by the troops early in June; and it is stated that about 3000 militia, 9000 regular infantry, 4000 cavalry, and 3000 artillery and sappers and miners will march to the heath about the 12th of the month. The permanent camp is to be constructed of brick, and which will include the field battalion, smithies, and artisans' workshops—has been commenced.

THERE are at present only four regiments of infantry, besides the two newly-raised battalions of Rifles, quartered in the United Kingdom, the whole of which are under orders for foreign service. The 42nd, King's Light Infantry, returned from India last autumn, and [illegible] the 50th Foot, at Portsmouth, the 94th Foot, return [illegible] last autumn, at Windsor and the Tower; the 96th Foot, return [illegible] from India, at Dublin; the 3rd battalion (newly levied, [illegible] and 3rd battalion (newly levied) Rifle Brigade, at Portsmouth.

THE *Enterprise* discovery-ship, Captain Collinson, from Behring's Strait, was paid off on Wednesday last. The inquiries into charges preferred against her officers, who have been suspended from duty and placed under arrest for periods exceeding two years, has been, by order of the Lords of the Admiralty, intrusted to Vice Admiral the Hon. Henry Duncan. It appears that, after daily examination of the said officers under arrest, which terminated on Wednesday week, the Vice Admiral, acting the part of a grand jury, has ignored the [illegible] result is, that no courts-martial will take place on [illegible] officers referred to have been granted Admiral's leave of absence, and two of them have been promoted.

A LETTER from Corfu of the 5th inst. gives a flattering account of the successful treatment of the sick and wounded in the Ionian Islands, under Dr. Barry, Deputy Inspector-General of Hospitals, and sparing supply of medicines. It says: "On the list of February were 468 patients were landed at Vido. Of these 200 have recovered, fit for duty; 22 had died; 159 remain under cure, 17 of whom alone were confined to their beds. Of the 200 recovered, 150 returned to the Crimea, when the 89th Regiment went up on the Hecla, by her Majesty's steam-frigate *Leopard*. The medical establishment for all those people consisted of one staff-surgeon, second class, and three assistant surgeons. This number has been reduced by one of the assistant-surgeons."

ORDERS have been received at Gibraltar from the War Office, directing that all the women and children of the several corps of the line doing duty there are to be sent home to England by the first opportunity, as it is confidently anticipated that all those regiments are shortly to be relieved by the militia, for service with the expeditionary army in the Crimea, under the command of Lord Raglan, and further, that all those men who may be considered by their respective medical officers unfit for active field duty, will be allowed to volunteer the [illegible] in the capacity of hospital attendants, &c.

THE RIGHT HON. THE EARL OF WESTMORELAND.

JOHN FANE, present Earl of Westmoreland, and British Ambassador at the Court of Vienna, is the eldest son of the tenth Earl by Sarah Anne, only daughter and heiress of Robert Child, Esq., of Osterley park, Middlesex. The remaining issue of this marriage were five children, of whom two, the Lady Sarah Sophia and the Lady Augusta, still survive, the former being the present Countess of Jersey, and the latter the widow of the Right Honourable Sir Arthur Paget.

The present Earl was married, in the year 1811, to Lady Priscilla Anne Wellesley-Pole, third daughter of William, third Earl of Mornington; by whom he has issue Lieut.-Col. Francis William Henry Lord Burghersh, the Hon. Julian-Henry-Charles, and the Lady Rose Sophia Mary.

His Lordship succeeded to the Earldom in the year 1841. His present titles are as follows:—Earl of Westmoreland and Baron Burghersh in the Peerage of the United Kingdom of Great Britain and Ireland, General in her Majesty's Army, Colonel of the 56th Regiment of the line; G.C.B., and Knight Commander of the Military section of the same order; Knight Grand Cross of the Guelphs of Hanover; Grand Cross of the Red Eagle of Prussia, of St. Ferdinand and St. Januarius of Naples, of St. Joseph of Tuscany, of Henry le Lion of Brunswick, Knight of Maria Theresa of Austria, one of her Majesty's Privy Councillors, and Envoy Extraordinary to the Court of Vienna. His Lordship has also received military decorations for the campaign in Spain and Portugal, and the Russian medal for the campaign of 1812 in F[illegible].

His Lordship was educated at Harrow and Cambridge, and while yet a boy under the age of age he left the University (having entered the Army), and repaired to Germany with the view of pursuing his studies in military tactics. Two years afterwards—namely, in the year 1805, as Captain in the 52nd Regiment (the Welsh Fusiliers) he served in the expedition to Hanover, in the capacity of aide-de-camp to General Don; and from this period until after the campaign in France, and the surrender of Paris in 1814, he was constantly engaged in active service. In the year 1806 he was sent as Assistant Adjutant-General to Sicily; was on board Admiral Duckworth's fleet in the action at the passage of the Dardanelles, and the destruction of the Turkish fleet, lying off the Castles; was present also in the action before Constantinople, at the island of Prota, and at the re-passage of the fleet through the Dardanelles. Shortly afterwards he filled the post of Assistant Adjutant-General to the forces, under Major-General Wauchope, and was present at the first storming of the town of Rosetta, and in the retreat, and subsequently in the second attack and siege of that place, with the force under Major-General Sir W. Stewart. In 1808 he served in Portugal as Assistant-Adjutant-General in the army commanded by Sir Arthur Wellesley, in the affair in the front of Obidos, and in the battle of Roleia and Vimiera. In 1809 he served as extra Aide-de-Camp to Lord Wellington, whose affectionate friendship and esteem he enjoyed and retained to the latest hour of the life of that illustrious man), and was present at the battle of Talavera. In 1810 he was with the 3rd Dragoon Guards, in the campaign in Portugal, including the retreat to Torres Vedras, the battle of Busaco, and advance to Santarem; in this year he gained his Majority, and in 1812 his Lieutenant-Colonelcy. In September, 1813, he was accredited as Military Commissioner to the head quarters of the allied armies under Prince Schwarzenberg, in Germany. His Lordship served in the campaign of 1814 in France, including the battles of La Rothière and Brienne, up to the advance of Paris, and the battle of Montmartre, and the occupation of that city. In consideration of these services, on his Lordship's return to England he was appointed Aide-de-Camp to the Prince Regent, and Colonel: and was named Envoy Extraordinary and Minister Plenipotentiary to the Court of Tuscany. In the spring year, his Lordship having joined the Austrian army at the battle of Tolentino, and in its advance upon Naples, he signed, in conjunction with General Bianchi, who commanded the Austrian army, the military convention of Casa Lanza, by which the Kingdom of Naples was restored to its legitimate Sovereign Ruler—Murat. In the year 1822 he became Privy Councillor; in 1825 he rose to the rank of Major-General; in 1838, to that of Lieutenant-General and K.C.B.; and in 1854, to the rank of a full General. In 1839 his Lordship was appointed Envoy Extraordinary and Minister Plenipotentiary to the Court of Naples. In 1841 he was appointed Envoy Extraordinary [illegible] Plenipotentiary to the Court of Berlin; and, in the course of his able and efficient services in that post, he signed, after a protracted negotiation, as mediator, the treaty of peace between Prussia and Denmark on the 2nd July, 1850—Baron Schleinitz and Baron Usedom being the Prussian Plenipotentiaries on this occasion; and M. de Reedtz, Baron Peckleu, and M. de Scheele, the Plenipotentiaries of Denmark. From the Court of Berlin, Lord Westmoreland was promoted to that of Vienna, in consequence of the retirement of Lord Ponsonby. Between the departure of Lord Ponsonby from, and the arrival of [illegible] at Vienna a kind of interregnum had existed at the British Embassy, especially during which Arthur Magennis, Esq., officiated as Minister Plenipotentiary. Since Lord Westmoreland's accession to his present important post, it is worthy of note, and of great credit to his Lordship, that he has entirely succeeded in re-establishing that cordial alliance which bound England and Austria together in those bygone times that fill an honest page in the history of both countries.

Eminently distinguished, however, as his Lordship has been throughout his military and political career, he has been no less successful in cultivating the arts—to the study of which he has devoted himself, it may be said, *ens amore* from his earliest years, with the greatest and most unwearying assiduity. Under the tuition of some of the most celebrated professors, both at home and abroad, his Lordship [illegible] his favourite study of music, and the world well knows how deservedly Lord Westmoreland occupies a high rank among the first amateur musicians in Europe—an amateur whom many a professional would be proud to emulate. Seven operas, a vast number

C. MACKENZIE, A.M., Principal

NAVAL EDUCATION.—SOUTHSEA, Portsmouth.—YOUNG GENTLEMEN are prepared for the Navy, Sandhurst, East India Company's Naval Service, &c., by Mr. THOMAS SMITH, B.N., late Naval Instructor of H.M.S. [illegible]

The Course of Education, besides having especial reference to the above, [illegible] also preparation for the Universities, Military Colleges, &c., and comprises the ENGLISH, LATIN, GREEK, and FRENCH LANGUAGES, HISTORY, GEOGRAPHY, MATHEMATICS, NAVIGATION, NAUTICAL ASTRONOMY, CHEMISTRY, STEAM, &c.

Terms, by the Month, Quarter, or Year.

The following have passed for Naval Cadets at the Royal Naval College, and entered her Majesty's service from Mr. Eastman's Establishment during the past six months:—

	First Appointment.
Mr. W. Farquhar	H.M.S. Malacca.
Mr. D. Lithgoian	Euryalus.
Mr. C. Wodehouse	Arrogant.
Hon. H. H. Molyneux	Britannia.
Mr. H. Loughby	Caledonia.
Mr. W. [illegible]	Nankin.
Mr. J. Pringle	Monarch.
Mr. W. S. Gordon	Orion.
Mr. W. H. Hornby	Cossack.
Mr. F. Edwards	Royal George.
Mr. C. Keating	Majestic.
Mr. H. Stephenson	Tartar.
Mr. C. M. Dundas	Russell.
Mr. J. A. Sells	Cornwallis.
Mr. L. A. Bell	Hannibal.
Mr. [illegible] Clarkson	Hawke.
Mr. [illegible] M. S. Osborne	Tartar.
Mr. [illegible] C. Price	Majestic.
Mr. H. J. Purdie	Powerful.
Mr. C. H. F. Russell	Hawke.
Mr. W. Brown	Belt.
Mr. [illegible] Nesbitt	Pylades.
Mr. [illegible] Ayres	Ajax.
Mr. [illegible] Dove	Duke of Wellington.
Mr. [illegible] M. Hart	Hercules.
Mr. [illegible] Bell	Russell.
Mr. [illegible] Hawkins	Pembroke.
Mr. A. W. Warry	Centaur.
Mr. R. Boddy	Edgar.

May 1 to [illegible]

In addition to the above, the following passed for Naval Cadets on the Recruiting [illegible]

Mr. H. [illegible] F. Meade.	Mr. F. Phillips.
Mr. A. Shelly.	Mr. H. Moffatt.
Mr. [illegible] Dennis.	Mr. A. Bannatyne.
Mr. [illegible] Fitzgerald.	Mr. P. A. Ward.
Mr. W. Poynder.	Mr. J. J. C. Small.
[illegible] Johnstone.	

Grand Parade, near the Castle, Southsea.

TO LITERARY GENTLEMEN, Editors of Newspapers, &c.—Any GENTLEMAN fully qualified to fulfil [illegible] Journal, in one of the largest towns in a manufacturing and [illegible] district, is desirous of meeting with a similar engagement. [illegible] to the [illegible] printers, possessing some of the requisite plant, [illegible] Address A. B., care of Messrs. Sutton and Co., Bow-churchyard.

SOUTH-EASTERN of FRANCE RAILWAY. Any Holders of the remaining Scrip Certificates which have not been converted into Shares of the Lyons and Geneva Railway are hereby apprised that, in consequence of the Calls overdue, and the disregard of former notices, the London Agency intends, after the 31st of May instant, to proceed to sell the Shares hereinbefore held for conversion, and they are the only to be disposed of. The Holders of Scrip have already had all chance, but will nevertheless be allowed to convert the Scrip, if brought within the first of May next. After that date any Holder who shall have omitted to present his Scrip Certificate for conversion shall be considered to have waived the privilege hereby announced to him.

CHARLES PONS, Secretary.

7 Capel-court, London, May 15, 1855.

LAW LIFE ASSURANCE SOCIETY, Fleet-street, London, May 10, 1855.

Notice is hereby given, that a SPECIAL GENERAL MEETING of the Proprietors of this Society will be held at the office, Fleet-street, London, on FRIDAY, the 6th day of JUNE next, at twelve o'clock at noon precisely for the purpose of [illegible] Section 7 of the Act of 5 & 6 Vict. cap. 115, entitled "An Act for the Amendment of the Law relating to Assurance Fund of the Society in respect of the seven years ending on 31st of Dec. last. And notice is hereby further given, that a second Special General Meeting will be held at the like hour and place, on the following Friday, and 15th day of June, for the purpose of confirming the resolution which shall have been agreed to at the first meeting, in pursuance of the provisions contained in the Deed of Settlement. And notice is hereby further given, that any person who may have been assured by the Society for two whole years may, at the production of his policy and of the last receipt for the premium thereon, be present at such meeting. At each of the said meetings the chair will be taken at twelve o'clock precisely.

By order of the Directors,
WILLIAM SAMUEL DOWNES, Actuary.

THE HONOURABLE ARTILLERY COMPANY OF LONDON, the most ancient Corps of Volunteers in England, is RAISING a FIELD BATTERY of EIGHT GUNS who are willing to give a portion of their time to Military Services.

The Corps is empowered by Royal Patents and Warrants from her present Most Gracious Majesty and Her Majesty's Royal predecessors, to train persons in the use of arms, and to the practice of military evolutions and discipline.

The Corps possesses a Parade-ground of several acres, a Rifle-gallery 330 feet long, a Reading-room, Library, and Armoury for the efficient military training.

The Officers are appointed from the Corps, and hold her Majesty's Commissions.

Members under twenty-one years of age are admitted as Cadets, but must produce the consent of their parents or guardians.

Members have to provide themselves with the Uniform of the Corps.

The expenses of the Band, Arms, Ammunition, &c., are defrayed out of the Funds of the Corporation.

Gentlemen desirous of joining, can obtain any further information on application to the Adjutant, Mr. William H. White, Secretary, 18, Artillery-place, Finsbury.

THE CONSERVATIVE LAND SOCIETY.—Persons wishing to invest Savings or Capital, are invited to [illegible] Shares, [illegible] Deposits, [illegible] Loans, [illegible] Annuities, [illegible] Policies, [illegible] Mortgages, [illegible] Purchases, [illegible] Sales, [illegible] Transfers, [illegible] Leases, [illegible] Rents, [illegible] Repairs, [illegible] Insurances, [illegible] Valuations, [illegible] Surveys, [illegible] Plans, [illegible] Estates, [illegible] Houses, [illegible] Offices, [illegible] Shops, [illegible] Warehouses, [illegible] Wharfs, [illegible] Manufactories, [illegible] Mills, [illegible] Workshops, [illegible] Yards, [illegible] Buildings, [illegible] Ground-rents, [illegible] Reversions

(Continued from page 510.)

of compositions of a sacred character, and numerous minor musical pieces, together with several literary works of great merit, bear ample testimony to the vigour and fertility of his mind, and to the industry and power of his pen. Amongst the latter may be enumerated, "Memoir of the Early Campaign of the Duke of Wellington in Portugal and Spain, by an Officer Employed in his Army" (Murray, 1820); "Memoir of the Operations of the Allied Armies under Prince Schwarzenberg and Marshal Blucher, during the Latter End of 1813 and the Year 1814" (Murray, 1822); "A Letter Addressed to the Right Honourable the Speaker of the House of Commons, on the Claims of the British Roman Catholics, containing a Correspondence between Pope Pius VII. and the late King of Naples, with a Copious Appendix" (Murray, 1827).

As a patron of the arts, Lord Westmoreland has been quite as conspicuous, and it is mainly to his efforts that the British nation is indebted for the establishment of a National School of Music. He saw that many a genius lay unnoticed and unknown through the want of opportunity of development, while those who emerged from obscurity were compelled to struggle through a path beset with such difficulties and troubles as might damp the spirits of the boldest. Lord Westmoreland (then Lord Burghersh), deeply impressed with the immense advantages that would accrue, both to the cultivation and to the cultivators of the art, from the establishment of a public school of music, resolved to remedy the existing defect, and the Royal Academy of Music stands forth as the result of his labours, and of the zeal and sympathy with which he devoted himself to the improvement of the condition of the British artist.

The private and social life of Lord Westmoreland precisely realises the character of the English gentleman. Kind and charitable, even to a fault, scarcely a day passes that some one cannot bear testimony to the overflowing hospitality of his board. Courteous in manner, and gentle in disposition—an affectionate husband and father—he enjoys the esteem and reverence of all who know him, and exercises a moral influence over the circles in which he moves, which no other attainments could possibly confer.

THE RIGHT HON. EARL OF WESTMORELAND, BRITISH MINISTER AT THE COURT OF VIENNA.

THE EXPEDITION TO KERTCH.

General Gortschakoff's despatch, announcing that the expedition which had sailed from Balaclava for Kertch with 10,000 troops on board had returned, was quite correct. One object of the expedition is stated to have been the interception of Russian convoys, which, instead of arriving in the Crimea by Perekop, were shipped at Taganrog, disembarked at Kertch, and thence conveyed by carts to Simpheropol and Sebastopol. The greatest pains were taken to keep the intended movement secret; nor were any of the Correspondents of the London papers allowed to accompany the expedition. The infantry was chiefly composed of French troops, the whole British force mustering about 2800 men, with 780 horses and transport animals. Sir George Brown was entrusted with the command in chief of the expedition. Colonel Cunninghame accompanied as Quartermaster-General, and Major Hallewell and Captain Barnston as Deputy-Assistant-Quartermaster-Generals to him; Captain Field, R.A., as Deputy-Assistant-Quartermaster-General to that branch of the service, and Lieut.-Colonel Brownrigg as Assistant-Adjutant-General, with Lord Burghersh specially attached. The horses were shipped partly on the 2nd; and early on the 3rd the Highlanders embarked.

Lord Raglan accompanied Sir George Brown down to Balaclava, and witnessed the embarkation going on. A strong party of marines accompanied the expedition. The French troops embarked at Kamiesch on the night of the 2nd, and the following morning Cameron accompanied the expedition as Brigadier of the Highland Brigade, and acted as second in command. The four companies of the 2nd Battalion Rifles, attached to the Highland Corps, were the only troops of the Light Division attached to the expedition. Each soldier had 50 rounds in pouch, and 100 per man in reserve. One waggon for rockets attended the battery of artillery. The commissariat had fourteen days' provisions with them. Every man had his orders from the doctor what to do in case of being wounded: beds were got ready, and the chests arranged to receive them; and all were ready and anxious for what was expected, would prove a hard-fought action.

The expedition was to land at a small bay about ten miles from Kertch. Their first endeavours were to have been directed to an attack by land and sea on Fort St. Paul, lying about eight miles from Kertch, a fortress mounting twenty-one guns. It was intended to march along the shore and attack it in rear, whilst the fleet bombarded it in front. After having dismantled this place, they were to proceed on to Kertch, destroy the depôts of reserve stores stationed there by the enemy, and open a road into the Sea of Azoff.

The squadron, consisting of about forty sail, with nearly 12,000 men on board, arrived at the rendezvous, lat. 44.54, lon. 36.28, on the morning of the 8th inst.; when it was suddenly summoned to return by an express steamer, which left Kamiesch on Friday night or Saturday morning with orders from General Canrobert. These orders were, it is reported, sent by the French General in consequence of a communication from Paris, which rendered it incumbent on him to concentrate the forces under his command in the Chersonese. It is not to be wondered at that this abrupt termination of an expedition which, from its secret character, was doubtless intended to effect important services, excited feelings of annoyance and regret among those, who expected to win honour and glory and position. Admiral Bruat could not venture to take on himself the responsibility of disregarding orders so imperative and so clear, and Admiral Lyons was not in a position to imitate the glorious disobedience of Nelson. All the officers engaged, French and English, experienced the bitterest disappointment when they heard the orders to go back to Kamiesch. The feelings of the men have been loudly expressed since their return. It is rumoured that the Emperor directed all the troops to be concentrated for some important operation which is to be undertaken forthwith; but it is scarcely probable his Majesty knew the expedition had actually sailed, and was close to the place where, as it is believed, they were to act, at the time the orders were dispatched.

The Russians were quite aware of the proceedings the Allies, because they must have seen the flotilla cruising along the south coast of the Crimea to the eastward, and for miles the blue sky was seamed with streaks of black smoke from the steamers, which even at the rendezvous were visible from the land. Those on board the ships which were the furthest at sea could easily make out the land. A high peak rising out of the sea to the north was visible to the whole squadron; two or three smaller elevations at no great distance could also be seen distinctly; and there is no doubt but that the low land itself could have been discovered from the tops of the men-of-war at the rendezvous.

Kertch is said to have been the place where Cæsar penned his pithy despatch—"Veni! Vidi! Vici." We may certainly say we came, and saw, but we cannot complete the sentence. There is not the least question but that the expedition would have done all that could have been achieved by conduct and courage, had it been permitted to accomplish its object.

The accompanying View of Kertch is from an original sketch by Willibald Richter, of Vienna. It is taken from the heights of the Museum; the pair of griffins flanking the view were disinterred from one of the tumuli shown in the distance, and stated to be of the time of Mithridates. We append some interesting details of Kertch from the lady's little book on the Crimea, quoted last week.

At the entrance to the peninsula of Kertch are still to be seen the remains of a ruined wall and ditch, running across the isthmus from north to south, which are supposed to have served as a defence to the ancient kingdom of the Bosphorus.

On approaching Kertch one is struck by the immense number of tumuli, similar to those met with all over the steppe, and which, from their appearance and form, are considered to be of the same origin. Every year search is made in one or more of these tumuli; and many vases, coins, and golden ornaments, dating as shed for elegance of form and beauty of workmanship, have been disinterred. Statues also have been found in these tumuli, sculptured in the purest white marble, and in a style worthy of the best days of Grecian art. Many of these now ornament the Museum at St. Petersburg, while others are allowed to be retained in the Museum at Kertch, near where they lay so long concealed.

Kertch, which, thirty years ago, was a miserable village, has of late years become a handsome town, whose importance is rapidly increasing, and whose inhabitants amount now to about seven thousand. The streets are wide, and well paved; and the handsome houses, arcades, and pillared edifices, built of a beautiful white stone (of which there are several large quarries in the neighbourhood), give it quite an imposing appearance. The Governor's house, the Custom-house, and several large magazines, are built on the quay, which terminates in the walls of the Lazaretto, at the entrance to the Strait of Yenikali. Unfortunately the water is so shallow at Kertch that vessels cannot approach the quay, but require to anchor at a considerable distance; nevertheless merchants find it more profitable to load their vessels at this port than to risk the shallow water and frequent winds of the Sea of Azoff. Extensive fisheries have been established all along the coast, at which multitudes of sturgeons and herrings are taken. From the roe of the former caviare is made in great quantities; the latter are salted, and taken into the interior of the country, or else exported.

Every year commerce is increasing: rich merchants are establishing themselves there; and everything leads one to suppose that, ere long, Kertch will become a large commercial and flourishing city.

KERTCH, FROM THE HEIGHTS OF THE MUSEUM.—FROM A SKETCH BY WILLIBALD RICHTER, OF VIENNA.

LANDING SHELL AND CASE-SHOT AT THE ROYAL DOCKYARD, WOOLWICH.

SHIPMENTS FOR THE WAR.

The Royal Dockyard at Woolwich has, for some time past, presented a rapid succession of incidents which afford better evidence of the activity with which the War is being provided for than can be found in the vieu voce assurances in other quarters. Our Artist has sketched a pair of these busy scenes

Our first Engraving shows the Landing of Case-shot and Shell, in which operation the labour of convicts is employed. As the shells arrive they are carted off to the Arsenal, to be filled with the explosive material, and are then reshipped for the seat of war.

Next is the operation of shipping or getting on board the Horses of the Royal Artillery for the Crimea. As the transports arrive the horses are shipped as speedily as possible. Large flat-bottomed boats, capable of containing twelve or fourteen horses, are employed for the purpose of conveying them from the shore to the vessel moored in the Thames. The manner of raising on board, and lowering into the hold, with the fittings, &c., have already been represented in our Journal. The average number of horses the transports are calculated to convey is bout 200 to 300, with a sufficient number of men to attend to them.

War Materiel for the Crimea. The port of La Joliette decidedly assumes an exclusively military aspect. The bustle occasioned by the incessant arrival of the immense war materiel, destined for the East, increases every moment. Large sheds have been erected there to receive the provisions, provender, and the thousand packages and cases continually warehoused and embarked. The quays are covered with innumerable operatives, engaged in making stalls for the conveyance and accommodation of horses, in repairing casks brought back empty from Kamiesch and Constantinople, and which are to be again filled with the wine and brandy necessary for our soldiers, &c. Close to the sheds are seen mountains of coal. The timber of the north and the boards imported from America are piled in enormous masses, and undergo on the spot all sorts of transformation. In the meantime, long trains of artillery waggons arrive on the quay, where they deposit muskets and ball-cartridges, packed up in boxes barrels of gunpowder, &c. Here and there are heaps of projectiles, which lighters are constantly conveying on board the steam-transports. There are at present accumulated on the quay no less than 25,000 shells of the largest size, and 6000 bombs of 142lb. weight. At the extremity of the port near the Lazaretto are drawn up in several imposing lines, and ready for embarkation, upwards of 200 large siege guns, howitzers, and mortars, besides a number of smaller field howitzers and mortars, which are to be carried by mules. The whole of the maritime station of the railway is literally covered with those formidable implements of war. The neighbouring stores contain about 10,000 loaded shells and enormous quantities of gunpowder. If to these be added the long files of vehicles of the waggon train, the ambulances, and the carriages of the engineering department, one may form an idea of the magnificent spectacle offered by our new harbour, which is actually encumbered with shipping chartered by Government.—*Courrier de Marseille.*

SHIPPING ARTILLERY HORSES FOR THE CRIMEA, FROM THE ROYAL DOCKYARD, WOOLWICH.

FOREIGN AND COLONIAL NEWS.

FRANCE.

(From our own Correspondent.)

PARIS, Thursday.

The state and prospects of the Exhibition are the principal topics of interest here for the moment, and at present these do not seem to be in a very flourishing condition. It has been found necessary to dig beneath the centre of the building, which operation is now going on; and from this, or some other cause, a cloud of fine white dust constantly floats in the atmosphere, spoiling the dresses of the visitors, and necessitating that nearly all the objects already unpacked for exhibition (which is the smallest proportion of the goods) should be covered up to prevent their sharing a similar fate. Besides this, the few stray sunbeams that have shown themselves since the opening ceremony, have already produced such intense heat in the galleries, that the visitors, who were hardly warm enough outside, have found it impossible to remain in the upper parts of the Building, and have been compelled to seek refuge from the stifling atmosphere by descending to the lower. The administration, provoked at being compelled to admit the exhibitors gratis, avenges itself by causing them the utmost possible inconvenience. The building is now surrounded by a wooden paling; it is only through a single angle of this that the exhibitors are permitted to enter, and, having passed this first boundary, they are compelled to make a long circuit to reach the only door open to them, but the difficulties are not ended here. Getting in necessitates the utterly-to-be-forgotten operation of getting out; it is only through a limited number of doors that this privilege is accorded; and, as no means are taken to indicate these *sorties*, the hapless prisoner may be compelled nearly to make the tour of the building before he can succeed in escaping. In addition to this, the Company and the exhibitors are at issue on another point. As most of the latter are tradespeople, who are obliged to occupy themselves with their affairs, and who cannot consequently attend their stall in person, they consider that their delegates, charged with the superintendence thereof, should have the same privilege as themselves, and be admitted free; this right the Company refuses to acknowledge; so that the difficulties and complaints arising from these differences, become daily more complicated and louder. So general, in short, is the discontent and dissatisfaction relative to the state of affairs, that the shares which the holders of expected to negotiate most advantageously, after the opening, have fallen considerably, and are likely to continue to fall, unless the Company comes to a better understanding of its duties, and of the interests of itself and the public.

At the Palais des Beaux Arts, matters are much better organised This exhibition may now be viewed in a complete state, so that people have at least their money's worth. As yet the high price of entry has prevented any considerable influx of visitors; and, indeed, but few, except foreigners and provincials, have yet attended either Exhibition.

In front of the eastern façade of the Palais d'Industrie, has just been placed an equestrian statue, life-size, in bronze, of the present Emperor. The work has been executed by Jean Debay: the figure has considerable merit, and the likeness is striking.

On Friday took place the funeral of the Admiral Mackau, in the Madeleine, in the vaults of which the body is to remain till it be transported to the family burying place in Normandy. By the death of Admiral Mackau but two admirals remain in the French Navy, Parseval-Deschênes and Hamelin—both promoted to the post on the 2nd Dec., 1854.

Fresh improvements are in contemplation for the embellishment of the Bois de Boulogne. There is an idea of boring an Artesian well; and it is said that the Emperor finds that the lines of perspective of the Place de la Concorde and the Tuileries are so unfavourably affected by the present position of the Obelisque de Luxor, that he purposes having it removed to the Bois.

On the 19th took place the inauguration of the Cercle de l'Exposition, in the Hôtel d'Osmond. The Princess Mathilde visited the establishment in the afternoon.

The question of the dearness of provisions has become so urgent, that two commissions of inquiry have been established to examine into the matter in all its bearings. One of these is especially charged with the subject as regards the *ouvrier* class, and is employed in making out reports thereon

It appears that Redschid Pacha—who vehemently rejects the suspicion of being opposed to the French influence in the East—entertains the idea of shortly visiting Paris.

Horace Vernet is employed on a picture for the Tuileries, representing Napoleon I. in the midst of all the Generals who perished on the field of battle during his campaigns, namely Desaix, Caulaincourt, Lasalle, Duroc, Espagne, Morand, Auguste Colbert, Letort, Lacoste, d'Hautpoul, St. Hilaire, Montbrun, and Gudin. Besides these are the Marshals Poniatowski, Lannes, and Bessières.

Among the private exhibitions about to be opened this season is one of a series of curious and interesting objects sent from Jerusalem and the East, with a variety of photographs, representing the principal monuments of the Holy City.

A book, which can hardly fail to find many readers, appears highly *apropos* for the preoccupations of the moment. This is the "History of Alexander of Russia," by M. Léonzon Leduc; who, having made a long sojourn in Russia and Finland, under circumstances calculated to enable him to procure much valuable information, may be considered as an authority worthy of all attention.

The troop of comedians of the King of Sardinia are commencing a series of representations in the Italian Opera house, commencing by Silvio Pellico's tragedy of "Francesca di Rimini." At the Odéon is shortly to appear what is said to be a very remarkable production, by M. de Pellaert, a Belgian officer, who has already composed the words and music of "Louis de Male," a work of very considerable merit—the new piece is entitled "L'Amour par Ordre." Madame Marie Cabel is playing in "Jaguarita," the last effort of Halevy: the music is very good, but the libretto particularly weak, and the character not suited to the talent of the charming singer.

AMERICA.

The mail steam-ship *Africa*, which left New York on the 8th inst., arrived at Liverpool on Sunday. The New England Know-Nothings are rapidly developing their policy with reference to the Slavery question. In Massachusetts a Free-Soil platform has been adopted with remarkable unanimity. In New Hampshire the State Council recently adopted resolutions protesting against the repeal of the Missouri compromise, and the enactment of the Nebraska Act, and pledging the party to resist the further extension of slavery. In reference to this subject there is evidently growing uneasiness.

The liquor excitement is increasing rapidly throughout the States. In all the cities and large towns liquor dealers have organised associations to test the legality of the prohibitory law before the courts. As yet there is not the slightest diminution of the traffic.

Havana dates to the 1st inst. have been received by way of New Orleans. Nothing important had transpired since the previous advices. The *San Jacinto*, Com. M'Cauley's flag-ship, was to leave on the 2nd on a cruise. Capt. M'Culloch, who was arrested and tried with the unfortunate Estrampes, had been released from confinement. General Concha has carried his feelings of tenderness towards the memory of the late Ramon Pinto so far as to refuse the request of the family of the deceased to permit his remains to be deposited in one of the niches of the Campo Santo. It was expected that the blockade would be raised on the 1st instant.

A correspondent of the New Orleans *Bee*, writing from the city of Mexico, states that Santa Anna was so seriously ill that he was not expected to live. His malady was an affection of the head and throat, causing a state of stupor. There was a rumour to the effect that Santa Anna and his Cabinet are disposed to sell Lower California.

THE WAR IN THE CRIMEA.

Another week of sorties from Sebastopol, which the Russian despatches describe as "small and successful," while the accounts from the Camp speak of them as having been "successfully repulsed." A rumour has prevailed of a serious engagement having been fought between the Russians and the Turks, near Baladava, in which the latter stood their ground for eleven hours, when the arrival of the Allies turned the fight into a victory over the Russians. The report wants confirmation, but our letters from the Crimea do not come farther down than the 12th; and although Prince Gortschakoff professes to give a regular bulletin of every important affair, he might not be willing to mention a mere battle with the Turks, more especially when the Russians happened to be beaten.

The letters from the Camp are full of complaints, on account of the Kertch affair, but hopes are entertained of some new movement against the enemy which shall atone for that failure. The French reserve army from Misdak was expected soon, when the force of the Allies would be strong enough for any enterprise. Even at present the army before Sebastopol is much stronger than is commonly supposed. On the 8th inst. the French cavalry were inspected by Canrobert and Raglan near the English head quarters. They turned out between 4000 and 5000 effective horsemen, all, both men and animals, in good hard-working condition. On the 9th the Turkish cavalry were reviewed, and in point of discipline and efficiency made a highly favourable appearance. There were only about 800 of them, but the men were without solve follows, clean, and well equipped; the horses small, but high spirited and in fine condition. There was one regiment of Turkish Dragoons, and one of Lancers. Both went through their evolutions slowly, but with great precision and good order. A few days previously the English cavalry was inspected on the heights above Kadikoi. The Light and Heavy Brigade, united with the 10th Hussars, who had recently arrived, and muster 650 sabres, made a total force of about 1400 men. The 12th Lancers, part of which had already landed from the *Himalaya*, muster 850 sabres. So that we shall now be able to show at least 2000 effective horsemen; and these united with the French and Turks, would make a very respectable figure in a pitched battle.

Omer Pacha arrived at head-quarters on the 14th inst., and a kind of semi-council of war was held. It was said that Lord Raglan was about to send his extra baggage to Constantinople; and that a force of English and French would take the field instanter; but this rumour has not proved correct. It seems probable, however, that the present state of inaction will not last much longer. A French army, it is said, will move straight upon the Tchernaya, and force Tchourgoum at the bridge. Thus far there is little doubt a force of English infantry would accompany, as Tchourgoum is but more than five miles from our lines at Baladava, and the Woronzow road communicates directly with it. Further than Tchourgoum none of our troops but the cavalry could move; but the French, it is supposed, would probably advance into the plain beyond Tchourgoum; and, leaving the mountain road by Mackenzie's Farm on their left, force the passage of the road through Baidar. From thence it would be necessary to storm the heights between Mackenzie's Farm and Bagtcheseral, when they would at once be in possession of the main road which, running from Simpheropol through Bagtcheseral enters Sebastopol between the heights of Inkerman. By this road the formidable position now held by the Russians, above the caves at Inkerman, would be turned from the rear, and the complete investiture of the place from the north side would follow as a matter of course. An Allied force would of necessity hold Tchourgoum to secure the communication and cover the rear of the French while advancing. Our own and the French troops on the southern heights of Inkerman would prevent any attempt to place an army between ourselves and the French advancing by the north road. If at the same time an onward movement was made from Eupatoria by Omer Pacha, it is very possible that his advance might be unopposed, or at least not opposed with a sufficient force to check his march.

The accounts relating to the bombardment contain hardly any intelligence. Several new batteries have been constructed, from which great things are expected. The French have almost completed one of heavy guns and mortars, within fifty feet of the Flagstaff Battery. From the lodgment which they still maintain in front of it they are enabled to annoy the enemy with incessant musketry. The Flagstaff is now said to be entirely *hors de combat*. It will not stand four hours after the French reopen fire. The Russians are in the meantime endeavouring to ward off the effect of this misfortune by constructing another work still stronger, close in the rear of the Flagstaff, and more to the sea. It is true, however, expected that this will be able to offer any long resistance with the Flagstaff in the possession of the French.

The new plan of campaign is said to be of General Pelissier's conception, he having announced to the troops that an attack would soon be made; and, from the known character of that officer, it is taken for granted that it will be something very daring, and more approaching what is termed the *grande guerre* than anything as yet witnessed in the Crimea. It is not probable that the plan has been communicated to many, consequently any idea as to its nature must be vague. It is, however, surmised that his intention is to make a bold attempt to cut off the Russian army from Sebastopol, drive it into the interior of the country, and establish himself on the ground now occupied by them, to do what the Russians attempted to do at Inkerman.

Intelligence from Constantinople states that the French divisions, under the command of Generals Aurell and Herbillon, left that city on the 11th and 13th for the Crimea. The cavalry division, under the orders of General d'Allonville, was to leave on the 16th, and the Imperial Guard and General Regnault St. Jean d'Angely, on the 16th. The destination of the army of reserve is kept secret, it having sailed with sealed orders.

The Vienna correspondent of the *Evenden Stadt* writes that preparations are being made in Bourgas, Varna, and Baltschik for a powerful squadron, which is to act against some place on the north-western coast, either Odessa or the fortress of Akermann.

A SORTIE GALLANTLY REPULSED.

The determined manner in which the Russians attack the besiegers almost every night, notwithstanding the warm reception they invariably receive, shows that they feel the advances of the enemy to be coming too close for them to resist much longer. A brief description of a sortie which took place on the morning of the 10th inst., and the way in which it was repulsed, will give some notion of what these nightly attacks are. The previous evening appears to have been highly favourable for such an enterprise. A sudden change had taken place in the weather, which had become both stormy and wet. As the night was pitchy dark, the English sentries were advanced beyond their customary posts, to guard against a surprise. At one o'clock the weather seemed doing its worst. Nothing could be seen for the rain and darkness, and nothing could be heard for the howling of the wind. Suddenly both wind and rain ceased; but the darkness was still intense. One of the outsentries thought he heard something unusual in the direction of the Redan, and, instead of rushing in, with or without firing his musket, as our sentries too frequently do, he with the utmost coolness and judgment tried to discover the cause, before giving an alarm. He communicated his suspicions to two other sentries who were stationed near him; and after a short deliberation they all advanced in the direction of the noise, creeping cautiously along the ground. As they approached the Russian works the noise as of many men moving about, though not advancing, was distinctly heard. The steps appeared to be about a hundred yards off; but it was impossible to distinguish anything, suddenly the sound ceased. The three sentries were in doubt what to do; but eventually one of them returned to the advanced work to report what he had heard, and alarm the covering party. He had hardly quietly left, and made his statement the trench guard was aroused—the men formed up in strict silence—the weapons looked to, and each detachment, under the command of its officer, proceeded to its appointed post. Orders were issued that none were to fire till the enemy actually showed himself.

Colonel L. Yea, of the 7th, was field officer in command of the whole party. A brigadier general was in command in chief of all the troops in the trenches, but he was stationed with the reserve. In the meantime the two sentries, who had remained in advance, waited quietly for some further indication of the enemy's presence. After about a quarter of an hour's anxious expectation, the head of a body of men, advancing quickly and cautiously, was distinctly heard. One of the sentries instantly returned to report it, the other remained at his post until the enemy were within forty yards of where he lay. He then began retreating, keeping close to the ground, neither going on too fast, nor suffering the enemy to overtake him. When within a stone's-throw of our trenches the Russians stopped; our sentry quickly entered our works and pointed out their precise position. All our troops preserved a strict silence, and so quiet were the enemy that it was almost impossible to say that they had not altered their plan, and proceeded in another direction. A few minutes passed in this manner, and then in an instant fifty shots were fired into our lines at a distance of six feet. It seems that, when the Russians halted, they lay down on their bellies, and crawled forward unobserved until within a musket's length of our trenches, when a number of them fired and sprang upon their feet. Our men were in no way taken by surprise. Their positions were already assigned, and they lay so close under cover that only two men were struck by the enemy's volley one man killed on the spot, another dangerously wounded. The Russians, who had first risen, made an attempt to rush into the work under cover of their fire, which they believed had taken us entirely by surprise: but nearly all who tried were shot or bayoneted. The rest of the party, which now seemed about 1000 strong, commenced a heavy fire, but it was totally inefficient against our troops, who were sheltered by the breastwork. Our fire, on the contrary, was cool and well sustained, and at the short distance held with murderous effect on the crowds of Russians. They fell on all sides, while we scarcely lost a man. After a few minutes the enemy became confused, and fell back in disorder. It appears, however, to have been only a momentary panic, as, after retreating a short distance, during the whole time of which they were skirmishing, they returned to the charge, and, with the utmost coolness and daring, moving more to the left, tried to storm the breastwork at another point. In this they were as unsuccessful as in their first attempt. The troops reserved their fire until the Russians closed, and giving one tremendous volley prepared to receive those who might strive to cross the breastwork with the bayonet. But so severe was the effect of their volley that the enemy seemed paralysed. Their officers tried to lead them up, but the men, though they fired fast, seemed disinclined to follow. They were wavering fast, when a second force of Russians, about 500 strong, came upon the field. The reinforcement made no fresh effort to force our trenches, contenting themselves with skirmishing to cover the retreat of the attacking party. The English never quitted their breastwork, but fired with deadly precision into the enemy, who were trying to remove their killed and wounded. While effecting this they suffered a severe loss from our fire, which, from our very sheltered position, they were quite unable to return—at least with any effect. After about a quarter of an hour's skirmishing in this manner the enemy fell back and got under cover of the Redan.

As usual, the instant the attack was repulsed and the Russians clear off, their batteries opened fire upon the portion of our lines on which the sortie had been made. They poured in regular volleys of round shot, grape, and shell. The heavy dark sky which lowered over everything, seemed a perfect aurora Borealis with the incessant flashes of the guns. This retaliation was fully expected, and all our troops lay down until the iron hail had passed. Only one man was killed by a round shot. No other was even wounded. In about half an hour the cannonade ceased and except an occasional gun from the enemy, or a large mortar from ourselves and the French, all Sebastopol and the Allied trenches were wrapt in perfect silence.

Our whole loss from this sortie was three men killed and thirteen men wounded—two of the latter very dangerously. The Russians are said to have had at least 150 men put *hors de combat*

Our own Correspondent says:—"Readers who were present assure me that the conduct of our men was admirable. They behaved splendidly."

NEW AGGRANDISEMENT OF RUSSIA.

According to letters from St. Petersburg of the 11th, Russia has profited by the troubles of the Chinese Empire to effect an easy extension of her frontiers in Southern Siberia. Means have been found to induce four Mongol Khans, long subject to China, to ask that their lands may be annexed to the Russian Empire. The Mongolians in question are miserable tribes, without agriculture, arts, or even towns, and well understand that they cannot hope to maintain a position of independence. Of course this request could not be refused, and the Khanates, late the possessions of China, are now annexed to the Czar's dominions.

A PERSIAN VICTORY.

The letters received from Constantinople this week bring the particulars relative to the late irruption by the Khan of Khiva into the Persian territory, the capture of the Khan and his son, and the subsequent rout of his forces by the Persian troops. It appears that the Khan, towards the end of March, and at the unconcealed instigation of Russian agents, collected an army of some 35,000 men, mostly composed of contingents furnished by Turcoman chiefs of the Khanat, and with these crossed the Persian frontier and laid siege to Merv, a town of considerable strength to the south-west of the Oxus. The place was but weakly garrisoned, and, like those of nearly all Persian towns, its mud-wall fortifications were in the last stage of dilapidation and neglect. The little force within the town, however, aided by the male population, manned the defences and kept the Khan and his hordes at bay. He, therefore, invested the place, resolving either to starve it out or to take advantage of any piece of treachery from within which might tend to divide the strength of the defenders. During this state of affairs the Khan left his tent to make a tour round the besieged town, and in his absence some of the Turcoman chiefs, having reflected on the probable consequences of a Persian war to their own people, plotted his assassination and that of his son, who likewise accompanied the expedition. Accordingly, during the following night, a party of the conspirators burst into his tent, and, having poignarded the father and son, cut off their heads, and then served several of his chief officers in the same way. The next day the whole force, on becoming acquainted with the fate of its leader, disbanded, and in a state of alarmed confusion fled Khivawards, to the tune of *sauve qui peut*. The garrison of Merv, strengthened by some rebels which had just come up, followed the dispersed bands, and after slaughtering a large proportion of them, took some two thousand prisoners. The heads of the Khan, his son, and the murdered officers were, then forwarded to Teheran, accompanied by the Turcoman chiefs whose treachery had led to such a result, and the whole were received with the greatest delat. Rewards and honours were heaped upon the chiefs by the Shah, and the heads were on the point of being, according to Eastern custom, carried on the gates of the city, when our new Minister, Mr. Murray, interfered, and procured a deviation from this last part of the barbarous ceremonial. The Shah then awarded to the heads of the Khan and his son a royal burial; and after a vast amount of rejoicings at their great victory, the Court and the rest of the capital subsided into their usual dullness. The affair is said to have excited a strong anti-Russian spirit both in the mind of Nezer-ud-deen Shah himself and the people generally, and in this way may be productive of good.

THE CRESCENT AND THE CROSS.

DR. CUMMING presents his compliments to the Editor of the ILLUSTRATED LONDON NEWS, and begs sincerely to thank him for his obliging kindness in giving insertion to his extract and communication.

Dr Cumming received the curious lines in his communication with many other analogous, and in so far interesting, incidents connected with the war, which he referred to as fragments of truth apparently drifted from an original, or as happy artistic patterns of recent events. The eight lines in question were sent from a clergyman, a correspondent of Dr. Cumming, in a letter, in which he says: "Those lines were copied by a brother clergyman from an old book of predictions, dated the fifteenth century, in the possession of a gentleman living at Chard, in Gloucestershire."

On writing to his Correspondent a few weeks ago, requesting the exact date of the volume, it appeared—from the letter not reaching him that he had changed his Curacy, and probably gone to another part of the county. It was suggested that Dr. Cumming should send the lines to the ILLUSTRATED LONDON NEWS, or *Notes and Queries*, in order to ascertain thereby their real origin and date. Having taken in the ILLUSTRATED LONDON NEWS from its com mencement, and being aware of its great literary connection, he determined to send his curious lines to that Journal, under the persuasion that some of its correspondents more learned in such researches than he is would cast light on them.

It seemed to him doubtful if the three national names (the Bear, the Bull, and the Cock) were so early applied to Russia, England, and France; though whether the lines be forty years or four hundred years old the anticipation would be equally remarkable. The Turks have a tradition among themselves that four hundred years from their capture of Constantinople ends their encampment in Europe. This may be the origin of the prediction in the lines already given. The subject has no intrinsic value beyond its singular accuracy, if old, as an anticipation of the future—either based on conjecture, or on traditional remains of truth, or as a reflection and interpretation of prophecy higher than man's, but in any case having no claim to any higher inspiration than human.

May 23.

MEETING AT LORD PALMERSTON'S.—A meeting was held this afternoon at the official residence of the First Lord of the Treasury in Downing-street, which was numerously attended by all sections of the Liberal party in the House of Commons. Being a private meeting, we are unable to give a detailed account of the speeches delivered, but Lord Palmerston's explanations were considered most satisfactory, and His refutation of the insinuations brought against the Government was most complete. The meeting was subsequently addressed by Messrs Lowe, Bright, and Layard, Lord Robert Grosvenor, and Sir James Graham. A cordial feeling of confidence in the Government was manifested throughout the whole proceedings, and the greatest unanimity prevailed. —*Globe of Thursday.*

IMPERIAL PARLIAMENT.

(Continued from page 509.)

HOUSE OF LORDS.—THURSDAY.

NEWSPAPER STAMP DUTIES BILL.

Lord CANNING moved the second reading of the Newspaper-stamp Duties Bill.

Lord MONTEAGLE opposed the measure, resting his objection to it mainly upon the present financial state of the country.

The bill was read a second time

HOUSE OF COMMONS.—THURSDAY.

THAMES EMBANKMENT BILL.

On the order for the second reading of this bill,

Mr W. PATTEN moved as an amendment that the bill be read a second time this day six months.

Lord LOVAINE seconded the amendment.

Sir W MOLESWORTH, on the part of the Board of Health, objected to the bill altogether, until the Board should have an opportunity of considering it.

After a few words from Mr. A. PELLATT, the amendment was agreed to, and the bill was consequently lost.

QUESTION IN PARLIAMENT AND CORPORATION REFORM.

Mr. T. DUNCOMBE asked the First Lord of the Treasury, if it was his intention to bring in a bill during the present session to enable Jews to sit in Parliament; also, on what day the long promised bill for the Reform of the Corporation of the City of London will be introduced ?

Lord PALMERSTON said there was no intention to bring in a bill on the Jewish Disabilities question this session. A bill was in preparation in reference to corporation reform.

Mr. DUNCOMBE gave notice that immediately after the recess he should call attention to the anomalous state of the representation of the city of London.

MR. DISRAELI'S MOTION.—PROSECUTION OF THE WAR.

Sir W. HEATHCOTE gave notice, that he should move as an amendment to the motion of the right hon. Baronet the member for Portsmouth, the insertion of the following words, after the word "hostilities"—" and still cherishing the desire that the communications which are in progress may arrive at a successful issue."

Mr. LOWE gave notice that, on Mr. Disraeli's motion, he would move the following amendment:—" That this House, having seen with regret that, owing to the refusal of Russia to restrict the strength of her navy in the Black Sea, the Conferences of Vienna have been led to the termination of hostilities, feels it to be its duty to declare that, by that refusal the means of coming to an arrangement on the third basis of negotiation having been exhausted, this House will give its best exertions to carry out the successful prosecution of the war.

Mr. DISRAELI then rose, in a very full house, to move the following resolution :—

That this House cannot adjourn for the recess without expressing its dissatisfaction with the ambiguous language and uncertain conduct of her Majesty's Government in reference to the great question of peace or war; and that, under these circumstances, this House feels it a duty to declare that it will continue to give every support to her Majesty in the prosecution of the war, until her Majesty shall, in conjunction with her allies, obtain for this country a safe and honourable peace.

He said, he had for some time—watching with deep anxiety the conduct of this country in reference to the great question of peace and war, and particularly during the Conferences of Vienna—imbibed an opinion which had filled him with deep anxiety. He had noticed, on the part of the Government, language so ambiguous, conduct so uncertain, that he believed the circumstances demanded the attention of public men alive to their responsibilities. It had been said that her Majesty's servants were engaged in confidential negotiations on the subject of the war, and the appeal for respite was of course irresistible. At length the protocols were laid upon the table of the House, and he presumed that the Government would have taken the opportunity of laying before the House what was intended to be done in reference to the matter, and would have stated frankly, precisely, and explicitly what Government intended to do, more especially as public feeling was in such a state that it became the duty of the First Minister to lead it on a subject of such surpassing magnitude (Hear). A member for a great city—one of her Majesty's Privy Council—placed on the paper a notice of an address to the Queen. He hoped that if the First Minister had been enabled to screw up his courage to present an address to the Royal Throne, it would have been in a different character from that proposed by the right honourable gentleman the member for Manchester—that it would have contained declarations of an entirely different character; and one which his object was to extract from the Government to-night an intimation to that effect. He had no idea that the discussion on that motion would be abandoned. The country, and indeed all Europe, were, by a well kept secret, baulked of a discussion in a matter of the most momentous importance since the peace of 1815 (Hear, hear). Believing the conduct of her Majesty's Government was to be viewed with suspicion and distrust, and that the conduct of that Government would be ruinous, if not watched with vigilence, he had framed the motion on which he was now addressing the House. In reference to the conduct of her Majesty's Government as to the question of peace and war, he maintained that their language was ambiguous, and their conduct uncertain; and he should call upon the House to arrest a course of policy which must, in its results, prove most disastrous to the country. Having stated something in opposition to a sarcasm levelled against him that he had made an arrangement with Mr. Layard, and paid a high compliment to the abilities and the administration of that gentleman, Mr. Disraeli proceeded to say that he should not go back to the passage of the Pruth, or to any circumstances of that kind; but he should limit his criticisms to events of more recent date, beginning with the installation of the present chief Minister of the Crown, which had been styled "a glorious epoch in the history of this country." Having reviewed at some length the antecedents of the present Administration, the right hon. gentleman referred to a question put by Sir J. Graham to the head of the Government as to the conditions on which peace was to be sought, and to the foreign policy of Lord Clarendon in general. The noble Lord (Lord Palmerston) stated that the foreign policy of Lord Aberdeen's Government would be followed out thoroughly; but very shortly afterwards the Plenipotentiary returned bootless, and a motion was placed upon the table by the right hon. member for Manchester, which affirmed that the propositions of Russia were reasonable, and that some blame attached to the Government for refusing them. It had been positively stated that the noble Lord the Secretary of State for the Colonies who held a more prominent position in that House than he at present enjoyed—was in favour of such a peace; whereas he had always been the bold advocate for a decisive struggle with the colossal power of the Russian empire. He did not think that the appointment of the noble Lord the Secretary was a very happy one, inasmuch as he had been distinguished by his strong and inflammatory denunciations of the power and ambition of Russia. Altogether, the antecedents of the noble Lord rendered him incompetent for negotiating peace with Russia. He thought very little of the noble Lord's powers as a diplomatist. The right hon. gentleman then referred to the part his Lordship acted in connection with his "Secret Correspondence," and quoted passages from his despatches, in which he contended he made fatal admissions as to the Protectorate of Russia. The noble Lord at the head of the Government said that they were not going to make an ignominious peace, and that the man who would do so should be an outcast. But peace could be made without that House, and it was therefore important that the policy of the Government should be fully known. He denied that the war could be carried on with this morbid state of negotiations, and he also denied that all the country had to do with the war was to make expeditions and to raise taxes. The discontent which prevailed was owing to the fact that there was diplomacy and war existant at the same time. The right hon gentleman concluded a speech of nearly three hours' duration by denouncing this subterfuge of negotiation and Ministerial trifling.

Mr. BARROW seconded the resolution

Sir F. BARING then submitted the following amendment —

That this House, having seen with regret that the Conferences of Vienna have not led to a termination of hostilities, feels it to be a duty to declare that it will continue to give every support to her Majesty in the prosecution of the war, until her Majesty shall, in conjunction with her allies, obtain for this country a safe and honourable peace.

The right hon. Baronet said that if he did not like to meet the resolution with a direct negative, for that he would be misrepresented in foreign countries. He denied the assertions of Mr. Disraeli, defended Lord John Russell, and trusted that negotiations would be resumed.

Sir W. HEATHCOTE said, that he would support Sir F. Baring's amendment, if he assented to the additional words he proposed.

Mr. R. SEYMER said, he did not think the moment well chosen for a party movement The year was not yet ripe, but the proceedings of last Monday had greatly hastened its maturity. He supported Mr. Disraeli's resolution

Mr. WILKINSON supported the amendment.

The Marquis of GRANBY and Mr. R. PHILLIMORE spoke in opposition to the resolution.

Mr. GLADSTONE was opposed both to the resolution and Sir F. Baring's amendment. He, however, argued in favour of the amendment suggested by Sir W. Heathcote. He defended the expedition to the Crimea, and denied that it had been entirely unsuccessful, for while, in August, 1854, Russia refused to accept the Four Points, in the month of December following the Emperor accepted those very propositions as a basis of negotiations which he had so strenously refused before. Looking at the question at issue as one only of terms, how did it stand? Russia had agreed to the First and Second Points and part of the Third Point. The Fourth would be agreed to at any time. The only matter to be settled now was as to the limitation of the power of Russia in the Black Sea. When a member of the late Government he was in favour of limiting the naval power of Russia in the Black Sea, but he now thought that such a proposition rejected as it had been, would only give Russia an excuse for the Russian proposal to give to Turkey the power of opening and shutting the Straits was one calculated to bring about a settlement. As regarded the position of Russia now, so challenged are the powers of Europe in case in the whole history of the world in which the political objects of war had been more completely gained without the prostration of the adverse party. He felt that he could be encouraged; fearful to express our opinion that the proposals of Russia were such as to afford a fair prospect of concluding a peace by which all the original objects of the war might have been gained, and by which her Majesty and her allies might have obtained all the advantages which can reasonably be demanded from Russia

The noble Earl introduced his motion by a speech of considerable length. In the course of which he stated that no less than 500,000 lives had been already sacrificed, and about £50,000,000 of our money expended since the war commenced. He contended that we were incurring a grave responsibility in continuing the present hostilities when a opportunity was offered for arriving at an honourable peace by a renewal of negotiations upon the counter propositions submitted by Russia.

HOUSE OF COMMONS.—FRIDAY.

THE CRIMEAN MEDALS.

In answer to a question from Mr. Stafford, Mr. F. PEEL said that 2000 medals were in the hands of Hunt and Roskell, for delivering to those soldiers who had returned to this country from the Crimea, and were not present at the ceremony on the 18th instant, and would be forwarded to them by the firm he had mentioned. He might take that opportunity of also informing the House that arrangements had been made to send 8000 medals per fortnight to the Crimea for distribution there; and further, that those soldiers who received medals on the 18th would shortly receive certificates on Hunt and Roskell, in order to obtain their clasps, to which they might be entitled.

THE VIENNA CONFERENCES.

Mr ROEBUCK said Sir, it is a report abroad that the Conference at Vienna has been renewed I wish to know whether the Government have received any intimation of such a renewal?

Lord PALMERSTON: All I can say is, that no confer nce has been held since the last reported in the papers; and before any fresh conference is held, the English Minister at Vienna must receive authority from the Government at home to attend it

Mr. GIBSON thought the noble Lord's answer was not generally understood. The noble Lord stated, some days since, that the Conferences were not finally concluded, but that they had been suspended, Lord Westmoreland retaining his full powers. He wished to know whether those powers had been withdrawn.

Lord PALMERSTON replied, that those powers had not been withdrawn. Lord Westmoreland still possessed them.

MR DISRAELI'S MOTION—ADJOURNED DEBATE.

Mr. WHITESIDE resumed the debate, and announced his intention of supporting the resolution of the right hon. gentleman the member for Buckinghamshire. He pointed out at considerable length what he considered inconsistencies between the speeches of Mr. Gladstone and Lord John Russell, contending that no parliament could be unanimous under their joint councils. He contended that hon. members had no alternative but to declare to the Queen that it was their firm purpose, as it was the determination of the country, one of her Majesty's Ministers became the embassy to Vienna had proved futile and abortive. The Government said taunt ingly to the Opposition " We have done all we can. Why don't you tell us what we are to do?" He (Mr. Whiteside) would reply, " Very well, if you will change places with us, so we will " (Hear, hear, and Laughter).

THE Sardinian Corps in the Crimea, while commanded by the Sardinian General only, will be ready to co-operate with either the English or French armies, according to reconcerted arrangements.

A PRUSSIAN SPECTACLE.—This morning, at an early hour, the two bronze statues of York and Gneisenau, two heroes in the great war of Prussian liberation from a foreign yoke, that have within the last few days been erected on either side of the well-known statue of Marshal Blucher, near the Opern-house, were divested of the wrappings that have hitherto hid them from sight. The only inauguration that they have received consisted in the parade that the King held in the forenoon of four regiments of infantry, three of cavalry, and one of artillery, beside a battalion of rifles and a company of pioneers. These were all troops of the Guard, and form the greater part of the garrison of this capital. Those who are acquainted with the locality of the beautiful avenue of limes and horse-chestnuts leading from the Brandenburger Thor up to the Royal Schloss will imagine the beauty of the spectacle as seen this morning under the animating and exhilarating influence of the first genial weather we have had this spring. The entire roadway on one side of the street was occupied by cavalry drawn up in line; on the other by infantry in column, with the artillery ranged round the Pariser Platz, and along the *chaussée* leading to Charlottenburg. As a sight few things could be prettier; the uniforms and accoutrements without reproach for good taste, for cleanliness, and general smartness; but, nevertheless, the whole thing impressing the spectator with no martial feeling, and suggesting no connexion of ideas between this military display and the possibility of actual war.—*Letter from Berlin, May 21.*

HOSPITALITY OF ILHAMY PACHA TO BRITISH OFFICERS IN EGYPT.—On the occasion of the late passage of her Majesty's 10th Hussars and 12th Lancers through Egypt, his Highness Ilhamy Pacha, the late Viceroy, Abbas Pacha, retaining a lively impression of the hospitality intended for him by her Majesty, last year, on the occasion of his Highness' visit to this country, and which was so unhappily cut short by the death of his father, invited the officers of both regiments successively to entertainments. To the 10th Russians his Highness gave a fête champêtre in a magnificent tent pitched about three miles from Cairo, where the English Consular-General and his principal officers were invited to meet the officers; and nothing could have been more agreeable than the party, enhanced as it was by the striking novelty of the scene. The 12th Lancers were next to receive a mark of attention, in the form of a dinner, prepared in the state apartments of his Highness's Palace of the Abbasieh, contiguous to the Cavalry Barracks in which these regiments during their stay at Cairo were quartered. The party consisted of Colonel Eyre, commanding the 12th, and of two-and-twenty of the officers, to meet whom there were present her Majesty's Consul-General; M. le Chevalier Huber, the Austrian Consul-General; and the representative of Sardinia at Cairo, together with several other gentlemen of distinction. The French Consul, M. de la Pute, was expected, but, having been unfortunately taken unwell, was compelled to send an excuse at the last moment. Colonel Pole, in a brief speech, proposed the health of his Highness, which was drunk with three times three in true English fashion. The Austrian Consul-General, on behalf of his Highness, returned thanks, and proposed "Colonel Pole and the officers of her Majesty's 12th Royal Lancers, with success to the gallant cause they were about to join." The company shortly afterwards retired to the grand saloon, a most magnificent apartment, to enjoy the chibouk. Some of the guests, attracted by pastimes of a more European character, betook themselves to the billiard-room, where they amused themselves till eleven o'clock, when they separated, all evidently much pleased with his Highness's urbanity, and with the graceful reception they had experienced. To their great surprise, the officers found that his Highness had reversed with them all very well in English, and that their familiar friend the ILLUSTRATED LONDON NEWS formed one of the sources of intelligence and recreation of an Oriental palace.

A ROYAL CONFIRMATION.—On Saturday the Princess Louisa, the daughter of the Prince and Princess of Prussia, was confirmed at the Royal Palace at Charlottenburg. There are three points in which this ceremony here differs from confirmation with us; in the first place any priest in full orders is competent to administer the rite (that clergyman almost always officiates who has himself instructed the catechumens, and himself derives a considerable portion of his means from the fees and presents made by them); secondly, the young persons to be confirmed deliver in previously a written confession of faith drawn up by themselves; and thirdly (a custom confined almost exclusively to the members of the Royal family), all the preceptors and preceptresses that the young scion of royalty, about to enter upon membership with the Church, has ever had, are invited to be present at the ceremony, and the subsequent domestic festivities.—*Letter from Berlin, May 21.*

THE MILLIONS OF CHINA.—It is said that there are now one hundred Evangelical missionaries in China, and that the five ports accessible to them have a population of ten millions. This gives to every missionary an average of one hundred thousand of the population of the five ports, and of four millions of the whole population of China. That is, the five ports are as well supplied with Christian Ministers as the city of New York and its suburbs would be with no more than five preachers of the Gospel; and the whole of China is supplied as the Empire State would be, with but one Christian Minister to its entire population.—*American Paper.*

BEFORE SEBASTOPOL.

RIFLE-PITS IN FRONT OF THE MAMELON, MALAKOFF TOWER, &c.

WE have engraved the large View upon the ensuing pages from a sketch made by Lieutenant (now Major) Bredin, of the Royal Artillery, who transferred the scene to his sketch-book immediately before his leaving the Camp at the Crimea. The respective localities are indicated beneath the illustration

The Russian Rifle-pits, of which we have of late heard so much, are formed for the purpose of keeping down, drawing off, and, if possible, of silencing the fire from the parallels of the Allies, which would otherwise be directed at the embrasures of the garrison. The soil being very stony, the pits are not dug deep, but the excavated earth and stones are thrown up in front, and make a rough breastwork, which at the crest is rendered neater by layers of sand bags; small interstices being left between them, through which the Riflemen take aim and fire.

We quote a few details of sharpshooting in the Rifle-pits from the letter from the Camp, dated April 27th :—

I was out early to the rifle-pits on Tuesday (the 24th), but the Russians were very shy that day, and gave very few chances. I had a regular duel with a Russian in the nearest rifle-pit to us (250 yards). In about half an hour he gave up firing; and, as I had put about four shots out of seven through his loophole, I thought I must have hit him. I left a nonsuch of mine in my company to watch him. Very soon the Russian (who, by the by, was a splendid shot) fired again, and put the ball right through Private ——'s cap, because he did not bob his head when he saw the smoke. They began to fire 68 pounders at us on the rifle-pits from a great gun in the Redan, 700 yards from the pit I was in, and, with two men loading rifles for me, I bullied them so much that they were half an hour loading the gun, for I had a very sharp corporal watching the gunners with my telescope, and directly they appeared I fired into the embrasure. As soon as I saw the gun was loaded, I made the men lie down close under the parapet till they fired. The shot came close over our heads. The same thing went on again; but they only fired four shots at us altogether, and did no harm.

SPRING MEETING IN THE CRIMEA.—THE RACES AT KARANI.

THE Fourth Grand Crimean Spring Meeting took place on the 27th ult., in front of the Guards' detached camp, Karani. In many respects it was the most successful meeting that has yet been held. Most favoured also because there could not be a purer sky—the sun could not be brighter nor the air more balmy. And as at home, on the days of our great national festival, the seeing people start for the races as an integral and important part of the ceremony—so here. On that day the most outrageous novice in Camp would have seen at a glance that something extraordinary, something to be looked at and conned over, and never to be forgotten, was going forward. There was a grand exhibition of the countenances of all nations, and a choice collection of bât horses in front of Oppenheim's store. Brown Maltese, and our own Ionians, tied cases of sherry and champagne, and tins of ready-cooked hams and tongues, to pack-saddles laid on unwilling backs. Then the road up to Karani was covered with baggage animals, carrying provisions of a kind not included in the rations issued to her Majesty's forces in the East, and on all the roads from the different camps crowded officers on horseback, some proceeding at a walk, some ambling, and some galloping along at a rattling, victorious, and irresistible pace. From the heights occupied by the French there came powerful, well-groomed horses, with a deal of bone and more flesh, and men with blue or green coats, and scarlet trousers of the most unobjectionable width. Our own encampments sent forth sombing nags and ponies of Eastern breed, and, mounted on them, men habited in the scarlet shell-jacket whose charms increase now that its days are numbered. Others there were that braved the heats of a Crimean April in those neat little fur coats which were issued at the eleventh hour, and which, if not spoiled in store or by wet on the march, will do good service next winter.

The low hills which in part hide Karani were covered with men and horses. In front, on the course, people were still busy, for it is a law of nature that a race-course is never to be completely completed. The Guards detachment, dressed up for the occasion, stood in little groups among the tents, and the sentry, who passed in front, conjured up visions of St. James's Palace and the steps of the Duke of York's column.

In most respects, however, the scene was very little reminiscence to the place of scenes hallowed to the lovers of " the turf." There was no crowd of unprofessional spectators—there was hardly any rabble. There were no young men in hack-chaises and four taken up by subscription, resolved to be as great an annoyance as they could There were no mysterious hampers under the care of gentlemen in livery. No booths, and no gipsies; no gentleman craving to supply you with a "rock card of the races." From first to last, and even after the last, inquisitive spectators were doomed to ignorance as to " the names and ages of the horses:" and though the colours of the riders fitted by, they were indistinctly realised, and soon forgotten. There was in vain would I have been to look for any of those supernumerated jockeys, betting Jews, or other vermin that crawl over an English race-course. One great feature of a race—the gipsy parties—were not wanting. On a high hill on the right of the Guards' camp, and in front of the open-air hospital for invalided baggage animals, squatted the beauty and fashion of Karani half a dozen of lineal descendants of the heroes that conquered at Marathon and bled at Thermopylæ, and of the gallant tars who by the glorious work they did at Salamis immortalised the wooden walls of Athens.

But the bell has been rung, and the first race has commenced. The appearance of jockeydom makes men bet—they can't help it; but the settlements are not likely to be attended with serious consequences. There is no fear of defaulters, for hardly any bets exceeding five dollars are offered and accepted. A favourite horse is always worth a crown; and bets to that amount are freely offered and taken; and, as the horses draw near the winning-post, there is the usual excitement, and when yellow has won by half a length, then follows the usual buzz, which may be resolved into the freely construed, " I knew he'd win." There is more music, and more riding about, and another ring of the bell, and another race; but it soon becomes apparent—what indeed already became apparent at each one of the former meetings—that the trial of speed of the animals of unknown parentage, whose place is not found in the stud-book, is but a secondary consideration—a mere excuse for a sort of Corso at Karani an open-air conversazione—a meeting of " Friends in Council," and on horseback, in true Tartar fashion. The approaching hurdle-race creates a special interest, of the sort I am writing about, while the hurdles are being fixed, those who have friends in the Encampment are invited to luncheon, which, for the air is remarkably bracing, they greedily accept, if they have breakfasted at an early hour, or dine with them at dinner particularly morning they have happened to be late for breakfasters. In the hurdle-race, which everybody is eager to see, some of the hurdles are ridden over on purpose to vex the stewards, and there is a good deal of laughing, because it is supposed that the stewards must feel great vexation—it is their business duty to do so. But, after all, the whole affair begins to flag. Some young men, addicted to pleasure, are moving restlessly in their saddles. The Turks in the valley have turned in ever so long since, but the French band on the hill, and the Highland bands of Sir Colin Campbell's Camp, are still playing against one another. The moon is up, and sheds her pale light on Balaclava plain; and in the tents and huts a deal of eating is going on, and much talk about the races and the hunt, and the grand French review before Lord Radcliffe. Such was the Fourth Karani Meeting, on the 18th day of the New Siege of Sebastopol.

PHOTOGRAPH OF THE CRIMEAN MEDAL PRESENTATION.—A gentleman from the London Stereoscope Company, of 313, Oxford-street, had the honour on Tuesday last of submitting, by request, a Photographic View of this highly-interesting ceremony, at Buckingham Palace, for her Majesty and Prince Albert's inspection. The view is taken just at the moment her Majesty is presenting a medal to a midshipman; and it also embraces many thousands of persons, including the immense throng which lined the roofs of the Horse Guards.

THE ARTISTS' ANNUAL FESTIVAL AT ROME took place on the 5th inst., at a picturesque spot in the Campagna, overlooking the Tiber, called Castel Gaudino, *alias* Fidene. Omer Pacha, his Satanic Majesty, Rubens, and other distinguished characters, appeared in the masquerade, amongst black Sultans, mediæval warriors, and courtly cavaliers; a select band of whom, headed by the president of the festival, met King Louis of Bavaria at the confines of the Fidenate territory, and escorted him from the Ponte Salaro to the festive scene, where his Majesty after having been decorated with the orthodox ribbon and order of the *macro-bianco*, or farthing—as under a great Chinese umbrella supported by the motley dignitaries of the palette and chisel, witnessing, like a benevolent *paterfamilias*, the varied entertainments

LUCY STONE, the strong-minded Bloomer, and advocate of woman's rights, entered into bonds on the 2nd instant. She was married—but only under protest—to a Mr. Blackwell. She has reserved a right to be "a completely independent and separate individual," and her husband consents.

MONTI'S LECTURES on ANCIENT and MODERN SCULPTURE.—The FIRST of these LECTURES, in compliance with the earnest desire of the Subscribers, is POSTPONED till WEDNESDAY, May 30. Tickets to be had at Messrs. Ewer and Co.'s, 1, Pall Mall East.

MR. BENSON has the honour to announce that his ANNUAL CONCERT will take place at the NEW BEETHOVEN ROOMS, on MONDAY EVENING, JUNE the 4th, 1855: in the course of the evening some Glees and Madrigals will be performed, and also a Selection from the Works of Sir Henry Bishop. To commence at eight o'clock. Tickets to be had at the Musicsellers; and at Mr. Benson's residence, 47, Gloucester-street, Belgrave-road, Pimlico.

HERR ERNST PAUER has the honour to announce that he will give a Grand EVENING CONCERT, with the Full Orchestra of the celebrated CONCERTHAL UNION, under the direction of Mr. Mellon, at the HANOVER-SQUARE ROOMS, on FRIDAY, JUNE 1, 1855, to commence at Eight o'clock precisely, when he will be assisted by—Vocalists: Miss Fiedler Krall (from the Imperial Opera, Vienna), Miss Dolby, and Herr Reichardt. Conductors, Mr. Alfred Mellon and Herr Ernst Pauer. The members of the Highly-distinguished London Deutscher Männer Chor have kindly consented to perform on this occasion Selections from Mendelssohn's "Antigone and Œdipus." Herr Ernst Pauer will play Hummell's Concerto in A flat; and his new Symphony in C minor will be given for the first time.—Stalls, half-a-guinea; Tickets, 7s. each, may be had at the principal Music Warehouses, and of Herr Ernst Pauer, 32, Adrol place West, Pimlico-square

THE LUMINOUS and CHROMATIC FOUNTAIN, 100 feet high, DAILY at the ROYAL PANOPTICON, Leicester-square, at 4 55 and 9 55. The Instructions is open—Morning, 12 to 5, Evening, 7 to 10. Admission, 1s.; Schools and Children, half-price.

WHITSUN HOLIDAYS.—The ZOOLOGICAL GARDENS, REGENT'S PARK, will be OPEN to Visitors EVERY DAY during Whitsun Week, except SATURDAY, on payment of SIXPENCE each person. The Band of the First Regiment of Guards will perform (by permission of Col. Parker) on every Saturday until further notice.

THE ILLUSTRATED LONDON NEWS.

LONDON, SATURDAY, MAY 26, 1855.

THERE was a time—but it is long since past—when the diplomacy of England was one of her strongest points; but, for the last thirty, if not forty, years our diplomacy has been at so low an ebb, that it has been a common remark in all well-informed political circles on the Continent, that in that department Great Britain did not shine; and that no Ambassador was so easily overreached as an English one. But in Russia diplomacy has been a stronger weapon of offence and defence than armies and navies. The Czars have notoriously gained more power, territory, and influence by negotiation than by battle; and why this difference? Simply, because in England we jobbed diplomatic appointments as we jobbed everything else; and, because in Russia, diplomacy was studied as an art, and success in it rewarded by the highest prizes and honours which it was in the power of the State to bestow. Mr. Wyse, who brought before the House of Commons on Tuesday night a motion upon the subject, drew greater attention to what he considers the undue expense of our Diplomatic Staff from Ambassadors and Ministers Plenipotentiary down to Consuls and Vice-Consuls—than to the jobbery displayed in the appointment of their officials. The expense, great as it is, is not in reality the main grievance. Our Ambassadors and Ministers, far from being overpaid, are underpaid for the duties which they are expected to perform—duties in the highest degree delicate, difficult, and important. We will not join in the vulgar outcry against Ambassadors as being merely spies of a superior class, or as men whose business it is to cheat others, but not to be cheated themselves. Ambassadors have nobler duties. The highest functionary of this class should not only be the dignified representative of the wealth, the power, and the honour of the country; but he should be trained in all the arts and qualifications of statesmanship; should be a sound lawyer, an astute and patient and wary special pleader; a man fit to lay down and maintain the highest and noblest principles of action; but fit also to split the straws of logic, to detect a quibble, or to gain a triumph by means of one, if he had an opponent whom he had no other means of defeating. He should be a man all eyes and ears—with a memory to retain, a judgment to sift, and a genius to appreciate, evidence. He should, above all things, be a patriot and a man of honour and intelligence; but, in addition to all this, he should be courteous and urbane, of prepossessing manners, and of generous hospitality; so that all classes of people—his countrymen or strangers—should say of him (whatever might be their differences of opinion on points of policy) that he worthily, agreeably, and splendidly, maintained the reputation of his country. Such qualities as these are not often united, and, when found, are not to be bought for slight and insufficient reward. But Great Britain does not go the right way to work to obtain the services of the best qualified, by natural gifts and by long training, to do honour to themselves and advantage to the State in their arduous and dignified career. The diplomatic service is a huge job from beginning to end. The working men in it, the men who ought to be encouraged and promoted, are miserably underpaid; while the great prizes fall to the lot not always of the most able, but of the most highly connected. Why should young men—whether aristocrats or plebeians—remain in the position of *attachés* to our Embassies without receiving salaries for their services? Surely it is not consistent with the dignity of this Empire to accept gratuitous service? And if dignity be not compromised by such an arrangement—or want of arrangement—it is surely inconsistent with sound policy to employ servants whom we do not openly reward for their services; for we may be assured that, in the long run, such services are the most expensive, as well as the most inefficient. Lord Palmerston opposed the motion for an inquiry into the subject; and Mr. Wyse was weak enough to abandon his motion in deference to the Premier's wishes. But there were other persons in the House who had decided opinions on the urgency of a general inquiry into this branch of the service; and Mr. Wyse's motion, in spite of Mr. Wyse and Lord Palmerston, was carried by a majority of 112 against 57. Thus the House of Commons is pledged to one out of the many subdivisions into which the Administrative Reform may be classed. It is the first, but not the last, or the least important; and if this House of Commons do not take it up in earnest, the next will. Perhaps, too, the advent of a new House of Commons is not quite so distant as a large number of existing members of Parliament—certain not to be re-elected—imagine and wish it to be.

THE spectacle afforded by the ceremonial of Presentation of Medals to the Heroes of the Crimea was not only the most beautiful but the most deeply interesting of all the scenes which war has conjured up among us. Yet the last three years have produced many pageants of an extraordinary character. No one who viewed them will ever forget the majestic sea-processions with which the Sovereign of these islands led forth her grand fleets to the ocean. The departure of regiment after regiment of her gallant soldiers was marked by the assemblage of enthusiastic crowds, and by farewell greetings from Queen Victoria. The Camp at home is in the recollection of all. Later have come the stately hospitalities with which the ruler of France was welcomed to England; and all these spectacles have arisen out of the demands, or the expediencies of a warlike crisis. But no sight had been afforded to us which combined a brilliant military array with a scene of a gentler nature, until the other day, when the Queen received and rewarded her wounded soldiers, and sent them from her presence in all the pride of appreciated service and loyalty.

Details of this interesting ceremonial will be found elsewhere. Its effect upon the army, and upon the classes who will hereafter form the army has been most beneficial. The Queen's kind letter to the wounded in hospital, and the assurance that her sympathies were with them, did much good, as did her Majesty's visits to the sick and disabled. This personal distribution of the badge of honour completes the charm. To have given the silver token in the ordinary manner would have been nothing. The soldier who had merely had to push his way up to a bureau, who was coldly scanned by a clerk, and cross-questioned against the entries in a huge ledger, and finally received his medal, would have gone away with his pulse but slightly quickened, unless with impatience at the ordeal. But to call that soldier to the Royal muster-ground, with all the ensigns of his profession around him, and to lead him up to the presence of his Royal mistress, to receive her smile, her thanks, and her sympathy, together with the testimonial of his service, was to awaken in him all that the sentiment of chivalry can inspire; and to let the people see (we only wish that the arrangements had permitted the humbler classes to witness more of the ceremony) that the common soldier who has received sabre cut, bayonet stab, or wound from a ball, in fighting for his country, will, when the time comes, be called forward by his Sovereign to receive public honour, was a course at once noble and prudent, and one of which the effect has already proved most advantageous.

The effect that was produced upon the soldiers themselves was evident to all who were near enough to the Royal dais to detect the expression of feature. Some of the men went away with the manly composure for which the British soldier is celebrated, others with the ordinary and natural look of gratification. More sensitive natures were there: and over some faces was spread the flush of unmistakable pride, while the eyes of others actually filled with tears, at the kindly look and word of the Queen. After the ceremony, and when the first excitement had passed, a young soldier who had been decorated met a gentleman to whom he was known, and, after displaying the medal, added, with intense heartiness, that, if one thing could have been managed—if the "old folks at home" could only have been brought to see the Queen give that medal to him with her own hand, he would gladly have returned to the Crimea the next day, though it were to die in the first charge upon the Russians. And this was, no doubt, the feeling of hundreds, and one which will be found to have been contagious, and to have spread with electric rapidity through the ranks. Upon the classes from which recruits are taken let the officers charged with that duty tell the influence of that Friday's scene, and say whether the recruiting has not received a stimulus which is not less remarkable than desirable.

We shall not be accused of desiring to propagate the war-spirit, or to encourage the lust for conquest and carnage. But it is scarcely possible even for a peacemonger not to see that at this time war is a necessity, and even he will hardly deny that what a great nation has to do should be done in the boldest and most efficient manner. A new and oppressive levy is at this moment calling forth the hordes of Russia for military enrolment—one man in twelve is demanded—and the enormous force thus to be procured will be rolled down upon the Allies with all the recklessness of those in whose eyes human life is as nothing. How the Russian soldier is made a recent traveller has thus described: "The order for the levy has reached the lord. The selection is not made at random, nor by lot. The lord, assisted by his steward and servants, decides upon the hero. His way to glory is marked out for him the lord knows nothing about him, but has nothing to oppose to the representation of his servants. The unhappy man is dragged from his home, his wife, his children; one-half of his head is shaved from back to front, he is riveted up in heavy chains with the gang of his comrades, and away he is marched to the military dépôt." Against an enemy who can renew his ranks in this fashion, and who vaunts of the successes of this very war, in the teeth of the fact that the blood of a quarter of a million of his soldiers has been already wasted in the fray, it is something more than expedient that rulers who have no such infernal power, and who can but call upon freemen to array themselves in the ranks, should call in their best voice, and urge their best incentive. To animate those who are already in the struggle, and to gather to their aid those who are needed to reinforce them, what better thing can be said, what better promise can be held out, than that their deeds, both of strife and endurance, shall be watched by their grateful country, and be rewarded, in that country's name, by their admiring Queen. This, and the still dearer assurance that for the loved ones of those who may fall in the battle of liberty, the Queen and the nation unite to provide, are all that England can offer to her citizen-soldier beyond the ordinary recompense of his service. But we have that faith in the British nature which induces us to believe that this will be amply sufficient; and that, if Providence is pleased to decree that for months, or even years to come, freemen and slaves are to join for the death-grapple, there will be no want of noble fellows who, having manfully done their duty, will present themselves from time to time before their Sovereign to receive at her hand the Order of the Crimea.

LATEST INTELLIGENCE.

THE PROJECTED CAMPAIGN IN THE CRIMEA.

From an article in the *Constitutionnel* of Thursday, it appears that the recall of the expedition to Kertch, was in consequence of a new plan of campaign, suggested by General Pelissier and approved of by the Emperor, which rendered the occupation of that place comparatively unimportant. Speaking of the proposed campaign, it says:—

The Generals-in-Chief have considered it necessary to summon together all their forces. The reserves of the Camp of Maslak have proceeded to the Crimea. General Pelissier has therefore now under his orders 120,000 effective men; Lord Raglan has 30,000; and, adding to these the 15,000 Piedmontese, the Egyptian division of 10,000, and the 50,000 under Omer Pacha, the whole makes up a total of 210,000 combatants. It will be therefore seen that in leaving 80,000 men to continue the siege and to cover its operations, and a sufficient corps to protect Eupatoria—the fortifications of which have been considerably extended and strengthened—the Generals-in-Chief will still have at his disposal 130,000 men and 200 field-pieces to attack the Russian army and strike a decisive blow. It may be readily comprehended that, in such a situation, and on the eve of important events, the Commander-in-Chief should wish to have at hand all their disposable forces, and that they should have regarded an attack on Kertch as without importance, as compared with what the return of fine weather will allow them to accomplish. This explains the recall of the expedition to Kertch, which had drawn 10,000 picked troops from the Allies, and taken away means of transport which had become necessary.

THE VIENNA CONFERENCES.

A telegraphic despatch from Vienna states that a Conference will be held to-day (Saturday) between the Austrian, English, French, and Turkish Plenipotentiaries; and another on Monday, at which Prince Gortschakoff and his colleague will be present

The *German Journal* of Frankfort quotes letters from Vienna of the 20th, from which it appears that the Austrian Cabinet had not, up to that date, received any official communication of the note of Count Nesselrode of the 30th ult., addressed to the German Courts, and promising them the observance of the two first points by Russia, on condition of their persisting in their neutrality. The correspondent adds, that Count Buol is about to remedy this want of courtesy by issuing an Austrian circular to the German Courts, in which he will show that not only the first two points, but the others also, are of the utmost importance to German interests.

A MILITARY REVOLT IN SPAIN.

A military revolt took place at Saragossa on the 22nd inst., by some Carlist soldiers belonging to a cavalry regiment shouting through the public thoroughfares, "Long Live the King!" The Queen's troops were immediately ordered out in pursuit, but the result is not known. An ex-Carlist chief, who entered the Queen's service after the Convention of Bergara, deserted with sixty men of the garrison. Navarre and the Basque provinces are tranquil.

THE COURT.

After a succession of brilliant hospitalities in London, the Court has left town for a few days for the Isle of Wight.

The State Concert on Friday se'nnight was followed on Saturday by a Drawing-room, to celebrate her Majesty's Birthday, at which the attendance of ladies and gentlemen was very numerous.

On Monday her Majesty held a Privy Council at Buckingham Palace, at which the Earl of Clarendon and Earl Granville had audiences of her Majesty. In the afternoon the Queen visited the Duchess of Gloucester at Gloucester-house; and in the evening her Majesty had a dinner party, the company at which included the Duchess of Kent, the Princess of Hohenlohe-Langenburg and the Princess Adelaide, Prince Ernest of Leiningen, the Duke and Duchess of Argyll, Viscount Torrington, and Major-General the Hon. J. Scarlett.

On Tuesday Prince Albert left Buckingham Palace, attended by Captain Du Plat, at a quarter past eleven o'clock, for the purpose of inspecting the troops in progress for the Camp at Aldershott. The Queen left Buckingham Palace, at twenty minutes past two o'clock in the afternoon, for her marine residence, in the Isle of Wight. Her Majesty was accompanied by their Royal Highnesses the Prince of Wales, the Princess Royal, Prince Alfred, the Princesses Alice, Helena, and Louisa, Prince Arthur, and Prince Leopold, and their Serene Highnesses the Princess of Hohenlohe-Langenburg and the Landgrave and Feodore of Hohenlohe. The Royal suite consisted of the Marchioness of Ely, the Hon. Beatrice Byng, Major-General the Hon. Charles Grey, the Master of the Household, Major-General Buckley, and Mr. Gibbs. The Royal party was escorted by a detachment of Carbiniers to the private station at Nine Elms of the London and South Western Railway. The Queen left her departure by a special train. Her Majesty stopped at Farnborough station, where she was joined by Prince Albert, who accompanied the Queen to Osborne, where the Royal party arrived at a quarter-past six, o'clock

On Wednesday her Royal Highness the Duchess of Kent arrived at Osborne on a visit to the Queen

The Marchioness of Ely has succeeded the Countess of Gainsborough as the Lady in Waiting to the Queen. Lord Waterpark and Mr. F. Cavendish have relieved Lord Camoys and Major-General Berkeley Drummond in their duties as the Lord and Groom in Waiting to her Majesty.

THE BIRTHDAY DRAWINGROOM.

The Queen held a Drawingroom in celebration of her Majesty's birthday, on Saturday afternoon last, in St. James's Palace. The Court was attended by about sixteen hundred ladies and gentlemen. Her Majesty and Prince Albert, with the Princess Royal, arrived from Buckingham Palace, attended by the Ladies and Gentlemen in Waiting, and escorted by a detachment of the Life Guards, soon after two o'clock. The great officers of State received the Queen and the Prince, and attended her Majesty to the Royal closet. The Duchess of Cambridge, the Hereditary Grand Duchess of Mecklenburg-Strelitz, the Princess Mary, and the Duke of Cambridge were present, and were received by the Vice-Chamberlain. The Princess of Hohenlohe-Langenburg, the Princess Adelaide of Hohenlohe, and the Prince Ernest of Leiningen, were also present.

The Lord Chancellor arrived in state at two o'clock, wearing his gold robe, and attended by his Serjeant-at-Arms, and the Purse and Train Bearer. The other Equity Judges present—viz., the Master of the Rolls, Vice Chancellor Kindersley, and Vice-Chancellor Page Wood—also appeared in their gold robes. The Speaker of the House of Commons arrived in state, wearing his gold robe, and attended by the Serjeant-at-Arms, the Chaplain, and the Secretary. The day was observed as a Collar day. The Marquis of Lansdowne, the Marquis of Exeter, the Earl of Aberdeen, and Earl Spencer, wore the Garter and the Collar and Star of that most noble order. The Earl of Aberdeen also wore the Collar of the Thistle. The Duke of Atholl, the Marquis of Breadalbane, the Earl of Elgin, and Lord Panmure wore the Collar and Star of the most ancient Order of the Thistle. The Earl of Listowel, and other Knights, wore the Collar and Star of the Most Illustrious Order of St. Patrick. Viscount Palmerston, Viscount Hardinge, Viscount Combermere, Viscount Gough, Sir George Grey, Sir John Burgoyne, and a number of other Knights Grand Cross, wore the Collar and Star of the Most Honourable Order of the Bath. Viscount Falkland and Lord Adolphus Fitzclarence wore the Collar and Star of the Hanoverian Guelphic Order. Lord Campbell, the Lord Chief Justice of England, wore his Official Gold Collar of SS. The Ministers and gentlemen in office wore the full dress official costume, and all the officers of the household of the Queen and the Prince appeared in the full dress household uniform

His Grace the Archbishop of Canterbury delivered an address of congratulation to her Majesty on the auspicious return of her birthday. The Queen and the Prince then entered the Throne room, accompanied by the Princess Royal, the Duchess of Cambridge, the Hereditary Grand Duchess of Mecklenburg-Strelitz, the Princess Mary and the Duke of Cambridge, the Princess of Hohenlohe-Langenburg, the Princess Adelaide of Hohenlohe, and Prince Ernest of Leiningen. The ladies and officers of the Royal household took their usual stations near the Sovereign on each side of the throne.

The Queen and Prince Albert, accompanied by the Princess Alice, the Princess of Hohenlohe-Langenburg, Princess Adelaide of Hohenlohe, and Prince Ernest of Leiningen, honoured the Royal Italian Opera with their presence in the evening.

The illuminations in the evening were very brilliant. Viscount Palmerston, the Marquis of Breadalbane, the Duke of Wellington's, and Viscount Canning's mansions were conspicuous. The club-houses and theatres were, as usual, radiant with loyal and patriotic devices. The metropolis as well as the palace and mansions, of the Royal Panopticon, Leicester square, was covered by a series of gas lanterns, exhibiting the three colours now so popular

His Serene Highness Prince Ernest of Leiningen left the residence of the Duchess of Kent, Clarence-house, St. James's, on Monday evening, to join the fleet in the Baltic.

The Countess Colloredo has issued cards for a grand ball at Chandos-house, on Wednesday next.

The Countess of Derby had an assembly last evening (Friday), at the new family mansion in St. James's-square. The reunion was brilliantly attended.

The Earl De Grey, as President of the Institute of British Architects, had a conversazione at his mansion in St. James's-square, on Friday, of the members of the various literary and scientific institutions in the metropolis.

OBITUARY OF EMINENT PERSONS.

WILLIAM FRANCIS SPENCER PONSONBY, LORD DE MAULEY.

THIS nobleman died on the 16th inst., at his residence in St. James's-place, aged sixty-eight. He was the third son of Frederick, third Earl of Bessborough, by Lady Caroline Cavendish, his wife, eldest daughter of the third Duke of Devonshire. For many years antecedently to his elevation to the Peerage, he had a seat in the House of Commons—first for the borough of Dover, and subsequently for the county of Dorset. His politics were always Whig. In 1838 he obtained the Barony of De Mauley, a title adopted from the circumstance of his wife being one of the coheirs of the old barony of Manley, which originated in a writ of summons bearing date as early as A.D. 1295. Lord De Mauley married, 8th August, 1814, Lady Barbara Ashley Cooper, only child of Anthony, fifth Earl of Shaftesbury, by Barbara, his wife, daughter and heir of Sir John Webb, Bart.; and had by her, who died 8th June, 1844, two surviving sons, and one daughter—viz. Chas. Sackville-Frederick-Ashley Cooper, present Peer, who was born in 1815, and is married to the fourth daughter of the late Earl of Bessborough, the Hon. Ashley George John Ponsonby: and Frances-Anne Georgiana, Lady Kinnaird.

WILLIAM RASHLEIGH, ESQ., OF MENABILLY, CORNWALL.

MR. RASHLEIGH, of Menabilly, formerly M.P. for Fowey, died on the 14th inst., at his seat in Cornwall, in the 79th year of his age.

The Rashleighs, of Menabilly, are a younger branch of the ancient family of Rashleigh, of Rashleigh—descend from John Rashleigh, Esq., who was M.P. for Fowey 31 and 35 Elizabeth, and erected the mansion at Menabily, the beautiful seat at which the family have continued ever since to reside. The gentleman whose decease we record succeeded to the estates at the death of his uncle, Philip Rashleigh, Esq., M.P., whose collection of minerals formed the most splendid cabinet of that description in Europe.

Mr. Rashleigh married twice: first, Rachael, daughter of William Spry, of Penhouse, Esq., of Trebana, by whom he had no issue; and, secondly, Caroline, daughter of Henry Hunnam, Esq., of Ivychurch, Wilts, by whom he leaves, with other issue, a son and heir, the present William Rashleigh, Esq., of Menabilly, formerly M.P. for Bodmin, who is married to the Hon. Catherine Stuart, sister of Lord Blantyre.

WILLS AND PERSONALTY.

WILLS AND PERSONALTY.—The will of the most Hon. Maria, Dowager Marchioness of Downshire, was proved in London, under £10,000 personalty; Jack Perry, Esq., of Warwick-house, Norfolk, £30,000; Sir George Head, £7000 personalty; Rev. John Allen, M.A., Dinsdale, £14,000; Henry Parker Collett, Esq., Aldwych-hall, £30,000; Charles Prickett Rushall, silk merchant, Cheapside, £30,000; Henry Bevington, Addiscombe, Surrey, £40,000; Thomas Stead Carter, Esq., of Holborn, £50,000. The wealthy William Williams Hope, Esq., formerly of Paris, but late of Rashleigh and Trevorrick, by his will personalty all his real and personal estate to Vere Hodgkinson Crosby, of Dover; and by a codicil has left £2,000 to Madame Claudine de Vernaux, of Paris; and £15,000 to Amelie Chanteau Sasson, also of Paris, and other legacies of less amount.

NOTE.—The sign – denotes below the average and the sign + above the average.

The reading of the barometer decreased from 30·07 in. at the beginning of the week to 29·81 in. by the morning of the 20th; increased to 29·90 in. by the afternoon of the same day; decreased to 29·72 in. by the afternoon of the 21st; increased to 29·82 in. by the 22nd; decreased to 29·73 in. by the 24th; and increased to 29·76 in. by the end of the week. The mean for the week, at the height of 82 feet above the level of the sea, was 29·858 inches.

The mean temperature of the week was 51·6°, being 2·1° below its average value.

The range of temperature during the week was 33·3°, being the differences between the lowest reading of the thermometer, 36·7° on the 18th, and the highest, 70°, on the 24th.

The mean daily range of temperature during the week was 21·7°. The greatest was 27·3°, on the 24th, and the least 13·3° on the 21st.

Weather throughout the week has been fine and dry, and the sky partly covered with cloud.

Lewisham, May 25, 1855. JAMES GLAISHER.

HEALTH OF LONDON.—During the week ending May 19, the births registered in London were equivalent to the number 1,000 in a year of these, 870 were boys, and 836 girls; the average numbers for the twentieth week of the year, from the records of ten years, were 736 boys and 721 girls. The number of deaths registered during the week was 1143: of these, 676 were males, and 523 females. The number last week was 1678, so that a very slight improvement in the public health is taken place; they still, however, show a mortality above the average. The number of deaths due to the 20th week of the year is 1088. The deaths returned last week are 55 in excess of the number obtained by calculation. Small-pox exhibits a sudden increase; the deaths from it, which were 16 and 28 in the two previous weeks, rose last week to 45. The disease appears to prevail in Shoreditch more than in any other part of London.

THE SONS OF THE CLERGY.—The two hundred and first anniversary of the above corporation was celebrated on Wednesday by the annual religious ceremonial in St. Paul's Cathedral. In the evening the friends and supporters assembled in Merchants' Hall. A sub-scription dinner in behalf of the charity was made. The amount raised by the sermons, subscriptions, legacies, &c., during the year, was upwards of £3000, which was the largest amount ever contributed, with the exception of the year 1853.

MAINE LIQUOR LAW.—On Monday night a public meeting, respectably attended, was held at St. Martin's-hall, convened by the Irish and English Alliance for the Total Suppression of the Traffic in Intoxicating Liquors throughout the United Kingdom. The object of the movement. Alderman Sir R. Carden occupied the chair. The Rev. J. Hanson, the Rev. Jabez Burns, D.D., and other gentlemen, having addressed the meeting, a resolution in furtherance of the objects of the meeting was adopted, and also a petition to both Houses of Parliament, praying for the enactment of a law absolutely prohibiting the sale of intoxicating liquors in this country.

INCORPORATED SOCIETY FOR PROMOTING THE ENLARGEMENT, BUILDING, AND REPAIRING OF CHURCHES AND CHAPELS.—A meeting of this society was held at 7, Whitehall, on Monday last, when Sir Gregory Archbishop of Canterbury took the chair. The secretary stated that there eighteen applications for assistance, received since their meeting in last month. Aid was granted from the funds of the society to wards the following objects:—Building churches at Ranlagh, in the parish of Prees, Salop; Coven, in the parish of Brewood, Stafford, and Pitsea, Essex. Towards rebuilding the churches at Scropton, Derby, and Littleton Drove, Cambridge, and Lowe, His enlarging, &c., at Bridgnorth, Salop. St. John the Baptist, Stamford; Sibsey, Lincolnshire; Ingatestone, Essex; Shenfield, Essex; Ruse, Suffolk; Wanstead, near Dunmow, Essex; near Salisbury; and Chelmarsh, Hemingford.

PEACE SOCIETY. The thirty-ninth annual meeting of the Peace Society was held at the Finsbury Chapel, Moorfields, on Tuesday evening. Mr. C. Hindley, M.P., who was called to the chair, said the expenditure already incurred of 80 millions of money on the present war, and the sacrifice of nearly half a million of lives, ought to be sufficient to convince the people that war is a great curse, and ought, by every means, to be avoided. After urging that the principles of the Peace Society were right and true in the proposals for peace, he concluded by impressing upon the meeting the great advantages which would result from the universal acceptation of the principles of the Peace Society. The meeting was afterwards addressed by the Rev. Dr. Davidson, the Rev. Dr. Burns, and other gentlemen, in favour of peace, and in condemnation of the coercive power of the despotic press on the Russian aggression question.

SOCIETY FOR ENGLISH CHURCH MISSIONS TO THE ROMAN CATHOLICS.—The annual meeting of the members of this society was on Tuesday held at the Hanover-square Rooms; the Right Hon the Earl of Shaftesbury in the chair. The report stated that the income of the society, from its formation, in the summer of 1853, to the 31st December of the same year, was £964 13s. 5d. The income in the year 1854 was £1062 2s. 3d., and for the first four months of 1855, £220. A considerable portion of the above was the result of sermons and meetings in London, Brighton, Bristol, Oxford, Cambridge, Hull, Newcastle-on-Tyne, and several smaller places. A far larger amount was required to carry on the present work of the society, and to respond to the many pressing calls from clergymen in different parts of the kingdom for missionary agency of various kinds. The report was adopted, and a resolution made in addition to the funds of the institution

BURFORD'S PANORAMA OF SEBASTOPOL.

MR. BURFORD has just completed a Panorama of Sebastopol, and the ever-memorable battle-field which now surrounds it, executed upon a scale of magnitude, and with an elaborateness of detail, worthy of the subject. It was exhibited on private view on Tuesday and yesterday, and will be opened to the public on Monday.

The View is taken from the centre of the vast plateau occupied by the Allied armies, on the south side of the city, overlooking the gorge which separates the English from the French works, and which terminates in the Military Harbour. Immediately beneath the spectator, looking in the direction of the opposite position, is seen in formidable relief the famed Three-gun Battery, manned, and at work, executed upon such a scale as to give a life-like idea of the science and labours of siege operations. Thus, while the guns are being loaded and fired, we observe here and there men leaning against the parapet, peering through glasses at the operations of the enemy; in another place a poor fellow has fallen, wounded by a splinter from the top of the parapet, which one of the enemy's balls has just struck. Already at hand are seen advancing the fatigue party, with the stretcher or bier, preparing to remove the hero's body from the field. Looking beyond this grim episode of war, we trace the outline of the "approaches" which hem in this side of the besieged city; and the light and scattered smoke arising from which shows that the assailants are not inactive; whilst further, in the middle distance, are clearly defined the Mulakoff Tower and Battery, the Redan Battery, the Flagstaff Battery, and the whole line of earthworks which the besieged have so skilfully thrown up—chiefly in the interval between the occupation by the Allies of their position south of the town, and the opening of their fire. High above this sparkle the white walls of the churches and other build ngs of the town itself; and beyond these frown—though, by the aid of distance, mildly—the redoubtable Forts Alexander and Constantine, and the no less redoubtable Wasp Fort. In short, the whole of the details, both city itself and its defences; and of the offensive work of the Allies, are laid out in a manner which cannot fail of rendering the operations of the siege and its difficulties perfectly plain to all who will give themselves the trouble to examine them by the aid of the published "Description."

Turning now gradually round to the right, towards the east and south, we observe the bold gorge of the Tchernaya, which effectually shuts out of view the mountain side of the town; the bold mountain range being terminated with silvery brightness; then the ravine which shuts in Balaklava, and lastly Kamiesch Bay, the landing-place and "base" of operations of our French allies. The general surface is dotted with tents of the combined armies, and groups of officers of all grades and services. In short, the whole of the details, both city itself and its defences; and of the offensive work of the Allies, are laid out in a manner which cannot fail of rendering the operations of the siege and its difficulties perfectly plain to all who will give themselves the trouble to examine them by the aid of the published "Description."

MONETARY TRANSACTIONS OF THE WEEK.

(From our City Correspondent.)

Although the actual money business transacted in national securities this week has been by no means extensive, the market has ruled active, and prices have steadily advanced; the Three per Cents having touched 9¼. The principal causes of the advance in the quotations are the favourable nature of the late returns, the large arrivals of bullion, and the rapid increase of gold in the Bank of England, together with the prospect of money becoming cheaper. Another cause—which, it is supposed, will induce holders to invest in Consols—is the production of comparatively little money in the country, in the event that the interest on Exchequer Bills, to be renewed on the 11th of June, will be reduced from its present rate of 2½d. per day to 2d. This reduction, which is equal to 7s. 7d. per annum, will effect a saving of about £30,000 per annum in the public expenditure; and the future rate will, consequently, be £3 0s. 10d. per annum. The advices from the manufacturing districts are more favourable than for some time past, and it is generally thought that there will shortly be an increased demand for accommodation. This would in most favourable, as the Reserve in the Bank of England is now over £10,000,000; and the Bank of Bullion is upwards of £16,000,000. A considerable amount of capital is now unemployed in Lombard-street, notwithstanding that first-class bills have in some instances been discounted as low as 2½ per cent. The arrivals of the precious metals have been trifling; but the imports have been very extensive, about £300,000 having arrived from Australia, nearly £600,000 on passage—£96,471 from the West Indies, and £120,000 from New York. As nearly the whole of these imports have been directed to the Bank, next week's returns will no doubt show a further excess in the supply of gold.

The Committee of the Stock Exchange have resolved that, on and after the 16th of June, efficient arrangements shall cease on Saturdays at one o'clock, instead of two o'clock, as at present.

On Monday the Consol Market was firm; prices, however, were scarcely improved during the day. Three per Cents Reduced were 92¾; the New Three per Cent Consols, 92¾; the New Three per Cents, 89¾; and Consols for Account, 93½. Long Annuities, 1885, were 19½. India Stock was last 259, and the Bonus ditto 21 per cent. Exchequer Bills, 4s. to 7s. prem.; Exchequer Bonds, 100. There was a steady market on Tuesday, and prices realised, in regard to the Three per Cents for Transfer having reached 93½. Bank Stock was fixed at 209. The New Three per Cents opened 89¾, and the Reduced Long Annuities, 1860, 4¼. India Stock, 261; and the Consols, for Exchequer Bills, 10s. to 12s. prem.; Ditto, Advertised, 4s. to 7s. Exchequer Bonds were at par. Another advance took place in Consols on Wednesday, when the Three per Cents were done at 91¾, after marking 93. The Three per Cents Reduced were up to 93, and the New Three per Cents, 90. Long Annuities, 1860, 4 1-16. The Bonus was 22 per cent. Exchequer Bills, 10s. to 12s. prem. Exchequer Bonds, 100. The Stock Market was dull on Thursday, most of the speculators awaiting the result of the debate on the war in the House of Commons. Consols for Account, 93½ ⅜. The New Three per Cents realised 90½ ⅛; and the Three per Cents Reduced, 89½ ⅝. Exchequer Bills, 10s. to 12s. prem.; and India Bills, 10s. to 12s. prem. Bonus, 22 per cent. The Long Years' Annuity marked 19.

All Foreign Bonds have been in good request, and prices have steadily improved. Danish Five per Cents have sold at 101; Mexican Three per Cents, 24; Spanish New Deferred, 18; Turkish Bonds, 78; Dutch Two-and-a-Half per Cents, 64; Ditto Four per Cents, 92; Sardinia's Five per Cents, 87; Brazilian Four-and-a-Half per Cents, 85; Portuguese Four per Cents, 43½; Venezuela Three-and-a-Half per Cents, 18½; Russian Five per Cents, 86; Russia Five per Cents, 96; Belgian Four-and-a-Half per Cents, 93. The Corporation of London's Loan of £1,000,000 at 4 per cent, which was issued on the 14th inst. was £36,935,000, showing a decrease in the amount subscribed, compared with the previous month, of £33,065; and a decrease, compared with the first day, of £2,000.

Joint Stock Bank Shares have been very firm, and prices have had a tendency upwards.

The Market for Railway Shares has been firm, and the quotations have had a rising tendency. The following are the official prices on Thursday:—

ORDINARY SHARES AND STOCKS.—Aberdeen, 22½; Ambergate, Nottingham, and Boston, 12½; Caledonian, 63; Dundee, 62½; Dundee and Perth, 45½; Eastern Counties, 15; Eastern Union, 11¾; Great Northern, 92; Ditto A Stock, 77; Great Western, 67; Lancashire and Yorkshire, 78½; Lancaster and Preston, 109½; London and North-Western, 103½; London and South-Western, 90; Manchester, Sheffield, and Lincolnshire, 51; Midland, 71; Ditto, New, 87½; Newcastle and Berwick, 74; Ditto York, 48½; North Staffordshire, 9½; Oxford, Worcester, and Wolverhampton, 22½; South Devon, 13; South Wales, 93.

LINES LEASED AT FIXED RENTALS.—East Lincolnshire, 134; Manchester, Buxton, and Matlock, 2½.

PREFERENCE SHARES.—Great Northern Four-and-a-Half per Cent, 102; Ditto Original Stock (Great Western), 74; Oxford, Worcester, and Wolverhampton, 107; South-Eastern (Reading), 23; Waterford and Kilkenny, 6½ per Cent, 1½.

FOREIGN.—Antwerp and Rotterdam, 7½; Dutch Rhenish, 8¾; Eastern of France, 35¾ ex div.; East Indian Five per Cent, 94½; Grand Trunk of Canada, 9½; Great Central of France, 12½; Great Luxembourg, 2¾; Great Western of Canada Shares, 21½; Lyons and Geneva, 14½; Namur and Liége, 9½; Northern of France, 36¾; Western of France, 23¾.

MINING SHARES have been firm:—Copiapo, 2¾; Santiago de Cuba, 5¾; United Mexican, 8½

Friday Evening.

There has been a good business doing in Consols to-day, at a steady advance in the quotation. The Three per Cents have touched 91½ ⅜; the Three per Cent Reduced, 89½ ⅛, and the New Three per Cents, 90½ ⅜. Foreign Bonds and Railway Shares are very firm, and dearer.

THE MARKETS.

CORN EXCHANGE (Friday).—Very few arrivals of English wheat have been received up to our market this week, and owing to bad harvest weather the show of corn here to-day is very limited. On sale to the 'Change was a scanty supply of fine, however, prices rather to advance than vary on Monday, the present week. In foreign corn the quantities on the Russian coast was fixed. Upwards of 30 000 quarters of wheat are now on the way. High qualities were firm, all quite as dear as last week. Inferior parcels were dull and heavy. Barley was a trifle above the late rates, and the value was fully as high as last week. Malt was in fair supply and steady demand, full prices. We have had a fair supply for oats last week, and a downward tendency. Beans were a shade lower, and very dull. Peas sold slowly at late rates.

ARRIVALS.—English wheat, 1940 quarters; barley, 3960 malt, 5747; oats, 1773; flour, 1793. Irish oats, 4600. Foreign wheat, 37 920; barley, 10 720; oats, 32 720; flour, 11 760 sacks.

ENGLISH.—Wheat, Essex and Kent, red, 72s. to 78s.; ditto white, 77s. to 80s.; Norfolk and Suffolk, red, 70s. to 77s.; ditto white, 74s. to 84s.; grinding barley, 32s. to 33s.; distilling ditto, 35s. to 36s.; malting ditto, 38s. to 43s.; Lincoln and Norfolk malt, 68s. to 70s.; brown ditto, 66s. to 68s.; Kingston and Ware, 68s. to 70s.; Chevalier, 70s. to 72s.; Scotch ditto, 70s. to 72s.; potato ditto, 37s. to 38s.; Peterboro', 37s. to 38s.; Tweeds, 34s. to 36s.; oats, 20s. to 22s.; ditto, white, 26s. to 28s.; Lincolnshire and Yorkshire, 24s. to 25s.; Scotch ditto, 24s. to 27s.; ditto, white, 26s. to 28s.; Poland ditto, 24s. to 25s.; Russian ditto, 24s. to 25s.; beans, Ticks, 36s. to 37s.; old ditto, 36s. to 38s.; new ditto, 34s. to 36s.; harrow ditto, 36s. to 38s.; peas, White boilers, 36s. to 38s.; maple, 36s. to 38s.; grey peas, 37s. to 40s.; flour, town-made, 50s. to 52s.; suffolk ditto, 50s. to 52s.; Essex and Kent, 50s. to 52s.; Yorkshire, 48s. to 50s.; Scotch, 50s. to 52s.; American, per 196 lbs. to 3s. per barrel.

SEED.—We have scarcely any change to notice in the value of any kind of seed, but the

Linseed, English, sowing, 72s. to 76s.; Baltic crushing, 70s. to 72s.; Mediterranean and Odessa, 62s. to 66s.; hempseed, 48s. to 56s. per quarter. Coriander, 9s. to 24s. per cwt. Brown mustard-seed, 12s. to 14s.; white, ditto, 8s. to 12s.; tares, 8s. to 9s. per bushel. English rapeseed, £33 0s. to £35 0s. per last of ten quarters. Linseed cakes, English, £13 0s. to £13 10s.; ditto, foreign, £11 0s. to £12 0s.; rape cakes, £6 0s. to £6 10s. per ton. Canary, 48s. to 56s. per quarter. Red clover-seed, English, 38s. to 46s.; white ditto, 5s. to 7s. per cwt.

Bread.—The prices of wheaten bread in the metropolis are from 10d. to 10½d.; of household ditto, 9½d. to 9½d. for four-pound loaf.

Imperial Weekly Average.—Wheat, 76s. 1d.; barley, 34s. 7d.; oats, 22s. 9d.; rye, 44s. 3d.; beans, 40s. 8d.; peas, 42s. 4d.

The Week Ending Wheat, 78s. 8d.; barley, 34s. 7d.; oats, 24s. 11d.; rye, 44s. 3d.; beans, 42s. 8d.; peas, 39s. 9d.

English Gazette Sold last Week.—Wheat, 97 872 quarters; barley, 20,510 ditto, 12,515 ditto; oats, 4,215 ditto, 128 quarters.

Tea.—We have no less money business to report this week, and last week's sales were very limited. Common congou continues selling at 8½d. per lb.

Sugar.—There has been rather an active inquiry for nearly all kinds of raw sugar, at a steady, and refined goods are dull. Grocer Brown Lumps, 47s. 6d.; grocery, 48s. to 49s. per cwt.

Coffee.—The business doing in this article is on a very limited scale, and the quotations are without alteration. Ordinary Ceylon, 48s. to 49s.; middle and fine ditto, 50s. to 52s.; Mocha, 60s. to 62s.; Jamaica, 50s. to 52s.; Costa Rica, 48s. to 50s.; Cuba, 46s. to 48s.; Plantation Ceylon, 50s. to 52s.; Java, 48s. to 50s.; Brazil, 44s. to 46s.; Ceylon, 46s. to 48s.; Cuba, 44s. to 46

NEW BOOKS, &c.

TESTAMENT, NEW. Containing 2 Panoramas and 12 fine Engravings. 2s.
The above Series of Educational Works is intended to supply, at the cheapest possible rate, books adapted for Schools and Private Scholars. The old system of instruction, by which the masses of things only were presented to the mind of the pupil, has long been discarded as more than inconvenient. With the young it is necessary to speak to the eye as well as to the understanding; a picture is as good as a description; and the adoption of which principle renders it not only by far the most effective, but also far less irksome to the teacher, and more pleasant to the pupil. The great success which has attended the works published in this Series, is a sufficient proof that such assistance was required.
Published by HERBERT INGRAM and Co., 198, Strand, London

TO LADIES.—A MODEL to ILLUSTRATE PRACTICAL DRESSMAKING (Copyright Invention).—Mrs HARRETT (Established 1840) has published a Model to impart, without the aid of a master, perfect method of fitting and making dresses in the French and English styles. For this model, combined with Practical Instructions and Patterns, apply to Mrs Harrett, 6, Upper Berkeley-street, Portman-square. Price 7s 6d; sent by post, free, on receipt of an order for 8s. 6d., payable in Oxford-street, to Susan Harrett. Invaluable to Ladies' Maids.

GENUINE COCOA of the FINEST QUALITY.—Cocoa has been designated by physicians of eminence as one of the richest productions of the vegetable kingdom, and, when properly prepared, is justly considered to be peculiarly invaluable nutritive properties. So keen, however, has been the avidity to render this article a lucrative manufacture, and so strenuous the competitive efforts thereby excited, that the most flagrant adulterations have been resorted to.
To evils with which so baneful a system is fraught are strikingly manifested in the debilitated condition of the human race. Cocoa (in its pure state) as an article of diet, frequently recommend it to invalids as a restorative, and in promoting health. The results are, however, too often rendered nugatory by the impurity of the article supplied.
The magnitude of our legitimate business as tea-dealers necessarily precludes our devoting a strict supervision to the manufacture of Cocoa we have, therefore, completed arrangements with the highly-respectable firm of Messrs. Henry Thorne and Co., Leeds, who has many years' experience in the preparation of the article, and place unremorseful determination to manufacture only from the choicest nibs, and to rigidly eschew adulteration in any shape, warranting it to be unmixing their "Genuine Trinidad Cocoa" (in 1lb packets only).
SIDNEY, WELLS, and CO., Family Tea-men, 8, Ludgate-hill.

London: Printed and Published at the Office last named in the Parish of St. Clement Danes in the County of Middlesex, by WILLIAM LITTLE, 198, Strand, aforesaid.—SATURDAY, MAY 26, 1855.

THE ILLUSTRATED LONDON NEWS

No. 745.—VOL. XXVI.] SATURDAY, JUNE 2, 1855. [WITH A SUPPLEMENT, SIXPENCE.

THE WAR AND THE PARLIAMENT.

THE debates which took place in the House of Commons, on Thursday and Friday last, have already lost much of their interest. Important as they were, the occupation of Kertch and Yenikale, and the lines of the Tchernaya, have thrown them into the shade. It is with the sword of the soldier, not with the tongue of the orator or the pen of the diplomatist, that the great business of the world is to be settled. If things go right in the battle-field, it is of little consequence how parties and factions may squabble at home; but if there be gloom in the Camp and want of success by land or by sea in the distant theatres of our operations, the strife of parties in the Legislature at home will grow in bitterness and in importance. So it has ever been, and so it will continue to be until the day possibly not far distant—when the war shall be brought to a close by the signal discomfiture and humiliation of Russia, and the assertion by the victorious fleets and armies of Great Britain and France of the Supremacy of Right over Wrong, and of Civilisation over Barbarism.

But things have "taken a turn," both in the Camp and the Council. In the hour of their triumph it should not be forgotten that the brave soldiers of the Allies never, even in the midst of suffering, and privation, indulged in the gloomy anticipations too prevalent in England. They steadily refused to disbelieve in failure—and asked for nothing but for an opportunity to measure their strength against the foe. After long and inevitable delays, the opportunity has presented itself; and the new campaign has been inaugurated, like the old, with a signal victory. From the first landing of the Crimean expedition in the Bay of Kalamita to the date of the latest telegraphic despatch from head-quarters, the Allies, in every combat, provoked or accepted by the enemy, have achieved a brilliant, though in some cases an infructuous, success. Public opinion was not slow to recognise their bravery; and the enthusiasm of all classes expected achievements still more brilliant, and results still more decisive, whenever the occasion was afforded them. These anticipations have been partially realised; and the operations that are immediately to be, or have already been, attempted, will prove that the public have not expected too much from the heroism of Englishmen and Frenchmen. The seizure of Kertch and Yenikale, and the defeat of the Russians on the lines of the Tchernaya—events which were almost simultaneous—not only reflect the highest glory upon the Allied arms when considered without reference to ulterior results, but lead irresistibly to the inference that a great and decisive battle will ere long be fought on the outside of Sebastopol. Of the result of that battle the immortal memories of the Alma, of Balaclava, and of Inkerman, forbid us to doubt. The complete investment of the fortress, which is certain to follow a victory achieved by our arms, will seal the fate of Sebastopol, and wrest from Russia something better than the word of the Czar or his signature to a treaty. Such are the events of which, from day to day, the public may expect to hear the commencement and progress, if not the close. In comparison with them, all the Parliamentary palaver of London, and all the unmeaning courtesies of the Conferences of Vienna are of small account. They are dwarfed by the heroism and obscured by the glare of battle. The cause has been put to the issues of combat, and logic is idle if it cannot add force to the cannon-ball, or give courage to the combatants.

But, notwithstanding their relative unimportance, the proceedings which took place in the British Parliament on the motion of Mr. Disraeli, and which will be resumed on one of the many motions awaiting the consideration of the House on its reassembling after the Holidays, cannot be slurred over by those to whom the character of our public men is dear, and who desire that the institutions of England should be not only the pride of Englishmen, as they have hitherto been, but an example to the world. It is par of the reason for the present satisfaction of the public that, in the great councils of the nation, as well as in the battle-field, things have "taken a turn;" and that the Minister who only ten days ago spoke of renewed negotiations at Vienna as possible, and even desirable, has, under the spur of Opposition, spoken out in a manner consonant with public sentiment, and with the dignity and responsibility of his position. Lord Palmerston, having been compelled to declare himself—though it might have been wished that the compulsion had been unnecessary—has definitively refused the consent of his country to the reopening of illusory, and under the circumstances dishonourable, negotiations. He has come out of the region of vague and cloudy phraseologies into the wholesomer atmosphere of plain speaking. So much the better for the Minister, for the Parliament, and for the cause which the Allies have undertaken. Mystification in France or England is strength to Russia, in her outlying bulwarks in Germany. The bolder the speech of the British Government, the greater the hold it has over the timid and the wavering in Germany or elsewhere. If we think the alliance of Austria to be desirable—the way to obtain it is not to talk "soft sawder" and listen to absurd attempts at compromise, but to speak out at home, and to fight hard in the Crimea. The occupation of Kertch is worth a thousand conferences under the presidency of Count Buol; and one vigorous resolution of the House of Commons is worth a "whole wilderness" of protocols.

We have no desire to dwell upon the composition of the majority which rejected the motion of Mr. Disraeli. Whatever may have been the impulse or the objects of the leader of the Opposition in bringing it forward, its result has been of service; for it led to

THE CRIMEA.—TOWN OF KARASU-BAZAR, BETWEEN KERTCH AND SIMPHEROPOL.—(SEE NEXT PAGE.)

the removal of the ambiguity which it asked the House of Commons to condemn. Whether Mr. Disraeli calculated on such a consummation it is bootless to inquire; yet it cannot be denied that the motion had been rendered necessary by the apparent if not real collusion between the Premier and Mr. Milner Gibson and the friends of peace at all price, which was exhibited on the preceding Monday. Another result, which possibly neither Mr. Disraeli nor any one else anticipated from the motion, was the contribution to the history of our time which it elicited from the mouth of Mr. Gladstone. Lord John Russell was no traitor either to his party or his country, in breaking up the Aberdeen Administration. Mr. Gladstone afforded a proof, in his dreary though clever speech, that the man who caused his retirement from the councils of his Sovereign was a public benefactor. How Mr. Gladstone can have reconciled it to his conscience to have remained for one hour, or the fraction of an hour, the member of a War Ministry, is inexplicable to the minds of plain men. To expert casuists like the right hon. gentleman, the thing may seem defensible; but to straightforward people, without mental crooks in their composition, it cannot but appear extraordinary that Mr. Gladstone and his coterie should have deemed it consistent with their duty to remain in office during the continuance of the war. With such men in the Cabinet of the Earl of Aberdeen it is not surprising that the war was starved, that council was distracted, and that the country was brought to the very brink of peril and disaster—if not of disgrace. Mr. Gladstone's revelations have sealed the fate of the Peelites as a party. As individuals they may yet, after the restoration of peace, do their country good service. But as a party they are defunct, both in peace and in war; and will form part of no future coalition—unless, perchance, Mr. Bright should become Minister o War, and Mr. Milner Gibson First Lord of the Admiralty. Of a Cabinet of this calibre Mr. Gladstone might be the Premier; if his modesty did not prompt him to serve under Mr. Bright—the real chief and leader of that class of politicians who would rather win peace by submitting to evil than by resisting the evil-doer.

KARASU-BAZAR.

KARASU BAZAR, the second town of the Crimea, contains a mixed population of about 15,000 inhabitants, including Russians, Greeks, Tartars, Armenians, and Jews. Like many other towns in the peninsula it abounds in ruins and monuments of antiquity. It has been almost entirely rebuilt since the Russian invasion; and in many instances not owing to any scarcity of building materials, but to barbarous spite—the tablet-stones have been taken from the graves of the once honoured Tartar families, and made into walls for the houses of their conquerors. Karasu-Bazar is one of the cheapest and best markets in the Crimea; its principal articles of trade being leather (chiefly morocco), pottery, hardware, tallow, soap, fruits, corn, and vegetables. "The streets of Karasu-Bazar (says a recent traveller) are filthy and ill-paved, and the shops on each side, defended from the heat of the sun by rude verandahs on wooden pillars, are much more picturesque than elegant. Here, as in most Eastern towns, separate districts are allotted to the different kinds of merchandise: in one place the shops are full of white belts, sashes, and pouches, made of embroidered bright red and yellow morocco; further on nothing is visible but woollen goods; to which succeed stores of coarse earthenware; which again give place to cooks and bakers—each having his own peculiar district. Karasu-Bazar possesses the largest corn-market in the Crimea; and the price of wheat, corn, and barley all over the country depends much upon the weekly returns of the current price in this town." In the suburbs of Karasu-Bazar, stand one of those splendid villas which mark the progress of the Empress Catherine's reign in her newly-acquired province, and which sprang up, as if by magic, at every place where she halted. Every town which she intended to honour with her presence was duly informed of that important event; and the inhabitants—not out of love for the Russian rule—set out their houses for the Russian General who had secretly ordered it to be done—worked like galley slaves night and day till they had erected a splendid mansion for her reception. Several of these palaces were destroyed after the departure of the Empress; but of those which remain, the handsomest now belongs to a wealthy Greek—were preserved as memorials of the Imperial visit. They usually consisted of a state bed-room, with a bath adjoining, a chapel, a hall room, reception-rooms, and apartments for her suite. In the neighbourhood rises a mountain of a curious shape, and of various precipices on either side, and a table-land on top, accessible only from one direction. Here the Tartar chiefs and population were accustomed to meet in council during important crises. The surrounding country is picturesque, and is watered by the river Karasu, or Black River, which gives name to the town. The View engraved on the preceding page is from a sketch by Wilhbald Richter

THE FIRST KERTCH EXPEDITION.—The story told in official circles is, that the first expedition set out stasis in the evening. About ten o'clock the same night General Canrobert received a despatch which recommended him to keep his forces together, to undertake nothing for the moment, and to send for the division in the Maslak camp at Constantinople. On the receipt of this despatch General Canrobert thought that he was not justified in allowing a force of 10,000 men to remain detached from his army, occupying ships which would be of great use in transporting the Maslak division to the Crimea. He went to Lord Raglan and expressed to him an opinion that the expedition to Kertch should be recalled. Lord Raglan did not agree with him, and consequently the order was not then given. But at two in the morning General Canrobert received another despatch from Paris stating that orders had been given for the immediate embarkation at Constantinople of the reserve division. He became then so strongly impressed with the necessity of having all his transports, that he took upon himself to send off the steamer immediately to Balaclava, with an order to return to Balaclava. He only informed Lord Raglan of what he had determined to do when the steamer was gone.—*Letter from Paris.*

PUBLIC OPINION IN DENMARK.—His Royal Highness Prince Christian of Denmark has returned from his visit to St. Petersburg, highly delighted, it is said, by the splendid reception he met with, and no doubt decorated with the portrait of some Russian saint set in diamonds, while his suite have had golden gifts showered upon them; and these facts are furthermore said to cause great rejoicing in Russian political circles; for it is not touching to see a petty prince of Holstein-Glucksberg affectionately embraced by the grand Imperial family of Russia! Is it not elevating to see the heir to the throne of Denmark honoured with the intimate friendship of the Russian Court! It is not tranquilising—nay, promising—as regards the future, that the great Eastern Power does not withdraw its grace and favour from Denmark, notwithstanding the majority Western Powers have drawn water, meat, and vegetables from our ports, and have landed their sick on our coasts! The superabundant demonstrations made last year by General Hansen and Admiral Bille have borne fruit. But we feel called upon to declare that the Danish people does not participate in this delight. The Danish people thinks that, however great may have been Prince Christian's grief at the death of the late Emperor, or however lively his joy at the accession of the present, these personal and private feelings ought to have given way to the consideration which he, as elected heir to the throne, owes to the Danish people, to the fear of wounding its feelings, of exposing it to misinterpretation as regards its opinions, and of compromising its position and that of his future kingdom in relation to those Powers whose friendship and confidence it is ever its true interest to possess, but more especially to the great Power which takes the Danish people to entertain some doubts as to whether it did not carry its *insouciance* and its docility too far, when it opened the way to the throne to a Prince whose qualities and tendencies were equally unknown to it—as to whether it has not by so doing sacrificed a great, honourable, and safe future for a degraded existence, externally dependent and internally weak, vacillating and torn by discord. If the history *notabile* of the Danish nobles, as is the case with their organ *Thidsbehannsposten*, will fall down and worship "Holy Russia," and send up ardent prayers for her success, while endeavouring to raise up (though within a narrow circle) brilliant at the present time as the Imperial triumph over the godless West, it becomes necessary that we should from time to time give utterance to the fact, that the friends of Russia in this country are not the friends of the people.—*Fædrelandet, the Organ of the Liberal Party in Denmark*

The gross revenue of Canada for 1854 was £1,522,027. In 1849 it was £513,631; in 1850, £704,234, 1851, £842,184; 1852, £1,153,026; 1853, £1,330,669—it will thus be seen that the revenue of the province has tripled in six years.

A decree in the *Moniteur* admits alcohols distilled in Algeria from the daffodil to be imported into France free of duty.

DESPATCHES FROM LORD RAGLAN.

War Department, May 28, 1855

Lord Panmure has th a day received two despatches, of which the following are copies, and their enclosures, addressed to his Lordship by Field Marshal the Lord Raglan, G.C.B.:—

Before Sebastopol, May 15.

My Lord,—Since my despatch of the 12th instant nothing has occurred worthy of being reported to your Lordship.

The fire has been very slack, and that of the enemy has been directed towards the French works rather than against the English.

The remainder of the 12th Lancers has arrived, and will be disembarked to-day.

All our means are devoted to the landing of the Sardinian troops, which the bad weather had prevented on the arrival of the first ship.

I have found it necessary, in some instances, to land artillery horses at Kazatch Bay, to avoid further crowding the harbour of Balaclava.

I enclose the return of casualties to the 13th instant inclusive.—I have, &c., The Lord Panmure, &c. RAGLAN.

OFFICERS, NON-COMMISSIONED OFFICERS, AND PRIVATES KILLED, FROM THE 11TH TO THE 13TH MAY, INCLUSIVE

Captain—68th Foot: R. L. Edwards
Lieutenant—49th: James Campbell
Privates—2nd Battalion 1st Foot: Patrick Cloonan, Wm Shyles, George Wakefield, re-ported in last return. 4th: John Brett 19th: John Hermes 68th Thomas Ramford, Robert Ashby, John Simmons, William Tailey, Owen McGehee

NON-COMMISSIONED OFFICERS AND PRIVATES WOUNDED FROM THE 11TH TO 13TH MAY, INCLUSIVE

Colour-sergeant—68th Foot: Michael Hampton, slightly
Sergeant—41st Foot: Joseph Hunt, slightly
Corporals—68th: Edward Ralph, Thomas Gilmano, severely. 89th: Michael Lambert, severely
Privates—2nd Battalion 1st Foot: Patrick Carey, severely; Patrick Cunnisky, slightly 4th: Luke Mayhew, slightly. 7th: George Fleming, severely. 19th: Thomas Ash, Edward Fanning, severely. 28th: William Jenkins, Richard Wood, severely. 41st: Georg Williams, Patrick Kelly, severely; William M'Caffey, slightly 34th: George Falwell Alfred Whitaker, George Ashton, dangerously. 47th: Dyer Michael Furbady, severely. 38th: Timothy Tullison, slightly. 46th: William Martin, severely; Samuel Smale, Thomas Smith, slightly. 49th: Thomas Woodcock, slightly 49th: Nicholas Horigan, dangerously; Michael Mullins, slightly 55th: Terry, Charles Faulkner, slightly. 68th: William Perrin Patrick Doyle, Lee Wheenan, Richard Bailey, James Hilton, John Brennan, James Davidson, William Rosh Robert Sandys, William M'Donald, severely; Mark Welch, James Maloy, John Duggan Thomas Duff, William Wadkinson, Bartholomew Joyce, dangerously. Willis Ellis, Charles Ross Thomas Crimmins, Benjamin Campbell, slightly 89th: Joseph Green, severely 97th John Bowland, Clark's Shanston, severely

MISSING FROM THE 11TH TO 13TH MAY, INCLUSIVE
68th: *Private* Robert Woolley

Total 1 officer, 11 rank and file, killed, 2 sergeants, 41 rank and file wounded, 1 rank and file missing.

Before Sebastopol, May 15.

My Lord,—I have the honour to enclose a letter from the Inspector-General of Hospitals, forwarding the weekly report on the sick of the army under my command. I deeply regret to have to draw your Lordship's attention to the fact that cholera has reappeared here, that several cases have died, and that fifty-two men were yesterday labouring under the fatal disease.

The troops had been free from it for several months, and I was in hopes that we should have had no return of it.

General Canrobert informs me that it had never ceased to prevail in the French army in a greater or a less degree.—I have, &c.,
The Lord Panmure, &c. RAGLAN

War Department, May 30, 1855

Lord Panmure has this day received a despatch and its enclosures, of which the following are copies, addressed to his Lordship by Field Marshal the Lord Raglan, G.C.B.:

Before Sebastopol, May 19

My Lord,—I do myself the honour to enclose the list of casualties that occurred between the 14th and 17th inst.

For the last two days there has been hardly any firing on either side. Large convoys have come into Sebastopol from the northern side, but there has been no movement of importance

The heat has been very oppressive since Wednesday.

I deeply regret to have to report that I have just received a letter from General Osten Sacken, in answer to an inquiry I addressed to him on the subject, informing me that Captain Arnold, of the 4th Regiment of Foot, who was wounded and taken prisoner on the night of the 5th, died that same night.—I have, &c.,
The Lord Panmure, &c. RAGLAN.

NON-COMMISSIONED OFFICERS AND PRIVATES KILLED, FROM THE 14TH TO THE 17TH MAY, INCLUSIVE

Corporal—1st Foot: Daniel Sullivan.
Privates—3rd Foot: Charles M'Carthy. 17th: Michael Flaherty. 34th: Simon Rushoy 38th: John Murdoch 40th: Sampson Small 88th: Brigade: Thomas Hall

NON-COMMISSIONED OFFICERS AND PRIVATES WOUNDED, FROM THE 14TH TO THE 17TH MAY, INCLUSIVE

Sergeant—18th Foot: Neil Mac Hunter, slightly
Privates—1st Foot: William Berry, severely. 7th: Edward M'Cowan John Smith John Lynch, slightly. 8th: James Waverly, dangerously; Andrew M'Phersan, slightly. 7th: John Eaton, severely. 9th: Alexander Flanagan, severely, slightly. 34th: James Malone Patrick M'Guire, slightly. 38th: John M'Coalor, slightly. 49th: James Mullins severely; William Wells, Nathaniel Higgin, slightly. 50th: Matthew Edge, dangerously. 68th: Thomas Duff, William Watkinson, both since dead. 88th: James Quin, dangerously. 89th Brigade: James Lord, severely. Job Lacey, slightly. Royal Sappers and Miners: Joseph Houghinon, severely; R. Willis, slightly

CASUALTIES IN THE ROYAL NAVAL BRIGADE, BEFORE SEBASTOPOL, ON THE 17TH MAY
Wounded—George Gamble, A.B., *Leander*, dangerously, Philip Henry Hammond, ord. *Queen*, severely

War Department, June 1, 1855

Lord Panmure has received a despatch and its enclosures, of which the following are copies, addressed to his Lordship by Field Marshal the Lord Raglan, G.C.B.:—

Before Sebastopol, May 19, 1855

My Lord,—I have the honour to enclose the copy of a letter from Captain Montagu, of the Royal Engineers, prisoner of war, dated Simpheropol, April 28, 1855, transmitting a list of British prisoners who died either there or on their road from Sebastopol

I beg to forward this return in duplicate

Your Lordship will see with satisfaction that the British prisoners, who are sick in the hospital at Simpheropol, receive equal, if not greater, attention than the Russian soldiers from the authorities, and are constantly receiving presents from visitors. I have, &c., RAGLAN

The Lord Panmure, &c

Simpheropol, April 28, 1855

SIR,—I have the honour to enclose the accompanying list of prisoners who died either here or on their road from Sebastopol. There are some others dead; but Thomas Verry, 8th Hussars, who furnished me with the list, could not remember the names of the men. I have, &c.,
H. MONTAGU, Captain Royal Engineers

To Major-General Estcourt, &c.

I have been given to understand that the prisoners who are sick in hospital have received equal, if not even greater, attention than their own soldiers from the authorities, and are constantly receiving presents, &c., from visitors. There are five or seven men who will be sent the first opportunity to Odessa, for the purpose of being forwarded to England, they being incapable of serving again

RETURN OF NON-COMMISSIONED OFFICERS AND MEN, PRISONERS OF WAR, WHO DIED AT OR AT NIMPHEROL OR ON THE ROAD FROM SEBASTOPOL

4th Light Dragoons: Troop Sergeant-Major William Fowler, Private Thomas Fletcher, James Newcastle, and George Lake. 8th Hussars: Corporal Wright. 7th Light Dragoons: Private Field Verry. 8th Light Dragoons: Private Wm Ann Richard Wells. Private Edward Bullock, and Alfred Jones. 7th: Private James Ayres. 23rd Foot: Private Edward Buckingham, John Cooney, and Archibald Hudson. 41st: Private Hubert Hurst. 68th: Private John Wood. 77th: Sergeant Thomas Hopkins. Private Edward Mason, Benjamin Binder. 97th: Private Charles Lee. 99th: Private James O'Connell.

ENGLISH AND RUSSIAN PRISONERS.

War Department, May 29.

Lord Panmure has received the following returns relative to English and Russian prisoners.

COUNT WALEWSKI'S CIRCULAR

The *Moniteur* of last Saturday contains a circular despatch of the French Minister of Foreign Affairs, addressed to the Legations of the empire, in which he shows that the proposals made by Russia at the Vienna Conferences are utterly worthless, as she does not offer to give up anything which she has not already lost; whilst, on the question of supremacy in the Black Sea, that Power offers no guarantees whatever for the future security of Turkey; but, on the other hand, would seek to gain advantages by extending her naval power even beyond those waters on which, at the present moment, the fleet of the Czar has no influence, or even an existence. In the following passage he points out clearly and conclusively the dangers arising from the position which Russia has hitherto held at Sebastopol:—

Exclusively bordered by the coasts of the two neighbouring States, and interdicted to the naval forces of other Powers, the Black Sea had become a closed arena, where adversaries, unequal in force, were alone in presence, and where the weaker was at the discretion of the more powerful. A form dable fortress contained within its citadels and roadstead an army always ready to embark, and a fleet always ready to take them on board and put to sea. This warlike display, unnecessary for defence, had but one possible destination. It constituted a permanent menace against the capital of Turkey, and the mystery which surrounded it increased a peril which at the slightest symptom of crisis alarmed the whole of Europe

The terms of peace, as he proceeds to show, will be of no value, unless they are founded on a secure basis, which the Russian proposals would certainly not give:—

Constrained in spite of efforts, which history will appreciate, to have recourse to arms, France and England owe it to themselves, and also to Europe, not to lay them down until their work shall be accomplished. It is necessary that the peace which they shall have obtained shall be followed by a secure repose

Would such security be the consequence of either of the two combinations recommended by Count de Nesselrode? In a word, would these two systems put an end to the preponderance of Russia in the Black Sea? The first, that based on the principle of the complete and reciprocal opening the passages of the Bosphorus and of the Dardanelles, involves the abolition of a rule which the Ottoman empire has always considered as its safeguard, and which, since 1841, has become part of the public law of Europe. At present Russia, who refuses to reduce the number of her vessels, is alleging the exigencies of her honour and the prerogatives of her sovereignty, does not hesitate to apply to the Sublime Porte for the abdication of its independence in its internal waters—a step which passes through its capital. She claims a new passage into the Mediterranean—that is to say, the means and the pretext of augmenting, in vast proportions, her maritime development; and, in compensation for these advantages, she confines herself to giving the Porte guarantees for the future entering a sea which they would find neither a port of refuge nor an arsenal of supply. In order to exercise the surveillance, the right of which would be indirectly conceded to them, France and England would be obliged to impose on themselves for ever the most onerous sacrifices. They would still, however, not be certain of great weight—that peace, if concluded on such conditions, would be delivered to the hazard of the first incident that might occur; and that the very object of the presence, necessarily intermitted, of the French and English fleets in the Euxine would not create a permanent cause which would be a menace of war. That would in fact be a proof that Russia would require to be again kept within bounds: so that her preponderance would not have ceased to exist, and the object of the third guarantee would have been frustrated

We shall treat that object by letter attained by the adoption of the system developed, in the second line, by Prince Gortschakoff and M. de Titoff. The Straits, it is true, would remain closed; but the *statu quo* which existed before the war would be re-established—the Russian navy would be repaired, without control, behind the fortifications of her ports and, when the sultan would regard an aggression as imminent, then only would he be authorised to give the alarm to his allies. The reply to that appeal would be another war, which would prove, at the same time, the want of foresight of the Western Powers, and the regenerated strength of the enemy whom they are combating at present.

AUSTRIA AND THE WESTERN POWERS.

The *Augsburg Gazette* publishes the following as the text of a note addressed by M. de Wialewski, the new French Minister of Foreign Affairs, to the French Envoys abroad. It is dated 9th May —

SIR,—I hasten to prevent, by explicit declarations, any erroneous interpretation of a series of facts, so as to enable you to contradict any wrong bearing given to them.

You are aware that when Count Buol, after a declaration of the Russian Plenipotentiaries which we might have regarded as sufficient to authorise us to regard the Conferences as broken off, adjourned the reassembling of the Conference, he nevertheless expressed the desire to endeavour to find in a new combination a means for reaching the Third Point. The Vienna Cabinet did not hesitate to declare its firm intention to maintain the alliance of the 2nd December when it submitted to France and England propositions which they examined with the greatest desire to find them satisfactory

Unhappily their good intentions failed, as it was impossible to make an arrangement, founded on such a combination, agree with what their dignity demanded, and the legitimate right which they had made it their mission to assert in the general interests of Europe. It appeared, in fact, to the Cabinets of Paris and London, that the interpretation of that point which is the most important of all, and in reality the sanction of the three others, as proposed by Austria, responded neither to their expectations nor to the sacrifices they had made.

If the Cabinet of St. Petersburg had accepted the ultimatum proposed by the Court of Vienna peace would have been re-established on weak foundations, the inefficiency of which would have led in the future to dangers which it was the keep of the Allies, from the beginning of the crisis, and after the great efforts made by the Allied Powers, to see banished for ever.

Such are the motives which have induced us not to adopt the plan proposed by the Austrian Government. Those motives are so evident, they are so fully justified by the position of the Western Powers, that we do not doubt the Court of Vienna will appreciate them in their true meaning

The alliance of the 2nd December is not, therefore, brought in question. It is, on the contrary, the earnest desire of the Government of the Emperor, and of the Government of Her Britannic Majesty, to strengthen and develop it, and no doubts can exist at Vienna on the subject. It is important, Sir, that you should express yourself clearly in this sense, and explain that, if the situation has undergone a modification, it arises solely from the fact that the Russian Plenipotentiaries, after having accepted the Third Point in principle, afterwards refused to admit its practical consequences. WALEWSKI.

RUSSIAN PATRIOTIC FUND.—The Empress of Russia has directed a bureau to be opened at the Winter Palace, St. Petersburg, where will be received in her name gifts of money, provisions, lint, &c., intended for the succour of the combatants at Sebastopol. Count Wielhorski Matuschkine is about to leave for the Crimea to superintend the distribution of these presents. The *Journal de St. Petersbourg* says that every Russian in the empire longs to take a place amongst the defenders of Sebastopol; but, as that is not quite practicable, they can show the ardour of their patriotism by liberal donations to this fund.

MAINE LAW IN CANADA.—The *Toronto Leader* says that the Governor-General cannot give his consent to the Prohibitory Liquor Bill. He instructions are "to reserve for the signification of the Queen's pleasure every bill of an extraordinary or unusual nature." A large number of the citizens of St. John have signed a petition to her Majesty praying for the disallowance of the Act preventing the importation, manufacture, or traffic in intoxicating liquors.

CORRESPONDENCE BETWEEN LORD ABERDEEN AND LORD JOHN RUSSELL.

(From the Appendix to the Fourth Report of the Sebastopol Committee).

LETTER FROM LORD JOHN RUSSELL TO LORD ABERDEEN.

Pembroke-lodge, Nov. 17, 1854.

My dear Lord Aberdeen,—I said the other day that I would speak to you upon the subject of the personal arrangements connected with the War Department. I believe, however, I can put the matter more clearly in writing.

I will treat the subject in its two points of view:—First, as to the official arrangements for the new department, with a view to the general efficiency of the public service; secondly, as to the immediate requirements of the great war in which we are engaged.

In the first point of view, I have already said that I do not think that a Secretary at War can be maintained together with a Secretary of State for War. Sidney Herbert has, in the fairest and handsomest manner, said nearly the same thing.

I have also told you, however, that I do not think the War estimates ought to be brought forward in the House of Commons by a person of rank and position inferior to a Secretary at War. It is of great importance, when questions relating to the discipline or promotion, favour or punishment, of officers and soldiers, are brought forward in the House of Commons, to have a Privy Councillor or Minister, either in the Cabinet or next in rank to the Cabinet, to satisfy the House of Commons upon points which are determined by military officers sitting at the Horse Guards.

But even supposing that, in time of peace, with a man of the high authority of the Duke of Wellington Commander-in-Chief, an Under Secretary of State might suffice for the House of Commons, such is not the present state of affairs. Every new arrangement will be sharply criticised. There are several men in the House of Commons who are well qualified to lead the opinion of the House on matters of military administration; authority and experience, and high official rank, are therefore required in the organ of the Government on military affairs.

The discussions which have taken place in the public press upon the discipline of the army lead to the same conclusion. A Cabinet Minister, responsible to the public, is required to encounter objections to our present modes of trial for military offences, and, if necessary, to improve those modes.

I come, therefore, on this head, to the conclusion that the Secretary of State for the War Department must be in the House of Commons.

From the other point of view the prospect is equally clear.

We are in the midst of a great war. In order to carry on that war with efficiency, either the Prime Minister must be constantly urging, hastening, completing the military preparations, or the Minister of War must be strong enough to control other departments. Every objection of other Ministers, the plea of foreign interests to be attended to, of naval preparations not yet complete, and a thousand others, just liable in the separate heads of departments, must be forced to yield to the paramount necessity of carrying on the war with efficiency of each service and completeness of means to the end in view.

This great duty may be performed, as I have said, either by the Prime Minister, or a Minister acting in a department. We have examples of both.

Lord Godolphin, in the first way, supported the campaigns of Marlborough; Lord Chatham, in the other, guided the operations of the Seven Years' War.

In the present case, it seems to me that the last example is the most applicable.

If, therefore, the first considerations here presented lead to the conclusion that the Secretary of State for the War Department must be in the House of Commons, the other considerations point to the necessity of having a that office a man who, from experience of military details, from inherent vigour of mind and from weight with the House of Commons, can be expected to guide the great operations of war with authority and success.

There is only one person belonging to the Government who combines these advantages.

My conclusion is that, before Parliament meets, Lord Palmerston should be intrusted with the seals of the War Department. With respect to other arrangements, I can feel no doubt that your influence with your colleagues would induce them to acquiesce in such a distribution of offices as you might think most advantageous for the Crown and the country.

I remain, my dear Lord Aberdeen, yours very truly,

J. RUSSELL.

LETTER FROM LORD ABERDEEN TO LORD J. RUSSELL.

Blackheath, Nov. 18, 1854.

My dear Lord John. The letter which I received from you yesterday, just before the meeting of the Cabinet, contained a proposal so unexpected, and which may have such important consequences, that you will not be surprised if I am unable, at the first moment, to express a decided opinion. But, as any suggestion made by you deserves the best attention, and as you do not call for an immediate answer, I will give the subject the most mature consideration, and will let you know the opinion I may form.—Ever truly yours,

ABERDEEN.

LETTER FROM LORD JOHN RUSSELL TO LORD ABERDEEN.

Council office, Nov. 18, 1854.

My dear Lord Aberdeen,—I did not expect any immediate answer to my letter of yesterday, and I think it quite right that you should have time to reflect.

I wish, however, that before you decide you should show my letter to the Duke of Newcastle. It was my intention, in writing the letter to avoid throwing any blame upon him; indeed, I should be sorry to have any great part of the blame he has made, but he has not had the authority requisite for so great a sphere, and has not been able to do all that might have been done with larger powers of control. I remain, yours, very truly,

J. RUSSELL.

LETTER FROM LORD ABERDEEN TO LORD J. RUSSELL.

Downing-street, Nov. 21, 1854.

My dear Lord John,—I have shown your letter to the Duke of Newcastle, and also to Sidney Herbert. They both, as might have been expected, strongly urged me to adopt any such arrangement with respect to their offices as should be thought most conducive to the public service. Unquestionably this is the first object: but, on full consideration, I entertain great doubts whether, in the present state of affairs, your proposal would prove advantageous or desirable. It is mainly founded on the assumption that Herbert might not to move the estimates next session in the House of Commons. Now, I fully agree with you in thinking that the office of Secretary at War, as at present constituted, cannot be maintained together with a Secretary of State for the War Department. It is also perfectly true that Herbert expressed a similar opinion in the House of Commons; but I think he spoke of this as a permanent arrangement, and that he offered to continue his own services as long as they could be useful, especially with reference to the duration of this war.

It is quite clear that an Under Secretary of State could not with any degree of propriety move the estimates; but, looking at the present state of things as temporary, I do not see why a Privy Councillor's office should not in future be considered as charged with all the financial concerns of the army, and might properly move the estimates. If this should not be the case, your proposal would involve the absolute necessity of the Secretary of state for War always being a member of the House of Commons. This, I think, would be objectionable in principle, and might be inconvenient in practice.

I can scarcely imagine that the House of Commons, being assured of the temporary nature of the present arrangement, would insist upon the suppression of the War-office in the first year of the war, bringing greatly increased labour and responsibility. In the meantime, therefore, and until a final arrangement shall take place, Herbert might continue to move the estimates, and I should think that he would do so with the acceptance of the House, in which, I believe, he is deservedly popular, and much in favour.

Your proposal being founded on the supposed impropriety of Herbert moving the estimates, and, the consequent necessity of the Secretary of State for War being in the House of Commons, would render the removal of the Duke of Newcastle from his present office unavoidable; but, although you would regard this as the inevitable result of an official arrangement, it is not to be supposed that it would be considered in this light by the public, or indeed by any impartial person. The dislocation of the Government would be so great, and the reason assigned for it apparently so inadequate, that it could only be considered as a mode of substituting one man for another. Although you may be far from entertaining any such desire, the transaction could receive no other interpretation. In justice to the Duke, I do not think that his colleagues, without very strong grounds, would wish to place him in such a position.

Now, with respect to Palmerston, I do not know whether he is aware of the burden you are disposed to lay upon him; but, if not, I should greatly doubt his inclination to undertake it. Palmerston, within a few months, is as old as I am; and, without disparaging his inherent vigour of mind, he possesses no immunity from the effects of age. When I look at the laborious and complicated duties discharged by the Duke of Newcastle and by Herbert, and anticipate others which must shortly be added to them, I cannot but feel not honestly advise the Queen to intrust Palmerston, or any other man, with so great a responsibility.

I send in my former letter that your proposal was unexpected by me, because my strong impression had been, from various conversations, that you greatly preferred the nomination of the Duke of Newcastle to the War Department, instead of Palmerston, which had been canvassed at the time in the press and in the House of Commons. But I suppose that I must have been mistaken in this respect. It is useless, however, to enter into the qualifications of different men, for as I do not perceive the immediate necessity for the abolition of Herbert's office, and the extinction of his functions, I cannot consider the proposed change as imperatively called for.

I do not know that we gain much by a reference to the times of Lord Godolphin or Lord Chatham. Godolphin, as Prime Minister, undoubtedly gave great assistance to the Duke of Marlborough in the War of Succession; and Chatham, as the head of a department, may almost exclusively have originated the war measures of the Government. It would be absurd if I were to pretend to take any active part in the preparation of military details or the direction of military measures, which I can only very humbly assist and promote. But, after all, instead of referring to these old times, perhaps it is more to the purpose to recollect that in our own day the greatest, the most glorious, and by far the most successful war ever carried on by this country, was directed by Lord Castlereagh and Lord Bathurst, under the superintendence of a Minister who was certainly not very warlike in his character, although he lived to see his threefriend march to Paris carried into effect. During the last years of this great struggle the War Minister was in the House of Lords, while Palmerston, as Secretary at War, although not in the Cabinet, moved the estimates in the House of Commons. Ever, my dear Lord John, sincerely yours,

ABERDEEN.

LETTER FROM LORD J. RUSSELL TO LORD ABERDEEN.

Chesham-place, Nov. 23, 1854.

My dear Lord Aberdeen,—I have just received your answer to my letter of the 17th. I have not hitherto spoken to Palmerston on the subject, but on his return I shall communicate to him our correspondence, and consult with him upon it.—I remain, yours truly,

J. RUSSELL.

LETTER FROM LORD J. RUSSELL TO LORD ABERDEEN.

Pembroke Lodge, Nov 28, 1854.

My dear Lord Aberdeen,—As Palmerston's return is delayed, I will take the opportunity of answering your letter of the 21st instant, which I received on the 23rd.

You begin by saying, that my proposal is mainly founded on the assumption that Herbert ought not to move the estimates next session in the House of Commons. This is a mistake: my proposal was founded on a combined consideration of the official arrangements for the new department, with a view to the general efficiency of the public service, and the immediate requirements of the great war in which we are engaged.

It is obvious that the last of these two objects is the greatest, and that the adjustment of official arrangements may and should be made subordinate to the immediate requirements of the war.

In regard to the first head, I am happy to see there is no irreconcilable difference between us. You agree with me that the office of Secretary at War, as at present constituted, cannot be maintained together with a Secretary of State for the War Department. You also agree with me that an Under Secretary of State could not, with any propriety, move the estimates.

You only differ with me in the opinion I expressed that the change ought to be made in the estimates of next year. I had thought that Herbert might hold the office of Paymaster—such as I held in 1830 to 1834, and such as Macaulay held it from 1846 to 1847—and thus be connected with the War Department without moving the estimates.

Had you asked my opinion concerning the distribution of offices, this is the stage on which I should have made it.

You, looking upon the present state of things as temporary, think that Herbert might continue to move the estimates, as Secretary at War, and that he would do so with the acceptance of the House, in which he is deservedly popular.

Although I am opinion that the House of Commons would expect, after six or seven months' deliberation, a final arrangement of the War Department, yet the difference between us is not so great that I could not yield to your wish and the decision of the Cabinet upon this part of the subject.

I will only say, therefore, that I see no objection, in principle or in practice, to a rule that the Secretary of State for the War Department should, like the Chancellor of the Exchequer and the Secretary at War, be always a member of the House of Commons.

I come to the second part of the question.

Here you meet me in limine by saying that the transaction would be considered only as a mode of substituting one man for another, and that, in justice to the Duke or Newcastle, you do not think that his colleagues, without very strong grounds, would wish to place him in such position.

Now, I had understood that your Administration was founded on the principle of doing what was best for the public service, without regard to the selfish love, or even the acquired position, of individuals. The Duke of Newcastle would, I think, be the last man to wish for an exception to this rule in his favour.

Your next objection is to Lord Palmerston's age; but when I see the vigour of his mind and body I cannot attach much weight to this argument.

You say next that it was your strong impression, from various conversations, that at the time of the separation of the War Department I greatly preferred the nomination of the Duke of Newcastle to that of Lord Palmerston. You are mistaken in this respect. But it is true my opinion fluctuated very much, and it was only determined by the strong wish which I understood had been expressed by the Duke of Newcastle to complete in the War Department the preparations he had so well begun. I thought it due to him to presume in favour of his efficiency.

I come, therefore—having cleared the ground of all these obstructions—to the real question.—"What are the requirements of the great war in which we are engaged?"

Setting aside all historical references, both on your part and mine, I think it is clear, either that the Prime Minister must be himself the head of the department, or that the Minister of War must have delegated authority to control other departments.

Neither is the case under the present arrangement. I will give you an instance but too pregnant with warning.

Early in October I wrote to the Duke of Newcastle on the subject of transferring the 97th Regiment, then at the Piræus, to the Crimea. He informed me, in answer, that he had wished to do so, and that he had also wished to send between 2000 and 3000 men, the draught of various regiments, to the Crimea.

Now, why was he not able to carry his intentions into effect? Because he could not remove the obstacles put in his way by other departments, and because the Prime Minister did not at once overcome those obstacles.

At a much later time the 97th was moved, and it is only to-day that I see, by a telegraphic despatch from Lord Stratford, dated on the 8th instant, that the *Orinoco* (which conveys that regiment) had left Constantinople for the Crimea.

But in the meantime Lord Raglan had reported that he wished he had been able to place in the position of Balaclava, on the 26th October, a more considerable force; and also that, on the 5th of November, the Heights of Inkerman were defended by no more than 8000 British Infantry. What can be done by a single British regiment was seen on 26th of October, when the 93rd alone saved the position of Balaclava by their firmness and gallantry. Had 3000 more been at Lord Raglan's disposal on the 26th of October, and the 5th of November, how much more fruitful, though not more glorious, might have been those memorable days.

The Cabinet has, it is true, in its recent meetings, done much to repair omissions; but a Cabinet is a cumbrous and unwieldy instrument for carrying on war; it can furnish suggestions or make a decision upon a measure submitted to it, but it cannot administer.

What you want, therefore, I must repeat, is a Minister of War of vigour and authority. As the welfare of the empire and the success of our present conflict are concerned, I have no scruple in saying so.

Keep up, if you think right, as a temporary arrangement, a Secretary at War; make it clear that it is temporary; that is to say, only to last till more complete consolidation can take place; but let Parliament and the country be assured that you have placed the conduct of the war in the hands of the fittest man who can be found for that duty.

I remain, my dear Lord Aberdeen, yours, very truly,

J. RUSSELL.

LETTER FROM LORD ABERDEEN TO LORD J. RUSSELL.

Downing-street, Nov. 29, 1854.

My dear Lord John,—There are two or three points in your letter, received yesterday, to which I think it as well to advert without further delay, in order that, before you see Palmerston, the whole subject may be placed in a condition to be fully understood.

I am glad that it is no longer necessary to enter into any consideration at present of Herbert's position. I agree with you in thinking that, in consequence of the creation of a Secretary of State for the War Department, the office of Secretary at War must be modified; but I am still of opinion that a Privy Councillor's office may be constituted, by the occupant of which the estimates should be moved, and who should control the whole expenditure and financial concerns of the army. Regarding Herbert's present situation as temporary, I need say nothing further respecting it; but I must altogether demur to your declaration, that you see no objection in principle, or in practice, to a rule that the Secretary of State for the War Department should, like the Chancellor of the Exchequer and the Secretary at War, be always a member of the House of Commons. Such opinion, if adopted, I think, would manifestly be at variance with the public interest. It is probable that it might very often be desirable to appoint a military man for the office of Secretary of State for the War Department, and it is equally probable that such a man might be found in the House of Lords. Officers who, by long service and merit, have received the honour of a peerage, might be the persons of all others whom it would be the most important to select for this office, and it is difficult to conceive why a seat in the House of Lords should operate as a disqualification.

I think that the office ought to stand upon the same footing as that of the First Lord of the Admiralty, who may be either a peer or a commoner, as the public interest may require.

You complain that the Duke of Newcastle has not a sufficient control over the departments with which he is in contact, and that he does not possess a delegated authority sufficient to enable him to perform his duties satisfactorily. I do not exactly know what is meant by a delegated authority, but I apprehend that he possesses all the authority with which he, or any other person, could properly be invested.

The instances you adduce of this want of control are wholly inapplicable, and fail to establish the fact. You say that you wrote to the Duke in October, and recommended him to send the 97th Regiment to the Crimea, and that he replied it was his wish to have done so, as well as to send 2000 troops then ready for embarkation. You conclude, therefore, that he did not do it because he could not remove the obstacles put in his way by other departments, and because the Prime Minister did not at once overcome those obstacles. Now, allow me to say, that before a Prime Minister can remove obstacles he must be informed of their existence; and if it was imagined that he possessed any such power, it might easily have been put to the test by calling upon him to exercise it.

In this case, however, it is yet easy to say what the Prime Minister or any one else could have done. The Duke of Newcastle wished to send the 97th Regiment from the Piræus to the Crimea, and proposed to Clarendon to do so. Clarendon protested against it, and said that the tranquility of Greece depended upon the regiment remaining at Athens. The Duke, I think, very properly, at the time, acquiesced, and subsequently sent a weak regiment to replace the 97th at Corfu.

The obstacle to sending the 2000 men arose from Lord Raglan himself. When the Duke informed Lord Raglan that he had this number of recruits to send him, Lord Raglan replied that these last sent were so young and uninformed that they had victims to disease, and were swept away "like flies." He preferred, therefore, to wait. I do not know what a Prime Minister could have done in such a case; but I must submit that in all this there is no evidence of any want of authority on the part of the Duke.

After all, I think your letter plainly reduces the question to the simple issue of a personal preference, and the substitution of one man for another.

In answer to my suggestion that some consideration was due to the Duke on the part of his colleagues, you say that you understood the Administration was founded on the principle of doing what was best for the public service, without regard to the feelings, or even the acquired position, of individuals. Undoubtedly this was the case; and I fully agree in thinking that the Duke of Newcastle would be the last man to wish for any exception to this rule in his favour.

But I must observe that, at the formation of the Government, no such office as the War Department was contemplated; and when, subsequently, the Colonial office was divided, no objection whatever was made to the choice of the Secretary of State by the Duke: nor, as far as I am aware, up to this moment, to his management of the office.

Now I think you will admit that, although another person might, perhaps, have been preferred on the first constitution of an office, it is a very difficult thing to separate a man who has discharged its duties ably and honourably, merely in the belief that another might be found still more efficient. Undoubtedly the public service must be the first object; but, in the absence of any proved defect or alleged incapacity, I can see no sufficient reason for such a change—which, indeed, I think is forbidden by a sense of justice and good faith.

You say that I made an objection to Palmerston's age, but this is not quite correct. As my acquaintance with Palmerston commenced a very many years ago, I perhaps as much as any one to see his vigour of his mind and body; but when I mentioned his age it had reference to the notion of intrusting him with the duties now discharged by the Duke of Newcastle and by Herbert. It would be a fashion to say, one that say man, old or young, could attempt such a task with advantage to the public. At the formation of the Government I proposed to Palmerston to take the Admiralty, but he preferred the Home-office, and as he told me himself that the Foreign-office had become too much for him, I am sure that he would never think of undertaking the business of the two offices in question.

On the whole, then, believing that any change like that proposed would be of doubtful advantage to the public; feeling very strongly that it would be an unjust and unkind mark of disfavour towards a colleague, and, thinking also that all such changes, unless absolutely necessary, only tend to weaken a Government: I must repeat that I could not honestly recommend it to the Queen.—I am, my dear Lord John, very truly yours,

ABERDEEN.

LETTER FROM LORD J. RUSSELL TO LORD ABERDEEN.

Pembroke Lodge, Dec. 3, 1854.

My dear Lord Aberdeen,—I have not seen Lord Palmerston, nor heard from him; but, after your last letter, I have no hesitation in saying I revert to my former opinion, and must propose to the Cabinet that the office of Minister of War should absorb that of Secretary of War, and that the office should, for the present at least, be held by a member of the House of Commons. I remain, yours truly,

J. RUSSELL.

THE NEW CIVIL SERVICE SUPERANNUATION FUND.—A bill has been prepared, of which the following is a correct scale, of the New Civil Service Superannuation Fund: 20-60ths after ten years' service; 1-60th for each additional year's service. Contributions for salaries under £100 per annum, 1 per cent; under £200, 2 per cent; under £300, 3 per cent. After twenty years payment of superannuation fund no further payment to be made, all men to retire on receiving sixty-five years of age; if a married man die in harness, his widow is to receive one year's pay, provided he has been in the service twenty years.

THE SARDINIAN CONTINGENT IN THE CRIMEA.—Upwards of 10,000 have landed. They are, to all appearance, a splendid body of men, and have every appearance of having come from a military State. The being clad in serge smallcoats, large-sacks, commissariat officers, and all other military equipments; they fetch under own rations, which are supplied to them by us, and altogether they have a martial and soldierlike bearing which promises very well for us of use. Their cavalry are mostly light men, mounted on good and strong horses. Their infantry are composed of strong and serviceable-looking men, and show an amount of discipline highly satisfactory, and, above all, the most picturesque in dress, and manner are their riflemen. They are dressed in green, with a kind of Swiss hat similar in shape to an English sporting hat, and ornamented with a large bunch of green cock feathers. It is placed on the head in a most jaunty style. Their arms are Minie rifles with 800 yards' range, and with sword bayonets; they are said to be clever shots. They march at a fearful pace, smoothing almost to a trot, and like very hardy; they all upon landing march away, and are camped in different places. They are cheered most lustily by our men, who seem to have a pleasure in welcoming them as brothers in arms to the Crimea and its sufferings. The is responded to by both officers and men most cordially.—*Letter from the Camp, May 18.*

NO-POPERY RIOTS.—A serious disturbance occurred at Vigevano, Piedmont, on the 20 ult., occasioned by a procession in honour of the Immaculate Conception, which was received with disapprobation by a large portion of the population. To groans and hisses succeeded missiles of the softer kind; whereupon the members of the procession, who, it seems, had been informed of the intended demonstration, drew heavy bludgeons from under their model cloaks, and fell upon the assailants. The latter intrenched themselves in the Café Giobertì, but were dislodged, and all the furniture of the coffee-house was destroyed. In the meantime a party of soldiers arrived, some arrests were made, and order restored. In the evening the anti-processionists attempted to revenge themselves by breaking the windows of the Bishop's palace and seminary, but the public force was on the alert, and no further mischief occurred.

MAILS FOR AUSTRALIA.—GENERAL POST-OFFICE, May, 1855.—Arrangements have been made for the conveyance of mails to Australia twice in every month, during the remainder of the present year, by clipper ships from Liverpool, the dates of which have ensured quick transit with the Postmaster-General for this service. The mails for Australia will be made up in London on the evening of the following days, viz.:—June 4, June 19, July 4, July 19, August 4, August 20, September 4, September 18, October 4, October 20, November 4, November 19, December 4, Dec. 18, 19. The packets will, in each case leave Liverpool on the succeeding days. All letters and newspapers for New South Wales, Victoria, South Australia, Van Diemen's Land, and New Zealand will be forwarded by these packets, unless addressed to be sent by any other opportunity. The packet rates of postage will be chargeable on letters so conveyed, but newspapers will not be liable to any postage. Thus, passengers and others leaving London may send them to forward letters to Liverpool or cross-post, will send in the same manner letters, &c., posted at their offices, addressed to Australia.

OPENING OF THE FIRST RAILWAY IN SWITZERLAND.

THE turning of the first turf of a Railway with a silver spade, the depositing of it in a mahogany wheelbarrow, and wheeling it off "in a most workmanlike manner," is a proceeding which has, from frequent repetition in England, become so familiar as to be regarded but little more than adding one more mesh in the vast net-work of Railways which covers the face of Great Britain.

But in Switzerland I known to us as a succession of mountains, valleys, and lakes—as the ideal dwelling-place of what poets love, and artists would fain imitate—"A Railway in Switzerland," indignantly exclaims the belle of the travelling carriage, with just as much romance as is possible after a London season, "it would be too cruel." "Make your mind perfectly easy," says Paterfamilias, "the thing is impossible." And, doubtless, many

OPENING OF THE BERNE AND GENEVA RAILWAY.

LAUSANNE, FROM THE ENGLISH CHURCH.

who have ascended Mont Blanc, under the able guidance of Mr. Albert Smith, or who have actually penetrated to Chamouny and Monte Rosa, have their minds so impressed with seas of ice, and mountains of snow, raging torrents, and impassable ravines, that the chances of a railway in such a country, and the Thames in a state of combustion seem to balance one another in the scales of impossibility. Besides, Swiss peasants and châlets, and Castles of Chillon, and poetical remembrances, and no less lovely realities, do not agree well (how should they?) with curves and gradients, and navvies and time-tables; nor can the whistle of the locomotive exactly harmonise with the yeodle of the goatherd and the "Ranz des Vaches."

But reality steps in to upset romance. Much of the above is imaginary. There are districts in Switzerland where railways can be made as easily as in England, and where travellers, who have long known that peasants in Arcadian costume no more pipe simplicity's reed, save on the bonbon boxes at Fortnum and Mason's, may find some identity between Swiss châlets and castles in the air. Even poor William Tell has been much scoffed at of late; so far, indeed, have sceptics carried conviction that the pippin which the long-drawn bow displaced from the filial head may soon be ranked with the mythological apples of the ancients.

But to the Swiss Railway. The scheme of lines now being carried out under the auspices of the Company of the Western Railways of Switzerland purposes to connect Geneva with Berne, by way of Morges, Yverdun, and Morat. The portion of this enterprise of which we have to record the successful completion is from Yverdun to Busigny—a village twenty miles distant from that town, five miles distant from Morges, and four from Lausanne. The opening was inaugurated on Tuesday, May 1, by a trial trip; the passengers being a deputation from the Conseil d'Etat, the members of the Administrative Body, and about 200 gentlemen interested in the event, inhabitants of Geneva, Lausanne, Yverdun, Morges, &c. The weather was most propitious; and the trip was accomplished to the great satisfaction of all whom it concerned, and to the vast astonishment of crowds of peasants who, attracted by the novelty of the scene, occupied the bridges and prominent points along the line. At Yverdun a cold collation was served, a military band was in attendance, toasts were given, and many were the congratulations exchanged on the success which had attended the excursion. The work is expected to be finished to Morges in a few weeks, and the branch to Lausanne in about four months; until which time omnibuses ply from the two towns to Busigny.

The Company's Engineer-in-Chief is Mr Charles Vignoles; the Resident Engineer, his son, Mr. Henry Vignoles. The iron work, station-fittings, and rolling stock, have been supplied by Messrs. Fox, Henderson, and Co. The carriages were made by Messrs. Pawell, Brussells; and the locomotives in the shops of the Société St Leonard, Liége.

The traveller arriving at Yverdon, by way of Neuchatel, will not be sorry to exchange the diligence to Lausanne for the first-class railway carriage, since the high road offers no attraction to those who admire dust and tedious hills. But the great interest in this line arises from its connecting the two last lakes which form its termini—Neuchatel with its historical associations of Grandson and Charles of Burgundy

BERNE AND GENEVA RAILWAY.—THE POUDRIERE VIADUCT OVER THE VENOGE RIVER.

BERNE AND GENEVA RAILWAY.—STATION AT YVERDUN, ON THE LAKE OF NEUCHATEL.

and Geneva, whose natural charms, unsurpassed by any Swiss lake, are assisted by that sanctity of genius which has made it loved and hallowed. We think of Davy, Sismondi, and Rousseau, and the brilliant sceptic whose conscience built an altar to the Power his will would have denied. Then we pass to Coppet, whose fir plantation marks the resting-place of the statesman Neckar, and his more famous daughter. Lausanne calls up the historian of Rome writing his last page, and the great actor with the Roman mind; whilst Vevey, with its quiet church, reminds us of our own unsettled history and the strange race of which Ludlow and Broughton were the types. Then Montreux and Clarens, the Rocks of Meillerie and the Castle of Chillon. Light and shade, pathos, and sublimity—how they all blend together, suggestive of that mind which has made them famous and linked its immortality with their own.

We have already stated that the line of railway will probably extend to Geneva from Morges, and to Berne from Yverdun. The former line, as proposed, runs at no great distance from the lake at any one point, and passes near numerous thriving towns and villages.

The projected extension northwards, as originally laid out by Mr. Robert Stephenson, was to follow the natural valley of the country by Soleure to Basle on the Rhine. But, to conform to the wishes of the Canton of Berne, the Company have had new surveys made by their Engineer-in Chief, Mr. Charles Vignoles, with a view of effecting a junction at Berne with the railway now in execution from that town to Basle. The proposed line skirts the lake of Neufchatel for some distance, and leaves it for Paverne, from which point two directions have been considered—one, the more practicable, by the beautiful town and lake of Morat, famous for the defeat of the Burgundians; the other, through a mountainous and difficult country by Fribourg. The former has finally been adopted. It should be remembered that from Geneva to Lyons a railway is in course of formation; while the whole line from the latter town to Marseilles has lately been opened; so that the line to Geneva from Morges is alone wanting to form a communication between the interior of the country and Southern France. Basle, on the other hand, will soon be connected to Berne; so that, finally the rails—touching the latter town at one end and Geneva at the other—will fill up the gap in the iron highway through Europe.

The accompanying Engravings are from sketches by an English resident at Lausanne. They comprise a view of that town; one of Yverdun Station on the opening day, and of a wrought iron lattice bridge over the river Venoge. This bridge was manufactured by Messrs. Mare and Co., of Blackwall

THE INFANT CHURCH IN SOUTH AFRICA.

TOWARDS the close of last year (Nov. 22) was laid the corner-stone of an English Episcopal Church, in the village of Riversdale, South Africa, with

ENGLISH EPISCOPAL CHURCH BUILDING AT RIVERSDALE, IN SOUTH AFRICA.

impressive ceremony, by the Rev. W. E. Belson. The proceedings of the day commenced with evening prayer at two o'clock, in the Dutch Reformed Church. Notwithstanding that it was harvest time a large congregation assembled. After service a procession was formed to the site of the new Church, chanting the 132nd Psalm. At the entrance to the ground an arch, formed of poles covered with evergreens and flowers, had been erected; whilst the gaiety of the scene was enhanced by a display of flags and other devices. The Civil Commissioner of the division read the usual document, and placed it, together with some coins, in the wall of the building. The stone was then lowered into its position and the appointed service was continued by the Rev. J. Baker The 100th and 149th Psalms were sung remarkably well by the choir, which had been previously instructed by Captain Palmer. The meeting was addressed by the clergy and others present; and a collection was made amounting to £21 8s. 7d. After the ceremony sixty of the school children were regaled with tea and cake; and the little festival was kept up until a late hour.

The site of the new church—which is the gift of the Dutch Reformed Church—is beautifully situated, being at the top of the principal street, on the north side lie the fine range of the Zwarte Berg mountains.

The church, of which we engrave a sketch, is in the Early English style. It will accommodate about 170. The estimated cost of the building is £1300: a further sum will be required for the inclosure of the churchyard, and some of the necessary interior furniture, as font and communion service. Many friends in England have contributed towards the edifice; but, owing to the enormous price of labour and materials, a considerable sum will be required to complete the church. The congregation are, both by giving money and voluntary labour, helping themselves; and entertain the hope that still more of their brethren at home may testify their sympathy with the Infant Church in South Africa by contributing of their substance to the work they have undertaken. Messrs. Hoare, 37, Fleet-street, have kindly consented to receive subscriptions, which should be paid to the "Riversdale Church Building Fund."

INDUSTRIAL DEMONSTRATION IN IRELAND.

THE incident here illustrated occurred recently at Mulla, Tullamore, in Ireland, the seat of Thomas Sadlier, Esq. For the last four years Mr. Sadlier has sought to procure employment for his tenantry and others, by the extensive manufacture of peat charcoal into many useful products; more particularly with a view to the preparation of a sanitary agent; and in these endeavours he has been eminently successful. At the commencement of the war the Government required for the military hospitals abroad large quantities of the above material. To execute within a specified time one of these orders, the proprietor had many difficulties to contend with, arising from limited time, inclement weather, and the present difficulty in procuring labourers. In this emergency, however, the country people for several miles round, turned out with their carts and horses, and volunteered their gratuitous services. With this aid the supply was ready in time, and the charcoal was carted in procession from the factories to the railway station, a distance of five miles, amidst the waving tastily-arranged banners, bearing appropriate devices and mottoes, and with exulting shouts and the joyous sound of music.

In the evening Mr. Sadlier gave a suitable entertainment to the whole party, and dancing and festivity were kept up till an early hour.

The demonstration originated in a twofold object: the remembrance of the fatherly interest and care bestowed on his tenantry by the respected Provost of Trinity College, Dublin, the late Dr. Sadlier; and the anxious hope that the workers might contribute in some degree to the comfort and health of their brothers now serving in the Crimea.

DEMONSTRATION AT MULLA, TULLAMORE.

CHURCH, UNIVERSITIES, &c.

VISITATION OF THE ARCHDEACON OF MIDDLESEX

Archdeacon Sinclair held a visitation of the London Clergy at St. Paul's Church, Covent-garden, on Wednesday morning. There was a very large attendance. Prayers were read by the Rev. Henry Hutton, the Rector, but the usual sermon was dispensed with. The Archdeacon, on taking his seat, proceeded to the delivery of his Charge, which had reference in many of the subject of preaching. In inquiring into and exposing some of the difficulties presented by which preaching was rendered ineffectual in the first generation, he mentioned was want of faith in its efficacy. It was with great concern that he heard preaching disparaged, and unskilful preachers held up to scorn solely for their simplicity. Such unseemly peculiarities not only discouraged the clergy, but prevented the hearers from profiting by the ministration of their instructor. The next general error was that of overlooking and omitting certain qualifications which the work of preaching required. A long these were command of language and readiness of expression. That readiness of speech was far from unattainable. It was in early life comparatively an easy acquisition, and at a later period he had known individuals who, by great efforts and assiduous practice, had surmounted the difficulties presented by hesitance and reserved or studious habits. Another qualification for a preacher was such an acquaintance with at least the elements of modern science as an ill-read congregation would expect in their instructor. He did not mean that the Christian preacher was to give instruction from the pulpit in geology, optics, or astronomy; but it was by no means safe for him to be altogether ignorant of physical sciences, lest he should be betrayed into an exposure detrimental to his pastoral influence. This remark applied still more decidedly to mental science, and, in particular, to the philosophy of morals. The highest authority in ethics was, unquestionably, the Bible; but it was little the principles of this science were nowhere reduced to a system. Precepts and maxims sanctioned by Divine authority were to be found in rich profusion throughout its pages, but no theory of morals was expressly taught. A theory was no doubt implied, but study and care were indispensable to discover and comprehend it. In this most important proce the clergy derived valuable assistance from the writings of Christian philosophers, to whose labours he could not be too much indebted for system in treatises on morals, comprehending and elucidating the whole subject. In turning over the popular sermons of the day, however, they were not unfrequently surprised to see the writer betray entire ignorance of such standard works; that his ideas upon morals were confused and illdigested, and in some cases his assertions, if strictly and logically carried out, would lead to conclusions he was not aware of, and which, he knew better, he would be most anxious to disavow; and, upon the whole, that his language implied a theory not in harmony with the best moralists, or with the sacred Writers, when studied carefully and philosophically. Reference to the composition of sermons, the Archdeacon strongly deprecated. Inaccurate preparation of subjects, and especially irreverent and antiquated phraseology, he said, could be more vexatious than to hear a young preacher mouthing ideas which were assumed to be his own, not in the language of good society in the present day, but in that of Hooker or Jeremy Taylor. No doubt the style of these great writers was excellent. It was admirably adapted to the taste of their contemporaries in the time of Queen Elizabeth or of Charles I.; but it was for that very reason wholly inappropriate to the age of Queen Victoria; and as it would be preposterous to clothe our persons in the habiliments of the Plantagenets of a former period, so it was absurd impossible to clothe our thoughts and sentiments in an equally antiquated garb. Another fatal error in preaching was that of undervaluing the capacity of the people. The understandings of the poor, though ill-educated, were probably not inferior to that of the preacher himself. They had common sense, and were often quite as shrewd and intelligent as their betters, though their command of words might be small; they were by no means equally wanting in ideas. Their vulgarities of style, slight them as they might, were often rich in argument and imagination. So to address grown persons, because they were ignorant terms adapted to children, was a grievous blunder. They saw through it, condescension, and were indignant. They discovered the justness of the preacher's ideas despised. The Archdeacon then concluded.

The clergy of the Archdeaconry occupy a conspicuous position. You have opportunity of addressing the individuals most remarkable for wealth, rank, talent, and influence in the kingdom. A majority of these are your parishioners. The Church of England, opposed to Popery and bigotry on the one hand, and to infidelity on the other, is the chief safeguard of true and real Christendom. The advancement of Christ's Holy Catholic Church depends, under God, upon the branches of our Anglican communion in the several quarters of the world; and in this widely influential communion your position is most important. The effective discharge of your manifold duties, not of preaching only, but of them all, would, by God's help, Christianise and evangelise the heart and centre of the British Empire." The Archdeacon then dismissed the clergy with the benediction.

PREFERMENTS AND APPOINTMENTS.—*Reform* The Rev. J. Aston to Toddenham, near Shore in the Manchester [illegible] champ to Wellerton with Welcome, Nov. 4. [illegible] Kilclieran, diocese of Killaloe; the Rev E. B. J[illegible] Slarrington, Norfolk; the Rev. C. Scott to St. [illegible] The Rev. H. B. Ward to Spersbury, Dorsetshire; and the Rev. R. B. Stopper to Ceston. *Vicarages:* The Rev. J. Burkitt to Kilkee, diocese of Killaloe; the Rev. W. B. Grenside to Melling, near Lancaster; the Rev. J. Symnston to Billingborough, Lincolnshire; the Rev. A. T. Farker to St. Peter's, Burnley; the Rev G. F. Williamson to Selston, near Mansfield; the Rev. S. Simcocks to Blankenham, near Aylesbury; and the Rev. I. G. Lennan to Langford with Little Farringdon, Berkshire. *Incumbencies:* The Rev. J. Hollins to St. Clement's Church, Bristol, and the Rev. R. B. Som to Bessenthwaite, near Keswick.

NEW BISHOPRIC FOR BORNEO.—A patent for Borneo has been constructed and the Rev. Dr. Francis T. McDougall, who has been for some time a chief missionary in the island, has been appointed the first Bishop, with the title of "The Bishop of Labuan." The Bishop Designate is a Fellow of the Royal College of Surgeons, and practised for many years as a medical man. He held for a considerable time an important appointment in connection with King's College Hospital. When Dr. McDougall is consecrated there will be thirty colonial bishoprics in connection with the Established Church of England

NEW CHURCH IN LAMBETH.—On Wednesday morning the ceremony of laying the foundation stone of St. Andrew's District Church, Lambeth, was performed by Admiral Lord Radstock (in the absence of the Earl of Shaftesbury), in the presence of the Bishop of Sierra Leone, the Rev. J. [illegible]n, M.A., Rector of Lambeth; the Rev. Joseph Brown, M.A., Rural Dean; the Rev. Charles Smith, M.A., Vicar of [illegible] the Rev. [illegible] Church, Lambeth, the Rev. [illegible] Rector of [illegible], Kent, the Rev. [illegible] Vicar, &c. [illegible] Frederick Gothic style of architecture from designs by Mr. Teulon, and will accommodate about 1100 persons, a large proportion of the sittings being unappropriated and free. A procession having marched round the parochial boundaries, advanced to the site of the church, where the Rev. Alfred S. Cauney, the Incumbent, and the Rev. T. [illegible] Christ of St. Andrew's, went through the prescribed services. Lord Radstock then laid the foundation-stone of the new building, and briefly addressed the assembly. The Rev. Cauntlon Lane, the Rural Dean, then stated that he was the oldest clergyman in the parish, which had, when he came into it some years ago, only one consecrated church. It had now twelve consecrated churches, independently of those which had been licensed, and he hoped that in the course of twelve months three other new churches would be erected. The Bishop of Sierra Leone, who as Mr. Weeks was Incumbent of St. Thomas's district, Lambeth, until his consecration a few days pronounced the benediction, and the school children as well as a large number of the older members of the congregation were afterwards regaled in a substantial manner in the school-house attached to St. John's Church, Waterloo-road.

THE JUDGES AND CORPORATION AT ST. PAUL'S. On Sunday last the annual ceremony of "churching the judges" was performed at St. Paul's Cathedral. At three o'clock, by direction of the Lord Mayor, the City Marshal proceeded to Serjeants-inn, Chancery-lane, where the Judges had assembled, and conducted them to the Cathedral, where they were met by the Lord Mayor, Sheriff Sir Charles D. Crosley, Aldermen Farebrother, Sir George Carroll, Sir John Musgrove, Finnis, Wire, and Kennedy, the Dean of St. Paul's, the Hon. and Rev. Canon Villiers, the City Solicitor, and a large number of members of the Court of Common Council. A procession having been formed and moved into the choir, full choral service was performed, prayers being said by the Rev. J. V. Povah, M.A., Rector of St. Anne's, Aldersgate-street; and the lessons by the Rev. William Calvert, M.A., Rector of St. Antholin's, Watling-street. The sermon was preached by the Hon. and Rev. Canon Montague Villiers, M.A., Rector of St. George's, Bloomsbury, who selected for his text the 5th Chapter of St. Paul's Second Epistle to the Corinthians, part of verse [illegible] "If any man be in Christ he is a new creature;" on which he propounded a very eloquent and impressive discourse. The Judges present were Mr. Justice Coleridge, Mr. Justice Cresswell, Mr. Baron Martin, and Sir. Justice Crompton.

The Paris lodging-house keepers are abating their exravagant prices. Two months ago a gentleman, owning property on the Avenue d'Antin, required 1,800*fr.* for the use of his house during the Exhibition time—he subsequently reduced it to 1,600. Hotel proprietors who, ten days ago, asked 1*l.* per day for the modest [illegible], are now content with [illegible] per day.

NAVAL AND MILITARY INTELLIGENCE.

ON Monday Portsmouth Dockyard was honoured by a visit from her Majesty, Prince Albert, and the Princess Royal, who came over to pay a visit to the *Cormorant* steam transport, which had embarked cavalry for the Crimea, and the new royal yacht *Victoria and Albert*. The *Fairy* came into harbour at about a quarter to five, and ran alongside the *Cormorant*, which was lying at the Dockyard Jetty, having embarked in the morning 66 horses and 56 men of the 17th Lancers; 20 of the horses were stabled on the weather-deck, and 37 on the main-deck. Her Majesty remained on the weather-deck a few minutes, inspecting the condition and accommodation made for the horses, and then went below on the main-deck. Here the Royal party remained about five minutes, her Majesty making many inquiries relative to the conveyance of the horses to the East. Having returned on deck, her Majesty and the Royal party took off from the *Cormorant* in the *Fairy's* gig and went on board the new royal yacht, which was lying alongside the Sheers Jetty, making a thorough inspection of this splendid ship in every department, remaining on board about half an hour. The Royal party then returned on board the *Fairy*, and at a quarter to six o'clock went out of harbour back to Osborne.

THE recruiting staff of the East India Company has received orders to enlist men for the European regiments and the Horse and Foot Artillery in the Company's service for short periods of two years, and for any term not exceeding one year in addition. The bounty given is the same as is paid to men who enlist for longer periods.

THERE are at present no fewer than one hundred and thirty-seven recruiting parties stationed in the metropolis, in addition to the establishment in Duke-street, Westminster. Of these nineteen belong to Cavalry regiments, [illegible] to the Infantry regiments, and [illegible] to the Royal Artillery. [illegible] Corps, and [illegible] party to consist of a sergeant and two men gives a total strength of 411 men. The estimated number of recruits obtained within the metropolitan district [illegible] is weekly.

SEVERAL of the Household officers of the Queen have taken lodgings at Ringmer for the summer months. [illegible] war prison are taken out every day, but the guard which accompanies them is much stronger than before the recent outbreak, and they are now allowed to disperse themselves on the downs as formerly, but are kept in a body.

ORDERS have been issued to have all the available contract transports fitted for the conveyance of cavalry and the remounts (troop horses) for that branch of the service in the Crimea. There are now ready for embarkation 2,000 mounted men, in addition to 800 troop horses (remounts), giving a total of 1,800 horses, which are expected to proceed to the seat of war before the 20th inst.

THE India mail brings news from Bombay to the 1st May. At that date the 4th Dragoons were preparing to embark for the Crimea.

FOR several weeks past great numbers of convicts have been engaged both on the Portsmouth and Portsea lines of fortifications, erecting earthworks, power magazines, cutting embrasures and shell recesses, whilst to the right of the Southsea Esplanade, near the Castle, the science of military architecture has been brought to bear upon the erection of a battery of prodigious strength, capable of mounting ten guns of heavy calibre, to command Spithead; and it is said that further [illegible]cations, upon a gigantic scale, are to be forthwith commenced.

HER Majesty's ship *Pique* left San Francisco on the 4th of April. Her destination was kept secret, it being supposed that the captain had sealed orders, received from the Admiral by the mail which had arrived a week previously. It was given out that the *Pique* was merely going to [illegible] her guns outside the bay. She had "provisioned" for six months just before sailing. One conjecture is that she may have proceeded to the north to look out for the Russian frigate *Aurora* (44 guns), which is supposed to have left, or to be about leaving, Petropaulovski, where she wintered; and another conjecture is that the *Pique* has gone to the Sandwich Islands to join the combined English and French squadrons. From the Sandwich Islands she would proceed to [illegible] and Callao, and thence to Honolulu from Callao, where she had left the *Virago* waiting for the arrival of his flag-ship from England.

ON Wednesday morning upwards of 3000 stand of Minié and ordinary rifles, with bayonets and sword-bayonets complete, 600 stand of cavalry carbines, and the same number of sabres, and 800 stand of Victorian carbines (the last-named weapon being for the use of the small-armed men of the Royal Artillery, the Land Transport, and the Royal Ambulance Corps), a large number of [illegible] and equipments, pouches, trumpets, and bugles, were shipped at the Tower-wharf for conveyance to Woolwich and Sheerness, at which depôt they will be trans-shipped to vessels about to sail for the Crimea. Several tons (measurement) of new clothing for the service troops to companies of the regiments in the Mediterranean and the Crimea, have been sent out during the last few d

A DIPLOMATIC PRISONER.—A very young and pleasing Russian officer was lately made prisoner by the English and by his engaging manners very soon became a great favourite. He is very well educated, appears to have a good supply of cash, and with great dexterity avails himself of every opportunity to flatter the Englishmen he is cleverly thrown with; every chance of insinuating something or other derogatory to the [illegible] and evidently does all in his power to create a feeling between the allies; and with some success, for what wonders they would do unless, assuming his subject that the Russians, to a man, are fond of the English. This gentleman has been sent to England. I have heard of several other prisoners who have acted nearly the same. [illegible] Count Aymar, Rue de la Rochefoucauld, No. 46.

Letter from Constantinople.

OPERATIONS OF THE NEW BEER ACT IN LANCASHIRE.—A return has been made in Lancashire, by order of the county magistrates, showing the operation of the new Beer Act in all parts of the county, except the boroughs. The returns include all classes of the population, and not merely the [illegible] places not incorporated. The Act came into operation in October, 1854, so far as the borough populations are concerned, but the [illegible] places like Bury, Middleton, St. Helens, Prescot, & [illegible] shows that during the preceding year (1853) there were [illegible] convictions for drunkenness, both on Sundays and during the rest of the week; in five, a decrease in both cases; in seven, a decrease on Sundays and an increase during the week; in two, an increase on Sundays, and a decrease during the week; and in one an increase in both cases. The [illegible] week being the same as during the corresponding period of 1854. Except the totals as given in the general summary of the return, the details are as follows:—

	Sundays.	Rest of Week.	Total.
Apprehended and convicted	100	177	277
Summoned and convicted	537	498	838
	637	675	1115
Apprehended and convicted	1050	587	1637

So that, while there was a decrease of 42 convictions for drunkenness on Sundays in favour of the period during which the new Act has been in operation, there was an increase of 181 in the convictions for drunkenness during the rest of the week. During the period of 1853-4 there were 204 publicans and beersellers convicted of offences on Sunday, and 165 of offences at other times; but in the same period under the new Act the numbers were 328 and 171. The replies of superintendents in these divisions to questions put by the chief constable nearly all attributed the improvement amongst the working classes as the result of the enactment, though the returns are, many of them, far from bearing out these statements. In Manchester, Ashton-under-Lyne, Bury, South Lonsdale, Lower Blackburn, Bolton, St. Helens, and Warrington, it is admitted that, even if the beer-shops have been closed, private houses are much resorted to for the purpose of drinking. At Ashton, working men subscribe and have a "brew" during the week, and assemble at a private house on the Sunday to drink the beer thus brewed.

MORMON DOCTRINES ON SLAVERY.—Brigham Young, the High Priest of the Mormons at the Great Salt Lake, has recently issued a manifesto, in which he replies to charges brought against the Mormons by the people of the United States. He states that the charge against the Mormons of being hostile to American slavery is a calumny. His words are:—"The seed of Ham, which is the seed of Cain descending through Ham, will, according to the curse put upon him, serve his brethren, and be a servant of servants" to his fellow creatures, until God removes the curse, and no power can hinder it. But the conduct of the whites towards the slaves will, in many cases, send both slave and master to hell. The blacks should be used like servants, and not like brutes; but they must serve. It is their privilege to live so as to enjoy many of the blessings which attend obedience to the first principles of the Gospel, though they are not entitled to the priesthood."

TWELVE years ago the coach proprietors between Lancaster and Carlisle paid £200 a year to the Post-office for the privilege of carrying the mails twice a day between those two places, and at the present time the Post-office pays the railway companies £19,000 a year for performing the same service.

A LETTER from Turin states that the veteran General Pepe is dangerously ill, to the great grief of the Liberal Italian party of all shades. General Pepe is seventy-two years of age.

THE *Constitutionnel* has the following curious advertisement:—"A Prince without posterity will adopt a child of an opulent and honourable family. Address, letter franked, to Count Aymar, Rue de la Rochefoucauld, No. 46."

EPITOME OF NEWS—FOREIGN AND DOMESTIC.

IT is said that the Queen and his Highness Prince Albert will arrive in Paris on the 16th or 17th of August, as the guests of the Emperor and Empress of the French, and to visit the French Exhibition

The first object selected by the French Emperor for purchase at the Paris Exhibition was a magnificent sabre, chased in steel, with incrustations in gold, representing on one side the portrait of the Emperor Napoleon I., and the battles of Marengo, Austerlitz, and the Pont d'Arcole, and on the other the portrait of Napoleon III., and the battles of the Alma and of Inkerman

Wednesday, the 13th of June, has been fixed for the inauguration of the New Metropolitan Cattle-market, Copenhagen-fields. Prince Albert, it is expected, will attend, and the ceremony will be one of state

In consequence of the 29th of May falling this year in Whitsun week, the anniversary service for the Empress Josephine, which is usually performed on that day in the Church at Rueil, is postponed to Monday next

The King of Portugal, and his brother, the Duke of Oporto, accompanied by the Duke de Terceira and General de Sarmento, arrived at Paris on Saturday last.

After being open to the public, under certain regulations, for about five weeks, the apartments occupied by the Emperor and Empress of the French, during the sojourn of their Imperial Majesties at Windsor Castle, were finally closed on Tuesday.

Letters from St. Petersburg state that a meeting will shortly take place between the Czar Alexander II. and the King of Prussia.

Lord Palmerston, after several applications through the Archbishop of Canterbury and other prelates, has refused to advise the issue of a Queen's Letter for the Church-Building Society

The King of Denmark has conferred the Grand Cross of the Order of Dannebrog on General Prince Demidoff, Aide-de-Camp of the Emperor of Russia; and made two other Russian officers Knights of the same Order.

Apartments have been prepared at the Hôtel de Ville for the Lord Mayor, Sheriffs, and Aldermen of the City of London, who have received an invitation from the Prefect of the Seine. The Municipality have also hired a house for the accommodation of some Englishmen of distinction, who have also received invitations.

The Czar Alexander has caused the pamphlet entitled "The Last Hours and Dying Words of the Emperor Nicholas," to be translated into several Oriental languages, and printed at the Government press.

The Hon. Mr. Fillmore, lately President of the United States, arrived in England by the *Atlantic* on Sunday last.

Lord Haddo, son of the Earl of Aberdeen, has returned from Upper Egypt, and will proceed to England by the Pasha line and Oriental steamer *Indus* on the arrival of the Indian mail at Alexandria.

General Dodge, the Minister of the United States Court at Madrid, has arrived in Paris with his family.

Two of the brothers of the Bey of Tunis, accompanied by a numerous suite, have arrived in Paris.

The Lord-Lieutenant of Ireland has conferred the honour of Knighthood on Mr. J. Toole, President of the new Athenæum at Cork.

Prince Charles Bonaparte has been appointed Director of the Museum of Natural History. He purposes reorganising that the establishment.

The Parliamentary library of the late Joseph Hume, Esq., was bequeathed by him to the London University College.

M. Favre, an advocate, member of the first Constituent Assembly in France, has just died at Annecy, near Geneva, in his ninety-eighth year

The Freemasons of Oxford intend to give, on the evening of June 19, a grand ball to commemorate the [illegible] of the Chancellor (the Earl of Derby), who will visit the University [illegible] institution-stone of the new Museum.

Baron de Bazancourt, who was sent out by the French Government to the East with the mission of collecting materials for writing the history of the expedition to the Crimea, has returned.

Colonel Rawlinson has [illegible] Baghdad, having brought it to a close [illegible] which he has been [illegible] of the British Museum.

Mrs. Daniel Webster resides in a fine house in New York, purchased for her by young men, admirers of her late husband, at a cost of 25,000 dollars.

Dr. Hoffman has been nominated to the office of Mayor of the Mint.

M. Horace Vernet has presented [illegible] obsdorf to paint a portrait of the Count de Chambord, of the size of life. The Count is to be represented on horseback

Miss Nightingale has been very ill, but is now out of danger.

Prince de Metternich gave a grand fête at Vienna last week, to celebrate the 53rd anniversary of his birthday

Seven hundred pounds have been paid over to the Wellington College Fund, the proceeds of the late benefit dramatic performance at Drury-lane Theatre. £50 has been contributed to the fund for Mr. Angus Reach.

M. Flourens, member of the Paris Academy of Sciences, has been named Professor of the Natural History of Organised Bodies at the Imperial College of France, vacant by the death of M. Duvernoy.

The notorious Tom Provis, *alias* "Sir Richard Hugh Smyth, Bart.," whose impudent attempt to grasp the Smyth property [illegible] Ashton must be remembered, died on Sunday afternoon, in the infirmary of Dartmoor prison

M. Michelet is said to be engaged on a work to be called "La Reformation."

The Russian copper money, consisting of copecs, deneschki, and polushki, are to be recoined, but, instead of bearing the effigy of the Emperor, they will bear the cipher "A. II."

The Lords Commissioners of her Majesty's Treasury have approved of the plans of the Royal Dublin Society's proposed Museum of Natural History and have authorised the erection of the building, under the superintendence of the Board of Works

The Mayors of several provincial towns have opened lists for working divisions of promising paupers to Paris (for the purpose of visiting the Universal Exhibition), free of the usual fee

The French Minister of War has caused it to be communicated to the Academy of Sciences that a gold mine has just been discovered in Algeria.

The Hereford Musical Festival is to take place on Tuesday, the 21st of August, and the three following days

The New Orleans Cuba Junta has been dissolved, and the vessels belonging to it sold to defray expenses.

In the United Kingdom there are fifteen letters written in the year for every one of the population. In the United States the number is only four.

An extradition treaty has been concluded between the United States and Hanover.

There has been an active movement for tenant-right throughout Ulster for the last ten days, meetings having been held in several of the leading localities.

Three lions from Africa are now being exhibited in Lyons, without being in a cage, or even secured by any chain. Two visitors, on entering behind a curtain which is drawn across the booth, suddenly find themselves in the presence of the animals.

The largest iron sailing-vessel ever constructed in the United Kingdom is fast approaching completion on the Queen's Island, Belfast, and will be ready for launching by the end of the summer.

The mouths of the Danube are in no better condition than in former years. Many severe accidents have been [illegible]

The Hanoverian Government is seriously considering the project of cutting a navigable ship canal from Stade up to Harburg, to evade the sandbanks that have formed in the Elbe, and to render Harburg accessible at all times of the tide.

Fish is remarkably plentiful in the Channel Islands. Turbot, weighing between twenty and thirty pounds each, may be had for 5*d.* and 6*d.* per lb.

A bill to suppress gambling has passed both Houses of the Californian Legislature.

On Tuesday morning, at nine o'clock, the temperature at Birmingham, as indicated by the thermometer, was two degrees lower than it was on the morning of the 1st January in the present year as the same hour

The Museum of the Marine at the Louvre has just received from London a large bronze plate surmounted by the Royal and Imperial arms of England and France. On it is engraved, in English and French an inscription to the memory of Lieutenant Bellot, who perished in the Arctic Expedition in search of Sir John Franklin.

THE PARIS UNIVERSAL EXHIBITION

(From our Special Correspondent.)

PARIS, MAY 30.

THE Emperor's day—Sunday last—was a complete success. For the first time since the opening day there appeared to be life in the affair; and I was often reminded of some of the lively scenes of Hyde-park in 1851. The *Moniteur* declares that upwards of 80,000 persons visited the Palace in the course of the day; but the general idea is that this estimate is a great exaggeration. To approach reality it is considered necessary to divide the above number by two! However, the Emperor's experiment was a complete success. It opened the Universal Exhibition to all classes just in time. Had this liberal measure been delayed much longer, the Parisians would have become sulky, and would have refused to take advantage of the invitation. Already the unfinished state of every part of the Exhibition, the horribly wet weather, the non-arrival of expected crowds of visitors with pockets heavily lined, and the clouded political horizon, has damped the Parisian ardour. People had begun to whisper about that the affair would be a gigantic failure. The most significant proof of general disappointment was the heavy fall in the demands of lodging-house keepers. Single rooms, for which greedy proprietors had been asking fifteen francs per night, were soon eagerly let for seven or eight francs. A few more days passed in gloom would have sufficed, I fear, to create a panic among Exhibition speculators. The Emperor, therefore, issued his decree at the right moment. The effect was magical. All the dreams of early spring returned to the imaginative restaurant keepers of the Boulevards and the Champs Elysées, and the fine weather came at the same time to brighten their happy visions. Sunday opened auspiciously—the day was beautiful; the stall-keepers of the Champs Elysées were determined to array all their attractions before the crowds expected, at an early hour, at the Palace gates. Troops of horse soldiers, regiments of infantry, and strong bodies of police, indicated the official belief in a coming throng. Well, the throng came; but it was never a dense, fighting, savage crowd. Orderly strings of gaily-dressed working men and working women bearing recently-purchased children, or supporting tenderly antiquated friends or relatives; careless fellows in blouses, slouching along with their pockets dipped down into their shop-men. with the Sunday hat knowingly perched upon the side of the head; groups of the Line affectionately linked arm-in-arm,—all strolled onward, chatting cheerfully by the way. At the great northern entrance the click of the turn-tables was telling all day long the number of persons who were taking advantage of the Emperor's invitation. A point often remarked, also, was the absence of that dragooning system which had wearied the few five-franc visitors the Company had managed to entrap.

Within the Building the effect was curious. The Nave resembled that of our Crystal Palace on a shilling day, with modifications. There was more variety in the hues exhibited by the French crowd. In the first place, about every third man was a soldier; then the white caps trimmed with rainbow ribbons, worn by the workwomen; the blouses; and the tendency to showy colours exhibited by the wives of the *bourgeoisie* all tended to relieve the dulness of the black coats. Then, seen in groups and near, the French people exhibited more enthusiasm than our people manifested. Everything was *curieusement et surprenante*. The real trophy raised by England in the eastern part of the Nave, was, of course, an object of special attention; and it was really curious to watch the mixed feelings with which hundreds of Frenchmen peered into Dr. Royle's Indian tent. They were inclined to admire the Bombay and other wondrous work of the East; they could not remain wholly blind to the beauties of the gorgeous Eastern fabrics before them, but, their geography being often at fault, they did not feel satisfied that, in admiring heartily, they would not be placing the Indian artist-workman almost on an equality with the manufacturer of the *article de Paris*. Then how astonished were hundreds of Parisian workmen with the silversmith's work in the English section of the galleries! How eagerly, also, crowds gathered about the single Australian nugget, placed upon the landing of the South-Eastern staircase, in which wonderful nuggets are most temptingly exhibited. I noticed that, on this day, a soldier walked round and round the case throughout the day.

An important fact became evident to the masses of Frenchmen on the free day—a fact which they would have been slow to credit on any but ocular demonstration viz., that their part of the Exhibition is the least advanced of any. Even yesterday, when I went carefully over the various Courts upon the ground-floor, those against the northern wall contained to exhibit only deal counters, varied only by deal packing cases. The visitor who crosses from this dreary region, still in the hands of carpenters, and dexterously avoids the labourers who are wheeling loads of wet clay into the very central spot of the Palace (where a fountain is in course of erection), may enter the English Section, and see everything—with the exception of a few fabric and Sheffield stalls—in order. I would also recommend the English reader to remark the difference in the distribution of space—as arranged by the French, and as adopted by Mr. Richard A. Thompson, our General Superintendent of space, in the British department. The French have cut their space into passages—with uniform alcoves on both sides—the monotony of which is perfectly distressing. You are continually expecting to arrive at some great Court—some wonderful effect—but your experience disappoints you wofully. Now the English space is broken up into courts and open spaces, which present to the visitor some new general view at every step. There can be no comparison between the two arrangements. English exhibitors have reason to thank Mr. Thompson for the happy manner in which he has used the space confided to his judgment.

Still visitors to the Paris Universal Exhibition must fast and remain thirsty while they remain in the building, unless they can patronise the liquorice-water which a gay cocoa-merchant carries about the Building in a fountain splendidly covered with red velvet, and capped with the tricolour.

It is said that the Machinery Gallery will be opened on Friday, but I doubt the correctness of the rumour, inasmuch as this gallery is still in a most unfinished state. It would be a pity to let the public see it before the machinery is in motion; and I expect that this point of progress will not have been attained within a fortnight hence. This part of the Exhibition will be the most remarkable, because the most original of any; and, when it is finished, and steam is working a hundred ingenious machines upon the banks of the Seine—when the visitor can wander out of the Palace by the southern door into a spacious refreshment gallery traverse the Panorama, bright with Imperial manufactures, and stroll along a gallery flanked on either side by brilliant stalls, exhibiting the graces of Parisian workmanship, he will be able to pronounce a final verdict upon this Universal Exhibition, but not till then. Meantime we must patiently wait the convenience of the authorities. I should advise intending visitors still in England not to start for some weeks yet. The affair will be a great success after all, if the Government take it in hand as they did last Sunday.

RUSSIAN REINFORCEMENTS. On the 15th instant a very large force was observed to be marching along the coast road, to join the army on the heights of Sebastopol. By reports from some of the ships at anchor, 50,000 troops were moving in this direction. It is quite evident, from the much greater extent occupied by the encampments, and particularly the increase in the number of the field batteries, that very considerable reinforcements have arrived. It was supposed, when first notice was given of the approach of so large a force, that an attack was contemplated, and numerous were given for the troops guarding the trenches to be constantly on the alert. Some of the divisions in front were also kept under arms for a great part of the night. Nothing unusual, however, occurred. The following day (May 16) several large convoys of corn and forage were seen on the north heights. At one time there could not have been less than 400 country arabas, each drawn by two oxen, on the high ground near the encampment. A little before, and to the west of Star Fort, is a large commissariat depôt. In addition to some very large sheds, covered by red-tiled roofs, which have been observed to be storehouses, and a little on one side of them, are two huge heaps of sacks, probably containing flour. They are piled up in a pyramidal form. To these stacks a line of 140 arabas were conveying similar sacks, and as each cart was relieved of its load, it passed away in another line with equal regularity. A number of men could be noticed busily employed in arranging the sacks, and connecting them with the pyramidal stacks, as fast as they were deposited on the ground. Higher up the hill, and to the east of the Star Fort, another line of arabas moved from the direction of Mackenzie's Farm, and were lost to view as they passed behind a prominence on the brow of the slope. They were bringing forage. In a third place were collected a large number of arabas, drawn up in regular rows, and stationary, and, as far as could be judged by the telescope, laden with gabions. Perhaps they might be intended to remain there, and be brought across at night.—*Letter from the Camp.*

THE SILENT MEMBER.—(No. XIX.)

MOST of us are familiar with the scene in Sheridan's comedy of the "Rivals," where the footman, when complained of by his master, consoles himself by violently kicking the page. This sort of thing seems to be in course of imitation by the upper servants of the public, who being convicted of incapacity, are now turning round on the unfortunate underlings, who are being kicked with very little mercy and not much discrimination, on all sides. The mismanagement of the War Department by the incapabilities at the head of it, has called forth the energies of Lord Panmure, who, it is said, proposes to reform the establishment over which he presides, by dismissing every one belonging to it, without respect to any qualifications that any individual may possess. This seems such a very unreasoning mode of dealing with a difficulty that, if my authority had been one less likely to be correctly informed than the *Observer*—which lays claim to a sort of demi-official character—I should not have believed that the War Minister would have made such a fearful onslaught on his subordinates as to have discharged them all at once. It is true that they are all "eligible to reappointment;" but it would be better that those who may have performed their duties diligently and faithfully should not find themselves liable to be turned off. It is something like hanging a man for the pleasure of cutting him down again, to deprive a public servant of his functions merely to restore him to his former condition.

Every body will admit the necessity for reform of the Civil Service, but it seems as if the old error would be committed in this case as in so many others, of beginning the reform at the bottom instead of at the top. If the clerks appointed the heads of departments, it would be a sound principle to commence the war against the present system with an attack on the clerks; but, as the chiefs have the appointment of the underlings, it is on the chiefs that the assault should be made. Purity and efficiency cannot exist permanently in the lower branches of the public service while the upper branches are corrupt and incapable. The most sweeping alterations or improvements amongst the inferior grades will soon lose their effect if the chiefs are to be exempted from the touch of Administrative Reform. "Like master, like man," is found to be a true saying, but the "man" does not impress his own qualities on the "master" by whom he is employed. If, therefore, we would have efficiency in the underlings, we must have efficiency in the superior grades of the Government offices; and it is little better than mockery to make stringent regulations applicable to those youths who seek to enter the public service, unless measures are taken to secure efficiency in the higher ranks. These reflections have occurred to me, as they will have occurred perhaps to many others, after reading the Order in Council prescribing new regulations for those who are candidates for Government employment. Certain examinations are to take place, which will be all very well if the public have full confidence in the examiners. Much, however, is to be left to the heads of departments, in all of whom the public will not have confidence, because those heads are a part of the very system which public opinion has condemned. If there is no appeal against the decisions of these heads of departments, but if they are permitted to exercise an irresponsible authority, a system of favouritism will spring up far more fatal to the hopes of ability and worth than even the practice of promotions by seniority, which, with all its faults, was still incapable of being made an engine for keeping merit back, though doing nothing to help it forward. Routine, which allows all to advance according to some fixed principle, though it be a faulty one, is preferable to a system under which, in violation of every right principle, the undeserving may be promoted above the man of worth.

One of the best means, perhaps, of obtaining a good body of public servants is to treat them with fairness at least, if not with liberality; and, while insisting on a faithful discharge of duty, it is unjust to refuse to listen to a well-grounded complaint.

The members of the Civil Service have for some years been remonstrating against the treatment they experience in having a large sum taken from them every year to provide what is called a Superannuation Fund, but which fund is diverted altogether from its proper purpose, and is applied to the general requirements of the State. Every civil servant has to pay, in addition to his income-tax of seven per cent, a superannuation charge of five per cent—so that twelve pounds are deducted from every hundred he is supposed to receive. This five per cent is nominally taken to provide for the possibility of some future superannuation allowance, but it has been calculated that one per cent would be amply sufficient for the purpose; and, consequently, every civil servant is mulcted of four per cent more than any other class of the community for the expenses of Government. If it is right that the civil servants bear this extra burden, by all means let them bear it, but let the principle be allowed, for it is a piece of dishonesty to take five per cent for a purpose upon which only one per cent is expended, while the balance is otherwise applied. Surely it is little better than obtaining money under false pretences to say to the civil servants of the country, "Your possible claim for superannuation requires a contribution of five per cent from your income," when it is a fact that only one-fifth of the sum is really necessary, and the remaining four-fifths are put into the pockets of the public, whose share in the burden of taxation is to that extent unfairly diminished. The weight has at last become so oppressive, that it is no longer endured with patience, and redress has been sought from two or three successive Chancellors of the Exchequer, who have promised to attend to a claim the justice of which it has been impossible to deny. Notwithstanding the high moral tone adopted by these gentlemen, their promises to rectify a piece of gross unfairness remain to this day unperformed. The subject has, however, been taken up by Mr. Macartney, an independent Member, who gave notice that, if the Government did not do justice to its servants, he would introduce a measure to redeem the country from the imputation of picking the pockets of those whom it employs. This has had its effect, and a bill is said to have been prepared by which the evil complained of will be mitigated, if it is not altogether remedied.

The appointment of Mr. Phinn to the Second Secretaryship of the Admiralty has been cavilled at, on the ground that a naval man is needed to write letters in a style of courtesy which a correspondence with naval officers requires. It used to be the general impression that a blunt straightforward manner was best suited to the nautical taste and character; but if our seamen, or rather our naval officers, are not to be addressed in any but the pink-note-paper mode of correspondence, they must be an altered, if not a greatly improved, class. Mr. Phinn, however, will no doubt throw a sufficient amount of the *suaviter in modo* into his correspondence to make it palatable to those who ought to attach the first importance to the *fortiter in re*. If there should be any difficulty on the subject a "Polite Letter-Writer" might be added to the library at the Admiralty, and thus the only objection raised by cavilers to Mr. Phinn's appointment would be removed.

If the art of polite letter-writing is necessary to an Under Secretary, it must *a fortiori* be indispensable to a Secretary of State, and the lately-published correspondence between the Earl of Aberdeen and Lord John Russell will enable the public to judge how far these statesmen possess the quality of epistolary elegance of style. If the best letter-writer makes the best Minister, neither of the two noblemen would rank very high, if he were to be estimated by the specimens that have recently appeared. Perhaps Lord John Russell meant the bitterest things under the fairest phraseology, but both he and his correspondent have displayed more of the wish than the ability to use language as an instrument for concealing thought. The real meaning of the writers peeps out in many parts of their letters when the words were evidently designed to convey a different sense to the persons to whom the communication is addressed. That Lord John meant more or less than he said is pretty obvious from the fact that he left Lord Aberdeen's Government because the War Minister ought to be in the House of Commons, and he has joined the Government of Lord Palmerston, whose War Minister is in the House of Lords. What Lord John Russell really wanted was to get rid of the Duke of Newcastle; but, as he was not candid enough to say so in direct terms, he must remain under the imputation of inconsistency, for, by his written letters, it is shown that he quitted one Cabinet on the plea of a certain change being necessary, which change has not been carried out in the Cabinet to which he now belongs. If this is the dilemma into which public men may get themselves by polite letter-writing, it would be better for their reputation if that correspondence were somewhat less distinguished for its politeness than for its plain speaking, for no graces of style will compensate for the absence of honesty and truth.

THE FORTIFICATION OF KAMIESCH. The last despatches from the Crimea announce that the fortifications intended to protect Kamiesch advance rapidly towards completion. The curious peculiarity of a fortified place created in the immediate vicinity of a besieged town, and during the siege itself, is not without precedent, and one of the most remarkable is, without doubt, the construction of Santa Fé by Ferdinand and Isabella, while they were besieging Granada in 1491. According to Madoz, Santa Fé was built in eighty days. In John Bigland's "History of Spain" we find the following:—"The Moors flattered themselves that the approach of winter would compel the Christians to raise the siege, but the measures which they saw them adopt soon destroyed this hope. Ferdinand, in order to protect his soldiers from the inclemency of the weather, had a vast camp of barracks solidly constructed with stones and mud, and covered with tiles, and in a short time this camp assumed the appearance of a town surrounded by distinct ranges of streets. The promptitude with which this construction was completed, and its extent and importance, proved to the people of Granada the perseverance of the Castilians." To return to the fortifications of Kamiesch, the announcement that their construction will only surprise those who may have forgotten that prudence is one of the surest elements of success in war, and that it must always accompany the valour which achieves that success. The propriety of fortifying the Bay of Kamiesch was long since decided on, and at the commencement of the present year the Emperor called the attention of the General-in-Chief to this important object. The severity of the weather, however, and the more pressing exigencies of the siege operations, did not allow the works being commenced as soon as was wished. Thanks to the arrival of the numerous reinforcements lately received by the Allied army, it is now carried on with great activity, and will soon be completed. Kamiesch is at the present time a French port, the importance of which will increase with the extension given to the operations in the Crimea. It was therefore essential that we should secure the possession of it by defensive works, which henceforth leave the enemy no possibility of disputing it with us. *Moniteur.*

OUR NATIONAL VICE.—Day after day, evening after evening, young ag ses soldiers carried in at the main guard upon stretchers in a state of helpless and beastly intoxication. Daily, not now alone, but for a long time past, the guard-room has its occupants furnished from this source, and daily almost it consigns to the wards of the hospital a proportion of the men put under arrest. But the number placed under arrest is no criterion of the number who are habitually intoxicated, or of the number thence deducted from the roll of service and thrown upon the hands of the medical officers. It will be easily understood that among such cases many are those of convalescent soldiers lately restored to the ranks, and who, while drawing large arrears of pay, are more than usually subject to the influence of ardent liquors. And this is not the whole of the matter. The spirits which are retailed to them in the town of Scutari are the rawest and most nefarious product of the country, and are adulterated to an extent which makes them poisonous. It is so much the custom of military officers to assume drunkenness as the inscrutable accident of a soldier that no sort of attempt has been made to check it. A few a very few—of the whole number who are daily thus wicked get punished; no summary measures are adopted with the rascally Greeks or Armenians who vend the liquors. It is one instance more where the responsible persons fold their hands and shut their eyes, and find in the limited quality of their own intellect consolation for the degraded morals of inferiors committed to their superintendence out of that charmed and blest circle where military creeds whee upon one everlasting pivot. Among all, however, officers or strangers, who as witnesses of the fact this spectacle of men to all appearance dead, some frothing at the mouth, as in apoplexy, continually borne, corpse-like, from the boozing den to the barracks, is universally a subject of remark.—*Letter from Scutari, May 11.*

A COLLIERY STRIKE. The strike of the numerous bodies of colliers employed at the pits surrounding Bristol still continues without present prospect of adjustment. The men, however, conducted themselves quietly during Saturday evening last, when some serious rioting occurred at Nailsea, Bonnington, about seven miles from Bristol. One man, named Rodgers, was so mercilessly beaten and kicked that he was left for dead, and had to be carried home in a state of unconsciousness. These disturbances continued till day-light came on, when the men dispersed from mere exhaustion.

A SUBMARINE RAILWAY.—The *Boulogne Gazette* says:—"There is once more a serious intention of uniting France and England by a submarine railway. The latest project is that of Dr. Payerne, who, with 40 subaqueous tunnels (of which he is the inventor), 1500 sailors and harvies, 4,340,000 cubic yards of material, and £10,000,000 sterling expenses, would undertake to construct a tunnel, by means of which the Strait that separates the two countries would be crossed in 38 minutes. The position of Boulogne would be, in fact, nearly parallel with that of the electric telegraph, and contiguous to it, so being the nearest part of the Channel, as well as that where the [illegible]."

ENGLISH GARDENS IN THE CRIMEA.—In about a month's time there will be immense crops of English vegetables growing in the vicinity of the Fegnis hospitals in Turkey and in the Crimea, for the use of the sick, as well as a supply of vegetables and grasses in the neighbourhood of Balaclava and Sebastopol. Mr. Pirge, the seed-merchant, of Southampton, who has been selected by the Government to stock the English possessions in the Crimea with herbs and vegetables, states that the whole of the immense stock of seeds he sent out in the *Medway* will be up in about three weeks after they are planted. The seeds of those vegetables which grow quickest were sent out in the largest quantities.

THE MOUNTGARRETT PEERAGE.—This celebrated "romance in real life" is not yet concluded. The Court of Exchequer has unanimously granted the application of the plaintiff (Mr. F. S. Butler) to proceed with his bill of exchange in relation to the rejection of evidence on the last trial. The case now goes into a court of error.

The *Univers* says that the French caravan of pilgrims has "happily terminated" its excursion to the Holy Land. On the 5th inst. they embarked in good health to return to Europe.

Thirty-one emigrant ships have left Liverpool for all foreign parts during the present month, with an aggregate number of 11,577 passengers on board; of whom 8756 were for the United States.

The vine disease has already made more havoc in Portugal than it made in last year in all the month of June; and it threatens a year of famine next to no wine.

THE RAMAZAN.

THE annual Turkish fast called Ramazan commenced on the evening of the 16th ult. at set of sun. The observances were of the usual kind. The mosques were illuminated with all the skill for which the Orientals are famous, and during all the night the voice of merriment and rejoicing was heard in the lanes of Stamboul. The fast falling as it now does, in the summer months, is most oppressive to the strict observer, who will not touch a drop of water or inhale a whiff of tobacco during the fourteen hours which elapse between the rising and setting of the sun. The observance is doubly onerous at present, as large bodies of Mussulmans are now employed by European Governments and individuals, who insist on continuous labour during the greater part of the day. The men engaged in baking bread and roasting coffee for the Allied armies, and even the workmen employed in the service of the Turkish fleet and army, are obliged to exert themselves during the whole length of a summer's day without rest or refreshment. However, all Mussulmans insist on quitting their toil an hour before sunset, so as to be in readiness for the sound of cannon announces the hour of deliverance from their long-borne abstinence.

Our Artist at Constantinople has accompanied his Sketch of the Ramazan with these details:—

Wandering about a few nights ago, in the suburb of Tophana, we entered, with two friends, the inner yard of the mosque, the interior of which we could perceive was brilliantly illuminated. We ascended the steps, and could see very well the interior with the chandeliers, throwing a phosphoric light on a crowd of persons faithful; when the sound of a Turkish priest looking upon us with a rather indignant expression, made us desist from our curiosity, lest it should be deemed an intrusion. Children were playing in the yard; cake and sugar-plum sellers were marketing; and this glimpse of every-day Turkish life presented a strange contrast with the devotional scene within the mosque.

The characteristics of the month of Ramazan (the Mohammadan's Lent) are thus described:—

The day is passed, by the rich at least, in sleep, or in total idleness. Every Moslem, with the exception of travellers, children, and invalids, is forbidden to taste food or drink, to smoke or take snuff, from sunrise to sunset, and very their wretched do they look, squatting on their divan or at the door, without favourite pipe in their mouths, and having no other occupation than counting

THE GRAND REVIEW OF THE FRENCH TROOPS AT CONSTANTINOPLE, BY THE SULTAN.

their beads. As the Turkish month is lunar, the Ramazan runs through every season in the course of thirty-three years; and, when it occurs in summer, the labouring classes suffer severely from exhaustion and thirst. "I have seen the boatmen," says Mr. Turner, "lean on their oars almost fainting; but I never saw one who met with any one who professed to have seen an instance in which they yielded to the temptation of violating the fast." The moment of sunset is, of course, eagerly looked for: it is announced by the firing of cannon. It might be imagined that the first act of the hungry and thirsty would be to eat and drink; but numbers of Turks may be seen, their pipes ready filled, and the fire to light them in their hands, awaiting the welcome signal, every other gratification being postponed for that of inhaling the fragrant weed. The night is passed in devotional forms and revelry. All the mosques are open, and all the coffee-houses; the latter are crowded with Turks, smoking, drinking coffee, and listening to singers and story-tellers. The minarets are illuminated, and the streets are crowded with the faithful.

REVIEW OF THE FRENCH ARMY OF RESERVE.

THE Review of the French Army of Reserve, at Maslak, by the Sultan (of which our Artist has here given a Sketch) previous to its embarkation for the Crimea, took place on the 13th of May. So far as the troops were concerned, the spectacle was a splendid one. The various regiments were in first-rate condition, and performed evolutions common on such occasions with admirable precision. The Sultan seemed very much pleased with the appearance and movements of the two regiments of Carabiniers. The only drawback on the affair was the want of a good attendance of spectators. Nobody in Stamboul or Pera knew that the review was to take place; and our official people, instead of making as much noise about it as possible, contrived to keep it almost a secret. The result was that not only were there hardly any Turks present, but that only a few of even of the 300 or 600 French, English, and Sardinian officers at present in Constantinople were there. Considering how good an opportunity the Review at Maslak offered of impressing the Greek and Turkish population with a proper sense of the power of the Allies, it seems strange that no advantage should have been taken of it.

The Cavalry Division, under the command of General d'Allonville, left Constantinople for Kamiesch on the 15th; and the Imperial Guard, under General Regnault St. Jean d'Angely, on the 16th. We shall, no doubt, hear of their doings in the Crimea before long.

Now that the French army has left Constantinople, another army or reserve is about to be formed in the neighbourhood of that city. The last accounts from there say that General Vivian was about to organise in the Plain of Unkiar-Skelessi a camp of reserve of 25,000 men, composed of the Anglo-Turkish Legion now in course of formation, and of Turkish regulars. The superior English officers belonging to the Camp would have their head-quarters in the Russian palace of Buyukdere.

THE RAMAZAN, IN THE MOSQUE OF TOPHANA.

GRAND REVIEW OF THE FRENCH TROOPS AT CONSTANTINOPLE, BY THE SULTAN.

LITERATURE.

MOREDUN: a Tale of the Twelve Hundred and Ten. By W. S. Low and Son

When a certain Mr. Ireland—once a notorious, but now an almost forgotten personage—fabricated a play, and attempted to palm it upon the public as a lost and recovered work of Shakspeare, he contrived to throw our literary world, for a short time, into no small commotion. By a cunningly-devised story, supported by manuscripts and other articles of evidence, ingeniously concocted, he found means to gain believers and to enlist partisans. Numbers on both sides joined in the fray; and, so long as the work itself remained unknown, the controversy respecting its genuineness was hotly carried on. At length "Vortigern" was acted, and there was an end of the matter. The play itself proved, in every line, that it was an impudent forgery, and sank at once into insignificance and oblivion.

We have now another literary forgery of a similar kind, which must have a similar fate. Some six or eight months ago a Frenchman, named Cabany, brought forward a story of the discovery of an unknown romance of Sir Walter Scott, the manuscript of which had fallen into his possession, and which he was about to give to the world. The story was improbable enough; but, as the members of Scott's family and his friends who would have been able to judge decidedly of its truth, were by this time dead, it could not be positively contradicted. Several of Scott's surviving friends showed that it was unlikely that Scott should have written such a work or should have disposed of it in the manner related by this M. Cabany. But it is well known that truth itself is often improbable—that "le vrai n'est pas toujours le vraisemblable," nobody could deny that the story *might have been* true, however strange it appeared. To the arguments of those who impugned its truth on the score of improbability, it was not difficult to find at least plausible answers; and the skirmishing that has been going on in the columns of the London and Paris prints has certainly served to shout the book, and served the purpose of an advertisement. But its publication puts an end to the controversy. There is no use in saying a word more about the truth or falsehood of the story told by its self-styled discoverer, when every page of the book itself proves beyond dispute that it is a barefaced and contemptible counterfeit. It is quite unnecessary, therefore, to take any notice of the long controversial introduction prefixed to the book, beyond saying that, though signed by the Frenchman, Cabany, it is evidently the production of some Scotch man—probably the writer of the book; and that the fraud is aggravated by the insolent and abusive style employed in its justification.

As to the book itself, it is beneath criticism. There are many clever copies which have something of the spirit of the original, but this "Moredun" has not a grain of merit—even considered as an imitation. From the first page to the last it does not show the faintest spark of the genius of Walter Scott. Several plays ascribed to Shakspeare have given rise to controversies which last to this day. "Titus Andronicus," for instance, and "Pericles." Few have ventured to contend that these pieces are entirely from the pen of Shakspeare; but many maintain that they have passages of power and beauty which undeniably show the master's hand, and this *partial* authorship is explained from the circumstance of his having been the manager of a theatre. But in "Vortigern" there were no such indications; and, therefore, it was at once and unanimously set down as altogether spurious. Had "Moredun," however, if feeble, as a whole, contained here and there a trait of beauty or strength, or humour, akin to the genius of Scott, such things might have afforded grounds for ascribing to him the authorship of the whole: for, in his case, there could have been no divided authorship. It might have been said that the book was an early work, when his powers were not matured, or a late work, when his mind was in decay. But, on either supposition, it would have had some mark of individuality—something characteristic of the author. Even in the weakest of Scott's known works—even in "Count Robert of Paris," or "Castle Dangerous"—we still have a great mind before us, although it be a mind in ruins. But in "Moredun" there is nothing of the kind. We find a bald and mechanical mimicry of some of the most palpable peculiarities of his manner—peculiarities which have been copied by other imitators with far greater dexterity and success—and these are the only things that remind us of Scott for a single moment. We do not insist on anachronisms, or deviations from historical accuracy; these were often committed by Scott himself, though redeemed by his surpassing excellences. But here there is no redeeming point. The story of "Moredun" is commonplace, and void of interest: the characters are mere lay-figures, not (like Scott's) men and women of flesh and blood; cold abstractions, not living and breathing individuals whom we learn to know and sympathise with, as if they were realities. Scott's style, though careless, is always fresh and vigorous, and often rises to the highest eloquence. The style of this book is uniformly flat and vapid, and often affected and turgid. The attempts at humour are vulgar, and without a vestige of Scott's peculiar geniality.

The publication of "Moredun," in short, has given it its *quietus*. No evidence, however ingeniously got up, can stand against the intrinsic evidence of utter worthlessness.

WINE: ITS USE, AND TAXATION. An Inquiry into the Operation of the Wine Duties on Consumption and Revenue. By SIR EMERSON TENNENT. Madden.

In France and England, where the climate, owing to the influence of the Western Ocean, and particularly to the great body of water called the Gulf Stream, that is continually flowing from the Torrid Zone, is much warmer than the other parts of Europe equally far to the north, the grape ripens in the open air tolerably well in favourable seasons much to the north of 48°. In England it sometimes comes to perfection in 52°; but, as the rule, no wine is made from grapes north of 48°; and this parallel of latitude marks the line beyond which the grape cannot be successfully and extensively cultivated. Every country, however, every degree of latitude, is peculiarly favorable to the production of some particular commodities. Nearly every zone produces those which are essential to the continuance of man on the earth; while the products that contribute in a less degree to his welfare, but are convenient, agreeable, and useful—like tea, wine, coffee, silk, cotton, and gold—are found or obtain'd only in some limited and comparatively narrow districts. All these, however, being equally acceptable to man in almost all conditions and all places, the production of them in limited districts is as plain a command issued by nature for the inhabitants of these districts to exchange these various products of one another, as the effects of cold and rain constitute a command to use shelter and clothing. That these districts are inhabited by different nations, and have different manners, customs, and government, does not alter the command. The want—be it of wine, of gold for money, or of clothing—is common, and can only be gratified permanently and continually by mutual exchange. Violence and rapacity, which are sometimes had recourse to, put an end to production, and gratify the want of a few for the moment. Mutual exchange gratifies it perpetually, and extends the want—it grows by what it feeds on—

> A bounteous plenty is the robe,
>
> and—
>
> Trade is the golden girdle of the globe.

No individual, like Robinson Crusoe, is now to be found, compelled to make for himself every thing he needs. Each one produces only some small part of what he and what others use—be it a book, cloth, corn, government—and buys the bulk of everything he consumes from others. This takes place as men flee to shelter and clothing in winter, and take food when they are hungry—in obedience to the commands of nature, and these commands are not limited by political boundaries, though given by means of climates, probably of degrees of latitude. The mutual exchange essential to the welfare of all the inhabitants of London, who could no more live without having recourse to it than they can fly, and equally essential to all the inhabitants of our country, is also essential to the welfare of the inhabitants of different countries. What is everywhere good for individuals must be good for nations. Acting, however, in ignorance of this great natural ordinance, political communities, under the influence of superstition or national enmity, have laid heavy restrictions, or prohibitions on their trade with one another, and without knowing what they were doing have impeded division of labour, the progress of general opulence, welfare, and civilisation. For a long period England, very ignorant and very jealous of neighbours now her fast friends, was conspicuous for restrictive, mischievous, and prohibitory legislation directed against them. Trade with remote countries was encouraged, and hence it came to pass that England had and has more trade with the yet comparatively few inhabitants of the United States, possessing a climate similar to that of Europe, than with the whole of Europe. With it her trade as a whole is probably less than the trade of the inhabitants of England, one with another. These two facts show that political prohibitions and restrictions are exclusively the causes why trade with our neighbours is so small. An important part of our old restrictions and prohibitions was a heavy duty on wine the produce almost exclusively of Europe to the south of 48 deg. It has been as high as 12s. 8d. per gallon on French wines; but is now 5s. 9½d. per gallon on all wines, except those made at the Cape of Good Hope. Originally imposed on a luxury from political motives—a much heavier duty than at present was formerly imposed on tea—the Wine duties are now continued as a source of revenue, though one may be said to be, quite as much as tea, a necessary of life. Considering how much the price of tea, of coffee, and of the coramoner sorts of wine has fallen within a century, our present duty on wine is quite sufficient for the consumption, and effectually to stop the growth of our trade with the wine-producing countries of Europe, which produce little else than wine for exportation. This great social consequence of our taxation on wine, is not at all considered by Sir Emerson Tennent, nor does his book, though the word stands in its title, treat of the use of wine. It is strictly limited to the immediate effects of the Wine-duties on our revenue, and so strictly limited, that it does not include in his examination any, much less all, the events contemporaneous with the changes on the Wine-duties, such as the reduction on the duties on other commodities, and a general reduction in price, which have prevented the reduction in Wine-duties from leading to a largely increased consumption. We therefore consider the principal conclusion of his book, which all his remarks tend to support—viz., that the present duties on wine, of about 5s. per gallon, are the very best to promote consumption and secure a large revenue—to be deduced from insufficient data. It is exclusively drawn from a restricted view of the Wine-duties, without taking any other classes of facts into consideration; is consequently unphilosophical, and, like all errors, full of mischief. It would be useless now, however, when such a strain exists on the national resources, to controvert it at length, and advocate a reduction of Wine-duties: and we must, therefore, content ourselves with expressing our dissent from the author's elaborate conclusion, and our conviction that a great reduction of the Wine-duties, whenever the Legislature has the opportunity and the courage to carry it into effect, will be a great social, moral, and pecuniary benefit.

The tendency of Sir Emerson Tennent's mind—from occupying an official position, and from long association with the Protectionist party gives a bias to his work. On the Committee which sat to inquire into the effect of the Wine duties, he endeavoured to elicit information unfavourable to reducing them. He is the enemy of high duties.

But after the reader is put on his guard against Sir Emerson's tendencies, and his erroneous conclusions, he may study the book with great advantage. The mere fiscal history of our Wine-duties was never so well written. The causes and successive changes made in them in modern times, and the effects of these changes, were never so well described. To our statistical literature the book is a valuable addition, and it is full of useful information. It supplies evidence of the general decrease in the consumption of alcoholic liquors in Europe in proportion to the increased consumption of coffee, tea, and other non-alcoholic drinks. The upper classes throughout Europe or France, as well as in Britain and Ireland, or Holland and Belgium, and probably in Germany, drink much less wine than formerly. In France, the consumption of wine by the lower classes is increased. With abundant evidence of increasing sobriety, there is really very little occasion for the exertion of Temperance and Total Abstinence Associations, though they are likely to claim the credit of an improvement which does not originate with them. The localities favourable to particular wines, and the narrow spots, rigidly bounded, on which alone some of the most valuable sorts will grow, are by the author amusingly brought under notice. These spots are few, as Hock on the Rhine, Dueelas in Portugal, and Sercial in Madeira. The Madeira grape produces at the Cape of Good Hope a wine vapid, earthy, and almost worthless. In only one valley of Madeira can Malmsey be produced, and only on one farm of the Cape is Constantia made. The famous Johannesberg, or white wine, is made exclusively from the grapes that grow on the south side of a single hill at Steinberg, from the vines of single gardens. A single farm of about eighty acres is the sole spot that will produce the costly Clos-vougeot, a famous French wine; and a spot still less, only six acres and a half, is the only place where Romanée Cinto can be made. Mont Rachet, another famous wine of the Côte d'Or is the produce of a space almost as limited, and yet it is distinguished into three kinds of unequal goodness; and no art can make vineyards. divided only by a ditch, produce perfectly alike in soil and situation, produce the same wine. In general, however, the fascinating part of the subject, which has engaged the attention of many agreeable writers, is not so well treated of by Sir Emerson Tennant as the fiscal and statistical parts. In this latter and limited sense the work is the most complete, while it is much condensed, that has ever been published on the wine trade

THE ERUPTION OF VESUVIUS.

THE present eruption of Vesuvius is similar to the one of 1736, which, in Ansljo's "Sketches of Vesuvius," is described as the thirty-first eruption, and the stream of lava which issued from the mountain in that year, 1736, when several small craters broke out on the north side of the great cone facing the ridge of Somma. In January, 1786, the eruption greatly increased, and the lava, issuing from a rent near the small craters, flowed along the Atrio del Cavallo into the Fossa Vetrana; and at the commencement of the ravine, between the Canteroni (the ridge on which stands the Hermitage) and the ridge of Somma, it fell over a perpendicular precipice sixty feet in height, forming a cascade of molten lava—glowing and red as iron from the furnace. Proceeding down the ravine, or ravine, it overflowed the Little Chapel of the Madonna della Vetrana, forced a passage through it, leaving the side walls standing, and serving as sides or channel to the glowing torrent. After running several hundred yards down the Fossa, it ceased to flow, and the inhabitants of the country lower down were relieved from all fear of injury. The present stream is also taking the course of two of the immense streams of lava which poured down the mountain in the great eruption of 1631, and desolated a vast extent of country. These two streams destroyed part of the villages of Massa, St. Sebastian, Madonna dell'Arco, and St. Jorio; and these same villages—with their beautiful gardens, vineyards, and splendid villas—are, by the last accounts, all threatened with destruction.

A letter from Naples, dated May the 16th, says: "Vesuvius has now nearly done its bidding, and seems disposed to rest from its labours. I speak of course comparatively, for it is still active—still forms a magnificent spectacle from the capital. The cascade of lava, which at the commencement of the week is now a blackened mass; and, contrasted with its late brilliant appearance, strikes one as if it had been arrested by some fell disease which had converted it into this stiffened, discoloured mass. But little if any further damage is now, I think, removed, and has been for several days. There was a suspension of the flow of lava for about eighteen hours. The surface of the stream, in this time, became hardened, and whatever new material issues from the crater flows over the old lava, and has scarcely strength to reach so low down as the older stream. It rather has a tendency to flow sideways at the apex of original branches, and if it does so may destroy some chestnut trees or vineyards. It is consolatory to be able to state that not one life has been lost, though many have been in danger, from mere foolhardiness, from walking over ground where no human foot had been, or peering into fierce vomiting fire and smoke, for no other earthly reason than to be able to say that they had done it. The foreign journals, I see, have killed many unfortunates prematurely; and even here, at Naples, common report has put many *hors de combat*, but beyond two or three casualties which have been sent to the hospitals, I have heard of nothing more. The reason is, undoubtedly, that this eruption has sent forth less vapour than shot up vast rocks. As to the material damage which the landholders on the line of the stream have suffered, it is nothing compared with what it might and must have been had it not been for the temporary suspension and cooling of the lava; whole townships must have been swept away, and a blackened waste appeared where once were smiling vineyards and pretty 'well-got up' villas."

EXPORTS AND IMPORTS. The Board of Trade returns for the month ending the 30th of April, shows an increase of £320,679 as compared with those at about the same period of last year. The increase, however, has been chiefly in goods of the character of raw material, such as oil seeds, and the yarns of cotton, linen, wool, and silk, and consequently indicates an improved feeling among the Continental and other foreign manufacturers, rather than any particular activity on this side. Cotton manufactures exhibit a good total, but haberdashery, hardwares, saddlery, metals, &c., still show the absence of revival in the trade of the Colonies and the United States. With regard to imported commodities, the principal feature continues to be the smallness of the quantities of foreign grain and flour. Of salted provisions the consumption has been large. Coffee, cocoa, sugar, spices, tobacco, and spirits have likewise been extensively used. Tea shows a diminution, which has brought the quantity taken thus far during the year down to the limit of the first four months of 1854.

TRADE WITH THE BLACK SEA.—During the past week a large number of vessels have arrived at Hull from Constantinople, Odessa, and Kertch. The receipts of linseed at this port from the Black Sea exceed in quantity those of the corresponding periods of former years, when we were at peace with Russia.

THE INDIAN DEPARTMENT IN THE PARIS EXHIBITION.—The parties in charge of this portion of the great industrial display have contrived to employ both their English *employés* and the Parisian public. French attendants are employed in the Indian department on Sundays, and the Englishman at liberty to solve rise the day as their consciences dictate.

FINE ARTS.

THE ARUNDEL SOCIETY.

THE publications for the sixth year of this society consist of a third series of eight engravings by the Dalziels, after Mr. Williams's drawings from the frescoes by Giotto in the Chapel of the Arena at Padua, and a continuation of "A Notice of Giotto and his Works in Padua," by Mr. Ruskin. The artistic portion of the contribution is executed in the same satisfactory manner which marked its predecessors. When completed, the series will prove of the highest interest and advantage in promoting a knowledge of the growth of modern art in the earlier stages of its history.

While, however, we hail with satisfaction this attempt to revive the creations of genius of a bygone age, but whose influence will survive to all time, we cannot help wishing that the critical matter which accompanied them were more in harmony with the feelings which we think they should properly inspire. It is as the founder of modern art that Giotto has always claimed to be considered; and his works are interesting and valuable as affording the earliest *indicia* of the distinctive life principles which characterised that art. To study them well and profitably, one must be imbued with a congenial spirit, having shaken off the trammels of Byzantine mannerism; and, if we rightly understand them, we must rejoice at each innovation—certainly not rebuke it by contrast with exploded dogmas. Yet this is not the spirit in which Mr. Ruskin deals with his subject. No veneration for time-established renown restrains his critical propensity; no magic of the artist's master-pencil can awe him from the attempt to find fault with what does not exactly meet his peculiar predilections, and which, perhaps, he does not exactly comprehend. As a whole, these "notices" are disparaging of the fame of the great Florentine, and exactly upon those points wherein his chief merit has always been held to consist. The qualities which essentially marked the style of Giotto, as distinguished from almost all who had gone before him, were inventive power, a bold resistance of the arbitrary types and methods of the Byzantine and Romanesque schools, and a highly poetical method of treatment evinced in the introduction of natural incidents and dramatic action in the motives. It may be added that these frescoes in the Arena Chapel are of importance, as being amongst the earliest examples of the development of this aspiring genius in the new line in which he was so soon followed by innumerable successors throughout Italy. But it is for these very peculiarities that Mr. Ruskin finds fault with Giotto, he considers them evidences of a heterodox spirit, unworthy of grand ecclesiastical art, and repugnant to the established formulæ of dark and forgotten ages. Hear what he says of a charming feature which distinguishes the fresco of "The Presentation in the Temple." It is an error, by the way, at starting, to describe Giotto as the head of "the Nazaratine School;" that distinguishing appellation not having been introduced till nearly three centuries afterwards—namely, on the downfall of the grand Historical School, the foundations of which he laid. Nevertheless, thus writes Mr. Ruskin of this masterly composition:—

> The design is one of those which are peculiarly characteristic of Giotto as the head of the Naturalist. No painter before his time would have dared to represent the child Jesus as desiring to quit the the arms of Simeon, or the Virgin as in some sort interfering with the Prophet's earnest contemplation of the child by stretching her arms to receive him. The idea is evidently a false one, quite unworthy of the higher painters of the religious school; and it is a matter of peculiar interest to see what must have been the strength of Giotto's love of plain facts, which could force him to stoop so low in the conception of this most touching scene. The child does not, as will be observed, merely stretch its arm to the Madonna, but is even struggling to escape, violently raising the left foot.

This one passage would be sufficient of itself to illustrate the bias of the critic's mind, and to show how entirely he and his subject are at variance. We need not wonder at his other strictures, which are of a nature to denude the one famous Giotto of the robes of honour with which till now he has been arrayed. Thus, of "The Massacre of the Innocents," we are told:—

> Of all the series, this composition is the one which exhibits most of Giotto's weaknesses. All early work is apt to fail in the rendering of violent action; but Giotto is, in this instance, inferior to many of his successors, but to the feebler of the miniature-painters of the thirteenth century: while his imperfect drawing is seen at its worst in the nude figures of the children.
>
> "The Baptism of Christ is universally considered to be the greatest of the latter series; and of "The Wise Men's Offering," I cannot but be still more certain, that it is perhaps the least powerful of all the series, and several little defects in detail are pointed out in the "Presentation of the Young Christ in the Temple," Mr. Ruskin says:—"Giotto has fallen considerably below his usual standard." What that standard is we are not informed, nor what the grade in the order of merit conceded to him, after allowance made for numberless errors of omissions and commissions. "The faces appear to be cold and hard, and the attitudes are as little graceful as expressive either of attention or surprise. The Madonna's action, stretching out her arms to embrace her son, is peculiarly, *but on the whole the picture has no value.*"

With this we close the operation of comparing notes with Mr. Ruskin touching the merits and claims of Giotto. Of Mr. Ruskin's fertile imagination and extraordinary creative fancy we have had occasion to speak at some length at different periods. Here is a "flight" concerning Angels which may be worth preserving among the canons of modern criticism:

> There is noticeable here, as in all works of this early time, a certain confidence in the way in which the angels trust to their wings, very characteristic of a period of bold and simple conception. Modern science has taught us that a wing cannot be anatomically joined to a shoulder; and in proportion as painters approach more and more to the scientific, as distinguished from the contemplative state of mind, they put those wings of their angels on more timidly, and dwell with greater emphasis upon the human form, and with less upon the wings, until these last become a species of decorative appendage—a mere sign of an angel. But in Giotto's time an angel was a complete creature, as much believed in as a bird; and the way in which it would or might cast itself into the air, and lean hither and thither upon its plumes, was as naturally apprehended as the manner of flight of a chough or a starling. Hence Dante's simple and most exquisite description of an angel, "Bird of God;" and hence also a variety and picturesqueness in the expression of the movements of the heavenly hierarchies by the earlier painters, ill replaced by the powers of foreshortening, and throwing naked limbs into fantastic positions, which appear in the cherubic groups of later times.

"THE DEPARTURE" and "THE RETURN." By Mr. SOLOMON.

Mr. Solomon's two clever pictures, "The Departure" and "The Return" (familiar to visitors to the Royal Academy Exhibitions during the last two seasons), are of a nature to enlist the domestic sympathies and to afford a useful and encouraging lesson; and we are not, therefore, surprised to find that they are already in the hands of the engravers with a view to publication. Mr. W. H. Simmons is the engraver to whom they have been entrusted; and, previously to the commencement of his labours, the pictures are now temporarily on view at the rooms of Messrs. Colnaghi and Co. "The Departure" represents the quiet in life of a young lad destined to seek his fortunes in Australia. The scene is the interior of a second class railway carriage, where, nervous, ill at ease, yet manfully struggling against the home regrets which rise in his bosom the poor stripling is surrounded by his sorrowing mother and sister to the port where he is to join his ship. The incident is a touching one of every-day life, told with admirable power and feeling. In the picture of "The Return" we find the lad, now advanced in years to dawning manhood, seated in a first-class carriage; his mate's uniform telling us of his most honourable service and well-earned promotion. Two other figures complete the group; one, that of a comfortable and evidently wealthy old gentleman of the olden school, who listens with interest to the young man's account of his adventures, and his plans for the future; the other that of the old gentleman's fair-haired, blue eyed daughter, who, like another Desdemona, treasures up each word which falls from the young hero's lips, and who is evidently destined to become his guiding star in the future voyage of life. The latter picture has been somewhat altered in the arrangement since it was exhibited, and with manifest advantage. We have no doubt these pictures will become popular.

M. R. MONTI'S LECTURES ON SCULPTURE.—M. Raphael Monti delivered the first of a series of lectures on sculpture, on Wednesday, at his studio in Great Marlborough-street, before a select and attentive audience. After some general introductory remarks, the lecturer confined himself in this discourse chiefly to the sculpture of the ancient Egyptians and Assyrians, which he illustrated with numerous well-executed diagrams. In his next lecture, M. Monti will treat of the art of the Indians, as exhibited in their numerous remains.

TOWN AND TABLE TALK ON LITERATURE, ART, &c.

THE Lords who preside over our learned London societies have just fulfilled the yearly honours of their presidencies in a manner worthy becoming to the position of each. Thus Earl de Grey has been entertaining the Institute of Architects in St. James's-square, with his fine Vandykes, and something new as well, bearing immediately on architecture. Thus the Earl of Ellesmere has been entertaining the Geographical Society with his Orleans acquisitions, and maps, and other matters relating to recent discoveries in geographical knowledge. Thus Lord Londesborough has been entertaining the Numismatic Society with his own collections acquired since their last annual meeting. At each gathering everything went off most satisfactorily. This is cheering. Our nobility are now attending to learned studies. We have already named three noblemen particularly suited to represent the institutions over which they preside; nor should we forget that Lord Wrottesley is the President of the Royal Society, and Lord Stanhope the President of the Society of Antiquaries.

We renewed our knowledge, during the present week, of that part of the British Museum to which Whitsun visitors are admitted, and were pleased to see at every turn fresh evidence of the interest which the skilled mechanic is taking in the treasures there assembled for the information of the world. The galleries and compartments were thickly crowded with labouring men, accompanied by their wives and children. There was less noise, greater curiosity, and less touching than we remember on any other occasion of the kind. We saw more guide-books in the hands of young men—and, better still, a more constant and sensible reference to them. Every facility for seeing the Museum, accompanied with due security from fire, should most certainly be afforded to the people. Nor are the authorities inactive to this portion of their duties. On Saturdays, from twelve till five, during the months of June and July, the Museum is now, for the first time, open to the public. This is to meet the Early Closing movement—and a very good meet it is. What is Mr. Franks about—or rather, what are the Trustees of the British Museum about, that the Collection of Antiquities relating to this country, make as yet so sorry a display in the room set apart for their exhibition? Mr. Franks is a most excellent public servant, admirably suited for the position he has been selected to fill. There is no fault with him. The Trustees already possess a fine collection of good things, meriting display. A room, with cases and titles, into which the public are admitted, has been lotted out for their exhibition, and yet, after three years' waiting, we can see nothing more than a scanty settlement of things only sufficient to provoke a smile. Surely the fault is with the Trustees. An exhibition of Medieval Antiquities, such as the country has in its power almost to improvise, would be found one of the leading attractions of our great Museum, and should therefore be set about and completed forthwith.

We must be late in the field (our readers will know why) in giving our opinion upon the literary merits of the novel called "Moredun," which M. Cabany has attributed (we use a light expression) to Sir Walter Scott, and Mr. Sampson Low has now published. We took an active part in canvassing the authenticity of the MS, and ended our controversy with M. Cabany by allowing the work to stand, not on its attributed importance, but upon its own literary merits—feeling (with the public generally) that Sir Walter's hand was not to be mistaken

If M. Cabany was deceived the public has not been deceived: the published "Moredun" (so the world of London letters has pronounced) is not the work of the author of "Waverley." Its real author is not a "Great," but a 'Little Unknown."

The last week has witnessed two literary announcements, one of which is sure to be received with pleasure by hundreds of thousands we might say millions—of persons in England and America; and, indeed, wherever the English language is spoken or English genius appreciated. The second is almost equally sure to be welcomed with gratification by a smaller and more select circle. The first is a new work by Mr. Charles Dickens, in shilling parts, with illustrations by Hablot Browne—to make its appearance in November: the second is a new volume of poems by Mr. Alfred Tennyson.

The muse of the Poet Laureate has produced a volume called "Maud and other Poems." The name is not happy, inasmuch as it is provocative —

> Is there a poet much bemused [be-Mouzed] with beer,
> A maudlin poetess, a rhyming peer?

So sings Pope; but Mr Tennyson is essentially a poet, and we have no fear of receiving maudlin poetry from his muse. We all remember (it occurred in our own time) the unhappy tale of "Poetic Virgils," said to have been printed "Poetic Virgils," and the "Prose and Verse" of a real wit which a cockney compositor or a good-natured friend reduced to "Prese and Worse."

Theodore Hook's cottage at Fulham, modestly sitting under the shadow of the trees of the See of London, that skirt the Thames where our noble river is last seen in her pastoral character, is on the eve of destruction. The hammer of the auctioneer is scattering white we write the parterres and upland lawns of Wimbledon, which the late Mrs. Marryat (that liberal supporter of all our Horticultural Exhibitions) formed and decorated with a true relish for Nature in her happiest mood. Associations vanish from before us too rapidly. What cannot Time destroy?

> Where's Troy and where's the Monopole in the Strand!

Time, the genius of improvement, and the march of commerce are fast removing some of our interesting associates in the environs of London. Other associations will grow up; but we must regret many that are irrecoverably gone.

There is an addition to the objects of interest preserved in Greenwich Hospital, which deservedly attracts a crowd of thoughtful spectators. In a glass case, close to the case containing the coat which the heroic Nelson wore when killed, is now to be seen the few, but suggestive, remains of the ill-fated Franklin and his followers. Here are silver spoons, broken watches, a few gold and silver coins, and other metal trinkets, known to have formed part of the outfit of Franklin and his friends. Some bear crests and ciphers, and all seem to speak of hunger and endurance—of bold enterprise and heroic daring. Before these last memorials, from eyes unused to tears, tears have been seen to fall.

As we are to have a new volume of poetry, so are we to have a new and solitary Engraving. Mr. Moxon is to give us the "Maud" of Tennyson; and Mr. Graves is to publish, on the 18th of June, a large and excellent engraving by Atkinson, from Sir Edwin Landseer's picture of "The Great Duke Revisiting Waterloo, in Company with the Marchioness of Douro"—the present Duchess of Wellington. Our readers will remember the picture, and Mr. Atkinson has wrought (so say judges) with a vigour and refinement uncommon of late years an our English school of engraving.

DISCOVERY OF RELICS IN THE GLASGOW CATHEDRAL.—A discovery of a very interesting character was made in Glasgow Cathedral a few days ago. While the workmen were removing the flooring from the spot lying exactly between the two eastmost columns on the south side of the choir, they came upon two stone slabs, under which a long sheet of lead was exposed to view. Removing this lead, a long narrow stone-pit grave was found filled with fine sand and dust; and when this was partially cleared away, the skeleton of a full-grown man was seen, lying with the head to the west. This spot joins the site upon which stood the high altar of the Archiepiscopal Church of Glasgow, and which must in former centuries have been a most sacred sanctuary. The idea that these are the relics of some ancient "Father in Israel" is strengthened by many circumstances. Amongst the débris was found pieces of strong brown silk, and to some of the leg bones this material was found adhering in several folds, showing that it had been wrapped round them, and rendering it plain that the whole body had been swathed in a similar manner. In addition to these silken bands, another material was found, of much more elaborate texture, consisting apparently of a line of fringing or trimming, in which the representation of flowers, exquisitely worked, is still quite visible. Neither wood nor lead had been used to enclose the body, nor was the stone coffin of a character similar to those which have been found in other parts of the cathedral, and are still shown in the crypt.

CHESS.

TO CORRESPONDENTS.

DERBYON.—Your Solution of the elegant Problem we extracted from Lucena's work is he true one.

S. W.—To appreciate the extreme beauty and difficulty of such a stratagem as the "Indian Problem," a great deal more knowledge of Chess is required than you possess. When you have advanced beyond the rudiments of the Game you will understand that it may be one of the easiest things imaginable in a given position to make us five moves, while to do so in four, may cost a shrewd brain some days of hard study.

C. F. H.—Very acceptable. Many thanks for your attention.

HINDOO, Cambridge.—You will find it impracticable, if Black play *K to K 5th* on his second move.

M. L., Guernsey.—The "Chess-Player's Handbook," published by Bohn, price 5s.

C. F. H., 79, Corvus, Seta, Ydaw, Emily, Victoria, J. M., Shoeburn, G. J., Cornwallis, and many others.—In your attempt to solve the last Problem, you each fail to observe that, if the White Queen be played to Q B 6th or Q 7th, Black may take it, *giving* check, and thus evade the mate.

F. B. C., New Jersey.—The collection of games played in the matches at New York have safely reached us, and the best shall appear forthwith.

ASTOR, Hayre.—In Problem No. 587, Mate cannot be effected as you propose, if Black for his 2nd move play P to K 3rd

L. H.—In Problem No. 584, Black for his second move advance the P to K B 4th, White plays 2. Kt to K 6th, &c. If takes Kt, and 3. B to Q 5th—Mate.

P. N.—I admittedly he can

W. C. MACALTER, T. F. G.—A true bill, as we found on looking over the game when it was in type

H. J. E. A.—All these acceptable. The last shall be noticed next week.

T. M., Hadnall.—The most attractive feature in the coming meeting at Leamington will be the novel one of handsome prizes being given for competition among the leading Chess clubs; and another, hardly less so, the proposed Match by Electric Telegraph, to be played by five players at Glasgow against five at Leamington. Altogether, the gathering seems likely to be by far the most interesting which the Northern and Midland Chess Association has ever held

OXON.—1. There is no copy of Verel's "Letters on Chess" in the library of the British Museum. 2. They were originally published in Venice, 1778.

ALPHA, C. W., SURBITON; BALLIOL, KEETTER, R. F., M. G. W. Under examination.

ITHYBAUD.—It delights, though certainly giving promise of something better, when the author has acquired a little more experience

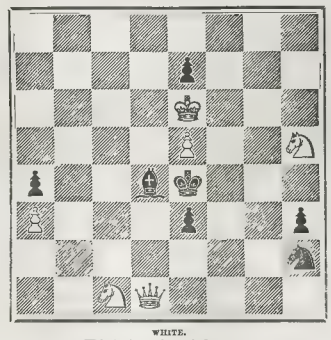
ERNEST TRAVERSAMI; A. R., Cambridge.—The Programme of the forthcoming Grand Chess Meeting at Leamington will be ready, we are told, at the beginning of next week. You had better apply immediately to the Committee, through the Rev. W. Temple, of Leamington.

SOLUTIONS TO PROBLEM No. 587, by Rugby-boy, L. S. D., Reyliss, D. D., Mrs. Pillsbury, R., B. A., J. Stonehouse, W. C., Oneciphrus, Andrew, Philip, Burgos, Cossack, M. F., Miles, Phia, W. T. W., Perseus, H. F. M., C. F. G., Camilla, Tenby Victoria, Alleyne, Coventry, Percy, C. W., Sunbury; Mysore, Gaberlunzie, H. F. O., Benjamin, Omega, D. D., F. M., are correct. All others are wrong.

PROBLEM No. 589.

This clever adaptation of a position published by us some years ago, which then admitted of a twofold solution, is by C. M. INGLESBY, M.A., of Birmingham.

BLACK.



WHITE.

White to play, and mate in four moves.

GAME V

In the Match between MM. LA ROCHE and DE RIVIERE.

(Irregular Opening.)

WHITE (M. LA R.)	BLACK (M. DE R.)	WHITE (M. LA R.)	BLACK (M. DE R.
1. P to K B 4th (a)	P to Q 4th	21. Q Takes R	R to K B sq
2 P to Q B 4th	P to K 3rd	22. K R to K 4th	P takes Q B
3. Kt to K B 3rd	P to Q B 4th	23. R to K B sq	B to K 4th
4. P to Q Kt 3rd	Q Kt to Q B 3rd	24. R to K 6th	P to Q Kt 3rd
5. Q B to Q Kt 2nd	P to Q 5th	25. R to K B 5th	Q to Q 3rd
6. Q Kt to Q R 3rd	P to K B 4th	26. Q takes Q	B takes Q
7. P to Q 3rd	K Kt to K B 3rd	27. R to Q 5th	R to Q sq
8. Q Kt to Q B 2nd	P to Q R 4th	28. K to Kt 2nd	K to Kt 2nd
9. P to K Kt 3rd	K B to Q 3rd	29. P to Q 4th	P takes P
10. K B to K Kt 2nd	Q to K 2nd	30. R takes Q P	B to K 2nd
11. Castles	Castles	31. R takes R	B takes R
12. K R to R sq	P to K 4th	32 P to K Kt 4th	P to K R 4th
13. K B P takes P	Q Kt takes P	33. P takes P	R to R 3rd
14 P to K 3rd (b)	Q Kt this Kt (cb)	34. R to K Kt 5th	K to Kt 4th
15. Q takes Kt	Q P takes P	35. K to B 3rd	P to K B 4th
16. Kt takes P	Q to Q B 2nd	36. B to K 8th	B to K 3rd
17. Kt this K B P (c)	Q B takes Kt	37. P to K R 3rd	B to Q 3rd
18. Q takes B	K to B sq	38. B to Q 2nd	P to K B 5th
19. K R to K 6th	Q B to Q sq	39. B to K Kt 4th	
20. K R this Kt (d)	K R takes R	And White wins	

(a) Close openings are very instructive, and they often lead to combinations of peculiar interest and beauty; but, we must confess, the seven games in match they are all the better for being enlivened now and then with some of the old-fashioned more easy debuts. In the present contest the want of variety in the select of the games is particularly observable, and can cannot help thinking that a spark has "Mazin," a brilliant "Evans," and a dashing "Allgaier" thrown in occasionally, would have been as great a relief to the players themselves, as they would prove to the amateur who seeks amusement in fighting these battles over again.

(b) If he played—

WHITE.	BLACK.	WHITE.	BLACK
14. Kt takes Kt	Then B takes Kt.	16. K R takes P	Kt to K 6th
15. P to K 3rd	P takes P	&c., &c.	

(c) Q B takes Kt, followed by Kt to Q 6th, would have been at least as good play as taking the Pawn

(d) Better far, we believe, to have taken the Kt with the Bishop.

*** BOTH OF THE SECOND GAME OF THIS MATCH

From want of space when critisising the second game, we were compelled to abridge so considerably the annotation prepared, and, indeed, to abstain from any detailed analysis of the terminating moves. This latter circumstance occasioned us to overlook an important fact which has since occurred both to us and to two of three Correspondents—namely, that M. La Roche, who lost the game after a very hard fight, had the victory in his hands even a few very last moves of all. The position, it will be remembered, after Black's 39th move, is as follows:—Black *K at his Kt 3rd, B at Q B 3rd, Pa at K R 3rd*, and *Q R 5th*. White, *K at K 4th, B at Q 8th, Pa at K R 4th, K B 5th*, and *Q 2nd*. At this crisis, White, M. La Roche, played *P to K B 7th*; whereupon he appeared took the Bishop, checked, and of course won easily; but had White, *instead of advancing that Pawn, only moved his K to Q 7th*, or *K 5th, giving check*, we believe it would have been impossible for Black to avoid immediate defeat

CHESS IN NEW YORK

The following is the final game of a match recently played in the New York Chess-club, between Messrs. PERRIN and LOYD:—

WHITE (Mr. L.)	BLACK (Mr. P.)	WHITE (Mr. L.)	BLACK (Mr. P.)
1. P to K 4th	P to K 4th	13. P to Q 4th	B to Q 3rd
2. K Kt to K B 3rd	Q Kt to Q B 3rd	13. B to K Kt 5th	Q takes K B P (n)
3. P to Q B 3rd (a)	P to Q 4th	14. B takes Kt	P takes B
4. K B to Q Kt 5th	Q B to K Kt 5th (b)	15 Q takes Q P (ch)	K to his 2nd
		16. Q to K 4th (o)	Q R to K Kt sq (dh)
5. Q to Q R 4th (c)	B takes Kt (d)		
6. B takes Q Kt (ch)	P takes B	17. K to B sq	Q to K R 6th (p)
7. Q takes P (ch)	K to his 2nd (e)	18. B to K Kt sq	R takes K (ch)
8. P to Q Kt 3rd (f)	P to K B 4th (g)	19. K takes R	R to Q sq (ch)
9. P tks K B P (h)	Q to Q B sq (i)	20. Q to K Kt 4th	B takes Q (ch)
10. P takes B (k)	Kt to K B 3rd	21. P takes R	P to K 5th
11. Castles (l)	K to K B 2nd (m)	22. P to K B 4th	P to K 6th

And White resigned the Game and the Match; the score at the termination being:—

Perrin	...	5
Loyd	...	2
Drawn		1

Notes, by Mr. C Stanley, of New York.

(a) This is a more attacking opening than it appears, and requires very careful answering by the second player. It will be seen what trouble Black got into by departing from the beaten track.

(b) Black plays monotonously. He should have taken K P, notwithstanding White's obvious reply of K takes K P

(c) An excellent move, gaining a Pawn and position.

(d) A daring move, which ultimately won the game.

(e) Apparently a sad position for Black's K.

(f) Threatening to win the Queen

(g) The sacrifice of this Pawn, was far better than tamely moving it to K B 3rd, which would have materially hindered the development of Black's game.

(h) Threatening mate.

(i) His only move to prevent loss.

(k) Observe that this Bishop had been *en prise* during five moves, and White had always stronger moves at his command than taking it. He dare not delay the capture any longer.

(l) The source of all his subsequent difficulties.

(m) Back foe's mate relieved

(n) Black preferred this mode of play to that of offering an exchange of queens by playing *Q to K sq*, to preserve his Q pawn. He goes in for a vigorous counter attack.

(o) This move, obvious as it is, is fatal.

(p) The winning move.

A CHESS ENIGMA.

(The following slight but not inelegant effusion was produced a short time ago at the table of a distinguished Baronet in Lincolnshire, and has never, we believe, been published.)

> Say, Cottesmore Hunt, for thou canst say,
> Spite of thy valorous boast,
> How oft my *first*, with chill dismay,
> Has stopped thy scarlet host.
>
> When twilight steals o'er dale and hill,
> And pales the golden west,
> My *second* loves to linger still
> Beside the ring-dove's nest.
>
> Though, motionless before my *whole*,
> Oftimes have marshalled stood,
> I never risked the poisoned bowl,
> Nor shed the regal blood.

"HENRY THE EIGHTH," AT THE PRINCESS' THEATRE.

Or those unparalleled revivals, with spectacular accessories, for which Mr C. Kean has made his management of this theatre so celebrated, the tragedy selected for the present season being the magnificent dramatic chronicle so historically treated by Shakspeare, under the title of "King Henry VIII.," is perhaps the most significant and noteworthy. The prologue to this stately drama is illustrative of its quality. Here are a few lines:—

> Be sad as we would make ye: think ye see
> The very persons of our noble story
> As they were living: think you see them great,
> And followed with the general throng and sweat
> Of thousand friends: then, in a moment, see
> How soon this mightiness meets misery.
> And if you can be merry then, I'll say,
> A man may weep upon his wedding-day.

Changes of fortune, such as the prologue describes, are the great argument of this sublime production. *Henry* himself is, as it were, the presiding providence, whose right to do wrong is never questioned by his victims. Each and all bless him in their deaths, and recognise his justice under the strangest antecedents; nay, seem sincerely to confess for him the strongest affection. What has befallen them may be their misfortune, but never can be his fault. There is, in fact, a despotism recognised in the circumstances of the time—a dispensation and over-ruling of all things for a providential purpose—an end justifying the means a destiny to which the apparently self-willed King is as subject as the meanest of his serfs. There is a religious revolution in progress, the interests of which transcend and overwhelm all other considerations. This ideal it is which elevates the theme of these marvellous scenes, and makes us not only tolerate the oppression we witness, but justify it. Human dignity is not consulted; but an inexorable decree that levels all distinctions of merit, and drives the wisest into error, is tacitly acknowledged.

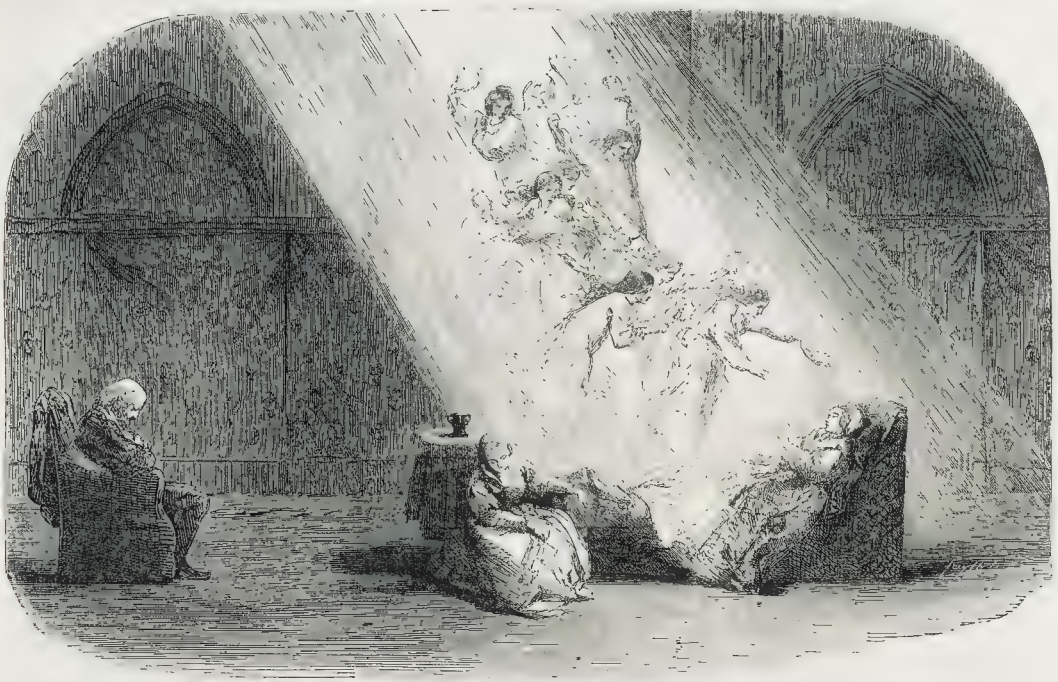
In this gallery of illustrious victims one in particular excites our profoundest pity. Thoroughly Christian in feeling, calmly confident of her rectitude, and its recompence hereafter, *Katherine*, the holder of a queenly station, is, without any fault of her own, degraded from her just preeminence by the caprice of an unfaithful husband. But her moral elevation is maintained, and she preserves her character in the midst of all mutations—a constant, loving woman; a forgiving saint; a pious martyr, a wronged, a suffering, and a dying wife; conscious not alone of her innocence, but of her greatness, and superior to injury. Of this lofty character Mrs. C. Kean is one of the best representatives on the modern stage: and, in her idiosyncrasy, has many qualifications for its adequate rendering. To her performance of it on this occasion an added interest pertains. She has not appeared on the boards for a year and a half, owing to severe indisposition, and her return is a matter of congratulation to her friends and the public. In testimony of the occasion, and from personal regard, the foremost and fairest of her actresses, putting aside individual vanity, consented to act as her maids of honour, and filled the stage with beauty and reverential homage. This was to appear indeed as a queen, and the proud artiste felt her position, and realised the character as few have ever done before. Owing to the arrangement of the play, also, Mrs. Kean had special opportunities. The scene between the Cardinals and the deposed Queen is restored, and afforded space for the manifestation of feeling into which the actress poured a pathetic soul full of touching grandeur and religious resignation. By an admirable contrivance in the fourth act, the Dream of *Queen Katherine* was realised, and a vision of angels descended, gliding on a sunbeam upon her slumber in actual presence with the most beautiful effect. This scene forms the subject of our illustration. The death of the Royal martyr was truthful and fine. We must we omit, on revisiting the performance, to praise as it deserves the acting of Mr. Kean in *Wolsey*. In the costume of the character he took advantage of all that could improve and dignify the appearance, and in the conception carefully avoided the mannerism of his predecessors, and brought out several new and admirable points. Throughout, it was remarkable for its finish and precision. The subdued pathos of the third act, commencing with its meditative mood, proceeding with its startling passages of the great man's fall and utter ruin, and ending with its prostration and repentance, has never been exceeded. The peculiarities of Mr. Kean's style—the tone, the gesture, the abrupt action—all aided the solemn impression. It is unnecessary to repeat that the whole of the play is elaborately acted. The veteran Mr. Cooper, who appeared for the occasion as *Griffiths*, in the dying scene of *Queen Katherine*, assisted the serious tone of the last moments of the majestic sufferer, carefully preserving the picturesque of the situation while the celestial messengers visited her sick couch, with their friendly suggestions of final recompense in a happier world. Nothing, we may add, can be more excellent than the grouping of the different accessories to this as to every scene, and the general accuracy and beauty of the pictorial illustrations. Mr. Kean has evidently consulted every available authority, and reproduced the world of the age in which the important action of this grand historical drama took place, in order that he might, as he states, as far as possible, "render the stage what it should be—a true and perfect mirror of history and manners." Many of the scenes are taken from old drawings (to be found in the Bodleian) by Von Den Wynyrede and Holbein, &c. To the first we are indebted for the views in a panorama of London, and the old palace of Greenwich, where Queen Anne Boleyn resided at the time of the christening of the Princess Elizabeth under the Lord Mayor and City Council in their state barges go in procession to witness the Royal ceremonial. To the same artist we owe the scenes of the old Palace-yard, and of King's Stairs, Westminster, with which the drama commences. To Holbein is due the design of a chimney-piece in the palace of Bridewell, where the Queen was visited by Wolsey and Campeius. The "Vetusta Monumenta" supplies the scene of the Council Chamber in the first act. A gorgeous scene, representing the festival given by Wolsey, and the masque conceived for his surprise by the monarch, is drawn more from the fancy of the artist, but he has followed the authority of Cavendish with the utmost closeness. The processions are admirably introduced; that of Queen Anne's Coronation was signally effective; the carriage of Miss Heath, who sustained the character with much beauty, was excellent. The number of set-scenes has rendered one of the contrivances of the French stage necessary. Folding curtains, of magnificent velvet, are occasionally let down while the requisite scenic arrangements are being made. This production, with that of "Louis XI.," restores to the excellent company of this theatre the opportunity of testing their talents in the masterpieces of dramatic genius. In both parts—that of the French Monarch and the ambitious English Cardinal, Mr. Kean, in particular, has proved to the public and his critics that he is not only a really great actor, but a consummate master of his art.

CEREMONY OF "THROWING THE DART."

THE visit of his Excellency the Lord-Lieutenant of Ireland to the city of Cork, last week, was the occasion of the observance of an interesting municipal custom, which our Artist has pictured in the accompanying illustration

On Wednesday morning, his Excellency and suite, accompanied by a distinguished party, after visiting the Sailors' Home, proceeded to the Custom-house and entered the Cork, Blackrock, and Passage Railway steamer *Victoria*.

The scene of the quays at either side was strikingly picturesque. The ships lying in both channels of the river, were gaily decorated with flags and streamers. Their decks, masts, and rigging were crowded with persons anxious to see the Viceroy, and as he made his appearance a deafening cheer arose from the vast assemblage. The steamer *Victoria*, which conveyed his Excellency and the parties who accompanied him in the ex-



SCENE FROM SHAKSPEARE'S PLAY OF 'HENRY THE EIGHTH,' AT THE PRINCESS' THEATRE—THE VISION—QUEEN KATHERINE'S DREAM. (SEE PRECEDING PAGE.)

cursion was decorated for the occasion. The excellent band of the 15th Regiment of Foot was in attendance.

A Guard of Honour of the Cork city constabulary, with a troop of the 16th Lancers, attended the Vicregal cortége as it entered the steamer, Precisely at half past ten o'clock the steamer was loosed from its moorings, and moved along from the quay, while the Royal salute which was fired was scarcely heard amid the loud cheers. Her Majesty's steam-tender *Advice* followed the Vicregal steamer. The *Prince Arthur* river steamer also followed with a large company of citizens, and the Harbour Commissioners' steamer *Queen* also accompanied.

The Mayor was surrounded by his Excellency the Lord-Lieutenant and suite; the various Consuls resident in Cork; and the Corporation; who vociferously cheered the ceremony. His Excellency remained on the gangway a considerable time, in company with Captain Clarke, Harbour-Master; Mr. Fagan, M.P.; and Lord Fermoy, and made several inquiries regarding the harbour.

During the return, Mr. R. L. Stopford, who had made the accompanying Sketch of the ceremony for the ILLUSTRATED LONDON NEWS, had the honour of submitting the same to the Lord-Lieutenant, who expressed himself much pleased with the representation.

As the steamer passed Blackrock Castle, the flag which streamed from its summit was lowered, and a salute was fired. The steamers proceeded down at a moderately-rapid rate to Haulbowline Island, where his Excellency and a large company landed, and were received by a guard of honour of the 16th Lancers, with the General (Mansel) and staff. The guard-ship in the harbour fired twenty-one guns. His Excellency, accompanied by several distinguished personages, was conducted by Mr. Ede, the superintendent, over the entire stores, which are at present well filled with every requisite for the navy. Having concluded his inspection of Haulbowline his Excellency proceeded in the Admiralty barge to Spike Island Convict Depôt, where he remained a considerable time.

Soon after his Excellency's embarkation, Mr. Hugh Cole, of Queenstown, Admiralty Chart Agent, having been introduced to his Excellency by the Mayor, presented to him a fine chart of Cork Harbour, with views of Queenstown, Haulbowline, and Spike Island, accompanied by a suitable address

His Excellency and the Vicregal cortége in the Admiralty barge, rejoined the steamer, at Haulbowline, shortly before two o'clock, when the steamer proceeded to sea, and having arrived at a point commencing the outline of the Poor-head on the left, and the Old-head of Kinsale on the right, the Mayor and civic authorities proceeded to assert the corporate jurisdiction over the harbour by the customary formality of throwing the dart. For this purpose, the Mayor having robed himself in his scarlet cloak, with the official chain, &c., on his neck, proceeded to the bow of the vessel as soon as it had reached the extreme mouth of the harbour, when the dart (an arrow about four feet in length) having been handed to his Worship, he threw it into the water, amidst cheers from the councillors and other persons present.

CEREMONY OF "THROWING THE DART" BY THE MAYOR OF CORK.

"MARCHIONESS," WINNER OF "THE OAKS," AT EPSOM, 1855.

"MARCHIONESS," THE WINNER OF THE OAKS.

OWING to one of those lucky accidents peculiar to the Turf, the "Marchioness" carried off the Oaks on Friday the 25th ult. Nettle, the favourite and certain winner, unfortunately fell; the rider, Marlow, sustaining considerable injury. The mare is by Melbourne, sire of West Australian; her dam being Anisetli, daughter of Touchstone, winner of the St. Leger. In 1854 she ran at Doncaster, as a two-year-old, and was defeated by a head in a contest with Sarabund. On Friday week she carried off the Oaks, to the great delight of her owner, Mr. Rudson Read, Mr. John Scott, her trainer, and Templeman, her rider. She is engaged in the Doncaster St. Leger, and other races.

The Marchioness may be described as a fine mare. During a previous trial, her trainer had no confidence in her abilities—but the Oaks is an uncertain race. Very long odds could have been obtained against the victor at starting.

SURREY ZOOLOGICAL GARDENS.

THE season at this popular place of entertainment commenced on Monday, for which occasion the proprietors have prepared a large Model Picture of Sebastopol, illustrated by the aid of a very numerous body of invalided troops, who have returned from the actual seat of war, and here give living effect to the siege of Sebastopol in Surrey. Thus they form the *dramatis personæ* of the mimic fight, in sorties, repulses, attacks, and manœuvres; and such sight-seers as recollect the living spectacle of the Battle of Waterloo, at Vauxhall-gardens, many years since, can form some idea given to the effect of the Picture-model exhibited to the holiday-keepers, on Monday last. The lake and grounds of the Surrey Zoological Gardens have served for celebrated scenes from nearly all parts of the world; but neither of its former spectacles has approached in current interest this Picture of the Siege of Sebastopol, aided by the pyrotechnic resources peculiar to the establishment; and long and loud was the applause of the mimic defeat of the Russian enemy.

The gigantic picture-model has been painted by Mr. Danson and assistants, from maps, plans, and drawings, and even more information. It shows the town of Sebastopol, and the most prominent localities of the Siege.

In the extreme north the country stretches to the mountainous district beyond Eupatoria: a little in front of this high range of mountains are the memorable heights of the Alma. In the middle distance are the Allied fleets blockading the harbour, across the mouth of which a line of sunken ships extends from Fort Constantine on the north to Fort Alexander on the south side. The Wasp and Telegraph Batteries, and the North Star Fort, on the north side of the harbour, which is also defended by Forts Constantine and Catherine, are also shown; and on the south side are Quarantine Fort and buildings, Fort Alexander, the Battery of Sebastopol, Fort Nicholas, and Fort Paul. At the right hand extremity of the Great Harbour is the Navy Baking-house, with other buildings, and above it is the Inkerman Lighthouse. The celebrated Malakoff Tower and outworks, and the Redan and Barrack Batteries, are conspicuous; in the middle distance to the right is the Garden Battery. In the centre the town of Sebastopol is seen, whence rises prominently the Cathedral. To the right are the Admiralty and the Docks; and still nearer, to the left, are the Round Tower and Battery, the Flagstaff (or Mât) Battery and the loophole wall which surrounds a portion of the town. In the centre of the foreground is the Victoria Redoubt; near which a party of sailors and navvies are filling gabions and sand-bags, placing fascines, and otherwise employed in assisting the Sappers and Miners to form a mortar battery. On the right are the English batteries and field-works, with the encampment of the British Army, and, on the left, the French are seen in position. In the foreground are the Russian out-works, a fac-simile of two heavy 13-inch mortars, a Lancaster gun, and a furnace for making red-hot shot.

In the Descriptive Key to the Model it is stated that the men who represent the English and French Soldiers, Zouaves, Russians, Artillery-

PICTURE-MODEL OF THE TOWN AND FORTS OF SEBASTOPOL, AT THE SURREY ZOOLOGICAL GARDENS.

men, Sailors, Navvies, &c., have mostly served in the Crimea; who, having been disabled for future active service in the field, and discharged with suitable pensions, are yet able to take part in the mimic war.

In addition to this large Picture, there are in various parts of the Gardens Dioramic Views of Cronstadt, Helsingfors, Revel, Odessa, Eupatoria, Cathcart's Hill, and Balaclava, cleverly painted by Mr. F. Phillips; all which aid the interest of the gigantic Model.

MUSIC.

GRISI'S performances are as attractive as ever. Her *Norma*, on Tuesday, drew an immense house, and was received with all the old enthusiasm. We have reason to understand that her engagement, which is only for ten nights, will not be prolonged, as she is then, with Mario, to proceed on an expedition to the provinces, arranged by Mr. Beale.

THE production of Mr. Henry Smart's new opera, "Bertha, or the Gnome of Hartzburg," has been delayed in consequence (it is said) of the indisposition of Mrs. Sims Reeves. It was announced for Saturday last, and again for Tuesday, and postponed without any notice to the public. It is a light, comic opera, and not a piece of German *diablerie*, as its title would lead one to suppose.

THE PHILHARMONIC SOCIETY'S CONCERT of Monday last (the sixth of the season) was, on the whole, a good and successful performance. Its most remarkable feature was a manuscript Symphony, by Mr. Cipriani Potter, written many years ago expressly for the Society, and performed at the time, but subsequently too much neglected, for it is a work of a high order, and worthy of a place among the works of the great foreign masters. It was most warmly received by the audience, and will not, we hope, be again lost sight of. The other orchestral works were Mendelssohn's Scottish Symphony, Beethoven's overture to "Leonora," and Spohr's overture to the "Berg-Geist." Beethoven's Violin Concerto was most magnificently performed by Sainton, and applauded with enthusiasm. The vocalists were Mdlle. Bohloltz Falconi and Herr Formès. Mdlle. Falconi is an accomplished singer, and was completely successful in both her performances—a beautiful Scillian, of Pergolesi, and the bravura air "Non mi dir," from "Don Giovanni."

THE ENGLISH GLEE AND MADRIGAL UNION have begun their morning concerts at Willis's Rooms. The first took place on Monday, and was attended by a large and fashionable audience. The members of the society, Mrs. Endersohn, Mr. and Mrs. Lockey, Mr. Hobbs, and Mr. H. Phillips, were assisted by Miss Phillips, Mrs. Beale, and Messrs. Foster, Cummings, Beale, and Thomas. They sang an excellent selection of English glees and madrigals, both ancient and modern, which were much applauded. By constantly singing together, these performers have acquired a purity and finish of style not surpassed in the most high and palmy days of glee-singing.

MR. BENSON'S ANNUAL CONCERT.—Mr. Benson has announced his annual concert to take place on Monday, June 4th, at the New Beethoven Rooms. The vocalists engaged for the occasion are, besides Mr. Benson, who will sing some of his most admired songs, Miss Poole, Miss Birch, Miss Milner, Mrs. Lockey; Mr. Francis, Mr. Land, and Mr. Lawler. The instrumental performers are Mr. Lindsay Slopar, who will preside at the pianoforte, Mr. H. Cooper (violin), Mr. Dando (viola), and Mr. Lucas (violoncello). The names of some of the best glees and madrigals of the late lamented Sir Henry Bishop appear in the programme, and there can be no doubt that the concert will prove attractive and successful.

THE THEATRES, &c.

HAYMARKET. Miss Helen Faucit commenced on Monday a limited engagement with "The Lady of Lyons." A new play is also underlined, in which Miss Faucit will sustain the heroine. It is entitled "Love's Martyrdom," and is from the pen of Mr. John Saunders.

On Wednesday, a new farce was produced. Its title, "Only a Halfpenny," indicated the eccentric nature of the piece; to which Mr. Buckstone, in the character of *Mr. Stanley Jones*, gave the most comic effect. The halfpenny in question has been lent to a young lady in an omnibus, to make up a fourpenny fare; and *Mr. Jones* as the creditor compels her to proves the opportunity, to make further acquaintance with his beauty and debtor. Neither the young lady nor her maid has the proper coin forthcoming, and every other is systematically rejected by *Jones*, who has learned from the *sombrette* the position of domestic affairs. *Henriette*, the heroine, is about to be married to the holder of her father's acceptance, as the readiest means of honouring the bill. Of course, *Jones* makes himself sufficiently disagreeable until he gets possession of the document by purchase, and sets the lady free to claim her for himself. Mr. Buckstone's costumes and characteristic extravagance maintained the audience in perpetual good-humour. The farce is indebted to a French original, entitled "Histoire d'un Sou," by MM. Clairville and Lambert Thibout, lately produced at the Palais Royal. It was eminently successful.

ADELPHI. Whit-Monday was signalled by the return of the wandering stars to this theatre—Madame Celeste, Mr. B. Webster, and Mr. and Mrs. Keeley. "Janet Pride" was repeated, and received with the usual favour.

ASTLEY'S.—The talents of Mr. Stocqueler have been engaged by Mr. W. Cooke for inaugurating the summer season with a new spectacle. The playwright sets us back to the times of the eighth Henry and to the field of the cloth of gold, the grandeurs of which it has fallen to the lot of Mr. W. Cooke to reproduce. A tournament is introduced, which occupies not only the stage but the circle; and the scenery throughout has been newly painted. These, with the general action of the piece, combine to present to the audience situations of magnificence and terror remarkably picturesque and exciting. Some of the set-scenes, such as a forest with reposing brigands, and many of the architectural illustrations, are first rate as examples of stage effect; and the occasional ballet interludes are spirited, characteristic, and elegant. The drama is in three acts, and entitled "England and France in the Days of Chivalry." It has evidently been the aim of Mr. Stocqueler to reflect the present in the past; and it must be confessed that his execution of his design with ability and taste. The equestrian feats in the ring still continue to be surprising, and novel effects have been introduced. The horsemen have not only to ride, but to practise the juggling of balancing-cups and balls, during the rapid career of the steeds—tricks which were artfully managed by Mr. J. Cooke and Mr. Bridges. The house was crowded.

CITY OF LONDON.—Mr. Charles Mathews is announced as "a star" at this theatre. This engagement will go far to test the capacity of these East-end audiences for the appreciation of the fashionable and light drama. Their reception of the more severe and chaste kind of theatrical composition has already been satisfactorily approved.

CREMORNE GARDENS.—This popular place of amusement was opened for the season on Monday last. Among the additions is a triumphal arch, emblematical of the union of England, France, and Turkey, and the superb mosque of Mahomet II., which is represented in close imitation of the choicest specimens at Constantinople and Cairo, its outline being that of the great Christian Church of Santa Sophia.

SOME of the Continental journals announce that the King of Sardinia and the King of Wurtemberg will visit the Emperor of the French this summer.

THE Grand Council of Ticino, in its sitting of the 22nd ult., passed a bill concentrating all authority over ecclesiastical matters in the hands of the State, without any intervention on the part of the ecclesiastical power. The Archbishop of Milan and Bishop of Como had previously protested against the bill.

EDUCATION IN ENGLAND.—COMMON THINGS.—Two Blue-books have just been published on this subject. The first contains copies of all minutes of the Privy Council on Education, arranged in chronological order, extending from the 3rd of June, 1839, to the 19th of January, 1855. The second, a thick volume of 765 pages, contains minutes of the Committee of Council on Education, correspondence, financial statements, examination papers, and reports by her Majesty's Inspectors of Schools for the year 1854-55. The two most remarkable of these reports, perhaps, are those of the Rev. H. Moseley and the Rev. W. H. Brookfield. Mr. Moseley does not consider the most important subjects of elementary instruction to be, as a matter of fact, inasmuch as religious knowledge, reading, writing, arithmetic, English grammar, history, and geography, under the form in which they are usually taught in schools, tend but little to the development of the reasoning powers, or the exercise of the intelligence of children; and are but poor expedients of general education. He urges, and has urged for many years, the teaching of that kind of knowledge dignified by the name of the "science of common things," so powerfully advocated by the Lord Ashburton, but does not disguise the great difficulty of introducing this as a branch of elementary instruction, doubting, as he does, whether the whole of the training schools could furnish one master possessing enough for the purpose of that kind of scientific knowledge which must be at the basis of it. Mr. Moseley thinks the science of chemistry the best adapted to this end, one great characteristic of which is, that, with whatever is to be reasoned on and understood, there is always associated something that is to be done.

NOTES OF THE WEEK.

A REALLY original idea is a rare thing, but a rarer still is a successful imitation. Crystal Palaces are no exception to the rule. Ours—that of the year 1851 in Hyde-park—was a grand success, in spite of Colonel Sibthorp; while the Dublin one had only a negative sort of prosperity, and that at New York was a really remarkable failure. The Universal Exhibition at Paris, from which so much was expected, and which we were told would unite all the beauties and magnificences of former similar undertakings without any of their defects, has as yet only emulated its American rival. It began ill, with that worst fault in business matters, unpunctuality. So incomplete was its condition at the time which many months before had been announced for its opening, that that ceremony was forcedly delayed for a fortnight. The original plan was so ill-considered, that a quite a late period it was found necessary to add an immense wing, or rather tail, to the building, stretching for nearly a quarter of a mile along the bank of the Seine, not at all ornamental in itself, and adding nothing to the *coup d'œil* of the main façade, from which indeed it is entirely disconnected. Even now, a fortnight since the opening day, the Palais de l'Industrie proper, is in a great measure a mere wilderness of bare stalls and unopened packing cases, while the great gallery just mentioned, called the *Annexe*, and the Gallery and Pavilion des Panoramas, like housemaids in the forenoon, have not yet had time to make themselves fit to be seen. There is some excuse to be found for the semi-detached position of so many important parts of the entire construction which is so injurious to grand general effect, in the fact that these parts are only meant to be temporary, while the Palace proper (not by any means a crystal one, being for the most part of massive stone) is to be permanent, and looks like it. There is one fault to be found with the Palais de l'Industrie, hardly less serious than its incompleteness, and that is that, owing to what in England we should call the police arrangements, but may be more properly styled in France the military ones, nobody can go there without getting into a passion. One of the greatest comforts in our Exhibition of 1851 was that, once inside the doors, you might do what and go where, you pleased. In Paris it is just the reverse: there are dozens of fierce little men, in moustachios, whose chief object in life seems to be the preventing you from going where you want to go. *On ne passe pas* is the expression most frequently used within the building, and the responsive *sacr-r-r-e*, or other more highly flavoured expletives the next. Perhaps the British damn is even more audible though less frequent, for the practice of their railways where, somehow or another it seems as if the best intentioned voyager could never do anything right, has accustomed our lively neighbours to this kind of dragooning so that they obey the not very conciliatory orders of *la force publique* with a lamb-like meekness of which the true Briton accustomed to argue the point of right of way with good-tempered policemen, or to menace Sir Richard Mayne or Inspector Pearce with a letter to the *Times*, has no idea. Still, with all its mismanagements, all its shortcomings, there is even now much that is grand and much that is beautiful within the walls of the Palais de l'Industrie. The Fine Arts department, which, with the exception of some sculpture, was wanting in our Exhibition, is here a remarkable point of attraction, and it is satisfactory to be able to say that the works of English artists mortally sustain a comparison with those of their foreign brethren.

The keepers of hotels and lodging houses in Paris are just now in a dreadful state of mind. It cannot be said that the rents they ask are in general what may be called very valuable ones, according to their views, the entire human race would want to come to Paris all at the same time on some particular day in May, they very generally turned out their old *locataires* to make room for the expected influx of foreign Croesi. Alas for the hopes of man! the month of May is passed, and Paris is very little fuller than usual. The provincial persist in staying at home, waiting till the Exhibition shall be completed in good earnest, while the few hundred foreigners, chiefly single men, who have thus early found their way to the Boulevards, are very far from supplying the place of the families whom extortionate charges have driven to Brussels or the Rhine.

The war has already done us one good service—it has for ever put an end to the notion that a great nation, even with the security of an insular position, can afford to neglect her army. A very few years ago it was the opinion of many people that a pageantry—the finding sentinels for the Royal palaces and providing a single little review in Windsor-park for the amusement of any foreign potentate who happened to be passing that way—was the sole use of our army while at home, and that its other more active employment might be safely handed over to the police or the yeomanry. According to these philosophers, some thirty or forty thousand men, just to keep Kaffirs and Canadian sympathisers in order, and to be able to spare a few regiments on an Indian campaign, just sufficient to enable the Queen's officers to claim the credit of the results earned by the Company's troops, was all that was necessary. Nobody thinks so now; the most peace-loving admit that before the war our military establishments had been allowed to sink below what prudence, or even the instinct of self-preservation would have prescribed. We all know that we must henceforth keep up a large army; and we have also learnt that, in order to make that force thoroughly efficient, we must give it a sort of training different from that which it would get from regimental drilling in barrack-yards. In many ways the Camp at Aldershott may exercise a most beneficial influence on the future of the British Army. A thousand things will be easily learnt there, which it would be almost impossible to acquire on the restricted space of a drilling ground, and with the restricted numbers of a regiment, or even of a brigade. Twenty thousand men are an army, and the mere assembling of such numbers, and the manœuvres they will go through, must teach many a useful lesson both to men and officers. Without going through the hard ordeal of actual warfare, the former will become more self-reliant; they will learn how to hut themselves, to build ovens or fireplaces, to cook. In short, to do for themselves more comfortably and completely: while the latter will become accustomed to all the intricate arrangements necessary in moving large bodies of men, and the system of keeping those men well fed, well clothed, and well tended in case of wounds or sickness. It seems that there are few things in the execution of which practical experience is more useful than in the manœuvring of considerable armies. The Duke of Wellington is reported to have said that if 70,000 men were marched into Hyde-park, he did not think there were a dozen officers in the British Army who could get them out again. This defect consequent on want of experience, is likely to be removed by the institution of the Camp at Aldershott. There all the strictly military arrangements—such as parade-grounds, out-works, hospitals, &c.—will probably be made in the best manner; but it is farther to be hoped that the authorities will not forget the old adage, that "All work and no play makes Jack a dull boy." When twenty or thirty thousand Jacks are collected together, all from eighteen to forty years old, the all-work-and-no-play system has a worse effect still—it is apt to make Jack morose, quarrelsome, and drunken. Cricket, quoits, foot-ball, and such manly games are sure to be popular, and their organisation may be safely left to the regimental officers; schools, too, there are sure to be in sufficient numbers. But there are other means of amusing, civilising, and even to a certain extent educating, the men, which ought not to be neglected—means which the French, at their camps in the neighbourhood of Boulogne, by no means neglect; and I think in these matters we can hardly do better than follow their example. The writer of an interesting letter in the *Daily News* tells us that, on visiting the Camp at Honvault, one of the first things that struck his eye was the theatre of the Camp. This was a well-constructed building, capable of holding five hundred persons, in which performances took place three times a week. Then there are fencing-rooms, dancing-rooms, grounds arranged for gymnastics, and, above all, very cheap reading-rooms being "two or three covered waggons, provided with windows and seats, where the soldiers can read amusing books and newspapers at the price of one franc per month." Most truly does the writer of the letter to which I have referred add "A few such travelling waggon-libraries for Aldershott would pay the speculators well, and at the same time prevent much drunkenness and crime."

Everything looks well in the Crimea. If General Pelissier continues to display the same activity and enterprise which he has given proof of during the few weeks he has held the chief command, he will earn for himself a great name in the feast of the Allied armies. The taking of Kertch is a great blow struck at Russian power in the peninsula: their armies are now menaced on three sides: in front, by the main body of the Allies; on the right, by Omer Pacha, at Eupatoria; and on the left, by Sir George Brown, at Kertch and Yenikalé. It is also satisfactory to know that at the same time there is even increased activity on our parts in forwarding both men and stores to the seat of war.

THE "COCK AND BULL" PROPHECY ON THE WAR.

(*To the Editor of the* ILLUSTRATED LONDON NEWS.)

SIR, I fear that many antiquaries will be puzzled by the lines quoted by the Rev. Dr. Cumming from an old volume of the fifteenth century, forming a prophecy in which appear as national emblems the words "Cock" and "Bull." These emblems are not once mentioned in Shakespeare: and both the *Gentleman's Magazine* (1811, p. 219) and Mrs. Markham's "History of England" (vol. ii., p. 249) say that the term "Bull" cannot be traced beyond Queen Anne's time. The former says that Swift was the originator of the appellative *John Bull*, which, though known before his days, was not in general use; and the latter, more likely to be correct, refers it to Dr. Arbuthnot, the author of that inimitable satire, the "History of John Bull." For more upon the subject in question I would refer your readers to a paper of "Notes on Antiquarian Research" given in the number of the *Freemasons' Monthly Magazine* (Routledge) for May, 18—.

How the word "Cock" arose as an emblem of France is obvious: it stands to reason that it must be as ancient as the Latin tongue, for Gallus may represent either a Gaul or a Cock. Doubtless the lion as the old emblem of England, and the device was placed by Sir John Walsingh with a "Cock" on Kenilworth-house. If a "Bull" was our old national emblem it would not have been superseded in the instance by a Lion. I have reason to know that Mr. Alwyn Wade, a very high authority on all matters of antiquity, believes that "Cock" and "Bull" as emblems of France and England, are as old as the days of Shakespeare: but may there not be on this doubtful point two opinions? Until Dr. Cumming gives the title of this old book, saying whether it is in MS. or print, and where it may be seen, I, and many antiquarian readers who peruse with pleasure your columns, must remain incredulous. The following epigram of 1633, at Vienna, is amusing:

Tria Miranda!
Omnes Christiani armati contra Turcam,
Præter Christianum in Turcia,
Omnes filii ecclesiæ pellum contra Turcam parant,
Præter Prumgeotium
Omnia mirabilia laudat Deum ob partem de Turcis victoriam,
Præter Gallum.

With many apologies for encroaching on your columns,
I beg to remain, Sir, your obedient servant,
May 2, 1855. AN ANTIQUARY

NUMISMATIC SOCIETY. On Monday evening Lord Londesborough, as President of the Numismatic Society, received the members of this society at his mansion in Carlton house-terrace; to meet whom his Lordship invited several distinguished Fellows of the Royal Society and the Society of Antiquaries, and Members of the Royal Academy. The visitors exceeded 300 in number, for whom Lord Londesborough had provided a rich entertainment in his own *recherché* museum, to which were added many valuable contributions. One of the most novel and striking was a selection from the Anglo-saxon remains very recently discovered by Mr. G. Hillier, in the Isle of Wight. They consist of silver fibulæ, and other ornaments of the female costume; two crystal balls in silver settings, with loops; and a silver-gilt spoon, also found in the graves of women; swords, spears, knives, shields, and bosses of small circular buckles. The interest of these discoveries is second only to that of the Faussett collection of Saxon antiquities; of the latter, proof engravings were exhibited. Of Roman vessels an glass afforded rare examples of the perfection to which glass-making had been brought by the Romans. Most of them were brought from the Rhine by Mr. W. Chaffers; but a splendid basin, with ribs on the external surface, technically termed "pillar moulding," exhibited by Mr. Joseph Clarke, was found at Takely, in Essex, in a sepulcral deposit. Among the numismatic attractions, Mr. Bergne's fine Roman large brass coins, a series from Julius to Postumus, and all in the best preservation, took the first place. There was also exhibited a series of coins of the Roman Emperors, in large brass, as well as a remarkable collection of patterns for the English coinage of the age of Charles I. and the Commonwealth. Among the Mediæval works of art was an enriched ivory *chapelle*, or shrine, from Germany, exhibiting figures of the Virgin and Child, and a series of sculptures of the legendary history. There was also a rare display of gorgeous jewellery, and table ornaments and utensils, of the sixteenth and seventeenth centuries. Mr. Morris Moore's newly-discovered picture by Raphael (the subject the contest between Apollo and Marsyas) excited much attention. The original sketch is said to be preserved in Italy. Altogether, the rare character of the articles exhibited, and their illustration of the art of remote periods, rendered this *conversazione* one of the most interesting *réunions* of the season.

THE CITY STATUE OF SIR ROBERT PEEL.—The workmen are now employed preparing a place in the centre of the open space adjoining the north-west corner of the Bank of England, at the junction of Lothbury and Princes-street, for the obelisk, which now stands at the west end of Cheapside, on the site of which the City statue of Sir Robert Peel, by Behnes, is to be placed.

THE CHILDREN OF THE ROYAL DOMESTICS.—Her Majesty having discovered that a large proportion of the children of the domestic and other servants at Buckingham Palace are very much neglected in the matter of education, has commanded that premises in Palace street, Pimlico, should be fitted up as a school. Mr. Charles Dodd, a gentleman of tried ability in his vocation, has been appointed master. The whole of the expenses will be defrayed by her Majesty. The number of scholars of both sexes, at present eligible for admission, is 60. An evening school will also be established for such of the elder children as may be prevented from attending in the daytime.

ROYAL THAMES YACHT-CLUB.

THE first match of the season of this distinguished club took place on Saturday last. The *Prince of Wales* steamer was chartered to convey the members of the club to witness the match, accompanied by several of the yachts belonging to the different clubs: among them Lord Alfred Paget's new yawl, the *Alma*; Mr. Bartlett's new cutter, *Glance*; Lord Vane's *Lotus*, the *Bianca*, *Chymena*, *Ino*, *Novice*, *Irme*, *Mianie*, *Snow Flake*, *Midge*, and *Sea Serpent*.

The day was delightfully fine, alike suited to the spectator and the yachtsman, and left neither anything to desire in the way of recreation.

There were three prizes for competition, amongst the same number of classes, the first two of which were very handsome silver dyergues, value £100 and £50, and the third a silver punch-bowl, value £30. The distance intended to be sailed was from Erith to the Nore Light and back, but it was found necessary to shorten it.

The following came to their stations at the starting-place:—

FIRST CLASS.—Exceeding 35 Tons.

Station.	Name.	Tons	Port.	Owner's Name
2	Marina	62	Cowes	W. J. Foster, Esq
3	Amazon	42	London	Alfred J. Yarrow, Esq
4	Avalon	33	London	[illegible] Esq
5	Nereus	48	London	Harrison [illegible] Esq
7	Sophia	35	London	Thos. [illegible] Esq
	Sea Nymph	[illegible]	[illegible]	[illegible]
	[illegible]	37	[illegible]	[illegible]
	[illegible]	29	[illegible]	[illegible]
	[illegible]	[illegible]	[illegible]	[illegible]
	[illegible]	12	London	Joseph Fenwick, Esq
	[illegible]	25	Southampton	Wheeler, Jas. Esq.
	[illegible]	[illegible]	[illegible]	[illegible]

There was a fine whole-sail breeze from the eastward, and, consequently, heavy work to do from the moment of starting to that of rounding, save only that of laying through about two reaches.

At a little before noon preparations were made for the start, which was effected at 12h. 5m. 10s. It was an excellent one, all the vessels being away well together. The *Napoleon* sprang her mast early in the race. The *Sophia* and *Avalon* deserve the praise of first having their topsails set. The *Marina* was first of her class with the lead when they fairly got under way, followed by the *Amazon*—but the former appeared to be able to carry more cloth than she had upon her. Like the *Avalon*, she is very stiff.

(*Continued on page 536.*)

AMUSEMENTS, &c.

THEATRE ROYAL HAYMARKET.—On Monday, June 4, Miss HEIEN FAUCIT will appear as JULIET. Tuesday, Thursday, and Saturday, Mr. SIMS REEVES and the Operatic Company in the new opera of BORRA. On Wednesday and Friday a new Play. LOVE'S MARTYRDOM, ONLY A FEW NIGHTS. Every Evening

ROYAL PRINCESS' THEATRE. Under the Management of Mr. Charles Kean.—On MONDAY, and during the week will be produced HENRY VIII., preceded by Away with Melancholy

GREAT NATIONAL STANDARD THEATRE.—Proprietor Mr. John Douglass. Glorious Success of the Young Tragedian Mr. CHARLES VERNER and Miss GLYN, who will appear every Evening. Mr. WRIGHT, of the Adelphi, on Monday next. No advance in prices

ROYAL GALLERY of ILLUSTRATION, 14, Regent street. The DIORAMA Illustrating Events of the WAR is now Exhibiting Daily at Three and Eight. The Lectures by Mr. Bloomquist. Admission 1s., 2s., and 3s.

ADAM and EVE.—This great original WORK, by JOSEPH VAN LERIUS, is now on VIEW at 57, FALL-MALL, opposite Marlborough-house, from Eleven to Six daily. Admission One Shilling

SOCIETY of PAINTERS in WATER-COLOURS.—The Fifty-first ANNUAL EXHIBITION is NOW OPEN, at their GALLERY, 5, PALL-MALL EAST, close to Trafalgar-square. Admittance, 1s.; catalogue, 6d

JOSEPH J. JENKINS, Secretary.

THE NEW SOCIETY of PAINTERS in WATER-COLOURS.—The 31st ANNUAL EXHIBITION of this Society is NOW OPEN, at their Gallery, 53, Pall-mall, next St. James's Palace, DAILY, from Nine till dusk.—Admission, 1s.; season ticket, 5s

JAMES FAHEY, Secretary

HEREFORD MUSICAL FESTIVAL, for the BENEFIT of the WIDOWS and ORPHANS of the CLERGY of the Dioceses of Hereford, Gloucester, and Worcester, will be held in the Cathedral and Shire Hall on AUGUST 21st, and Three following days. Conductor, Sir Harold Smith. Leader, Mr. Blagrove

BIRMINGHAM MUSICAL FESTIVAL, in AID of the FUNDS of the GENERAL HOSPITAL, on the 29th, 30th, and 31st days of AUGUST next

Under the especial Patronage of
Her Most Gracious Majesty the QUEEN,
His Royal Highness the PRINCE ALBERT,
Her Royal Highness the Duchess of KENT
President—The Right Hon. Lord LIEUTENANT of Staffordshire
Vice-Presidents—The Nobility and Gentry of the Midland Counties.
J. F. LUCAS, Esq., Chairman of the Committee.

MISS MESSENT and Mr. BRINLEY RICHARDS' CONCERT will take place at the Hanover-square Rooms, on FRIDAY MORNING, June 8, when they will be assisted by Madame Clara Novello, Madame Sainton-Dolby, Herr Reichardt, Mr. Sims Reeves, Mr. John Thomas (Harp), Herr Doloheuk, and Signor Bottesini. Tickets 7s., reserved seats, 10s. 6d., to be had at the Music Publishers'; of Miss Messent, 4, Hinde-street, Manchester-square, and of Mr. Brinley Richards, 4, Ferrington-street, Russel-square

MADAME RASSANO and Herr WILHELM KIHLE'S ANNUAL GRAND MORNING CONCERT will take place at the HANOVER-SQUARE ROOMS, on MONDAY JUNE 11, commencing at Two o'Clock; when they will be assisted by Mesdames Clara Novello, Gassier, Wilson, Sainton-Dolby, and Lascelles; Signori Gardoni, Weiss, Giubilei, and Madame Bassano; Messrs. Reichardt, Formes, Weiss, Lazarus, Lemar, Paque, Chas. Thomas, and Wilhelm Kuhe. Conductors—Messrs Goldmick, Lohmeyer, Berger, and Kuhe. Stalls 5s., 10s. 6d.; family ticket to be had of all the principal Music-sellers; and of Madame Bassano, 24, Clifton-road, St. John's-wood, and of Wilhelm Kuhe, 70, Margaret-street, Cavendish-square

ROYAL SURREY ZOOLOGICAL GARDENS Lessee and Sole Manager, Mr. JAMES WILLIAMS. Menagerie Marine Aquarium. Godfrey's unrivalled Band. Grand Spectacle of the Siege of Sebastopol, in which the various characters are represented by a party of our wounded soldiers from the Crimea. For full particulars see bills of the day

ST. MARGARET'S MANSION, on the Banks of the Thames, near Richmond.—Persons desirous of viewing this magnificent Mansion, prior to its sale at the City Auction Mart, on the 26th of June, by direction of the Executors Committee of the CONSERVATIVE LAND SOCIETY, are requested to apply for Cards to the Secretary, at the Society's Offices, No. 33, Moorgate-street Branch: or to Messrs. Chinnock and Galsworthy, 4, Moorgate-street, Bank. Regent-street, Waterloo-place. The Mansion and Grounds may be seen between the hours of Twelve and Five o'Clock, daily, and may be reached by three stations on the Great Western Railroad—namely, Kilburn, Isleworth, and Twickenham; by the Richmond Steamers, and by omnibuses

TO be SOLD by AUCTION, at LUCAS'S REPOSITORY, on THURSDAY, JUNE 14th, 1855, a MALE and FEMALE RHINOCEROS, caught in the Wilds of Assam, and just arrived in England. They are the finest specimens ever seen of their kind, and are young, healthy, and regularly growing. On Sale by private treaty from the last; after which, to prevent disappointment, no private arrangement will be entered into.—Apply to Messrs. H. Cab and Co., Repository, Haymarket

AT MR. MECHI'S ESTABLISHMENTS, 112, Regent-street, and 4, Leadenhall-street, London, are exhibited the finest specimens of British Manufactures in DRESSING CASES, WORK BOXES, WRITING CASES, DESPATCH BOXES, and other articles of utility or luxury suitable for presentation. A separate department for Papier Mâché Manufactures and Ingrafello Tables, Table Cutlery, Razors, Scissors, Penknives, Strops, Paste, &c. Shipping orders executed for merchants and captains. An extensive assortment of magnificent Table and other Toilet Brushes

MEDICINE CHESTS in great variety, comprising a large assortment of patterns, at prices from 10s. to £10.—174, New Bond-street, London

BY HER MAJESTY'S ROYAL LETTERS PATENT for a valuable and extraordinary improvement in the most powerful and brilliant of all Musical Effects, Celeste, Harp-Aeolian, Opera, and Perspective Glasses, to know the distances, at Messrs. Rand's, OPTICIANS, opticians, 39, Albemarle-street, Piccadilly, Price 21s., opposite the York Hotel. They possess such extraordinary power that Seven, even Eight miles, with seeing-glass-level alone distinctly the Georgian with his six satellites, Jupiter's moons, Saturn's ring, and the double stars. With the same Telescope can be seen a person's countenance four miles and a half or six miles distant, or a ship from sixteen to twenty-five miles, for the waistcoat pocket; and are of larger and all sizes, with increasing power, to command. The Royal Jubilee, 1851.—Valuable very small powerful waistcoat-pocket glass, the size of a walnut, by which a person can be seen and known one mile and a half distant; country scenery and ships are clearly seen at twelve to fourteen miles. They are invaluable for shooting, deer-stalking, yachting, to sportsmen, gentlemen, gamekeepers, and tourists. Newly-invented spectacles, none of the usual glare distinctly. The valuable advantage derived from this invention is, that vision becoming impaired is preserved and strengthened, and very aged persons are enabled to employ their sight as in the most juvenile period—can see with those lenses of a much less magnifying power—and they do not require the frequent changes to the dangerous effects of further powerful assistance.

DEAFNESS. THE ORGANIC VIBRATOR, an extraordinarily powerful, small, newly-invented instrument, for deafness, entirely different from all others, to surpass anything of the kind that has been, or probably ever can be, produced. Being of the same colour as the skin, it is not perceptible. It enables deaf persons to hear distinctly at church and at public assemblies. The unpleasant sensation of singing noises in the ears is entirely removed; and it affords all the assistance that could possibly be desired.—36, Albemarle-street Piccadilly. Observe, opposite the York Hotel.

NEW MUSIC, &c.

Full descriptive lists on application.
CHAPPELL, 50, New Bond-street.

PIANOFORTES, 25 guineas each.—D'ALMAINE and CO., 20, Soho-square, London (established 1785), respectfully intimate that, in addition to their Royal Pianofortes, 6½ octaves, rosewood and mahogany, at 25 guineas, they have opened new Show-rooms, for the exhibition of their NOVAchord Pianofortes, with repeater action, suited for apartments of the largest size, possessing the most brilliant, full, and sustaining quality of tone, magnificent appearance, and elegant finish. Every instrument warranted. The peculiar advantages of this Pianoforte are best described in the following opinions. The nominal superiority of the Novachord Pianoforte is at once apparent.—"We, the undersigned members of the musical profession, having carefully examined the Novachord Pianoforte, manufactured by Messrs. D'Almaine and Co., have great pleasure in bearing testimony to the excellence of the principle, which appears to us impossible to be applied on instruments of the same size possessing a richer and finer tone, more elastic touch, more equal development, or greater permanence of construction renders them a handsome ornament for the library, bedside, or drawing-room. (Signed) J. L. Abel, F. Benedict, H. R. Bishop, Thomas J. Briggs, F. Flavell, J. Dobrowsky, H. C. Hemsworth, W. H. Holmes, Stephen Glover, Henry Hugo Pierson, Isaac Nathan, C. Lucas, Catherine Hayes, W. H. Holmes, Jun., Charles Kalkbrenner, Land, Laura Alexander, Leo, A. Zerffi, R. T. Lodge, W. H. Montgomery, Nelson H. Nicholls, John Parry, H. Pontet, Henry Phillips, T. Also, POINT SARKETT CARRIAGES, holding four persons, made and sent for a few shillings per luggage-train to any part of the Kingdom, £11 each.—STARET, Coachmaker, Nottingham.

ST. MARK'S HOSPITAL for FISTULA and other DISEASES of the RECTUM, City-road, London.

The Right Hon. the Lord Mayor
John Masterman, Esq., M.P.
Treasurer and Chairman of Management—George Gun Sanderson, Esq.
Deputy Chairman—John Griffith Frith, Esq.
Honorary Treasurer—John Rumpfelde Kendall, Esq., M.D.
Honorary Surgeon—Frederick Salmon, Esq., F.R.S.

At a Meeting of the Committee of Management of this Charity it was resolved to discharge all pecuniary liabilities against the Institution, to accumulate which funded capital was ordered to be sold, the Committee trust by to the exertions of the friends of the Hospital and the benevolence of the public for the income required to maintain its present complement of twenty-four beds. The Committee now publish a APPEAL for aid, convinced that there are thousands of persons [illegible] to whom, if acquainted with the invaluable benefits the Institution confers on the poor afflicted, and the saddest of afflictions, would find it a privilege to co-operate in so much needed and such a work

The Committee acknowledges with much thankfulness the exertions of the Stewards and Friends of the Charity at its late Anniversary Festival, and have great pleasure in announcing the following contributions

(*Continued from page 534.*)

All eyes were turned to the two cracks, which have been so often engaged in honourable emulation—the *Phantom* and the *Thought*. There were some doubts expressed by those on board the steamer as to which got the lead; but it was evident that, although there was no want of alacrity on the part of the former, the latter went away while the *Phantom* was reaching over to the northward. Scarcely half a dozen boards had been made, when the *Phantom* weathered the *Thought*, and became the leading boat of the whole fleet. Some remarkably pretty sailing, reflecting the greatest credit upon all engaged, succeeded. The *Thought*, *Amazon*, and *Marina*, were close together, tack upon tack. In the early portion of the race the *Cormorant* drew away slightly, but was soon overpowered by her splendid rival. In North-fleet Hope the *Phantom* was full half a mile ahead; next was the *Amazon*, then the *Thought*, *Marina*, and *Vampire*; but shortly after this the *Marina* went to windward of the others into the second place, and the *Amazon* gave place to the *Thought*. The *Prince of Wales* arrived at the Chapmanshead at a little after three, when a gun was fired for the third class to round a boat there, and immediately afterwards the *Vampire* finished her downward course *solus*. The tide at this time had run out, and with the breeze so straight a dead noser, that it was considered unnecessary to prolong the exertions of the crews against wind and tide, and the club steamer was anchored two miles above Southend pier, for the yachts to round, which they did, viz.:—

	h. m. s.
Phantom	2 29 15
Marina	2 33 9
Thought	2 39 50
Amazon	2 40 0
Avalon	2 43 0
Sophia	2 50 0

Running sails were now substituted for those which had been used in beating down, and soon the *Phantom* was lost in the cloud of canvas accompanying the race. The *Amazon* carried away her topmast below Gravesend, or, it was thought, might have shown a better figure in the race. The conclusion was as follows:—

	h. m. s.
Vampire	5 33 0
Phantom	5 41 0
Marina	5 43 30
Thought	5 50 10
Avalon	6 0 0
Amazon	6 3 45
Sophia	6 13 0

The plate was accordingly awarded by Lord Alfred Paget. Mr. S. Lane receiving the £100 prize; Mr. W. J. Foster, the £50 prize; and Mr. C. Wheeler, jun., the £25 prize.

The presentations having taken place with the accustomed congratulations and honours, the club steamer returned to Blackwall and London in good time. The band of the Royal Horse Guards (Blue) was in attendance during the day, and played several of the most popular airs in their usual excellent style. A good cold collation was supplied by Mr Watts; and the whole affair gave the greatest satisfaction to all.

ROYAL THAMES YACHT-CLUB.—THE "PHANTOM" AND "MARINA."—CLOSE OF THE MATCH.

PARIS FASHIONS FOR JUNE.

THE Chantilly Races, as usual, drew together all that Paris can boast of in the way of elegance and beauty. The greater number of bonnets at the races of Friday (last week) were of *paille de riz*, or *d'Italie*, with *feuillages d'eau*, drooping on the neck. Flounced robes, which we imagined to be losing favour, are, on the contrary, almost exclusively worn, with patterns at the bottoms of the flounces; the stripes are still worn lengthwise, and widening, and narrowing on nearing the upper part of the flounce.

Among the most remarkable toilets, we observed a robe of grey pearl taffetas, with five flounces, bordered with fringe *gauffrée*. Upon the shoulders a Cashmere shawl, with a white ground, and rather low border of *rosaces* entwined with infinite taste; bonnet of *paille d'Italie*, set off with bunches of black grapes and tufts of wild roses the curtain of white taffetas, and still very long.

We observed that the *basquines* were worn very long, and almost invariably trimmed at the bottom, with two flounces placed one above the other, and meeting those of the robe, even when there are but three on the skirt. We doubt, however, as to whether the fashion will last long for summer toilets, which require to be lighter. Next we noticed a robe of *moiré antique bleu*. *Leaves à basques*, trimmed with three rows of fringe; the corsage somewhat open in front, showing a collar of Brussels lace, coming up to the neck, and forming a sort of breastplate beneath. The *attachés* of the same stuff as the robe, and also trimmed with fringe. The skirt was without flounces. Bonnet of *paille d'Italie*, with tufts of white feathers upon the *faisse*, and one beneath with roses, mingled with the blonde. India Cashmere shawls, with black ground and golden embroidery.

The Empress wore, a short time since, at the Horticultural Exhibition in the Champs Elysées, a robe of ash-grey taffetas, with three radiating flounces, white and pearl grey: there were also three flounces alternating with three other flounces of black Chantilly lace; the corsage of the robe was ornamented with the same flounces and laces. The bonnet was of black *gros des Indes* covered with lace, mingled with flowers and *jasmoir*; a large Cashmere shawl trimmed with deep black lace, crowned with a row of *frange à clochettes*. This toilet was worn as Court mourning.

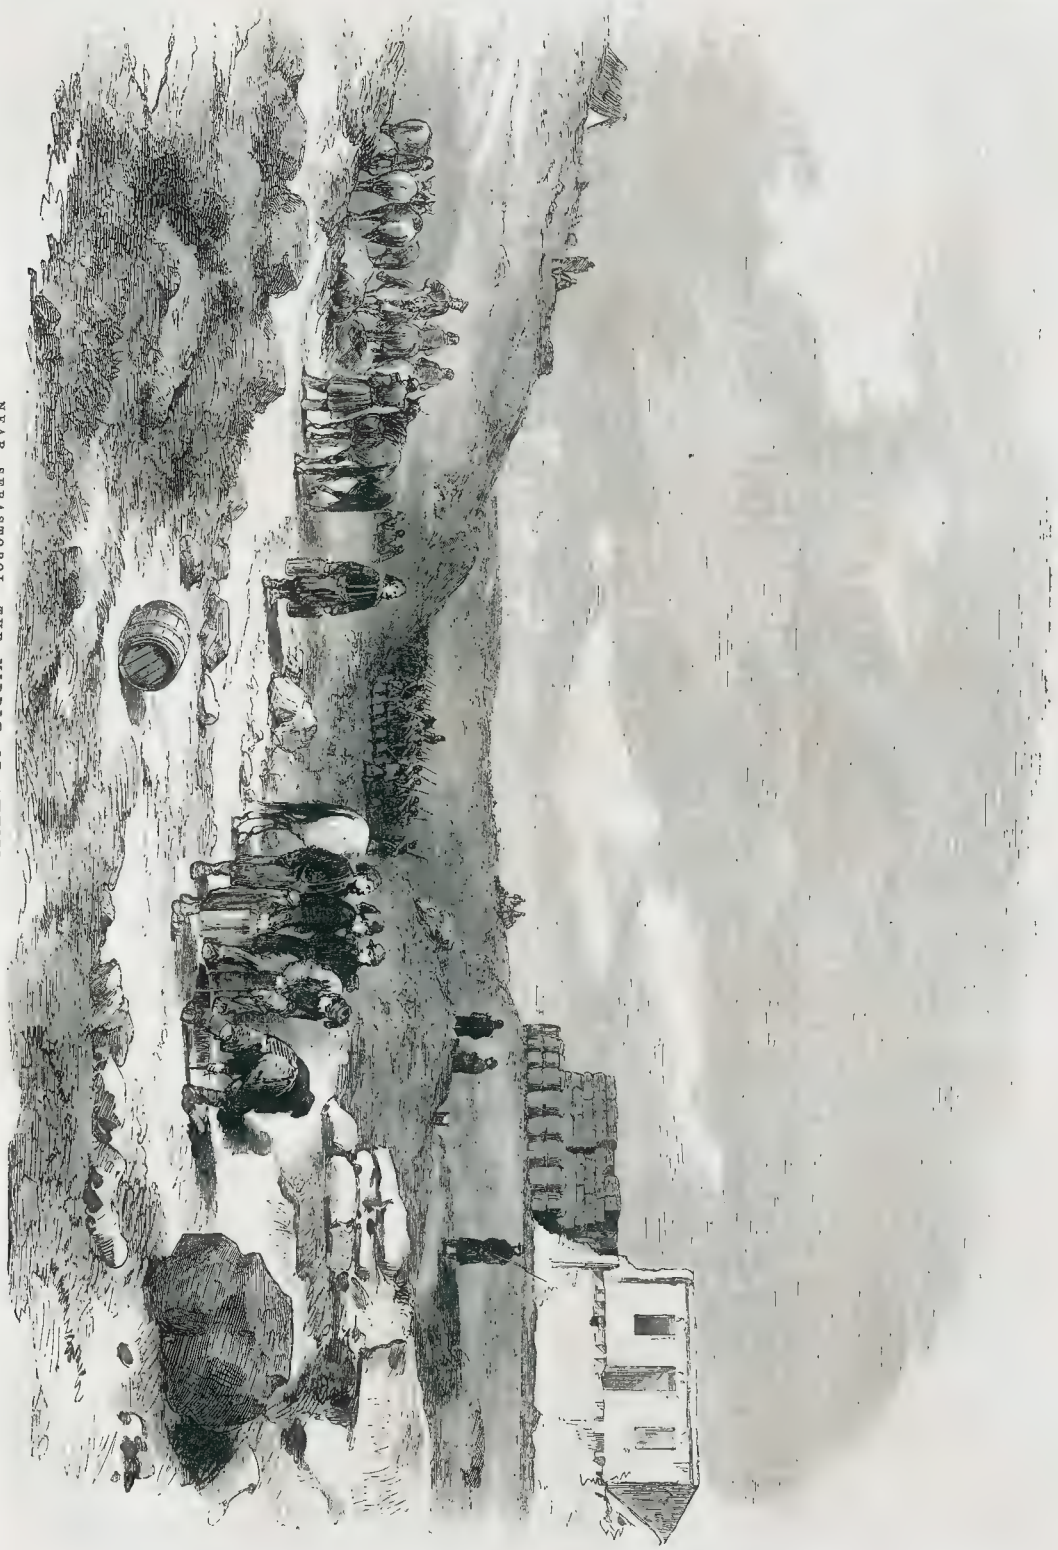
Among the Chantilly toilets we noticed a robe of Scotch taffetas, white, green, and black, the skirt had three flounces trimmed with a fringe *son pareil*, of the same shades. The corsage, high and close, was *à basques* very long, and *à brettelles*, the ends hanging and crossed before and behind; mantelet of black crape, *ruche* of ribbons. A rose coloured bonnet completed this simple toilet.

We hope ere long to describe the new summer stuffs, which, however, up to the present time, have not appeared. We have seen some robes and muslins of light shades, with silken draperies of brighter colours.

The Illustrations.—Lyons poplin robe, with stripes of black satin, and with three flounces; sleeves also trimmed with three flounces of a similar pattern, but closer. *Corsage à basques*, trimmed in front with straps of lozenge-pattern galoon of the same shade as the robe and the stripes. Sleeves. English lace; cap trimmed to correspond, with flowers, and ends of ribbons of black velvet. Bonnet of *paille d'Italie*, flat crown, and flowers trailed with foliage. Taffetas mantelet, with trimmings of gimp, separated by a little *ruche*; first row of fringe mounted on a square, and separated so as to form a sort of scarf, this first row falling upon the head of a second square which bears the last fringe.

Mantelet Irredge of black taffetas, trimmed with a splendid Chantilly lace, beneath which hangs Oriental lace: an ornament of *passementerie* is also placed above the lace, upon the cuffs and front of the mantelet.

PARIS FASHIONS FOR JUNE.



NEAR SEBASTOPOL.—THE MIDDLE OR "WHITE HOUSE" RAVINE.—(SEE PAGE 540.)

FOREIGN AND COLONIAL NEWS.

FRANCE.

(From our own Correspondent.)

PARIS, Thursday.

A few fine warm days deluded poor Paris into the illusory belief that the long-expected spring had decided to come to town from the far-off lands where it has so long extended its sojourn. No such thing. After passing three or four days in the capital whether dissatisfied with the state of the Exhibition, the dearness of provisions, the expense of lodging, no one can tell—but suddenly it took wing and fled without stating whither it has gone, or when it intends to return. The sun-blinds, awnings, and venetians are wound up; parasols are once more replaced by umbrellas; summer toilets are being discarded for that nondescript style of costume that consists in a mixture of the materials of January and July; and, were it not for shame, fires would be allowed to sparkle on many a hearth. We begin to suspect the fact is that the Exposition de l'Industrie has monopolised the whole of the caloric intended for the consumption of the metropolis:—*Ah! voila de la chaleur si vous en voulez!* So intense is the heat of the building, that not only the spectators are hardly able to make the round thereof, but several of the exhibitors have been forced to beat a retreat. The German silk manufacturers have hung curtains over their wares, to prevent their colours being destroyed, and the fabricators of Lyons have refused to display their productions at all until the jury shall have examined them. Some robberies have already taken place; among others a splendid tazza, mounted with onyxes, exhibited by a manufacturer of Oldenburg. The Company having resisted every attempt made to induce them to give one day gratis for the *ouvrier* class, the Emperor, in a late visit, stated his intention of paying the expenses of this day from his private funds. An arrangement was therefore entered into that every *ouvrier*, on presenting a certificate from the *Commissaire de Police* of his *quartier*, should receive a permanent ticket for all the Sundays, commencing with the month of June. Since this, however, it appears that there is great question of the establishment of a Government measure for declaring the *Exposition Universelle* an institution of public utility, and taking it into its own hands, indemnifying the Company, according to the most liberal calculation of expenses: in this case, the entrance, with the exception of certain reserved days, would be gratis. It is reported that for this indemnification, the daily sum of 5000 francs will be allowed.

All the temporary establishments arranged in the Champs Elysées about the Palais, have, as yet, proved more or less failures. Nevertheless a variety of new private exhibitions are being prepared; amongst others, is to figure that of the pictures of the democrat painter, M. Courbet, whose productions, especially a female figure "La Baigneuse," excited so general (if not so favourable) a degree of attention in the annual exhibitions of paintings two years since.

The arrival of the young King of Portugal causes a good deal of interest. It is expected his Majesty will remain about three weeks—three persons of the Imperial household are attached to his person. The *salons* of the Prince Napoleon have been prepared to receive the Royal guest with due honour: and from the time of his arrival the Prince will commence a series of weekly receptions, in which the Princesse Mathilde will do the honours to the ladies invited. It is said that a ball will be given at the Hôtel de Ville on the occasion of his Majesty's visit: and there is also a talk of a fête at St. Cloud. It appears almost certain that, between the visits of the King of Portugal and Queen Victoria, the Emperor and Empress will pass a short time at Biarritz.

In the Bois des Vincennes twenty eight acres of trees have been cut down to establish the foundation of an hospital, about to be erected, there, we believe, for civil not military invalids.

The scaffoldings which concealed the new buildings of the Louvre are being removed on all sides. The extreme rapidity with which these works have been executed has, in certain parts, given rise to defects injurious to the general appearance of the building as viewed from the quays. Some of these are irremediable; others, the Emperor—who has followed the course of construction with unceasing interest—has ordered must be remedied. In the new part, where the junction takes place with the old gallery looking on the quay, the roofs are much higher than those of the part previously existing; and these he has decided shall be destroyed, and replaced by Italian galleries—which, he considers, will produce a much better effect. It appears that the estimate originally given in for the cost of the labours to be executed in this work amounted to the sum of twenty-seven millions of francs, and that there has already been expended on them nearly forty millions.

A variety of experiments are being tried, under the surveillance of the Government, more especially at St. Denis, to prepare bread that, while possessing all the necessary qualities for nourishment, can be sold at a lower price. It appears that these have succeeded to the extent of reducing the cost a sous per kilogramme (2 lbs.), but it is expected further experiments will produce more important results.

An hotel in the Rue de Penthièvre, Faubourg St. Honoré, has been hired for the reception of the Aldermen of the city of London; the Lord Mayor will be accommodated at the Hôtel de Ville.

The great theatrical attraction of the moment is the *troupe* of the King of Sardinia at the Italian Opera-house. The star of the company is the celebrated Ristori, an actress whose extraordinary combination of tragic and comic powers, to which is added the gift of beauty (the latter a little on the wane), has rendered her name familiar all over Italy for years past. Never was reputation less usurped. Madame Ristori may be said to stand alone, bearing with ease her double sceptre. Passion, energy, sentiment, unite with archness, finesse, and gaiety: the *lingua toscana, bocca romana*, enchant with their full melody; and every look, every gesture, has its grace and meaning. One or two of the actors have also considerable merit.

SPANISH TROUBLES.

To all appearance Spain is so far as ever from a state of internal peace and security. The Carlist party taking advantage of the opposition which the bill authorising the sale of church property has excited among the clergy, has been busily at work in the army, and the result is that several regiments have revolted.

The Madrid journals of the 24th ult. contain a Royal decree by which the captainicies-general of Aragon, Burgos, and Navarre, are declared in a state of siege. They also contain telegraphic despatches from Saragossa, Calatayud, Navarre, and Burgos, received in the course of the previous evening, and giving an account of the measures taken for putting down the military risings. The first three merely state that the local authorities, at the head of military forces were still in pursuit of the insurgents; the last says that a detachment had fallen in with a band of seven military insurgents at Villadiego, and had captured one man, all its seven horses, and nearly all its arms. General Bedoya had been nominated to the command of the troops sent from Madrid to act against the insurgents. Extraordinary powers have been demanded of the Cortes by the Spanish Ministry. These consist in authority to *interner* any individual whom the Council of Ministers may regard as dangerous to public order; and, further, to suppress any newspapers whose hostility shall be deemed dangerous to the powers that be.

The *Espano* of the 23rd states, on the authority of letters from Rome, that the Papal Court considers the carrying into effect of the bill for the sale of ecclesiastical property a violation of the concordate, and that it consequently considers breaking off relations with Spain, and publishing protests against the measure.

The cry of the Carlist band is "Vive la Religion: death to heretics!"

SARDINIA AND THE POPE. The Convents Suppression Bill, with the amendments of the Senate, has been adopted by the Sardinian Chamber of Deputies, by a majority of 26 to 23. At Turin public expectation is on the tip-toe to know how the Court of Rome will act. If an excommunication should be determined on, the country is prepared to bear it.

THE WAR IN THE CRIMEA.

At last there is an end to Prince Gortschakoff's stereotyped phrase that "nothing of importance has occurred on other points of the peninsula." The second expedition to Kertch was more successful than the first one, having taken possession of that port and Yenikalé without opposition apparently. The expedition, under Sir George Brown, arrived off the Strait of Kertch on the Queen's birthday; and the troops having landed and ascended the heights while several steamers went up to the town, the Russians, seeing that it was useless to resist so strong a force, blew up their fortifications, destroyed a large quantity of army stores, and fled. According to Vice-Admiral Bruat's despatch from the Sea of Azoff, the magazines destroyed by the Russians at Kertch contained 300,000 sacks of corn, 160,000 sacks of oats, and 100,000 sacks of flour. On Thursday a despatch was received from Lord Raglan, dated the 29th of May, stating that Sir George Brown reports, on the 28th, that the troops continued healthy; that five vessels laden with corn had run into Kertch, ignorant of the place having been taken, and were captured, and that the number of guns taken by the Allies exceeds 100. A foundry near Kertch, where shot, shell, and Minié balls were manufactured, was also destroyed by Sir George Brown. One source, therefore, whence the defenders of Sebastopol have received their supplies of ammunition, has been taken from them; the Russian means of carrying on a communication between the Crimea and the main have been cut off; and the Allies command all the principal ports of the Sea of Azoff—Taganrog, where the iron of Siberia and the ordnance manufactured in the Ural are shipped, and the rising grain depôts of Berdiansk and Marianopol.

The occupation of Kertch closes the Sea of Azoff and the whole south eastern portion of the Russian empire; the entire Circassian coast is cut off; and the contest is carried on within the contracted limits of a peninsula where the numerical strength of the enemy cannot be brought to bear against us, and where it becomes every day more difficult to support a large body of troops and to secure a line of retreat. The Russians will soon, in fact, have no base of operations but the burning steppes behind the river Salghir, which cannot be crossed by large bodies of men in the height of summer without serious loss, and cannot in any manner be occupied or defended. According to all experience of war, the Russian army in the interior of the Crimea must be in a position of great embarrassment, for its movements are confined within a small peninsula, having only two, or at most three, lines of road for the arrival of supplies or the withdrawal of troops; and even the lines of road by the tongue of Arabat and by the bridge over the Putrid Sea will be interrupted by the Allies, if the steam gun-boats in the Sea of Azoff succeed, as they are likely to do, in forcing the passage of Genitchi, between Arabat and the mainland.

If the telegraph is to be trusted, the occupation of Galatz has been decided on, to be followed by an attack upon Ismail and Reni. Whether this latter movement is intended as a preliminary to the invasion of Bessarabia, does not appear. The occupation of these three towns would give the Allies the command of the Lower Danube, and would enable them to liberate the grain trade of the Principalities—a most important step at the present moment, when food is so dear in England and America.

Simultaneously with the important success at Kertch, the French have distinguished themselves by another desperate attack upon the outworks of Sebastopol, in which they have been victorious, although at no small cost. In a despatch from General Pelissier, dated the 23rd May, he says:—

The enemy had formed between the Central Bastion and the sea a large place d'armes, where they intended assembling considerable forces, in order to make important sorties against us. On the night of the 22nd we attacked these works, which were defended by almost all the garrison. The combat was very severe, and lasted almost the whole night. We have taken and occupied the half of the works, and I hope to be able to announce to you to-morrow that the remainder were taken the night before.

In the second despatch, dated ten o'clock at night on the 24th ult., General Pelissier says:—

We have happily completed last night the capture of the works attacked the previous day, and we occupy them. The enemy, who in the first attack suffered enormous losses, yielded ground readily. Ours, though severe, have been less than theirs. The anniversary of the birthday of her Majesty Queen Victoria was cordially celebrated to-day with our Allies.

The *Moniteur* of Monday published the following despatches received by the Minister of War from General Pelissier, containing some further particulars:—

CRIMEA, May 25, 10 p.m.—To-day we have occupied the line of the Tchernaya. The enemy, who were not in force, offered little resistance in disputing the ground, and retreated rapidly into the hills. We have definitively established ourselves in the works, carried during the nights of the 22nd and 23rd. An armistice was agreed upon for burying the dead, and we were enabled to form an estimate of the enemy's losses. They must be about 5000 or 6000 men killed and wounded.

May 26, 10 p.m. The enemy has not made any demonstration, either in front of the place, or against our lines on the Tchernaya. The work of fortification at Kamiesch are progressing. The sanitary condition of the army continues good.

This victory completes the attack made on the night of the 2nd of May. On that occasion, as our readers will remember, the French carried a portion of the external Russian works, but a considerable intrenchment remained between the Central Bastion and the Quarantine Fort, which was taken in the successive nights of the 22nd and 23rd ult. Prince Gortschakoff, in a report relating to the attack on the 22nd, merely states that the Russian forces lost 300 men "in driving back the enemy," but, in fact, they did not drive back the French. General Pelissier expressly reports that his troops are definitively established in the work, by which we understand that the line of Russian counter-approach is turned against the place, and forms part of the fourth parallel of the attack. The French are also constructing and arming new breaching batteries within 100 metres of the place. Instead of the sorties directed by the Russians against the lines of the besiegers, we have now, therefore, advanced into a portion of the works of the enemy, and on all points a steady progress has been made.

On the following day (as will be seen from the above despatch), the 25th of May, General Pelissier reports the occupation of the valley of the Tchernaya. During the whole of the winter the Allies have been intrenched on the southern side of that little stream, and unfolded their attack by the steep cliffs which inclose the valley. The Russians held and fortified in like manner the northern bank, on which lie the ruins of old Inkerman. Their guns in position commanded the valley, and sometimes reached our encampment on the other side. As long as they occupied those heights in force it was impossible for the Allies to descend to the river; and, as we are informed that the river is now within our lines, it must be inferred that the forces which commanded it from the opposite side have been withdrawn. Indeed, General Pelissier states that "the enemy, not being in force, made very little resistance, and speedily retired to the mountains." But, if we understand this expression correctly, it would appear that no considerable portion of the Russian army remains between the Tchernaya and the mouth of the Belbek, and that the Allies may consequently ere long occupy the heights north of the river, and complete the investment of the town. The telegraphic despatch is not quite clear on this point; but the occupation of the valley of the Tchernaya would seem to imply the possession of both sides of the valley, without which the temporary possession of the low ground would be of no utility.

AMERICA.

The mail-steamer *Atlantic*, which left New York on the 16th ult., arrived at Liverpool on Sunday last. The political news relates chiefly to the progress of the Know Nothing party, which appears to be stronger in the interior than in the seaboard States.

The *Illinois* had arrived at New York with Californian advices to the 17th of April, and 1,016,380 dollars on freight. The brig *Vesta*, with Colonel William Walker and about 150 of his followers, was to have sailed for Nicaragua. The mines were yielding largely, and every day brought reports of new discoveries. Farmers and clerks who, in times past, had been intent on following their professions in San Francisco and other cities, were flocking to the mines to try their fortunes at gold digging. The *Golden Age* was ashore near Panama. The passengers, mails, and specie were saved.

News from Mexico to the 5th inst. had been received. Santa Anna, who, according to previous accounts, was so seriously ill that his life was despaired of, had proceeded south at the head of a body of troops to do battle with the insurgents. An addition to the navy had been made by the purchase of the propeller *Benjamin Franklin* and the bark *Catherine Augusta*. A report was current in Mexico that a large number of troops in Sonora had pronounced against the Government. Well authenticated accounts of the discovery of rich gold placers located in the neighbourhood of San Francisco, about eight days' march from Acapulco, are published.

INDIA AND CHINA.

By the arrival of the Overland Mail we have received news from Calcutta to the 23rd of April; Bombay, the 1st of May; and Hong-Kong, the 15th of April.

The latest intelligence from Burmah is rather unfavourable to the prospects of peace. Reports have arrived at our frontier station from the capital of the occurrence of another palace revolution, which has terminated in unseating the King, and elevating the heir-apparent to the throne.

The peace of the north-west frontier beyond Peshawur has been again disturbed by the restless and predatory tribes, whose hereditary vocation is plunder. On a recent occasion a small force was sent to chastise the Bussee Keil Afreedies, but they effected nothing, except the burning of some stacks of wood intended for the Peshawur market. Another expedition has started for the Meeranzie valley, at the end of April, consisting of 2000 or 3000 horse and foot, light Punjabee troops, accustomed to mountain warfare, with a good complement of artillery. Major Edwardes, the Political Agent, accompanies the expedition, which is under the command of Brigadier Chamberlain, one of the heroes who has been trained to generalship at an early age in the wars in which we have been engaged for the last fifteen years.

Hoolh Goolab Sing and his nephew, Juwahir Sing, threaten to settle some long-existing differences between them by a recourse to arms, and as this will be an infraction of the treaty of Mooltan, entered into by Sir Henry Lawrence with the British Government in 1846, the Governor-General has directed a watchful eye to be kept on the movements of Goolab Sing's troops, resolving not to espouse the cause of either of the chiefs, unless the other should disobey the orders of Government.

From Shanghai, the latest dates are to the 9th April. All was quiet there; and the troops having been withdrawn towards Nankin, the country round was in former tranquillity. At Canton political affairs remain much as before; but, as the pirates, who have been driven from their stronghold near Whampoa, are now scattered over the province in detached parties, commerce has not yet resumed its course, and but little business has been done either in exports or imports. An expedition, consisting of the *Hornet* and *Bittern*, with boats from the *Winchester*, *Sybille*, and *Spartan*, had been dispatched against them, which destroyed ten junks, and about ninety men. Of those who got on shore, the majority were hunted down and killed by the villagers.

Sir John Bowring was daily expected from Siam, and would then proceed to Japan, with Sir James Stirling.

NATIONAL SPORTS.
